1 THE UNIVERSITY

1.1 ADMINISTRATIVE OFFICERS

DONALD O. HEBB, B.A. (Dal.), Ph.D. (Harv.), D.Sc. (Chic., Wat., York, McM.), D.H.L. (Northeastern), LL.D. (Dal., Queen's, W. Ont.), M.A., F.R.S., F.R.S.C.
Chancellor

STUART M. FINLAYSON, B.Sc. *Chairman of the Board of Governors*

ROBERT E. BELL, C.C., B.A., M.A. (U.B.C.), D.Sc. (U.N.B., Laval), LL.D. (Tor.), Ph.D., F.R.S., F.R.S.C. *Principal and Vice-Chancellor*

EIGIL PEDERSEN, B.A. (Sir G. Wms.), Ed.D. (Harv.), M.A.
Vice-Principal (Academic)

LEO YAFFE, B.Sc., M.Sc. (Man.), Ph.D., F.C.I.C., F.A.P.S., F.R.S.C.
Vice-Principal (Administration)

MAURICE McGREGOR, M.B.B.Ch., M.D. (Rand), F.R.C.P. (Lond.), F.R.C.P.(C)
Vice-Principal (Health Care)

DALE C. THOMSON, D.F.C., B.A. (Alta.), D.U. (Paris) *Vice-Principal (Planning)*

A. C. BLACKWOOD, B.Sc., M.Sc. (Alta.), Ph.D. (Wis.), F.R.S.C.
Vice-Principal (Macdonald College)

ALLAN C. McCOLL, D.F.C., B.Com., C.A. *Director of Finance*

COLIN M. McDOUGALL, D.S.O., B.A. *Secretary-General*

JEAN-PAUL SCHULLER, B.A. (Ott.) *Registrar*

N. DOUGLAS JOHNSTON, B.Com. *University Treasurer*

PEGGY SHEPPARD, B.A. (Sir G. Wms.), B.Ed. *Admissions Office, Director*

HARRY E. GRIFFITHS, M.A. (Middlebury), B.Com.
Athletics, Physical Education and Recreation, Director

CHARLES E. NOEL, B.Com., C.A. *Business Operations, Director*

RONALD G. KURANOFF *Chief Accountant*

JOHN ARMOUR, AACCA *Comptroller*

M. SAEED MIRZA, B.Eng. (Karachi), M.Eng., Ph.D. *Dean of Students*

JEAN DAVID, L.S.A. (Montr.), Ph.D. (Calif.) *Macdonald College, Registrar*

WILLIAM C. SHIPLEY, B.Sc., M.A.
Macdonald College, Secretary and Co-ordinator of Administrative Services

D. LORNE GALES, B.A., B.C.L. *McGill Development Program, Executive Director*

ROBIN STRACHAN, B.A., M.A. (Cantab.)
McGill-Queen's University Press, Director

JOHN E. BATES, B.Sc. (Lond.), B.Com. (Sir G. Wms.)
Management Systems, Director

PAUL M. MATTHEWS, B.A. (Ott.), M.Sc. (Fordham) *Personnel Services, Director*

G. S. KINGDON, B.A.Sc. (Tor.) *Physical Resources Office, Director*

A. DOUGLAS ELLIOTT, M.M., B.Eng. *Physical Plant, Director*

ANDREW ALLEN *Public Relations and Information Office, Director*

EDWARD K. DESROSIERS, B.A., M.A.
Research for Planning and Development Office, Director

JOHN G. LOHRENZ, M.D. (Man.) *University Health Service, Director*

R. A. FARLEY, B.A. (Ashland), B.L.S. (Wis.), M.S., Ph.D. (Ill.)
University Libraries, Director

1.2 DEANS AND DIRECTORS

A. C. BLACKWOOD, B.Sc., M.Sc. (Alta.), Ph.D. (Wis.), F.R.S.C.
Vice-Principal of Macdonald College and Dean, Faculty of Agriculture
ROBERT VOGEL, B.A. (Sir G. Wms.), M.A., Ph.D. *Arts*
ERNEST R. AMBROSE, D.D.S., F.I.C.D., F.A.C.D. *Dentistry*
C. WAYNE HALL, M.A. (Bishop's) *Education*
T. H. BARTON, Ph.D., D.Eng. (Sheff.), F.I.E.E., S.M.I.E.E.E.
Acting Dean, Engineering
WALTER F. HITSCHFELD, B.A.Sc. (Tor.), Ph.D. *Graduate Studies and Research*
JOHN E. C. BRIERLEY, B.A. (Bishop's), D.U. (Paris), B.C.L. *Law*
STANLEY J. SHAPIRO, A.B. (Harv.), M.B.A., Ph.D. (Penn.) *Management*
R. F. PATRICK CRONIN, M.D.,C.M., M.Sc., F.R.C.P. (Lond.), F.R.C.P.(C)
Medicine
HELMUT BLUME,
(Graduate, Staatliche Akademische Hochschule für Musik, Berlin) *Music*
GEORGE JOHNSTON, M.A., B.D., D.D. (Glasgow), Ph.D. (Cantab.)
Religious Studies
E. J. STANSBURY, M.A., Ph.D. (Tor.) *Science*
NORBERT SCHOENAUER, B.Arch. Royal Hungarian Univ.), M.Arch. *Architecture*
GEORGE MARSAGLIA, B.Sc. (Colorado), Ph.D. (Ohio State) *Computer Science*
HELEN R. NEILSON, M.B.E., B.H.S., M.Sc. *Food Science*
EFFIE C. ASTBURY, M.L.S. (Tor.), B.A., B.L.S. *Library Science*
JOAN M. GILCHRIST, B.N., M.Sc. (Appl.), R.N. *Nursing*
HELEN M. GAULT, T.M.M.G., T.M.E., B.Sc. (P. & O.T.)
Acting Director, Physical and Occupational Therapy
DAVID E. WOODSWORTH, B.A. (Tor.), M.A. (Mich.), Ph.D. (Brandeis) *Social Work*

1.3 HISTORY

In 1813 the Hon. James McGill, a leading merchant and prominent citizen of Montreal, died and left in his will a property of forty-six acres and a sum of 10,000 pounds to the already existing Royal Institution for the Advancement of Learning upon condition that the latter erected "upon the said tract or parcel of land, an University or College, for the purpose of education and the advancement of learning in this Province"; and further upon condition that "one of the Colleges to be comprised in the said University shall be named and perpetually be known and distinguished by the appellation of 'McGill College'."

Owing to a lack of funds and persistent opposition the complete University which had been planned by the Royal Institution was not built, but after years of litigation and effort a Royal Charter was granted in 1821 and the University of McGill College was opened in 1829 with what remained of James McGill's legacy as its endowment, and teaching then started in the Faculties of Medicine and Arts. The Medical Faculty grew steadily, and after an amended Charter was secured in 1852 a new era of progress began for the Faculty of Arts with the appointment in 1855 of Sir William Dawson as Principal, a position which he held for thirty-eight years.

Since 1855 the University has grown vigorously, dividing itself into further faculties. In 1899 the Royal Victoria College was opened, a gift of Baron Strathcona, to provide separate teaching and residential facilities for women students.

Gradually, however, classes for men and women were merged, and now the University is wholly coeducational. In 1907 Macdonald College was established at Ste. Anne de Bellevue, as a residential college for Agriculture, Household Science, and, originally, the School for Teachers, which is now the Faculty of Education and located on the Montreal campus. This general development was greatly facilitated by the generosity of Sir William Macdonald, whose gifts to the University included a Physics Building, a Chemistry and Mining Building, and an Engineering Building, in addition to the college named after him.

At present more than seventeen thousand students are taking regular university courses. New buildings have been erected or acquired to provide the undergraduate and research facilities needed by the increased student body, and include residences, gymnasium, swimming pools and winter stadium as well as a University Centre and a concert hall.

1.4 INCORPORATED AND AFFILIATED COLLEGES

1.4.1 INCORPORATED COLLEGES

Macdonald College

Macdonald College is situated at Ste. Anne de Bellevue, about twenty-five miles from Montreal. It consists of the Faculty of Agriculture and the School of Food Science. All degree courses are under the control of the Senate of McGill University and all the short term courses in agriculture are under the direction of the Faculty of Agriculture.

Vice-Principal — A. C. Blackwood, B.Sc., M.Sc. (Alta.), Ph.D. (Wis.), F.R.S.C.

The Royal Victoria College

3425 University Street

The Royal Victoria College is a college of McGill University and provides residential accommodation for women students.

Warden — Donna R. Runnalls, B.A. (U.B.C.), Ph.D. (Tor.), B.D.

1.4.2 AFFILIATED THEOLOGICAL COLLEGES

The Montreal Diocesan Theological College

3473 University Street

Principal — The Rev. Monroe Peaston, M.A., B.D., Th.D.

The United Theological College of Montreal

3473 University Street

Principal — J. A. Boorman, B.A., M.A., Ph.D.

The Presbyterian College of Montreal

3495 University Street

Acting Principal — The Very Rev. C. Ritchie Bell, B.A., B.D., D.D.

NOTE: The above three colleges train students for the Ministry and grant certificates for ordination but they have remitted their degree-granting powers to the University.

1.5 GOVERNMENT

McGill University is a Corporation created by a Royal Charter granted by the Crown of the United Kingdom, a general supervisory power being retained by the Crown and exercised through the Governor-General as *Visitor.*

The *Governors* of the University constitute the Royal Institution for the Advancement of Learning, a corporation existing under the laws of the Province of Quebec. In them is vested the management of finances, the appointment, in consultation with Senate, of Professors, and other duties. Twenty-five of the Governors are elected by the Board from amongst those nominated by its Nominating Committee; five are elected by the Graduates' Society; five are elected by Senate from amongst its members, and three elected by students from amongst the student body. The Board elects the Chancellor of the University and also, from among its members, a Chairman to preside at its meetings, who may also be the Chancellor. The Chancellor and the Principal are *ex officio* members.

The *Chancellor* is Presiding Officer of Convocation and of Joint Sessions of the Board of Governors and the Senate.

The *Chairman of the Board of Governors* is President of the Royal Institution for the Advancement of Learning.

The *Principal* is the academic head and chief administrative officer. He is appointed by the Board of Governors after consultation with Senate. He also holds the office of Vice-Chancellor of the University and is, *ex officio,* Chairman of Senate.

Senate consists of eighty-four voting members: The Chancellor, the Principal, the Chairman of the Board of Governors, the Vice-Principals, the Deans of the Faculties, the Dean of Students, the Director of Libraries, the Director of the Centre for Continuing Education, the President of the Students' Society, all *ex officio,* forty-one members elected by their Faculties, five Governors elected by the Board (including the Chairman of the Board), two librarians elected by librarians performing the function of librarian in the University's library system, and fourteen students selected by the students. The Senate is the highest academic authority of the University and has control over admission, courses of study, discipline, and degrees.

The carrying out of the regulations of Senate along with primary responsibility for the conduct of the educational work of the University is entrusted to the various Faculties and Schools.

1.5.1 STUDENT GOVERNMENT

All students registered in the University are members of the Students' Society except for students governed by the constitution of the Macdonald College Students' Society and students registered in the Faculty of Graduate Studies and Research who are non-resident students or full-time members of the teaching staff.

The executive and legislative authority of the Society is vested in the Executive Committee and Students' Council respectively. The Council, as the governing body, is responsible for the proper functioning of all activities of the Society. All undergraduate societies, major activities, clubs, societies, publications and other campus organizations of the Students' Society are under its jurisdiction. It is the only recognized medium, apart from the Students' Athletics Council, between the student body and the University authorities.

The Council is responsible to the students through open meetings and referendums of the Students' Society, and operates according to the constitution of the Students' Society.

Full details of the operations, constitution, officers and committees of the Students' Society are given in the *Student Handbook,* obtainable from the Students' Society upon request.

1.6 UNIVERSITY LIBRARIES

The University libraries include the McLennan Library, the Redpath Library and various Faculty and Departmental libraries in other buildings and the library at Macdonald College in Ste. Anne de Bellevue. The McLennan Library houses the main research collections for humanities and the social sciences, while the Redpath Library provides expanded facilities for the undergraduate library, the Blacker-Wood collection and the Blackader-Lauterman collection. The libraries of McGill now contain almost 3,000,000 items and receive 16,000 serial titles, many Government publications and transactions of various literary and scientific societies. The McLennan Library is rich in early printed books, in Canadiana, including the Lande Collection, and in rare pamphlets of the sixteenth to eighteenth centuries. It has special collections of David Hume, Rousseau, Rilke, Blake, Napoleon, Stephen Leacock and Rudyard Kipling, the Stearn Library of books and puppets, illustrating the history of the marionette theatre of all nations, and the William Colgate collection devoted to typography.

The McLennan Library

1) THE MAIN LOAN AND RESEARCH COLLECTION, concentrated on the social sciences and humanities as well as other subjects — monographs, journals, documents, microfilms.
2) THE REFERENCE COLLECTION of encyclopaedias, dictionaries, bibliographical aids, indexing and abstracting services, etc., is located on the main floor.
3) A CURRENT PERIODICALS READING ROOM housing approximately 2,400 titles is on the second floor.
4) A GOVERNMENT DOCUMENTS COLLECTION AND READING AREA is located on the second floor.
5) A RARE BOOKS AND SPECIAL COLLECTIONS DEPARTMENT including a reading room is on the street floor. The Lande Collection of Canadiana is on the fourth floor.

The Redpath Library

1) THE UNDERGRADUATE LIBRARY. This is an open access circulating collection of approximately 111,000 items. Services of the U.L. include Reference, Reserves, Circulation and a Periodicals Reading Room. The Undergraduate Library occupies the basement, street and main floor levels.
2) THE BLACKER-WOOD LIBRARY OF ZOOLOGY AND ORNITHOLOGY is on the second floor. This is an internationally known collection of some 71,000 items.
3) THE BLACKADER-LAUTERMAN LIBRARY OF ARCHITECTURE AND FINE ARTS occupies the entire third floor and houses approximately 37,000 items, numerous periodicals and architectural drawings.
4) THE AUDIO-VISUAL ROOM AND DROP-IN CENTRE are located on the second floor. The Audio-Visual Room is furnished with 225 carrels equipped with audio-visual devices such as slide projector, tape recorder, filmstrip and super-8-loop projectors and television screens.

Departmental and Other Libraries

THE BOTANY AND GENETICS LIBRARY in the Stewart Biological Sciences Building serves some of the needs of the Biology and Psychology Departments. It contains more than 16,000 books, periodicals, government publications and pamphlets.

THE FACULTY OF DENTISTRY LIBRARY is located in the Strathcona Anatomy and Dentistry Building and provides 10,000 books and periodicals for faculty and student use.

THE EDUCATION LIBRARY, housed in the Education Building, contains approximately 87,000 items together with a Curriculum Laboratory, housing tapes, films and other teaching aids and a collection of children's books.

THE ENGINEERING LIBRARY of 31,000 items contains an extensive collection of books, reference material and periodicals in the fields of civil, electrical and chemical engineering for the use of undergraduates, graduate students and faculty in Engineering. It is housed in the Macdonald Engineering Building.

THE INSTITUTE OF ISLAMIC STUDIES LIBRARY contains approximately 69,000 items and a good collection of journals dealing with many aspects of the Muslim world past and present, with particular emphasis on the Humanities. About one half of the works are in English and other Western languages, and there is a good collection in Arabic, Persian, Turkish, Indonesian, and Urdu. It is located in the Leacock Building.

THE LAW LIBRARY contains over 161,000 items, including virtually all Canadian works, and the principal law reports of the United Kingdom, France and the United States, as well as a selection of reports from elsewhere. It is located in Chancellor Day Hall.

THE GRADUATE SCHOOL OF LIBRARY SCIENCE LIBRARY, on the street floor of the McLennan Library, contains over 74,000 volumes of books and journals in the fields of publishing and library science.

THE MANAGEMENT LIBRARY on the second floor of the Samuel Bronfman Building contains more than 185,000 items in the fields of management, economics, industrial relations and business.

THE MATHEMATICS LIBRARY in Burnside Hall contains some 250 journals as well as some books devoted to advanced theoretical mathematics.

THE MEDICAL LIBRARY in the McIntyre Medical Sciences Building contains over 170,320 items and receives approximately 2,000 current journals. This library is noted for its collection in the field of Ophthalmology and its retrospective collection of European medical publications. It is open to all who have need to use its collections.

THE FACULTY OF MUSIC LIBRARY contains some 24,000 items, including reference books and periodicals, scores, tapes and records with listening facilities for records and tapes. The Library is located in the Strathcona Music Building.

THE SCHOOL OF NURSING LIBRARY contains approximately 20,000 volumes and 262 periodical titles. Although the emphasis is on nursing literature, the collection reflects the entire curriculum, including economics, education and the social sciences. The Library is located in Wilson Hall.

THE OSLER LIBRARY OF THE HISTORY OF MEDICINE contains a collection of about 31,500 items in the history of medicine and allied science, and has, as a nucleus, the 8,000 volumes, bequeathed to McGill by one of its most famous pupils and teachers, Sir William Osler. It is especially this portion which is rich in 15th, 16th, 17th, and 18th century medical books. The Library is constantly adding to the collection, especially new books on the history of all aspects of medicine and medical people. It is located on the third floor of the McIntyre Medical Sciences Building. Undergraduates and all interested persons may use the Library.

THE PHYSICAL SCIENCES LIBRARY houses the Baillie Library of Chemistry, the A. N. Shaw Library of Physics, the Mining, Metallurgy, Geology and Chemical Engineering collections and contains the greater part of the University's collection in the physical sciences. It is located on the main floor of the Frank Dawson

Adams Building, and houses in excess of 89,000 volumes of books, periodicals and government publications.

THE RELIGIOUS STUDIES LIBRARY, located in the William and Henry Birks Building, contains 59,000 items in the fields of theology, philosophy, church history, and related subjects.

THE SCHOOL OF SOCIAL WORK LIBRARY contains nearly 30,000 items in the fields of social work, community organization, social sciences, and psychology. While the collection is mainly for the use of students of the School other students may read in the Library. It is located on the main floor of Wilson Hall.

THE MACDONALD COLLEGE LIBRARY at Ste. Anne de Bellevue contains almost 200,000 volumes in the fields of agricultural and environmental sciences including food science.

1.7 UNIVERSITY MUSEUMS

1.7.1 THE PETER REDPATH MUSEUM OF NATURAL HISTORY

Built in 1882, this was the first specially designed museum building in Canada. Its extensive collections, begun in the 1850's by the founder, Sir William Dawson, have been augmented over the years by gifts and bequests and are constantly expanding through curatorial field research. They are used for basic reference in graduate and undergraduate teaching.

The Museum's holdings, which now include over a million scientific specimens, are especially rich in invertebrate palaeontology, specific areas of vertebrate palaeontology, palaeobotany, malacology, and ornithology. Particularly notable are the Carpenter Collection of Mollusca, the Dawson Collections of Palaeontology, and the Ferrier Collection of Minerals.

The Museum has close ties with professional scientific societies in many related disciplines and is also active in national and international museum associations.

1.7.2 THE McCORD MUSEUM

This museum with one of the leading collections of Canadiana in the country, stems from the bequest of David Ross McCord in 1919. Notable accessions, including the Notman Photographic Archives, have been added over the years illustrating the history of Canada in general and Quebec and Montreal in particular. Since 1936 the collections have been in storage and available only for research, but they are now in the Museum's new quarters at 690 Sherbrooke Street West and open to the public on Fridays, Saturdays and Sundays from 11 a.m. to 6 p.m. Research is by appointment only, from Monday through Thursday.

1.7.3 THE LYMAN ENTOMOLOGICAL MUSEUM AND RESEARCH LABORATORY

Located on the Macdonald College campus, this institution has the largest insect collection of any Canadian University, and is second in both numbers of species and specimens only to the Canadian National Collection of insects, Ottawa. The collection is world-wide in scope. A relatively small part is used directly in teaching since the museum is primarily engaged in research, particularly on the important Order Orthoptera (grasshoppers and related groups), as well as on soil microarthropods and fresh-water insects. Other groups, especially Lepidoptera (butterflies and moths) and Coleoptera (beetles), are also well represented. The museum has an extensive entomological library, including many rare works and long runs of serials, and the equipment necessary for the modern techniques now employed in taxonomic research. It is not generally open to the

public but interested parties are encouraged to visit by appointment. Very little space is available for display purposes.

1.7.4 THE McGILL UNIVERSITY HERBARIUM

Established in 1820 and formerly housed in the Stewart Biology Building, the McGill Herbarium was combined with the Macdonald College Herbarium in 1972 to establish the 100,000 specimen McGill University Herbarium, Macdonald Campus of McGill University. It contains some of the earliest collections made in Canada. The collection is devoted to Quebec and eastern Canadian flora but specimens from the Arctic and sub-Arctic of Canada, Greenland, Sweden, Lappland and Siberia are well represented. Research facilities are available, on request of the Curator, to any student or botanist working on northern plants.

1.7.5 OTHER COLLECTIONS

In addition to the above there are other collections and exhibits of a specialized nature, ordinarily open only to students but to which access may be gained by application to the department concerned. These include the Anatomical, Medical, Pathological and Zoological Museums. Appointments for conducted tours may be made to see the Rutherford Collection of Experimental Physics by telephoning 392-5130.

2 ADMISSION

Director — PEGGY SHEPPARD, B.A. (Sir G. Wms.), B.Ed.
Admissions Office
McGill University
P.O. Box 6070, Station A
Montreal, Quebec
H3C 3G1

2.1 GENERAL

The academic year at McGill runs from mid-September until early May, with approximately two weeks' vacation at Christmas. While most students enter in September, it is possible to be considered for admission to certain programs in January and interested students should contact the Admissions Office in October 1974 for further information.

The deadline for submission of applications for admission in September is March 1 of the year in which the student wishes to enter. All applications must be accompanied by a non-refundable fee of $15.00 in Canadian funds payable by certified cheque or money order to McGill University.

Admission is selective, and students are reminded that fulfilment of the minimum requirements by no means guarantees acceptance.

Although our Admissions Officers are always pleased to meet prospective students, a personal interview is not required for admission.

2.2 UNIVERSITY PROGRAM

Quebec students who have completed a CEGEP or college equivalent program and who have obtained the Diploma of Collegial Studies are eligible to apply for

entrance to the first year of a three-year University program (90 credits) leading to one of the following degrees: Bachelor of Arts, Bachelor of Science, Bachelor of Commerce, Bachelor of Science (Physical Therapy), Bachelor of Science (Occupational Therapy), Bachelor of Science in Nursing, Bachelor of Science in Agriculture, Bachelor of Science in Food Science, Bachelor of Education, Bachelor of Music, Bachelor of Civil Law (95 credits), Bachelor of Theology, Bachelor of Social Work; or to a three or four year program leading to the degree of Bachelor of Engineering, Bachelor of Science (Architecture), or Bachelor of Architecture. A university degree is required for admission to the Bachelor of Laws program.

Students who have completed an appropriate level of education outside the province of Quebec may be considered for entrance to a university program requiring three or four years of study (90 to 120 credits).

2.3 ENTRANCE QUALIFICATIONS

Quebec

McGill University has phased out its college equivalent program and it is now necessary to complete a CEGEP or college equivalent program elsewhere in the province before being admitted.

Holders of the Diploma of Collegial Studies are considered for admission to the first year of an appropriate university program (90 credits in most faculties).

Provinces of Canada other than Quebec

Entrance to the Faculties of Arts, Education and Management:

Ontario Grade 13 students may be admitted directly to a 90 credit university program if they have completed five academic subjects (6 credits are granted for each subject with the exception of mathematics, each course of which receives 3 credits). English should be included in the student's program; the four elective courses should be appropriate to the program which the student wishes to enter at McGill. Students wishing to enter the Faculty of Management must include mathematics as part of their Grade 13 program.

Students having only four subjects will be required to make up an additional six credits at McGill.

Students from provinces other than Quebec, Ontario*, and Newfoundland who have completed Grade 12 in academic subjects appropriate to the Faculty which they wish to enter may be considered for admission to a university program in Arts or Management requiring the completion of 120 credits (normally four years of study). It is not possible to enter the Faculty of Education upon completing Grade 12; students should take 30 credits in Arts or Science and then seek a transfer to the 90 credit Bachelor of Education program.

Entrance to the Faculty of Science:

All programs in the Faculty of Science require that the student complete the equivalent of introductory college level courses in biology, calculus, chemistry, and physics. Students who have completed these courses with satisfactory performance prior to admission are given credit and exemption.

Ontario Grade 13 courses in biology, chemistry, and physics are accepted for exemption and each is allowed 6 credits. Grade 13 courses in mathematics are allowed 3 credits each; students who have included calculus in their program are generally required to complete calculus II at McGill. A maximum of 6 credits is allowed for non-science Grade 13 academic courses, and a maximum of 30 credits for all Grade 13 work.

Students planning application to the Faculty of Science should follow a pre-science academic program including mathematics and chemistry prior to Grade 13. A student who has completed Grade 13 is considered for admission to a university program requiring the completion of the difference between 120 credits and the number of credits he has been allowed. Thus, a student who has completed biology, chemistry, physics, two (or preferably three) courses in mathematics, and one non-science academic course, all at the Grade 13 level, enters a program requiring the completion of 90 credits.

Students from provinces other than Quebec, Ontario,* and Newfoundland who have completed Grade 12 in appropriate subjects may be considered for admission to a university program requiring the completion of 120 credits (normally four years of study). In general, students should have completed a course in functions or trigonometry and a course in chemistry at the Grade 11 or 12 level (preferably Grade 12 level). A course in physics is strongly recommended.

*Exceptions are sometimes made in the case of Grade 12 students with an average of over 80% in appropriate subjects. Such students may apply to a program requiring the completion of 120 credits in the following faculties and schools: Arts, Management, Nursing, Physical and Occupational Therapy, Science.

Entrance to the School of Nursing, School of Physical and Occupational Therapy:

Ontario Grade 13 students are considered for entrance on essentially the same basis as applicants to the Faculty of Science (see above). However, it is not possible to be admitted to a 90 credit program directly from Grade 13 as organic chemistry (3 credits) and electricity and magnetism (3 credits) are prerequisite courses which must be taken in addition to the regular degree program (also sociology and psychology for Nursing). If possible, one or both courses should be taken in the summer prior to admission. Otherwise the additional credits required will be taken at McGill, although the lack of these courses upon entrance may lengthen the time period to complete the degree requirements. As the number of students who can be admitted to these programs is limited, it may not be possible to offer admission to all qualified applicants.

Admission from other Canadian provinces is as for Science.

Entrance to the Faculty of Engineering and School of Architecture:

It is not possible to be considered for entrance to the Faculty of Engineering, including the School of Architecture, on the basis of high school results. From all provinces, with the exception of Alberta and Ontario, applicants require Grade 12 and two years at a university or in an equivalent academic program. Students from Alberta Grade 12 and Ontario Grade 13 require one year at a university or in an equivalent academic program. Students may qualify for admission to Engineering or Architecture by taking one or two years of appropriate courses in the Faculty of Science at McGill.

Students who have a three year diploma in technology from a community college or an institute of technology are considered also for admission.

In all cases students must have at the college or university level (which includes Alberta Grade 12 and Ontario Grade 13) the most advanced courses in mathematics and physics available to them, two semesters of chemistry, two semesters of English literature or composition, and at least two semesters of courses in the humanities or social sciences. These are minimum requirements and applicants are expected to have taken the normal number of courses in each semester at their university or college and to have achieved a good academic standing.

Students who do not have acceptable credits in English and humanities may be admitted and required to take these subjects at McGill in addition to the regular university program in Engineering or Architecture.

Entrance to other Faculties:

High school graduates are not eligible to apply for admission to the Faculties of Dentistry, Law, or Medicine. A minimum of two to three years of study in the Faculties of Arts or Science is required before seeking admission to Dentistry or Medicine. A Bachelor's degree is necessary to enter the Law Faculty. A minimum of one year of study in the Faculty of Arts is required before a student may seek entry to the School of Social Work.

Non-Canadian Applicants

Entrance to the Faculties of Arts, Education and Management:

High school graduates from the UNITED STATES may be admitted to an undergraduate program requiring the completion of 120 credits in the Faculties of Arts and Management. One year of study in Arts or Science is necessary before seeking entrance to the Faculty of Education (90 credit program). All applicants should have followed academic programs designed for university entrance. Applicants to the Bachelor of Commerce program should present a strong background in mathematics. Students who have passed Advanced Placement examinations in appropriate subjects with a grade of "3" or better will be granted some advanced standing.

Students from the UNITED KINGDOM and COMMONWEALTH countries may be admitted directly into a university program requiring the completion of 90 credits (three years) in the Faculties of Arts and Management if they have five General Certificate of Education papers with at least two at the Advanced Level. No subject may be written at both levels; an average grade of "C" or better is required. One of the five G.C.E. papers must be English Language. Applicants to the Faculty of Management should have Advanced Level results in mathematics. Applicants to the Faculty of Education must present results in three Advanced Level papers.

Students with very good grades in five appropriate Ordinary Level papers PLUS one full year of formal schooling beyond Ordinary Level will be considered for entrance to an undergraduate program requiring the completion of 120 credits.

Entrance to the Faculty of Science, the School of Nursing and the School of Physical and Occupational Therapy:

The programs in the Faculty of Science have been designed on the assumption that the student has completed, or will complete at McGill, the equivalent of introductory college-level courses in biology, chemistry, physics, and mathematics. These courses are referred to as prerequisite courses.

Graduates from Grade 12 in the UNITED STATES are considered for admission to a university program requiring the completion of the difference between 120 credits and the number of prerequisite credits they have earned. An Advanced Placement science course is considered the equivalent of 6 prerequisite credits; a grade of "3" or better is required for Advanced Placement credit to be granted. All applicants should have a strong background in mathematics, chemistry, and physics. Biology is also desirable in the case of a student applying to one of the biological or health science programs.

Students from the UNITED KINGDOM and COMMONWEALTH countries are normally required to have completed examinations in five different G.C.E. subjects including English, chemistry, physics, and mathematics, at least two of which must be at the Advanced Level. Such students are considered for admission to a university program requiring the completion of the difference between 120 credits and the number of prerequisite credits they have earned. Each G.C.E. Advanced Level paper in a science subject (biology, chemistry, mathematics, physics) with a grade of "C" or better is granted the equivalent of ten prerequisite credits.

Students with very good grades in five appropriate Ordinary Level papers PLUS one full year of formal schooling beyond Ordinary Level will be considered for entrance to an undergraduate program requiring the completion of 120 credits. The five Ordinary Levels should include English, a second language, mathematics, and one of biology, chemistry, or physics.

Entrance to the Faculty of Engineering and School of Architecture:

Graduates from high school in the UNITED STATES must have the equivalent of two years of college after Grade 12 before seeking admission to Engineering or Architecture. The college program must include English literature and composition, strong courses in mathematics and physics, chemistry, and courses in the humanities or social sciences. In general, an academic standing of a "B" average or 70% is required. A combined CEEB score of 3000 is required also. It is feasible for students from Grade 12 to complete the prerequisite program in the Faculty of Science at McGill.

Students from the UNITED KINGDOM and COMMONWEALTH countries may apply for admission to programs in the Faculty of Engineering, including the School of Architecture, if they have passes in G.C.E. Ordinary Level papers in five subjects (including English, mathematics, physics, and chemistry), two years of studies in Sixth Form, and passes in Advanced Level papers in mathematics and physics. Applicants should have a grade of "C" or better at Advanced Level in mathematics and a grade of "D" in physics. A pass in chemistry at Advanced Level is desirable but chemistry at Sixth Form with good grades may be acceptable. To become eligible for the degrees of Bachelor of Engineering or Bachelor of Science in Architecture, students must have completed, with a strong academic standing, at least one full year of English literature and composition at Sixth Form and an acceptable course in humanities. Applicants who are admitted without acceptable courses in these subjects will be required to take courses in English and humanities at McGill in addition to the regular university programs in Engineering or Architecture. Students who are qualified for admission to the Faculty of Science at McGill, but not to the Faculty of Engineering, may qualify for admission to programs in Engineering or Architecture by taking an acceptable program of courses in the Faculty of Science and achieving a strong academic standing.

National Certificates Accepted for Admission:

Some of the national certificates accepted for admission to McGill are listed below. Students should contact the Admissions Office for more specific information as to entrance requirements. Admission is selective and better than average grades are required for admission.

COUNTRY	CERTIFICATE
Argentina	Bachillerato Universitario
Australia	Higher School Certificate
	University Matriculation Certificate
Belgium	Certificat d'Humanités
Czechoslovakia	Vysvedceni o Maturitni Zkousce
France	Baccalauréat (2ième partie)
Germany	Zeugnis der Reife
Greece	Akadimaiko
Hong Kong	Advanced Level results
India	Bachelor's degree (with First Division standing)
International Baccalaureat	Certificate of Baccalaureat
Iran	Sixth Year Secondary Education Certificate
Israel	Matriculation Certificate
Italy	Diploma di Maturita Classica
	Diploma di Maturita Scientifica

Lebanon	Lebanese Baccalauréat (2ième partie)
The Netherlands	Getuigschrift (Gymnasium or Lyceum)
Norway	Examen Artium
Pakistan	Bachelor's degree (with First Division standing)
Poland	Swiadectwo Dojrzalosci
United Arab Republic	General Secondary School Certificate
United Kingdom and Commonwealth	Advanced Level results
Vietnam	Vietnamese Baccalauréat (2ième partie)
Yugoslavia	Chegoranctbo or Svedocanstvo

2.4 ADDITIONAL ENTRANCE REQUIREMENTS

1) Application for admission to undergraduate programs must be made on forms supplied by the Admissions Office BEFORE MARCH 1. Supporting documents should be sent as soon as they are available if they cannot be sent with the application.

2) STUDENTS FROM THE UNITED STATES must write College Entrance Examination Board tests: the two scholastic aptitude tests and three other achievement tests appropriate to the program which they wish to enter at McGill. Students from the Eastern United States may obtain information about the tests by writing to:

   The College Entrance Examination Board
   Box 592
   Princeton, New Jersey 08540

   Students from the West should write to:
   The College Entrance Examination Board
   Box 1025
   Berkeley, California 94701

3) STUDENTS FROM OVERSEAS are advised to write CEEB Aptitude and Achievement tests to support their application.

4) APPLICANTS WHOSE MOTHER TONGUE IS NOT ENGLISH must submit acceptable evidence of facility in English. The following evidence is acceptable: The Test of English as a Foreign Language (TOEFL); The University of Michigan English Language test; the Certificate of Proficiency in English issued by the Universities of Cambridge and Michigan.

   TOEFL is preferred by the University; it is administered by the College Entrance Examination Board and is easily available throughout the world.

   Students who cannot obtain a TOEFL bulletin and registration form locally should write well in advance for them to: Test of English as a Foreign Language, Box 899, Princeton, New Jersey 08540, U.S.A.

2.5 TRANSFER STUDENTS

Each year McGill University admits well-qualified students transferring from other universities and colleges. These students must be those who would have been eligible to enter McGill as Freshmen and who have maintained a better than average academic standing in university work. In most Faculties, 60 credits or four semesters of work must be completed if a degree is to be granted.

2.6 MATURE STUDENT ADMISSION

Residents of Canada who will be 23 years of age or older by September 1 (for admission to the Fall Session) or January 1 (for admission to the Spring Session) and who lack the academic background normally required for admission may apply for entrance as mature students. The admissions policy for mature candidates is in effect in the Faculties of Arts, Management, and Science.

Individuals interested in being considered for entrance under this policy should contact the Admissions Office for further information.

2.7 HEALTH REQUIREMENTS FOR NEW STUDENTS

All students after having been accepted by the University will receive a Medical Questionnaire complete with a return envelope addressed to the Health Service. The student is requested to complete this questionnaire and to return it in the envelope at the earliest possible date. There may be additional requirements in certain faculties and schools.

An appointment will be made for all new students to be seen by a physician at the University Health Service as early as possible during their first academic year. At this interview the health of the student will be reviewed and if it is thought necessary, the student will be medically examined. The examination may include X-ray and other appropriate laboratory or diagnostic tests. Re-examination may also be required in the interest of the student or of others attending the university.

2.7.1 COMPULSORY HEALTH INSURANCE FOR NON-CANADIAN STUDENTS

All full-time foreign students (including landed immigrants during their first year at McGill) must take out a Health Insurance policy, which is available on a group basis. In general, the policy provides for payment towards hospital, surgical, medical, diagnostic, and other medical expenses.

Full details and application forms will be sent to all foreign students when they are notified that there is a place for them at the University.

2.8 GENERAL INFORMATION FOR NON-CANADIAN STUDENTS

Students who do not wish to live permanently in Canada enter the country as temporary residents (non-immigrants) and require some or all of the following documents:

1) PASSPORT. Required of all foreign students except citizens of the United States. A student must leave Canada at least three months before the expiry date on his passport.

   Students from the United States must bring with them evidence of their American citizenship such as their birth certificate, baptismal certificate, or passport. Students coming from the United States who are not citizens of that country should carry evidence that they are in the United States legally, and prior to their return should obtain a re-entry permit from the American Immigration Department.

2) VISA. Required of all students except British subjects, citizens of Com-

monwealth countries, citizens of Ireland and France, and permanent legal residents of the U.S.A. Visas are issued at Canadian Embassies, consular offices, and, in many countries, at Canadian immigration offices.

3) NON-IMMIGRANT STUDENT DECLARATION. Statement of conditions under which student is admitted to Canada.
4) VACCINATION CERTIFICATE. This is not required by the University but evidence of having had the disease of smallpox or of having been vaccinated within three years of arrival is necessary for entry to Canada for students from some countries (except the U.S.A., Western Europe and the United Kingdom) and this requirement should be checked with the appropriate Canadian authorities in the area.
5) MEDICAL CLEARANCE. Students staying longer than 12 months in Canada require a complete medical examination, including chest X-ray. A doctor's certificate of good health is not enough. The student pays for his own examination and X-ray.
6) LETTER OF ACCEPTANCE FROM A CANADIAN UNIVERSITY.
7) PROOF OF AVAILABILITY OF SUFFICIENT FUNDS for the duration of his studies.
8) LETTER OF SPONSORSHIP. If a student is financed by an organization, he will require written authority from the sponsoring organization.
9) CANADIAN ENTRY CERTIFICATE. Issued to all students by immigration officer on admission to Canada.

A pamphlet describing immigration regulations in detail and containing notes and guidance to students from other countries is available from Canadian immigration offices, Canadian Embassies and British Consular offices, or from the Immigration Branch, Department of Citizenship and Immigration, Ottawa, Canada. Local immigration officers will be ready to give advice and help.

A useful handbook entitled *University Study in Canada* can be obtained from Canadian Embassies, Consulates, and the office of High Commissioners and Trade Commissioners. A leaflet entitled *Notes for Foreign Students Who Wish to Attend a Canadian University* may be obtained from The Association of Universities and Colleges of Canada, 151 Slater St., Ottawa Ontario K1P 5N1.

Students may wish to bring their wives to Canada with them. If a student does so, he must show evidence of sufficient funds for her support. Wives of students from other countries may be given permission to work in Canada, if the authorities are satisfied that they would not be depriving residents of a job. A student should notify the immigration officer if his wife wishes to work or to take a training program in Canada.

2.9 REGISTRATION

Registration takes place early in September and lectures begin shortly thereafter. Complete information is sent with the letter of admission, and Faculty counsellors are available in the weeks preceding the commencement of lectures to assist in the selection of courses.

2.10 LANGUAGE POLICY

The normal language of instruction at McGill is English. Students may write term papers and examinations in French, but reasonable competence in English is essential to success. A summer course, English 120-E15C, is offered and it is recommended that students who lack fluency in English take this summer

course *before* embarking on a program of study at McGill. Information and application material may be obtained by writing directly to the Summer Session Office.

3 FACULTIES AND SCHOOLS

3.1 CREDIT SYSTEM

McGill University now operates on a credit system which varies between faculties. All courses carry a credit rating. In the Faculty of Arts and the Faculty of Science a total of 90 credits must be accumulated for a degree, but some Honours programs may require a higher total. For details of the system as it applies to each faculty, see the individual faculty announcements.

The Faculty of Medicine has adopted a Pass-Fail system of grading. The Faculty of Graduate Studies and Research and the Faculty of Dentistry do not use the credit system.

3.2 ACADEMIC CREDIT TRANSFER AGREEMENT

Regular full-time undergraduate students (first cycle*) and regular full-time or part-time graduate students (second and third cycles**) registered at McGill may, with the written permission of the Dean of their Faculty, register for up to 40% of a full course load in each academic year at any university in the province of Quebec. These courses, weighted, graded, and successfully completed according to the standards of the university giving the courses, will be fully recognized by McGill for the purpose of the degree for which the student is registered.

This privilege will not be granted automatically; the courses should form a required part of the student's program and be unavailable at McGill.

Students wishing to take advantage of this agreement should consult their Associate Dean for details, and are informed that this agreement is subject to the following conditions:

i) that the other universities concerned may, at their discretion, refuse the registration of a student for any of its courses;

ii) that the obligation of the student to follow the curriculum laid down by McGill is not affected;

iii) that the student is responsible for ensuring his timetable at McGill permits him to take courses at any of the other universities concerned;

iv) that the universities concerned are not responsible for special arrangements in cases of examination timetable conflicts.

Students may take advantage of this agreement by completing the TRANSFER CREDIT form available from the Registrar's Office. This form permits the student to collect the required academic authorizations and that of the Director of Finance; ensures automatic fee transferral from the home university to the host university; and ensures the automatic reporting of marks and credits to the home university.

*(i.e. Bachelor degrees in architecture, arts, law, commerce, education, engineering, music, nursing, occupational and physical therapy, science, agriculture, food science, and theology).

**(i.e. master's or doctoral degrees).

3.3 FACULTY OF AGRICULTURE

See Macdonald College, section 3.11.

3.4 FACULTY OF ARTS

Dean — R. VOGEL, B.A. (Sir G. Wms.), M.A., Ph.D.

3.4.1 DEGREES OFFERED

Bachelor of Arts (B.A.)
Bachelor of Social Work (B.S.W.)
The undergraduate work of the University in Humanities and Social Sciences is done in the Faculty of Arts.

3.4.2 DEGREE PROGRAMS IN ARTS

A student may take an Honours degree in any department, a degree of high concentration within one discipline and restricted to students who maintain a high level. All other students will choose an area of concentration (usually a "Major", but in some instances called a "Faculty" Program). The "Major" or "Faculty" Program can be in a single discipline or in one of several interdisciplinary fields. Full details of these programs will be available either in departments or from academic advisers, and general descriptions are available in the *Announcement of the Faculties of Arts and of Science.*

Listed below are the various programs leading to the B.A. degree.

Honours Programs are offered in the following subjects:

Anthropology
Art History
Classics
Economics
English
French
Geography
German
History
Italian
Linguistics
Mathematics
Philosophy
Political Science
Psychology
Russian
Sociology
Spanish

At least one **Major Program** is offered in all the above subjects, and in some cases there are several to choose from in a single subject. In addition, there are the following majors and concentrations:

African Studies
Canadian Studies
Classics and Linguistics
French Canada Studies
Humanistic Studies
Industrial Relations
Jewish Studies
Latin American Studies
Modern Languages
Modern Literature
North American Studies
Religious Studies
Program in Mathematics and Philosophy
Psychology and Mathematics
Psychology, General

Social Work: The undergraduate program of professional studies begins in the first year of the three-year program. For further information see the *Announcement of the Faculties of Arts and of Science.*

3.4.3 ENTRANCE REQUIREMENTS

See Section 2.

3.4.4 TRANSFER STUDENTS

All students from other universities who wish to transfer credits to the Faculty of Arts must apply in writing to:

The Admissions Office
McGill University
P.O. Box 6070, Station A
Montreal, Quebec
H3C 3G1

3.5 FACULTY OF DENTISTRY

Dean — E. R. AMBROSE, D.D.S., F.I.C.D., F.A.C.D.

3.5.1 DEGREES AND DIPLOMA OFFERED

Doctor of Dental Surgery (D.D.S.)
Period of Study in the Faculty for the degree is four years.
Granted under the Faculty of Graduate Studies and Research:
Diploma in Restorative Dentistry and Prosthodontics
One additional year after the D.D.S.
Master of Science in Restorative Dentistry and Prosthodontics (M.Sc.)
Two additional years after the D.D.S.
Master of Science in Oral Surgery (M.Sc.)
Three additional years after the D.D.S.

3.5.2 ENTRANCE REQUIREMENTS

The minimum requirement for admission to the study of dentistry is the satisfactory completion of EITHER the Collegial program in the Province of Quebec OR two full years in a four-year program leading to the B.A. or B.Sc. degree (or the equivalent thereof). In each instance the program must include one full year course in each of the following subjects: English; mathematics; physics, with laboratory; physiology; inorganic or general chemistry, with laboratory; organic chemistry, with laboratory; general biology or zoology, with laboratory (one half year of botany and one half year of zoology will be accepted but not one year of botany alone).

Canadian applicants are requested to write the Canadian Dental Association Aptitude Test and have the results sent to the Faculty. Detailed information may be obtained from the Administrator, Dental Aptitude Test Program, The Canadian Dental Association, 234 St. George Street, Toronto, Ontario, M5R 2P2.

Candidates applying from the United States should write the American Dental Association Aptitude Test and have the results sent to the Faculty.

3.5.3 APPLICATIONS

Application forms for admission to the Faculty may be obtained from the Secretary of the Faculty. The deadline date for receipt of applications is March 1 of the year in which the candidate is seeking admission.

Entering students are advised to make themselves familiar with the specific regulations of the province or state in which they intend to practise upon graduation and to take the necessary steps to become registered.

For details see the *Announcement of the Faculty of Dentistry.*

3.6 FACULTY OF EDUCATION

Dean — C. WAYNE HALL, M.A. (Bishop's)

The Faculty of Education is responsible for the professional education of teachers. It offers a variety of programs by which candidates are prepared for a teaching career in the elementary and secondary schools and colleges of Quebec. Successful completion of any of these programs qualifies the candidate for a Teaching Permit issued by the Quebec Department of Education. For details see the *Faculty of Education Announcement.*

Graduate work leading to the Master of Arts in Education, Master of Education, and Doctor of Education degrees is offered under the authority of the Faculty of Graduate Studies and Research of McGill University. For details see the *Announcement of the Faculty of Graduate Studies and Research, Section "G".*

3.6.1 DEGREE OFFERED

Bachelor of Education (B.Ed.)

3.6.2 DEGREE PROGRAM

The three-year program leading to the B.Ed. degree is available with the following options:

Elementary — Pre-School.
Elementary — Early Childhood.
Elementary — Later Childhood.
Secondary — One Subject Option.
Secondary — Two Subject Option.

Major Areas — Art, French, Physical Education, Religion, Home Economics, Jewish Studies.

The B.Ed. (Elementary Option) is available also on a part-time basis to those who:

(a) hold a teaching certificate valid in Quebec or its equivalent; and
(b) have Quebec Diploma of Collegial Studies standing or its equivalent (i.e. a minimum of 13 years of attested studies).

3.6.3 ENTRANCE REQUIREMENTS

Successful completion of a Diploma of Collegial Studies program or equivalent. (See Section 3.4. Entrance Qualifications).

3.6.4 McGILL DIPLOMA IN EDUCATION PROGRAM

A one-year program leading to the McGill Diploma in Education and to a teaching permit for elementary or secondary schools and for Technical-Vocational and Business Education subjects in secondary schools. Eligible candidates must possess a university degree with a major (six full courses) in one subject taught in elementary or high schools or a minimum of three full courses in each of two such subjects.

3.6.5 CERTIFICATE PROGRAMS

One-year programs leading to a Quebec Teaching Permit in the following options:

Technical-Vocational (Secondary)
Business Education (Secondary)
French as a Second Language (Elementary)

Candidates for these options must possess a Diploma of Collegial Studies or its equivalent in the appropriate field of study. Appropriate work experience is also required for the Technical-Vocational and Business Education options.

3.6.6 SPECIALIZED DIPLOMA PROGRAMS

The Faculty also offers specialized programs designed for certified teachers. The programs offered are:

Diploma in Special Education
Diploma in Reading Instruction
Kindergarten Diploma
Diploma in Educational Media

These programs meet provincial standards in regard to the upgrading of teacher classification and they may also be used as credit towards the McGill B.Ed. degree. (For specific information concerning any or all of these programs please refer to the Faculty of Education Announcement).

3.6.7 NOTE

It should be emphasized that possession of a bare passing standard in any of the above programs will not automatically guarantee acceptance into the Faculty of Education. Preference will be given to candidates having a second-class standing or better. Satisfactory letters of reference are also required and candidates for certain options may be required to attend an interview. All candidates for a Quebec Teaching Permit must also demonstrate fluency in the language of instruction (English or French).

3.6.8 APPLICATION FORMS

Application forms and further information concerning admission requirements may be obtained from:

Admissions Office
McGill University
P.O. Box 6070, Station A
Montreal, Quebec

3.7 FACULTY OF ENGINEERING (including the School of Architecture and the School of Computer Science)

Acting Dean — T. H. BARTON, Ph.D., D.Eng. (Sheff.), F.I.E.E., S.M.I.E.E.E.

Degree programs outlined below are described in detail in the *Announcement of the Faculty of Engineering.*

3.7.1 ARCHITECTURE

Director — NORBERT SCHOENAUER, B.Arch. (Royal Hungarian Univ.), M.Arch.

3.7.1.2 Degrees Offered

1) Bachelor of Science (Architecture), (B.Sc.(Arch.)).
2) Bachelor of Architecture (B.Arch.).

3.7.1.3 Period of Study

B.Sc. (Arch.): a minimum of three years.
B.Arch.: a minimum of one year after the McGill B.Sc. (Arch.) degree.

3.7.1.4 Entrance Requirements

Entrance requirements include successful completion of a Diploma of Collegial Studies in the Physical Sciences, or equivalent. Enrolment in the School is limited and admission is based on academic standing and aptitude.

3.7.1.5 Privileges of Holders of the Degree of Bachelor of Architecture

The Province of Quebec Association of Architects admits Canadian holders of the degree of Bachelor of Architecture to membership, and thereby to practice in the province, after completing two years' apprenticeship under conditions specified by the Association and after passing an examination in professional practice.

The School of Architecture is recognized by the Royal Institute of British Architects and the instruction given meets the requirements of the Board of Architectural Education of that body.

For complete details of program, courses, rules governing attendance and promotion, etc., see the *Announcement of the Faculty of Engineering.*

3.7.2 ENGINEERING

3.7.2.1 Degrees Offered

1) Bachelor of Engineering (B.Eng.), in the departments of Chemical, Civil, Electrical, Mechanical, and Metallurgical and Mining Engineering and Applied Geophysics.
2) Bachelor of Engineering (B.Eng.) (Honours), in the departments of Electrical and Mechanical Engineering.

3.7.2.2 Period of Study

A minimum of three years is required.

Students who take the Bachelor of Engineering degree in one program may graduate in another program by attending two or more subsequent terms and passing the prescribed additional examinations.

3.7.2.3 Programs

1) The Regular Program is designed to prepare candidates for a wide variety of careers in engineering. Graduates with high standing and an interest in university careers or other research activities are encouraged to continue their studies at the graduate level.
2) An Honours Program, available in the departments of Electrical and Mechanical Engineering, is designed particularly for students who intend to pursue research careers in these fields. Admission is at the discretion of the departments and is normally granted only to students who have demonstrated high ability in mathematics and physics at the collegial level.

Students who fail to maintain honours standing are required to transfer to the Regular Program.

3.7.2.4 Entrance Requirements

Entrance requirements are based on successful completion of a Diploma of Collegial Studies in the Physical Sciences or equivalent.

For complete details of programs, courses, rules governing attendance and grading, etc., see the *Announcement of the Faculty of Engineering.*

3.7.2.5 Privileges of Holders of the Bachelor of Engineering Degrees

Holders of these degrees are eligible for membership in numerous organizations in Canada and abroad. More detailed information can be obtained from the chairmen of the departments concerned.

3.7.3 SCHOOL OF COMPUTER SCIENCE

Director — G. MARSAGLIA, B.Sc. (Colorado), Ph.D. (Ohio State).

3.7.3.1 Degrees Offered

1) Master of Science (M.Sc.)
2) Master of Science (Applied), (M.Sc. (Applied))
3) Doctor of Philosophy (Ph.D.)

3.7.3.2 Undergraduate Courses

The School of Computer Science offers a number of undergraduate courses. Further information can be obtained from the *Announcements of the Faculty of Engineering and the Faculty of Science.*

3.7.3.3 Postgraduate Programs

The requirements for entrance into and for successful completion of the Master's and Doctor's programs offered by the School of Computer Science may be found in the *Announcement of the Faculty of Graduate Studies and Research, Section "E", Physical Sciences and Engineering.* A list of the postgraduate courses offered by the School is published in the same Announcement.

3.8 FACULTY OF GRADUATE STUDIES AND RESEARCH

Dean — W. F. HITSCHFELD, B.A.Sc. (Tor.), Ph.D.

The Faculty of Graduate Studies and Research offers programs leading to diplomas and degrees as follows:

3.8.1 DIPLOMAS

The Faculty offers programs leading to the following graduate diplomas:

Air and Space Law
Advanced Social Work Practice
Engineering Aspects of Arid Land Development
Epidemiology and Health
Geological Sciences
Management

3.8.2 MASTER'S DEGREES

For complete information on all programs see the *Announcement of the Faculty of Graduate Studies and Research.*

The Degree of Master of Architecture may be obtained in the following fields:

Architectural Design
Housing

The Degree of Master of Arts may be obtained in the following subjects:

Anthropology
Art History
Classics
Communications
Economics
Education
English
French
Geography
German
History
Islamic Studies
Italian
Linguistics
Mathematics
Philosophy
Political Science
Psychology
Religious Studies
Russian
Sociology
Spanish

The Master's Degree in Business Administration

The Master's Degree in Commerce

The Master's Degree in Education

The Degree of Master of Engineering may be obtained in the following fields of Engineering:

Chemical
Civil
Electrical
Mechanical
Metallurgical and Mining Engineering and Applied Geophysics

The Master's Degree in Engineering (Mining)

Master's Degrees in Law:

1) **The Degree of Master of Civil Law** may be obtained in the following aspects:
   Roman Law
   Civil Law
   Commercial and Maritime Law
   Public Law, including International Law
   Legal problems of government control of business
   Law and Constitution of International Organizations
2) **The Degree of Master of Laws** is offered in the Institute of Air and Space Law and in the Institute of Comparative Law.

The Master's Degree in Library Science

The Master's Degree in Musical Arts

The Master's Degree in Nursing (Teaching)

The Master's Degree in Sacred Theology

The Degree of Master of Science may be obtained in the following subjects:

Agricultural Chemistry
Agricultural Engineering
Agronomy
Anatomy
Animal Science
Biochemistry
Biology
Chemistry
Computer Science
Crystallography
Electrical Communications
Entomology
Epidemiology and Health
Experimental Medicine
Experimental Surgery
Fluid Mechanics
Geography
Geological Sciences
Geophysics
Glaciology
Horticulture
Human Communication Disorders
Marine Sciences
Mathematics
Metallurgical and Mining Engineering and Applied Geophysics
Meteorology
Microbiology and Immunology
Microbiology (Macdonald College)
Neurology and Neurosurgery
Oral Surgery
Otolaryngology
Parasitology
Pathology
Pharmacology
Physics
Physiology
Plant Pathology
Psychiatry
Psychology
Radiology
Renewable Resources
Restorative Dentistry and Prosthodontics
Soil Science
Wildlife Biology

The Degree of Master of Science (Applied) may be obtained in the following subjects:

Computer Science
Geological Sciences (Engineering Geology, Mineral Exploration)
Human Communication Disorders
Nursing
Physical Therapy
Psychology

The Master's Degree in Social Work

The Master's Degree in Urban Planning

3.8.3 DOCTOR'S DEGREES

The Doctor's Degree in Civil Law

The Doctor's Degree in Education

The Degree of Doctor of Philosophy (Ph.D.) may be obtained in the following subjects:

Agricultural Chemistry
Agricultural Engineering
Agronomy
Anatomy
Animal Science
Anthropology
Art History
Biochemistry
Biology
Chemical Engineering
Chemistry
Civil Engineering
Classics
Computer Science
Economics
Electrical Engineering
English
Entomology
Epidemiology and Health
Experimental Medicine
Experimental Surgery
French
Geography
Geological Sciences
German
History
Human Communication Disorders
Islamic Studies
Linguistics
Marine Sciences
Mathematics
Mechanical Engineering
Metallurgical and Mining Engineering and Applied Geophysics
Meteorology
Microbiology and Immunology
Microbiology (Macdonald College)
Neurology and Neurosurgery
Parasitology
Pathology
Pharmacology
Philosophy
Physics
Physiology
Plant Pathology
Political Science
Psychology
Religious Studies
Russian
Sociology
Soil Science

For further information see the *Announcement of the Faculty of Graduate Studies and Research.* Application forms may be obtained from the Faculty Office.

3.9 FACULTY OF LAW

Dean — JOHN E. C. BRIERLEY, B.A. (Bishop's), D.U. (Paris), B.C.L.
Chancellor Day Hall
3644 Peel Street
Montreal, Quebec
H3A 1W9

3.9.1 DEGREES OFFERED

Bachelor of Civil Law (B.C.L.), and Bachelor of Laws (LL.B.).

Under the authority of the Faculty of Graduate Studies and Research the degree of Master of Civil Law (M.C.L.) is granted for advanced study in law, the degree of Master of Laws (LL.M.) for studies in the field of international air law and comparative law, and the degree of Doctor of Civil Law for higher studies in law.

3.9.2 PERIOD OF STUDY

Period of study for the B.C.L. or LL.B. degree: Generally three to four years.

Students proceeding to the Quebec Bar and notarial profession are required to take additional training after graduation from the Faculty.

Students studying for the Bachelor of Laws degree (LL.B.) may proceed thereafter to the Bar Admission program of one of the Common Law provinces.

3.9.3 ENTRANCE REQUIREMENTS

To be qualified for admission to the Faculty a student must have obtained second class standing in the B.A. or equivalent degree from a university or college which is recognized by McGill University, or a diploma with a high standing from a Quebec General and Vocational College (CEGEP), or a Diploma of Collegial Studies from a Quebec university, and have substantial fluency in both the French and English languages. In exceptional cases students who do not intend to practise either the legal or notarial profession may be admitted to the Faculty with lesser academic qualifications if they are qualified to pursue with advantage the study of law. In all cases, admission is at the discretion of the Faculty. Between applicants who apply for admission to the LL.B. program, preference is given to those intending to proceed to both the LL.B. and B.C.L. degrees. Students entering the Faculty with a CEGEP diploma must take the B.C.L. degree before they are permitted to proceed to the LL.B. degree.

Candidates for admission to the Quebec Bar must be Canadian citizens and must hold a diploma from a Quebec General and Vocational College (CEGEP), or a Diploma of Collegial Studies from a Quebec university, or a B.A. degree or its equivalent from a university or college of which the degree is recognized jointly by Laval, McGill, Montreal, Ottawa and Sherbrooke Universities and, in addition, by the Bar.

Candidates for admission to the Quebec notarial profession must be Canadian citizens and hold a diploma from a Quebec General and Vocational College (CEGEP), or a Diploma of Collegial Studies from a Quebec university, or a B.A. of a university or college whose degree is recognized jointly by Laval, Montreal, McGill, Sherbrooke and Ottawa Universities for admission to their law courses, and also by the Board.

Candidates for the Bachelor of Laws degree (LL.B.) and seeking entrance to the Bar Admission program of any of the Common Law provinces must satisfy the regulations of the particular Common Law province to the Bar admission course or program to which entrance is sought.

For details concerning staff, curriculum and also higher studies in the Institutes of Air and Space Law and Comparative Law see the *Announcement of the Faculty of Law*.

3.9.4 APPLICATIONS

The deadline for receipt of applications is March 1 of the year in which the candidate is seeking admission. Application forms may be obtained from the Faculty Admissions Office. All inquiries should be addressed to the Faculty.

3.10 GRADUATE SCHOOL OF LIBRARY SCIENCE (in the Faculty of Graduate Studies and Research)

Director — EFFIE C. ASTBURY, M.L.S. (Tor.), B.A., B.L.S.

3.10.1 DEGREE OFFERED

Master of Library Science (M.L.S.).
Period of Study: Two years.

McGILL UNIVERSITY LIBRARY

3.10.2 ENTRANCE REQUIREMENTS

A B.A. or B.Sc. from a recognized university. Applicants are expected to have a knowledge of at least one language other than English. Academic standing of at least "B" (or second class) is required. For details see the *Announcement of the Graduate School of Library Science.*

3.11 MACDONALD COLLEGE

Macdonald College, Quebec
H9X 3M1

Macdonald College, which was founded and endowed by the late Sir William C. Macdonald, is incorporated with McGill University. It is situated twenty miles west of Montreal, at Ste. Anne de Bellevue, Quebec. It consists of the Faculty of Agriculture, which includes the School of Food Science.

All programs leading to the Bachelor's, Master's and Doctoral degrees are under the control of the Senate of McGill University; the Diploma program in Agriculture is under the direction of the Faculty of Agriculture.

3.11.1 FACULTY OF AGRICULTURE (Including the School of Food Science)

Dean — A. C. BLACKWOOD, B.Sc., M.S. (Alta.), Ph.D. (Wis.), F.R.S.C.

The work of the agricultural departments of the College falls into three main divisions: teaching, research, and extension. Teaching and research form the major part of their work. Extension work is undertaken by departments as the need or opportunity may arise.

The School of Food Science is an integral part of the Faculty of Agriculture. The main function of the School is to provide professional education in Food and Consumer Sciences, including Home Economics.

3.11.2 DEGREES OFFERED

Bachelor of Science in Agriculture (B.Sc. (Agr.)).
Bachelor of Science in Agricultural Engineering (B.Sc. (Agr. Eng.)).
Bachelor of Science in Food Science (B.Sc. (F.Sc.)).

3.11.3 DIPLOMA OFFERED

Diploma in Agriculture.

3.11.4 ENTRANCE REQUIREMENTS

The Diploma of Collegial Studies in science or its equivalent is required for entrance.

By special agreement, the Nova Scotia Agricultural College, Truro, N.S., has arranged to provide their students with a program of studies permitting transfer to the Faculty of Agriculture at Macdonald College. Students who have completed such a program of study with satisfactory standing in courses equivalent to the Diploma of Collegial Studies will be admitted to the appropriate years in the Faculty provided that their overall averages and their grades in individual courses are considered satisfactory by the Committee on Admissions.

In addition, students who have completed Senior Matriculation and one additional year of studies will be considered for admission provided that their program includes biology, physics, chemistry and mathematics (including one year of calculus) at an acceptable level and that their overall averages and their grades in individual courses meet the requirements for admission.

Students transferring from other faculties or universities will be granted credits towards their degree for courses which they have passed at a satisfactory level and are considered equivalent to courses offered by the Faculty.

Qualified Secondary V applicants will be admitted to the two-year **Diploma in Agriculture** program as in the past. It is anticipated that this program will continue to be offered as an alternative to the CEGEP because it meets a need which is no to be found in any existing CEGEP.

3.11.4.1 Application Date

Applications for admission to the Faculty of Agriculture and the School of Food Science may be submitted until August 15 for fall admission and December 15 for January admission and may be obtained from The Registrar, Macdonald College, Que., H9X 3M1.

3.11.5 PROGRAMS OF STUDIES

The three-year program involves a total of at least 90 credits depending on the major chosen. Each major requires: (1) a certain number of required "core" credits, (2) credits elected in consultation with the Professor in charge of the major, and (3) free credits elected by the students.

The following programs of study are offered by the Faculty of Agriculture and the School of Food Science.

3.11.5.1 Bachelor of Science in Agriculture, B.Sc. (Agr.)

A three-year program from the Diploma of Collegial Studies leading to professional qualification in Agricultural Science (Agricultural Economics, Animal Science, General Agricultural Science, Plant Science, Soil Science) or in one of its related specialized branches in the Biological Sciences (Botanical Sciences, Environmental Biology, Microbiology, Zoological Sciences) and Renewable Resources Development (Environmental Conservation, Agricultural Land Planning and Development, Community Resource Development, Resource Economics and Management, Wildlife Resources).

3.11.5.2 Bachelor of Science in Agricultural Engineering, B.Sc. (Agr.Eng.)

A three-year program from the Diploma of Collegial Studies leading to professional qualification in Agricultural Engineering. Holders of this degree are eligible for membership in professional engineering societies.

3.11.5.3 Bachelor of Science in Food Science, B.Sc. (F.Sc.)

A three-year program from the Diploma of Collegial Studies leading to the professional qualifications necessary for dietetics, or food science as well as the following regions in the Food and Consumer Sciences Area: Food Chemistry, Food Management, Nutrition, Consumer Education and Home Economics.

3.11.5.4 Diploma in Agriculture

A two-year program in practical agriculture designed to prepare students for careers in farming or work closely associated with agriculture at the production level.

3.11.5.5 Postgraduate Programs in Agricultural Science

These lead to the degrees of Master of Science and Doctor of Philosophy, with study and research in one or more of the Departments of the Faculty or the School of Food Science. The program of studies and examinations are controlled by the Faculty of Graduate Studies and Research.

MCGILL UNIVERSITY LIBRARY

3.12 FACULTY OF MANAGEMENT

Dean — STANLEY J. SHAPIRO, A.B. (Harv.), M.B.A., Ph.D. (Penn.).

Samuel Bronfman Building
1001 Sherbrooke Street, West
Montreal, Quebec
H3A 1G5

3.12.1 DEGREES OFFERED

Bachelor of Commerce (B.Com.).

Master of Business Administration (M.B.A.), under the authority of the Faculty of Graduate Studies and Research.

3.12.1.1 Aims of the Undergraduate Program

Management means getting things accomplished as effectively as possible. The ideal manager is a well-rounded man, with strong character, good judgment breadth of vision and thorough competence in the management skills — behavioural and quantitative — which are being developed in this age of rapid technological change.

When everything is changing at such a fantastic pace, it is no longer possible to train good managers by simply passing on to them wisdom developed in a past age. Experience can still be a great teacher, but only if intelligently interpreted and applied. Concepts must not be static; managers must be developed who can meet new challenges as they arise.

The different qualities required in a competent manager are teachable in varying degrees. The aim of the program is to give students an opportunity to master new management techniques, and also to broaden their outlook by optional courses in a wide variety of disciplines. There are certain management skills which constitute "core" subjects which every manager should have — but beyond these, students are encouraged to follow lines of interest through which they will emerge broadly educated. A good manager must be able to understand and to work with both the generalists and specialists that are required in our complex society.

3.12.1.2 Degree Programs and Requirements

GENERAL PROGRAM

The three-year program involves a total of 90 credits of which (1) 42 credits are in "core" subjects, required of all students, (2) 18 credits are chosen for deeper study in a particular management area, (3) 18 credits are chosen outside the Faculty and (4) 12 credits are chosen without restriction. The "core" in (1) above includes Accounting, Behavioural Science, Computers, Economics, Finance, Marketing, Mathematics, Operations Research, and Statistics. The Management Elective Groups in (2) above are Accounting Business Law, Computers and Systems, Finance, Industrial Relations, International Business, Marketing, Organizational Behaviour and Personnel, Policy, Small Business and Entrepreneurship, and Quantitative Methods.

MAJOR AND HONOURS PROGRAMS

Major programs are available within the Faculty in Economics, Economics and Political Science, Industrial Relations, Mathematics and Psychology.

Honours programs are available within the Faculty in Economics, and Economics and Accounting.

ENTRANCE REQUIREMENTS

Entrance to the first year of the three-year post-CEGEP Program leading to the Bachelor of Commerce is in accordance with the requirements for CEGEP studies. To provide the entering student with the greatest degree of flexibility possible in his pre-University program, the specific course requirements for entry to the Faculty have been kept to one-term courses in each of differential and integral calculus.

Students wishing to enter the Bachelor of Commerce program may obtain application forms from:

Admissions Office
McGill University
P.O. Box 6070, Station A
Montreal, Quebec
H3C 3G1

TRANSFER STUDENTS

Students presently enrolled in another Faculty of this University wishing to transfer to the Bachelor of Commerce program must apply in writing not later than July 1 to:

The Secretary of Admissions
Bachelor of Commerce Program
Faculty of Management
McGill University
P.O. Box 6070, Station A
Montreal, Quebec
H3C 3G1

3.12.2 GRADUATE PROGRAM MASTER OF BUSINESS ADMINISTRATION FACULTY OF GRADUATE STUDIES AND RESEARCH

Period of Study: Two years.

Entrance Requirements

A Bachelor's degree with first or high second class standing from a recognized university, a satisfactory performance on the Princeton Admission Test for Graduate Studies in Business, and letters of recommendation from two university teachers.

For details see the *Announcement of the Faculty of Graduate Studies and Research,* Section "I" or the *Announcement of the Faculty of Management, Master of Business Administration.*

3.13 FACULTY OF MEDICINE

Dean — R. F. PATRICK CRONIN, M.D.,C.M., M.Sc., F.R.C.P. (Lond.), F.R.C.P.(C)

McIntyre Medical Sciences Building
3655 Drummond Street
Montreal, Quebec
H3G 1Y6

3.13.1 DEGREES AND DIPLOMAS OFFERED

Doctor of Medicine and Master of Surgery (M.D.,C.M.).

The degrees of M.Sc. and Ph.D. in Medical and Allied Sciences are granted under the authority of the Faculty of Graduate Studies and Research. For information see the *Announcement of the Faculty of Graduate Studies and Research.*

Diplomas for advanced study in several clinical departments of the Faculty.

Period of Study in the Faculty for the Degree of M.D.,C.M.: Four years.

Licence to Practise: The provincial Colleges of Physicians and Surgeons define the requirements of fully licensed medical practitioners in each province. Final-year medical students wishing to apply for the examination of the Medical Council of Canada must do so before March 15. Details of the requirements of registration must be obtained from the College of Physicians and Surgeons in the province where the student intends to practise.

3.13.2 ENTRANCE REQUIREMENTS

A. The Four-Year Program in Medicine

The normal requirement is the satisfactory completion of three full years of study at a recognized college or university after the completion of Secondary School.

The pre-medical work must include:

Physics — One full course wih laboratory work.

Biology — One full course including studies of biology at the cell and molecular level.

Chemistry —

a) One full course of general chemistry with laboratory work.

b) One full course of organic chemistry with laboratory work.

In addition to the above requirements one full course in physiology (human and/or mammalian) with laboratory work. Applicants are also encouraged to have an adequate preparation in English literature and composition, mathematics, and a working knowledge of the French language is recommended.

In selecting courses, in addition to the specific requirements listed above, an intending medical student should plan his pre-medical program as a whole, and in accordance with a definite educational objective. Emphasis should be placed on the broad educational value and the intellectual training afforded, rather than on the factual content of such pre-medical curricula; the student is therefore advised to select a major field which appeals to him; this major field may be selected from the natural or the social sciences or the humanities. Certain subjects which though not essential have been found valuable in medical study, and which may be included as electives if the curriculum in the major field permits, are psychology, sociology, genetics, anthropology, mathematics or languages.

Students with a strong interest in science and with aptitude for scientific studies should consider pursuing physiology, histology, biochemistry, anatomy or pharmacology at the B.Sc. level to a high standard, as all of these subjects provide an excellent background for entry to medical school.

Students are reminded that although the majority of applicants have completed their pre-medical studies in a Faculty of Science, successful applicants have been chosen by the Admissions Committee from other faculties including Arts, Nursing, Physical and Occupational Therapy, Dentistry, Law, Management, Education and Engineering, provided they have met the extrance requirements.

Applicants who have studied in the English language during the two years prior to applying to this Faculty are required to take the Medical College Admission Test which is conducted by The American College Testing Program (P.O. Box 414,

Iowa City, Iowa 52240), and may be written in various centres. This test is given in May and October each year. The results of this test are available two months after taking the examination, so applicants are encouraged to take the test in May or October of the year in which they apply to this Faculty. An applicant must write to The American College Testing Program at least one month prior to the test date to request permission to take the Medical College Admission Test.

B. The Five-Year Program in Medicine

Students of the Province of Quebec completing the two-year program in Quebec Colleges of General and Professional Education are eligible to submit an application.

Students in the first year of the five-year program will be registered in the Faculty of Science (medical preparatory – Med-P year), following which they proceed into the four-year medical program if a satisfactory academic standing is maintained. Such applicants complete the scientific requirements for the four-year program during the Med-P year. Applicants for the five-year program are not required to take the Medical College Admission Test prior to applying. (Med-P students take the test in May of their Med-P year).

C. Equivalent (Advanced) Standing

Students are admitted only to the first and second years. An applicant to second year from another medical school must submit an official transcript of record and must have successfully completed Part I of the American National Board Examinations among other requirements.

3.13.3 APPLICATION FOR ADMISSION

As the number of students in each class is limited, applications should be made as soon as possible after September 1 of the year prior to which admission is requested and not later than March 1 of the year of desired entry. Application forms may be obtained from the office of the Associate Dean (Admissions) of the Faculty of Medicine. All applicants (four- and five-year programs, Advanced Standing) will be asked to complete a Stage I application form which will be reviewed by members of the Admissions Committee. Selected applicants will be invited to complete a Stage II application. There is no fee for the Stage I application. The Stage II application must be accompanied by a non-returnable fee of $15.00 in the form of a cheque or money order payable to McGill University. Applicants currently enrolled at McGill University are not required to pay this fee. Applications from candidates older than 27 years will be considered only if they have outstanding or exceptional qualifications.

3.14 FACULTY OF MUSIC

Dean — HELMUT BLUME, Graduate, Staatliche Akademische Hochschule für Musik, Berlin.

Strathcona Music Building
555 Sherbrooke St. West
Montreal, Quebec
H3A 1E3

3.14.1 DEGREES AND DIPLOMAS OFFERED

Bachelor of Music (B.Mus.)
Master of Musical Arts (M.M.A.)
Licentiate of Music (L.Mus.)
Concert Diploma

3.14.2 PERIOD OF STUDY

B.Mus. degree — normally three years after the completion of the Diploma of Collegial Studies or its equivalent.

M.M.A. degree — minimum one year after B.Mus. (Faculty of Graduate Studies and Research).

Licentiate — normally three years.

Concert Diploma — two years after the Licentiate.

3.14.3 PROGRAM OF STUDY

3.14.3.1 Bachelor of Music

The degree of Bachelor of Music can be obtained in any one of the following five major fields of concentration:

Composition

The curriculum in Composition is designed for those students whose interest and talent lie in the field of creative music.

History of Music

The curriculum in Music History is intended for those interested in the scholarly disciplines of music and as a preparation for subsequent concentration in musicology.

School Music

This program provides the practical and theoretical training required by those who are planning a career as music teachers at the elementary or secondary school levels.

Performance

The degree program in Performance is available to those wishing to combine their practical concentration (all instruments or voice) with substantial studies in theoretical and academic subjects.

Theory

An honours program is offered to those who wish to specialize in music theory. Interdisciplinary programs between Theory and one of English, linguistics, mathematics, philosophy or psychology are available.

3.14.3.2 Master of Musical Arts

The degree of Master of Musical Arts, which the Faculty of Music offers in conjunction with the Faculty of Graduate Studies and Research, can be obtained in one of the following three fields of concentration:

Composition

This program is designed for those planning on a career as professional composers and/or teachers of composition and allied subjects. It also prepares the student for doctoral studies in the field of concentration.

Musicology

This program provides training in the techniques of musicological research and prepares the student for doctoral studies in musicology.

Theory

This program is designed for those who wish to do research in some specialized area of music theory. Interdisciplinary studies relating music with other arts and the sciences are encouraged.

The M.M.A. may also be obtained in the area of **Performance** on an *ad hoc*

basis subject to individual approval by the Faculty of Graduate Studies and Research.

For details of these graduate programs, please consult the *Announcement of the Faculty of Graduate Studies and Research.*

3.14.3.3 Licentiate of Music Diploma

The Licentiate of Music diploma program is specially designed for those instrumentalists and singers who wish to concentrate on the practical subject of their choice while limiting their theoretical studies to basic areas in History, Theory and Ear Training.

3.14.3.4 The Concert Diploma

This is a post-Licentiate diploma available only to specially gifted instrumentalists and singers who have the proven talent and capacity for a professional career as performers. The Concert Diploma is offered in Piano, Organ, Harpsichord, Violin, Viola, Cello, Flute, Clarinet, Saxophone, and Voice.

3.14.4 GENERAL INFORMATION

The McGill Faculty of Music is located in the Strathcona Music Building on the campus. The Faculty's facilities include classrooms; teaching studios; practice rooms; a library of books, scores and recordings; reading rooms; listening booths; an electronic music studio; and the new Maurice Pollack Concert Hall.

Montreal, the largest metropolis in Canada, is not only a most stimulating city because of its bilingual, bicultural character, but it is also a music centre of the first order. The many concerts by the world's celebrated artists and ensembles at the Place des Arts; the annual concert series by the Montreal Symphony Orchestra, the McGill Chamber Orchestra, Ladies' Morning Musical Club, Les Amis de l'Art, Pro Musica (to name only a few); opera and ballet presentations; the T.V. and radio concerts of the CBC's French and English production centres in Montreal; the presence of the Canadian headquarters of the Jeunesses Musicales with its beautiful concert hall and music camp at nearby Mont Orford; international music competitions; summer concerts — all these and many other events and attractions offer a unique opportunity of first-hand experience and study to the young music student.

Music Credit Options in the Faculty of Arts and of Science

The Faculty of Music offers two series of courses that may be taken for credit by students in the Faculty of Arts and the Faculty of Science. One series is a sequence of professional courses that deal with music theory and the history of music and is part of the undergraduate music curriculum. These courses may be taken only by those who have offered Music as a matriculation subject or have the theoretical and practical equivalent.

The courses in the other series are designed to meet the needs of those Arts and Science students who are interested in the cultural (non-professional) approach to music. The first course is introductory; the other courses cover the music of different periods from the Middle Ages to the present day.

3.14.5 ADMISSION

Inquiries concerning admission to all degree and diploma programs should be directed to the Dean of the Faculty of Music, Strathcona Music Building, 555 Sherbrooke St. West, Montreal H3A 1E3.

Application forms may be obtained from the Faculty of Music. Completed applications *must be returned to the Faculty of Music* before March 1 of the year in which the candidate hopes to gain admission. Late applications will be considered if space still remains for admission.

3.14.6 ENTRANCE REQUIREMENTS

Because the following requirements are written for Quebec students, applicants from elsewhere should refer to section 2. Students from other provinces, the United States and overseas will be accepted into a program comprising approximately 120 credits or less, depending on their music qualifications.

3.14.6.1 Bachelor of Music Program

Students from Quebec applying for entrance to the Bachelor of Music program will be required to hold the Diploma of Collegial Studies with a concentration in music, or its equivalent. Applicants with a deficiency may be admitted on a probationary basis.

3.14.6.2 Piano Proficiency

All candidates admitted to the degree programs of the Faculty of Music should be prepared to demonstrate piano proficiency equivalent to that of McGill Secondary Level I (Grade 7) when they register for their first term.

For a description of this level in piano, please consult the syllabus of the *Preparatory School of Music of McGill University*.

NOTE: The Faculty requires an entrance audition of all students.

NOTE: High School students who wish to take music at the Secondary V level, please note that completion of the McGill Secondary Levels in instrument or voice, along with Theory and Ear Training, is recognized as a Secondary V credit by the Quebec Department of Education.

3.14.6.3 Advanced Standing

Credit will be given for advanced standing in all academic and music subjects on the basis of high school, college, and university transcripts as well as placement tests and special auditions.

3.14.6.4 Licentiate Program

A candidate must have completed secondary school and must sit an entrance audition as well as placement tests in Theory and Ear Training.

3.14.6.5 Concert Diploma Program

In order to qualify for admission to the Concert Diploma program, the candidate must have the Licentiate diploma of the McGill Faculty of Music or its equivalent and must pass an audition in his chosen subject to satisfy the panel that he has the talent for a professional career as a concert performer.

3.15 SCHOOL OF NURSING (in the Faculty of Medicine)

Director — JOAN M. GILCHRIST, B.N., M.Sc.(Appl.), R.N.

Wilson Hall
3506 University St.
Montreal, Quebec
H3A 2A7

3.15.1 DEGREES OFFERED

1) Bachelor of Nursing (B.N.) for graduate nurses from hospital schools. A two-year program from senior matriculation, preparing nurses for careers in Nursing Education or in supervision of nursing services in hospitals and public health agencies, or in clinical nursing practice.

2) Bachelor of Science in Nursing (B.Sc. (N)). A three-year program, combining general and professional education, is based on two pre-university years in the biological sciences. Clinical experience in Nursing is obtained in the McGill Teaching Hospitals and other community agencies.
3) Master of Science (Applied) (M.Sc. (Applied)). A two-year program under the Faculty of Graduate Studies and Research with opportunity to specialize in Nursing Practice or in Research in Nursing and Health Care. In addition, students select either the Administration of Nursing Services or Curriculum Development and the Teaching of Nursing as a focus of study.
4) Master of Nursing (Teaching) (M.N. (Teaching)). A one calendar year program under the Faculty of Graduate Studies and Research to prepare teachers for the new educational programs across Canada.

3.15.2 ENTRANCE REQUIREMENTS AND APPLICATIONS

1) **Bachelor of Science in Nursing.** Entrance requirements and application procedures are the same as those for the regular B.Sc. program. See entries on Admissions Sections. Introductory courses in psychology and sociology are added to the curriculum if these have not been taken as options in CEGEP.
2) **Bachelor of Nursing.** Candidates are required to have senior matriculation standing in five subjects as follows: English, biology or chemistry and three of the following: history, mathematics, physics, German, French, Latin, Spanish. An average of at least 65% is required.

Applications may be obtained from the Admissions Office or the School of Nursing, and returned to:

The Admissions Office
McGill University
P.O. Box 6070, Station A
Montreal, Quebec
H3C 3G1.

Acceptances will be made in January and April.

3) **Master's Degrees.** For details please see the *Announcement of the School of Nursing* or the *Announcement of the Faculty of Graduate Studies and Research.*

3.16 SCHOOL OF PHYSICAL AND OCCUPATIONAL THERAPY (in the Faculty of Medicine)

Acting Director — HELEN M. GAULT, T.M.M.G., T.M.E. (Eng.), B.Sc. (P. & O.T.)
3654 Drummond Street
Montreal, Quebec
H3G 1Y5

Physical Therapy is the art and science of physical treatment and rehabilitation utilizing physical, chemical, electrical and electromagnetic properties in conjunction with the manual skills of massage and therapeutic exercises for an individual who manifests physical and psychological disorders. The scope of the profession includes patient evaluation, treatment planning, treatment delivery, education and consultation in cooperation with the medical and paramedical professions and the social agencies concerned.

Occupational Therapy is the science of directing man's response to selected activity to promote and maintain health, to prevent disability, to evaluate behaviour and to treat or train patients with physical or psychological dysfunction.

3.16.1 DEGREES OFFERED

BACHELOR OF SCIENCE IN PHYSICAL THERAPY, B.Sc. (Phys. Ther.).

The full curriculum consists of three academic years from a College Program in the Health Sciences or equivalent. Included during the three year program are courses in science together with professional training in Physical Therapy. Clinical experience is provided in the teaching hospitals of the Faculty of Medicine, McGill University, and other affiliated centres.

BACHELOR OF SCIENCE IN OCCUPATIONAL THERAPY, B.Sc. (Occ. Ther.).

The full curriculum consists of three academic years from a College Program in the Health Sciences or equivalent. Included are courses in science together with professional training in Occupational Therapy. Clinical experience is provided in the teaching hospitals of the Faculty of Medicine, McGill University, and other affiliated centres.

MASTER OF SCIENCE (Applied) M.Sc. (Appl.).

Available in Physical Therapy. A two-year program under the Faculty of Graduate Studies and Research. The full curriculum consists of two years of study following a Bachelor of Science degree in Physical Therapy or equivalent plus two years of clinical experience.

3.16.2 ENTRANCE REQUIREMENTS

Completion of a Diploma of Collegial Studies in biological sciences or equivalent is required for admission to the Bachelor of Science in Physical Therapy or Bachelor of Science in Occupational Therapy programs.

3.17 FACULTY OF RELIGIOUS STUDIES

Dean — GEORGE JOHNSTON, M.A., B.D., D.D. (Glasgow), Ph.D. (Cantab.)

William and Henry Birks Building
3520 University Street
Montreal, Quebec
H3A 2A7

3.17.1 DEGREES OFFERED

Bachelor of Theology (B.Th.)

The Faculty also prepares graduate students for the degrees of S.T.M., M.A. and Ph.D. in Religious Studies in conjunction with the Faculty of Graduate Studies and Research.

3.17.2 PERIOD OF STUDY FOR BACHELOR'S DEGREE

Three years, or two years following a B.A. or equivalent degree.

3.17.3 ENTRANCE REQUIREMENTS

For the B.Th., an academic diploma from a Quebec CEGEP or the equivalent. Advanced standing is granted to those who possess an approved B.A.

For the S.T.M. and the M.A., a B.A. with a major in religion or theology and at least second class standing; or an approved B.Th. or B.D. See the *Announcement of the Faculty of Graduate Studies* and the calendar of the Faculty of Religious Studies for degree regulations and other necessary information.

It should be noted that three theological colleges affiliated to McGill are associated with the Faculty. Intending ordinands can meet the requirements of their churches for academic theology by taking selected degree courses in the Faculty upon the advice of their college principal. After they have completed a University degree they may proceed to theological college for a year of professional training.

3.18 FACULTY OF SCIENCE

Dean — E. J. STANSBURY, M.A., Ph.D. (Tor.)

3.18.1 DEGREE OFFERED

Bachelor of Science (B.Sc.)

3.18.2 PERIOD OF STUDY

The degree program normally requires three years of study after the Diploma of Collegial Studies. Acceleration may be possible in some cases as student progress is determined on a credit system.

3.18.3 ADMISSION

See Section 2.

3.18.4 STUDY PLANS

Three types of study plan are available: Faculty Programs, Major Programs and Honours Programs.

A Faculty Program is an approved coherent selection of courses giving the student a useful concentration in a recognized area. Three fifths of the student's course load in a Faculty Program is specified, the remaining courses being freely elected from those offered in the Faculties of Science and Arts.

Major programs are more specialized than Faculty programs and are usually centred around a specific discipline or department. Between three fifths and four fifths of the course load is specified in the program and the student is free to elect the remaining courses from among the offerings in the Faculties of Science and Arts.

Honours Programs require the student to maintain academic performance at a high standard in addition to involving a very high degree of specialization.

Faculty Programs are available in:

Anatomical Sciences
Biochemistry
Biogeography
Biology
Chemistry
Chemistry and Biological Sciences
Climatology
Dynamics of the Oceans and Atmosphere
Earth Physics
Geomorphology
Hydrology
Marine Geology
Mathematics and Biology
Mathematics and Chemistry
Mathematics, Chemistry and Physics
Mathematics and Physics
Mathematics and Psychology
Microbiology and Immunology
Paleobiology
Psychology
Quaternary Studies

Major sequences are available in:

Major Anatomical Sciences
Major Biology
Major Chemistry
Major Crystallography
Major Geography
Major Geological Sciences
Major Mathematics
Major Meteorology
Major Microbiology and Immunology
Major Physics
Major Physiology
Major Physiology and Physics
Major Psychology

Honours Psychology
Honours Solid Earth Geophysics

3.18.5 TRANSFER STUDENTS

All students from other universities who wish to transfer credits to the Faculty of Science must apply in writing to:

The Admissions Office
McGill University
P.O. Box 6070, Station A
Montreal, Quebec
H3C 3G1

3.19 SCHOOL OF SOCIAL WORK (in the Faculty of Graduate Studies and Research)

Director — D. E. WOODSWORTH, B.A. (Tor.), M.A. (Mich.), Ph.D. (Brandeis)

3506 University Street
Montreal, Quebec
H3A 2A7

3.19.1 DEGREES AND DIPLOMA OFFERED

In the Faculty of Arts:
Bachelor of Social Work (B.S.W.)

In the Faculty of Graduate Studies and Research:
Master of Social Work (M.S.W.)
Diploma in Advanced Social Work Practice

3.19.2 ENTRANCE REQUIREMENTS

3.19.2.1 The B.S.W.

Students are admitted to the three-year program in the Faculty of Arts after completion of a Diploma of Collegial Studies or equivalent on a competitive basis. Students with a B.A. with little social and behavioural science content may be admitted at the second year level. Students with a B.A. with strong preparation in social and behavioural sciences may be admitted to a special B.S.W. program consisting of two summers plus a full academic year.

3.19.2.2 The M.S.W.

Students may be admitted to a one-year M.S.W. program upon completion of the B.S.W. with B standing.

3.19.2.3 The Diploma in Advanced Social Work Practice

This program is available to persons who hold a M.S.W. degree with high standing, and three years' experience in practice.

For details see the *Announcement of the School of Social Work.*

4 SUMMER SESSION AND SUMMER SCHOOLS

4.1 SUMMER SESSION

The 1974 Summer Session will consist of two parts: The Pre-Summer Session, to be held from May 13 to June 21, and the Summer Session, from July 2 to August 9. Each Session has in turn been divided into two terms in order to distinguish between full courses (6 credits) which will run the length of the six week session and half courses (3 credits) which will be held over a period of three weeks. Pre-Summer Session — first term: May 13-May 31; final examinations June 3. Pre-Summer Session — second term: June 4-June 21; final examinations June 25. Summer Session — first term: July 2-July 19; final examinations July 22. Summer Session — second term: July 23-August 9; final examinations August 12. Final examinations for full courses will be held on June 25 and August 12 respectively.

Students may register by mail up to one week before the start of courses or they may register in person on the first day of each session (i.e. May 13, June 4, July 2 or July 23). Registration in person will be in Redpath Hall from 10:00 a.m. to 7:00 p.m. on these four days.

McGill students wishing to attend the Pre and/or Summer Session will be required to submit an authorization from the Faculty in which they are currently registered, outlining the specific course(s) to be taken and indicating whether the course(s) is (are) part of the program they are pursuing.

Students from other Universities wishing to take a course(s) at McGill for credit at their own university may do so, provided they submit a letter of permission from the Registrar of their home University.

New students will have to be admitted to McGill before being allowed to register in Pre- and/or Summer Session. Students wishing to apply to McGill must do so before March 1. Those unable to complete admission procedures before March 1 will be required to wait until the summer of 1975 before attending Summer Session.

Please note that the French Summer School, The Accountancy Summer School and the Centre for Continuing Education will offer summer courses which are not administered by the Summer Session Office. Individuals interested in these specific programs, briefly listed below, should contact the respective offices concerned.

Full information concerning course offerings, applications, and requirements may be obtained from:

Summer Session Office
McGill University
P.O. Box 6070, Station A
Montreal, Quebec, Canada
H3C 3G1
(514) 392-6740

4.2 SUMMER SCHOOLS

4.2.1 ACCOUNTANCY

The Faculty of Management (Accountancy) invites applications from students

both from Montreal and elsewhere for the summer school. The full curriculum of 90 hours will be spread over three weeks with six hours of courses per day per five-day week.

Montreal students are not required to live on campus though they are encouraged to do so. Students may take individual courses instead of registering for the whole school.

The following courses will be taught by professors and professional accountants under the direction of Professor Ronald G. Laybourn of the Faculty of Management:

	Hours
Financial Accounting, Theory	5
Theory applied in Problems	15
Cost and Management Accounting, Theory and Problems	10
Modern Auditing and Analysis of Accounting Systems	10
Investigations and Reports	10
Principles of Management:	
Planning and Control	10
Computer Concepts*	5
Planning and Development of Computer Information Systems	10
Federal Income	15

*An *extra* Saturday session introducing Computer Concepts and Programming will be available for those who have had no previous instruction.

Full information may be obtained from:

The Accountancy Summer School
Faculty of Management, McGill University
Samuel Bronfman Building
1001 Sherbrooke Street, West
Montreal, Quebec
H3A 1X9

4.2.2 FRENCH (IN THE FACULTY OF ARTS)

The French Summer School, a residential school with an entirely French-speaking staff, was established in 1904 and held its fifty-seventh session in 1973. Courses are offered at two levels (undergraduate and graduate) in three divisions: advanced undergraduate, graduate and M.A.

The program is designed for:

1) Undergraduates who have completed two years towards the B.A. degree with a major in French; students whose knowledge of French is considered satisfactory but who are not majoring in French may be admitted in exceptional cases (Division B).
2) Those having obtained a B.A. degree or its equivalent with sufficient background in the French Language who wish to take courses at the graduate level especially in Language and Civilization. (Division C)
3) Graduates who are presently working towards an M.A. or a Ph.D. at Universities other than McGill (Division C)
4) Teachers of French, at the Elementary or Secondary School, College or University level, who desire an effective "refresher" (Division B or C)
5) Graduates who wish to work towards an M.A. (with or without thesis) at McGill University by attending sessions at the French Summer School. (Division D)
6) Graduates who wish to work towards the M.Ed. (Teaching French as a Second Language) at McGill University, and taking the program organized jointly by the French Summer School and the Faculty of Education (Division D).

The courses carry credits towards McGill degrees; these credits are also transferable to other North American universities and colleges.

Extracurricular cultural and social activities play a major role in the program. These activities are supplemented by the rich and varied resources of French-speaking Montreal. The teaching staff lives in the same residences as the students and mingles freely with them. The exclusive use of French at all times, in and out of class, is absolutely compulsory.

For complete information concerning applications, admission requirements and detailed booklet, please write to:

The Secretary
French Summer School
McGill University
Peterson Hall
P.O. Box 6070, Station A
Montreal, Quebec
H3C 3G1

5 CENTRE FOR CONTINUING EDUCATION

Director — J. A. DUFF, M.A. (Queen's, Belf.), C.A.

Strathcona Hall
772 Sherbrooke St. W.
Montreal, Quebec
H3A 1G1
392-5244

McGill University offers more than 300 evening courses through its Centre for Continuing Education in Montreal. These include the following:

GRADUATE LEVEL COURSES

Management
Diploma in Management (MBA I)
Diploma of the Institute of Chartered Accountants of Quebec.

Engineering
Computer Science Courses

Social Work — Individual courses

UNDERGRADUATE LEVEL COURSES

Education
Diploma in Special Education
Diploma in Reading
Teachers Certification Program
Bachelor of Education

Engineering
Individual courses in Engineering and Computer Science

General Courses
Human Behaviour
Communication Arts
Canadian Studies
Occupational Preparation

Languages

Certificates of Proficiency in English, French, German, Italian, Russian, Spanish
Diploma in Translation: English/French, French/English

Management

Bachelor of Commerce
Diploma — Registered Industrial Accountant; Certified General Accountant; Associate of Institute of Canadian Bankers; Fellow of Institute of Canadian Bankers
Certificates in Management — Administration, Appraisal of Real Estate, Banking, Insurance Brokerage, Marketing, Systems Design, Transportation
Certificate of the Canadian Institute of Management
Diploma of the Chartered Institute of Secretaries in Canada
Travel Counselling
Practical course in Public Relations

6 RESEARCH INSTITUTES, CENTRES AND PROGRAMS

The Institutes and similar groups listed below carry out research and teaching in a number of specialized fields. In most of them facilities are available for qualified students who wish to take higher degrees.

6.1 INSTITUTE OF AIR AND SPACE LAW

The Institute provides a program and facilities for advanced study and fundamental research in air and space law and related problems of international law for highly qualified law graduates or others with appropriate qualifications. Students may proceed towards the Diploma in Air and Space Law, the degree of Master of Laws or the Doctor of Civil Law.

Director — PROFESSOR I. A. VLASIC.

6.2 ALLAN MEMORIAL INSTITUTE OF PSYCHIATRY

A Psychiatric Institute for teaching, research, and treatment. McGill University undertakes responsibility for the training and teaching facilities, and the Royal Victoria Hospital for the clinical work. Teaching covers both undergraduate instruction and advanced postgraduate training. Research facilities are provided for clinical and laboratory studies of clinical conditions and biochemical, physiological and psychological study of various aspects of behavioural disorders in animal and man.

Director — PROFESSOR M. DONGIER.

6.3 ANAESTHESIA RESEARCH DEPARTMENT

Electrophysiological and neurochemical studies on synaptic transmission in the brain: the aim is to identify the naturally occurring chemical transmitter and receptor substances and to analyse their modes of action and how these are influenced by general anaesthetics and other drugs acting on the central nervous system.

Director — PROFESSOR K. KRNJEVIC.

6.4 ANTHROPOLOGY OF DEVELOPMENT PROGRAM

The program coordinates and furthers research and teaching on the process

of socio-economic development as it affects small communities in the Canadian north and in low-income countries.

Director — PROFESSOR R. F. SALISBURY.

6.5 AVIATION MEDICAL RESEARCH UNIT

The Unit deals with physiology of spatial orientation, vision and postural control.

Director — PROFESSOR G. MELVILL JONES.

6.6 BELLAIRS RESEARCH INSTITUTE
St. James, Barbados

This is a multidisciplinary institute offering research opportunities in terrestrial and marine biology, geology, geography, climatology, and chemical and physical oceanography for researchers with academic interests in the tropical environments of Barbados. The latter include coral reefs, rocky shores, sandy beaches, brackish water ponds and areas of shallow water flats of sand, mud and grass.

Director — PROFESSOR FINN SANDER.

6.7 BIOMEDICAL ENGINEERING UNIT

The BioMedical Engineering Unit operates both in the Faculties of Engineering and Medicine to carry out research and to train graduate students. Its work concentrates especially on neuromuscular control systems, sensory and neural communication theory, eye movements and electronystagmography, auditory system, sensory aids, physiological signal analysis; hospital information systems, health systems, and technological applications in the clinical environment.

Acting Director — PROFESSOR C. A. LASZLO.

6.8 BRACE RESEARCH INSTITUTE

The Institute is concerned with the utilization of solar and wind energy as a means of improving the living conditions of peoples in arid areas. Simple solar desalination systems have been developed in addition to the combination of these systems with greenhouses for the production of food and water in arid areas. Investigations have been undertaken for developing windmills for the production of electricity and the pumping of water.

Director, Field Operations — T. A. LAWAND.

6.9 McGILL CANCER RESEARCH UNIT

McGill University Cancer Research Unit is supported by the National Cancer Institute of Canada. Principal field of research is tumor-immunology.

Director — DR. MARTIN G. LEWIS.

6.10 INSTITUTE OF COMPARATIVE LAW

The Institute of Comparative Law is established within the Faculty of Law of McGill University as a centre for comparative legal studies providing facilities for graduate work, advanced studies and field research in private and public Law. In private law the main emphasis is placed upon the concepts of the civil law systems of continental Europe and Quebec and of the Anglo-American-Canadian common law. In public law special attention is given to comparative constitutional law.

Director — PROFESSOR H. R. HAHLO.

6.11 COMPUTING CENTRE

The Computing Centre provides computer service for instructional, research and administrative purposes. Current equipment includes two large IBM systems,

a 360 Model 75 and a 370 Model 158. The latter is dedicated to timesharing, permitting direct access from any location on campus equipped with a low cost terminal. Facilities for card input and high volume printed output are available at several locations on the main campus and at Macdonald College.

Director — PROFESSOR W. D. THORPE.

6.12 CENTRE FOR CONTINUING MEDICAL EDUCATION
1110 Pine Ave. West

The Centre was established in 1973 to promote and integrate programs in continuing medical education (for interns, residents, and physicians in practice) at the McGill teaching hospitals. Programs are also run by the Centre itself.

Director — DR. K. G. DAWSON.

6.13 DAIRY HERD ANALYSIS SERVICE
(Livestock Population Genetics)

Research in the dynamics of domesticated livestock populations with particular emphasis on the physiological and environmental factors that affect the estimation of the relative genetic merit of individual and groups of animals.

Director — PROFESSOR J. E. MOXLEY.

6.14 McGILL UNIVERSITY PROJECT FOR DEAF CHILDREN

This research project, begun in 1966, is concerned with the identification and management of deafness in early infancy. Both basic and clinical research is undertaken. The service aspects of the research are supported by the Montreal Children's Hospital. The work includes study of prosthetic devices, evaluation of training procedures and the development of testing techniques applicable to children up to three years of age.

Director — PROFESSOR DANIEL LING.

6.15 CENTRE FOR DEVELOPING AREA STUDIES

The Centre attempts to coordinate research and graduate studies on development topics in both the social sciences and the applied sciences. It organizes workshops and seminars and operates a publications program and a library which contains self-instructional development modules.

Director — PROFESSOR T. L. HILLS.

6.16 CENTRE FOR EAST ASIAN STUDIES

The Centre coordinates an interdisciplinary program of courses on China and Japan, with emphasis on the modern period. It offers both a Major and Honours Program in East Asian Studies and promotes the development of the Department of East Asian Languages and Literatures. The Centre also stimulates new courses in the field and develops the East Asian library collection. These activities are pursued within the humanistic tradition of scholarship.

Director — PROFESSOR C. H. BURCHILL.

6.17 ENVIRONMENTAL STUDIES PROGRAM

Environmental Studies at McGill consists of a group of interdisciplinary undergraduate courses that examine selected aspects of the interrelationship of man with the natural and the built environment. These courses have few prerequisites, and are available as electives to students in any major program who are interested in relating their major study area to environmental studies. The courses are given by different departments and stress the comprehensive nature of environmental problems, and hence the need to synthesize humanistic, institu-

tional and scientific knowledge in order to understand these problems. Thus, they provide a perspective that emphasizes the unity of knowledge and the interconnection of human and natural processes. The focus of these courses is on man in the environment rather than on aspects of environmental science such as pollution or ecology.

Further information may be obtained from the Departments or from the Director of Environmental Studies.

Director — PROFESSOR B. P. WARKENTIN.

6.18 FOSTER RADIATION LABORATORY

The Laboratory houses the experimental nuclear physics group and its research program is centred around a 100 MeV proton synchrocyclotron. The main theme of the current research activities is focused on the study of the nuclei lying far from the beta stability line. The level structure, β-decay, electromagnetic transition, delayed proton and alpha decay properties of these nuclei are investigated using very high speed pneumatic target transport systems, recoil gas jet sweeping system, an on-line mass spectrometer and a super-conducting beta ray spectrometer. The Laboratory is also equipped with excellent facilities for conventional β-τ spectroscopy studies and subnanosecond lifetime measurements.

Director — PROFESSOR S. K. MARK.

6.19 FRENCH CANADA STUDIES PROGRAM

This program was established in 1963 for the study of French Canada at the undergraduate and graduate levels, by research, and extension and public education programs. It has included in its program the award of fellowships, a large number of research projects, and the improvement of the collection of French Canadiana in the McLennan Library.

Director — PROFESSOR JEAN-LOUIS ROY.

6.20 GASTROINTESTINAL RESEARCH INSTITUTE

The Institute was established in 1959 to provide interdisciplinary research facility and graduate education in enterology. The research program correlates different fields, such as botany, zoology, bacteriology, physics, chemistry and clinical investigation, in problems concerning alimentary canal and nutrition. The policy of the Institute since its inception is to encourage interdepartmental activity, as well as integrate interdisciplinary research in relation to the digestive system.

Graduate students take courses in different departments which are considered necessary for the training in the particular field of research. Consideration will be given to the particular interests and previous experience of the candidate in the selection of the project, by arrangement with various departments, if these can be integrated into the research program. The special research interests of the Institute include: 1) Comparative intestinal absorption of metal ions in simple forms of life and higher mammals; 2) Preparation of synthetic and naturally occurring polymers for prevention of radiostrontium contamination; 3) Structure and physical function of gastrointestinal mucin from different species.

Director — PROFESSOR STANLEY C. SKORYNA.

6.21 GAULT ESTATE
422 rue des Moulins
Mont St. Hilaire

The Estate, a legacy from the late Brigadier A. Hamilton Gault, consists of 2200 acres of forested mountain 20 miles east of Montreal, including Lac Hertel and its complete drainage basin. The entire property is protected as a Federal Bird Sanctuary.

The twelve-hundred acre western sector, with four summits linked by a 12 mile network of trails, is open daily throughout the year to members of the University and the visiting public. Seasonal recreational activities include hiking, skiing, snowshoeing, picnics, photography and other pursuits which do not alter or change the environment. No motorized vehicles are permitted beyond the parking area except on official business. No camping is permitted at any time. One thousand acres on the eastern shore of the lake form a Biological Reserve, to which access is restricted by permit for approved field research in the natural sciences.

Comfortable dormitory facilities are available for up to 32 persons, for classes and for individuals involved in ecological studies. A Day-Conference Centre is provided at Manoir Gault on Lac Hertel for groups of up to 50 persons. This can be used in conjunction with the dormitories. Limited accommodation is also available in the Cottage. All arrangements must be made by written application to the Acting Warden.

The Estate is also headquarters for the Mont St. Hilaire Nature Conservation Centre, which conducts a year round bilingual nature interpretation program for all ages. The Centre is supported entirely by outside funds, including grants from industry and fees for services rendered, and cooperates with educational institutions and community organizations to provide teacher training and counselling services in outdoor education.

Acting Warden and Director of the Nature Centre — ALICE E. JOHANNSEN.

6.22 SCHOOL OF HUMAN COMMUNICATION DISORDERS
Beatty Hall, 1266 Pine Ave. West

The School of Human Communication Disorders offers both professional and research training in speech and hearing disorders at the graduate level. Emphasis is placed upon understanding of fundamental principles and critical evaluation of current methods rather than upon the teaching of specific techniques for diagnosis and therapy.

Director — PROFESSOR K. K. CHARAN.

6.23 INDUSTRIAL RELATIONS CENTRE

The Centre provides information, evening seminars, research on industrial relations; general labour relations, public conferences; publishes newsletters surveying developments in industrial relations in Canada, as well as research reports; maintains a computerized analysis of more than 1800 Canadian collective agreements. Membership from the community includes crown corporations and Government agencies, industrial firms, hospitals and labour unions.

Director — PROFESSOR FRANCES BAIRSTOW.

6.24 INSTITUTE OF ISLAMIC STUDIES

McGill University's Institute of Islamic Studies is concerned with the disciplined study of Islamic civilization throughout the scope of its history and its geographical spread. It gives attention to the origins of Islam, to the rise of the civilization in which Islamic faith was the vivifying factor, to the forces which shaped the civilization and the changes it has undergone. It is also concerned with the contemporary dynamics of the Islamic world as Muslims seek to relate their heritage from the past to the radical situation of modernity.

Director — PROFESSOR C. J. ADAMS.

6.25 JEWISH STUDIES PROGRAM

This Program was established in 1968 on an interdisciplinary basis. The aims of the program include making Jewish culture and thought available to students

through courses within several departments as well as to those students who seek a measure of specialization. The Program courses fall under two categories — those which are primarily devoted to Jewish material, and those which are secondarily so concerned. An Honours B.A. and a B.A. with Major in Jewish Studies are available.

Chairman — PROFESSOR E. V. ORENSTEIN.

6.26 JEWISH TEACHER TRAINING PROGRAM

This Program was established in 1973 in the Faculty of Education in conjunction with the Jewish Studies Program. The goal is to train teachers of Jewish Studies for the elementary and secondary school levels through exposure to educational theory and methodology and courses in Jewish Studies. A B.Ed. with Jewish Studies as a specialization is available.

Director — PROFESSOR S. EPSTEIN.

6.27 CENTRE FOR LEARNING AND DEVELOPMENT

The Centre for Learning and Development was established in 1969 to help improve the learning environment, teaching practices and learning methods at all levels of education. At present its activities focus on university education and include dissemination of relevant information, consultation, workshops, and research.

Director — PROFESSOR G. L. GEIS.

6.28 McGILL MAGNET LABORATORY: Longueuil, Que.

This laboratory contains facilities for the production of intense magnetic fields, both continuous and pulsed, for the use of research workers whose scientific programs can benefit from their use.

Director — PROFESSOR D. R. STEVENSON.

6.29 MANAGEMENT INSTITUTE

The Management Institute, an ancillary operation of the Faculty of Management, implements the Faculty's policies regarding continuing education for business. It offers courses and seminars designed to help middle and senior management people keep abreast of current developments in analytical and decision-making techniques, and to provide executives with a better appreciation of the integrative problems of general management.

Since May, 1973, the Management Institute has also been administering the program of the Executive Development Institute, a separately incorporated organization with its own Board of Directors. The course and seminars are similar in scope and method to those of the Management Institute and are all held at McGill University.

Director — PROFESSOR R. N. MORRISON.

6.30 MARINE SCIENCES CENTRE

The Centre is interdepartmental in scope, emphasizing the interdisciplinary nature of the science of oceanography. Excellent laboratory and library facilities are available, and opportunities for field work exist in the Arctic, the Gulf of St. Lawrence, the Canadian eastern seaboard, and at the Bellairs Research Institute in Barbados. Special research interests include the physics of sea ice, the energy exchange between atmosphere and hydrosphere, marine climatology, the dynamics of sea water, marine bacteria, growth and life cycles of marine organisms, marine productivity, marine biogeography and sedimentation.

Chairman — PROFESSOR B. F. d'ANGLEJAN.

6.31 McGILL-MONTREAL CHILDREN'S HOSPITAL LEARNING CENTRE 3640 Mountain St.

The Learning Centre was established in 1960 and became affiliated with McGill in 1971. It has developed a comprehensive program to help and treat children with perceptual-motor problems. The staff includes psychologists, remedial teachers, speech therapists, a social worker, an optometric consultant, a physician, and art and music specialists. Research into cognitive defects is continuous and the programs in the Centre are constantly reviewed.

Director — DR. SAM RABINOVITCH.

6.32 INSTITUTE FOR MINERAL INDUSTRY RESEARCH

Research at this Institute consists of rock penetration studies, studies in frozen ground, and all aspects of the mining environment, including dust, ventilation, noise and underground illumination.

Director — To be appointed.

6.33 MONTREAL NEUROLOGICAL HOSPITAL AND INSTITUTE

The Montreal Neurological Institute and Montreal Neurological Hospital are concerned with undergraduate and graduate teaching in neurology, neurosurgery and the neurosciences, research in basic and clinical sciences related to the nervous system, and clinical care for patients with disorders of the brain and nerves.

Director — PROFESSOR WILLIAM H. FEINDEL.

6.34 MORGAN ARBORETUM: Macdonald College

Established in 1947 and located at Macdonald College, the Arboretum has 600 acres of woodland devoted to the study of woodlot management and the place of private forestry in the eastern Canadian economy; the study of forest values and their conservation; teaching, research, demonstration, and conservation education. About 100 acres have been planted in reforestation projects involving many coniferous and broad-leaved species. In addition, the Arboretum has an excellent collection of specimens of Canadian and foreign trees and shrubs.

Curator — PROFESSOR J. D. MacARTHUR.

6.35 McGILL CENTRE FOR NORTHERN STUDIES AND RESEARCH

The Centre encourages, promotes, undertakes and co-ordinates McGill's research and training programs relating to the North. In particular it is developing the interdisciplinary aspects of research. The function of the Centre is to assist the interchange of information among those engaged in Northern studies and research, to maintain records of all pertinent projects in the University, to provide information on the University's capacity to undertake Northern research, to prepare and assist others in the preparation of research proposals and the assembling of teams, and to serve as a liaison with other research and teaching organizations, industry and government.

The Centre encourages students to develop a continuing interest in the North and to follow careers relating to it. It co-ordinates lectures, seminars and academic courses on northern topics.

Director — PROFESSOR TREVOR LLOYD.

6.36 INSTITUTE OF PARASITOLOGY

A cooperative venture of the National Research Council and the University for the study of parasitology in man and animals. It also cooperates with public authorities in the practical applications of parasitology. It accepts qualified

students who wish to proceed to the M.Sc. or the Ph.D. degree. The Institute is housed at Macdonald College, Ste. Anne de Bellevue, near Montreal.

Director — To be appointed.

6.37 INSTITUTE OF PATHOLOGY

The Institute is active in a broad research program into the biology of disease. The staff are individual investigators in their field of choice which includes the nature of connective tissue in health and disease, respiratory disease, cardiovascular diseases, liver disease, haematologic disease and cancer.

Director — PROFESSOR R. H. MORE.

6.38 PHONETICS RESEARCH LABORATORY

Research in acoustic phonetics and speech perception. Spectrographic analysis of speech, production of synthesized speech by means of an Electronic Vocal Analog. Languages investigated include English, French, Cree, Mohawk, Czech, Hungarian.

Director — PROFESSOR ANDRE RIGAULT.

6.39 PULP AND PAPER RESEARCH INSTITUTE OF CANADA

Separately incorporated non-profit research organization affiliated with McGill University and also with Canadian Pulp and Paper Association and Department of the Environment but with its own board of control. Supported by Canadian pulp and paper industry. Principal field of research: pulp and paper technology, including logging research, mechanical and chemical pulping, paper making, process control, product quality and environmental pollution. Also provides facilities to graduate students working in various departments of McGill University on research projects of interest to the pulp and paper industry.

President — DR. PIERRE R. GENDRON.

6.40 SHASTRI INDO-CANADIAN INSTITUTE

McGill University is a founding member of the Shastri Indo-Canadian Institute, a cooperative, voluntary organization, incorporated in Ottawa, whose members are the National Library and Canadian colleges and universities with an interest in Indian studies. Its objectives are to enhance the mutual understanding between India and Canada by supporting and promoting development of Indian Studies at Canadian institutions of higher learning. This is presently being done mainly by the provision of fellowships for persons residing in Canada to conduct scholarly research in the humanities and social sciences, and by the acquisition of Indian publications for scholarly use in Canada, and by summer programs to introduce undergraduates and school teachers to the field.

Executive Director — PROFESSOR R. W. STEVENSON.

6.41 SOCIAL SCIENCES STATISTICS LABORATORY

The Laboratory is intended to promote quantitative teaching and research in the Social Sciences. The laboratory's facilities include a programmer, a terminal, and electronic calculators.

Director — PROFESSOR J. DANIEL KHAZZOOM.

6.42 SOIL MECHANICS LABORATORY

Research interests include fundamental soil mechanics, soil-water interaction, thermal soil properties and mechanics, soil dynamics and soil-structure interaction, soil stability and constitutive behaviour, mobility and trafficability, and other related problems in soil engineering.

Director — PROFESSOR RAYMOND N. YONG.

6.43 McGILL SUB-ARCTIC RESEARCH LABORATORY: Schefferville, Quebec

This Laboratory at Schefferville in the centre of Labrador-Ungava provides facilities for research in most aspects of the environment. There is a resident director and permanent staff, plus a research group of faculty and graduate students.

Director — PROFESSOR F. H. NICHOLSON.

7 GENERAL INFORMATION

7.1 PUBLICATIONS

The following official publications are issued by the University.

ANNOUNCEMENTS OF FACULTIES AND SCHOOLS
General Announcement
Undergraduate Scholarships, Bursaries, Prizes, Medals, and Loan Funds
Postgraduate Awards, Fellowships and Bursaries
Faculty of Arts, Faculty of Science
Centre for Continuing Education
Faculty of Dentistry
Faculty of Education
Faculty of Engineering (including School of Architecture and School of Computer Science)

7.2 RESIDENTIAL FACILITIES

7.2.1 TYPES OF RESIDENCES

McGill offers three types of residence accommodation:

1. Royal Victoria College houses undergraduate women.
2. Douglas Hall houses both men and women, and is exclusively a graduate residence.
3. Gardner, McConnell and Molson Halls each house both men and women, most of whom are undergraduates, although some graduate students also choose to live there.

7.2.2 LOCATION

The Co-educational Residences are located on the wooded slopes of Mount Royal, adjacent to the University playing fields. They are approximately two blocks away from the main campus, and a ten-minute walk from the centre of downtown Montreal.

Royal Victoria College is on campus close to the major shopping and cultural areas of the city. Bus and subway stops are nearby.

7.2.3 ACADEMIC STAFF

The academic staff of each hall consists of a Residence Director or Warden, Assistant Directors, and Residence Fellows or Dons. One of the main functions of the academic staff is to get to know students individually and, if a student requests it, to give advice on personal or academic matters.

7.2.4 ROOMS AND FACILITIES

Except for a few double rooms at Royal Victoria College all rooms are for single occupancy and in each, besides a bed and bed-linen, there is a desk, chair, chest of drawers and closet. Linen and towels are changed weekly. The co-ed residences have maids who clean the rooms, but in all halls residents are expected to make their own beds and tidy up. Each hall has coin-operated automatic washers and dryers, as well as ironing facilities; an outside dry cleaning firm also calls regularly at the residences. Telephones located on each floor are operated through hall switchboards; in addition, each room is wired for a private telephone. There is storage space for ski equipment, trunks, and suitcases in every hall. Limited parking space is available in the co-ed complex only.

The halls have TV, music, sewing, and stereo rooms, and a well-stocked library of magazines, books and newspapers. The co-ed residences have a calculating and typing room, and R.V.C. has the use of a swimming pool located within the building.

7.2.5 MEAL SERVICE

Residents at Molson, McConnell and Gardner halls take their meals together in a large centrally located dining hall. Douglas Hall and the Royal Victoria College have their own dining rooms. Students may choose either a seven or five day meal plan. Bag lunches are available. There are kitchenettes on every wing of the co-ed residences where residents may keep food and prepare hot or cold snacks at any time. In addition vending machines in every hall dispense soft drinks, sweets and pastries. Students in the co-ed residences can rent small refrigerators for their rooms.

7.2.6 DIETS

Limitations of facilities do not permit catering for special religious diets in the dining halls, although the kitchens will seek to meet special needs whenever possible. Temporary diets because of sickness may be prepared on doctors' orders.

7.2.7 HEALTH

In case of illness residents are usually referred to the University Health Service nearby. However, there is a nurse on duty every day in the residence dispensary or infirmary, and live-in nurses who keep evening office hours and who are also available for emergency treatment any time.

7.2.8 GOVERNMENT

Each hall has a Residents' Council, elected yearly by the residents at a designated time during the academic year. It is the job of Council to gather hall opinions, set policy, supervise financial affairs, and organize sporting and recreational activities within the residences.

7.2.8.1 Guidelines

McGill's residences are run for the convenience and advantage of the students living in them. What "rules and regulations" do exist are decided upon and administered by the students themselves. Basically, living together in any community requires just a single rule: respect for the rights of others. In each hall there is a House Committee which is elected from the student body at the beginning of each year to deal with any problems that may arise.

7.2.9 APPLICATION AND ADMISSIONS

Please note that the procedure governing residence admissions is entirely separate from that of University admissions. Application forms for both the Royal Victoria College and the Co-ed Residences are mailed out with all academic application forms. Residence application forms should be returned to the appropriate address below:

Residence Manager
Royal Victoria College
3425 University Street
Montreal, Québec
H3A 2A8

The Secretary
Co-ed Residences, McGill University
3935 University Street
Montreal, Québec
H3A 2B4

The University is able to house in residence only a small fraction of its students. Because of the growing popularity of residence living, only a few hundred rooms become vacant each year. It is imperative, therefore, that students seeking residence accommodation apply early and fill out the residence application thoughtfully. The deadline for applications from American and Canadian students is April first; however, applications from *overseas* students may be considered even if they arrive somewhat later than April first. Otherwise, all late applications are automatically placed on a waiting list and not considered until late August.

Among the applications that arrive on time, final selections are made with the following factors in mind: date of application, date of University acceptance, course of study, national origin, and interests as given on the application form.

7.3 ROOM AND BOARD CHARGES IN UNIVERSITY RESIDENCES

The fees for room and board in University Residences for the 1973-74 session are as quoted below and are subject to the conditions prescribed.

The University reserves the right to make changes without notice in the published scale of fees if circumstances so require.

7.3.1 DOUBLE ROOMS

Sessional fees for a limited number of double rooms in Royal Victoria College are $100.00 lower than the rates indicated below.

7.3.2 EXCLUSIONS

1) The sessional fees quoted below for Room and Weekday Meals do not include meals on the following holidays: September 2, Labour Day; October 14, Thanksgiving; February 21, Mid-Term; March 28 & 31, Easter; May 19, Victoria Day.
2) The sessional fees quoted below do not include meals during the Christmas recess (dates to be announced) and some dining facilities will be closed during this period.

7.3.3 MEAL PRICES

Residents may obtain meals, in addition to those covered by sessional fees, at the following student rates:

Breakfast	$1.00
Lunch	1.50
Dinner	2.00

Guests will be required to pay the full posted meal prices at all times.

7.3.4 GRADUATING STUDENTS

Graduating students wishing to remain in residence until the morning following their Convocation will be permitted to occupy a room without additional charge. Due to other residence commitments, such extended stays may require a move to another room, possibly to another residence building. Any meals taken during these extended stays will be charged on an individual basis.

7.3.5 EXTENDED STAYS

Because of registration, examinations or other special circumstances, residents may be permitted to occupy their rooms for a limited time before or after the period covered by their sessional fees. The charges for such extended stays are $3.12 per day, excluding meals and $5.90 per day, including meals. One of these options must apply for the full period of the extended stay. Payment for extended stays must be made in advance for the duration of the stay or a period of one week, whichever is less.

7.3.6 SESSIONAL FEES FOR SINGLE ROOMS IN UNIVERSITY RESIDENCES *(Room and board charges, key deposits and residence activities fees)

Fees are subject to change without notice. This specifically includes the possibility of increased fees for the second term if it appears that the residences are running at a loss.

GENERAL ANNOUNCEMENT

The following sessional fees may be paid in two instalments:

Faculty	*From Lunch*	*To Breakfast*	*Room and All Meals*	*Room and Weekday Meals*
Standard academic year	Sept. 9	May 1	$1,325.	$1,170.
Medicine				
1st year	Sept. 2	June 7	1,575.	1,390.
2nd year	Sept. 2	June 28	1,695.	1,495.
3rd year	Sept. 2	May 30	1,530.	1,350.
4th year	Rates on request			
Dentistry				
1st year	Aug. 27	May 24	1,530.	1,350.
2nd year	Sept. 2	June 14	1,615.	1,425.
3rd year	Sept. 2	May 10	1,415.	1,250.
4th year	Sept. 2	May 10	1,415.	1,250.

Subject to prior approval, students writing regular examinations during the week of May 1 — May 6 will be accommodated, on the same conditions as those of their sessional contract, without additional charge up to and including breakfast on the day following their last examination.

*A limited number of students whose academic programs make it difficult for them to dine in the residences, may be accommodated on a room only basis at lower sessional fees which are available on request.

7.3.7 OTHER REGULATIONS

Students accepted for residence must pay a security deposit of $50.00. If a student does not remain in residence the full academic year, the deposit is not returned unless written notification is received before July first or unless the examination results do not permit registration. The deposit is returned by mail in late spring to those who stayed the full academic session. Deductions, however, are made for wanton damages to the premises by the resident or by anyone when the particular individual responsible cannot be determined.

7.3.8 PAYMENT OF FEES

Entering or transfer students: Fees may be paid in two instalments — the first within ten days after registration, and the second before January 15.

Returning students: First instalment must be paid August 23 and the second before January 15.

The sessional fees include a house fee of $10.00 collected by the University on behalf of the Residents' Council of each hall, and a $5.00 key deposit which is refunded at the end of the session.

7.3.9 PARKING ON UNIVERSITY GROUNDS

The University does not permit students to park automobiles or motorcycles on the Montreal campus. Limited parking at monthly rates is available for students living in residences.

7.3.10 OFF-CAMPUS HOUSING SERVICE

Students unable to secure a room in residence should get in touch with the

Off-Campus Housing Service
Dean of Students' Office
3465 Peel Street
Montreal, Quebec H3A 1W7

This office maintains an up-to-date computer listing of available off-campus housing, including the names of families willing to take in student boarders and other students seeking roommates.

7.3.11 UNIVERSITY HOUSING FOR MARRIED STUDENTS

The University maintains a limited number of apartment units in several nearby locations for married students. As the demand for these apartments greatly exceeds the number of vacancies occurring each year, applications are restricted to married, full-time undergraduate students and graduate students who have not yet attained the Ph.D. or M.D. degree or equivalent. Further information and application forms may be obtained from the Real Estate Manager, McGill University, P.O. Box 6070, Station A, Montreal, Que., H3C 3G1.

7.4 UNDERGRADUATE SCHOLARSHIPS

7.4.1 ENTRANCE SCHOLARSHIPS

In general, the University's system of entrance scholarships is designed to enable good students from all parts of Canada to attend McGill. The policy of the University is to recognize and honour scholarship, and the University Scholarships Committee selects scholarship winners from among those students who have obtained or who expect to obtain *a first class academic standing.*

Every student who has been selected for an Entrance Scholarship receives an honorary $100 award. Such a student in financial need may have this amount substantially augmented. Scholarships such as the J. W. McConnell Memorial and Morris W. Wilson Memorial Scholarships will be awarded to scholars who need full tuition, board and residence. J. W. McConnell Entrance Scholarships in Science and Engineering may provide for tuition, books, board and residence or a lesser amount depending upon need.

Entrance Scholarships are open to Canadian citizens, landed immigrants with one year's residence in Canada, and graduates of Canadian high schools, colleges and other educational institutions. Entrance Scholarships are awarded only to full-time students in a program of study leading to an undergraduate degree, and applicants must be entering the First year of such program:

Students should apply for an Entrance Scholarship by completing the Application for Entrance Scholarship. These forms may be obtained from the Admissions Office and must be submitted by March 1. Students who have completed this application will be considered automatically for every entrance scholarship for which they are eligible. As many as 250 entrance scholarships may be awarded in any one academic year.

7.4.2 AWARDS TO McGILL STUDENTS IN COURSE

Once a student is in course at McGill all scholarships, prizes and medals are awarded on the year-end examination results, and *no applications are required.*

The University Scholarships Committee is responsible for awarding Entrance Scholarships, University Scholarships and Special-Named Awards. The Committee

is also responsible for overseeing all scholarship policy of the University and is composed of Chairmen of Faculty Scholarship Committees, representatives from the University at large and student members.

Faculty scholarships and awards are made by Faculty Scholarship Committees. Scholarships are awarded only to full-time students taking a program of study leading to a degree. In the case of the Faculties of Arts and of Science, normally only those students who have completed at least 30 credits in the year preceding the award will be eligible for scholarships. Scholarships are awarded or renewed only if an adequate standing is attained.

Students whose University Scholarships have been renewed and who need financial assistance should apply directly to the Student Aid Office.

All awards, with the exception of prizes, are credited to the tuition fee accounts of students for the following academic year.

Inquiries concerning undergraduate scholarships should be referred to the Scholarships Office in the Registrar's Office.

7.5 FINANCIAL AID

7.5.1 PROVINCIAL AND FEDERAL AID

In all cases, a basic qualification is that the applicant must be a Canadian citizen or a Landed Immigrant with one year's residence and domicile in the province to which he applies.

In all provinces, except Quebec, the provincial authority listed below administers the Canada Student Loan Plan (Federal) as well as their own programs. The addresses are as follows:

Quebec: Apply for a Quebec registration card, after May 15, at the Student Aid Office, 3465 Peel Street, McGill University, P.O. Box 6070, Station A, Montreal, Quebec, H3C 3G1.

Ontario: As the Student Aid Office is a recognized Ontario Student Awards Office, it is recommended that all Ontario students make their applications through this facility.

New Brunswick: Department of Youth & Welfare, Fredericton, N.B.

Yukon Territory: The Students Financial Assistance Awards Committee, c/o Superintendent of Schools, Box 2703, Whitehorse, Yukon.

Northwest Territories: c/o Education Division, Department of Northern Affairs & Resources, 150 Kent Street, Ottawa, Ontario.

For the Provinces of Newfoundland, Prince Edward Island, Nova Scotia, Manitoba, Saskatchewan, Alberta, British Columbia: write to the Provincial Department of Education.

7.5.2 BURSARIES AND LOANS

These may also be available to non-scholarship students through the Student Aid Office if other sources of aid are genuinely inadequate.

7.5.3 STUDENTS FROM SCHOOLS OUTSIDE CANADA

Students from schools outside Canada are ineligible for entrance scholarships. They are expected to present evidence to immigration authorities that they have adequate funds for their studies in Canada. All who wish to study in Canada should consult the Ministry of Education in their home country for financial assistance.

SUMMER WORK AND PART-TIME WORK. Non-Canadian students who were in Canada prior to January 1, 1973, must obtain a written offer of employment from a prospective employer and submit the written offer to the Canadian Immigration authorities in order to obtain an employment visa. Non-Canadian students who came to Canada after January 1, 1973, must obtain a written offer of employment and submit the offer to the Canadian Manpower Office in order to obtain their permission before submitting the offer to the Canadian Immigration authorities. Consult the Student Aid Office for any further information needed.

7.5.4 UNITED STATES CITIZENS

The National Defence Loan is not tenable in Canada, but several states have long term loan plans which are tenable here. Students should inquire at the Department of Education in their state capital and also at local banks which may operate a Higher Education Loan Plan.

7.6 GRADUATE FELLOWSHIPS

Inquiries about graduate fellowships, etc. which are open to graduates of other universities as well as of Canadian universities should be addressed to the Fellowships Office, Faculty of Graduate Studies and Research. Inquiries about assistantships should be directed to the individual Departments.

7.7 ACADEMIC COUNSELLING IN THE FACULTIES

7.7.1 COUNSELLING IN THE FACULTIES OF ARTS AND SCIENCE

Students are urged to make full use of the advice and counselling offered by the Faculties of Arts and Science. Prospective students who are undecided as to a choice of program or orientation should consult an adviser in the Student Affairs Office, Dawson Hall. These advisers are ready to provide information and advice on courses and programs of study. Incoming students are asked to contact the office as early as the month of March.

Students who have decided on their program of studies, and who wish to proceed directly to an Academic Adviser for completion of a Study Plan Form may do so. (Consult the *Announcement of the Faculties of Arts and Science.*)

The advisers in the Student Affairs Office are available to undergraduates for consultation throughout the academic year. Experienced personnel answer questions and offer guidance each weekday from 9:00 a.m. to 5:00 p.m.

7.7.2 COUNSELLING IN THE FACULTY OF ENGINEERING

An academic counselling service is available for students in the Faculty of Engineering (including the School of Architecture). Members of staff and selected students working together provide assistance in academic matters and can give helpful advice in dealing with other problems. All students seeking assistance and advice in coping with personal problems should consult the Associate Dean (Student Affairs), Faculty of Engineering, Macdonald Engineering Building.

7.7.3 COUNSELLING IN OTHER FACULTIES

The other smaller Faculties have arrangements for providing advice and guidance to their own students. Further information should be obtained through the office of the Dean of the Faculty in which they are registered.

7.8 STUDENT SERVICES

7.8.1 OFFICE OF THE DEAN OF STUDENTS

The Dean of Students has the responsibility for the provision of and the coordination of all student services and works closely with the Students' Society in the interests of all students. The Dean, Associate Dean and Executive Assistant to the Dean are available for consultation with individual students who may wish to discuss problems not already provided for by one or other of the existing services. Legal problems which cannot be dealt with by the Legal Aid Service may be referred to the Executive Assistant. The Office of the Dean of Students maintains an "open-door" policy and students are invited to make use of these services at any time.

Location: 3465 Peel St.
General Information: 392-4551

7.8.2 ORIENTATION SERVICE

The Orientation Service is a pre-registration counselling service designed to assist incoming students in selecting their courses and to introduce new students to the various aspects of the University.

The objectives of the program are: to provide information and advice on courses and programs of study according to the students' vocational expectations, interest, ability and aptitude; to acquaint students with the many services available at McGill and to encourage their use; to tell students about registration procedures and offer suggestions which might facilitate the process; to provide the kind of information new students need to resolve academic and other problems (i.e. change of course, etc.); to familiarize students with the geography of the campus, and to introduce them to the libraries; to provide the opportunity for incoming students to meet individual members of the academic staff in an informal and friendly atmosphere.

Incoming students are invited to participate in a one-day orientation session consisting of the following:

A group meeting in the morning to discuss registration procedures, student services, the program for the day and questions of a general nature.

McGill students conduct campus tours in the morning and in the afternoon. The staff of both the Redpath and McLennan libraries provide an introduction to the libraries.

A Social Hour is held daily between August 12 and September 6. Academic staff and representatives of Student Services drop in to enjoy a cup of coffee and chat with the students. The students in turn are given the opportunity to learn more about the University and discuss programs on a friendly basis.

7.8.3 ATHLETICS

McGill's facilities for athletics, physical education, and recreation are centred in the Sir Arthur Currie Memorial Gymnasium, the Percival Molson Memorial Stadium and the McGill Winter Stadium. Sports facilities in the gymnasium include basketball, squash, badminton, and volleyball courts; swimming pools; facilities for gymnastics, wrestling, fencing, judo, and track. For the use of all women students of the University, staff and graduates, the Garfield Weston Swimming Pool is available.

The physical education programs for men and women provide instruction for students in various sports.

Numerous intramural and recreational sports clubs provide opportunities for

students to participate in sports for relaxation and to represent their faculty or residence on intramural teams of their choice.

On the intercollegiate level McGill participates in sports sponsored by the Quebec Universities Athletics Association and the Ontario Women's Intercollegiate Athletics Association.

For a complete description of the McGill athletics facilities and intercollegiate, intramural, and recreational sports programs, see the *Student Handbook*.
See also "Health Service" below.

7.8.4 CHAPLAINCY SERVICE

A counselling service is available through the campus chaplains independent of McGill administration. This service exists to serve the needs of all students through individual counsel or group encounter. The service is related to areas such as marriage counselling, value systems and group dynamics. Open meetings on a variety of religious and campus topics are regularly sponsored by the Chaplains.

At 3521 University Street there is a lounge and reading area where books and periodicals are available to students free of charge. Information concerning individual denominational services is available at "3521".

Location: 3521 University St.
General Information: 392-5890

7.8.5 STUDENT AID & FOREIGN STUDENT ADVISER OFFICE

The Student Aid section of this office handles all matters relating to financial assistance whether University, Provincial or Federal. Non-Canadian students requiring certification of registration and/or letters of advice to Foreign Exchange Control Boards obtain these from this office. Please note the information in Sections 7.5.1 and 7.5.2.

The Foreign Student Adviser section of this office deals with all matters which may affect non-Canadian students such as problems with the Canadian Department of Manpower and Immigration and information concerning the necessity of the compulsory health insurance.

Location: 3465 Peel St.
General Information: 392-5256

7.8.6 STUDENT COUNSELLING SERVICE

This office provides a place where students of all faculties may discuss any problem confidentially. Among the services offered are individual counselling, human awareness groups, psychological assessment, vocatonal testing, effective reading courses, career planning and the Career Information Library. The service is free to all McGill students.

Location: 522 Pine Ave. W.
General Information: 392-5119

7.8.7 HEALTH SERVICE

When students enrol at McGill University they have available to them a full range of medical service provided by the McGill University Health Service. Medical clinics operate daily, five days of the week from 9:00 a.m.-5:00 p.m. A physician is always on call at night and on weekends and he can be contacted by dialing the Health Service number. There are both male and female physicians on staff as well as a competent staff of college health nurses.

This service is available to all full-time students, undergraduate and post-

graduate. Students are asked to bring their Medicare cards or equivalent. *All information is completely confidential and forms no part of any "University record".*

Many students are seen for discussion about sexual life, contraception, drug problems and venereal disease. We urge students who suspect that they have V.D. to consult us. We invite students who are concerned about a drug problem to contact the Health Service and most particularly the Mental Health Section.

Part of the Health Service consists of a *Mental Health Service* which makes available to students psychiatric and psychological help. Students who wish to come are advised to make an appointment. If a psychological emergency arises the student should come directly to the Mental Health Service or phone immediately. All contacts by students with their service are kept completely confidential.

PARTICIPATION IN ATHLETICS: A student in any academic year wishing to participate in heavy contact athletics, e.g. football, will be required by the Athletics Department to undergo a physical examination at the University Health Service. A student who has received medical attention for an illness or accident must be declared fit by the Health Service before he may again participate in athletics.

In order to ensure medical coverage while a student at McGill, Canadian students from provinces other than Quebec are advised to consult with the medicare and hospital insurance offices of their own province before coming to McGill. This is particularly important since residents of other provinces are not covered by Quebec Medicare and Hospitalization while studying at McGill.

Non-Canadian students, whether undergraduate or postgraduate, are obliged to enrol in a medical and hospital insurance program. Consequently, the student and his dependents are covered to a large extent for medical and hospital expenses during the academic year. Information concerning this program can also be obtained at the general office of the Health Service.

Location: **517 Pine Avenue West**
Appointment and General Office 392-5441
Mental Health Section 392-5449

Location: **Macdonald College**
Appointment and General Office 453-6851

7.8.8 OFF-CAMPUS HOUSING SERVICE

Available to all McGill students, this service operates on a year-round basis. Up-to-date listings of various types of accommodation in the downtown area and surrounding suburbs on bus and metro routes are maintained with the use of McGill computers. The service also attempts to accommodate English-speaking students wishing to live with French-speaking families and vice-versa. Students wishing to make use of the service are asked to apply in person.

Location: 3465 Peel St.
General Information: 392-4554

7.8.9 TUTORIAL SERVICE

The Tutorial Service operates during the fall and spring terms. Students may be tutored by senior honours and graduate students specializing in the majority of fields within the Faculties. Sessions are approximately one hour in length and normally two to four students are tutored at each session. The cost to the student is minimal and depends on the number of students in the group.

Location: 522 Pine Ave. W.
General Information: 392-6741/5364/8921

7.8.10 STUDENT PLACEMENT

The Canada Manpower Centre provides a comprehensive placement service to McGill students in the areas of part-time, summer and permanent employment. The principal aims of the service are to encourage employers to make available a wide variety of job opportunities to McGill students; to assist students in finding suitable employment, by providing information on the labour market and arranging interviews with prospective employers; to encourage students to prepare for a career by doing their own research into the labour market, through library facilities, films, seminars, plant visits, summer and part-time jobs.

Location: 762 Sherbrooke St. W.
General Information: 283-4411

7.9 ADDITIONAL SERVICES

7.9.1 BOOKSTORE

The McGill University Bookstore, located in the Bronfman Building at 1001 Sherbrooke Street, West, provides a comprehensive stock of current textbooks, reference material and academic supplies as well as items of general interest. It is administered by a Senate committee representing the students, the faculty and the administration.

7.9.2 EXTRA-CURRICULAR ACTIVITIES

Complete details of all extra-curricular activities may be found in the *Student Handbook*, published yearly by the Students' Society.

The *Student Handbook* lists over 250 activities and clubs which students may join. These include international clubs, religious groups, political clubs, fraternities, communications (Radio McGill) and some 50 miscellaneous groups (such as science clubs, literary, theatrical and musical societies, chess and bridge clubs, and the Voyageurs' Society).

7.9.2.2 Student Orchestra, Choir, and Wind Ensemble

The Student Orchestra and Choir of the Faculty of Music as well as the McGill Wind Ensemble have some vacancies for amateur musicians. Advanced instrumentalists (strings, winds, harp, percussion), or experienced choir singers who would like to become regular members of the Orchestra, the Choir, or the Wind Ensemble, should contact the office of the Faculty of Music for further information (Telephone 392-4501).

8 FEES

The University reserves the right to make changes without notice in the published scale of fees.

Fees are not refundable, except under special conditions. See "Regulations Concerning Withdrawal" below.

8.1 UNIVERSITY FEES

Commencing with the 1974-75 academic session, the University will introduce a new system of tuition fee assessment based on a per credit charge where

applicable. The basic charge for tuition fees will be $19.00 per credit and this fee will include all the regular charges of the University for registration, tuition, laboratories and libraries. Student Services fees and Students' Societies fees will be separately assessed in a manner appropriate to those two functions and must be paid at the same time as the tuition fees.

8.1.1 FULL TIME STUDENTS PURSUING A McGILL DIPLOMA OF COLLEGIAL STUDIES

Quebec students pay a tuition fee of $12.50 per credit for the credits required to complete the McGill D.C.S. and $19.00 per credit for all other credits. Fees for Student Services and Students' Societies are assessed separately, and for full time students (24 credits or more) are the same as those specified for University level students (8.1.2). Non-Quebec students pay $19.00 per credit plus fees for Student Services and Students' Societies.

8.1.2 UNIVERSITY LEVEL STUDENTS (Degree Candidates)

Where credits are applicable, tuition fees of $19.00 per credit will be charged. For example, a student whose faculty uses the credit system and who is taking an academic load of 30 credits would pay $570.00 in tuition fees ($19.00 x 30) plus fees for Student Services and Students' Societies. Tuition fees will vary according to the number of credits taken but Student Services and Students' Societies fees will be as shown below for all students taking 24 or more credits.

Credit System Faculties and Schools

($19.00 per credit plus $60.00 Student Services)

	Students' Societies	
Agriculture[1] (including Food Science)	$44	
Arts — B.A.	28	
B.S.W.	30	
Education[2]	28	
Engineering	29	(35 for Architecture)
Law	28	(including $5 for Law Journal)
Management	33	
Music[3]	27	
Nursing — B.Sc. (N)	33	
B.N.[4]	32.50	
Physical and Occupational Therapy	26	
Religious Studies	25	
(candidates for ordination are exempted from tuition fees)		
Science	28	

Other Faculties and Schools

Dentistry: Tuition fees of $570.00 plus Student Services of $60.00, Students' Societies fees of $26.50 (including Dental Review) and rental of clinical equipment as follows:

1st year:	$ 75.00	2nd year:	$175.00
3rd year:	225.00	4th year:	225.00

Medicine: Tuition fees of $719.00 plus Student Services of $60.00 and Students' Societies fees of $25.00.

Graduate Studies:	*Tuition*	*Student Services*	*Students' Societies*
1st year Master's	$570.00	$60.00	$29.50[5]
2nd year Master's	127.50[6]	30.00	29.50[5]
Beyond 2nd year Master's	40.00[7]	30.00	29.50[5]
1st to 3rd year Doctorate	570.00	60.00	29.50
Beyond 3rd year Doctorate	40.00	30.00	29.50

The Graduate Studies Announcement should be consulted for further information.

[1]$16.50 per credit for 1974-75 and 1975-76, $19.00 per credit thereafter. Diploma students will pay $325.00 tuition fee.
[2]Students in one year Diploma or Certificate programs are not assessed on the credit system but will be charged tuition fees of $570.00. Home Economics Students in 1st and 2nd years at Macdonald College will pay the Faculty of Agriculture fee.
[3]No fee will be charged for credits in ensembles. Credits in individual practical instruction will be charged at a rate of $28.50 each. Students electing further courses in individual practical instruction above the requirements of the program will be charged an additional $380.00 per year or $190.00 per term.
[4]Fees not assessed per credit. Standard tuition fee of $570.00 will be charged.
[5]Students in M.S.W. program pay $31.50 Students' Societies fees.
[6]Except M.Sc. (Appl.), M.Eng. (Min.), M.L.S., and M.B.A. which will be $251.50 in 1974-75. In 1975-76, this fee will be $285.00 for all programs.
[7]Where more than 2 years of residence is required, this fee will not apply.

8.1.3 PART TIME, SPECIAL AND VISITING STUDENTS

Where the credit system is applicable, $19.00 per credit will be assessed. Otherwise the charge will be $114.00 per full course and $57.00 per half course.

In addition, the following fees will be assessed:

a) If taking between 18 and 23 credits:
   Student Services $60.00
   Students' Societies $28.00
   (average fee, actual varies by Faculty)

b) If taking more than 9 but less than 18 credits:
   Student Services $30.00*
   Students' Societies $10.00

c) If taking 9 credits or less:
   Student Services $15.00*
   Students' Societies $10.00

8.1.4 SPECIAL FEES AND PENALTIES

**Application for Admission	$15.00
Late registration	25.00
Late payment fee (after specified date):	
1st 30 days	10.00
After 30 days	25.00
***Graduation fee	10.00
Duplicate Student Identity Card	5.00
Duplicate diploma	10.00
Certified transcript of student's record:	
First two copies each	1.00
Additional copies made at the same time, each	.25
Re-reading examination paper	10.00

Supplemental examinations, each paper 10.00

Changes in course (Arts, Science, B.Com.), each change after specified change of course period 5.00

***Excludes Athletics: At the discretion of the Director of Athletics, a student may participate in the Athletics program upon payment of an additional $30.00.**

****Students already at McGill who are making application to a professional faculty or to the Faculty of Graduate Studies and Research are not required to pay this fee.**

*****Graduation Fee: Applications by students who expect to graduate at the Spring Convocation must be filed by March 1st of each year and by those who expect to graduate at the Fall Convocation by August 1st of each year. An application form will be mailed to each eligible student and must be returned to the Registrar's Office together with the graduation fee of $10.00 by the appropriate date listed above. This fee will cover all expenses in connection with graduation including academic dress. It is the student's responsibility to ensure that his or her name is included in the graduation list.**

8.2 REGULATIONS FOR PAYMENT OF FEES

1. Students entering the University for the first time and those returning in Graduate Studies are required to pay their fees either by mail or in person at the Accounting Office within 10 days after registration. For students registering in September the second instalment is due before January 15, 1975.
2. Returning students from the previous year (except in Graduate Studies) must pay one half of the total required fee by mail or in person to the Accounting Office before August 23, 1974, otherwise they will not be permitted to register. Instructions for paying fees in advance will be mailed to all returning students, either with their Sessional Reports of Standing or a short time later. Students who have been notified by the University of the award of a scholarship, bursary or student loan, and who require this award for payment of the first instalment of fees, must obtain permission to delay payment of fees from the Student Aid Office.

   The second instalment is due by January 15, 1975. A late payment fee as stated above is charged for payment after the specified dates.
3. Students registering late must pay their fees at the time of registration, failing which they become subject to the late payment fee and the provisions of the following paragraph:

As soon as possible after the prescribed dates for the payment of fees the Chief Accountant will send to the Dean of each Faculty a list of the registered students who have not paid their fees. The Deans will thereupon suspend them from attendance until such time as the fees are paid or a satisfactory arrangement is made with the Chief Accountant.

8.3 REGULATIONS CONCERNING WITHDRAWAL

A student who wishes to withdraw from the University or from certain courses, *whether or not he wishes to apply for remission of fees,* must secure the permis-

sion of the Dean or Associate Dean of his Faculty. The Office of the Associate Dean will supply the necessary form which must be completed and submitted. Students withdrawing from all their courses must attach their Student Identity Card to the withdrawal form. A student considering withdrawal is strongly advised to consult his Dean or Associate Dean before making a final decision. Fees for the term in which the student withdraws are not refundable, except under special conditions. A student wishing to apply for remission of fees must consult the Chief Accountant.

9 CALENDAR OF DATES 1974-75

1974

May 13, Mon., to June 21, Fri.	Pre-Summer Session.
May 20, Mon.	Victoria Day. Administrative Offices will be closed.
May 29, Wed.	Convocation in Health Sciences.
June 1, Sat.	Convocation in Faculty of Agriculture.
June 3, Mon.	Pre-Summer Session First Term Examinations.
June 5, Wed., to June 6, Thurs.	Convocations in all other faculties and schools.
June 24, Mon.	St. Jean Baptiste Day. Administrative Offices will be closed.
June 29, Sat., to Aug. 11, Sun.	French Summer School.
June 25, Tues.	Pre-Summer Session Second Term Examinations.
July 1, Mon.	Dominion Day. Administrative Offices will be closed. Lectures begin in Fourth year Medicine.
July 2, Tues.	Last day for submitting completed applications for admission to most departments in the Faculty of Graduate Studies and Research.
July 2, Tues., to Aug. 9, Fri.	Summer Session.
July 22, Mon.	Summer Session First Term Examinations.
Aug. 13, Tues., to Aug. 23, Fri.	Supplemental examinations in all programs in Arts, Science, Management, Engineering, Architecture, B.Sc. (Arch.), Physical Therapy, Occupational Therapy, Religious Studies, Nursing, and degree and diploma courses in Education.
Aug. 12, Mon.	Summer Session Second Term Examinations. Freshman Orientation Service and pre-registration counselling begins in Arts, Management, Science, Physical and Occupational Therapy, and Education.
Aug. 16, Fri.	Last day for submitting Doctoral Theses for Fall Convocation.
Aug. 20, Tues.	Supplemental examinations begin in Faculty of Agriculture, School of Food Science and Diploma in Agriculture.
Aug. 23, Fri.	Last day for submitting Master's theses for Fall Convocation.

Aug. 24, Sat., to Sep. 4, Wed.	Architecture Sketching School.
Sep. 2, Mon.	Labour Day. Administrative Offices will be closed.
Sep. 3, Tues. and Sep. 4, Wed.	Pre-registration counselling in Engineering, Architecture and B.Sc.(Arch.).
Sep. 3, Tues., to Sep. 12, Thurs.	Enrolment placement tests, auditions and interviews in Music. Practical examinations in Music (graduands only).
Sep. 3, Tues., to Sep. 13, Fri.	Registration period:
Sep. 3, Tues.	Registration in all years Medicine, Dentistry and Law. (10:00 a.m.-7:00 p.m.)
Sep. 4, Wed.	Registration in diploma programs in Education. (10:00 a.m.-4:00 p.m.)
Sep. 5, Thurs.	Registration in Engineering, Architecture and B.Sc. (Arch) (9:00 a.m.-12:00 noon, A-K, 1:00 p.m.-4:00 p.m., L-Z)
Sep. 6, Fri.	Registration in Arts (T-Z); all Management and all Religious Studies. (9:00 a.m.-5:00 p.m.)
Sep. 9, Mon.	Registration in Arts (L-S); all B.S.W., and all new B.Ed. students (9:00 a.m.-5:00 p.m.); and all students at Macdonald College (See Sep. 9 below)
Sep. 10, Tues.	Registration in Arts (D-K); and all returning B.Ed. U2 students (9:00 a.m.-5:00 p.m.)
Sep. 11, Wed.	Registration in Arts (A-C) and all returning B.Ed. U3 students (9:00 a.m.-12:00 noon) Registration in Science (S-Z), all Physical Therapy and B.Sc.(N) U1 (1:00 p.m.-5:00 p.m.)
Sep. 12, Thurs.	Registration in Science (H-R), B.Sc.(N) U2 and B.N.1 (9:00 a.m.-5:00 p.m.); and all Occupational Therapy (1:00 p.m.-5:00 p.m.)
Sep. 13, Fri.	Registration in Science (A-G), B.Sc.(N) U3 and B.N. 2 (9:00 a.m.-5:00 p.m.); and all Music (1:00 p.m.-5:00 p.m.)
Sep. 4, Wed.	Lectures begin in all years Dentistry and in all years Law. Orientation in First Year Medicine.
Sep. 5, Thurs.	Lectures begin in First, Second and Third years Medicine.
Sep. 5, Thurs., to Sep. 10, Tues.	Pre-registration counselling in degree programs in Education.
Sep. 6, Fri.	Enrolment of first year students in the Graduate School of Library Science and enrolment of M.S.W. and Advanced Social Work Practice Diploma students.
Sep. 6, Fri. to Sep. 20, Fri.	Registration in the Faculty of Graduate Studies and Research in individual departments.
Sep. 9, Mon.	Lectures begin in Engineering, Architecture, B.Sc. (Arch.), Management, diploma programs in Education, and First Year Graduate School of Library Science. Registration of all new students at Macdonald College (9:00 a.m.-12:00 noon). Afternoon orientation Program required of all new students. Registration of all returning students in all years at Macdonald College (1:30 p.m.-4:00 p.m.)

	Non-thesis forms to be returned to Thesis Office, Faculty of Graduate Studies and Research, for Fall Convocation.
Sep. 10, Tues.	Enrolment in School of Nursing for B.N. 1 students. Lectures begin for all years in Faculty of Agriculture, School of Food Science and Diploma in Agriculture and in M.S.W. and Advanced Social Work Diploma programs.
Sep. 11, Wed.	Lectures begin in Second Year Graduate School of Library Science.
Sep. 16, Mon.	Lectures begin in all programs in Arts, Science, Education (for diploma in Education, see above), B.S.W., Graduate Studies and Research, Nursing, Physical and Occupational Therapy, Religious Studies and Music.
Sep. 16, Mon. to Oct. 4, Fri.	Change of course period in Faculty of Music.
Sep. 20, Fri.	Last day for registration in the Faculty of Graduate Studies and Research.
Sep. 23, Mon.	Last day for submitting reports on Doctoral Theses.
Sep. 27, Fri., to Oct. 4, Fri.	Change of course period in Faculty of Management.
Sep. 27, Fri.	Last day for first term course changes in Faculty of Engineering.
Sep. 30, Mon.	Last day for submitting reports on all theses. Late registration in all faculties.
Sep. 30, Mon., to Oct. 4, Fri.	Change of course period for first term courses in Arts, Science, Education, B.S.W., Agriculture, School of Food Science and Diploma in Agriculture.
Oct. 11, Fri.	Last day for holding Doctoral orals for Fall Convocation.
Oct. 14, Mon.	Thanksgiving. Lectures cancelled. Administrative Offices will be closed.
Oct. 16, Wed., to Oct. 20, Sun.	Fall Fair and Open House at Macdonald College.
Nov. 1, Fri.	Last day for first term and full term course changes in most Departments in the Faculty of Graduate Studies and Research.
Nov. 6, Wed.	Fall Convocation.
Nov. 11, Mon.	Remembrance Day.
Nov. 18, Mon., to Nov. 22, Fri.	Practical examinations in Music.
Dec. 5, Thurs.	Last day of first term lectures in Faculty of Agriculture, School of Food Science and Diploma in Agriculture.
Dec. 6, Fri.	Last day of first term lectures in Engineering, Architecture and B.Sc.(Arch.).
Dec. 9, Mon., to Dec. 13, Fri.	Examinations in first term courses in Graduate School of Library Science.
Dec. 10, Tues.	Last day of first term lectures in Law and Management.
Dec. 10, Tues., to Dec. 19, Thurs.	First term examinations in Faculty of Agriculture, School of Food Science and Diploma in Agriculture programs.
Dec. 11, Wed., to Dec. 20, Fri.	Examinations in first term courses in Engineering, Architecure, B.Sc.(Arch.), and Management.

Dec. 12, Thurs., to Dec. 21, Sat.	Examinations in first term courses in Law.
Dec. 18, Wed.	Last day of first term lectures in diploma programs in Education.
Dec. 19, Thurs., and Dec. 20, Fri.	Examinations and mid-year evaluations in diploma programs in Education.
Dec. 20, Fri.	Last day of first term lectures in all other programs.
Dec. 25, Wed.	Christmas Day. Administrative Offices will be closed from 12:00 noon, Tuesday, Dec. 24, 1974, until 9:00 a.m., Thursday, Jan. 2, 1975.

1975

Jan. 1, Wed.	New Year's Day. Administrative Offices will be closed until Thursday, Jan. 2, at 9:00 a.m.
Jan. 3, Fri., to Jan. 17, Fri.	Examinations in first term courses in all programs in Arts, Science, Education (except diploma in Education), Nursing, Physical and Occupational Therapy, B.S.W., and Religious Studies.
Jan. 6, Mon.	Second term begins in Law, Music, Library Science, Dentistry, and diploma programs in Education. Lectures resume in Medicine. Second term registration for new students in Faculty of Agriculture and School of Food Science. Lectures and field practice resume for M.S.W. students. Field practice resumes for B.S.W. 2 and 3 Special students.
Jan. 8, Wed.	Second term begins in Faculty of Agriculture, School of Food Science and Diploma in Agriculture.
Jan. 13, Mon.	Second term begins in Management and Music.
Jan. 13, Mon., to Jan. 31, Fri.	Second term change of course period in Music.
Jan. 15, Wed.	Last day for change of status and January registration in the Faculty of Graduate Studies and Research. Second term begins in Engineering, Architecture and B.Sc.(Arch.).
Jan. 16, Thurs.	Second term registration for new students in Arts, Science, Education, Engineering, and Management.
Jan. 20, Mon.	Second term begins in all programs in Arts, Science, Education (for diploma programs in Education, see above), Religious Studies, Graduate Studies and Research, Nursing, B.S.W., and Physical and Occupational Therapy.
Jan. 27, Mon., to Jan. 31, Fri.	Change of course period for 'B' courses only in Faculties of Arts, Science and Education.
Jan. 31, Fri.	Last day for second term course changes in the Faculty of Graduate Studies and Research and the Faculty of Education.
Jan. 31, Fri., to Feb. 8, Fri.	Change of course period for 'B' courses in Management. Winter Carnival at Macdonald College.
Feb. 5, Wed.	Last day for second term course changes in Faculty of Engineering.

Feb. 7, Fri.	Last day for second term course changes in Faculty of Agriculture, School of Food Science and Diploma in Agriculture.
Feb. 10, Mon.	Macdonald College Founder's Day.
Feb. 17, Mon.	Heritage Day (subject to Government approval). No lectures. Administrative offices will be closed.
Feb. 21, Fri. and Feb. 22, Sat.	Mid-term weekend holiday. (Montreal Campus). Lectures cancelled.
Feb. 21, Fri., to Feb. 28, Fri.	Study week in Law.
Mar. 1, Sat., to Mar. 4, Tues.	Mid-term holiday at Macdonald College.
Mar. 3, Mon., to Mar. 7, Fri.	Practical examinations in Music.
Mar. 10, Mon., to Mar. 14, Fri.	Entrance auditions for Music applicants.
Mar. 21, Fri.	Last day for submitting Doctoral theses for Spring Convocation.
Mar. 28, Fri.	Last day for submitting Master's theses for Spring Convocation.
Mar. 28, Fri., to Mar. 31, Mon. (incl.)	Easter. Administrative Offices will be closed from 5:00 p.m. Thursday, Mar. 27, until 9:00 a.m., Tuesday, Apr. 1. No lectures.
Apr. 11, Fri.	Last day of lectures in Faculty of Management, and in Faculty of Agriculture, School of Food Science and Diploma in Agriculture.
Apr. 14, Mon., to Apr. 25, Fri.	Examinations in Faculty of Management.
Apr. 15, Tues.	Last day of lectures in Engineering, Architecture and B.Sc.(Arch.).
Apr. 16, Wed., to Apr. 25, Fri.	Second term examinations in Faculty of Agriculture, School of Food Science and Diploma in Agriculture programs.
Apr. 18, Fri.	Last day of lectures for all other students except those in Library Science and diploma programs in Education.
Apr. 21, Mon.	Lectures resume for B.S.W. Special students.
Apr. 21, Mon., to Apr. 25, Fri.	Examinations in Graduate School of Library Science.
Apr. 21, Mon., to May 7, Wed. (tentative ending date)	Examinations in all programs in Arts, Science, Education (except diploma in Education), Engineering, Architecture, B.Sc.(Arch.), Nursing, Physical and Occupational Therapy, B.S.W., Religious Studies and Music.
Apr. 23, Wed.	Examinations begin in Law.
Apr. 25, Fri.	Last day of lectures in diploma programs in Education.
Apr. 28, Mon.	Last day for submitting reports on all theses for Spring Convocation.
Apr. 28, Mon., to May 2, Fri.	Examinations in diploma programs in Education.

Apr. 28, Mon., to May 9, Fri.	Practical examinations in Music.
May 8, Thurs.	Non-thesis forms to be returned to Thesis Office, Faculty of Graduate Studies and Research, for Spring Convocation.
May 12, Mon.	Last day for Doctoral oral examinations for Spring Convocation.
May 15, Thurs. and May 16, Fri.; and May 20, Tues., to May 23, Fri.	Entrance auditions for Music applicants.
May 19, Mon.	Victoria Day. Administrative Offices will be closed.
May 23, Fri.	Last day of lectures in Third year Medicine.
May 26, Mon.	Senate Meeting for granting degrees and diplomas.
May 30, Fri.	Last day of lectures in First and Fourth years Medicine.
June 4, Wed., to June 7, Sat.	Convocations.
June 27, Fri.	Last day of lectures in Second year Medicine. Lectures and field practice end for B.S.W. Special students.

2 GENERAL INFORMATION

2.1 ENTRANCE SCHOLARSHIPS

In general, the University's system of entrance scholarships is designed to enable good students from all parts of Canada to attend McGill. The policy of the University is to recognize and honour scholarship, and the University Scholarships Committee selects scholarship winners from among those students who have obtained or who expect to obtain *a first class academic standing*.

Every student who has been selected for an Entrance Scholarship receives an honorary $100 award. Such a student in financial need may have this amount substantially augmented. Scholarships such as the J. W. McConnell Memorial and Morris W. Wilson Memorial Scholarships will be awarded to scholars who need full tuition, board and residence. J. W. McConnell Entrance Scholarships in Science and Engineering may provide for tuition, books, board and residence or a lesser amount depending upon need.

Entrance Scholarships are open to Canadian citizens, landed immigrants with one year's residence in Canada, and graduates of Canadian high schools, colleges and other educational institutions. Entrance Scholarships are awarded only to full-time students in a program of study leading to an undergraduate degree, and applicants must be entering the First year of such program.

Students should apply for an Entrance Scholarship by completing the Application for Entrance Scholarship. These forms may be obtained from the Admissions Office and must be submitted by March 1. Students who have completed this application will be considered automatically for every entrance scholarship for which they are eligible. As many as 250 entrance scholarships may be awarded in any one academic year.

2.2 AWARDS TO McGILL STUDENTS IN COURSE

Once a student is in course at McGill all undergraduate scholarships, prizes and medals are awarded on the year-end examination results, and *no applications are required*.

The University Scholarships Committee is responsible for awarding Entrance Scholarships, University Scholarships and Special-Named Awards. The Committee is also responsible for overseeing all scholarship policy of the University and is composed of Chairmen of Faculty Scholarship Committees, representatives from the University at large and student members.

Faculty scholarships and awards are made by Faculty Scholarship Committees. Scholarships are awarded only to full-time students taking a program of study leading to a degree. In the case of the Faculties of Arts and of Science, normally only those students who have completed at least 30 credits in the year preceding the award will be eligible for scholarships. Scholarships are awarded or renewed only if an adequate standing is attained.

Students whose University Scholarships have been renewed and who need financial assistance should apply directly to the Student Aid and Foreign Student Advisor Office.

All awards, with the exception of prizes, are credited to the tuition fee accounts of students for the following academic year.

Inquiries concerning undergraduate scholarships should be referred to the Scholarships Office in the Registrar's Office.

2.3 BURSARIES AND LOANS

Applications for McGill bursaries and loans should be directed to the Student Aid and

Foreign Student Advisor Office, McGill University, P.O. Box 6070, 3465 Peel Street, Montreal, Quebec H3A 1W7. These awards are made on the basis of financial need.

All applicants for aid are also expected to apply for maximum government grants or other assistance for which they may be eligible (see section 2.4). The Student Aid Office may be able to estimate the amount of such assistance and should be consulted.

2.4 PROVINCIAL BURSARIES AND LOANS

In all cases, a basic qualification is that the applicant must be a Canadian citizen or a landed immigrant with one year's residence and domicile in the province to which he applies.

When a student applies for financial assistance from government, Canadian or non-Canadian, and when certification of the student's status is required on such an application form such certification must be obtained from the McGill Student Aid Office.

In all provinces, except Quebec and Ontario, the provincial authority listed below administers the Canada Student Loan Plan (Federal) as well as their own programs. The addresses are as follows:

Quebec: Apply after May 1, at the Student Aid Office, McGill University, P.O. Box 6070, 3465 Peel Street, Montreal, Quebec H3A 1W7.

Ontario: Application forms for Ontario aid may be obtained after May 15 from the Student Aid Office, McGill University, P.O. Box 6070, 3465 Peel Street, Montreal, Quebec H3A 1W7.

New Brunswick: Department of Youth & Welfare, Fredericton, N.B.

Yukon Territory: The Students Financial Assistance Awards Committee, c/o Superintendent of Schools, Box 2703, Whitehorse, Yukon.

Northwest Territories: c/o Education Division, Department of Northern Affairs & Resources, 150 Kent Street, Ottawa, Ontario.

For the Provinces of Newfoundland, Prince Edward Island, Nova Scotia, Manitoba, Saskatchewan, Alberta, British Columbia: write to the Provincial Department of Education.

2.5 GENERAL REGULATIONS

(1) Scholarships are awarded and bursaries and loans are granted only to full-time students in a program of study leading to an undergraduate degree.

(2) Scholarships are awarded or renewed only if an adequate academic standing is attained.

Information concerning Postgraduate Awards, Fellowships and Bursaries is contained in a separate booklet, which may be obtained from the Fellowships Office, Faculty of Graduate Studies and Research, or the Registrar's Office.

3 ENTRANCE SCHOLARSHIPS AND BURSARIES

3.1 SCHOLARSHIPS

For Entrance Scholarships, see Section 2.1.

SIR EDWARD BEATTY MEMORIAL SCHOLARSHIPS. — Six scholarships in Mathematics or in Classics (Greek and Latin) of an annual value of $250. Renewable until completion of first degree

and open to students entering the Faculty of Arts or of Science. Founded by the late Sir Edward Beatty, former Chancellor of the University. Open only to students who are Canadian citizens or landed immigrants, and awarded primarily for ability in either Classics or Mathematics, but ability in other subjects may be taken into account. The winners on entering the University need not necessarily take courses leading to honours in Classics or in Mathematics, but may enter any course for which they are qualified in the Faculties.

CHRISTIE-STORER SCHOLARSHIP. — Value $500, endowed by the above-named Chapter of the I.O.D.E. in memory of the men of St. Lambert who fell in the Great War, 1914-18. Awarded to a former graduate student of Chambly County High School residing in St. Lambert who obtains the highest marks for admission to the University entering any full-time undergraduate degree course. Tenable for one year only.

CONSUMERS GLASS COMPANY LIMITED UNIVERSITY EDUCATION AWARDS PLAN. — Open to children or wards of employees and retired employees of Consumers Glass Company Limited for a full-time course of study in any Canadian university or college recognized by the Association of Universities and Colleges of Canada. Value $750 per year until completion of first degree. Awards are automatically renewed provided the students establish continuing eligibility and successfully complete the preceding academic year. Further information and application forms which must be submitted by June 30 may be obtained from the Director of Awards, Association of Universities and Colleges of Canada, 151 Slater St., Ottawa, Ont., K1P 5N1.

GEORGE HERRICK DUGGAN MEMORIAL SCHOLARSHIP (DOMINION BRIDGE COMPANY, LIMITED). — Offered by Dominion Bridge Company, Limited, open to all employees of the Company (who have been in continuous service of the Company for at least one year) and its wholly owned subsidiary companies, and to their sons and daughters. Certificates of eligibility for the scholarship must be obtained from the Personnel Department of the Company.

This scholarship will cover tuition fees. In the case of winners from outside Montreal who must meet their own living expenses the amount necessary to cover tuition fees could be augmented somewhat at the discretion of the University Scholarships Committee.

Intended to provide an incentive to eligible candidates to qualify for a university education and to afford them financial assistance while pursuing university studies. The scholarship is tenable in any undergraduate degree course at McGill University and is awarded on the intellectual attainment and academic record of the winner. It may be granted until completion of first undergraduate degree.

In exceptional cases qualified students already in course at McGill may be considered for this scholarship.

GEORGE HERRICK DUGGAN MEMORIAL SCHOLARSHIP (DOMINION ENGINEERING WORKS, LIMITED). — Offered by Dominion Engineering Works, Limited, open to all its employees and those of its wholly owned subsidiary companies, and to their sons and daughters. Certificates of eligibility for the scholarship must be obtained from the Personnel Department of the Company.

The value of this scholarship will not exceed $750 if the winner comes from outside Montreal, or if the Committee judges it is desirable for the winner to reside away from home in the interests of his academic work. If the winner can live at home, however, the value will be equivalent to full tuition fees, and the Awarding Committee may in this case make an additional grant where there is financial need.

Intended to provide an incentive to eligible candidates to qualify themselves for a university education in engineering or scientific work or allied subjects, and to afford them financial assistance while pursuing university studies, the scholarship is awarded on the intellectual attainment and academic record of the winner. It may be granted until completion of first undergraduate degree.

In exceptional cases qualified students in the Faculty of Science and the Faculty of Engineering may be considered for this scholarship.

GRACE FAIRLEY TRAFALGAR SCHOLARSHIP. — $200, founded in 1913 by friends and former pupils of the late Miss Grace Fairley, to signalize her long and faithful service to education as head of the Trafalgar Institute. Tenable for one year only and awarded annually to a former graduate pupil of Trafalgar School who obtains the highest marks for admission to the University entering any full-time undergraduate degree course.

NARCISSA FARRAND (MRS. N. PETTES) SCHOLARSHIP. — Founded and endowed by Mr. and Mrs. H. V. Truell, of Sweet Acre, Knowlton, Quebec. Value $600, and renewable until completion of first degree provided the holder maintains a standing satisfactory to the University Scholarships Committee. Awarded annually to the candidate from the Eastern Townships who obtains the highest marks for admission to the University entering any full-time degree course and who has had his domicile in the Eastern Townships for at least five years.

SCHOLARSHIP GRANTED BY THE GRADUATES' SOCIETY OF THE DISTRICT OF BEDFORD. — $450, awarded to a student who has taken his or her Grades IX, X, and XI in one of the High

Schools of the District of Bedford and who obtains the highest marks for admission to the University to take any full-time undergraduate degree course. May be divided between two students, and is awarded by the Society upon the recommendation of the University Scholarships Committee.

SIDNEY J. HODGSON SCHOLARSHIPS. — Two scholarships of $400 each, founded by Arthur J. Hodgson, Esq., in memory of his son, Sidney James Hodgson, a student of the First year in Arts, who was killed in action on September 27, 1918, while serving in the 66th Battery of the Canadian Field Artillery. Awarded to former graduate pupils of Westmount High School who obtain the highest marks for admission to the University entering any full-time undergraduate degree course.

I. M. LADDON SCHOLARSHIP. — Established by General Dynamics Corporation in tribute to I. M. Laddon, B.Sc. 1915, D.Sc. (Hon.) 1957. Open to U.S. residents entering the Faculty of Engineering. Value $3,500 plus transportation costs. A new award is made on the graduation of the former scholar. Awarded by the University Scholarships Committee in consultation with the Corporation. Application forms may be obtained from General Dynamics Corporation.

HARRY LEIBOVITCH SCHOLARSHIP. — Established by a bequest from the late Harry Leibovitch and awarded under the same conditions as the David Wolfson Scholarships described below.

SIR WILLIAM MACDONALD ENTRANCE SCHOLARSHIPS. — Value $800 each, tenable for one year only, endowed by Sir William Macdonald and open to all students. Three of these scholarships are open to students entering the Faculty of Arts or of Science and one is available for a student entering the Faculty of Management.

JAMES DAVIDSON McCALL SCHOLARSHIP. — Value $1,000. Founded by his family in memory of James Davidson McCall, B.Eng., who was accidentally killed in September 1953, the year of his graduation. Awarded to a student of Canadian citizenship entering the Faculty of Engineering, is renewable until graduation provided the holder maintains satisfactory academic standing. Awarded on academic merit and financial need.

DUNCAN McCASKILL SCHOLARSHIP. — Restricted to students from Nova Scotia. Value $600, renewable until the holder obtains his or her first degree provided the holder maintains an academic average satisfactory to the University Scholarships Committee.

J. W. McCONNELL MEMORIAL SCHOLARSHIPS. — Created and endowed by the late Mr. J. W. McConnell of the Board of Governors as a memorial to the men and women of the University who gave their lives in the war of 1939-45. Open on equal terms to men and women from any part of Canada and tenable in the Faculty of Arts, the Faculty of Science, the Faculty of Management, or the Faculty of Engineering. Each scholarship covers full tuition fees plus cost of board, residence and books and is renewable until completion of first degree. Awards are based on character, financial need and academic record of the applicant. The holder will normally forfeit the scholarship if he fails to maintain satisfactory academic standing.

J. W. McCONNELL SCHOLARSHIPS IN SCIENCE AND ENGINEERING. — Made possible through the generous donation of the late Mr. J. W. McConnell, awarded to students proceeding to degrees in any field of Science or Engineering and renewable each year provided academic standing satisfactory to the University Scholarships Committee is maintained. Candidates must be Canadian citizens or landed immigrants, and, on proof of need, may receive up to full tuition fees plus the cost of board, residence and books.

T. H. McGLADE SCHOLARSHIP. — $1,000 annually, established in 1967 by T. H. McGlade, B.A. 1947, for an entrance scholarship. Tenable for one year only by a student entering any faculty who is a graduate of either Smiths Falls Collegiate Institute or St. Francis High School in Smiths Falls, Ontario. If there is no qualified applicant from these two institutions, the scholarship shall be open to graduates of other secondary schools of the County of Lanark in Ontario or to candidates from the Upper St. Lawrence Valley, particularly from the Brockville and Prescott areas. Awarded by the University Scholarships Committee on the basis of academic merit, character and financial need.

JESSIE NORRIS MEMORIAL AWARD. — $250 awarded annually to a Quebec CEGEP student entering the First year of the University program in the Faculty of Arts or of Science who obtains excellent standing in English Composition and Literature before coming to McGill.

MONA PRENTICE AWARD. — Value $500, established by a bequest from the late Mona Prentice. Awarded to a student for high academic standing entering any faculty of the University. Tenable for one year only.

RALSTON AWARD. — Value $200, established by a bequest from the late Hazel Vivian Ralston in memory of Sgt. Pilot Herbert James Ralston and Lt. William Edward Ralston who were killed in the Second World War and who were both graduates of Westmount High School. Awarded annually to a former graduate student of Westmount High School who has good academic standing and is entering any full-time undergraduate degree course of McGill University.

SEBA ABBOTT SMITH MEMORIAL SCHOLARSHIP. — Value $600 renewable annually until completion of first degree provided the holder maintains an academic standing satisfactory to the University Scholarships Committee.

UNIVERSITY ENTRANCE SCHOLARSHIPS. — Awarded on the basis of academic record and open to men and women from any part of Canada. Tenable in any undergraduate degree course and renewable annually until graduation provided sufficiently high academic standing is maintained. University Entrance Scholarships carry a nominal recognition ($100) of their outstanding achievement. Where there is financial need, however, winners may receive further assistance.

MORRIS W. WILSON MEMORIAL SCHOLARSHIPS. — Established by contributions from a large number of intimate friends and business associates of the late Morris W. Wilson as a memorial to a distinguished citizen who, among many public activities, rendered distinguished service to the cause of education, and who, at the time of his death, was Chancellor of McGill University. The fund marks the culmination of a hope long cherished by Mr. Wilson, that young Canadian boys and girls of outstanding ability and promise, but in poor financial circumstances, might obtain a university education. It is hoped that this fund may assist many deserving young Canadians, particularly those from rural areas, to become better equipped to perform the duties of citizenship and so more effectively to aid in the general development and welfare of their country.

Open on equal terms to men and women of Canadian parentage, now resident in Canada, and open only to students who wish to enter the Faculty of Arts, the Faculty of Science, the Faculty of Management, the Faculty of Engineering, or the degree course in Agriculture at Macdonald College. Each scholarship covers the full tuition fee, as well as the cost of board and residence and is renewable until completion of first degree. The holder will normally forfeit the scholarship if he fails to maintain satisfactory academic standing.

DAVID WOLFSON SCHOLARSHIPS. — Two scholarships endowed by Mr. David Wolfson to enable outstanding men and women from all parts of Canada who would not otherwise be able to do so to attend the University. Awarded both to students entering undergraduate degree courses and to students entering any professional faculty of the University except Graduate Studies and Research. The undergraduate work of students entering such professional faculties as Medicine, Dentistry, Law, Religious Studies, etc., must have been completed at some other university. Renewable until completion of first degree, or for the period required for the degree in a professional faculty, provided academic standing satisfactory to the University Scholarships Committee is maintained. The amount awarded depends upon need but may extend to the full costs of tuition, residence and board.

Normally, David Wolfson Scholarships are awarded only to students who reside outside the Montreal area.

3.2 BURSARIES

BECHTEL FOUNDATION OF CANADA BURSARY.

CAL CALLAHAN MEMORIAL BURSARY. — The Pipe Line Contractors Association of Canada offers a bursary, or bursaries, to the total of $1,000 per annum, to be awarded annually, to sons, daughters or legal wards of persons who derive their principal income from the Pipe-line Industry and whose employers are members of the Association. Further information may be obtained from the Association's Executive Office, Suite 400, 698 Seymour Street, Vancouver, British Columbia V6B 3K7. Application deadline is September 30th.

CHILDREN OF WAR DEAD (EDUCATION ASSISTANCE) ACT.

ENGINEERS WIVES ASSOCIATION OF MONTREAL BURSARY. — Established in 1961 by a donation from the Professional Engineers Wives Association and awarded in alternate years to a needy and deserving student who is entering either First or Second year in the Faculty of Engineering.*

FEDERAL-PROVINCIAL LOANS AND BURSARIES.

KHAKI UNIVERSITY AND Y.M.C.A. MEMORIAL SCHOLARSHIP FUND.

ISABELLA C. MacRAE SCHOLARSHIP. — Open to residents of Ontario.*

GEORGE J. McMANUS MEMORIAL SCHOLARSHIPS.

EDGAR R. PARKINS MEMORIAL SCHOLARSHIPS AND BURSARIES. — For entering students or for students already in course. The entrance scholarships will be awarded by the University Scholarships Committee and the bursaries by the Student Aid Office without restriction as to faculty. Maximum scholarship value, according to need, up to tuition fees for Montreal residents, up to the amount of tuition fees plus room and board for non-residents.*

Apply to Student Aid Office.

QUEEN ESTHER CHAPTER No. 30 ORDER OF THE EASTERN STAR BURSARY. — $100, established in 1951 and awarded to a deserving student entering the University.*

ST. FRANCIS DISTRICT GRADUATES' SOCIETY BURSARY. — $400, restricted to residents of the area covered by the St. Francis District Branch of the Graduates' Society and open to pupils of any high school or private school entering any faculty or school of McGill University, including Macdonald College. May be renewed for a second year. $250 of the Bursary is to be repaid by the holder at a minimum of $50 per year after graduation. Awarded by the Society on the recommendation of the University Scholarships Committee.

STEEL COMPANY OF CANADA LIMITED BURSARY. — $500 for a maximum of four years to any one student. Open to permanent residents of Canada. Awarded to a capable student who might not otherwise go to University because of lack of funds. Should the student withdraw or perform below the standards set for him, the Bursary may be awarded to another student who has the same number of years to complete before graduation.*

UNIVERSITY BURSARIES.

EDGAR WILSON AND MARGARET WILSON SCHOLARSHIPS.

WOMEN ASSOCIATES OF McGILL BURSARY.

4 SCHOLARSHIPS, BURSARIES, PRIZES AND LOAN FUNDS IN THE VARIOUS FACULTIES AND SCHOOLS OF THE UNIVERSITY

4.1 OPEN TO STUDENTS IN ALL FACULTIES

4.1.1 SCHOLARSHIPS AND BURSARIES

AID TO THE PHYSICALLY HANDICAPPED (QUEBEC). — Students in any faculty who are Canadian citizens or landed immigrants and have been resident and domiciled in Quebec for two years may apply for an outright grant if they have suffered from poliomyelitis, tuberculosis, certain forms of cardiac trouble, or some other physical disability. Apply through the Student Counsellor, Student Aid Office, McGill University.

ALPHA OMICRON PI BURSARY.

ANONYMOUS DONATION FOR BURSARIES. — Established by an anonymous donor through the Graduates' Society in 1959. Awarded to students entering the University or to undergraduates already enrolled of at least Second Class standing whose records show demonstrated qualities of leadership and character.*

BANK OF NOVA SCOTIA BILINGUAL EXCHANGE SCHOLARSHIPS. — Six annual one-year undergraduate and graduate awards are available, three to French-speaking candidates and three to English-speaking candidates. Undergraduate awards are for $1,500 tenable in the second to last year of a first university degree program. Graduate awards are for $3,000 and graduate students will be expected to outline their proposed programs of study. English-speaking winners may attend any Canadian French-speaking university or college and French-speaking winners may attend any Canadian English-speaking university or college provided it is a member, or federated with, or affiliated to, a member of the Association of Universities and Colleges of Canada. Apply to Director of Awards, Association of Universities and Colleges of Canada, 151 Slater St. Ottawa, Ont., K1P 5N1. Completed applications must be sent to the above address to arrive not later than March 1.

MARY H. BEATTY SCHOLARSHIPS & BURSARIES. — For men and women in any faculty or year.*

GORDON BENNETT MEMORIAL BURSARIES. — Established in 1969 to provide bursaries for men and women to assist them in obtaining higher education in any faculty. Awarded by the Student Aid Office on the basis of academic merit and financial need.

BIRKS FAMILY FOUNDATION STUDENT AID FUND. — Established in 1963 to be used for bursaries to worthy students in any faculty or year.*

Apply to Student Aid Office.

B'NAI B'RITH HILLEL FOUNDATION BURSARY. — Established by the B'nai B'rith Hillel Foundation of McGill University, awarded to a deserving student in any faculty.*

B'NAI B'RITH MOUNT ROYAL LODGE No. 729 BURSARIES. — Three bursaries, open to men and women students in any faculty. Need and scholarship will determine the award.*

B'NAI B'RITH ST. LAURENT LODGE No. 2102 BURSARY. — Awarded from time to time to a deserving student in any faculty.*

MURRAY BROOKS MEMORIAL BURSARIES. — Established in 1962 by Mrs. John E. Gilbert in memory of her father to assist students in good standing, preferably students from India, Pakistan, or Ceylon.*

REVEREND G. O. BRUCE BURSARIES. — Established by the Reverend Guy Oliver Theodore Bruce in memory of his mother, Louisa Howard Bruce and of his brother, John C. Bruce. Awarded to one or two students who have financial need.*

KENNETH M. BURKE BURSARIES. — Established in 1946 by Dr. Hugh E. Burke in memory of his brother, the late Kenneth M. Burke. Open to men and women in any faculty, preference being given to sons and daughters of ministers of religion.*

MR. AND MRS. SAMUEL CAMPBELL BURSARY. — Established in 1972 by Mr. Barry Robert Campbell, B.A. 1971, in memory of his grandparents, Mr. & Mrs. Samuel Campbell. Awarded annually to a student, preferably studying in Honours English Literature or Political Science, on the basis of financial need.*

CANADIAN ARMY UNIVERSITY COURSE MEMORIAL BURSARY. — Established by the Canadian Army University Course Association of McGill University as a memorial to their comrades, Richard F. Gyles, Robert J. Lockhart, and James C. Wheeler, who lost their lives in World War II. Awarded by the Student Aid Office. Preference given to men who volunteered for active service, and their children.*

JOSEPH LAWRENCE CAPLAN MEMORIAL BURSARIES. — Awarded by the Principal on the recommendation of the Student Aid Office to First year students in any faculty who may be thereby helped to obtain a university education.*

CHILDREN OF WAR DEAD (EDUCATION ASSISTANCE) ACT — Under this Act fees up to $500 and monthly allowances are provided for children of Canadian veterans whose death was attributable to military service in World War I or II. Apply to the nearest District Office of the Department of Veterans Affairs or to the Student Counsellor, Student Aid Office, McGill University.

WILLIAM JOHN DEY BURSARIES. — Bequeathed in 1950 by the late Mary Helena Dey in memory of her father, the Reverend William John Dey, M.A., D.D., (B.A.), Class of 1867, McGill University. Open to full-time undergraduates, both men and women, in all faculties and schools.*

STUART DUNN MEMORIAL SCHOLARSHIP. — Founded by the late Major Charles Gwyllym Dunn of Quebec City in memory of his son, Sergeant (Wireless Air Gunner) Stuart Dunn, R.C.A.F., a student at McGill University who died on active service in July, 1941. Preference given to a male student of the Protestant Christian faith whose home is outside the Island of Montreal. Consideration is given to: (a) the candidate's scholarship, character, personality, and quality of leadership, (b) his need of financial assistance, and (c) the general usefulness to the community of the special branch of study he proposes to follow.*

HENRY H. EKES BURSARY. — Established in 1971 by Mr. Peter B. G. Easton in memory of his late father, Mr. Henry H. Ekes, to provide an annual bursary to an academically deserving student with financial need.*

FAERMAN GRANT. — Established in 1964-65, awarded annually to a deserving student in any faculty or year.*

FEDERAL-PROVINCIAL LOANS AND BURSARIES. — Most Provinces join with the Federal Government in offering bursaries, loans, or bursary-loans to degree students in many faculties and schools, open to men and women on equal terms. Students who have been resident and domiciled in the Province of Quebec for one year should apply to the Student Aid Office, McGill University, for Registration cards, but not before May 1. Completed application forms must be received at the Service des Prêts et Bourses aux Etudiants in Quebec by September 30. For further particulars apply to the Student Counsellor, Student Aid Office. Ontario bursaries and loans are tenable in all faculties except Religious Studies. Students coming from other provinces should inquire from the Provincial Departments of Education whether they are eligible to participate in any comparable scheme. See Section 2, for addresses.

BOB FINEBERG BURSARY. — Established in 1967 by the family and friends in memory of the late Bob Fineberg and Barbara Greenspoon to assist a needy and deserving student. Awarded annually by the Student Aid Office with the approval of the National Council of Jewish Women on the basis of financial need and academic standing.*

Apply to Student Aid Office.

SCHOLARSHIPS

FROTHINGHAM BURSARIES. — Bequeathed in 1951 by the late Mrs. Harriet F. Miller, to provide bursaries for outstanding women students in any faculty.*

AARON AND MARY GOODMAN BURSARIES. — Established in 1963 to assist deserving students in any faculty.*

DR. WILLEM GRAFF BURSARY. — Established by Dr. R. W. Brockway of Brandon College to commemorate Professor Willem Graff's long service to the University. Awarded by the Student Aid Office on the recommendation of the Department of German to a worthy and deserving undergraduate or graduate student on the basis of scholarship and financial need.

BARBARA GREENSPOON BURSARY. — Awarded annually by the Student Aid Office to any student with preference given to a student with a penchant for Mathematics.*

H. E. HERSCHORN BURSARY. — Established under the will of the late H. E. Herschorn, N.P., B.A. 1911, B.C.L. 1914, for a deserving student, man or woman, studying for the B.Sc., B.A., M.D., C.M., LL.B., or B.C.L. degree in the intermediate or any subsequent year of his or her course.*

HEWITT MEMORIAL BURSARY FUND. — A bequest from the late Frederick T. O'Reilly-Hewitt in memory of his parents, the late Frederick Daniel Hewitt and the late Maria Stenson Hewitt for bursaries. Open to students in the Faculty of Arts or to students in the Humanities and Social Sciences in the Faculty of Graduate Studies and Research. Awarded by the Student Aid Office on the basis of financial need and academic promise.*

M.A.U.T. — F. S. HOWES AWARD. — Established in 1964 by the McGill Association of University Teachers to mark the great contribution of Dr. F. S. Howes to the life of the University. Awarded by the Student Aid Office to assist a student of energy and promise who is in financial need to complete his studies. Preference is given to students in the Faculty of Graduate Studies and Research.*

HUDSON'S BAY COMPANY SCHOLARSHIP. — Open to outstanding students of Indian or Eskimo background to enable them to attend University. Further information may be obtained from the Student Counsellor, Student Aid Office.

CELIA AMDUR ISAACS MEMORIAL BURSARY. — Established in 1953 by the Montreal Section of the National Council of Jewish Women and Mr. I. Sydney Isaacs. Awarded by the Council upon the recommendation of the Student Aid Office.*

JOSEPH ALFRED JACOBSON MEMORIAL SCHOLARSHIP. — Established by the late Mr. Percy N. Jacobson and by Mrs. Jacobson in memory of their son, Flight-Sergeant Joseph Alfred Jacobson, of the Royal Canadian Air Force, who was killed in action on January 28, 1942. Open to men and women in any faculty on equal terms. Awarded on the basis of academic strength, interest in university sports, and financial need.*

KHAKI UNIVERSITY AND Y.M.C.A. MEMORIAL SCHOLARSHIP FUND. — The interest of this fund is awarded in scholarships subject to the following two conditions: (i) that the scholarships may be held only by undergraduates; (ii) that the preference is given to sons and daughters of soldiers: (a) who served in the war of 1914-18; (b) who served in the war of 1939-45.*

EMERY AND ERWIN KLINEMAN BURSARY. — Established by Mr. Myer Herschorn to provide bursaries for students in any faculty needing financial assistance to continue their studies.*

SARAH AND JOSEPH LAZARUS BURSARY. — Awarded to a student in financial need with satisfactory academic standing, preference being given to a student in the Program of Jewish Studies.*

FELIX LEOPOLD BURSARY. — Established in 1953 by Mr. Felix Leopold of Montreal and awarded to one or more needy students in any faculty, who must have a satisfactory academic record and be of good character.*

BELLA LIPKIN-COHEN MEMORIAL BURSARY. — Established in 1972 by Mr. Sydney Brown, and awarded annually to a needy student, preferably in the Faculty of Arts.*

NOURALLA LUTFY MEMORIAL BURSARIES. — Two bursaries, the bequest in 1958 of the late Mr. Nouralla Lutfy and a further donation from his son, Mr. John Lutfy. Awarded to deserving students in any faculty or school.*

CHARLES MARTIN BURSARY FUND. — Bequeathed in 1935 by the late Mrs. Lillie F. Martin in accordance with the wishes of her late husband, Alfred W. Martin, in memory of his father, Charles Martin. Awarded to students in any faculty on the basis of financial need.*

McGILL PHARMACY ALUMNI SOCIETY DR. WILLIAM H. HATCHER BURSARY. — Established in honour of Dr. William H. Hatcher. Open to deserving students. Preference given to initial or intermediate year B.A. or B.Sc. degree students who intend to study pharmacy after graduation and to students in the Department of Chemistry.*

**Apply to Student Aid Office.*

McGILL STUDENT ENTREPRENEURIAL AGENCIES INC. BURSARY. — Established in 1970 to provide a bursary of at least $100 annually to a student who has financial need.*

McGILL U.N.T.D. BURSARY. — With the unification of the three branches of the armed services, the U.N.T.D. has ceased to exist. The income from this Fund is now used to supplement university bursary funds.*

J. R. S. McLERNON BURSARY FUND. — Endowed by the late Mr. J. R. S. McLernon to assist students with financial need and good academic standing. Open to students in any faculty or year who are Canadian citizens. The minimum amount of each award is $100.*

GEORGE J. McMANUS MEMORIAL SCHOLARSHIPS. — Each has a minimum value of $100 and may be held by students who hold other scholarships and who have real financial need. Open to men or women in any year of any faculty who have high academic records and need financial help. The actual amount depends on the need of the student.*

NATHAN MENDELSSOHN BURSARIES. — A bequest of $10,000 from the estate of the late Nathan Mendelssohn, the annual income of which is to be used by the Student Aid Office for bursaries for students in need or financial assistance.*

DR. FREDERICK WILLIAM CHARLES MOHR SCHOLARSHIPS. — The income from a fund established under the will of the late Dr. F. W. C. Mohr is used for scholarships for needy students from communities within the Ottawa Valley District, the amount of each scholarship not exceeding $500 to any one student in any year.*

MONTREAL WOMEN'S CLUB ELIZA REID MEMORIAL BURSARY.

NATIONAL COUNCIL OF JEWISH WOMEN OF CANADA, MONTREAL SECTION, BURSARIES. — A limited number of bursaries valued normally at $100 each. Awarded by the Council after consultation with the Student Aid Office. Academic standing and financial need are considered in making the award. Although there is no legal obligation, the Council hopes that holders will, if possible, return the money at some future time so that other students may in their turn be helped through college.*

EDGAR R. PARKINS MEMORIAL SCHOLARSHIPS AND BURSARIES.

SAMUEL AND BESSIE PESNER BURSARY. — Established in 1967 to honour Mr. and Mrs. Pesner. Awarded annually by the Student Aid Office with the approval of the National Council of Jewish Women to a student in any faculty or year on the basis of financial need and academic standing.*

PROCTER & GAMBLE STUDENT BURSARY FUND. — The Procter & Gamble Company of Canada Limited has established a fund of $1,500 to assist needy students in any faculty or year who are of good academic standing. Recipients will normally be Canadian residents who expect to maintain permanent residence in Canada. The minimum award is $100 and may be held concurrently with other awards. The Company hopes that any student who benefits from the fund will later contribute to the general bursary funds of the University when financially able to do so.*

HELEN REYNOLDS BURSARY.

MURIEL V. ROSCOE BURSARY.

ST. ANDREW'S SOCIETY BURSARY. — Established by the St. Andrew's Society of Montreal, for a needy student, preferably of Scottish blood, proceeding to a degree.*

RAY AND BEN SCHECTER MEMORIAL BURSARY. — Established by Mr. Samuel H. Schecter in memory of his mother and father. While open to any needy student in any faculty preference shall be given to students from Africa or Asia.*

SERAINE GROUP IDA SEGAL MEMORIAL BURSARY. — Established in 1968 to assist needy men students in any faculty.*

SERAINE GROUP ESTHER WARD MEMORIAL BURSARY. — Established in 1956 to assist needy men students in any faculty.*

FREDERICK SOUTHAM KER BURSARY. — Established in 1941 by the late F. N. Southam in memory of his grandson, Frederick Southam Ker, who was killed in action on September 6, 1940. Open on equal terms to men and women of all faculties. Awarded to a student who gives promise of becoming a good citizen but is handicapped by lack of funds. Financial need, character, and academic record are all considered in making the award.*

TEMPLE EMANU-EL SISTERHOOD BURSARY. — Established in 1946 in memory of the men who lost their lives in the war of 1939-45. Open to men undergraduates in all faculties.*

UNIVERSITY BURSARIES. — Open to full-time degree course students in all faculties and schools. See general regulations in Section 2.

UNIVERSITY CHALLENGE BURSARY FUND. — Established in 1971 by $10,000 which was won by a McGill team comprised of Julius H. Grey, B.C.L. 3, William W. Kredentser, B.Sc. 3, Brian M. Shecter, B.A. 4, and Mrs. Faith E. Wallis, B.A. 4, who participated in the CTV Television Program

Apply to Student Aid Office.

"University Challenge". The annual income is to provide bursaries to academically deserving students with financial need.*

UNIVERSITY SCHOLARSHIPS. — After one year at McGill, University Scholarships may be awarded by the University Scholarships Committee to students in any year of any undergraduate faculty for exceptionally distinguished work in the University examinations. No application is required.

University Scholarships carry a nominal recognition ($100) of their outstanding achievement. Where there is financial need, however, winners should apply as soon as possible to the Student Aid Office for information and consideration.

Two University Scholarships have special names, the James Eccles Scholarship, tenable in any year of any faculty, and the Frederick Smith Memorial Scholarship, tenable only in the Faculty of Medicine.

All University Scholarships are renewable if, in the opinion of the University Scholarships Committee, the holders maintain a sufficiently high academic standing.

IBM — THOMAS J. WATSON MEMORIAL BURSARIES. — $1,000 annually, established by the International Business Machines Company Limited for financial assistance to needy undergraduates in any year of any faculty who are of good academic standing. May be held concurrently with other awards provided need exists.*

EDGAR WILSON AND MARGARET WILSON SCHOLARSHIPS. — Bequeathed in 1956 by the late Edgar Moles Wilson to provide the Edgar Wilson Scholarships for men and the Margaret Wilson Scholarships for women to assist them in obtaining higher education in any faculty. Awarded on the basis of academic merit and financial need. Awards will not exceed the annual tuition fees.*

ROY M. WOLVIN MEMORIAL BURSARIES.

WOMEN ASSOCIATES OF McGILL BURSARY. — Available each year to men and women students in any faculty. Scholarship and need determine the award. The winner is chosen by the Executive of the Women Associates of McGill from candidates recommended by the Student Aid Office and selected from the applicants for University bursaries.*

RICHARD WOOD MEMORIAL BURSARY. — An annual fund established in 1964 by the Laurentian Lanes Sportsman's Bowling League for deserving students in any faculty.*

4.1.2 PRIZES

DR. W. B. LEWIS PRIZE. — A prize of $300 is offered annually in a competition for an essay, written with a view to publication to produce an informative review of some topic of his choice involving more than a single scientific discipline and having relevance to a subject of potentially general concern, e.g. water pollution, growing amount of carbon dioxide in the atmosphere, etc. Open to undergraduates and graduate students of the University. Material should be carefully selected and properly presented. The judges will not read untidy manuscripts or newspaper clippings. Essays that have appeared in print are not ineligible if they have been published since October 15, 1973. No candidate may submit more than one entry, which must be typed and must reach the Secretary, University Scholarships Committee, Scholarships Office, before October 15, 1974. Winning entries will be retained by the University and filed in the McLennan Library. The competition is restricted to students who have not previously won this Prize. Awarded by the University Scholarships Committee.

CHESTER MACNAGHTEN PRIZES. — Two prizes, $125 and $50, offered annually in a competition for the best piece of creative writing in English submitted by an undergraduate student of the University, i.e., a story, a play, a poem, an essay, etc. Material should be carefully selected and properly presented. The judges will not read untidy manuscripts or a large number of newspaper clippings. Printed compositions are not ineligible if they have been published since March 1, 1974. No candidate may submit more than two entries, which must be typed and must reach the Secretary, University Scholarships Committee, Scholarships Office, before March 3, 1975. Winning entries will be retained and filed in the McLennan Library. The competition is restricted to students who have not previously won the First Prize. Awarded by the University Scholarships Committee.

McCHARLES PRIZE.

NEWCOMEN AWARD.

4.1.3 LOAN FUNDS

Open to Students in all Faculties

BURNSIDE STUDENT LOAN FUND. — A Student Loan Fund established to assist needy students in all Faculties.*

CANADA STUDENT LOAN PLAN. — Canadian students from provinces other than Quebec may

---

**Apply to Student Aid Office.*

apply for federal loans. Addresses for the nine provincial authorities administering this plan are listed in Section 2.

CANADIAN CLUB OF MONTREAL FIFTIETH ANNIVERSARY STUDENT AID FUND. — Established in November 1955 to commemorate the Club's Fiftieth Anniversary. The purpose is to foster patriotism by encouraging the study of the institutions, arts, literature, and resources of Canada, and the appreciation of matters of interest and concern to Canadians.*

BERTHA COHEN REVOLVING LOAN FUND. — Established to provide small, short-term loans to aid students in emergencies in any faculty. Administered by the Student Aid Office.

MR. AND MRS. HENRY COHEN REVOLVING LOAN FUND. — Established in 1967 to mark the thirtieth wedding anniversary of Mr. and Mrs. Henry Cohen by their son, Mr. Howard T. Cohen, B.Com. 1961, and their son-in-law, Mr. Philip Goldsmith. Unrestricted.*

AMY FREEDMAN MEMORIAL LOAN FUND. — Established in 1968 by the parents and friends of the late Amy Freedman for the purpose of making emergency loans to needy students (already in course at McGill) in any faculty. Special consideration will be given to students who come from and are returning to developing countries.*

HERSCHORN LOAN FUND. — Established by the late Mr. H. E. Herschorn for the purpose of making loans to students in any faculty who would otherwise be unable to continue their studies.*

BERTRAM KIDD AND MARJORIE SHARP MEMORIAL LOAN FUND. — Established in 1968 by parents and friends in memory of Bertram Kidd and Marjorie Sharp and is available to any McGill students.*

J. B. LYNCH LOAN AND BURSARY FUND. — Established by Mr. J. B. Lynch, President of Siscoe Mines Limited, for loans or in some cases outright grants to needy students.*

JOHN HAROLD MacLAREN STUDENT LOAN FUND. — Established in 1965 by a bequest from the late John Harold MacLaren.*

MARTLET FOUNDATION LOAN FUND. — Established in 1954 by the Martlet Foundation for students with good academic standing and athletic ability who are in need of financial assistance. Apply to the Director of Athletics, Physical Education and Recreation.

MRS. M. DOROTHEA MILLAR LOAN FUND. — Established in 1956 to assist one or more students of either sex, graduate or undergraduate, to pursue studies or research at McGill.*

J. K. PRATT MEMORIAL LOAN FUND. — Established in 1952 in memory of the late Janetta K. Pratt who was Cashier at McGill from 1929 until her death in 1952.*

ROTARY CLUB OF OTTAWA STUDENT LOAN FUND. — For intermediate and final year students in any faculty, residents of Carleton County, Ontario, and attending universities throughout Canada. Annual loans will not exceed $250.*

ROYAL CANADIAN AIR FORCE BENEVOLENT FUND. — Students who served in the R.C.A.F. are eligible for assistance from this Fund which makes loans or outright gifts, depending on the special circumstances involved.*

HAROLD N. SEGALL LOAN FUND. — A donation in 1957 from the Jerry Segalls to assist deserving students in any faculty.*

STUDENTS' SOCIETY LOAN FUND. — Open to students in all faculties with good academic standing. Primary consideration given to the candidates' contributions to Students' Society activities.*

GEORGE E. TILLSON LOAN FUND. — Established in 1955 by Mr. George E. Tillson. Unrestricted.*

UNIVERSITY LOAN FUND. — A Student Loan Fund established to assist needy students in all Faculties. Loans are made normally only to students in upper years with good academic standing.*

GWYN WILLIAMS MEMORIAL LOAN FUND. — Established by friends and members of staff of McGill University in memory of Gwyn Williams in recognition of her many years of loyal and efficient service in the Administration Offices of McGill University.*

McGill University no longer accepts endowments for awards which are restrictive in certain respects. However, there are some such funds endowed in the past which are still available.

Students who complete in detail the application form for financial aid, obtainable from the Student Aid Office, will be considered automatically. The funds which are restrictive are the following:

GREEK STUDENTS BURSARY AND LOAN FUND. — Established in 1952 by a group of Greek merchants to assist Greek students attending McGill.

SIMON AND ROSALIE HALPERN MEMORIAL SCHOLARSHIP. — Value $400, and established by the late Dr. Fanny G. Halpern in memory of her parents. Open to students of Roman Catholic

or Jewish faith, on the basis of distinguished academic standing and financial need. The holder in any one session may re-apply for the following year.*

ANNETTE S. HILL MEMORIAL BURSARIES. — Established in 1962 to assist young men of the Protestant faith and of good character from the Maritime Provinces or the Province of Ontario to obtain a college education.

HUNGARIAN CANADIAN ENGINEERS' ASSOCIATION BURSARY. — Students of Hungarian origin, who have had at least one year of successful study at a recognized university in Canada, may apply to the Hungarian Canadian Engineers' Association for financial aid.

McGILL HELLENIC CLUB BURSARIES. — One or more bursaries of $300 each for students of Greek descent (up to and including the third generation) in any faculty or year. Open to full-time students who have obtained second class standing and have financial need, and renewable upon application.

ANGUS McCOY SMITH SCHOLARSHIP. — $150, founded by the late Mr. Allan L. Smith and Mrs. Smith in memory of their son, Angus McCoy Smith, a McGill graduate, who was killed in World War II. Awarded to a Protestant male student of the Faculty of Arts or Science entering the Fourth year. Academic record, character, financial need, and general promise are considered.

CHARLES WILLIAM SNYDER MEMORIAL SCHOLARSHIPS. — Two scholarships of $200 each, founded by the late L. P. Snyder, Esq., in memory of his son, Charles William Snyder, a student of First year Arts who was killed in the Battle of Sanctuary Wood on June 2, 1916, awarded on the results of the sessional examinations. One is awarded on the recommendation of the Department of English to a student entering the Fourth year and taking full Honours in English and the other is awarded on the recommendation of the Departments concerned in the student's combined Honours program to a student entering the Fourth year and taking Honours in English and another subject. Open to Christian male students in the Faculty of Arts or Science.

SYRIAN CANADIAN ASSOCIATION BURSARIES. — A bursary fund available to any student of Syrian-Lebanese descent residing in (a) the Greater Montreal area; (b) the Province of Quebec; (c) Canada; with preference given to students in the above order. No restriction as to choice of faculty or year but preference is given to students entering the University. Awarded on the basis of good academic standing and financial need. The maximum amount granted to any one student is the equivalent of the student's tuition fees and the amount granted varies with the financial need of the student.

UNIVERSITY LODGE LOAN FUND. — A loan fund for Masons and the children of Masons attending McGill established by University Lodge No. 84 Q.R., A.F. and A.M. Loans will not exceed annual tuition fees. Open to qualified students in all faculties and years and awarded on need and academic merit.

4.2 OPEN TO STUDENTS IN THE FACULTY OF ARTS

For Entrance Scholarships, see Section 3. For scholarships and bursaries, open to undergraduates in all Faculties, see Section 4.1.

4.2.1 GENERAL REGULATIONS IN ARTS

1. No applications are required. The awards are made by the Arts Scholarships Committee on the basis of examination standings.

2. Unless restricted by the deed of gift or faculty regulations the awards are open to all students studying for the B.A. degree.

3. Normally only those students who have completed at least 30 credits in the year preceding the award will be eligible for scholarships.

4. Scholarships will be awarded only if an adequate standard is attained.

5. If in any university year there is not a sufficient number of candidates showing adequate merit, any one or more of the scholarships offered for competition may be given to more deserving candidates in another year.

6. In order to retain a scholarship a successful candidate must proceed regularly with a university course to the satisfaction of the Faculty.

Apply to Student Aid Office.

4.2.2 SCHOLARSHIPS

CHARLES ALEXANDER SCHOLARSHIP. — Value $245, established in 1870 "for the encouragement of the study of Classics and other subjects."

MARGARET JANE ALLAN SCHOLARSHIP. — Bequeathed in 1929 to the Royal Victoria College by Mrs. Agnes W. Allan. Value $450, awarded annually to the woman student with the highest standing in the sessional examinations of the initial year of the B.A. course.

DR. BARCLAY SCHOLARSHIP. — Awarded in the Classics Department, value $140.

EDMUND HENRY BOTTERELL AWARDS. — See Section 4.16.1.

ROBERT BRUCE SCHOLARSHIP. — $100, tenable for two years, bequeathed by the late Robert Bruce, of Quebec City. Open to students in the Faculty of Arts, the Faculty of Science or the Faculty of Management and awarded for high standing in the examinations at the end of the initial year. Awarded by the University Scholarships Committee upon recommendations of the faculties concerned.

MARION McCALL DALY AWARD. — See Section 4.16.1.

DOW-HICKSON SCHOLARSHIPS. — Annual value, not less than $1,000 each. Established in 1957 by a bequest from the late Dr. J. William A. Hickson and awarded to students entering the penultimate or the final year of the Honours courses in English Literature, Philosophy or Psychology. Awarded by a joint committee of the scholarships committees of the Faculties of Arts and of Science upon the recommendations of the departments concerned.

GENERAL MOTORS SCHOLARSHIPS. — Established by General Motors Corporation of Canada and open to outstanding young Canadian men or women. Two scholarships are awarded annually in the form of two-year awards of $1,000 each per year by the University Scholarships Committee upon the recommendations of the departments concerned. Open to students who in the fall will enter the penultimate undergraduate year of a program of studies leading to a degree in Mechanical Engineering, Commerce or Economics. Should a holder withdraw or fail to maintain a satisfactory standing the scholarship may be awarded to another qualified candidate of the same class.

MAURICE GOLDENBERG MEMORIAL SCHOLARSHIP. — Value $225, in Government, Constitutional Law, or Public Administration, established by Senator H. Carl Goldenberg, Q.C. in memory of his father, the late Maurice Goldenberg. Awarded annually by the University Scholarships Committee to the best candidate amongst those nominated by the Faculty of Arts and the Faculty of Law.

GREENBLATT SCHOLARSHIP. — $500 from a bequest of the late Mrs. Greenblatt, for a student proceeding from the intermediate year(s) to the final year, preference given to a student in Modern Languages (other than English) or in History. Awarded on recommendation by a committee selected from the Departments of History and of the Modern Languages.

ITALIAN GOVERNMENT SCHOLARSHIPS. — Awarded to students in the Department of Italian for summer study in Italy. Open only to Canadian citizens. Apply to the Department of Italian.

KNIGHTS OF PYTHIAS SCHOLARSHIP. — $300, awarded annually to a male or female student in the Social Sciences who must be a resident of the Island of Montreal, and entering the intermediate year of the B.A. course. May be renewed for a further year if the holder proves worthy.

HANNAH WILLARD LYMAN MEMORIAL SCHOLARSHIP. — $240, awarded annually to a woman student of the intermediate or final year of the B.A. course.

SIR WILLIAM MACDONALD SCHOLARSHIPS. — Two scholarships of $500 each, open to all students in the intermediate and final years.

ALEXANDER MACKENZIE SCHOLARSHIPS. — Two scholarships of $250 each, awarded on the results of the Honours examinations in Political Science. One award will be held by a student entering the final year and one for a student entering the intermediate year. Students must take the Honours work in Political Science.

JAMES DARLING McCALL SCHOLARSHIP. — $750 founded by the late J. T. McCall, Esq., in memory of his son, James D. McCall, B.Sc., who was drowned shortly after the war of 1914-18, in which he served with distinction. Awarded to a male student in the final year who is taking Honours in English and/or Philosophy.

McGILL ALUMNAE GEORGINA HUNTER SCHOLARSHIP. — Established in memory of the late Georgina Hunter, a member of the first graduating class of women at McGill University, the first President of the Alumnae Society, and a former Principal of the High School for Girls, Montreal. Awarded annually to a distinguished woman student, the scholarship has a maximum value usually not exceeding $500 and a minimum value of $100. The honorary $100 is awarded automatically and if further supplementary scholarship assistance is required, the winner of the Scholarship is asked to consult the Student Aid Office.

McGILL ALUMNAE ETHEL HURLBATT SCHOLARSHIP. — Established in memory of the late Miss

Ethel Hurlbatt, a former Warden of the Royal Victoria College. Awarded annually to a distinguished woman student, the Scholarship has a maximum value usually not exceeding $500 and a minimum value of $100. The honorary $100 is awarded automatically and if further supplementary scholarship assistance is required, the winner of the Scholarship is asked to consult the Student Aid Office.

McGILL ALUMNAE CATHERINE I. MACKENZIE SCHOLARSHIP. — Established in memory of the late Miss Catherine I. Mackenzie, B.A. 1904, former Principal of the High School for Girls, Montreal. Awarded annually to a distinguished woman student, the Scholarship has a maximum value usually not exceeding $500 and a minimum value of $100. The honorary $100 is awarded automatically and if further supplementary scholarship assistance is required, the winner of the Scholarship is asked to consult the Student Aid Office.

McGILL ALUMNAE ISABELLA McLENNAN SCHOLARSHIP. — Established in memory of the late Miss Isabella McLennan. Awarded annually to a distinguished woman student, the Scholarship has a maximum value usually not exceeding $500 and a minimum value of $100. The honorary $100 is awarded automatically and if further supplementary scholarship assistance is required, the winner of the Scholarship is asked to consult the Student Aid Office.

McGILL ALUMNAE SUSAN CAMERON VAUGHAN SCHOLARSHIP. — Established in honour of the late Mrs. Walter Vaughan, a former Warden of the Royal Victoria College. Awarded annually to a distinguished woman student, the Scholarship has a maximum value usually not exceeding $500 and a minimum value of $100. The honorary $100 is awarded automatically and if further supplementary scholarship assistance is required, the winner of the Scholarship is asked to consult the Student Aid Office.

MOYSE TRAVELLING SCHOLARSHIPS. — Founded by the late Right Honourable Lord Atholstan, to commemorate the "splendid services of Dr. Charles E. Moyse, for forty-two years Professor of English, during sixteen of which he was Dean of the Faculty of Arts and Vice-Principal of the University." Two scholarships, normally of $2,000 each tenable for one year. One scholarship to be awarded by the Faculty of Arts for distinction in literary subjects and the other by the Faculty of Science for distinction in scientific subjects.

In the absence of applicants of sufficient merit in either of the faculties, applicants from final year students in, or graduates of, other faculties of the University may be considered.

If there is no winner in one of these faculties, both scholarships may be awarded to applicants in the other faculty. Holders must devote the year of tenure to advanced study, preferably in a British or European university, but not to the exclusion of other institutions approved by the Faculty of Arts or of Science. Applications, whether from graduates or from students in the final year of the undergraduate course, should reach the Dean of the Faculty of Arts or of Science not later than April 1. Applications should be accompanied by: (1) an official transcript of the applicant's academic record to date; (2) the names of two referees who are familiar with the applicant's work; (3) a detailed and comprehensive statement of the applicant's proposed course of study; the institution or centre at which he, or she, proposes to study; (4) a statement of the applicant's age and nationality.

Awards will be made after the results of final examinations in the final year of the undergraduate course have been determined.

ALLEN OLIVER FELLOWSHIP IN ECONOMICS. — Present value about $1,000. Established by Mrs. Frank Oliver, of Edmonton, Alta., in "proud and loving memory of her son, the late Allen Oliver, M.C., B.A., Lieutenant, 26th Battery, C.F.A., who was killed in action at the Somme on November 18, 1916." Lieutenant Oliver was an honour graduate in 1915 in the Department of Economics and Political Science. Awarded to the student who stands highest in first class honours in the Departments of Economics and Political Science at the final B.A. examination, and the holder is required to pursue his studies in Economics and Political Science at McGill or elsewhere. No application is required.

PETERSON MEMORIAL SCHOLARSHIPS IN CLASSICS. — Two scholarships of $550 each, founded in memory of Sir William Peterson, Principal of McGill 1895-1918, by his son, W. G. Peterson, M.A. Open to students in any year.

PRINCE OF WALES SCHOLARSHIP. — $150, open to students proceeding from the intermediate year(s) into the final year. Awarded for general distinction by the Faculty of Arts on the student's complete academic record and on recommendations from departments in which they have taken their courses.

JANE REDPATH EXHIBITION. — Value $170, founded by the late Mrs. Redpath, to maintain an exhibition in Arts or Science. Awarded on the results of the sessional examination of the initial year to the student with the highest average on the year's work. Awarded by a joint committee of the scholarships committees of the Faculties of Arts and of Science upon the recommendations of each faculty.

REFORD SCHOLARSHIP. — The interest on this fund, about $400 per annum, is equally divided and placed at the disposal of the Departments of English and Philosophy.

BARBARA SCOTT SCHOLARSHIP. — Value $275, bequeathed by the late Barbara Scott for the student "excelling in Classics in the initial year."

SHAKESPEARE SCHOLARSHIP. — $100, for a student advancing to the final year with special distinction in English Honours courses. Awarded by the Faculty of Arts on the recommendation of the Department of English.

UNIVERSITY SCHOLARSHIPS. See Section 4.1.1.

ROY M. WOLVIN MEMORIAL SCHOLARSHIPS AND BURSARIES. — Two scholarships of $375 each and a number of bursaries are given by Mrs. Roy M. Wolvin in memory of her husband. One scholarship is restricted to men undergraduates in the Faculty of Engineering, which is awarded by the Faculty Scholarships Committee. The other scholarship is restricted to women undergraduates in the Faculty of Arts, the Faculty of Science, or the Faculty of Management, and is awarded by the University Scholarships Committee upon recommendations of the faculties concerned. The bursaries are open to students in any undergraduate faculty who have a good academic record and need financial assistance. Apply for bursaries to the Student Aid Office.

4.2.3 BURSARIES

ROBERT BRUCE BURSARIES. — Several bursaries of $100 each are open each year to "young men and women of promising abilities but of straitened circumstances in Arts, Science, or Engineering."*

MR. AND MRS. SAMUEL CAMPBELL BURSARY. — See Section 4.1.1.

DELTA PHI EPSILON SORORITY BURSARY. — Value $100, founded in memory of Edith Silver. Open to a deserving woman student entering the penultimate year of the Faculty of Arts or of Science.*

ROSE AND HARRY ENGELS BURSARY. — $100 to be awarded annually by the Student Aid Office to any undergraduate B.A. student in the Faculty of Arts.*

HEWITT MEMORIAL BURSARY FUND. — See Section 4.1.1.

HOUSTON BURSARY. — See Section 4.13.

HON. ROBERT JONES BURSARY. — One or more bursaries not exceeding $250 each in any one year are granted to needy students in the Faculty of Arts, Science or Engineering.*

BELLA LIPKIN-COHEN MEMORIAL BURSARY. — See Section 4.1.1.

4.2.4 PRIZES

AUSTRIAN GOVERNMENT PRIZE. — A book prize for a student who has excelled in German.

HARRY BARKER MEMORIAL PRIZE IN ENGLISH. — Value $150, bequeathed by the late Miss Dinah Lee in memory of the late Mr. Harry Barker, awarded to the student with the highest standing in English in an initial year. Awarded on the recommendation of the Department of English, to whichever Faculty Scholarships Committee is appropriate.

NORMAN BERMAN MEMORIAL PRIZE. — Established in 1973 by Mr. & Mrs. Joseph Berman. An annual prize or prizes will be awarded to students for: 1) Excellence in the field of Judaic Studies. 2) A critical study in the field of Hebrew or Yiddish language and literature or a translation of an important work of Hebrew or Yiddish literature into English or French. Awarded by the Scholarships Committee of the Faculty of Arts upon the recommendation of the Chairman of the Jewish Studies Program.

BETH ZION SISTERHOOD PRIZE. — $100, awarded to the final-year Undergraduate who achieves the highest standing in the Honours Comprehensive Examinations. Awarded by the Scholarships Committee of the Faculty of Arts on the recommendation of the Department of Art History.

HENRY CHAPMAN PRIZE. — A prize of the value of $65 is given in Modern Languages (excluding English), or in Hebrew.

CHERRY PRIZES. — Two prizes of $100 each, founded by Wilbur H. Cherry, Arts 1907, and Anna Cherry, Arts 1918, in memory of their father, William Cherry, Med. 1869, and of their brother, William McFie Cherry, Arts 1911, awarded on the recommendation of the Departments of Economics or of Political Science to deserving students.

CORPORATION OF PSYCHOLOGISTS OF THE PROVINCE OF QUEBEC PRIZE. — A prize of $10 offered annually by the Corporation to a student in the final year who has done the most distinguished work in Psychology throughout the course. Awarded on the recommendation of the Department of Psychology, to whichever Faculty Scholarships Committee is appropriate.

OSCAR EKES MEMORIAL PRIZE. — Value $100, established in 1972 by Mr. Peter B. G. Easton, B.A. 1971, in memory of his uncle, Mr. Oscar Ekes. Awarded by the Scholarships Committee of the Faculty of Arts on the recommendation of the Department of Economics to an outstanding economics student.

**Apply to Student Aid Office.*

ISIDORE FINKELSTEIN PRIZE. — Value $100, established in 1973 for a five-year period by Mrs. I. Finkelstein in memory of her late husband, Isidore Finkelstein. Awarded annually by the Scholarships Committee of the Faculty of Arts on the recommendation of the Department of History to the full honours history student graduating with the highest mark.

DORA FORSYTH PRIZE. — $125, bequeathed by the late Miss Jeanie Forsyth for English Literature. Open to women students only and awarded to a candidate recommended by the Department of English and approved by the Faculty of Arts.

THE FRENCH GOVERNMENT'S BOOK PRIZES. — Three book prizes to be awarded to three students of the Department of French Language and Literature in their graduating year for excellence in the study of French Language and Literature.

GERMAN EMBASSY PRIZE. — A book prize for excellence in German.

HISTORICAL SOCIETY'S PRIZE. — A prize of $50, awarded jointly by the Executive of the Historical Society and the Chairman of the Department of History to the undergraduate in the initial year showing the greatest promise in History and intending to read for Honours in this subject.

MADELENE HODGSON PRIZE IN HISTORY. — Value $40, endowed by the I.O.D.E. in recognition of the work done by the late Mrs. W. C. Hodgson as President of the Provincial Chapter of Quebec. Awarded to the intermediate year Honours student in History by the Department of History for the most outstanding work in this subject.

DR. W.B. LEWIS PRIZE. — See Section 4.1.2.

CHESTER MACNAGHTEN PRIZES. — See Section 4.1.2.

McGILL HELLENIC CLUB PRIZE IN MODERN GREEK. — An annual prize of $150 to the student obtaining the highest overall first class standing in the first years of study of Modern Greek.

NEWCOMEN AWARD. — The Newcomen Society in North America offers a prize of $200 known as the Newcomen Award for a student at McGill who writes an outstanding paper on some facet of Industrial History. Entries must be submitted to the Chairman of the Department of Economics on or before April 1.

BORIS MUSKATOV PRIZE IN PSYCHOLOGY. — An annual prize of $85 has been endowed by Miss Serafina Muskatov in memory of her brother, Boris Muskatov, who died on January 9, 1948, while a student. This prize is offered to a student who has completed the penultimate year in the Faculty of Arts or of Science and has done the best work in the subject of Psychology. Awarded on the recommendation of the Department of Psychology, to whichever faculty scholarships committee is appropriate.

PETERSON MEMORIAL PRIZE IN ENGLISH LITERATURE. — Value $50, founded by W. G. Peterson, M.A. in memory of his father, Sir William Peterson, Principal of McGill, 1895-1918, awarded to the undergraduate, or graduate student with distinction in English Literature who has also shown creative literary ability.

NORMAN A. PRENTICE MEMORIAL PRIZE. — Value $300, established by Mrs. Norman A. Prentice in memory of her late husband, Norman A. Prentice, Arts '10. Awarded to a student of high standing proceeding from the intermediate to final year in the General or Major B.A. program. Preference is given to students who have included French and/or History among their subjects.

PRIZE OF THE AMBASSADOR OF SWITZERLAND IN CANADA FOR FRENCH. — A book prize for excellence in the final year in French Language and Literature.

PRIZE OF THE AMBASSADOR OF SWITZERLAND IN CANADA FOR GERMAN. — A book prize for excellence in German for the final year, awarded by the Faculty of Arts on the recommendation of the Department of German to an undergraduate whose mother tongue is not German.

PRIZE OF THE AMBASSADOR OF SWITZERLAND IN CANADA FOR ITALIAN. A book prize for excellence in the final year in Italian.

PRIZE OF THE AMBASSADOR OF YUGOSLAVIA IN CANADA. — A book prize for the best student in the language, literature or civilization of one of the peoples of Yugoslavia (principally Serbo-Croatian). Open to undergraduate or graduate students and awarded on the recommendation of the Department of Russian and Slavic Studies.

PRIZE IN ANCIENT GREEK. — One or more prizes with a minimum value of $100 each may be awarded annually for proficiency in Ancient Greek to students entering any year of the Faculty of Arts.

PRIZE IN LATIN. — One or more prizes with a minimum value of $50 each may be awarded annually for proficiency in Latin to a student or students in any year of the Faculty of Arts. Awarded by the Faculty of Arts on the recommendation of the Chairman of the Department of Classics.

JAMES D. ROSS PRIZE. — An annual prize of $25, established by the former colleagues and friends of the late Professor James D. Ross. To be awarded by the Department of Philosophy to the outstanding student in the penultimate year of the Honours Philosophy Program.

LIONEL SHAPIRO AWARD IN ENGLISH. — $1,000 is awarded by the Scholarships Committee of the Faculty of Arts on the recommendation of the Department of English to one or more students in the B.A. course who are completing their final year and have demonstrated outstanding literary talent. The total awarded will not exceed $1,000.

CORINNE FAY TABAC MEMORIAL PRIZE IN ENGLISH LITERATURE. — An annual prize of $50 donated by Mr. Steven T. Tabac in memory of his wife Corinne Fay Tabac, a former student at Macdonald College. Awarded to the winner of the Shakespeare Gold Medal.

WOMEN'S PERSONNEL GROUP OF MONTREAL PRIZE. — A prize of $50 made available in alternate years to McGill and to the University of Montreal. At McGill the selection is made by the Director of the Industrial Relations Centre in consultation with the appropriate departments in the Social Sciences and awarded to the woman student in any year of the Faculty of Arts or the Faculty of Management who shows the most promise and intends to continue, either at the University or in industry, in the general field of Personnel and/or human relations. The award will be available at McGill in 1968 and thereafter biennially.

WOODHEAD MEMORIAL PRIZE IN GREEK AND LATIN. — $100, presented by the Wiegand Memorial Foundation, Inc., in honour of the late William Dudley Woodhead, Hiram Mills Professor of Classics and Chairman of the Department from 1925-1950, awarded to the student in Honours Greek and Latin of the intermediate or final years, who, in the opinion of the Department, has done the best work in this field.

4.2.5 MEDALS

The following medals are awarded to the graduating students who stand highest in the First Class Honours List of the subjects named, provided the Faculty so recommends to Senate:

THE HENRY CHAPMAN GOLD MEDAL, for Classical Languages and Literature.

THE FRENCH GOVERNMENT'S BRONZE MEDAL, for excellence in French in the general or Honours course.

In addition to the above, certain medals are offered annually by L'Alliance Française, at the discretion of the Department of French.

If there is no candidate for any medal, or if none of the candidates fulfils the required conditions, the medal is withheld, and the proceeds of its endowment for the year may be devoted to prizes in the subject for which it was intended.

THE GOVERNOR-GENERAL'S GOLD MEDAL, for Modern Language and Literature.

THE GOVERNOR-GENERAL'S SILVER MEDAL, awarded to the student standing highest among those graduating "with great distinction" in a major or faculty program of the Faculty of Arts or of Science. Awarded by a joint committee of the scholarships committees of the Faculties of Arts and of Science upon the recommendations of the faculties concerned.

THE ALLEN OLIVER GOLD MEDAL, for Economics and Political Science (founded by Mrs. Frank Oliver, in memory of her son, the late Allen Oliver, M.C., B.A., Lieutenant, 26th Battery, C.F.A., who was killed in action at the Somme, on November 18, 1916).

THE PRINCE OF WALES GOLD MEDAL, for Mental and Moral Philosophy.

THE SHAKESPEARE GOLD MEDAL, for English Language and Literature.

4.2.6 LOAN FUNDS

McGILL SOCIETY OF ONTARIO LOAN FUND. — Established in 1938 by the Ontario Branch of the Graduates' Society of McGill.*

4.3 OPEN TO STUDENTS IN THE FACULTY OF DENTISTRY

For scholarships and bursaries open to undergraduates in all Faculties, see Section 4.1.

University Scholarships. — See Section 4.1.1.

4.3.1 PRIZES

DR. W. C. BUSHELL PRIZE. — Awarded to the student attaining the highest aggregate standing

Apply to Student Aid Office.

in Dental Anatomy and Applied Sciences in the first two years of the dental undergraduate program.

DR. L. A. COHN PRIZE. — Awarded to the student in the Diploma or Masters program in Restorative Dentistry and Prosthodontics for outstanding achievement.

DR. M. DONIGAN PRIZE. — Awarded to the student attaining the second highest standing in the first year of the dental undergraduate program.

DR. GERALD FRANKLIN PRIZE. — Awarded to the student attaining the highest standing in the final examinations in the third year of the dental undergraduate program.

INTERNATIONAL COLLEGE OF DENTISTS (CANADIAN SECTION) PRIZE. — Awarded to the student attaining the second highest standing in the third year of the dental undergraduate program.

DR. W. G. LEAHY PRIZE. — Awarded to the student in the final year for meritorious achievement in Restorative Dentistry throughout the clinical undergraduate program.

DR. I. K. LOWRY PRIZE. — Awarded to the student attaining the second highest standing in the second year of the dental undergraduate program.

DR. K. I. MELVILLE PRIZE. — Awarded to the student attaining the highest aggregate standing in the Basic Science subjects in the first two years of the dental undergraduate program.

DR. D. P. MOWRY PRIZE. — Awarded to the student attaining the highest standing in the final examinations in the second year of the dental undergraduate program.

DR. ARTHUR S. SOLOMON PRIZE. — Awarded to the student attaining the highest standing in the final examinations in the first year of the dental undergraduate program.

DR. A. L. WALSH PRIZE. — Awarded to the student in the final year for meritorious achievement in Oral Medicine throughout the clinical undergraduate program.

4.3.2 MEDALS

DR. J. K. CARVER MEDAL. — Awarded to the student in the final year attaining the second highest overall standing in the four years of the dental undergraduate program.

DR. A. W. THORNTON GOLD MEDAL. — Awarded to the student in the final year attaining the highest overall standing in the four years of the dental undergraduate program.

4.3.3 LOANS FUNDS

W. R. AIRD LOAN FUND. — Established in 1952 for students in Dentistry.*

COLLEGE OF DENTAL SURGEONS OF QUEBEC LOAN FUND. — Established in 1958 by the College of Dental Surgeons of the Province of Quebec to aid students in the Second and upper years in the Faculty of Dentistry. Such students must be registered with the College of Dental Surgeons of the Province of Quebec and loans shall not exceed the tuition fees for the year.*

KELLOGG LOAN FUND. — A sum of money has been placed at the disposal of the Faculty of Dentistry by the Kellogg Foundation to assist dental students who have real financial need and are not eligible for assistance under other bursary and loan schemes.*

OTHER LOAN FUNDS. — See Section 4.1.

4.4 OPEN TO STUDENTS IN THE FACULTY OF EDUCATION

For scholarships and bursaries open to undergraduates in all Faculties, see Section 4.1.

4.4.1 SCHOLARSHIPS

For Entrance Scholarships, see Section 3.

EDMUND HENRY BOTTERELL AWARDS. — See Section 4.16.1.

RONALD BRIGDEN MEMORIAL SCHOLARSHIP. — Awarded annually to graduates from schools on the South Shore whose staff members are represented by the St.Lawrence Richelieu Teachers' Association. Candidates must be in the Faculty of Education. Value $200. Apply to President, Ronald Brigden Memorial Scholarships S.R.T.A., Box 175, St. Lambert, P.Q.

ELLA BRYSON SCHOLARSHIP. — Offered to a student entering the Faculty of Education from Fort Coulonge Protestant School. Apply to Secretary, Women's Institute, Fort Coulonge, P.Q., before May 1.

Apply to Student aid Office.

SARAH EMMA HILL SCHOLARSHIP. — Endowed by the late Mrs. Sarah Emma Hill, of Stanstead, Que., and awarded each year to a student in the Faculty of Education "where assistance is required." Scholarship and indication of professional ability will be considered. Applications must be submitted by August 15.*

ESTELLA HOLMES SCHOLARSHIP. — $100 offered by the Women's Institute of Stanstead County to a student from Stanstead County who is entering the Faculty of Education. Apply, not later than July 1, to the Convenor of Education of the Stanstead County Women's Institute whose name may be obtained from the Principal of the applicant's school.

A. S. LAMB SCHOLARSHIPS. — Three scholarships of $300 each, endowed by friends of Dr. Arthur S. Lamb, formerly Director of the School of Physical Education and of the University Department of Athletics, Physical Education and Recreation, as a tribute to his work in these fields. Awarded to students entering the intermediate or final year of the Bachelor of Education (Physical Education) course. One scholarship is awarded on academic record and personal qualities. Financial need is also considered in awarding the other two scholarships. No application necessary.

MACDONALD TEACHERS' ALUMNI ASSOCIATION SCHOLARSHIP. — Value $100, awarded to the best all round student by the Dean of the Faculty of Education and the President of the Alumni Association. The Scholarship must be used to further the winner's educational studies. When circumstances permit, two scholarships are offered in the same year.

UNIVERSITY SCHOLARSHIPS. — See Section 4.1.1.

4.4.2 BURSARIES

PHYLLIS A. AITKEN BURSARY. — Value $700, awarded annually for a five-year period to a student or students in the Bachelor of Education program entering the intermediate or final year. Preference will be given to applicants who are planning to teach in one of the sciences or a language other than their natural language. Awarded by the I.O.D.E. on the recommendation of the Faculty of Education on the basis of financial need. May be renewable.

ELIZABETH MILLAR COSENS BURSARY. — To be awarded annually to a woman in the intermediate or final year of the degree course in Physical Education. The award will be made on the recommendation of the Faculty of Education without restriction as to race, creed, colour or nationality on the basis of academic record, motivation and financial need with primary concern being given to academic proficiency.

DELTA KAPPA GAMMA SOCIETY ALPHA CHAPTER GRANT-IN-AID. — A $250 grant-in-aid to a woman candidate for the 1st class diploma who has evidenced academic ability and who shows promise of making a contribution to the teaching profession. Applications must be submitted by August 15.*

FRUEHAUF TRAILER BURSARY FUND. — The Fruehauf Trailer Company has established a bursary fund for the purpose of aiding Physical Education students in the intermediate and final year of the Faculty of Education to complete their courses. No applications necessary.

I.O.D.E. BURSARIES. — The Municipal Chapter I.O.D.E. offers two bursaries $350 and $200, tenable in the Faculty of Education. Awarded by a committee of the Chapter on scholarship and need. Apply to the Educational Secretary, The Municipal Chapter of Montreal, I.O.D.E., 5475 Côte St. Antoine, Montreal 260, P.Q.

KAY KERRY CHAPTER I.O.D.E. BURSARY. — A bursary of $300 offered to a student resident in Pointe Claire or Beaconsfield, with preference given to students in the Faculty of Education. Apply to Chairman, Bursary Committee, Kay Kerry Chapter, I.O.D.E., 233 Allancroft Crescent, Beaconsfield, Que., not later than March 1.

KIWANIS CLUB OF LAKE OF TWO MOUNTAINS BURSARY. — $150, tenable by a student in the Faculty of Education residing in the counties of Vaudreuil-Soulanges including Ste. Anne de Bellevue and Senneville. Apply to the Secretary, Kiwanis Club of Lake of Two Mountains, P.O. Box 96, Dorion, Quebec, before September 30.

MONTREAL WOMEN'S CLUB ELIZA REID MEMORIAL BURSARY. — Founded in 1927 by the Montreal Women's Club in memory of its First President, Mrs. Robert Reid, to provide a Bursary for a student needing financial assistance to continue his studies. Preference will be given to students in the Faculty of Education.*

PROVINCIAL ASSOCIATION OF PROTESTANT TEACHERS BURSARIES. — A number of bursaries offered on the basis of scholarship and need. Apply to the Executive Director, Provincial Association of Protestant Teachers, 245 Hymus Blvd., Pointe Claire 730, P.Q.

JANET MORISON ROBB BURSARY FOR WOMEN. — The income for one year from endowment

Apply to Student Aid Office.

a good academic record and need financial assistance. Apply for bursaries to the Student Aid Office.

4.5.3 BURSARIES

BECHTEL FOUNDATION OF CANADA BURSARIES. — Bursaries of not less than $300 each for students in the Faculty of Engineering. The $1,200 annual gift may be divided between two or four students, two of whom must be entering the First year.*

ROBERT BRUCE BURSARIES. — Several bursaries of $100 each are open each year to "young men and women of promising abilities but of straitened circumstances in Arts, Science, or Engineering."*

A. F. BYERS BURSARY. — $300, awarded to a student in Engineering with a good academic record who needs financial assistance. Renewable annually until the holder graduates if he maintains a satisfactory academic standard and still needs financial help. Apply to the office of the Dean.

CANADIAN TITANIUM PIGMENTS LIMITED BURSARIES. — Open to Canadian students in any year of the Faculty of Engineering or the Faculty of Science and awarded on the basis of academic merit and financial need.*

BURSARY OF THE CORPORATION OF QUEBEC ENGINEERS. — $500, tenable by a student in the Second or Third year of the Faculty of Engineering, and awarded by the Faculty.

TOM DESMARAIS WHITE PRINT COMPANY BURSARY. — $500, awarded annually to a needy student in the School of Architecture.*

DOMCO INDUSTRIES LIMITED BURSARY. — $250, for a student in Architecture who is in financial need and whose work shows talent.*

DOMTAR BURSARY. — $100, established by Domtar Construction Materials Limited, and awarded to a needy student in the School of Architecture.*

DOUGLAS TUTORIAL BURSARIES. — The late Dr. James Douglas, who was a member of the Board of Governors, provided for ten or more tutorial bursaries of approximately $100 per annum in the Faculty of Engineering. These bursaries carry the obligation of giving tutorial instruction equivalent to one evening a week and the circumstances of the applicants as well as their academic standing are considered. Students in the Second and Third years of Engineering are eligible. Apply in writing to the Dean's Office on or before October 15.

HON. ROBERT JONES BURSARY. — One or more bursaries not exceeding $250 each in any one year are granted to needy students in the Faculties of Arts, Science, or Engineering.*

RICHARD S. LEA TUTORIAL BURSARIES. — The late Mrs. Wanda Lea, widow of the late Richard S. Lea, Consulting Engineer and graduate in Applied Science of McGill University, provided a fund of $5,000, the revenue of which provides two bursaries of $100 per annum given to suitable students in their last two years of Engineering, with the obligation of giving tutorial instruction equivalent to one evening a week. Apply in writing to the Dean's Office on or before October 15.

CHARLES MICHAEL MORSSEN BURSARY FUND. — Established by Mrs. C. Michael Morssen in memory of her husband, Charles Michael Morssen. The revenue from the fund to be used in assisting worthy students in any year of the Faculty of Engineering. Awarded by the Scholarships Committee of the Faculty of Engineering on the basis of academic record and financial need of the recipients.

SEPARATOR ENGINEERING LIMITED BURSARY. — A bursary of $200, open to undergraduate students enrolled in Chemical, Mechanical or Metallurgical Engineering. Awarded by the Scholarships Committee of the Faculty of Engineering on the basis of financial need and academic standing.

STANDARD CHEMICAL BURSARY. — An annual bursary of $250 awarded to a Canadian student, without restriction as to national background, language, colour or religion, preferably in an upper year of Chemical Engineering, who requires financial assistance. The award will be made by the Student Aid Office.*

EDWARD VOLCKMAR BURSARY FUND. — Established in 1972 by Miss Grace H. Prescott in memory of Edward Volckmar. Awarded annually to a student in need in the Faculty of Engineering. The bursary may be renewed until graduation.*

GORDON WEBBER BURSARIES. — Established by a bequest of the late Professor Gordon Webber, together with a number of donations from his former students, for needy students in the School of Architecture.*

For bursaries open to undergraduates in all Faculties, see Section 4.1.

---

*Apply to Student Aid Office.

4.5.4 PRIZES

BRITISH ASSOCIATION PRIZES. — Two prizes of $40 and $20, awarded to the students obtaining the highest, and the second highest aggregate marks in the First year sessional examinations in Calculus and Mechanics.

CANADIAN CONSTRUCTION ASSOCIATION PRIZE. — Each year the Dean of the Faculty of Engineering selects the best technical paper dealing with some phase of construction work for submission to the national Robert Leggett Award competition. The competition is open to all senior undergraduate students of civil, mechanical or electrical engineering. The University's submission automatically receives a $50 prize and an engineer's handbook. The national competition prizes are $250, $150 and $75 plus handbooks.

CANADIAN INSTITUTE OF MINING AND METALLURGY PRIZES. — Two prizes, $200 and $100, for the best and second best technical paper prepared by undergraduates before receiving a Bachelor's degree on a subject appropriate to any one of the Institute's Technical Divisions, namely Coal, Geology, Industrial Minerals, Metallurgy, Metal Mining, and Petroleum and Natural Gas. Papers should be submitted to the Canadian Institute of Mining & Metallurgy, 1117 St. Catherine St. W., Montreal, Quebec, before January 15.

CORPORATION OF QUEBEC LAND SURVEYORS PRIZE. — $25, open to students in Civil Engineering and awarded at the end of the Second year by the Corporation to the student obtaining the highest standing in the subjects of the undergraduate courses in engineering comprising Surveying, up to the end of the Second year.

VICTOR E. DAWSON MEMORIAL PRIZE. — $85 to the best student entering the final year in the program of Mining Engineering and Applied Geophysics.

ENGINEERING INSTITUTE OF CANADA LIFE MEMBERS' PRIZE. — The prize consists of a bronze medal known as "The Engineering Institute of Canada Life Members' Organization Medal", a framed certificate and a two-year membership in the Institute, one year as a student member and the other as an associate member. The prize is awarded annually to a student member of the Institute on the basis of marks achieved at the completion of his penultimate year of undergraduate study and on his activities in the E.I.C. student section or in the local branch of a recognized engineering society.

ASSOCIATE SECTION, MONTREAL BRANCH, ENGINEERING INSTITUTE OF CANADA PRIZES. — Two prizes, $50 and $25, for the best and second best papers in any branch of engineering presented at the Annual Students' Night sponsored by the Student Guidance Committee. Details may be obtained from the Faculty representative of the Engineering Institute of Canada.

H. L. FETHERSTONHAUGH BOOK PRIZE. — Established in memory of the late H. L. Fetherstonhaugh, M.C., F.R.A.I.C., F.R.I.B.A., R.C.A., a former member of staff in the School of Architecture. Awarded annually by the School of Architecture to the student with the highest standing in the course Professional Practice.

ROBERT FORSYTH PRIZE IN CIVIL ENGINEERING. — $100, bequeathed by the late Miss Jeanie Forsyth, and awarded, if the examiners so recommend, to a "worthy and needy" student of the graduating class who secures high standing in the subjects of Theory of Structures and Structural Design.

JAMES DICKIE HALL PRIZES. — Two prizes of $250 each, one in Mining and one in Metallurgy, established by Oliver Hall in memory of his son, James Dickie Hall, lost near Cannes in June 1944 in an air battle between four R.C.A.F. and more than ninety enemy planes. Open to students entering the Second or Third year of the above courses and awarded for the best technical paper in each department. Not awarded unless the papers are of high quality.

INSTITUTE OF ELECTRICAL AND ELECTRONICS ENGINEERS PRIZE. — Two prizes of $25 and $15, offered to students of McGill by the Montreal Section of the Institute of Electrical and Electronics Engineers to outstanding students in the Second or Third year in Electrical Engineering upon recommendation by the Department.

MURDOCH LAING PRIZE. — $625, for the design of a medium cost city house, established by the late Mrs. Florence B. Laing in memory of her son (formerly a student in the School of Architecture) who was killed at Courcellette in 1916 while serving with the 24th Canadian Infantry Batallion. Awarded in a competition held during the summer prior to entering the B.Arch. program.

DR. W. B. LEWIS PRIZE (see Section 4.1.2).

CHESTER MACNAGHTEN PRIZES (see Section 4.1.2).

McCHARLES PRIZE. — $1,000, gift of the late Aeneas McCharles, for the discovery of improved methods of treating Canadian ores or minerals, for the development of new life-saving devices in the power and light industry, or for notable achievement in scientific research in any useful practical line. Open to any Canadian. For further information apply to the Scholarships Office.

JOHN BONSALL PORTER PRIZE. — $40, awarded annually by the Department of Mining and Metallurgical Engineering and Applied Geophysics for outstanding performance.

LOUIS ROBERTSON PRIZE. — Founded by Mr. and Mrs. John A. Robertson, in memory of their son, John Louis Armour Robertson, who was killed in World War I on July 18, 1916. A book prize for the student obtaining the highest standing in History of Architectural Theory II in the School of Architecture.

SCOTT EXHIBITION. — A prize of $75, founded by the Caledonian Society of Montreal, to commemorate the centenary of Sir Walter Scott, and a British Association prize of $50, awarded to the students obtaining the highest, and the second highest aggregate marks in the Second year College Equivalent Program sessional examinations in Mathematics, Mechanics, Descriptive Geometry, and Physics.

SOCIETY OF CHEMICAL INDUSTRY MERIT AWARDS. — Three Merit Awards consisting of a gold key and a year's subscription to "Chemistry and Industry" awarded to the three graduating students who achieve the best results in: (a) the B.Sc. course with Honours in Chemistry, or Joint Honours in Chemistry and some related science; (b) the B.Eng. course in Chemical Engineering; (c) the Honours course in Biochemistry. Awarded by the Scholarships Committees of the Faculty of Science and the Faculty of Engineering on the recommendations of the Chairmen of the Departments concerned.

PHILIP J. TURNER PRIZE. — $175, presented by A. B. Darbyson, B.Arch. '15, to the student in the School of Architecture obtaining the highest standing in Design and Construction II.

4.5.5 MEDALS

ERNEST BROWN GOLD MEDAL. — Founded by the late Mrs. Ernest Brown in 1952 in memory of her husband the late Ernest Brown, M.Sc., M.Eng., D.Eng., Dean of the Faculty of Engineering from 1930 to 1942. Awarded to the student in the graduating class in any of the Departments of Engineering showing the highest ability throughout his undergraduate course. While academic standing is of primary importance, account is also taken of qualities of leadership and ability to work with others.

BIRKS GOLD MEDAL. — Awarded by Henry Birks & Sons (Montreal) for the best graduating student in Metallurgical Engineering.

BRITISH ASSOCIATION MEDAL. — Founded by the British Association for the Advancement of Science in commemoration of its meeting held in Montreal in 1884. Open for competition to students of the graduating class in each of the Engineering courses, and, if the examiners so recommend, is awarded to the student taking the highest position in the final examinations.

CHARLES MICHAEL MORSSEN GOLD MEDAL. — Established by Mrs. C. Michael Morssen in memory of her husband, Charles Michael Morssen, a benefactor of the Faculty of Engineering for many years. Awarded to a student of high academic standing and exceptional engineering promise in the graduating class in any of the Departments of Engineering.

ROYAL ARCHITECTURAL INSTITUTE OF CANADA MEDAL. — Offered to a student who has completed the B.Arch. program, has obtained high standing throughout his course, and who gives promise of being an architect of distinction after graduation. Selection is made by a committee of staff of the School of Architecture.

4.5.6 LOAN FUNDS

BENNETT EDUCATIONAL FUND. — The Engineering Institute of Canada makes loans from the fund to Engineering students (normally only in upper years).*

CANADIAN INSTITUTE OF MINING AND METALLURGY MONTREAL BRANCH LOAN FUND. — Established in 1958 by the Montreal Branch of the Institute to provide loans to undergraduate or graduate students in Geological Sciences, Metallurgical Engineering and Mining Engineering.*

J. M. FAIRBAIRN LOAN FUND. — Bequeathed in 1967 by the late Mrs. J. M. Fairbairn for loans for students in the Faculty of Engineering.*

GEORGE HENRY FROST FUND. — Founded by the late G. H. Frost, B.Sc. '60, to aid students in the Faculty of Engineering who require financial assistance. When making loans the applicants' academic standing is considered.*

BERNARD LEVITON LOAN FUND. — Established by Mr. Sidney Ender in memory of the late Bernard Leviton for students in the Faculty of Engineering with preference given to students in Electrical Engineering.*

ISABELLA McLENNAN BURSARY AND LOAN FUND. — A rotating fund for students in Architecture to assist in financial emergencies.*

Apply to Student Aid Office.

MONTREAL WOMEN'S AUXILIARY OF THE CANADIAN INSTITUTE OF MINING AND METALLURGY LOAN FUND. — Founded for the assistance of Engineering students in Mining, Metallurgy, Geology, and allied subjects.*

SCIENCE '25 MEMORIAL LOAN FUND. — Established in 1955 by the Class of Science '25 for Engineering undergraduates.*

WADDELL LOAN FUND. — Founded by the late J. B. Waddell. Loans are made under the same conditions as apply to the George Henry Frost Fund, but are available also to graduate students.*

WICKENDEN LOAN FUND. — Established in 1958 by Mr. John Wickenden to aid students in Engineering with better than average standing in previous year.*

OTHER LOAN FUNDS (see Section 4.1).

4.6 OPEN TO STUDENTS IN THE FACULTY OF LAW

For scholarships and bursaries open to undergraduates in all Faculties, see Section 4.1.

4.6.1 SCHOLARSHIPS

ALEXANDER SCHOLARSHIP. — $100 bequeathed in 1950 by the late Maurice Alexander, C.M.G., K.C., of London, England, as a token of esteem for the late Sir Charles Peers Davidson, former Professor of Criminal Law at McGill. Awarded by the Faculty.

EDWIN BOTSFORD BUSTEED SCHOLARSHIP. — Value $1,200 and can be used to supplement funds for graduate studies already received from other sources. Bequeathed by the late Mrs. Edwin Botsford Busteed in memory of her husband, Edwin Botsford Busteed, K.C., B.A., B.C.L. Awarded by the Faculty to an applicant, for graduate research on some subject connected with the law of Quebec and approved by the Faculty. Candidates shall make application for this scholarship to the Associate Dean for Student Affairs.

JOSEPH COHEN, Q.C., AWARD. — This award of $315 is made to a deserving student selected by the Faculty.

MAURICE GOLDENBERG MEMORIAL SCHOLARSHIP. — Value $225, in Government, Constitutional Law, or Public Administration, established by Senator H. Carl Goldenberg, Q.C. in memory of his father, the late Maurice Goldenberg. Awarded by the University Scholarships Committee to the best candidate amongst those nominated by the Faculty of Arts and the Faculty of Law.

CHIEF JUSTICE R. A. E. GREENSHIELDS MEMORIAL SCHOLARSHIPS. — Three scholarships covering tuition fees bequeathed by the late Mrs. R. A. E. Greenshields in memory of her husband, the late Chief Justice Greenshields, D.C.L., LL.D., for many years professor of Criminal Law and Dean of the Faculty of Law. Awarded to students entering the Faculty of Law and renewable in each of the two upper years leading to the Bachelor of Civil Law degree, if satisfactory conduct, and at least a high Second Class standing are maintained, or at the discretion of the Faculty may be renewed for other reasons. Candidates must satisfy the regular requirements for admission to the Faculty, must have a standing of at least high Second Class, and preferably First Class at the University or Institution which they previously attended, and must furnish evidence of the need for financial assistance to enable them to study law. Fluency in both English and French is not essential, but preference is normally given to applicants with a good working knowledge of both languages. Apply to the Faculty.

LYON WILLIAM JACOBS, Q.C., AWARD. — Value $100. Originally established in 1957 by donations totalling $500, and increased in 1962 to $2,000 by Mr. and Mrs. Alvin B. Jacobs, Mrs. Sybil Jacobs Phillips, Dr. and Mrs. Morris Lieff, and Mr. and Mrs. Newman Biller, in honour of the late Mr. Lyon W. Jacobs, Q.C. Awarded to a Second or Third year Law student who, in the opinion of the Faculty, shows the most progress in his studies and is also in financial need.

EUGENE LAFLEUR SCHOLARSHIP. — Value $1,000, presented by the law firm of Messrs. Laing, Weldon, Courtois, Clarkson, Parsons, Gonthier & Tétrault in memory of its founder. Awarded annually to a student entering the year in which he expects to obtain the B.C.L. degree (whether pursuing a purely B.C.L. program or taking the National Program). Selection by the Faculty on the principal ground of academic excellence.

MACDONALD TRAVELLING SCHOLARSHIP. — Value $4,000. Founded by a bequest of the late Sir William Macdonald "for the purpose of enabling English-speaking Law students to take a course of studies in France," the testator "deeming it of great importance that the English-

Apply to Student Aid Office.

of $2,000, established by the late Hon. James A. Robb, formerly M.P. for Chateauguay-Huntingdon and Minister of Finance, Canada, in memory of his daughter, Janet Morison Robb, wife of Hugh Harvie Donald. Preference is given to women students resident in either of the counties of Chateauguay-Huntingdon, or Beauharnois, who are daughters of widows or widowers of limited or moderate means, or daughters of disabled Canadian soldiers who have seen active service. Open to students in the Faculty of Agriculture, the School of Food Science, or the Faculty of Education and awarded by the Faculty of Agriculture Scholarships Committee. Students in the Faculty of Education should apply to the Student Aid Office before August 15.

VERDUN WOMEN'S CLUB HARRIET MORRIS MEMORIAL BURSARY. — Value $100, tenable for one year. Awarded in memory of the co-founder of the Club, Harriet Morris, on the basis of academic record, character, and financial need, to a woman student entering the Faculty of Education who is a graduate of Verdun Protestant High School.

4.4.3 MEDALS

GOLD MEDAL. — Awarded to the student demonstrating the highest general proficiency throughout the B.Ed. (P.E.) course.

GOVERNOR-GENERAL'S MEDAL. — Presented by His Excellency the Governor-General of Canada. Awarded for general proficiency to a full-time teacher in training in the graduating year of the Bachelor of Education program.

STRATHCONA TRUST MEDALS. — Awarded to the man and the woman standing highest in the initial year and to the man and the woman standing highest in the intermediate year of the Physical Education course.

4.4.4 LOAN FUNDS

NATIONAL COUNCIL OF JEWISH WOMEN LOAN FUND. — Established for the purpose of aiding students in the Faculty of Education to complete their courses.*

PROVINCIAL ASSOCIATION OF PROTESTANT TEACHERS LOAN FUND. — Loans of not more than $300 per annum with priority to students applying for the first time and to those not eligible for other bursaries. Loans repayable when the student begins teaching. Apply to the P.A.P.T., Professional Loans Committee, 245 Hymus Blvd., Pointe Claire 730, P.Q.

ST. GEORGE'S LOAN FUND. — Established in 1955 by a donation of $500 to assist students registered in the Faculty of Education.*

STUDENT TEACHERS' SOCIETY LOAN FUND. — Established in 1954 by a donation from the Student Teachers' Society to assist students registered in the Faculty of Education. Additional donations supporting this fund have been received from the following sources: I.O.D.E. Ethel Walkem Joseph Fund, Gardner Kneeland Fund, Milton Hersey Fund, Dr. S. P. Robins Fund, and J.C. Wilson Fund.*

4.5 OPEN TO STUDENTS IN THE FACULTY OF ENGINEERING (Including Architecture)

For Entrance Scholarships, see Section 3.
For scholarships and bursaries open to undergraduates in all Faculties, see Section 4.1.

4.5.1 GENERAL REGULATIONS IN ENGINEERING

1. Only full-time students are eligible for scholarships.
2. Scholarships will be awarded only if an adequate standard is attained.

4.5.2 SCHOLARSHIPS

AMERICAN SOCIETY FOR METALS SCHOLARSHIP. — $600 offered by the Montreal Chapter of the American Society for Metals to a student in any year of the Metallurgical Engineering course. Awarded by the Scholarships Committee of the Faculty of Engineering on the recommendation of the Department of Metallurgical Engineering on the basis of academic standing, engineering promise, and financial need.

BAYLIS SCHOLARSHIP. — Value $290, founded in memory of Mr. and Mrs. James Baylis of Montreal. Awarded to a student entering the Second year who is in need of financial assistance and

Apply to Student Aid Office.

will be renewed if the student maintains satisfactory standing. Apply through the Dean of the Faculty.

EDMUND HENRY BOTTERELL AWARDS. — See Section 4.16.1.

CANADIAN PITTSBURGH INDUSTRIES SCHOLARSHIP. — $250, awarded to a student of the School of Architecture submitting the best solution of a design problem in Design and Construction IV in which glass is a major item. The judges are a committee of staff of the School of Architecture.

E. G. M. CAPE AND COMPANY (1956) LTD. AWARD. — $250, for a student who has completed the First year of the Civil Engineering course and is entering the Second year. Awarded by the Scholarships Committee of the Faculty of Engineering on the basis of high scholastic standing, activity in extra-curricular work and student engineering society affairs, and construction engineering promise. All other factors being equal financial need will be considered.

CENTRAL MORTGAGE AND HOUSING CORPORATION TRAVELLING SCHOLARSHIPS. — Awarded annually to an undergraduate planning to enter the B.Arch. program. One student in each Canadian School of Architecture is chosen on the basis of scholastic achievement and marked interest in housing as shown by his work. The group travels to selected locations in Canada, the U.K. or the U.S.A. for a period of four to five weeks to study examples of residential environment and housing design. The tour is conducted by a member of staff of one of the Schools. Travelling expenses are paid by the scholarship fund. Following the tour, each student will be employed at the Head Office of C.M.H.C. for the balance of the summer at normal rates of pay. A paper upon the summer's tour and work must be submitted. On receipt of the paper by C.M.H.C., the student will receive $500. These awards are available only to Canadian citizens or landed immigrants in Canada. Applications must be received by the Director of the School by March 1. Selection is made by a Committee of Staff of the School of Architecture.

COMINCO SCHOLARSHIPS. — To assist in ensuring a continuing supply of qualified graduates in fields vital to industry in Canada, Cominco Ltd. has established a program of twenty-four scholarships at specified Universities in Canada to assist students in financing the final two years of their undergraduate course. Two of these scholarships are awarded annually in the form of two-year awards of $800 each per year at McGill University by the University Scholarships Committee upon the recommendations of the Departments concerned. Open to students who in the fall will enter the penultimate undergraduate year of a course leading to a degree in Honours Geology, Chemical Engineering, Geological Engineering, Mining, Mineral Engineering, Mechanical Engineering, Metallurgy, Metallurgical Engineering, Soil Science, or Agronomy. Renewals for the second year will be subject to attainment of academic standards satisfactory to the University Scholarships Committee.

CYANAMID OF CANADA LIMITED SCHOLARSHIP. — Value $600, established by Cyanamid of Canada Limited for a student whose scholastic standing and attendant attributes make him worthy of financial assistance. Awarded by the Scholarships Committee of the Faculty of Engineering, with preference being given to students in Chemical Engineering.

MARION MCCALL DALY AWARD. — See Section 4.16.1.

SIR WILLIAM DAWSON SCHOLARSHIPS IN METALLURGY. — A research and teaching graduate award of $1,800, or one or more undergraduate awards totalling $1,800, in the Department of Mining and Metallurgical Engineering and Applied Geophysics, endowed in memory of the late Sir William Dawson, Principal of McGill University from 1855 to 1893.

DOW CHEMICAL OF CANADA SCHOLARSHIP. — $500 for a student in the final year of Chemical Engineering, awarded by the Scholarships Committee of the Faculty of Engineering on the recommendation of the Chairman of the Department of Chemical Engineering, subject to the following conditions: the student (1) must have a sincere interest in the Chemical Industry; (2) must be in the upper half of the class; (3) must demonstrate some leadership in extra-curricular activities; (4) must be "personable"; (5) must not hold another scholarship.

GEORGE HERRICK DUGGAN MEMORIAL SCHOLARSHIPS. — (See Section 3.1.)

NEVIL NORTON EVANS SCHOLARSHIP. — Value $200, established in 1937 by graduates of the Faculty of Applied Science (Engineering) to commemorate the work of Professor Nevil Norton Evans, formerly Professor of Chemistry. Open to students in Engineering who show outstanding ability in Chemistry. Awarded by the Faculty of Engineering and the Department of Chemistry.

GENERAL MOTORS SCHOLARSHIPS. — Established by General Motors Corporation of Canada and open to outstanding young Canadian men or women. Two scholarships are awarded annually in the form of two-year awards of $1,000 each per year by the University Scholarships Committee upon the recommendations of the departments concerned. Open to students who in the fall will enter the penultimate undergraduate year of a program of studies leading to a degree in Mechanical Engineering, Commerce or Economics. Should a holder withdraw or

fail to maintain a satisfactory standing the scholarship may be awarded to another qualified candidate of the same class.

R. P. D. GRAHAM SCHOLARSHIPS AND MEDAL. — Endowed by former students of Dr. R. P. D. Graham, Professor Emeritus of Mineralogy, and available to students entering an intermediate year or the Final year of the B.Sc. course and to students entering the Second or Third year of the Mining Engineering course. Awarded by the University Scholarships Committee upon recommendations of the chairmen of the Departments of Geological Sciences and Mining and Metallurgical Engineering and Applied Geophysics. A bronze medal bearing a likeness of Professor Graham is given to the most highly qualified student receiving one of these awards.

THOMAS LEEMING HARRISON AWARD. — $250, for a student who has completed the Second year of the Civil Engineering course with high scholastic standing and who is entering the final year. Awarded by the Scholarships Committee of the Faculty of Engineering on the recommendation of the Chairman of the Department of Civil Engineering and Applied Mechanics.

WILLIAM HENRY HOWARD SCHOLARSHIPS. — Three scholarships of $900 each bequeathed in 1955 by the late Mrs. Florence P. Howard in memory of her husband. Open to undergraduate and graduate students in Metallurgy, Chemical Engineering and Geology. Awarded and renewable by the University Scholarships Committee upon the recommendations of the Departments concerned for scholastic ability and general promise.

INCO PARTICIPATING SCHOLARSHIPS. — The International Nickel Company of Canada, Limited, provides annually fifty awards at Canadian universities to students who in the fall will enter the penultimate undergraduate year of a course leading to a degree in Chemistry, Geology (including Geophysics and Geochemistry), and Chemical, Civil, Electrical, Mechanical, Metallurgical and Mining Engineering. Each award covers tuition fees plus a grant of $300 for miscellaneous expenses and a grant-in-aid of $500 to the department. Recipients may also request to undertake a summer orientation program with the Company in operations allied to their field of study. Renewed for one additional year provided student satisfies the requirements for the award. Students must be recommended by the department, and no more than two applications will be considered from each department of any university. Further information may be obtained from the Scholarships Office. Applications must be submitted by January 15.

IRON ORE COMPANY OF CANADA SCHOLARSHIPS. — Two scholarships of $500 each, open to students entering the Second or Third year in Mining, Metallurgical, Electrical, Mechanical, Civil, Chemical or Geological Engineering. Awarded by the Scholarships Committee of the Faculty of Engineering on the basis of academic ability, personality, need, and general promise.

JENKINS BROS., LTD., SCHOLARSHIP. — $200, open to all Engineering students entering the Third year in September and awarded on the basis of academic standing and personality.

JOHNSON WAX SCHOLARSHIP. — Total value of $2,400 ($800 a year for three years), awarded each year to a student who is entering the First year course in Chemical Engineering. Awarded by the Faculty of Engineering and is renewable until the holder graduates provided his or her academic standing is sufficiently high. Awarded mainly on the basis of academic standing but general qualifications for the engineering profession and need for financial help are also considered. No applications necessary.

HARRY KRASHINSKY SCHOLARSHIP. — Value $1,000, established by the Corporation of Engineers of Quebec for Quebec students finishing their penultimate year in Engineering. Applicants must submit a curriculum vitae, which should emphasize past and present activities in university and community affairs, and an essay not exceeding 500 words on the theme "The Role of the Engineer in the Community". Applications must be submitted by February 1. For further information apply to Scholarships Office.

FREDERIC J. LE MAISTRE AWARD. — Value $200, awarded annually to a worthy student in the penultimate year of the undergraduate program in Chemical Engineering. Awarded by the Faculty Scholarships Committee on the recommendation of the Department of Chemical Engineering.

H. M. MACKAY MEMORIAL SCHOLARSHIP. — Value $300, established in 1932 as a memorial to the late Henry M. Mackay, formerly Dean of the Faculty of Engineering. Awarded by the Faculty Scholarships Committee to a Canadian citizen or landed immigrant entering the First year in Engineering on the results of the D.E.C. examinations or equivalent.

J. W. McCONNELL SCHOLARSHIPS IN SCIENCE AND ENGINEERING. — Made possible through the generous donation of the late Mr. J. W. McConnell, awarded to students proceeding to degrees in any field of Science or Engineering (including Architecture) and renewable each year provided academic standing satisfactory to the University Scholarships Committee is maintained. Candidates must be Canadian citizens or landed immigrants, and on proof of need, may receive up to full tuition fees plus the cost of board, residence and books.
Students in Engineering are eligible for these scholarships provided they have received a Uni-

versity Scholarship. They should apply by filling out an Application for Financial Aid, which may be obtained from the Student Aid Office.

MR. AND MRS. T. R. McLAGAN SCHOLARSHIPS. — Two awards covering tuition fees for outstanding students entering the final year of Electrical Engineering and Mechanical Engineering (one in each department) who are judged to be the best in terms of academic performance, leadership and citizenship. In cases where two or more students are judged equal on this basis, the financial needs of the candidates shall be considered and preference given to the student whose need is greatest.

MONTREAL WOMEN'S AUXILIARY OF THE CANADIAN INSTITUTE OF MINING AND METALLURGY SCHOLARSHIP. — Value $600, open to undergraduate or graduate students in Geology, Metallurgical Engineering, Mining Engineering, or allied subjects.

R. G. K. MORRISON AWARD. — Value $450, established in honour of Prof. R. G. K. Morrison, Chairman of the Department of Mining Engineering and Applied Geophysics 1949-1966. Kerr Addison Mines Limited is responsible for supporting this award. Awarded by the Scholarships Committee of the Faculty of Engineering upon the recommendation of the Chairman of the Department of Mining and Metallurgical Engineering to a student in the Mining Engineering or Applied Geophysics course. If there is no suitable candidate for a particular year at the undergraduate level, the award may become available to a graduate student in Mining Engineering.

QUEBEC IRON AND TITANIUM CORPORATION SCHOLARSHIPS. — Two scholarships of $500 each open to students who have completed their First and Second years in Metallurgical Engineering at McGill University. Further information may be obtained from the Chairman of the Department of Mining and Metallurgical Engineering and Applied Geophysics.

PROVINCE OF QUEBEC DEPARTMENT OF NATURAL RESOURCES SCHOLARSHIPS. — The Department of Natural Resources of the Province of Quebec offers bursaries to enable students to take a university course in mining engineering or metallurgical engineering. Their maximum annual value is $650 for a student who lives away from home in order to attend the university, and $400 for a student who lives at home. Candidates must be Canadian who have lived for at least five years in the Province of Quebec. Further information may be obtained from the Secretary, Scholarships Committee, Quebec Department of Natural Resources, Parliament Buildings, Quebec, Que. Also open to graduate students in Metallurgy, Mining Engineering, and Geology.

GORDON SPROULE MEMORIAL SCHOLARSHIP. — $600, offered by the Montreal Chapter of the American Society for Metals to a student in the penultimate year of the Metallurgical Engineering course. Established in memory of Gordon Sproule, a member of the staff of the Department of Metallurgical Engineering from 1918 to 1953, in appreciation of his ability and his many services to the Society. Awarded by the Scholarships Committee of the Faculty of Engineering on the recommendation of the Department of Mining and Metallurgical Engineering and Applied Geophysics on the basis of academic standing, engineering promise, and financial need.

UNIVERSITY SCHOLARSHIPS (see Section 4.1).

WELDON AWARD. — Value $500, established by a bequest from the late Richard Laurence Weldon. Awarded by the Faculty Scholarships Committee on the recommendation of the Department of Mechanical Engineering.

F. T. M. WHITE AWARD. — Value $450, established in memory of the late Prof. F. T. M. White, Chairman of the Department of Mining Engineering and Applied Geophysics 1966-1971. The Canadian Mineral Industry Education Foundation is responsible for supporting this award. Awarded by the Scholarships Committee of the Faculty of Engineering upon the recommendation of the Department of Mining and Metallurgical Engineering and Applied Geophysics to a student in the Second or Third year of the Mining Engineering or Applied Geophysics course.

STUART ALBERT WISDOM MEMORIAL SCHOLARSHIP. — Value $400, established in 1953 by Mrs. Stuart Albert Wisdom as a memorial to her late husband (B.Sc. (Mining and Metallurgy), McGill '09), and to commemorate his outstanding contributions to the field of metallurgy and, in particular, his invention of the process for the manufacture of acetylene black. Awarded by the Faculty Scholarships Committee on the recommendation of the Department of Mining and Metallurgical Engineering and Applied Geophysics to a student entering the Third year of Metallurgical Engineering who has shown high scholastic ability and engineering promise.

ROY M. WOLVIN MEMORIAL SCHOLARSHIPS AND BURSARIES. — Two scholarships of $375 each, and a number of bursaries are given by Mrs. Roy M. Wolvin in memory of her husband. One scholarship is restricted to men undergraduates in the Faculty of Engineering, which is awarded by the Faculty Scholarships Committee. The other scholarship is restricted to women undergraduates in the Faculty of Arts, the Faculty of Science or the Faculty of Management, and is awarded by the University Scholarships Committee upon recommendations of the faculties concerned. The bursaries are open to students in any undergraduate faculty who have

CHESTER MACNAGHTEN PRIZES. — See Section 4.1.2.

FACULTY OF MANAGEMENT PRIZES. — The Faculty of Management awards ten $50 prizes to students in the ten Management Elective Groups in their final year.

LADDIE MILLEN MEMORIAL PRIZE. — Established by Mr. J. Ernest Millen in memory of his son, Laddie Millen, who was killed in action in World War I. Three prizes will be available annually to Industrial Relations students in the Bachelor of Commerce Program. The awards will be in the amounts of $500, $300, and $200, representing first, second and third prize for a competitive essay on an industrial relations topic. The subject of the essay will be determined each year by a committee of industrial relations faculty members and will be available from the Director of the Industrial Relations Centre. The prize winning essay will be selected by this committee, which will include the Dean of the Faculty of Management and the Director of the Industrial Relations Centre. Deadline each year for submission of essays to the Director of the Industrial Relations Centre will be May 15th. If, in the opinion of the committee, no essay is considered satisfactory for a prize at any particular level, the award at that level will not be granted.

MONTREAL STOCK EXCHANGE AND CANADIAN STOCK EXCHANGE PRIZE. — $100, offered for an essay written by a student in the Final year of the B.Com program who is enrolled in the Investment Management course. The subject is chosen annually by the Department of Economics in consultation with the Dean of the Faculty of Management. An award is made only if the best essay is considered to be First class. Final selection is made by the course lecturer, the Chairman of the Department of Economics, and the Dean of the Faculty of Management. Further information may be obtained from the course lecturer.

THORNE-GUNN PRIZE. — $150, awarded by Thorne, Gunn, Helliwell & Christenson to the student obtaining the highest marks in Auditing at the end of the Third year of the Commerce course.

WOMEN'S PERSONNEL GROUP OF MONTREAL BOOK PRIZE. — See Section 4.2.4.

4.8.4 MEDALS

SIR EDWARD BEATTY GOLD MEDAL. — A gold medal endowed by the late Sir Edward Beatty, former Chancellor of the University, awarded to the student in the B.Com. program with the highest distinction in Economics. Awarded, at present, on the aggregate marks for the three full year courses, Principles of Economics (or Honours alternatives), Money and Banking, and Economic Analysis (or Honours alternatives).

4.8.5 LOAN FUNDS

COMMERCIAL SOCIETY LOAN FUND. — To aid one or more students who are entering their Final year in the B.Com. program to complete their course. Loans are repayable within two years after graduation.*

MORTON J. WHITE LOAN FUND. — Established in 1957 by a bequest from the late Morton J. White, to assist deserving students in the B.Com. program.*

OTHER LOAN FUNDS (see Section 4.1).

4.9 OPEN TO STUDENTS IN THE FACULTY OF MEDICINE

For scholarships and bursaries open to undergraduates in all Faculties, see Section 4.1.

Within the Faculty of Medicine, students who demonstrate outstanding performance are recognized through the awarding of prizes and medals. Any prizes and medals awarded to a student are noted on his transcript and become a permanent part of his record, as are University Scholarships which are also awarded for outstanding scholastic achievement.

In view of the high level of academic performance already demonstrated and achieved by students entering the Faculty of Medicine, all other awards available in the Faculty at the undergraduate level are awarded on the basis of academic standing and financial need. Students requiring financial aid should obtain information and complete the financial aid forms available from the Student Aid Office.

4.9.1 SCHOLARSHIPS

DR. MAUDE E. SEYMOUR ABBOTT SCHOLARSHIPS. — A fund of $10,000, established in 1938

Apply to Student Aid Office.

by an anonymous donation, in honour of the late Maude E. Seymour Abbott, B.A., M.D., F.R.C.P. (C), LL.D. (McGill), to commemorate her distinguished work in connection with the history of Canadian medicine, the Sir William Osler Pathological Collection, and her outstanding research in congenital cardiac disease.

The revenue of this fund provides scholarships awarded by the University to undergraduates of either sex in the Faculty of Medicine, but women are given the preference. Awards vary according to the needs of the winners. Further information may be obtained from the Dean's Office, Faculty of Medicine.

J. H. B. ALLAN SCHOLARSHIP. — Available to undergraduate students in any year. Awarded by the Scholarships Committee of the Faculty of Medicine on scholarship and financial need. No application required.

SIR EDWARD W. BEATTY MEMORIAL SCHOLARSHIPS FOR MEDICAL STUDENTS. — A fund of $100,000 was bequeathed by the late Dr. Henry Albert Beatty, the income from which provides two scholarships, not necessarily of equal value, awarded annually to students of either sex and of any nationality. Open to (i) students registered in the McGill Faculty of Medicine as candidates for the M.D., C.M. degree, (ii) graduates of an accredited Faculty of Medicine registered for postgraduate degrees, (iii) graduates of an accredited Faculty of Medicine registered for a postgraduate diploma in a clinical specialty, (iv) graduates of an accredited Faculty of Medicine who are employed in a year of research as part of their residency training program. For students who hold or are working towards the McGill M.D., C.M. the award may be held at any approved institution in Canada or abroad. For other qualified students the award must be held at McGill. The holder is expected to devote his year of tenure either to research or to some form of special training excluding the normal training towards the M.D., C.M. and excluding any of the years of residency training required in the Diploma courses. Awarded by the Faculty of Medicine but not unless suitable candidates present themselves. Apply to the Dean's Office on the forms provided for this purpose on or before February 1 of the year in which the scholarship is to commence.

MAX BINZ SCHOLARSHIP. — From the bequest of the late Max Binz, $1,000 is set aside annually for scholarships in the Faculty of Medicine.

JAMES H. CUMMINGS SCHOLARSHIPS. — Two or more entrance scholarships in the Faculty of Medicine bequeathed by the late James H. Cummings. Awarded at the discretion of the Faculty of Medicine.

DR. E. M. FISHER MEMORIAL SCHOLARSHIP. — Available to undergraduate students in any year. Awarded by the Scholarships Committee of the Faculty of Medicine on scholarship and financial need. No application required.

SIMON AND ROSALIE HALPERN MEMORIAL SCHOLARSHIP. See page 14.

WALTER J. HOARE MEMORIAL SCHOLARSHIP. — Endowed by the late Dr. Charles W. Hoare, a graduate of McGill University, in memory of his son, Walter J. Hoare, who was killed in World War I. Open to pupils of the Collegiate Institutes of the counties of Essex, Kent and Lambton entering the Faculty of Medicine. If there are no qualified candidates in this preferred class, the scholarship may be awarded to a nominee of the Faculty of Medicine.

KEITH HUTCHISON MEMORIAL SCHOLARSHIPS. — Two or more scholarships, in memory of the late Dr. Keith Hutchison, established in the Faculty of Medicine. Tenable in any year of the course and awarded on the basis of distinguished academic standing and financial need. The holder in any one session may re-apply for the following year.

IVES SCHOLARSHIP. — Established in 1967 by a bequest of the late David Fraser Murray, M.D., C.M., 1924. Awarded by the Scholarships Committee of the Faculty of Medicine on the basis of financial need with preference given to students from Nova Scotia, New Brunswick or Prince Edward Island.

CAMPBELL KEENAN MEMORIAL SCHOLARSHIP. — Established by Miss Charlotte Mildred Hagar in memory of the late Dr. Campbell B. Keenan. Tenable in the Second, Third, or Fourth year of the course in Medicine and awarded on the basis of distinguished academic standing and financial need to an applicant who intends eventually to enter surgical practice. The holder in any one session may re-apply for a subsequent session.

JAMES GRAHAME KER AND FREDERICK K. PETRIE MEMORIAL SCHOLARSHIP. — Awarded to the student from Eastern Ontario (Counties of Dundas, Stormont, Glengarry, Grenville, Carleton, Russell, and Prescott) or from Montreal, who in the examinations of the First year of the medical course secures the highest academic standing. The Faculty of Medicine may, however, award this scholarship to the same student during the Third and Fourth years.

JAMES O. MEADOWS AND MARIA MEADOWS AWARDS. — A bequest of $200,000 from the late Dame Maria Cowan Meadows to establish awards for undergraduates or graduates in the Fa-

culty of Medicine for the purpose of supporting research. Preference will be given to candidates working in the field of Cancer Research, but worthy candidates working in other areas of medical or surgical research will also be considered. Apply to the Dean of the Faculty of Medicine.

ROBERT SHARWOOD MEMORIAL SCHOLARSHIP. — Tenable in any year of the undergraduate course in Medicine and awarded on the basis of distinguished academic standing and financial need. The holder in any one session may re-apply for the following year.

FREDERICK SMITH MEMORIAL SCHOLARSHIP. — This name is given to one University Scholarship awarded only to a student in the Faculty of Medicine.

UNIVERSITY SCHOLARSHIPS. — See Section 4.1.1.

4.9.2 BURSARIES

BELLAM MEMORIAL BURSARIES. — A bequest of $20,000 from the estate of the late C. F. Bellam. Awarded by the Scholarships Committee of the Faculty of Medicine on the basis of financial need. Candidates must be from Stanstead County of Quebec.

DR. BEN BENJAMIN MEMORIAL BURSARY. — Established by his sisters in memory of the late Ben Benjamin, B.A., M.D., C.M., lecturer in the Department of Paediatrics. Awarded by the Scholarships Committee of the Faculty of Medicine on high academic standing and financial need.

JOSEPH ISRAEL BENNETT BURSARY. — A bequest by the late Joseph Israel Bennett, the interest on which is to provide a bursary to be awarded annually to a deserving student by the Scholarships Committee of the Faculty of Medicine.

ELFRIC DREW BROWN BURSARY. — Established in 1973 by a bequest from the late Elfric D. Brown, M.D., C.M. The annual income is to provide bursaries to help deserving students in the Faculty of Medicine.

BEVERLY COONER BURSARY. — Established by the family and friends of the late Beverly Cooner to assist a deserving student. Awarded annually by the Scholarships Committee of the Faculty of Medicine with the approval of the National Council of Jewish Women on the basis of financial need and academic standing.

CO-OPERATIVE MEDICAL SERVICES FEDERATION OF ONTARIO BURSARY. — To be awarded on the basis of academic standing and financial need, to a student who has completed the pre-medical years and is entering the first medical year in university, and who has been a member or whose parents have been members of a medical co-operative for at least two years. In the event of no First year student qualifying, a Second, Third, or Fourth year student may be chosen. Apply to the Dean of the Faculty of Medicine.

ANNIE DIAMOND BURSARIES. — Established in 1969 for medical students with financial need. To be awarded by the Scholarships Committee of the Faculty of Medicine. No application is required, and the awards will vary according to the needs of the recipients.

SAMUEL EIDLOW MEMORIAL BURSARY FUND. — Established for worthy medical undergraduate students with financial need. Awarded by the Scholarships Committee of the Faculty of Medicine.

CHANCELLOR FERRIER MEMORIAL BURSARY. — Established by Mrs. Herbert V. Lacey in memory of her great-grandfather, Senator James Ferrier, Chancellor of McGill from 1884 to 1889. Awarded by the Scholarships Committee of the Faculty of Medicine on academic standing and financial need, with preference to students from the state of Wyoming.

KINCH MEMORIAL BURSARY. — Established by Miss Dia Joyce in memory of Mr. and Mrs. C. H. Kinch to assist medical undergraduate students. Awarded by the Scholarships Committee of the Faculty of Medicine on the basis of financial need and academic standing.

ROCHE BURSARY. — A bursary donated annually by Hoffmann-La Roche Limited. Awarded by the Scholarships Committee of the Faculty of Medicine to a student (or students) in the undergraduate medical course who require financial assistance to complete their education.

SAMUEL ROSENFELD BURSARY. — Established by Mrs. Ida Rosenfeld Letovsky in memory of her late husband, Mr. Samuel Rosenfeld, for worthy medical undergraduate students with financial need. Awarded by the Scholarships Committee of the Faculty of Medicine.

REUBEN ROSS AWARD. — A bequest from the late Reuben Ross, the annual income to provide an annual award available to students in the Faculty of Medicine and awarded by the Scholarships Committee of the Faculty of Medicine on the basis of financial need.

SOLOMON DAVID SACKS BURSARY. — Established in 1973 by Mr. & Mrs. Issie Sacks, in memory of their son, to assist a deserving medical student. Awarded by the Faculty of Medicine on the basis of financial need.

ROSE SCHWARZ — HELEN MARCUS BURSARY. — Established by the family and friends of the late Rose Schwarz and the late Helen Marcus to assist a needy and deserving student who intends to devote his summer employment to Cancer Research. Awarded annually by the Scholarships Committee of the Faculty of Medicine with the approval of the National Council of Jewish Women.

BRUCE SMITH BURSARY FUND. — A bequest by the late Dr. Bruce Stewart Smith "to assist poor but worthy medical students to complete medical training at McGill University."

DR. MILTON C. AND NINA E. WILSON AWARD. — Established in 1970 by a bequest from the late Dr. Milton C. Wilson, the annual income to be available for the support of undergraduate or postgraduate students in the Faculty of Medicine who are in need of financial assistance. Awarded by the Dean of Medicine.

4.9.3 PRIZES

MR. AND MRS. J. A. BESNER PRIZE. — Approximately $250, awarded to the student obtaining the highest aggregate standing in the Third year of the medical undergraduate course.

H. S. BIRKETT MEMORIAL PRIZE IN OTOLARYNGOLOGY. — $100, established by Miss Winifred Birkett in memory of her father, the late Dr. H. S. Birkett, former Professor of Otolaryngology, for the student who in the final year has shown the best performance in Otolaryngology. In addition, a specially bound volume containing an address by Dr. Birkett on the history of medicine in the Province of Quebec and a photograph and brief biographical sketch of Dr. Birkett will be presented to the winner.

BRISTOL LABORATORIES OF CANADA PRIZE. — An annual prize of $125, awarded to a Third year medical student.

JOSEPH MORLEY DRAKE PRIZE. — (Founded by the late Joseph Morley Drake, M.D.). — Value $125, awarded to the student with the highest marks in the final examination in Pathology.

ROBERT FORSYTH PRIZE. — $75, bequeathed by the late Miss Jeanie Forsyth, awarded each year to a student who, upon graduation, has shown particular ability in all branches of Surgery.

CHARLES E. FROSST MEDICAL PRIZE AND BRONZE MEDAL. — An annual prize valued at $500 to be awarded to a Third year medical student who has shown the most promise in the field of Pharmacology. A bronze medal will also be presented to the winner.

HARRY S. GROSS MEMORIAL PRIZE. — $60, bequeathed by the late Mrs. Esther B. Gross in memory of her late husband, Harry S. Gross, D.D.S. 1913, M.D., C.M. 1921. Awarded to the student with the highest standing in Surgery in the Third year of the medical course.

JOSEPH HILS PRIZE. — (Founded by the late Dr. Joseph Hils, of Woonsocket, R.I.). — A prize of $75, awarded to the student who obtains the highest marks in Pharmacology.

CAMPBELL HOWARD PRIZE IN CLINICAL MEDICINE. — $50, founded by Mrs. Campbell Howard, in memory of the late Dr. Campbell P. Howard, Professor of Medicine at McGill. Awarded to the student of the final year who has shown the most consistent excellence in his written case reports in Clinical Medicine in the Third year of the course.

F. SLATER JACKSON PRIZE. — Value $75, founded by Mr. and Mrs. H.F. Jackson in memory of their son, the late F. Slater Jackson, M.D. Awarded to the student with the highest standing in the final examinations in Histology.

CAMPBELL KEENAN MEMORIAL PRIZE IN CLINICAL SURGERY. — $50, established by Miss Charlotte Mildred Hagar in memory of the late Dr. Campbell B. Keenan. Awarded to the student in the graduating class who has shown the highest proficiency in Clinical Surgery as determined by the Chairman of the Department of Surgery. The winner of the Robert Forsyth Prize in Surgery is ineligible.

DR. W. B. LEWIS PRIZE. — See Section 4.1.2.

CHESTER MACNAGHTEN PRIZES. — Section 4.1.2.

MONTREAL CHILDREN'S HOSPITAL CUSHING MEMORIAL PRIZE. — $100, awarded to the student with the highest standing in Paediatrics in the final year.

PRIMARY PRIZE. — A prize for the best aggregate standing in the subjects of the first two years.

PSYCHIATRY PRIZE. — Value $100, awarded to the Third year medical student who, in the opinion of the Department of Psychiatry, shows the greatest promise in Psychiatry.

SAMUEL ROSENFELD PRIZE. — $50, awarded to the student with the highest standing in Medical Microbiology in the Second year of the medical course.

MONA BRONFMAN SHECKMAN PRIZE. — $125, awarded for the highest academic standing in Psychiatry.

ALEXANDER D. STEWART PRIZE. — $150, founded by the late W. Grant Stewart (Arts 1885, Med.

speaking members of the legal profession should be proficient in the French language." The scholar selected is required to pursue a year's study in the Law Faculty of a French university approved in each case by the McGill Faculty of Law. Awarded by the Faculty to a student of the graduating class, proceeding to the Bar, with first or high second class honours in the final examination and who would be unable without financial help to spend a year in France. The Faculty interprets the bequest as intending that the scholarship be awarded only to students preparing for practice as advocates in the Province of Quebec. At present the scholarship must be used in the year in which it is awarded. Candidates shall make application for this scholarship to the Associate Dean for Student Affairs.

McGILL LAW GRADUATES ASSOCIATION SCHOLARSHIPS. — The McGill Law Graduates Association offers two scholarships, one covering tuition fees for a student entering Second year and the other for a student entering Third year. Selection is made by the Faculty of Law in conjunction with a representative of the McGill Law Graduates Association, with broad discretion on the basis of need as well as academic and other merit. Apply to the Faculty.

THOMAS ALEXANDER ROWAT SCHOLARSHIP. — Value $250, founded by Mr. Donald McKenzie Rowat, N.P., in memory of his brother, Lieutenant Thomas Alexander Rowat, B.C.L., who was killed in action at Lens, France, on June 28 1917. Awarded for proficiency in French and in the old French law, on conditions set by the Faculty.

THOMAS SHEARER STEWART TRAVELLING FELLOWSHIP. — Value $2,700, established in memory of the late Thomas Shearer Stewart, Q.C., B.A. 1905, B.C.L. 1908, by his family. Awarded annually or as often as the Faculty considers advisable to a recent graduate designated by the Dean for studies in law at a university approved by the Dean of the Faculty other than at a university in Quebec. Candidates shall make application for this scholarship to the Associate Dean for Student Affairs. Preference is given to Canadian citizens intending to reside in Canada.

UNIVERSITY SCHOLARSHIPS. — See Section 4.1.1.

WAINWRIGHT SCHOLARSHIPS AND BURSARIES. — Established by a bequest from the estate of the late Arnold Wainwright, Q.C., for many years a lecturer in the Faculty of Law and a distinguished lawyer of the Montreal Bar. Two entrance scholarships of $1,500 each for three years and $2,000 each for the fourth year. Awarded to undergraduates of promise having distinguished scholastic records registered for the B.C.L. or LL.B. degree and proceeding to the National Program. Tenable for four years if candidates maintain distinguished academic standing. In addition, two scholarships of $2,000 each are available for students who have obtained their first law degree and are entering the last year of the National Program. Wainwright scholars who show no financial need will be awarded the nominal sum of $100, the balance of moneys to be allocated as Wainwright Bursaries to meritorious students with need. Apply to the Faculty.

4.6.2 BURSARIES

HAROLD G. FOX EDUCATION FUND BURSARIES. — Three awards of $250 each, established by donations from the Harold G. Fox Education Fund. To be awarded to needy Law students in good standing.*

H. E. HERSCHORN BURSARY. — The Student Aid Office may award a bursary from the interest of the H. E. Herschorn Fund to a deserving student in the Third or any subsequent year of his program leading to the B.Sc., B.A., M.D., C.M., LL.B., or B.C.L. degree.

CHARLES ALBERT NUTTING BURSARY. — Value $250. Founded in 1930 by Miss Adelaide Nutting, M.A., R.N., in memory of her brother, Charles Albert Nutting, K.C., B.C.L. 1872. Awarded to needy Law students in good standing.*

4.6.3 PRIZES

HYMAN BAKER, Q.C. PRIZE. — $100, established by the family of Hyman Baker, Q.C. to commemorate his seventieth birthday. Awarded to the student obtaining the highest standing in Bankruptcy.

CANADA PERMANENT PRIZE. — An annual prize of $100 established in 1966 by Canada Permanent, awarded to the student who receives the highest standing in the group of courses comprising Wills, Successions, Marriage Covenants and Gifts.

CARSWELL PRIZES. — A book prize of $100 for a graduating student and a book prize of $50 for a lower year student have been established by the Carswell Company of Toronto. Both prizes are awarded at the discretion of the Faculty.

JOHN W. COOK, K.C., PRIZE. — $575 awarded annually to an outstanding member of the graduating class in Law as determined by the Dean and Faculty on the basis of high academic standing throughout the course, participation in Faculty activities and possible postgraduate intentions.

Apply to Student Aid Office.

SCHOLARSHIPS

JOHN E. CRANKSHAW PRIZE. — Established by friends of the late John E. Crankshaw, Q.C., formerly lecturer in Criminal Law at McGill, the prize consists of $300 to be applied to Bar fees, advocate's gown and any other needs. Awarded to the student who has the highest standing in Criminal Law subjects at McGill and has passed his final examination for admission to the Bar of the Province of Quebec.

MAX CRESTOHL PRIZE. — $65, established in 1959 under the Will of the late Max Nathan Zion Crestohl, Q.C. Awarded to the student who, in the opinion of the Faculty, has submitted the best written contribution to the McGill Law Journal.

JOSEPH DAINOW PRIZE. — $100, established by Professor Dainow, for writing in the area of Civil Law.

HAROLD G. FOX EDUCATION FUND PRIZE. — $100 annually, established in 1971 for a five year period by a donation from the Harold G. Fox Education Fund. Awarded to the student who obtains the highest standing in the course on Intellectual Property.

CHIEF JUSTICE GREENSHIELDS PRIZE IN CRIMINAL LAW. — Value $95, endowed by the late Mrs. Greenshields in 1943 in memory of her husband, the late Chief Justice Robert Alfred Ernest Greenshields, D.C.L., LL.D., for many years professor of Criminal Law and Dean of the Faculty of Law, and awarded to the member of the graduating class in Law having the highest standing in Criminal Law throughout the law program.

H. E. HERSCHORN PRIZE. — $150 established by the late Mr. H. E. Herschorn, N.P., B.A., 1911, B.C.L. 1914, to the highest ranking graduating student who intends to enter the Notarial profession.

"I.M.E." PRIZE IN COMMERCIAL LAW. — $200 to enable a student to purchase law books, established by Mr. George S. McFadden, Q.C., awarded to the member of the graduating class having the highest standing in Commercial Law throughout the program.

JUNIOR BAR ASSOCIATION PRIZE. — A prize of $50 for the student who obtains the highest standing in Civil Procedure in the First year.

DR. W. B. LEWIS PRIZE. — See Section 4.1.2.

4.13 OPEN TO STUDENTS IN THE FACULTY OF RELIGIOUS STUDIES

For scholarships and bursaries open to undergraduates in all Faculties, see Section 4.1.

W. M. BIRKS AWARDS. — Three awards of $100 each to the students graduating with the best records in the B.Th., S.T.M. and M.A. (Religious Studies).

SAMUEL FINLEY MEMORIAL SCHOLARSHIP. — Usually $150, available to a student enrolled in the Faculty of Graduate Studies and Research who is pursuing advanced studies in religion or theology, awarded at the discretion of the Dean of Religious Studies.

HOUSTON BURSARY. — Value $400, the bequest of Thomas Houston, for students studying for the ministry of the Presbyterian Church in Canada or the United Church of Canada, and preference is given to candidates whose mother tongue is French. Awarded by the Faculty of Religious Studies and open to students in the Faculty of Arts and the Faculty of Religious Studies.

DR. W. B. LEWIS PRIZE. — See Section 4.1.2.

CHESTER MACNAGHTEN PRIZES. — See Section 4.1.2.

GORDON R. STEPHEN JR. MEMORIAL BURSARY. — Established in 1968 to provide bursary assistance for students in the Faculty of Religious Studies for purposes of assisting any student who might not otherwise be able to obtain a university degree and who preferably has attended Weredale House. Awards are made by the Student Aid Office on the recommendation of the Faculty of Religious Studies.

NEIL STEWART PRIZE. — A $200 prize, established by Mr. Neil Stewart of Vankleek Hill in 1878. Awarded on the recommendation of the Faculty of Religious Studies to a student or students studying biblical Hebrew and registered in that Faculty.

UNIVERSITY SCHOLARSHIPS. — See Section 4.1.1.

LOAN FUNDS. — See Section 4.1.

Students of the Faculty of Religious Studies who are registered also in the Montreal Diocesan Theological College, in the United Theological College, or in the Presbyterian College, will be eligible for prizes, scholarships, and bursaries as announced in the calendars of these institutions.

4.14 OPEN TO STUDENTS IN THE FACULTY OF SCIENCE

For Entrance Scholarships, see Section 3.
For scholarships and bursaries open to undergraduates in all Faculties, see Section 4.1.

4.14.1 GENERAL REGULATIONS IN SCIENCE

1. No applications are required. The awards are made by the Science Scholarships Committee on the basis of examination standings.

2. Unless restricted by the deed of gift or faculty regulations the awards are open to all students studying for the B.Sc. degree.

3. Normally only those students who have completed at least 30 credits in the year preceding the award will be eligible for awards.

4. Scholarships will be awarded only if an adequate standard is attained.

5. If in any university year there is not a sufficient number of candidates showing adequate merit, any one or more of the scholarships offered for competition may be given to more deserving candidates in another year.

6. In order to retain a scholarship a successful candidate must proceed regularly with a university course to the satisfaction of the Faculty.

4.14.2 SCHOLARSHIPS

MARGARET JANE ALLAN SCHOLARSHIP. — Bequeathed in 1929 to the Royal Victoria College by Mrs. Agnes W. Allan. Value $450, awarded annually to the woman student with the highest standing in the initial year of the B.Sc. course.

EDMUND HENRY BOTTERELL AWARDS. — See Section 4.16.1.

ROBERT BRUCE SCHOLARSHIP. — $100, tenable for two years, bequeathed by the late Robert Bruce, of Quebec City. Open to students in the Faculty of Arts, the Faculty of Science or the Faculty of Management and awarded for high standing at the end of the initial year. Awarded by the University Scholarships Committee upon recommendations of the faculties concerned.

CANADIAN ASSOCIATION OF TEXTILE COLOURISTS AND CHEMISTS (QUEBEC SECTION) SCHOLARSHIP. — $300, for the student entering the Final year with the highest aggregate standing in the penultimate year of the Honours Chemistry course. Awarded by the Scholarships Committee of the Faculty of Science upon the recommendation of the Department of Chemistry irrespective of colour, race, sex, creed, or financial need.

CHEVRON STANDARD LIMITED GEOLOGICAL SCHOLARSHIP. — $500 awarded by the Scholarships Committee of the Faculty of Science to aid an outstanding student to complete his final year in Geology or Solid Earth Geophysics. Preference given to students interested in oil exploration and production.

COMINCO SCHOLARSHIPS. — To assist in ensuring a continuing supply of qualified graduates in fields vital to industry in Canada, Cominco Ltd. has established a program of twenty-four scholarships at specified Universities in Canada to assist students in financing the final two years of their undergraduate course. Two of these scholarships are awarded annually in the form of two-year awards of $800 each per year at McGill University by the University Scholarships Committee upon the recommendations of the departments concerned. Open to students who in the fall will enter the penultimate undergraduate year of a course leading to a degree in Honours Geology, Chemical Engineering, Geological Engineering, Mining, Mineral Engineering, Mechanical Engineering, Metallurgy, Metallurgical Engineering, Soil Science, or Agronomy. Renewals for the second year will be subject to attainment of academic standards satisfactory to the University Scholarships Committee.

MARION McCALL DALY AWARD. — See Section 4.16.1.

DOW-HICKSON SCHOLARSHIPS. — Annual value, not less than $1,000 each. Established in 1957 by a bequest from the late Dr. J. William A. Hickson and awarded to students entering the penultimate or the Final year of the Honours courses in English Literature, Philosophy or Psychology. Awarded by a joint committee of the scholarships committees of the Faculties of Arts and of Science upon the recommendations of the departments concerned.

GEORGE HERRICK DUGGAN MEMORIAL SCHOLARSHIPS. — See Section 3.1.

R. P. D. GRAHAM SCHOLARSHIPS AND MEDAL. — Endowed by former students of Dr. R. P. D. Graham, Professor Emeritus of Mineralogy, for students entering an intermediate year or the Final year of the B.Sc. course and the Second or Third year of the Mining Engineering course. Awarded by the University Scholarships Committee upon the recommendations of the Chairmen of the Departments of Geological Sciences and Mining Engineering & Applied Geophysics. A bronze medal bearing a likeness of Professor Graham is given to the most highly qualified student receiving one of these awards.

WILLIAM HENRY HOWARD SCHOLARSHIPS. — Three scholarships of $900 each bequeathed in 1955 by the late Mrs. Florence P. Howard in memory of her husband. Open to undergraduate and graduate students in Metallurgy, Chemical Engineering and Geology. Awarded and renewable by the University Scholarships Committee upon the recommendations of the departments concerned for scholastic ability and general promise.

INCO PARTICIPATING SCHOLARSHIPS. — The International Nickel Company of Canada, Limited, provides annually fifty awards at Canadian universities to students who in the fall will enter the penultimate undergraduate year of a course leading to a degree in Chemistry, Geology

(including Geophysics and Geochemistry), and Chemical, Civil, Electrical, Mechanical, Metallurgical and Mining Engineering. Each award covers tuition fees plus a grant of $300 for miscellaneous expenses and a grant-in-aid of $500 to the department. Recipients may also request to undertake a summer orientation program with the Company in operations allied to their field of study. Renewed for one additional year provided student satisfies the requirements for the award. Students must be recommended by the department, and no more than two applications will be considered from each department of any university. Further information may be obtained from the Scholarships Office. Applications must be submitted by January 15.

FREDERIC J. LE MAISTRE AWARD. — Value $200, awarded annually to the student obtaining the highest standing in the penultimate year of the Honours Chemistry course. Awarded by the Faculty of Science Scholarships Committee on the recommendation of the Department of Chemistry.

LOGAN SCHOLARSHIPS. — Two scholarships of $200 each, one for work in Geological Sciences and the other for work in Botany or Zoology, open to men and women entering an intermediate year or the Final year of the undergraduate course. Awarded by the Faculty of Science on the recommendations of the Departments of Geological Sciences and of Biology.

SIR WILLIAM MACDONALD SCHOLARSHIPS. — Two scholarships of $500 each, open to all students entering an intermediate year or the Final year.

J. W. McCONNELL SCHOLARSHIPS IN SCIENCE AND ENGINEERING. — Made possible through the generous donation of the late Mr. J. W. McConnell, awarded to students proceeding to degrees in any field of Science or Engineering (including Architecture) and renewable each year provided academic standing satisfactory to the University Scholarships Committee is maintained. Candidates must be Canadian citizens or landed immigrants, and on proof of need, may receive up to full tuition fees plus the cost of board, residence and books.

Students in Science are eligible for these scholarships provided they have received a University Scholarship. They should apply by filling out an Application for Financial Aid, which may be obtained from the Student Aid Office.

McGILL ALUMNAE CARRIE DERICK SCHOLARSHIP. — Established in honour of the late Professor Carrie M. Derick, B.A. 1890, M.A. 1890, first woman professor at McGill. Awarded annually to a distinguished woman student, the Scholarship has a maximum value usually not exceeding $500 and a minimum value of $100. The honorary $100 is awarded automatically and if further supplementary scholarship assistance is required, the winner of the Scholarship is asked to consult the Student Aid Office.

McGILL ALUMNAE 75th ANNIVERSARY SCHOLARSHIP. — Established in honour of the Alumnae Society's 75th anniversary. Awarded annually to a distinguished woman student, the Scholarship has a maximum value usually not exceeding $500 and a minimum value of $100. The honorary $100 is awarded automatically and if further supplementary scholarship assistance is required, the winner of the Scholarship is asked to consult the Student Aid Office.

MAJOR HIRAM MILLS SCHOLARSHIP. — $100, open to students of both sexes in any of the biological sciences including Anatomy, Biochemistry, Botany, Genetics, Physiology, Microbiology and Zoology.

ANNE MOLSON SCHOLARSHIP. — $200, open only to men and women students in the Physical Sciences proceeding from the penultimate year into the Final year. Awarded by the Faculty of Science on the recommendation of the Departments of Physics, Chemistry, and Mathematics.

MOYSE TRAVELLING SCHOLARSHIPS. — Founded by the late Right Honourable Lord Atholstan, to commemorate the "splendid services of Dr. Charles E. Moyse, for forty-two years Professor of English, during sixteen of which he was Dean of the Faculty of Arts and Vice-Principal of the University." Two scholarships, normally of $2,000 each tenable for one year. One scholarship to be awarded by the Faculty of Arts for distinction in literary subjects and the other by the Faculty of Science for distinction in scientific subjects.

In the absence of applicants of sufficient merit in either of the faculties, applicants from final year students in, or graduates of, other faculties of the University may be considered.

If there is no winner in one of these faculties, both scholarships may be awarded to applicants in the other faculty. Holders must devote the year of tenure to advanced study, preferably in a British or European university, but not to the exclusion of other institutions approved by the Faculty of Arts or of Science. Applications, whether from graduates or from students in the final year of the undergraduate course, should reach the Dean of the Faculty of Arts or of Science not later than April 1. Applications should be accompanied by: (1) an official transcript of the applicant's academic record to date; (2) the names of two referees who are familiar with the applicant's work; (3) a detailed and comprehensive statement of the applicant's proposed course of study; the institution or centre at which he, or she, proposes to study; (4) a statement of the applicant's age and nationality.

Awards will be made after the results of final examinations in the final year of the undergraduate course have been determined.

PENHALLOW SCHOLARSHIP IN BOTANY. — $250, open to men and women entering an intermediate year or the Final year of the undergraduate course. Awarded by the Faculty of Science on the recommendation of the Department of Biology.

PRINCE OF WALES SCHOLARSHIP. — $150, open to students proceeding from the penultimate year into the Final year. Awarded for general distinction by the Faculty of Science on the student's complete academic record.

JANE REDPATH EXHIBITION. — Value $170, founded by the late Mrs. Redpath, to maintain an exhibition in Arts or Science. Awarded on the results of the initial year to the student with the highest average on the year's work. Awarded by a joint committee of the scholarships committees of the Faculties of Arts and of Science upon the recommendations of each faculty.

CARL REINHARDT SCHOLARSHIPS AND BURSARIES. — Established from the estate of the late Carl Reinhardt. To be used for scholarships or bursaries for undergraduate students in the Departments of Physics and Geological Sciences, and for scholarships or bursaries or in the support of their research for graduate students. Awards are made by the Fellowships Office, Faculty of Graduate Studies and Research, on the recommendations of the Chairmen of the departments concerned. Any amount not used by one of the departments in any year may be taken up by awards in the other department if suitable candidates are available.

UNIVERSITY SCHOLARSHIPS. — See Section 4.1.1

ROY M. WOLVIN MEMORIAL SCHOLARSHIPS AND BURSARIES. — Two scholarships of $375 each and a number of bursaries are given by Mrs. Roy M. Wolvin in memory of her husband. One scholarship is restricted to men undergraduates in the Faculty of Engineering, which is awarded by the Faculty Scholarships Committee. The other scholarship is restricted to women undergraduates in the Faculty of Arts, the Faculty of Science, or the Faculty of Management, and is awarded by the University Scholarships Committee upon recommendations of the faculties concerned. The bursaries are open to students in any undergraduate faculty who have a good academic record and need financial assistance. Apply for bursaries to the Student Aid Office.

4.14.3 BURSARIES

ROBERT BRUCE BURSARIES. — Several bursaries of $100 each are open each year to "young men and women of promising abilities but of straitened circumstances in Arts, Science, or Engineering."*

CANADIAN TITANIUM PIGMENTS LIMITED BURSARIES. — Open to Canadian students in any year of the Faculty of Engineering or the Faculty of Science. Awarded on academic merit and financial need.*

DELTA PHI EPSILON SORORITY BURSARY. — Value $100, founded in memory of Edith Silver. — Open to a deserving woman student entering the penultimate year of the Faculty of Arts or of Science.*

HON. ROBERT JONES BURSARY. — One or more bursaries not exceeding $250 each in any one year are granted to needy students in the Faculty of Arts, Science or Engineering.*

4.14.4 PRIZES

HARRY BARKER MEMORIAL PRIZE IN ENGLISH. — Value $150, bequeathed by the late Miss Dinah Lee in memory of the late Mr. Harry Barker, awarded to the student with the highest standing in English in an initial year. Awarded on the recommendation of the Department of English, to whichever Faculty Scholarships Committee is appropriate.

CHEMICAL INSTITUTE OF CANADA SILVER MEDAL AND BOOK PRIZE. — Awarded to the student having the highest standing in the penultimate year of the Honours Course in Chemistry.

CORPORATION OF PROFESSIONAL CHEMISTS OF QUEBEC PRIZE. — A plaque will be awarded annually to the student with the highest standing in the final year in the Major course in Chemistry.

CORPORATION OF PSYCHOLOGISTS OF THE PROVINCE OF QUEBEC PRIZE. — A prize of $10 offered annually by the Corporation to a student in the Final year who has done the most distinguished work in Psychology throughout the course. Awarded on the recommendation of the Department of Psychology, to whichever Faculty Scholarships Committee is appropriate.

FANTHAM MEMORIAL PRIZE IN ZOOLOGY. — $180, established by a bequest from the late Dr. Annie Fantham in memory of Professor H. B. Fantham, her late husband. Awarded annually to the graduating student ranking highest in a Zoologically oriented Biology program.

DR. WILLIAM H. HATCHER PRIZE IN CHEMISTRY. — $25, established by the Department of Chem-

Apply to Student Aid Office.

istry and awarded to the student with highest standing in Elementary Organic Chemistry, in which Dr. Hatcher lectured for so many years.

DR. W. B. LEWIS PRIZE. — See Section 4.1.2

LOGAN PRIZES IN BOTANY AND ZOOLOGY. — $50, awarded as a prize or prizes on the recommendation of the Department of Biology for original summer collections. Candidates should consult the Department concerning the collections to be made.

ANNIE MACINTOSH PRIZE. — Present value $150. Endowed by friends and pupils of the late Annie Macintosh and by a special gift of the late Miss I. G. Macintosh. Offered as a prize or prizes to women students in such subject or for such work as the Faculty may determine.

CHESTER MACNAGHTEN PRIZES. — See Section 4.1.2.

ANNE MOLSON PRIZE IN CHEMISTRY. — $150, awarded to the student with the highest record among those graduating with First Class Honours in Chemistry.

E. G. D. MURRAY PRIZE IN MICROBIOLOGY. — $100, established by a number of friends, ex-students and ex-colleagues of the late Professor E. G. D. Murray to perpetuate his name at McGill. Awarded annually to the graduating student with the highest aggregate standing in a program in Microbiology and Immunology.

BORIS MUSKATOV PRIZE IN PSYCHOLOGY. — An annual prize of $85 has been endowed by Miss Serafina Muskatov in memory of her brother, Boris Muskatov, who died on January 9, 1948, while a student. This prize is offered to a student who has completed the penultimate year in the Faculty of Arts or of Science and has done the best work in the subject of Psychology. Awarded on the recommendation of the Department of Psychology, to whichever Faculty Scholarships Committee is appropriate.

PENHALLOW PRIZE IN BOTANY. — $85, endowed by the Arts Undergraduate Society in 1911, and awarded to the graduating student whose complete record shows the highest first class standing in Botany. At least 24 credits in the subject must have been taken and Honours students in Biology will receive preference. Awarded by the Scholarships Committee of the Faculty of Science on the recommendation of the Department of Biology.

CLIFFORD B. PURVES PRIZE IN CHEMISTRY. — $250, established by the McGill Student Chapter of the Chemical Institute of Canada in memory of the late Professor Clifford B. Purves. Awarded by the Scholarships Committee of the Faculty of Science on the recommendation of the Department of Chemistry, to the student with the highest average mark in the penultimate year of the Chemistry Major Program.

SOCIETY OF CHEMICAL INDUSTRY MERIT AWARDS. — Three Merit Awards consisting of a gold key and a year's subscription to "Chemistry and Industry" awarded to the three graduating students who achieve the best results in: (a) the B.Sc. course with Honours in Chemistry, or joint Honours in Chemistry and some related science; (b) the B.Eng. course in Chemical Engineering; (c) the Honours course in Biochemistry. Awarded by the Scholarships Committees of the Faculties of Science and Engineering, on the recommendation of the Chairmen of the departments concerned.

4.14.5 MEDALS

The following medals are awarded to the graduating students who stand highest in the First Class Honours List of the subjects named, provided the Faculty so recommends to Senate:

THE GOVERNOR-GENERAL'S SILVER MEDAL, awarded to the student standing highest among those graduating "with great distinction" in a major or faculty program of the Faculty of Arts or of Science. Awarded by a joint committee of the scholarships committees of the Faculties of Arts and of Science upon the recommendations of the faculties concerned.

THE LOGAN GOLD MEDAL, for Geology or Solid Earth Geophysics.

THE MAJOR HIRAM MILLS GOLD MEDAL, for Biology.

THE ANNE MOLSON GOLD MEDAL, for Mathematics and Natural Philosophy.

THE HORACE WATSON GOLD MEDAL, for Physics, awarded to the student graduating with the highest First Class standing in the Honours Physics Course.

4.14.6 LOAN FUNDS

McGILL SOCIETY OF ONTARIO LOAN FUND. — Established in 1938 by the Ontario Branch of the Graduates' Society of McGill.*

Apply to Student Aid Office.

4.15 OPEN TO STUDENTS IN THE SCHOOL OF SOCIAL WORK

UNIVERSITY SCHOLARSHIPS. — See Section 4.1.1.

4.15.1 BURSARIES AND LOANS

General information on bursaries and/or loans may be obtained from the Student Aid Office.

Some sources exist for both loans and bursaries through the School. Inquiries may be made at the time of application for admission to the School. Since the School does not receive all the resources for bursary and/or loan purposes until late during the first term, students should endeavour to make other arrangements for their financial needs, whenever possible, prior to entering the School.

Usual funds available from the School include:

(1) Frances Anderson Memorial Bursary

(2) Alumni Bursary.

Overseas students should inquire of their governments concerning the availability of United Nations, Colombo Plan, or their country's own study grants.

4.15.2 PROVINCIAL

Students registered in Social Work programs are eligible for provincial assistance from their Departments of Education as outlined in Section 2.4.

4.15.3 VOLUNTARY AGENCIES

Local or national voluntary agencies often offer bursaries similar to those of the Provinces. Information may be obtained from the School.

4.16 OPEN TO WOMEN STUDENTS AT McGILL

4.16.1 SCHOLARSHIPS

MARGARET JANE ALLAN SCHOLARSHIP. — See Section 4.2.2.

EDMUND HENRY BOTTERELL AWARDS. — Two awards of $450 each, bequeathed by the late Mrs. Florence A. Redpath. Awarded by the University Scholarships Committee to women students who have completed the initial year and are entering the intermediate year(s) in the faculties of Arts, Education, Engineering, Management, Music, Science and the Schools of Nursing and Physical and Occupational Therapy. At present the awards are made to students whose academic interests and record combined with personal qualities indicate marked promise.

MARION McCALL DALY AWARD. — $400, awarded each year to a woman student who has completed two years at McGill and is continuing in a third year in the Faculty of Arts, the Faculty of Science, the Faculty of Management, or the Faculty of Engineering (including Architecture) at the University. Awarded by the University Scholarships Committee upon the recommendations of the faculties concerned. In making the award the following is taken into account: (a) the candidate's promise of making a definite contribution to Canadian life, (b) financial need, and (c) academic record.

McLENNAN-ETHEL HURLBATT SCHOLARSHIP. — Established in memory of the late Miss Ethel Hurlbatt by a legacy from the late Miss Isabella McLennan to the Royal Victoria College. Awarded by the University Scholarships Committee with the approval of the Warden of the Royal Victoria College or her delegate to a woman student on the basis of academic record and financial need.

MARGARET WILSON SCHOLARSHIPS. — See Section 4.1.1.

ROY M. WOLVIN MEMORIAL SCHOLARSHIP. — See Section 4.2.2.

4.16.2 BURSARIES

ALPHA OMICRON PI BURSARY. — A bursary of $100 is given by the Alpha Omicron Pi Mothers'

Club for a woman student, resident in Royal Victoria College or non-resident. The award is made by the Student Aid Office on the recommendation of the Warden of the Royal Victoria College to a candidate with good academic standing and financial need.

DELTA PHI EPSILON SORORITY BURSARY. — See Section 4.2.3.

FROTHINGHAM BURSARIES. — See Section 4.1.1.

HELEN REYNOLDS BURSARY. — Awarded annually by the Student Aid Office in consultation with the Warden of the Royal Victoria College to a woman undergraduate in any degree course who has completed at least one year's study on this campus. The award is made to a student in financial need who has satisfactory academic standing.

MURIEL V. ROSCOE BURSARY. — Awarded annually by the Student Aid Office in consultation with the Warden of the Royal Victoria College to a woman undergraduate in any degree course who has completed at least one year's study on this campus. The award is made to a student in financial need who has satisfactory academic standing.

4.16.3 PRIZES

DORA FORSYTH PRIZE. — $125, bequeathed by the late Miss Jeanie Forsyth for English Literature. Open to women only and awarded to a candidate recommended by the Department of English and approved by the Faculty of Arts.

ANNIE MACINTOSH PRIZE. — Present value $150, endowed by friends and pupils of the late Miss Annie Macintosh. Offered as a prize or prizes to women students in such subject or for such work as the Faculty of Science may determine.

WOMEN'S PERSONNEL GROUP OF MONTREAL PRIZE. — See Section 4.2.4.

LOAN FUNDS (see Section 4.1).

4.16.4 SPECIAL AWARDS ADMINISTERED BY A COMMITTEE OF THE ALUMNAE SOCIETY

4.16.4.1 McGill Alumnae Scholarships

The following scholarships have been established by the McGill Alumnae Society and are awarded annually to distinguished women students, based on recommendations from the Faculties concerned.

Arts

GEORGINA HUNTER SCHOLARSHIP. — Established in memory of the late Georgina Hunter, a member of the first graduating class of women at McGill University, the first President of the Alumnae Society, and a former Principal of the High School for Girls, Montreal.

ETHEL HURLBATT SCHOLARSHIP. — Established in memory of the late Miss Ethel Hurlbatt, a former Warden of the Royal Victoria College.

CATHERINE I. MACKENZIE SCHOLARSHIP. — Established in memory of the late Miss Catherine I. Mackenzie, B.A. 1904, former Principal of the High School for Girls, Montreal.

ISABELLA McLENNAN SCHOLARSHIP. — Established in memory of the late Miss Isabella McLennan.

SUSAN CAMERON VAUGHAN SCHOLARSHIP. — Established in honour of the late Mrs. Walter Vaughan, a former Warden of the Royal Victoria College.

Science

CARRIE DERICK SCHOLARSHIP. — Established in honour of the late Professor Carrie M. Derick, B.A. 1890, M.A. 1890, first woman professor at McGill.

75th ANNIVERSARY SCHOLARSHIP. — Established in honour of the Alumnae Society's 75th anniversary.

In Faculties other than Arts or Science

HELEN R. Y. REID SCHOLARSHIP. — Made possible by a legacy from the estate of the late Dr. Helen R. Y. Reid, B.A. 1889, LL.D. 1921, and awarded by the University Scholarships Committee to a distinguished woman student in faculties other than Arts or Science.

Each scholarship has a maximum value usually not exceeding $500 and a minimum value of $100. The honorary $100 is awarded automatically and if further supplementary scholarship assistance is required, winners of these scholarships are asked to consult the Student Aid Office.

4.16.4.2 McGill Alumnae Bursaries

Eight bursaries, of which five are named to honour distinguished women scholars, are awarded annually by the McGill Alumnae Society. The awards are made to women students in financial need who have satisfactory academic standing. The amount of these bursaries is determined by the Alumnae Scholarship Committee. Applications should be made to the Student Aid Office.

ISABEL BRITTAIN BURSARY. — Named in honour of Miss Isabel Brittain, B.A. 1894, M.A. 1911, twice President of the Alumnae Society and former English teacher at the High School for Girls, Montreal.

VIRGINIA CAMERON BURSARY. — Established in 1967 in memory of Miss Alice Virginia Cameron, B.A. 1925, Deputy Registrar of McGill, a former President of the Alumnae Society, Honorary Life Member of the Graduates' Society and a former President of the University Women's Club. Open to women students entering the penultimate year in the Faculty of Arts or of Science at McGill.

EUNICE PATTON HOOVER BURSARY. — Established in memory of the late Mrs. Hoover by her husband and friends.

GLADYS MURRAY BURSARY. — Established by the Alumnae Society in memory of the late Mrs. Gladys Murray, for thirty-five years Secretary to the Warden of the Royal Victoria College.

LUCIE TOUREN-FURNESS BURSARY. — Named in honour of Madame A. W. Furness, retired Associate Professor of French at McGill.

5 INDEX OF AWARDS

Abbott (Maude) Memorial Loan Fund — **14, 39**
Abbott (Dr. Maude E. S.) Scholarships — **35**
Affiliated Factors Corporation Bursary — **34**
Aid to the Physically Handicapped (Quebec) — **8**
Aird (W. R.) Loan Fund — **13, 21**
Aitken (Phyllis A.) Bursary — **22**
Alexander (Charles) Scholarship — **16**
Alexander Scholarship — **30**
Allan (J. H. B.) Scholarship — **36**
Allan (Margaret Jane) Scholarship — **16, 44, 48**
Alliance Française Medals — **20**
Alpha Omicron Pi Bursary — **8, 48**
Alumnae Association, Royal Victoria Hospital School of Nursing Bursary — **42**
Alumnae Association of the School of Nursing Scholarship — **41**
Alumnae Society Bursaries — **50**
American Society for Metals Scholarship — **23**
Anderson (Frances) Memorial Bursary — **48**
Anniversary (75th McGill Alumnae Society) Scholarship — **49**
Anonymous Donation for Bursaries — **8**
Anonymous Donor's Bursary — **40**
Association of Nurses of the Province of Quebec Bursaries — **42**
Austrian Government Prize — **18**

Baker (Hyman, Q.C.) Prize — **31**
Ballon (Ellen) Piano Scholarship — **40**
Ballon (I.) Memorial Medal — **33**
Barclay Scholarship — **16**
Bank of Nova Scotia Bilingual Exchange Scholarships — **8**
Barker (Harry) Memorial Prize in English — **18, 46**
Baylis Scholarship — **23**
Beatty (Sir Edward) Gold Medal — **35**
Beatty (Sir Edward) Memorial Scholarships — **4**
Beatty (Sir Edward W.) Memorial Scholarships for Medical Students — **36**
Beatty (Mary H.) Scholarships and Bursaries — **8**
Bechtel Foundation of Canada Bursaries — **7, 27**
Bedford (District of) Graduates' Society Scholarship — **5**

Bellam Memorial Bursaries — **37**
Benjamin (Dr. Ben) Memorial Bursary — **37**
Bennett Educational Fund — **14, 29**
Bennett (Gordon) Memorial Bursaries — **8**
Bennett (Joseph Israel) Bursary — **37**
Bentley (Bessie Parsons) Student Aid Fund — **34**
Berliner Student Loan Fund — **14**
Berman (Norman) Memorial Prize — **18**
Besner (Mr. and Mrs. J. A.) Prize — **38**
Binz (Max) Scholarships — **36**
Birkett (H. S.) Memorial Prize in Otolaryngology — **38**
Birks Family Foundation Student Aid Fund — **8**
Birks Gold Medal — **29**
Birks (W. M.) Awards — **43**
B'nai B'rith Hillel Foundation Bursary — **9**
B'nai B'rith Mount Royal Lodge No. 729 Bursaries — **9**
B'nai B'rith St. Laurent Lodge No. 2102 Bursary — **9**
Boosey and Hawkes Prize — **41**
Boright Loan Fund — **14, 39**
Botterell (Edmund Henry) Awards — **41, 48**
Brigden (Ronald) Memorial Scholarship — **21**
Bristol Laboratories of Canada Prize — **38**
British Association Prizes — **28**
British Association Medal — **29**
Brittain (Isabel) Bursary — **50**
Brooks (Murray) Memorial Bursaries — **9**
Brott Prize — **41**
Brown (Elfric Drew) Bursary — **37**
Brown (Ernest) Gold Medal — **29**
Bruce (Rev. G. O.) Bursaries — **9**
Bruce (Robert) Bursaries — **18, 27, 46**
Bruce (Robert) Scholarships — **16, 33, 44**
Bruck (Isaac) Memorial Scholarships — **33**
Bryson (Ella) Scholarship — **21**
Burke (Kenneth M.) Bursaries — **9**
Burnside Student Loan Fund — **12**
Bursaries — **3**
Bushell (Dr. W. C.) Prize — **20**
Busteed (Edwin Botsford) Scholarship) — **30**
Byers (A. F.) Bursary — **27**

Caldwell (David M.) Student Loan Fund — **39**
Callahan (Cal) Memorial Bursary — **7**
Cameron (Virginia) Bursary — **50**
Campbell (Mr. and Mrs. Samuel) Bursary — **9**
Canada Permanent Prize — **31**
Canada Student Loan Plan — **12**
Canadian Army University Course Memorial Bursary — **9**
Canadian Association of Occupational Therapists' Award — **43**
Canadian Association of Textile Colourists and Chemists (Quebec Section) Scholarship — **44**
Canadian Club of Montreal Fiftieth Anniversary Student Aid Fund — **13**
Canadian Construction Association Prize — **28**
Canadian Institute of Mining and Metallurgy Prizes — **28**
Canadian Institute of Mining and Metallurgy Loan Fund — **14, 29**
Canadian Physiotherapy Association Book Prize — **43**
Canadian Pittsburgh Industries Scholarship — **24**
Canadian Stock Exchange Prize — **35**
Canadian Titanium Pigments Limited Bursaries — **27, 46**
Cape (E.G.M.) and Company (1956) Ltd. Award — **24**
Caplan (Joseph Lawrence) Memorial Bursaries — **9**
Carswell Prizes — **31**
Carver (Dr. J. K.) Medal — **21**
Central Mortgage and Housing Corporation Travelling Scholarships — **24**
Chapman (Henry) Gold Medal — **20**
Chapman (Henry) Prize — **18**

SCHOLARSHIPS

Chemical Industry Society's Merit Awards — **29, 47**
Chemical Institute of Canada Prize — **46**
Chemical Institute of Canada Silver Medal — **46**
Cherry Prizes — **18, 34**
Chevron Standard Limited Geological Scholarship — **44**
Children of War Dead (Education Assistance) Act — **7, 9**
Chipman (Walter) Gold Medal — **39**
Choquette (Marguerite E.) Award — **40**
Christie-Storer Scholarship — **5**
Claire-Feldman (Nathalie) Memorial Bursary — **40**
Clarkson, Gordon & Co. Prize — **34**
Cohen (Bertha) Revolving Loan Fund — **13**
Cohen (Mr. and Mrs. Henry) Revolving Loan Fund — **13**

4.4.3 Provincial 28
4.4.4 Voluntary Agencies 28

5 Index of Awards 29

2 GRADUATE FELLOWSHIPS, SCHOLARSHIPS, BURSARIES, PRIZES AND LOAN FUNDS

2.1 DEMONSTRATORSHIPS AND ASSISTANTSHIPS

Most of the departments which offer laboratory courses require the services of some graduate students as Demonstrators. These may be employed up to 12 hours weekly during the session without losing status as full-time graduate students, and salaries vary from approximately $1,200 to $2,000, though shorter hours and smaller salaries are preferred in some departments.

Some of these departments are also able to pay graduate students as Research Assistants from special research funds, and in most though not all cases the research in question can be used by the student for his thesis. Some of the departments in the humanities and social sciences are able to employ graduate students as Teaching Assistants. In all cases the appointment is recommended by the Chairman of the department concerned on the basis of the documents supplied along with the applications for admission.

It is not the policy of the University to waive tuition or other fees for Demonstrators, Assistants, or Fellows, though in some cases a fellowship may consist of a basic stipend plus the amount of the fees, while certain graduate scholarships cover the cost of fees only. Generally speaking, demonstratorships and fellowships provide subsistence throughout the academic session only, while research assistantships may run throughout the calendar year (though some are available in the summer months only); in no case are the funds adequate to defray any part of the cost of coming from or returning to a distant country.

2.2 FELLOWSHIPS AND SCHOLARSHIPS

Fellowships open to graduate students fall into three groups. Some are awarded by institutions or bodies other than McGill, which have their own regulations and their own application forms obtainable from them. Secondly, there are those for which application should be made to the Fellowships Office of the Graduate Faculty. Application forms should be obtained from this Office, and all of these applications should be completed by February 1. Thirdly, there are those for which application should be made to some other designated professor or official at McGill University; in most of these cases no form is required and a brief letter of application is sufficient.

The probability of foreign students obtaining financial aid from the Graduate Faculty in the first year of enrolment is small.

Application *by Canadian students* for a fellowship and financial aid in general should be made on forms obtainable from the Fellowships Office and accompanied by the usual supporting documents such as transcripts and letters of recommendation. Unless the candidate is already a student in the Graduate Faculty, a fellowship application should be preceded by an application for admission to the Faculty. (It should be noted that *separate sets of transcripts and letters of recommendation* are required for scholarship as opposed to admission applications, and that this requirement extends to students *already registered in the Graduate Faculty* as well as to applicants for admission.) The awarding committees will base their nominations upon these documents, and will announce their awards on or before April 1. As far as possible each applicant will be considered for every award for which he is eligible. It is perfectly in

order for a student to apply for admission to the Faculty with the proviso that admission cannot be accepted unless financial aid can also be made available. Such a proviso does not obligate the University in any way.

Applicants for fellowships and scholarships should note that these are awarded on a competitive basis, in the light of established academic merit.

Application by *non-Canadian students* for a fellowship and financial aid should be made directly to the departments in which they plan to study.

2.3 PROVINCIAL BURSARIES AND LOANS

In all cases, a basic qualification is that the applicant must be a Canadian citizen or a landed immigrant with one year's residence and domicile in the province to which he applies.

In all provinces, except Quebec, the provincial authority listed below administers the Canada Student Loan Plan (Federal) as well as their own programs. The addresses are as follows:

Quebec: Apply for a Quebec registration card, after June 1, at the Student Counselling-Student Aid Office, 3465 Peel St., McGill University, P.O. Box 6070, Montreal, P.Q., M3C 3G1.

Alberta: Student Assistance Board, Department of Education, Edmonton, Alberta.

British Columbia: The British Columbia Student Aid Loan Committee, c/o Department of Education, Victoria, B.C.

Manitoba: Student Aid Officer, Department of Education, Legislative Buildings, Winnipeg, Manitoba.

New Brunswick: Deputy Minister, Department of Youth and Welfare, Fredericton, New Brunswick.

Newfoundland: Canada Student Loans Authority, Department of Education, Confederation Building, St. John's, Newfoundland.

Northwest Territories: c/o Education Division, Department of Northern Affairs and Resources, 150 Kent St., Ottawa, Ontario.

Nova Scotia: Nova Scotia Canada Student Loans Committee, Department of Education, Box 578, Halifax, Nova Scotia.

Ontario: Department of Colleges and Universities, Parliament Buildings, Queen's Park, Toronto 182, Ontario.

Prince Edward Island: Department of Education, Charlottetown, P.E.I.

Saskatchewan: Department of Education, Legislative Buildings, Regina, Saskatchewan.

Yukon Territory: The Students Financial Assistance Awards Committee, c/o Superintendent of Schools, Box 2703, Whitehorse, Yukon Territory.

2.4 AWARDS FROM FEDERAL AGENCIES

Many government departments (e.g. the Department of the Solicitor General and the Department of Labour) offer financial assistance to graduates pursuing studies relating to the department's work. Government agencies, such as the Central Mortgage and Housing Corporation also offer scholarship aid.

The three most important sources of federal aid to graduate students are the Canada Council, the National Research Council of Canada, and the Medical Research Council.

Canada Council. The Canada Council offers fellowships and grants in the social sciences and humanities at the master's and doctoral level. These categories extend to undertakings of an interdisciplinary nature, but not to those closely identified with the physical and biological sciences, or with professional training.

Informative leaflets and application forms are obtainable from departmental offices in the social sciences, humanities and related disciplines, from the Fellowships Office of the Graduate Faculty, or from: The Canada Council, P.O. Box 1047, Ottawa, Ontario, K1P 5V8.

National Research Council. The National Research Council offers a number of postgraduate awards to assist students in undertaking graduate study and research, and a limited number of postdoctorate fellowships for those wishing to add to their experience by specialized training. These scholarships and fellowships are open to men and women on equal terms and are awarded on the basis of high scholastic achievement and evidence of capacity to do research. The types of awards available are postgraduate scholarships, bursaries, and postdoctorate fellowships. These may be granted for study and research in the fields of agriculture, biology, chemistry, physics, geology, physical geography, mathematics, engineering and experimental psychology. At the time of application for a Scholarship, an applicant must be either a Canadian citizen or if he is a landed immigrant, he must have completed one full year of study and/or research at a Canadian University.

Medical Research Council. A limited number of awards are offered by the Medical Research Council to highly qualified graduate students who are undertaking full-time training and research leading to an M.Sc. or Ph.D. degree under the supervision of members of departments within the Faculties of Medicine and Dentistry. These awards are designated primarily for Canadian citizens or landed immigrants. Awards may also be made to applicants who are neither Canadian citizens nor landed immigrants but such students must be highly recommended by their prospective supervisor. The awards available are of two types: studentships and fellowships. Studentships are open to applicants holding an Honours B.Sc. degree (or its equivalent) who have a high academic standing. Fellowships are offered to graduates in Medicine, Dentistry or Veterinary Medicine for full-time training in research in the health sciences. Fellowships are also available to holders of a Ph.D. degree in a suitable field who wish to undertake postdoctoral training in the biomedical field.

2.5 INTERNATIONAL AND PRIVATE AWARDS

Commonwealth Scholarship and Fellowship Plan. At the request of the Government of Canada, the Association of Universities and Colleges of Canada provides a secretariat for academic administration of the Commonwealth Fellowship plan. This plan makes it possible for Canadians to undertake graduate study or research in many parts of the Commonwealth as part of a Canadian graduate degree program, in addition to bringing graduate students from other Commonwealth countries to Canada.

Students from other Commonwealth countries, in Canada on *student visas*, may apply to their home country for these fellowships. Students with *landed immigrant status* may apply to any other Commonwealth country for these awards, with the understanding that they will return to Canada when their graduate work is completed.

Association of Universities and Colleges of Canada. The Awards Service of the Association of Universities and Colleges of Canada, 151 Slater St., Ottawa, Ont. K1P 5N1, does not itself offer any awards but it does administer several national and international programs on behalf of Canadian and foreign donors, both private and governmental. Inquiries from students regarding financial aid can be addressed directly to the Association.

There are several other programs which enable foreign students to come to Canada to study, sponsored by the Canadian International Development Agency, under the

Department of External Affairs. These include the Colombo Plan, Economic Assistance to French-Speaking West Africa, Special Commonwealth Africa Assistance, Caribbean Assistance Program. Interested students can apply through the Ministry of Education or through the appropriate government department in their own country.

Foundations and Private Agencies. Thousands of professional associations, foundations and companies offer financial support for the graduate student. Details about these can be found in the following publications which are available in large public libraries, university reference libraries and consulate or embassy offices.

Awards for Graduate Study and Research: perhaps the most useful to Canadian students, it lists several thousand awards available to Canadians and to those studying in Canada. Prepared by the Bureau of Statistics, it is available from Information Canada (Catalog no. 81-541).

Study Abroad: A UNESCO publication lists awards tenable in Canada, as well as in other countries.

Fellowships and Scholarships Offered by Private Donors and Foreign Governments for Canadian Students: available from the Association of the Universities and Colleges of Canada, 151 Slater St., Ottawa 4, Ontario.

Fellowships in the Arts and Sciences: published by the American Council on Education.

Annual Register of Grant Support: lists the major awards distributed by American agencies.

Grants Register: lists postgraduate awards in the English-speaking world.

3 GRADUATE FELLOWSHIPS AND SCHOLARSHIPS

The following graduate awards are divided into four sections. In sections 3.1, 3.2, and 3.3 the awards are listed in alphabetical order of the undergraduate faculties from which applicants may have proceeded. Section 3.5 contains the names of awards for which graduates of other universities who wish to pursue advanced studies at McGill may be eligible. Not all awards listed are open for competition each year; further, awards open for competition may not be granted if none of the applications is considered meritorious. As changes of deadline dates for such fellowships are frequent, applicants are urged to check with the Fellowships Office of the Graduate Faculty.

Applications for fellowships and scholarships should be made by letter, except in the cases where they are to be directed to the Fellowships Office of the Graduate Faculty. In such cases the Fellowships Office will supply application forms. Applicants should simultaneously also ask for application forms for admission to the Faculty, unless this has been previously granted.

3.1 FELLOWSHIPS AND SCHOLARSHIPS TENABLE AT McGILL UNIVERSITY ONLY

(See also Secion 3.2).

3.1.1 OPEN TO GRADUATES IN TWO OR MORE FACULTIES

ALCAN FELLOWSHIP. — Value $3,500, plus a grant to the Department for research expenses. Open to graduates of any university admitted to McGIl as resident candidates for a Master's or Doctor's degree in Metallurgy and related subjects, and is renewable. Apply to the Dean of the Graduate Faculty through the Department of Mining and Metallurgical Engineering before February 1.

MAX BINZ BURSARIES FOR FOREIGN STUDENTS. — Established by the estate of the late Mr. Max Binz. These Bursaries are valued at $1,000 per annum and are renewable, but are not normally tenable concurrently with a major scholarship or fellowship. The Binz Bursaries are intended to help defray the expenses of graduate students coming to McGill from overseas countries (including South and Central America and Mexico). One of the purposes of the award program is to encourage the continued attendance at McGill of students of a wide variety of cultural backgrounds. According to the conditions of the award, foreign nationals who are Canadian landed immigrants (and therefore eligible for several categories of Canadian financial assistance) are not eligible for the Bursaries. Application forms can be obtained from the Graduate Faculty Fellowships Office (Dawson Hall) and must be submitted by April 1.

BRONFMAN FELLOWSHIPS IN COMMERCE AND ECONOMICS. — The Graduate Faculty offers two fellowships of $2,000 each plus tuition fees to men and women, preferably with research experience, who are graduates in Commerce or Economics from accredited universities. The holders are entitled to apply again in a subsequent year, will be expected to be in residence at McGill throughout the academic session, and to be candidates for a higher degree at McGill. A little teaching work may be required. Apply to the Dean of the Graduate Faculty, through the Department of Economics, before February 1.

J. B. COLLIP FELLOWSHIPS IN MEDICAL RESEARCH. — Up to three fellowships of $3,000 each are awarded for study at McGill in Anatomy, Bacteriology, Biochemistry, Histology, Pathology, Pharmacology, or Physiology. Candidates must hold the M.Sc. or Ph.D. in one of these subjects, or a degree in medicine, from a recognized university. Graduates of the McGill medical faculty may be permitted to hold the fellowship at an approved institution elsewhere. Apply before February 1 to the Secretary of the Faculty of Medicine, from whom application forms and further particulars may be obtained.

GLASGOW EXCHANGE SCHOLARSHIP. — Established to enable a McGill graduate to spend two sessions of postgraduate work at the University of Glasgow and for a graduate of the University of Glasgow to spend two sessions of postgraduate work at McGill. The awards are available for two years and are awarded only every second year. Open to degree and non-degree candidates. Glasgow will waive fees for the student from McGill and provide accommodation in a hall of residence plus a cash award to a total value of about 700 pounds sterling plus fees. The value of the award at McGill for the student from Glasgow is $3,000 per annum. Vacancies in the program arise in odd-numbered years and interested Glasgow students should seek further information from the Clerk of Senate, University of Glasgow, Glasgow, W.2, Scotland.

GOTTESMAN SCHOLARSHIP. — The D. S. and R. H. Gottesman Foundation offers $3,000 per year (supplemented by $500 per year), for research in any field of science or engineering on a topic of interest to the pulp and paper industry, to an American, a Canadian, or a citizen of the British Commonwealth, who is a graduate of a recognized university. He is expected to register at McGill as a candidate for a higher degree. Awarded by the Education Committee of the Pulp and Paper Research Institute. Apply to the Chairman of that Committee by May 1.

GRADUATE FACULTY SUMMER RESEARCH FELLOWSHIPS. — A limited number of fellowships of up to $1,000 each, are available through the generosity of the McConnell Foundation. These are intended to enable graduate students in the Humanities and Social Sciences to undertake summer research towards the M.A. or Ph.D. degree. Apply in writing to the Fellowships Office of the Graduate Faculty before April 1. Applications must be supported by a letter of recommendation from the candidate's research adviser.

WILLIAM HENRY HOWARD SCHOLARSHIPS. — Three scholarships of $900 each bequeathed in 1955 by the late Mrs. Florence P. Howard in memory of her husband. Open to undergraduate and graduate students in Metallurgy, Chemical Engineering and Geological Sciences. Awarded and renewable by the Graduate Faculty Scholarships Committee upon the recommendations of the Departments concerned for scholastic ability and general promise.

T. STERRY HUNT AWARDS IN CHEMISTRY. — Four $200 awards for best demonstrating. Awarded by the Department of Chemistry. No application necessary.

INTERNATIONAL BUSINESS MACHINES FELLOWSHIPS. — A stipend of up to $4,000 per year to support graduate research and study in Computer Science. Renewable. Apply to the Director of the School of Computer Science before April 1.

LeROY MEMORIAL FELLOWSHIP IN GEOLOGICAL SCIENCES. — Value $1,500 established by friends of Captain O. E. LeRoy (Arts, 1895), who was killed at Passchendaele, in October, 1917. May be awarded annually to a student who desires to proceed with postgraduate studies in Geology at McGill. The recipient may be asked to assist in teaching in the Department. Awarded by the Chairman of the Department of Geological Sciences in consultation with the Principal.

J. B. LYNCH FELLOWSHIP IN GEOLOGICAL SCIENCES. — $3,000 for an outstanding student commencing or continuing postgraduate studies in Geological Sciences. Apply to the Dean of the Faculty of Graduate Studies and Research through the Department of Geological Sciences before February 1.

POST-GRADUATE FELLOWSHIPS

LYNDEN LAIRD LYSTER AWARD IN PARASITOLOGY. — Value approximately $3,500. Open to graduates of any university admitted as candidates for a Master's or Doctor's degree in Parasitology at McGill. Apply by May 1 to the Dean of the Graduate Faculty through the Director of the Institute of Parasitology.

OTTO MAASS MEMORIAL FELLOWSHIP. — Value $4,300 per annum for graduate students in Chemistry, Chemical Engineering or Mechanical Engineering at McGill who are conducting their thesis research in the Pulp and Paper Research Institute of Canada. The fellowship is renewable and may be supplemented by nominal amounts of demonstrating in the University. Apply to the Chairman, Education Committee, Pulp and Paper Research Institute of Canada before February 1.

J. W. McCONNELL MEMORIAL FELLOWSHIPS. — These fellowships were established by the J. W. McConnell Foundation to support postgraduate studies and research at McGill University, and so to strengthen, in quality and in numbers, the academic staffs of Canadian universities and schools. The fellowships may be held by students registering in any postgraduate research program at McGill, but only those whose homes are in Canada or who intend to make their homes in Canada, are eligible to apply. The fellowships are intended to cover full fees, living expenses, the cost of books and such travelling as a Fellow's studies may require. The normal value of a first-year award is $4,000 plus fees, and further allowances are payable for dependents and for progression to upper years of study. The initial award is normally for a period of two years, but the fellowships are intended to carry a student through to a doctoral degree, and may normally be held up to the fifth year of a doctoral program (and for not more than five years). Fellows will be expected to spend the full calendar year (with the exception of a month's summer holiday) on their studies, and may not accept any remunerative appointment during the tenure of the fellowship without permission. Application forms may be obtained from the Fellowships Office of the Faculty of Graduate Studies and Research and completed forms must be returned to this office before February 1.

ALEXANDER McFEE FELLOWSHIP. — Value $3,500, open to graduates of any approved university who are resident full-time candidates for higher degrees or diplomas at McGill. The award will be made on a rotational basis in Physics, Chemistry, and Medical Sciences (with preference for Cancer research).

COLL McFEE MEMORIAL SCHOLARSHIP. — Established in 1968 from a bequest of the late Miss Julia Beatrice Anderson McFee in honour of her father Coll McFee and her brother Malcolm Charles Coll McFee, B.A. (1905), B.Sc. (1908), M.Sc. to a graduate student proceeding to the Master of Education (Chemistry) degree, or if a meritorious candidate does not apply, to a graduate of the McGill Chemistry course who is proceeding to an M.Sc. or Ph.D. degree in the Department of Chemistry. Send applications to the Chairman, Department of Chemistry, before June 1.

ISABELLA C. McLENNAN FELLOWSHIP. — $900. Awarded by the Graduate Faculty Scholarships Committee to a woman student in the Faculty of Graduate Studies and Research on the basis of academic merit and financial need. Apply to the Fellowships Office of the Graduate Faculty before February 1.

SIR VINCENT MEREDITH FELLOWSHIP IN AGRICULTURAL ECONOMICS. — $2,500 per year, tenable for a two-year period. Candidates must qualify for graduate work in Economics at the Ph.D. level and must pursue research or thesis work on an approved subject in the area of Agricultural Economics. Limited teaching or other duties are required. Apply to the Department of Agricultural Economics, Macdonald College, St. Anne de Bellevue, Quebec, before February 1.

MIRON FELLOWSHIP IN CONCRETE STUDIES. — Established by Miron Company Limited for advanced studies in some phase of the concrete industry in the Department of Civil Engineering. Value $900, plus an additional $300 to the University to be used in the best interests of the investigation. Applicants must be Canadian citizens, normally resident in Canada or those who have taken steps to become Canadian citizens, and graduates in science or engineering of a recognized university. Apply to the Dean of the Graduate Faculty through the Department of Civil Engineering before February 1.

FRANK L. MITCHELL FELLOWSHIP. — Value $4,300 per annum for graduate students in Chemistry, Chemical Engineering or Mechanical Engineering at McGill who are conducting their thesis research in the Pulp and Paper Research Institute of Canada. The fellowship is renewable and may be supplemented by nominal amounts of demonstrating in the University. Apply to the Chairman, Education Committee, Pulp and Paper Research Institute of Canada, before February 1.

THE RICHARD T. MOHAN SCHOLARSHIP. — Established in 1971 to honour the memory of the late Richard T. Mohan. To be awarded to a postgraduate student in the Department of Chemistry proceeding to the Ph.D. degree. Applications to the Chairman, Dept. of Chemistry, before June 1.

PULP AND PAPER RESEARCH INSTITUTE OF CANADA GRADUATE STUDENTSHIPS. — At least two studentships, value $3,500 per annum for graduate students in Chemistry, Chemical Engineering or Mechanical Engineering at McGill who are conducting their thesis research in the Pulp and Paper Research Institute of Canada. Renewable and may be supplemented by nominal amounts of demonstrating in the University. Apply to the Chairman, Education Committee, Pulp and Paper Research Institute of Canada, before February 1.

CLIFFORD B. PURVES FELLOWSHIP. — Value $4,300 per annum for graduate students in Chemistry, Chemical Engineering or Mechanical Engineering at McGill who are conducting their thesis research in the Pulp and Paper Research Institute of Canada. The fellowship is renewable and may be supplemented by nominal amounts of demonstrating in the University. Apply to the Chairman, Education Committee, Pulp and Paper Research Institute of Canada, before February 1.

QUEBEC IRON AND TITANIUM CORPORATION FELLOWSHIP IN METALLURGY. — Value $2,000 plus fees, plus a grant to the Department for research expenses. Open to graduates of any university admitted to McGill as candidates for a Master's or Doctor's degree in Metallurgy and related subjects, and is renewable. Apply to the Dean of the Graduate Faculty through the Department of Mining and Metallurgical Engineering before February 1.

CARL REINHARDT SCHOLARSHIPS AND BURSARIES IN PHYSICS AND GEOLOGICAL SCIENCES. — Established from the estate of the late Carl Reinhardt. To be used for scholarships or bursaries for undergraduate students in the Department of Physics and Geological Sciences, and for scholarships or bursaries or in the support of their research for graduate students. Awards are made by Fellowships Office, Faculty of Graduate Studies and Research on the recommendations of the Chairmen of the Departments concerned.

SOLVAY FELLOWSHIP. — Value $3,500 plus tuition fees, offered for the first year of study in the Faculty of Graduate Studies and Research. Tenable in any Department of the Faculty, and open to men and women equally. The holder must have graduated in any undergraduate Faculty of McGill in the session prior to that for which the award is given, and must obtain permission to proceed to graduate study. No teaching duties are required of the holder, who may not hold any other fellowship or bursary, nor receive a salary for teaching or other duties, during his tenure. Apply to the Fellowships Office of the Graduate Faculty before February 1.

STEINBERG GRADUATE FELLOWSHIPS. — Established by Mr. Sam Steinberg of Steinberg's Limited. Five fellowships of $3,000 each plus tuition fees for M.A. or Ph.D. students of outstanding merit in the Humanities and Social Sciences without restriction as to sex, race, creed or colour. Preference will be given to Canadian residents or to students likely to make a continuing contribution to Canadian life. Apply to the Fellowships Office of the Graduate Faculty before February 1.

IRVING ORRIN VINCENT BURSARY. — Established by Mrs. J. B. Owen in memory of her father, the late Irving Orrin Vincent, B.A. 1907, M.A. 1908, a noted teacher and Principal of Edward VII School in Montreal from 1912 until his death in 1920. Awarded annually by the Student Aid Office on the basis of academic merit and financial need to a graduate student in the Faculty of Arts proceeding towards an M.A. degree in Classics or Education, or M.Ed., or Doctorate in Classics or Education.

HARRISON WATSON SCHOLARSHIP. — Established in 1953 by a bequest from the late Harrison Watson and Ruth Appleton Watson in memory of their only son, Captain Aubrey Wentworth Harrison Watson, D.S.O., M.C. Value not less than $1,500, open to men and women graduates of an approved Faculty of Medicine or holders of M.Sc. or Ph.D. degrees or approved candidates for Ph.D. degrees at McGill who have completed one year of research and study towards their degree and also to candidates who have spent at least one year in postgraduate training. Awards of higher value may be made to candidates with higher qualifications. Renewable for two additional years. Preference is given to McGill graduates. The purpose of the scholarship is the encouragement of research into the causes and cure of tuberculosis and other diseases of an allied character. Tenable only at McGill unless the scholar is a graduate in Medicine of McGill in which case it is also tenable at an approved institution elsewhere. The holder must devote his full time for at least ten consecutive months to the object of the award. Application forms obtained from the Secretary of the Faculty of Medicine must be submitted before February 1.

ARTHUR WILLEY MEMORIAL BURSARY. — $540. To be awarded on the recommendation of the Biology Department. Apply to the Dean of the Graduate Faculty through the Department of Biology before February 1.

3.1.2 OPEN TO GRADUATES IN AGRICULTURE ONLY

FRANKI FELLOWSHIP IN SOIL MECHANICS. — Value $2,500 plus $500 for research expenses; renewable once. Open to graduates of recognized Canadian universities in Agriculture,

Engineering or Science. Awarded by Franki Canada Limited for the support of graduate studies in Soil Mechanics. Application should be made to Franki Canada Ltd. through the Chairman of the Department of Civil Engineering before April 1.

WALTER M. STEWART POSTGRADUATE SCHOLARSHIP IN AGRICULTURE. — Value $1,000, established to permit promising students from the Faculty of Agriculture of Laval University to undertake postgraduate studies at Macdonald College. Apply to the Dean of the Faculty at Laval before May 1 each year. Not awarded to students who would, including this scholarship, be in receipt of scholarships, fellowships, assistantships, etc. to a value of $2,000 or more per annum.

3.1.3 OPEN TO GRADUATES IN ARTS OR SCIENCE

PHILIP CARPENTER FELLOWSHIP IN BIOLOGY. — Value $1,200, established in 1892 by Mrs. Philip P. Carpenter to provide "a postgraduate teaching fellowship or scholarship in Natural Science or some branch thereof in the Faculty of Arts of McGill College." Awarded to a graduate who has been in residence for at least one academic session and may be held in conjunction with a departmental demonstratorship. No application necessary. The Department makes the appointment from its current cadre of Demonstrators.

HEWITT MEMORIAL BURSARY FUND. — A bequest from the late Frederick T. O'Reilly-Hewitt in memory of his parents, the late Daniel Frederick Hewitt and the late Maria Stenson Hewitt for bursaries. Open to students in the Faculty of Arts or to students in the Humanities and Social Sciences in the Faculty of Graduate Studies and Research. Awarded by the Student Aid Office on the basis of financial need and academic promise without restriction as to sex, race, creed, or colour.

MARY KEENAN SCHOLARSHIP IN ENGLISH. — $200, awarded by the Department of English to a student proceeding at McGill from the B.A. to the M.A. in English. The need and ability of the student are considered.

KIMBERLY-CLARK OF CANADA FELLOWSHIP. — Value $3,000 (supplemented by $500 per year), open to graduate students in the Department of Chemistry who are conducting thesis research in the Physical Chemistry Division of the Pulp and Paper Research Institute of Canada. Apply to the Dean of the Graduate Faculty through the Department of Chemistry before February 1.

SAMUEL LAPITSKY SCHOLARSHIP. — Fees. To be awarded on the joint recommendation of the Departments of Sociology and Anthropology. Apply to the Dean of the Graduate Faculty through the Departments of Sociology and Anthropology before February 1.

ALEXANDER MACKENZIE FELLOWSHIP IN POLITICAL SCIENCE. — Value $2,000, plus tuition fees. Tenable by a graduate of any accredited university, conditional upon his acceptance by the Faculty of Graduate Studies and Research in the field of Political Science. A certain amount of tutorial and teaching work is required. Under certain conditions, after consultation with the Department of Political Science, this fellowship may be held for a second or third year. Each candidate should send (i) a letter of application, (ii) a certified copy of his academic record, (iii) not more than three testimonials, to the Department of Political Science before February 1.

DAVID STEWART MEMORIAL FELLOWSHIPS. — Two fellowships, one in the Physical Sciences and one in the Biological Sciences, have been established by a bequest of the late Miss Agnes Stewart in memory of her father, the late David Stewart. Awarded to candidates who demonstrate ability of a high order and who are likely to enter a career of university teaching. For students in the first year of graduate study the value is $1,400 plus tuition fees, and $3,500 plus tuition fees for students in the upper years. Awarded for one year only but holders may apply for renewal. Apply to the Fellowships Office of the Graduate Faculty before February 1.

ARTHUR C. TAGGE FELLOWSHIP IN THE HUMANITIES AND SOCIAL SCIENCES. — Value $3,500, plus tuition fees. Tenable by a graduate of any approved university proceeding to a higher degree in any Department of the Humanities or the Social Sciences. Normally awarded for the first year of graduate study and not renewable, but exceptions may be made. Outstanding students in the last year of the undergraduate course, at McGill or elsewhere, should apply to the Fellowships Office of the Graduate Faculty before February 1.

XEROX FELLOWSHIP. — A fellowship of $4,500 established by Xerox Corporation for graduate research in Polymer Physical Chemistry and not normally renewable. Apply to the Dean of the Faculty of Graduate Studies and Research before February 1 through the Department of Chemistry.

3.1.4 OPEN TO GRADUATES IN ENGINEERING ONLY

SIR WILLIAM DAWSON FELLOWSHIP IN METALLURGY. — A research and teaching graduate award of $1,800, or one or more undergraduate awards totalling $1,800, in the Department of Mining and Metallurgical Engineering, endowed in memory of the late Sir William Dawson, principal of McGill University from 1855 to 1893. If, in any particular year, the Department has

no candidate and for that same year the Department of Mining Engineering and Applied Geophysics has a suitable candidate for whom no fellowship is available this fellowship shall become available to the Department of Mining Engineering and Applied Geophysics.

JAMES DOUGLAS FELLOWSHIP IN MINING ENGINEERING. — A research and teaching fellowship of approximately $1,200 in the Department of Mining and Metallurgical Engineering endowed by the late Dr. James Douglas and open to qualified university graduates.

B. J. HARRINGTON BURSARY IN MINING ENGINEERING. — Approximately $600 supported by graduates in Mining Engineering in memory of the late Professor B. J. Harrington, awarded annually if a suitable candidate offers, and open to qualified university graduates.

IRON ORE COMPANY OF CANADA SCHOLARSHIPS. — Open to graduate students in Mining Engineering.

JOHN BONSALL PORTER SCHOLARSHIP. — Value $1,000, founded by Dr. W. W. Colpitts (B.Sc., 1899). Open to graduate students proceeding to the degree of M.Eng. in Civil, Mechanical, or Electrical Engineering, preferably in Civil Engineering. Apply to the Dean of the Faculty of Engineering not later than July 30. Applications from graduates of other universities must be accompanied by certified statements of academic standing and letters of recommendation.

HORACE G. YOUNG FELLOWSHIPS. — Awarded to graduates of McGill University who are conducting advanced research in mining or metallurgy. Two awards of $750 each are made annually, one tenable in the Department of Mining Engineering and Geophysics and the other in the Department of Metallurgical Engineering. In the event that there is no eligible student in one of the departments the two awards may be made in the other department. Awarded by the Faculty of Graduate Studies and Research on the recommendation of the Chairmen of the Departments of Mining and Metallurgical Engineering, to whom applications should be made before February 1.

WADDELL LOAN FUND. — Loans from this fund, founded by J. B. Waddell, may be made to graduates and undergraduates in any Department of Engineering. Apply to the Student Aid Office.

3.1.5 OPEN TO GRADUATES IN LAW ONLY

INSTITUTE OF AIR AND SPACE LAW SCHOLARSHIPS AND FELLOWSHIPS — These may be available at a value of $1,750 to $2,500. Candidates must hold a law degree of high standing from an approved law school or must have equivalent professional standing. Apply to the Institute of Air & Space Law for further information before February 1.

3.1.6 OPEN TO GRADUATE STUDENTS IN MANAGEMENT ONLY

GOVERNMENT OF QUEBEC GRADUATE SCHOLARSHIPS. Competition is open only to Canadian citizens and to those who may certify that they are landed immigrants and that they have been residing in Quebec for one year at the time of their application. Type 2B — M.B.A. Scholarships (Jeunes Administrateurs). 50 scholarships available, valued at up to $6,000 for single students and up to $8,000 for married students, tenable for a period of 12 months. Applicant must hold a first university degree with two years of full-time experience in Quebec in some executive capacity in the field of industry, commerce or business or possess training or experience recognized as equivalent. Apply to the Student Aid Office, F. Cyril James (Administration) Building, McGill University, before January 15. Completed application forms must be returned to the Student Aid Office no later than January 31.

H. E. HERSCHORN GRADUATE SCHOLARSHIP. — Established in 1965, covering the amount of the current tuition fees and tenable by a student entering either the First or the Second year of the M.B.A. program. Apply to the Dean of the Faculty of Management.

McGILL ASSOCIATES GRADUATE FELLOWSHIPS IN MANAGEMENT. — Established by the McGill Associates, a group of Montreal business and professional men interested in the University, to ensure that the graduate degree program of the McGill Faculty of Management continues to attract students of a high academic and professional calibre. A number of fellowships are available, each with an annual value of up to $3,600 for students at the Master's level. This amount may be increased in the case of students proceeding to a doctoral degree. These fellowships are open to students registered in any postgraduate degree program of the Faculty of Management. Apply to the Dean of the Faculty of Management before May 1.

RODGIE McLAGAN FELLOWSHIPS IN MANAGEMENT. — Two fellowships of $1,500 each have been established by Canada Steamship Lines for graduate study in management. Apply by letter to the Dean of the Faculty of Management before May 1.

SEAGRAM BUSINESS FELLOWSHIPS OF THE SAMUEL BRONFMAN FOUNDATION. — Eight Type A awards of $1,000 are given annually by this foundation to first or qualifying year students enrolled in a Master's degree program. Eligibility is limited to Canadian citizens. Applicants for first year fellowships may apply directly to: Professor Jean-Paul Sallenave,

Awards Chairman, Canadian Association of Administrative Sciences, Faculty of Administration, Sherbrooke University, Sherbrooke, Quebec. Completed applications must be received before May 18.

Four Type B fellowships of $1,600 are given annually by this foundation to students in their final year of a Master's program or in any year of a Doctoral program. Eligibility is limited to Canadian citizens. Applications are submitted on behalf of candidates by the Dean of the Faculty of Management and interested students should contact him before March 1.

SOCIETY OF INDUSTRIAL ACCOUNTANTS OF CANADA BUSINESS FELLOWSHIPS. — Five fellowships of $1,200 each are available annually to students enrolled in a graduate business program at Canadian universities. Awards are to be granted to students whose program indicates an interest in Management Accounting and Accounting Research. Apply before April 1 to: Administrative Secretary, Fellowships Selection Committee, Society of Industrial Accountants of Canada, P.O. Box 176, 154 Main Street East, Hamilton, Ontario.

XEROX OF CANADA LIMITED FELLOWSHIP IN MANAGEMENT. — Value $2,000, established as a centennial project by Xerox of Canada Limited to encourage management studies at the graduate level. Open to students in the M.B.A. program and awarded by the Scholarships Committee of the Faculty of Management. Apply to the Dean of the Faculty of Management before May 1.

3.1.7 OPEN TO GRADUATES IN MEDICINE ONLY

A. A. BROWNE MEMORIAL FUND. — This fund of $10,000 is used either for a fellowship to be known as the "A. A. Browne Memorial Fellowship," or for a grant to a department to provide technical assistance, equipment, and supplies for medical research. The fellowship is open to graduates of any recognized medical school and is for the advancement of medical science, especially in Obstetrics and Gynaecology. Apply to the Secretary of the Faculty of Medicine.

JAMES COOPER ENDOWMENT FOR THE STUDY AND TEACHING OF INTERNAL MEDICINE. — The income from a bequest by the late James Cooper is used for fellowships or for grants to departments to provide technical assistance, equipment, and supplies for medical research.

JAMES DOUGLAS FELLOWSHIP IN PATHOLOGY. — The income from a donation of $25,000 by the late Dr. James Douglas, is devoted to co-ordinated research in the laboratories of pathology in or associated with the University.

BLANCHE HUTCHINSON RESEARCH FUND. — The income from a bequest from the late Mrs. Frank L. Hutchinson is used for fellowships or for grants to departments to provide technical assistance, equipment, and supplies for medical research.

RICHARD COLLIER FitzGERALD FUND. — The income from a bequest by the late Mr. Frederick D. FitzGerald is used for fellowships or for grants to departments to provide technical assistance, equipment and supplies for medical research, especially on the subject of cancer.

PERCY HERMANT FELLOWSHIPS IN OPHTHALMOLOGY. — These fellowships of $2,000 each have been established by Mr. Percy Hermant. Normally two are awarded each year. Candidates must be graduates in Medicine of McGill or other approved medical schools, must be commencing the study of Ophthalmology at McGill and must be planning to practise this specialty in Canada. Apply to the Chairman, Department of Ophthalmology, McGill University.

JAMES O. MEADOWS AND MARIA MEADOWS AWARDS. — A bequest of $200,000 from the late Dame Maria Cowan Meadows to establish awards for undergraduates or graduates in the Faculty of Medicine for the purpose of supporting research. Preference will be given to candidates working in the field of Cancer Research, but worthy candidates working in other areas of medical or surgical research will also be considered. Apply to the Dean of the Faculty of Medicine.

GEORGE W. MERCK MEMORIAL LOAN FUND. — Established in 1960 to provide loans up to $600 to graduates of any approved medical school who are internes or residents in one of the McGill teaching hospitals. Apply to the Director of the hospital who will submit applications to the Dean of the Faculty of Medicine.

H. W. MOLSON FELLOWSHIP IN CANCER RESEARCH. — Value not less than $1,000, renewable for not more than four years, and open to graduates of any recognized medical school. The course of training and research will be decided by the Strathcona Professor of Pathology and the Professor of Obstetrics and Gynaecology, and will ordinarily comprise one or more years of study in the Pathological Institute followed by clinical research in the Royal Victoria Hospital. Apply to the Dean of the Faculty of Medicine.

FELLOWSHIPS IN NEUROLOGY, NEUROPATHOLOGY, AND NEUROSURGERY. — A limited number of fellowships may be available in the Montreal Neurological Institute, to which inquiries should be directed.

IZAAK WALTON KILLAM SCHOLARSHIPS. — Established in 1966 by a generous bequest to the Montreal Neurological Institute by the will of the late Mrs. Dorothy Killam, for advanced study

in the fields of Neurology, Neurosurgery and the related basic disciplines. Open to all, but preference given to Canadians and scientists planning to immigrate to Canada. Value $4,000-$8,000 depending on the candidate's qualifications. Apply in writing to the Director of the Montreal Neurological Institute by March 1.

SIR EDWARD W. BEATTY MEMORIAL SCHOLARSHIPS FOR MEDICAL STUDENTS. — A fund of $100,000 was bequeathed by the late Dr. Henry Albert Beatty, the income from which provides two scholarships, not necessarily of equal value, awarded annually to students of either sex and of any nationality. Open to (i) students registered in the McGill Faculty of Medicine as candidates for the M.D.,C.M. degree, (ii) graduates of an accredited Faculty of Medicine registered for postgraduate degrees, (iii) graduates of an accredited Faculty of Medicine registered for a postgraduate diploma in a clinical specialty, (iv) graduates of an accredited Faculty of Medicine who are employed in a year of research as part of their residency training program. For students who hold or are working towards the McGill M.D.,C.M. the award may be held at any approved institution in Canada or abroad. For other qualified students the award must be held at McGill. The holder is expected to devote his year of tenure either to research or to some form of special training excluding the normal training towards the M.D.,C.M. and excluding any of the years of residency training required in the Diploma courses. Awarded by the Faculty of Medicine but not unless suitable candidates present themselves. Apply to the Dean's Office on the forms provided for this purpose on or before February 1 of the year in which the scholarship is to commence.

JEANNETTE AND ABRAM VICTOR MEMORIAL SCHOLARSHIP. — Of the approximate value of $550, open to graduates of any approved medical school and who are principally engaged in research upon the physiology of the heart, or its diseases. The scholar may hold another award or position. Apply to the Secretary of the Faculty of Medicine by February 1.

JOSEPH SCHUBERT MEMORIAL SCHOLARSHIP. — The terms of this award of the approximate value of $450 are similar to those of the Jeannette and Abram Victor Memorial Scholarship.

SAMUEL LUPOVICH MEMORIAL SCHOLARSHIP. — Of the approximate value of $400, open to graduates of any approved medical school and who are principally engaged in research upon the physiology of the blood, or its diseases. Apply to the Secretary of the Faculty of Medicine by February 1.

JOSEPH McABBIE SCHOLARSHIP. — $1,000, established by a bequest from the late Joseph McAbbie for research on asthma and asthmatic bronchitis. Apply to the Secretary of the Faculty of Medicine by February 1.

CORINNE FAY TABAC MEMORIAL AWARD IN MEDICINE. — Established by the family and friends of the late Corinne Fay Tabac, in her memory, for the support of established investigators doing research closely allied to the study of Hodgkins Disease. Awarded annually by the Postgraduate Awards Committee of the Faculty of Medicine.

DR. MILTON C. AND NINA E. WILSON AWARD. — Established in 1970 by bequest from the late Dr. Milton C. Wilson, the annual income to be available for the support of undergraduate or postgraduate students in the Faculty of Medicine who are in need of financial assistance. Awarded by the Dean of Medicine.

HIRAM N. VINEBERG RESEARCH FUND. — The income from a bequest by the late Dr. Hiram N. Vineberg to be used for fellowships or for grants to departments to provide technical assistance, equipment and supplies for medical research.

IRMA H. BAUER RESEARCH FUND. — The income from a bequest by the late Irma H. Bauer to be used for research in the field of epilepsy.

3.1.8 OPEN TO GRADUATES IN RELIGIOUS STUDIES ONLY

SAMUEL FINLEY MEMORIAL BURSARY. — Usually $150, available to a student enrolled in the Faculty of Graduate Studies and Research who is pursuing advanced studies in religion or theology, awarded at the discretion of the Dean of Religious Studies.

3.2 FELLOWSHIPS AND SCHOLARSHIPS TENABLE AT McGILL UNIVERSITY OR ELSEWHERE

3.2.1 OPEN TO GRADUATES IN TWO OR MORE FACULTIES

GULF OIL CANADA LIMITED GRADUATE FELLOWSHIPS. — Nine fellowships of $3,500 each, plus $1,000 for research expenses. Candidates must be Canadian citizens or landed immigrants who are graduates of institutions which are members of the Association of Universities and Colleges of Canada, and are tenable at any such university. Awarded to candidates in engineering, chemistry, physics, mathematics, computer sciences, geology, geophysics, and

any related sciences, business and management studies, and ecologically-oriented studies. Apply to the Director of Awards, Association of Universities and Colleges of Canada, 151 Slater St., Ottawa, Ont. K1P 5N1. Completed applications must reach the Director before March 1.

BELL CANADA CENTENNIAL FELLOWSHIPS. — Up to a total of eight graduate fellowships in the amount of $3,500 to Fellow and $1,500 to University (Fellow's tuition fees will be paid out of the $1,500) will be given annually; four of which will be new awards. Candidates must be Canadian citizens or must have held landed immigrant status for one year prior to submitting an application. Applicants must be graduates of a university or college with standards accepted by the A.U.C.C. The field of study is unrestricted, but preference will be given to subject areas relevant to the scientific, political, social or economic needs of Canada. On completion of the fellowship, three copies of a thesis or reasonably detailed account of the work done should be sent to the Director of Awards, A.U.C.C., who in turn will forward two copies to Bell Canada. Apply before March 1 to Director of Awards, A.U.C.C., 151 Slater Street, Ottawa, Ont. K1P 5N1.

GEORGE A. CALLBECK SCHOLARSHIP. — $3,000 offered by the Canadian National Silver Fox Breeders' Association for research and preparation of a thesis on the History of the Silver Fox Industry in Canada. Open to graduate students with a degree in Agriculture or Economics from Canadian universities. Apply to Chairmen of Departments of Agriculture or Economics. For further information apply to Mr. L. K. Lockerby, Canadian National Silver Fox Breeders Association, Summerside, P.E.I.

CENTRAL MORTGAGE AND HOUSING CORPORATION GRADUATE FELLOWSHIPS. — Fellowship stipends are $3,000 plus tuition fees for students proceeding to a master's degree and $4,000 plus tuition fees for post-master's candidates proceeding to a doctoral degree. Tenable in a broad range of fields involved in understanding and dealing with urban regional environment. Candidates must be recommended by the University and must be Canadian citizens or landed immigrants in Canada. Application forms and information are available from Administrator, Advisory Group, Central Mortgage and Housing Corporation, Ottawa. Deadline dates: March 1 for study at Canadian universities and April 1 for study at universities outside Canada.

CHEVRON STANDARD LIMITED GRADUATE FELLOWSHIPS. — Five fellowships of $1,000 each tenable at Canadian universities for one year in the fields of Geological Sciences or Geophysics by male Canadian students. Apply to the Fellowships Office of the Faculty of Graduate Studies and Research. Completed forms should be returned to Chevron Ltd. before March 31.

COMMONWEALTH SCHOLARSHIP AND FELLOWSHIP PLAN. — Provides opportunities for Commonwealth students to pursue advanced courses in other Commonwealth countries. Intended for men and women of high intellectual promise who may be expected to make a significant contribution to their own countries on their return from study abroad. At present, graduate scholarships are available for study in the United Kingdom, Australia, New Zealand, Hong Kong, Malaysia, Malta, India, Ceylon, Tanzania, Nigeria, Pakistan, Ghana, Jamaica and Sierra Leone, and the Canadian Government offers scholarships for other Commonwealth students to study in Canada. Awards are normally made for two academic years and cover return transportation, tuition fees, personal maintenance allowance, and a grant for incidental expenses. Deadline dates for receipt of applications vary according to each country. Full information and application forms may be obtained from the Association of Universities and Colleges of Canada, 151 Slater St., Ottawa, Ont. K1P 5N1.

McGILL DELTA UPSILON MEMORIAL SCHOLARSHIP. — Present value $3,000. Founded by the McGill Chapter of the Delta Upsilon Fraternity in memory of its members who gave their lives in the Boer War, the Great War of 1914-18, and the Second World War of 1939-45. Open to graduates of McGill University in all faculties and tenable for graduate study at any recognized university. Applications should be made by letter to the Secretary, University Scholarships Committee, Scholarships Office, by April 1. Letter must include details of qualifications; plans for graduate study, financial need, intended future career; and the names of two professors to whom the Selection Committee members may refer for recommendations. The usefulness to the community of the proposed studies, and the likelihood that the candidate will reflect credit on the University, will be taken into consideration.

HAROLD H. HELM FELLOWSHIPS. — Tenable during 1975-76 by men who hold a Bachelor's degree from McGill and are registered in any Department of the Graduate Faculty of Princeton University. In alternate years tenable at McGill by a Princeton graduate. Non-renewable. Value $1,400 plus fees. McGill students apply in writing to the Dean of the Graduate School at Princeton; Princeton students apply similarly to the Dean of the Graduate Faculty at McGill, in each case before February 1.

IMPERIAL OIL GRADUATE RESEARCH FELLOWSHIPS. — Five fellowships of $3,000, renewable up to three years, offered by Imperial Oil Limited to graduates of approved Canadian universities for research leading towards a Doctor's degree at any approved university in the following fields:

Pure and Applied Natural and/or Exact Sciences, including Mathematics:
Three fellowships.

Social Sciences and Humanities:
Two fellowships.

Applications are forwarded by the University at which the undergraduate course was followed, and application forms can be obtained from the Fellowships Office, Faculty of Graduate Studies and Research. Completed applications must be submitted to the Secretary, Committee on Higher Education, Imperial Oil Limited, 111 St. Clair Avenue West, Toronto 7, Ontario, not later than February 1.

INTERNATIONAL NICKEL OF CANADA FELLOWSHIPS. — Awards of $3,800 (plus $700 for research expenses) renewable up to three years, and open in the fields of Metallurgy, Mining, Geology, and the Chemistry and Physics of Metals. Applications are made by the professor directing the research, and should reach the Dean of the Graduate Faculty by January 1.

NATIONAL CANCER INSTITUTE RESEARCH FELLOWSHIPS. — Fellowships from $3,500 to $8,000, plus allowance for dependent children, normally tenable in Canada, are offered in the field of cancer research to men or women graduates of approved universities. Apply on official forms to the National Cancer Institute of Canada, 25 Adelaide St. E., Toronto 1, Ont., by December 15.

NATIONAL RESEARCH COUNCIL SCHOLARSHIPS. — Scholarships of the value of $4,050 are awarded by the National Research Council to highly qualified honours graduates and graduate students for study and research in the Natural Sciences (Biological & Physical), Mathematics, Engineering, Experimental Psychology and the basic sciences in Agriculture. Available for Canadian citizens and landed immigrants who have completed one year of study at a Canadian university at the time of application. Application forms available from departments and the Graduate Faculty, to be sent to the Faculty of Graduate Studies and Research. Applications must be made before December 1. These awards are normally tenable in Canada only but under special circumstances may be used in other countries. The awards are renewable for a second year and subsequent years. For further information apply to the Fellowships Office of the Faculty of Graduate Studies and Research.

NORANDA GRADUATE RESEARCH FELLOWSHIPS. — Awards of $4,000 (plus $1,000 for equipment and other expenses) renewable up to three years, and open in the fields of Mining, Mineral Engineering, Extractive Metallurgy, Chemical Engineering, Electrochemistry, Inorganic Chemistry, Physical Metallurgy, and Materials Science. Application should be made through the appropriate university department to the Director of Research and Development, Noranda Research Centre, 240 Hymus Boulevard, Pointe Claire, Quebec, not later than April 1. Recipients of Fellowships will be notified by May 1. Preference will be given to Canadian citizens.

BANK OF NOVA SCOTIA BILINGUAL EXCHANGE SCHOLARSHIPS. — Six annual one-year undergraduate and graduate awards are available, three to French-speaking candidates and three to English-speaking candidates. Undergraduate awards are for $1,500 tenable in the second to last year of a first university degree program. Graduate awards are for $3,000 and graduate students will be expected to outline their proposed programs of study. English-speaking winners may attend any Canadian French-speaking university or college and French-speaking winners may attend any Canadian English-speaking university or college provided it is a member, or federated with, or affiliated to, a member of the Association of Universities and Colleges of Canada. Apply to Director of Awards, Association of Universities and Colleges of Canada, 151 Slater St., Ottawa, Ont. K1P 5N1. Completed applications must be sent to the above address to arrive not later than March 1.

PROVINCE OF QUEBEC DEPARTMENT OF NATURAL RESOURCES SCHOLARSHIPS. — Open to Canadian citizens, resident in Quebec for the five preceding years, pursuing postgraduate courses in hydraulics, hydro-electricity, hydrology or meteorology. Candidates must submit proof of admission to the institution at which they wish to study. Value $1,500. Renewable. Apply before May 1 to the Secretary, Scholarships Committee, Quebec Department of Natural Resources, Parliament Buildings, Quebec, Que.

PROVINCE OF QUEBEC DEPARTMENT OF NATURAL RESOURCES, MINERAL INDUSTRY BURSARIES. — Open to Canadian citizens resident in Quebec during the 5 preceding years, and

following postgraduate courses in Geological Sciences, Mining, or Metallurgy. Amount awarded varies from year to year. Application forms and instructions available from Scholarships Committee, 1620, Boulevard de l'Entente, Quebec City. Deadline variable, about February 1.

PROVINCE OF QUEBEC POSTGRADUATE SCHOLARSHIPS. — Value varies from an honorary award of $100 to a maximum of $3,500, available for students pursuing graduate work in the arts, sciences, or technology, in Canada or elsewhere. Open to men and women who have resided in the Province of Quebec for at least one year. Completed new application forms must reach the Department of Education, Postgraduate Scholarships Service, Parliament Buildings, Quebec 4, Que., before December 31 and renewal applications by February 15.

SEAGRAM BUSINESS FELLOWSHIPS OF THE SAMUEL BRONFMAN FOUNDATION. — Eight Type A awards of $1,000 are given annually by this foundation to first or qualifying year students enrolled in a Master's degree program. Eligibility is limited to Canadian citizens. Applicants for first year fellowships may apply directly to: Professor Jean-Paul Sallenave, Awards Chairman, Canadian Association of Administrative Sciences, Faculty of Administration, Sherbrooke University, Sherbrooke, Quebec. Completed applications must be received before May 18.

Four Type B fellowships of $1,600 are given annually by this foundation to students in their final year of a Master's program or in any year of a Doctoral program. Eligibility is limited to Canadian citizens. Applications are submitted on behalf of candidates by the Dean of the Faculty of Management and interested students should contact him before March 1.

SOCIETY OF INDUSTRIAL ACCOUNTANTS OF CANADA BUSINESS FELLOWSHIPS. — Five fellowships of $1,200 each are available annually to students enrolled in a graduate business program at Canadian universities. Awards are to be granted to students whose program indicates an interest in Management Accounting and Accounting Research. Apply before April 1 to: Administrative Secretary, Fellowships Selection Committee, Society of Industrial Accountants of Canada, P.O. Box 176, 154 Main Street East, Hamilton, Ontario.

WALTER C. SUMNER MEMORIAL FELLOWSHIPS. — Awards of $4,000 to $5,000 are available to doctoral candidates in the fields of Chemistry, Physics, or Electronics, who are in full time attendance at Dalhousie University, University of Toronto, McGill University, University of Saskatchewan, University of British Columbia, or Queens University. May be held for up to two years. An applicant must hold a degree from a recognized Canadian university other than the university where doctoral studies and research will be carried on, must be a Canadian citizen, and must be domiciled in one of the provinces of Canada. Applications to be made to the Walter C. Sumner Foundation through the university at which doctoral studies and research will be carried on. Further details and application forms may be obtained from the Faculty of Graduate Studies and Research.

3.2.2 OPEN TO GRADUATES IN ARTS OR SCIENCE

CANADA COUNCIL SCHOLARSHIPS AND FELLOWSHIPS. — The Canada Council offers (a) fellowships of $3,500 plus travel allowance, for study leading to a Doctor's degree, in Canada or elsewhere, (b) senior fellowships of $4,500 plus travel allowance, for established scholars and teachers for study outside Canada, (c) scholarships up to $5,500 for secondary schoolteachers seeking further training, etc., (d) non-resident fellowships with a maximum value of $5,000 plus travel allowance for study in Canada. Short-term grants in aid of research are also available to postdoctoral scholars and other senior members of university staffs. All these awards are restricted to the humanities and social sciences, and also to residents in Canada or Canadians abroad. Application forms and further information may be obtained from Departments and the Graduate Faculty as well as the Secretary, The Canada Council, P.O. Box 1047, Ottawa, Ontario K1P 5V8. The deadline for receiving applications in Ottawa differs in the various categories but in most cases is December 15 and can be as early as October 1.

ALLEN OLIVER FELLOWSHIP IN ECONOMICS. — Present value about $1,000. Established by Mrs. Frank Oliver, of Edmonton, Alta., in "proud and loving memory of her son, the late Allen Oliver, M.C., B.A., Lieutenant, 26th Battery, C.F.A., who was killed in action at the Somme on November 18, 1916." Lieutenant Oliver was an honour graduate in 1915 in the Department of Economics and Political Science. Awarded to the student who stands highest in first class honours in the Departments of Economics and Political Science at the final B.A. examination, and the holder is required to pursue his studies in Economics and Political Science at McGill or elsewhere. No application is required.

DOW-HICKSON FELLOWSHIP IN THEORETICAL PHILOSOPHY. — Endowed by the late Professor J. W. A. Hickson. Minimum value $1,750, with maximum (in special cases) of $2,750. Tenable by a graduate of any approved university proceeding to a higher degree in Theoretical Philosophy (Metaphysics, Epistemology, Logic, History of Philosophy) at McGill, or by a McGill graduate pursuing such studies elsewhere. The holder may apply for a second year

of tenure. Apply to the Dean of the Graduate Faculty through the Philosophy Department before February 1.

DOW-HICKSON FELLOWSHIP IN PHYSICS. — Endowed by the late Professor J. W. A. Hickson. Minimum value $1,750, with maximum (in special cases) of $2,750. Tenable by a graduate of any approved university proceeding to a higher degree in any branch of Physics at McGill, or by a McGill graduate pursuing such studies elsewhere. The holder may apply for a second year of tenure. Apply to the Dean of the Graduate Faculty through the Physics Department before February 1.

EMILE LAMOUREUX MEMORIAL BURSARY, MONTREAL ANGLERS AND HUNTERS INC. — $300, open to graduate students in wildlife biology at Université de Montréal, Sir George Williams University, Université du Québec à Montréal, McGill University and/or Macdonald College. Application forms may be obtained from the Secretary, Montreal Anglers and Hunters Inc., 6424 St. Denis, Montreal and must be submitted by April 1.

3.2.3 OPEN TO STUDENTS IN EDUCATION ONLY

SPECIAL GRADUATE SCHOLARSHIPS. — The Department of Education, Quebec, awards competitive scholarships of $1,200 per year to students of high academic standing who are prepared to enrol in a three-year program leading to a Class I Teaching Diploma and an M.A. in education or in a subject which is taught in school. Apply to the Student Aid Service, Parliament Buildings, Quebec, P.Q.

3.2.4 OPEN TO GRADUATES IN ENGINEERING ONLY

SHELL CANADA FELLOWSHIPS IN ENGINEERING. — Maximum value $4,500. Shell Canada Limited is offering a number of fellowships for postgraduate study and research, tenable at any Canadian university, in the following fields: Chemical, Civil, Electrical, Geological, Mechanical, Metallurgical, Mining and Petroleum Engineering, and Engineering Physics. Available to Canadian citizens or landed immigrants, under 25 years of age, who have completed with high honours a first degree in engineering and have completed, or expect to complete during the current academic year, at last one year of postgraduate research in one of the specified fields and who plan to complete a doctorate in Canada. In exceptional cases, graduates of Canadian universities may be considered without having carried out a year of postgraduate study. Applications should be submitted by January 15. Application forms may be obtained from the Fellowships Office of the Graduate Faculty.

STEEL COMPANY OF CANADA, LIMITED GRADUATE RESEARCH FELLOWSHIPS IN METALLURGY. — Four fellowships of $5,000 for metallurgical research in Canadian universities are granted each year, $4,000 to the winner and $1,000 to the university attended. Candidates must be Canadian citizens or have held landed immigrants status for one year prior to submitting application, and must be graduates of a Canadian university or college which is a member of the Association of Universities and Colleges of Canada. Apply to the Association of Universities and Colleges of Canada, 151 Slater St., Ottawa, Ont. K1P 5N1. Completed forms must arrive at the above address before March 1.

3.2.5 OPEN TO GRADUATES IN LAW ONLY

EDWIN BOTSFORD BUSTEED SCHOLARSHIP. — Value approximately $750 and can be used to supplement funds for graduate studies already received from other sources. Bequeathed by the late Mrs. Edwin Botsford Busteed in memory of her husband, Edwin Botsford Busteed, K.C., B.A., B.C.L. Awarded by the Law Faculty to an applicant, for graduate research on some subject connected with the law of Quebec and approved by the Faculty.

3.2.6 OPEN TO GRADUATES IN MEDICINE ONLY

SIR EDWARD W. BEATTY MEMORIAL SCHOLARSHIPS FOR MEDICAL STUDENTS. — A fund of $100,000 was bequeathed by the late Dr. Henry Albert Beatty, the income from which provides two scholarships, not necessarily of equal value, awarded annually to students of either sex and of any nationality. Open to (i) students registered in the McGill Faculty of Medicine as candidates for the M.D.,C.M. degree, (ii) graduates of an accredited Faculty of Medicine registered for postgraduate degrees, (iii) graduates of an accredited Faculty of Medicine registered for a postgraduate diploma in a clinical specialty, (iv) graduates of an accredited Faculty of Medicine who are employed in a year of research as part of their residency training program. For students who hold or are working towards the McGill M.D.,C.M. the award may be held at any approved institution in Canada or abroad. For other qualified students the award must be held at McGill. The holder is expected to devote his year of tenure either to research or to some form of special training excluding the normal training towards the M.D.,C.M. and excluding any of the years of residency training required in the Diploma courses. Awarded by the Faculty of Medicine but not unless suitable candidates present themselves. Apply to the Dean's Office on the forms provided for this purpose on or before February 1 of the year in which the scholarship is to commence.

G. RUTHERFURD CAVERHILL FELLOWSHIP IN MEDICINE. — A fellowship of variable value to assist demobilized medical officers to obtain postgraduate training in medicine or research experience. Preference given to McGill graduates. Inquire of the Dean of the Faculty of Medicine.

JOHN McCRAE FELLOWSHIP. — Approximate value of $1,800, for: (1) Graduates of any approved medical school who are candidates for the Diploma in Surgery, Urology, Otolaryngology, Radiology, etc., or (2) McGill graduates in Medicine, or (3) graduates of any approved medical school proceeding towards a McGill M.Sc. or Ph.D. in fields related to Surgery, etc. In all cases the holder is expected to spend twelve months in full-time laboratory or clinical research at McGill or an approved institution elsewhere. Apply to the Dean of the Faculty of Medicine not later than April 1, with a letter of recommendation from a member of the teaching staff, transcript of the undergraduate record, and description of the proposed research naming the institution selected and its director. Tenure should commence not earlier than June nor later than October; a final report on the work done is required. In all cases preference is given to candidates aiming at a course in Surgery and to researches likely to contribute to Surgery and its branches.

OSLER MEMORIAL SCHOLARSHIP. — Awarded by the Canadian Medical Association as funds permit to a candidate nominated by the Faculty of Medicine "in order that such candidate may pursue studies to advance the knowledge of medicine and to improve the teaching of clinical medicine." Candidates must be graduates of not more than ten years' standing and, other things being equal, preference is given to McGill graduates.

GORDON PHILLIPS FUND FOR RESEARCH IN CARDIOVASCULAR DISEASES. — This fund provides a scholarship of not less than $1,600, open to graduates in Medicine of any approved medical school regardless of sex, race or religion. Awards to McGill graduates in Medicine may be held at McGill or at any other approved institution. Awards made to other graduates in Medicine must be held at McGill University. Apply to the Secretary of the Faculty of Medicine by February 1.

3.3. FELLOWSHIPS AND SCHOLARSHIPS TENABLE AT OTHER UNIVERSITIES ONLY

See also Section 3.2.

3.3.1 OPEN TO GRADUATES IN SEVERAL FACULTIES

CULTURAL AGREEMENT FRANCE-CANADA GRADUATE SCHOLARSHIPS. — These scholarships are offered by the Government of France and are unrestricted as to field of study and are tenable in France. Value, 500 French francs per month (possibly up to 750 French francs per month for Ph.D. candidates), plus return economy air fare and refund for medical, dental, hospital and pharmaceutical expenses and various indemnities towards lodging, relevant travel expenses, thesis typing expenses, free tuition and the benefit of students privileges (university restaurants, residences, cultural and social activities). No funds are available for dependents. Open to Canadian citizens or to those who have held landed immigrant status for at least one year prior to submitting application. A good knowledge of French is essential. For further information apply to: Director of Awards, Association of Universities and Colleges of Canada, 151 Slater Street, Ottawa, Ont. K1P 5N1. Closing date for receipt of applications is December 31.

FRANCE QUEBEC EXCHANGE PROGRAM.—

Scholarships offered to Quebec Graduate Students:

The French Government offers scholarships to Quebec graduate students who wish to study in France. Preference is given to students specializing in the following areas: pure and applied science, economics, town planning, and the teaching of French, although candidates from other disciplines can apply as well. The amount of the scholarship is 1,500F (approximately $300) a month and is offered for a nine-month period. The scholarship is renewable upon request. Travelling expenses are also covered.

Information and application forms are available at the French Consulate in Montreal. Application forms must be returned to the French Consulate by January 15, 1974. (Consulat général de France, Place Bonaventure, Etage E, 2 rue Elysée; Tel.: 878-4381.)

Placement of Graduate Students in French Research Centres:

The purpose of this project is to send Quebec graduate students to France for a year as research assistants in order to familiarize them with French laboratories and research centres. Students should be registered in a Quebec university and pursuing a Ph.D. program, *preferably* in one of the following areas: pure sciences, applied sciences, management and administra-

tion, and economics. Candidates with a strong case from other areas are also invited to submit an application.

Application forms and further information are available from the Fellowships Office of the Faculty of Graduate Studies and Research. The deadline for submitting an application is January 31, 1974.

ROTARY FOUNDATION FELLOWSHIP. — Approximately $4,000. The Rotary Foundation of Montreal, District 704, offers a Graduate Fellowship for study abroad each year. Requirements for candidates (male or female) are: bachelor's degree or equivalent, age 20-28 inclusive, may be married. The award covers round trip transportation, room and board, tuition and miscellaneous related expenses for one academic year. Preference is given to applicants who wish to study in a country where the native language is different from their own. For further information and application forms, write to the Rotary Club of Montreal, Queen Elizabeth Hotel, Suite 373, Montreal, Que. H3B 1X8. Date limit for receiving applications is March 1.

ROYAL COMMISSION FOR THE EXHIBITION OF 1851 OVERSEAS SCIENCE RESEARCH SCHOLARSHIPS. — Value £900 per annum, plus £100 a year to cover University fees. Tenable for two or exceptionally, three years, to enable students to devote themselves to research work under conditions most likely to equip them for practical service in the scientific life of the Commonwealth. The holder must devote himself to a field of research approved by the Commissioners. Three scholarships, tenable at any institution approved by the Commission (usually universities in the United Kingdom), are allotted to Canada each year, the scholars being chosen by the Commission from nominees of certain universities, including McGill. Candidates will in most cases have completed from one to three years of postgraduate study and must present evidence of accomplishment in research, either published papers or typewritten reports or theses. Candidates should apply, not later than February 15, through the Chairman of their Department. Further details may be obtained from the Fellowships Office, Faculty of Graduate Studies and Research.

POSTGRADUATE SCHOLARSHIPS GRANTED BY THE I.O.D.E. — The I.O.D.E. has established First and Second War Memorial Scholarships in order to perpetuate the memory of the men and women who gave their lives in World Wars I and II. Four scholarships are offered annually to enable students to carry on studies in History, Economics, Constitutional Government or any subject vital to the interests of the Commonwealth and six scholarships are offered for studies in the Humanities. These ten awards are tenable in any university in Great Britain or in any part of the Commonwealth and are valued at $5,000 each. Scholarships tenable in a university in Canada are valued at $3,000 each. Candidates must be Canadian citizens holding a degree from a recognized university or degree-granting college in Canada and *must have done, or be doing postgraduate work* and be or have been registered in a Graduate Shcool.

For full details apply to the Fellowships Office, Faculty of Graduate Studies and Research. Applications must be submitted by November 15.

RHODES SCHOLARSHIPS. — Approximately £1,550, represented by a personal allowance of approximately £80 per month and direct payment of University and College fees and dues, for two scholars chosen from the Province of Quebec, tenable for two years at Oxford University. A third year may be granted under certain conditions. Candidates must be British subjects with at least five years domicile in Canada and be between the ages of nineteen and twenty-five. Male students in any faculty may apply. Applications must reach the Secretary of the Provincial Selection Committee before October 25. For further details of tenure, eligibility, and qualifications, and application forms apply to the Fellowships Office, Faculty of Graduate Studies and Research, or the Provincial Secretary, Mr. Michel Venant, 115 Dorchester Blvd. W., Suite 3900, Montreal, Que.

COMMONWEALTH SCHOLARSHIP AND FELLOWSHIP PLAN. (See 2.5.)

GLASGOW EXCHANGE SCHOLARSHIP. — Established to enable a McGill graduate to spend two sessions of postgraduate work at the University of Glasgow and for a graduate of the University of Glasgow to spend two sessions of postgraduate work at McGill. The awards are available for two years and awarded only every second year. Open to degree and non-degree candidates. Glasgow will waive fees for the student from McGill and provide accommodation in a hall of residence plus a small cash award. The value of the award at McGill for the student from Glasgow is $3,000 per annum. An award will be made in April 1975 to a McGill student for the period 1975-77. Application forms for the exchange can be obtained from the Fellowships Office of the Faculty of Graduate Studies and Research.

POST-GRADUATE FELLOWSHIPS

GERMAN ACADEMIC EXCHANGE SERVICE FELLOWSHIPS. — Sixteen fellowships valued at approximately $137 to $220 per month and return travel expenses, as well as free tuition, course fees and university examination fees. Tenable at universities, technical universities, scientific institutions, and academies of art or music in the Federal Republic of West Germany for study in any field except pharmacy, chemical engineering and specialized fields of agricultural research. Candidates must be Canadian citizens, must be university graduates, must have a good knowledge of German, and must not be more than 32 years of age. Applications must be submitted by December 31. For further information, write to: Director of Awards, Association of Universities and Colleges of Canada, 151 Slater Street, Ottawa, Ont. K1P 5N1.

SWISS UNIVERSITY SCHOLARSHIPS. — The Swiss Government offers six scholarships a year for study in Switzerland in any field except Music and Fine Arts and will pay approximately $150 to $175 per month, plus return fare at conclusion of scholarship plus tuition fees, plus health and accident insurance, and generally, a specific amount of study material. Candidates must be Canadian citizens and must have graduated from a recognized university. A good knowledge of either French or German is required. Awards are for 12 months with possibility of renewal. Applications must be submitted by December 31. For further information, write to: Director of Awards, Association of Universities and Colleges of Canada, 151 Slater Street, Ottawa, Ont. K1P 5N1.

CANADIAN FEDERATION OF UNIVERSITY WOMEN'S PROFESSIONAL FELLOWSHIP. — Value $2,500, open to any woman holding a degree from a Canadian University, whose domicile is in Canada (a) who wishes to spend a year at an accredited Library School, School of Social Work, College of Education or similar professional school; or (b) who wishes, after some years or experience in a chosen field or after a lapse of time away from formal study, to embark on a program leading to an advanced degree. One of two Professional Fellowships are awarded. Apply to the Chairman of the Fellowships Committee, c/o Canadian Federation of University Women, Mount Allison University, Box 69, Sackville, N.B. Applications and testimonials must be received before February 1.

CANADIAN FEDERATION OF UNIVERSITY WOMEN — MARGARET McWILLIAMS TRAVELLING FELLOWSHIP. — Value $3,500, open to any woman scholar who holds a Master's Degree or equivalent from a Canadian University, who is already well advanced on her Doctoral Program, and who wishes to continue her work outside of Canada. The candidate must be a resident of Canada but she may be studying elsewhere at the time of application. Apply to the Chairman of the Fellowships Committee, c/o Canadian Federation of University Women, Mount Allison University, Box 69, Sackville, N.B. Applications and testimonials must be received before February 1.

FURTHER AWARDS MADE BY UNIVERSITY WOMEN'S ORGANIZATIONS. — For full information apply to the Chairman of the Fellowships Committee, c/o Canadian Federation of University Women, Mount Allison University, Box 69, Sackville, N.B.

FRANK KNOX FELLOWSHIPS. — Awards of $2,400 plus tuition, tenable at Harvard University in Arts and Sciences, Engineering, Business Administration, Dental Medicine, Design, Divinity, Education, Law, Medicine, Public Administration, and Public Health, by Canadian students, not resident in the U.S.A., graduated or about to graduate from a Canadian university or college at which they have spent at least two of the last four years. Information and application forms are available from the Director of Awards, Association of Universities and Colleges of Canada, 151 Slater St., Ottawa, Ont. K1P 5N1, to whom completed applications must be sent before December 1.

SHASTRI INSTITUTE FELLOWSHIPS. — Two types of fellowships *for research in India* are offered in the humanities and social sciences: (1) Senior Fellowships for established scholars normally resident in Canada (normally for a 12-month period; shorter term grants under this category will also be considered). Value, rupee equivalent of $7,000. (2) Junior Fellowships for qualified graduate students to conduct research as partial fulfilment of the requirements for a doctoral degree in a Canadian institution — value, rupee equivalent of $5,500. Deadline for applications for Junior and Senior Fellowships is November 1. Apply to: The Executive Director, The Shastri Indo-Canadian Institute, 1005 Sherbrooke Street West, McGill University, Montreal 112.

3.3.2 OPEN TO GRADUATES IN ARCHITECTURE

A. F. DUNLOP SCHOLARSHIPS. — Two travelling scholarships, value $1,500 each bequeathed by the late Mrs. Catherine A. Dunlop for students graduating in Architecture. Apply, stating proposed study, localities to be visited and date of departure, to the Director of the School of Architecture before March 31. Selection is made by a Committee of Staff of the School of Architecture.

HUGH McLENNAN MEMORIAL SCHOLARSHIP. — Established by the Hon. John Stewart McLennan, Dr. Francis McLennan and Miss Isabella McLennan in memory of Hugh McLennan, son of the Hon. John Stewart McLennan, killed at the Battle of Ypres in 1915. Value $2,000, awarded to the student graduating in Architecture who has shown the greatest capacity in the solution of

problems and who gives promise of creative ability. Selection is made by a Committee of Staff of the School of Architecture.

3.3.3 OPEN TO GRADUATES IN ARTS OR SCIENCE

MOYSE TRAVELLING SCHOLARSHIPS. — Founded by the late Right Honourable Lord Atholstan, to commemorate the "splendid services of Dr. Charles E. Moyse, for forty-two years Professor of English, during sixteen of which he was Dean of the Faculty of Arts and Vice-Principal of the University." Two scholarships, normally of $2,000 each tenable for one year. One scholarship to be awarded by the Faculty of Arts for distinction in literary subjects and the other by the Faculty of Science for distinction in scientific subjects.

In the absence of applicants of sufficient merit in either of the faculties, applicants from final year students in, or graduates of, other faculties of the University may be considered.

If there is no winner in one of these faculties, both scholarships may be awarded to applicants in the other faculty. Holders must devote the year of tenure to advanced study, preferably in a British or European university, but not to the exclusion of other institutions approved by the Faculty of Arts or of Science. Applications, whether from graduates or from students in the final year of the undergraduate course, should reach the Dean of the Faculty of Arts or of Science not later than April 1. Applications should be accompanied by: (1) an official transcript of the applicant's academic record to date; (2) the names of two referees who are familiar with the applicant's work ; (3) a detailed and comprehensive statement of the applicant's proposed course of study; the institution or centre at which he, or she, proposes to study; (4) a statement of the applicant's age and nationality.

Awards will be made after the results of final examinations in the final year of the undergraduate course have been determined.

GUY DRUMMOND SCHOLARSHIP IN POLITICAL SCIENCE AND ECONOMICS. — Open to men only, originally endowed by the late Guy M. Drummond, awarded to a graduating student in the Faculty of Arts nominated jointly by the Departments of Economics, Political Science and the Department of French Language and Literature, taking into account the student's academic record and the likelihood that he will make a contribution of value to Canadian life. The nominee must be taking the honours course in Political Science or joint honours in Economics and Political Science. The award is made by the Graduate Faculty on the recommendation of departments and cannot be applied for by the candidate. The value is $5,700 plus tuition fees at McGill and such tuition fees in Paris as may be approved by the Faculty of Graduate Studies and Research. $3,500 of this covers a year of study in Paris plus approved tuition fees in Paris and registration fees at McGill, and the remaining $2,200 plus tuition fees a further year at McGill studying for the M.A. degree. In Paris, the holder studies at the Institut d'Etudes Politiques unless he wishes to specialize in Economics rather than Political Science and is permitted by McGill to study at the Sorbonne or at the Institut d'Economie Appliquée.

MACKENZIE KING TRAVELLING SCHOLARSHIPS. — Four or five scholarships of not less than $2,500 each, offered to graduates of any Canadian university who propose to engage, either in the U.S.A. or the United Kingdom, in postgraduate studies in International or Industrial Relations (including international or industrial aspects of Law, History, Politics, Economics). Applicants should be persons of unusual worth and promise. Awards are based on their academic achievement, personal qualities and demonstrated aptitudes, as well as their proposed programs of study. Applications must be submitted by March 1. Further information may be obtained from the Fellowships Office, Faculty of Graduate Studies and Research.

3.3.4 OPEN TO GRADUATES IN LAW

MACDONALD TRAVELLING SCHOLARSHIP. — Value $2,500. Founded by a bequest of the late Sir William Macdonald "for the purpose of enabling English-speaking Law students to take a course of studies in France," the testator "deeming it of great importance that the English-speaking members of the legal profession should be proficient in the French language." The holder is required to pursue a year's study in the Law Faculty of a French university approved by the McGill Faculty of Law. Awarded by the Faculty to a student of the graduating class, proceeding to the Bar, with first or second class honours in the final examination and who would be unable without financial help to spend a year in France. The Faculty interprets the bequest as intending that the scholarship be awarded only to students preparing for practice as advocates in the Province of Quebec. At present the scholarship must be used in the year in which it is awarded.

THOMAS SHEARER STEWART TRAVELLING FELLOWSHIP. — Value $2,500, established in memory of the late Thomas Shearer Stewart, B.A. 1905, B.C.L. 1908, by his widow and family. Awarded annually by the Dean to a recent graduate of the Faculty of Law for studies in Law at a university in Europe or the United Kingdom approved by the Dean. Preference is given to Canadian ctitizens intending to reside in Canada. Apply to the Dean of the Faculty of Law.

3.3.5 FELLOWSHIPS OFFERED BY OTHER UNIVERSITIES

Graduates of McGill University who desire to undertake graduate study elsewhere should note that many universities offer fellowships and scholarships for which they may be eligible. Particulars of many of these may be obtained in the Fellowships Office of the Graduate Faculty. In many cases applications should be prepared not later than the January preceding the session for which the award is made.

3.4 POSTDOCTORAL FELLOWSHIPS

FRANCE-QUEBEC EXCHANGE PROGRAM POSTDOCTORAL FELLOWSHIPS. — Scholarships (2,500 to 3,000F a month) are also offered to Quebec postdoctoral students who wish to pursue their studies and research in France for a period of three to twelve months. Candidates from all disciplines are invited to apply, but preference is given to candidates in the fields of pure and applied science. Travelling expenses to and from France as well as expenses incurred while travelling in France for the purpose of research are assumed by the Quebec Government. Applications are considered four times a year: March 1, June 1, September 1 and December 1. Application forms can be obtained from the Fellowships Office of the Faculty of Graduate Studies and Research.

HAROLD HIBBERT MEMORIAL FELLOWSHIP. — Approximately $6,500 plus travel assistance, tax free, open to candidates who hold a Ph.D. in Chemistry or its equivalent from an approved university. Tenable for one calendar year in the Department of Chemistry at McGill, where the holder must devote his full time to research. Not renewable. Apply in writing to the Chairman of the Department of Chemistry by February 1.

C. D. HOWE MEMORIAL FELLOWSHIP. — Open to Canadian citizens or those normally resident in Canada. Tenable anywhere. Value $5,000 for a single man or $7,000 for a married man, plus travel expenses if applicable. Restricted to persons whose proposed program of research is related to the political, administrative, economic, social or intellectual history of Canada since 1930, and is in some way relevant to an understanding of the public career of the Rt. Honourable C. D. Howe. Apply to Director of Awards, Association of Universities and Colleges of Canada, 151 Slater St., Ottawa, Ont. K1P, 5N1. Completed application forms must reach the Director before November 30.

OTTO MAASS POSTDOCTORAL FELLOWSHIP. — Approximately $6,500 plus travel assistance, tax free, open to candidates who hold a Ph.D. degree in chemistry or physics or equivalent from an approved university. Tenable for one calendar year and renewable for a second in the Physical Chemistry Division of the Pulp and Paper Research Institute of Canada and the Department of Chemistry, where the holder must devote full time to research. Apply to the Chairman, Education Committee, Pulp and Paper Research Institute of Canada.

NATIONAL RESEARCH COUNCIL POSTDOCTORAL OVERSEAS FELLOWSHIPS. — Value $7,400 (single or married with no children) and $8,600 (married with a child or children) for twelve months, available to applicants who have recently completed or expect to complete the requirements for a Doctorate in Science. Open to Canadian citizens normally resident in Canada. Completed applications must reach the Council by January 15.

NUFFIELD FOUNDATION TRAVEL GRANTS. — Awarded in the Natural Sciences, Medical Sciences, Humanities and Social Sciences. Preference will be given to Canadian citizens, although applicants who have resided in Canada a minimum of four years will also be considered. Candidates must be over 35 years of age, hold a doctor's degree and have had subsequent teaching experience. Return economy air fare for grantee and for wife provided she accompanies him for not less than two months, plus £75 per month to assist with living expenses while in United Kingdom (£100 per month if wife accompanies husband). Application forms, obtained from the Director of Awards, Association of Universities and Colleges of Canada, 151 Slater St., Ottawa, Ont. K1P 5N1 should be submitted by January 1 at latest.

3.5 FELLOWSHIPS AND SCHOLARSHIPS OPEN TO GRADUATES OF OTHER INSTITUTIONS FOR STUDY AT McGILL UNIVERSITY

A number of the awards listed in the preceding pages may be held by graduates of other institutions while pursuing graduate study at McGill University; these are listed below.

3.5.1 VARIOUS SUBJECTS

ASSOCIATION OF UNIVERSITIES AND COLLEGES OF CANADA SCHOLARSHIPS.
BANK OF NOVA SCOTIA BILINGUAL EXCHANGE SCHOLARSHIPS.
BELL CANADA CENTENNIAL FELLOWSHIPS.
W. M. BIRKS AWARDS (Religious Studies).
MAX BINZ BURSARIES (Foreign students).
CANADA COUNCIL DOCTORAL FELLOWSHIPS (Social Sciences, Humanities, Mathematics and Music).
CANADIAN FEDERATION OF UNIVERSITY WOMEN FELLOWSHIPS.
CANADIAN INTERNATIONAL DEVELOPMENT AGENCY SCHOLARSHIP.
CENTRAL MORTGAGE AND HOUSING CORPORATION FELLOWSHIPS (Urban studies).
COMMONWEALTH SCHOLARSHIP AND FELLOWSHIP PLAN.
DOW-HICKSON FELLOWSHIP IN THEORETICAL PHILOSOPHY.
DR. W. B. LEWIS PRIZE.
SAMUEL FINLEY MEMORIAL BURSARY (Religious Studies).
FRANCE-CANADA EXCHANGE SCHOLARSHIPS.
FRANCE-QUEBEC EXCHANGE SCHOLARSHIPS.
GLASGOW EXCHANGE SCHOLARSHIP.
GRADUATE FACULTY SUMMER RESEARCH FELLOWSHIPS (Humanities and Social Sciences).
GULF OIL CANADA FELLOWSHIPS (Physical Sciences and Ecological Studies).
HAROLD H. HELM FELLOWSHIP (Princeton Exchange).
HEWITT MEMORIAL BURSARY (Humanities and Social Sciences).
C. D. HOWE MEMORIAL POSTDOCTORAL FELLOWSHIP.
IMPERIAL OIL RESEARCH FELLOWSHIPS (Sciences, Humanities and Social Sciences).
I.O.D.E. POSTGRADUATE SCHOLARSHIPS.
INTERNATIONAL BUSINESS MACHINES FELLOWSHIPS (Computer Science).
MARY KEENAN SCHOLARSHIP (English).
SAMUEL LAPITSKY SCHOLARSHIP (Anthropology and Sociology).
McCONNELL MEMORIAL FELLOWSHIPS.
McGILL DELTA UPSILON MEMORIAL SCHOLARSHIP.
NATIONAL RESEARCH COUNCIL SCHOLARSHIPS.
ISABELLA C. McLENNAN FELLOWSHIP (Women).
PROVINCE OF QUEBEC POSTGRADUATE SCHOLARSHIPS.
ROTARY FOUNDATION FELLOWSHIPS.
SOLVAY FELLOWSHIP.
STEINBERG GRADUATE FELLOWSHIPS.
DAVID STEWART MEMORIAL FELLOWSHIPS (Physical and Biological Sciences).
ARTHUR C. TAGGE FELLOWSHIP (Humanities and Social Sciences).
IRWIN ORRIN VINCENT BURSARY (Classics).

3.5.2 AGRICULTURE

GEORGE A. CALLBECK SCHOLARSHIP.
FRANKI FELLOWSHIP IN SOIL MECHANICS.
WALTER M. STEWART POSTGRADUATE SCHOLARSHIP.
SIR VINCENT MEREDITH FELLOWSHIP.

3.5.3 BIOLOGY

PHILIP CARPENTER FELLOWSHIP.
EMILE LAMOUREUX MEMORIAL BURSARY.
ARTHUR WILLEY MEMORIAL BURSARY.

3.5.4 CHEMISTRY

KIMBERLEY CLARK FELLOWSHIP.
D. S. AND R. H. GOTTESMAN SCHOLARSHIP.
HAROLD HIBBERT MEMORIAL FELLOWSHIP (Postdoctoral).
T. STERRY HUNT SCHOLARSHIP.
INTERNATIONAL NICKEL OF CANADA FELLOWSHIPS.
ALEXANDER McFEE FELLOWSHIP.
COLL McFEE MEMORIAL SCHOLARSHIP.
FRANK L. MITCHELL FELLOWSHIP.
RICHARD T. MOHAN SCHOLARSHIP.
NORANDA RESEARCH FELLOWSHIPS.
OTTO MAASS MEMORIAL FELLOWSHIP.
OTTO MAASS POSTDOCTORAL FELLOWSHIP.
PULP AND PAPER RESEARCH STUDENTSHIP.

POST-GRADUATE FELLOWSHIPS

CLIFFORD B. PURVES FELLOWSHIP.
WALTER C. SUMNER MEMORIAL FELLOWSHIPS.
XEROX FELLOWSHIP.

ECONOMICS AND POLITICAL SCIENCE

3.5.5

BRONFMAN FELLOWSHIPS (Economics).
GEORGE A. CALLBECK SCHOLARSHIPS (Economics).
GUY DRUMMOND SCHOLARSHIP.
ALEXANDER MacKENZIE FELLOWSHIP (Political Science).
ALLEN OLIVER FELLOWSHIP (Economics).

EDUCATION

3.5.6

CANADA COUNCIL DOCTORAL FELLOWSHIPS.
COLL McFEE MEMORIAL SCHOLARSHIP (Chemistry).
IRWIN ORRIN VINCENT BURSARY.

ENGINEERING

3.5.7

ALCAN FELLOWSHIP (Metallurgy).
MAJOR JAMES H. BRACE SCHOLARSHIP.
CHEVRON STANDARD LTD. FELLOWSHIPS (Mining).
SIR WILLIAM DAWSON FELLOWSHIP (Metallurgy).
JAMES DOUGLAS FELLOWSHIP (Mining).
D. S. and R. H. GOTTESMAN SCHOLARSHIP.
GULF OIL CANADA FELLOWSHIPS.
B. J. HARRINGTON BURSARY (Mining)
WILLIAM HENRY HOWARD SCHOLARSHIPS (Metallurgy).
INTERNATIONAL NICKEL OF CANADA FELLOWSHIPS (Mining and Metallurgy).
IRON ORE COMPANY OF CANADA SCHOLARSHIP (Mining).
MIRON FELLOWSHIP (Civil).
FRANK L. MITCHELL FELLOWSHIP (Chemical and Mechanical).
NORANDA RESEARCH FELLOWSHIPS (Chemical, Metallurgical and Mining).
OTTO MAASS MEMORIAL FELLOWSHIPS (Chemical and Mechanical).
JOHN BONSALL PORTER SCHOLARSHIP (Civil, Mechanical and Electrical).
PULP AND PAPER RESEARCH INSTITUTE STUDENTSHIPS (Chemical and Mechanical).
CLIFFORD B. PURVES FELLOWSHIP (Chemical and Mechanical).
QUEBEC IRON AND TITANIUM CORP. FELLOWSHIP (Metallurgy).
PROVINCE OF QUEBEC, DEPARTMENT OF NATURAL RESOURCES BURSARIES (Mining and Metallurgy).
STEEL CO. OF CANADA FELLOWSHIPS (Metallurgy).
WALTER C. SUMNER MEMORIAL FELLOWSHIPS (Electrical).
HORACE G. YOUNG FELLOWSHIP (Mining and Metallurgy).

GEOLOGICAL SCIENCES

3.5.8

CHEVRON STANDARD LTD. FELLOWSHIPS.
GULF OIL CANADA FELLOWSHIPS.
INTERNATIONAL NICKEL OF CANADA FELLOWSHIPS.
LeROY MEMORIAL FELLOWSHIP.
J. B. LYNCH FELLOWSHIP.
PROVINCE OF QUEBEC, DEPARTMENT OF NATURAL RESOURCES BURSARIES.
CARL REINHARDT SCHOLARSHIP.
MAX BINZ BURSARY FOR FOREIGN STUDENTS.
WILLIAM HENRY HOWARD SCHOLARSHIPS.

LAW

3.5.9

EDWIN BOTSFORD BUSTEED SCHOLARSHIP.
CANADA COUNCIL DOCTORAL FELLOWSHIPS.
INSTITUTE OF AIR AND SPACE LAW SCHOLARSHIPS.

LIBRARY SCIENCE

3.5.10

ETHELWYN M. CROSSLEY SCHOLARSHIPS.
SYRA DEENA TARSHIS FLEISHMAN BURSARY.
ELIZABETH G. HALL SCHOLARSHIPS.
DR. G. R. LOMER SCHOLARSHIPS.

3.5.11 MANAGEMENT

BELL CANADA CENTENNIAL FELLOWSHIPS.
GULF OIL CANADA FELLOWSHIPS.
H. E. HERSCHORN SCHOLARSHIP.
McGILL ASSOCIATES FELLOWSHIPS.
SEAGRAM BUSINESS FELLOWSHIPS.
SOCIETY OF INDUSTRIAL ACCOUNTANTS BUSINESS FELLOWHIPS.
XEROX OF CANADA MANAGEMENT FELLOWSHIP.

3.5.12 MEDICINE AND MEDICAL SCIENCES

IRMA H. BAUER RESEARCH FUND.
SIR EDWARD BEATTY MEMORIAL SCHOLARSHIPS.
A. A. BROWNE MEMORIAL FUND.
G. RUTHERFURD CAVERHILL FELLOWSHIP.
J. P. COLLIP FELLOWSHIP.
JAMES COOPER ENDOWMENT.
JAMES DOUGLAS FELLOWSHIP.
RICHARD COLLIER FITZGERALD FUND.
PERCY HERMANT FELLOWSHIPS.
BLANCHE HUTCHINSON RESEARCH FUND.
IZAAK WALTON KILLAM SCHOLARSHIPS.
SAMUEL LUPOVICH MEMORIAL SCHOLARSHIP.
JOSEPH McABBIE SCHOLARSHIP.
ALEXANDER McFEE FELLOWSHIP.
JOHN McRAE FELLOWSHIP.
JAMES O. MEADOWS AND MARIA MEADOWS AWARDS.
MEDICAL RESEARCH COUNCIL STUDENTSHIPS AND FELLOWSHIPS.
GEORGE W. MERCK MEMORIAL LOAN FUND.
H. W. MOLSON FELLOWSHIP.
MONTREAL NEUROLOGICAL INSTITUTE FELLOWSHIPS.
NATIONAL CANCER INSTITUTE RESEARCH FELLOWSHIPS.
OSLER MEMORIAL SCHOLARSHIP.
GORDON PHILLIPS FUND.
JOSEPH SCHUBERT MEMORIAL SCHOLARSHIP.
JEANNETTE AND ABRAM VICTOR MEMORIAL SCHOLARSHIP.
HIRAM N. VINEBERG RESEARCH FUND.
HARRISON WATSON SCHOLARSHIP.
MILTON C. AND NINA A. WILSON AWARD.

3.5.13 NURSING

ALUMNAE ASSOCIATION SCHOLARSHIP.
ALUMNAE ASSOCIATION, R.V.H. SCHOOL OF NURSING BURSARY.
ASSOCIATION OF NURSES OF THE PROVINCE OF QUEBEC BURSARIES.
PROVINCE OF QUEBEC BURSARIES.
MONTREAL GENERAL HOSPITAL.
ROYAL VICTORIA HOSPITAL NURSING SCHOLARSHIPS.
ST. JOHN AMBULANCE ASSOCIATION OF CANADA BURSARIES.

3.5.14 PHYSICS

DOW-HICKSON FELLOWSHIP.
INTERNATIONAL NICKEL OF CANADA FELLOWSHIPS.
ALEXANDER McFEE FELLOWSHIP.
CARL REINHARDT SCHOLARSHIP.
WALTER C. SUMNER MEMORIAL FELLOWSHIPS.

Note: From time to time scholarships, fellowships, or research grants are made available by industrial corporations to encourage research by graduate students upon specific problems suitable for M.Sc., M.Eng., or Ph.D. theses and for publication, but also of commercial significance. As such awards may be offered for only one or two sessions, it is not possible to have them listed in this *Announcement;* the Departments concerned should be consulted.

PRIZES AND AWARDS

3.5.15

D. W. AMBRIDGE AWARD. An award to the graduand receiving the degree of Ph.D. in the Physical Sciences or Engineering Departments who is judged by the Executive Committee of the Graduate Faculty to be most deserving of the award.

PRIZE OF THE AMBASSADOR OF YUGOSLAVIA IN CANADA. — A book prize for the best student in the language, literature or civilization of one of the peoples of Yugoslavia (principally Serbo-Croatian). Open to undergraduate or graduate students and awarded on the recommendation of the Department of Russian and Slavic Studies.

W. M. BIRKS AWARDS. — *M.A. Prize* $100 to a candidate who does distinguished work in the M.A. program, awarded at the discretion of the Faculty of Religious Studies.
S.T.M. Prize — $100 to a candidate who obtains first-class standing, awarded at the discretion of the Faculty.

DR. W. B. LEWIS PRIZE. — A prize of $300 is offered annually in a competition for an essay, written with a view to publication to produce an informative review of some topic of his choice involving more than a single scientific discipline and having relevance to a subject of potentially general concern, e.g. water pollution, growing amount of carbon dioxide in the atmosphere, problem of mercury in the environment, etc. The prize is awarded by the University Scholarships Committee and must reach the Secretary, University Scholarships Committee, Scholarships Office, on or before October 15 of each year.

NEIL STEWART PRIZE. — $150 to a student or students studying biblical Hebrew and duly enrolled in the Faculty of Religious Studies for a degree program.

LOAN FUNDS

3.5.16

GRADUATE STUDENTS' LOAN FUND — Established in 1951 by the Board of Governors for students in the Faculty of Graduate Studies and Research.*

FACULTY OF MANAGEMENT STUDENT LOAN FUND. — A student loan fund has been established and is administered by the Student Aid Office. For further information, apply to Mr. J. S. Kennedy, Student Aid Office, Administration Building, McGill University.

MARGARET BIRKS MEMORIAL LOAN FUND. — Established in memory of the late Mrs. Margaret Birks, this fund is available to graduate students, preferably in the Department of Psychology. Where loans appear justified, but repayment will not be practical, bursaries will be granted.*

**Apply to Student Aid Office.*

4 SCHOLARSHIPS, BURSARIES, PRIZES AND LOAN FUNDS IN VARIOUS SCHOOLS OF THE UNIVERSITY

4.1 OPEN TO STUDENTS IN THE GRADUATE SCHOOL OF LIBRARY SCIENCE

Apply to the Director of the School for the following Scholarships before March 31.

DR. G. R. LOMER SCHOLARSHIPS. — Two scholarships of $640 each.

ETHELWYN M. CROSSLEY SCHOLARSHIPS. — Value $100, founded in honour of a former student of the Library School. Women students are given preference.

ELIZABETH G. HALL SCHOLARSHIPS. — Value $300, founded in memory of a former member of the McGill University Library staff.

SYRA DEENA TARSHIS FLEISHMAN BURSARY. — $200 established by the family of the late Syra Deena Tarshis Fleishman through the National Council of Jewish women. Awarded by the Director of the Graduate School of Library Science and the Student Aid Office, subject to the approval of the Student Aid Committee of the National Council of Jewish Women, to a needy and deserving student in the Graduate School of Library Science irrespective of race or creed. Awards are made, after due investigation and recommendation, to deserving students who require financial assistance to take the course.

DR. VIRGINIA MURRAY PRIZE. — Awarded to the student in the First year of the Master of Library Science course who obtains the highest grade in the Organization of Materials course.

4.2 OPEN TO STUDENTS IN THE SCHOOL OF NURSING

ALUMNAE ASSOCIATION OF THE SCHOOL OF NURSING SCHOLARSHIP. — In memory of Dr. Marion Lindeburgh, the Alumnae Association has established a scholarship of $700, open to graduate, registered nurses who wish to study at the School of Nursing, and who meet the entrance requirements. Scholarships are also available for students in B.Sc.(N) and M.Sc.(N) programs. Applications should be submitted by June 1 to the Chairman of the Scholarship Committee, Alumnae Association, 3506 University St., Montreal, Que.

ASSOCIATION OF NURSES OF THE PROVINCE OF QUEBEC BURSARIES. — A limited number of bursaries are awarded each year for study leading to the Master's degree. The amount of bursary is $3000. Applications should be submitted by May 15 to The Association of Nurses of the Province of Quebec, 4200 Dorchester Blvd. West, Montreal, Quebec.

MONTREAL GENERAL HOSPITAL. — The Montreal General Hospital has a limited number of bursaries available for nurses studying in the Master's program. For further information apply to the Director of Nursing, Montreal General Hospital, 1650 Cedar Avenue, Montreal, Quebec.

ST. JOHN AMBULANCE ASSOCIATION OF CANADA BURSARIES. — One or more bursaries of $1,000 from the Margaret MacLaren Memorial Fund for study at the Master's level are available to experienced registered nurses who have proven their ability and are preparing themselves for leadership positions. All factors being equal, special consideration will be given to those with St. John affiliation. Applications are to be forwarded not later than May 16 to the Chairman of Bursary Funds, St. John Ambulance Association, 321 Chapel Street, Ottawa, Ont.

ROYAL VICTORIA HOSPITAL NURSING SCHOLARSHIPS:

(a) The Mabel F. Hersey Scholarship for postgraduate study.
(b) The Emma Thomas Scholarship for postgraduate study.
(c) The Ida McGregor Scholarship for postgraduate study.
(d) The Women's Auxiliary offers bursaries for senior staff members for postgraduate study.

ALUMNAE ASSOCIATION, ROYAL VICTORIA HOSPITAL SCHOOL OF NURSING BURSARY. — Bursary of $1,000 open to graduates of the Royal Victoria Hospital School of Nursing, accepted in an approved University program. Apply before March 31 to Alumnae Office, Nurses' Home, Royal Victoria Hospital, Montreal, Que.

GOVERNMENT BURSARIES. — A limited number of bursaries are given by the Province of Quebec to nurses who wish to remain in the province, and who have been accepted for admission to the School.

KELLOGG FOUNDATION LOAN FUND. — Established through the generosity of the Foundation to assist graduate nurses who have unexpected expenses while registered in courses at the school. Consult the Director of the School for Graduate Nurses.

4.3 OPEN TO STUDENTS IN THE FACULTY OF RELIGIOUS STUDIES

GORDON R. STEPHEN JR. BURSARY FUND. — Available for students in the Faculty who are looking forward to some branch of the Christian Ministry. The Faculty recommends to the Student Aid Officers of the University.

HOUSTON BURSARY. — $400 for students studying for the ministry of the Presbyterian Church in Canada, or The United Church of Canada, with preference to any whose mother tongue is French.

4.4 OPEN TO STUDENTS IN THE SCHOOL OF SOCIAL WORK

4.4.1 BURSARIES AND LOANS

General information on bursaries and/or loans may be obtained from the Student Aid Office.

Some sources exist for both loans and bursaries through the School. Inquiries may be made at the time of application for admission to the School. Since the School does

not receive all the resources for bursary and/or loan purposes until late during the first term, students should endeavour to make other arrangements for their financial needs, whenever possible, prior to entering the School.

Usual funds available from the School include:

(1) General Bursary Fund
(2) Frances Anderson Memorial Bursary
(3) J. A. Klein Memorial Bursary
(4) Alumni Bursary

SCHOOL OF SOCIAL WORK PRIZE. — The Alumni Committee of the School of Social Work has established an annual prize to be awarded to the student with the highest standing in the Master of Social Work Program. The present value of the award is $50.

4.4.2 FEDERAL SCHOLARSHIPS AND BURSARIES

Under the Federal Welfare Grants program, a limited number of bursaries are available each year to students who commit themselves to enter employment in approved welfare programs. These bursaries are administered and partly financed by the various provinces (with the exception of Quebec which has not been participating in the plan). Application should be made to the Deputy Minister, Department of Public Welfare (or Department of Social Welfare) in the capital of the province where the applicant has legal residence.

The Federal Welfare Grants program also awards a number of scholarships based upon academic achievement. Application should be made to the Welfare Grants Division, Department of Health and Welfare, Ottawa, Ontario.

Overseas students should inquire of their governments concerning the availability of United Nations, Colombo Plan, or their country's own study grants.

4.4.3 PROVINCIAL

Most provinces offer bursaries on condition that recipients accept employment in those provinces upon graduation. Information should be obtained from Provincial Departments of Welfare. Quebec residents must apply before January 1 for educational bursaries for the following year. Application should be made to the following: Service des Bourses de Perfectionnement, Ministère de l'Education, Hôtel du Gouvernement, Québec, P.Q.

The Canada Student Loan Plan is available in provinces other than Quebec. Inquire of the Province.

4.4.4 VOLUNTARY AGENCIES

Local or national voluntary agencies often offer bursaries similar to those of the Provinces. Information may be obtained from the School.

5 INDEX OF AWARDS

Alcan Fellowship — **6**
Alumnae Association, Royal Victoria Hospital School of Nursing Bursary — **27**
Alumnae Association of the School of Nursing Scholarship — **27**
Ambridge (D. W.) Award — **26**
Anderson (Frances) Memorial Bursary — **28**
Association of Nurses of the Province of Quebec Bursaries — **27**

Binz (Max) Bursaries for Foreign Students — **7**
Birks (W. M.) Awards — **26**
Birks (W. M.) Awards — **26**
Brace (Major James H.) Research Scholarships — **11**
Bronfman Fellowships in Commerce and Economics — **7**

Browne (A. A.) Memorial Fund — **12**
Busteed (Edwin Botsford) Scholarship — **17**

Callbeck (George A.) Scholarship — **14**
Canada Council Scholarships and Fellowships — **5, 16**
Canadian Federation of University Women Margaret McWilliams Travelling Fellowship — **20**
Canadian Federation of University Women Professional Fellowship — **20**
Carpenter (Phillip) Fellowship — **10**
Caverhill (G. Rutherfurd) Fellowship in Medicine — **18**
Central Mortgage and Housing Corporation Graduate Fellowships — **14**
Chevron Standard Limited Graduate Fellowships — **14**
Collip (J. B.) Fellowships — **7**
Commonwealth Scholarship and Fellowship Plan — **5, 14**
Cooper (James) Endowment — **12**
Crossley (Ethelwyn M.) Scholarships — **26**
Cultural Agreement France-Canada Graduate Scholarships — **18**

Dawson (Sir William) Fellowship — **10**
Demonstratorships — **3**
Douglas (Dr. James) Fellowship in Mining Engineering — **10**
Douglas (Dr. James) Fellowship in Pathology — **12**
Dow-Hickson Fellowship in Physics — **17**
Dow-Hickson Fellowship in Theoretical Philosophy — **16**
Drummond (Guy) Scholarship — **21**
Dunlop (A. F.) Scholarships — **20**

Exhibition of 1851 Scholarships — **19**

Faculty of Management Student Loan Fund — **26**
Federal Scholarships and Bursaries — **28**
Fellowships Offered by Other Universities — **22**
Fellowships and Scholarships — **3**
Finley (Samuel) Memorial Bursary — **13**
FitzGerald (Richard Collier) Fund — **12**
Fleishman (Syra Deena Tarshis) Bursary — **26**
Foundations and Private Agencies — **6**
France-Canada Cultural Agreement Graduate Scholarships — **18**
France-Quebec Exchange Program — **18**
France-Quebec Exchange Program Postdoctoral Fellowships — **22**
Franki Fellowship in Soil Mechanics — **9**

German Academic Exchange Scholarship — **20**
Glasgow Exchange Scholarship — **7, 19**
Gottesman Scholarship — **7**
Government Bursaries — **27**
Graduate Faculty Summer Research Fellowships — **7**
Graduate Students' Loan Fund — **26**
Gulf Oil Canada Limited Graduate Fellowships — **13**
Hall (Elizabeth G.) Scholarships — **26**
Harrington (Dr. B. J.) Bursary — **11**

Helm (Harold) Fellowship — **14**
Hermant (Percy) Fellowships — **12**
Herschorn (H. E.) Graduate Scholarship — **11**
Hersey (Mabel F.) Scholarship — **27**
Hewitt Memorial Fund — **10**
Hibbert (Harold) Memorial Fellowship — **22**
Houston Bursary — **27**
Howard (William Henry) Scholarships — **7**
Howe (C. D.) Memorial Fellowship — **22**

Hunt (T. Sterry) Awards in Chemistry — 7
Hutchinson (Blanche) Research Fund — 12

Imperial Oil Graduate Research Fellowships — 15
Institute of Air and Space Law Scholarships and Fellowships — 11
International Business Machines Fellowships — 7
International Nickel Co. of Canada Fellowships — 15
I.O.D.E. Postgraduate Scholarships — 19
Iron Ore Co. of Canada Scholarships — 11
Keenan (Mary) Scholarship — 10
Kellogg Foundation Loan Fund — 27
Killam (Izaak Walton) Scholarships — 12
Kimberly-Clark Co. of Canada Fellowship — 10
King (Mackenzie) Travelling Scholarships — 21

Klein (J. A.) Memorial Bursary — 28
Knox (Frank) Fellowships — 20
Lamoureux (Emile) Memorial Bursary Montreal Anglers and Hunters Inc. — 17
Lapitsky (Samuel) Scholarship — 10
LeRoy Memorial Fellowship — 7
Lewis (Dr. W. B.) Prize — 26
Lomer (Dr. G. R.) Scholarships — 26
Lupovich (Samuel) Memorial Scholarship — 13
Lynch (J. B.) Fellowship — 7
Lyster (Lynden Laird) Award in Parasitology — 8

Maass (Otto) Memorial Fellowship — 8
Maass (Otto) Postdoctoral Fellowship — 22
Macdonald (Sir William) Travelling Scholarship in Law — 21
McAbbie (Joseph) Scholarship — 13
MacKenzie (Alexander) Fellowship — 10
McConnell (J. W.) Memorial Fellowships — 8
McCrae (John) Fellowship — 18
McFee (Alexander) Fellowship — 8
McFee (Coll) Memorial Scholarship — 8
McGill Associates Graduate Fellowships in Management — 11
McGill Delta Upsilon Memorial Scholarship — 14
McGregor (Ida) Scholarship — 27
McLagan (Rodgie) Fellowships in Management — 11
McLennnan (Hugh) Scholarship — 20
McLennan (Isabella C.) Fellowship — 8
Meadows (James O. and Maria) Awards — 12
Medical Research Council Scholarships — 5
Merck (George W.) Memorial Loan Fund — 12
Meredith (Sir Vincent) Fellowship in Agricultural Economics — 8
Miron Fellowship in Concrete Studies — 8
Mitchell (Frank L.) Fellowship — 8
Mohan (Richard T.) Scholarship — 8
Molson (H. W.) Fellowship in Cancer Research — 12
Montreal General Hospital Bursaries — 27
Moyse Travelling Scholarships — 21
Murray (Virginia) Prize — 26

National Cancer Institute Research Fellowships — 15
National Research Council Postdoctoral Overseas Fellowships — 22
National Research Council Scholarships and Bursaries — 5, 15
Neurology, Neuropathology and Neurosurgery, Fellowships — 12
Noranda Graduate Research Fellowships — 15
Nuffield Foundation Travel Grants — 22

Oliver (Allen) Fellowship — 16
Osler Memorial Scholarship — 18

Phillips (Gordon) Fund — **18**
Porter (Dr. J. B.) Scholarship — **11**
Prize of the Ambassador of Yugoslavia in Canada — **26**
Provincial Government Bursaries — **4, 28**
Pulp and Paper Research Institute of Canada Graduate Studentships — **9**
Purves (Clifford) Fellowship — **9**

Quebec Iron and Titanium Corporation Fellowship in Metallurgical Engineering — **9**
Quebec (Province of) Department of Natural Resources Scholarships — **15**
Quebec (Province of) Department of Natural Resources, Mineral Industry Bursaries — **15**
Quebec (Province of) Postgraduate Scholarships — **16**
Quebec (Province of) Graduate Scholarships — **11**

Reinhardt (Carl) Scholarships and Bursaries — **9**
Rhodes Scholarships — **19**
Rotary Foundation Fellowships — **19**
Royal Commission for 1851 Scholarships — **19**
Royal Victoria Hospital Nursing Scholarships — **27**

School of Social Work Bursaries — **27**
School of Social Work Prize — **28**
Schubert (Joseph) Memorial Scholarship — **13**
Seagram Business Fellowships — **11, 16**
Shastri Institute Fellowships — **20**
Shell Canada Fellowships in Engineering — **17**
Society of Industrial Accountants of Canada Business Fellowships — **12, 16**
Solvay Fellowship — **9**
Special Graduate Scholarships — **17**
Steel Company of Canada Limited Graduate Research Fellowships — **17**
Steinberg Graduate Fellowships — **9**
Stephen (Gordon R. Jr.) Bursary Fund — **27**
Stewart (David) Memorial Fellowships — **10**
Stewart (Neil) Prize — **26**
Stewart (Thomas Shearer) Travelling Fellowship — **21**
Stewart (Walter M.) Postgraduate Scholarship in Agriculture — **9**
St. John Ambulance Association of Canada Bursaries — **27**
Sumner (Walter C.) Memorial Fellowships — **16**
Swiss University Scholarships — **20**

Tabac (Corinne Fay) Memorial Award in Medicine — **13**
Tagge (Arthur C.) Fellowship — **10**

University Women's Organizations (Further awards made by) — **20**

Victor (Jeannette and Abram) Memorial Scholarship — **13**
Vincent (Irving Orrin) Bursary — **9**
Vineberg (Hiram N.) Research Fund — **13**
Voluntary Agencies — **28**
Waddell Loan Fund — **11**
Watson (Harrison) Scholarship — **9**
Willey (Arthur) Memorial Bursary — **9**
Wilson (Dr. Milton C. and Nina E.) Award — **13**

Xerox Fellowship — **10**
Xerox of Canada Limited Fellowship in Management — **12**

Young (Horace G.) Fellowships — **11**

CALENDAR FOR SESSION 1974-75

1974

August 20, Tuesday	Supplemental examinations begin, Faculty of Agriculture, School of Food Science and Diploma in Agriculture.
August 28, Wednesday	Students registering for Agronomy 340-350A report for class at 8:00 a.m. and for Soil Science 372-420A at 9:00 a.m.
September 3, Tuesday	Students registering for Renewable Resources Development 375-400A and Zoology 349-418A report for class at 9:00 a.m.
September 9, Monday	Fall registration of all new students, 9:00 a.m. to 12 noon. Afternoon Orientation Program required of all new students. Registration of all returning students in all years 1:30 to 4:00 p.m.
September 10, Tuesday	Lectures begin for all years in Faculty of Agriculture, School of Food Science and Diploma in Agriculture.
September 19, Tuesday	Open Students' Society meeting. Classes cancelled from 2:00 to 3:00 p.m.
October 4, Friday	Last day for course changes for first term courses in Faculty of Agriculture, School of Food Science and Diploma in Agriculture.
October 14, Monday	Thanksgiving Holiday. Classes cancelled.
October 15, Tuesday	Scholastic Awards Banquet.
October 16, Wednesday to October 20, Sunday	Fall Fair and Open House
November 1, Friday	Last day for dropping first term courses without penalty.
November 6, Wednesday	Fall convocation. Classes as usual.
November 11, Monday	Remembrance Day. Classes as usual.
December 5, Thursday	Last day of lectures in First term, Faculty of Agriculture, School of Food Science and Diploma in Agriculture.
December 10, Tuesday to December 19, Thursday	First term examinations in Faculty of Agriculture, School of Food Science and Diploma in Agriculture programs.

1975

January 6, Monday	Second term registration, new students in Faculty of Agriculture and School of Food Science.
January 8, Wednesday	Second term begins in Faculty of Agriculture, School of Food Science and Diploma in Agriculture.
January 31, Friday to February 8, Saturday	Winter Carnival.
February 5, Wednesday	Ski day. Classes cancelled.
February 7, Friday	Last day for course changes for second term courses.

MACDONALD COLLEGE

February 10, Monday	Macdonald College Founder's Day (Sir William C. Macdonald born February 10, 1831, died June 9, 1917). Classes as usual.
February 28, Friday	Last day for dropping second term courses without penalty.
March 1, Saturday to March 4, Tuesday	Mid-term holiday. Classes cancelled.
March 20, Thursday	Open Students' Society meeting. Classes cancelled from 2:00 to 3:00 p.m.
March 28, Friday to March 31, Monday	Easter.
April 11, Friday	Last day of lectures, Faculty of Agriculture, School of Food Science and Diploma in Agriculture.
April 16, Wednesday to April 25, Friday	Second term examinations in Faculty of Agriculture, School of Food Science and Diploma in Agriculture programs.
April 28, Monday to May 9, Friday	Surveying school of the Department of Agricultural Engineering (336-214E).
May 31, Saturday	Convocation.

1 THE COLLEGE

1.1 ADMINISTRATIVE OFFICERS, McGill

STUART M. FINLAYSON, B.Sc. — *Chairman of the Board of Governors*

ROBERT E. BELL, CC., B.A., M.A. (U.B.C.), D.Sc. (U.N.B., Laval), LL.D. (Tor.), Ph.D., F.R.S., F.R.S.C. — *Principal and Vice-Chancellor*

EIGIL PEDERSEN, B.A. (SGWU), Ed.D. (Harvard), M.A. — *Vice-Principal (Academic)*

LEO YAFFE, B.Sc., M.Sc. (Man.), Ph.D., F.C.I.C., F.A.P.S., F.R.S.C. — *Vice-Principal (Administration)*

ALLAN C. McCOLL, D.F.C., B.Com., C.A. — *Vice-Principal (Finance)*

DALE C. THOMSON, D.F.C., B.A. (Alta.), D.U. (Paris) — *Vice-Principal (Planning)*

WALTER F. HITSCHFELD, B.A.Sc. (Tor.), Ph.D. — *Vice-Principal (Research)*

COLIN McDOUGALL, D.S.O., B.A. — *Secretary-General*

JEAN-PAUL SCHULLER, B.A. (Ott.) — *Registrar*

JOHN ARMOUR, AACCA — *Comptroller*

D. LORNE GALES, B.A., B.C.L. — *Executive Director of the Graduates' Society*

HARRY E. GRIFFITHS, M.A. (Middlebury), B.Com. — *Director of Athletics, Physical Education and Recreation*

JOHN G. LOHRENZ, M.D. (Man.) — *Director, University Health Service*

JOHN H. RICHARDSON, B.A., B.D. (Tor.) — *Director of Student Aid Office*

1.2 ADMINISTRATIVE OFFICERS, Macdonald College

A. CLARK BLACKWOOD, B.Sc., M.Sc. (Alta.), Ph.D. (Wisc.), F.R.S.C. — *Vice-Principal*

W. C. SHIPLEY, B.Sc.(Agr.), M.A. — *Secretary*

JEAN DAVID, L.S.A. (Montr.), Ph.D. (Calif.) — *Student Adviser and Registrar*

MRS. MURIEL WRIGHT, B.A., B.Ed. (Sask.), B.L.S. — *Librarian*

B. ARMSTRONG, B.Sc., M.D., C.M. — *Medical Officer*

MICHELINE CHEVRIER, B.A., M.A. (Montr.) — *Director of Stewart Hall*

GORDON BACHMAN, B.Sc. (Nebr.), M.Sc. (Wisc.), Ph.D. (Michigan State) — *Director, Extension Department*

KATHLEEN CLYNES — *Librarian, McLennan Travelling Library*

1.3 INSTRUCTIONAL STAFF

A. CLARK BLACKWOOD, B.Sc., M.Sc. (Alta.), Ph.D. (Wisc.), F.R.S.C. — *Dean of the Faculty and Professor of Microbiology*

JEAN DAVID, L.S.A. (Montr.), Ph.D. (Calif.) — *Associate Dean of the Faculty and Professor of Horticulture*

FELICITY ALI-KHAN (Mrs.) B.Sc. (Canterbury), Ph.D. — *Lecturer of Entomology*

PHOEBUS A. ANASTASSIADIS, B.Agr. (Athens), M.Ed. (Rutgers), Ph.D. — *Professor of Agricultural Chemistry*

MACDONALD COLLEGE

GORDON BACHMAN, B.Sc. (Nebr.), M.Sc. (Wisc.), Ph.D. (Michigan State)
Assistant Professor of Agricultural Economics and Extension Specialist of the Extension Department

BRUCE E. BAKER, B.Sc. (Bishop's), D.Sc .(Laval)
Professor of Agricultural Chemistry and Chairman of the Department

ROBERT D. BAKER, B.S. (S.I.U.), Ph.D. (Ill.)
Associate Professor of Animal Science

NAYANA N. BARTHAKUR, B.Sc. (Gu.), M.Sc. (Allahabad), Ph.D. (Sask.)
Associate Professor of Agricultural Physics

H. J. THOMAS BEVERIDGE, B.S.A., M.Sc., Ph.D. (U.B.C.)
Assistant Professor of Agricultural Chemistry

BERNARD B. BIBLE, B.Sc. (Ohio State), M.S., Ph.D. (Michigan State)
Assistant Professor of Horticulture

J. ROGER BIDER, B.Sc., M.Sc. (Montr.), Ph.D. (Montr.)
Associate Professor of Wildlife Biology

ROBERT S. BROUGHTON, B.S.A., B.A.Sc. (Tor.), S.M. (M.I.T.), Ph.D.
Professor of Agricultural Engineering

ROGER B. BUCKLAND, B.Sc., M.Sc. (McGill), Ph.D. (Maryland)
Associate Professor of Animal Science

MICHELINE CHEVRIER, B.A., M.A. (Montr.) *Assistant Professor of Sociology*

R. H. COMMON, B.Sc., M.Agr. (Belf.), Ph.D., D.Sc. (Lond.), D.Sc. (Belf.) F.R.S.C., F.R.I.C., F.A.I.C. *Professor of Agricultural Chemistry*

IRVING W. DeVOE, B.Sc. (Aurora), Ph.D. (Oregon)
Assistant Professor of Microbiology

H. GEORGE DION, B.S.A. (Sask.), Ph.D. (Wis.), D.Sc. (Laval), F.A.I.C.
Professor of Soil Science (on leave)

EUGENE DONEFER, B.S., M.S. (Cornell), Ph.D.
Associate Professor of Animal Science

BRUCE R. DONEY, D.V.M. (Toronto) *Associate Professor of Animal Science*

H. R. DOUGLAS, B.Sc. (Alta), M.A. (Tor.), Ph.D.
Professor of Agricultural Physics and Chairman of the Department

E. MELVILLE DuPORTE, D.Sc. (Carl.), B.S.A., M.Sc., Ph.D.
Emeritus Professor of Entomology

RALPH H. ESTEY, B.Ed. (N.B.), M.S. (Maine), D.I.C. (Imp. Coll.), B.Sc. (Agr.), Ph.D., F.L.S. *Professor of Plant Pathology and Chairman of the Department*

M. A. FANOUS, B.Sc. (Cairo), M.S., Ph.D. (Okla. State)
Assistant Professor of Agricultural Physics

FLORENCE A. FARMER, B.H.S., M.Sc., Ph.D.
Associate Professor of Food Science

CELIA L. FERGUSSON, B.H.S., P.Dt., M.Sc. *Assistant Professor of Food Science*

EDWARD R. FILLMORE, A.A. (Snow College), B.A. (Brigham Young), M.R.Ed. (Brigham Young), Ph.D. (Texas A. & M.)
Assistant Professor of Renewable Resources

MARION FLEMING (Mrs.), B.Sc. (H.Ec.) (Man.)
Sessional Lecturer in Food Science

GHISLAIN GENDRON, B.A., B.Sc. (Laval), M.S., Ph.D. (Wis.)
Assistant Professor of Agronomy

JACQUELINE GEROLS (Mrs.), B.Sc. Exp. (Aix-Marseilles), M.A. (Montr.)
Sessional Lecturer of French

WILLIAM FREDERICK GRANT, M.A. (McM.), Ph.D. (Virginia), F.L.S.
Professor of Genetics (Faculty of Science)

ROBERT B. HARPER, B.S. (Michigan Tech. U.), Ph.D. (Cornell)
Assistant Professor of Animal Science

THOMAS G. HARTSOCK, B.Sc., M.Sc., Ph.D. (Penn. State)
Assistant Professor of Animal Science

G. O. HENNEBERRY, B.Sc. (Dal.), M.Sc.
Associate Professor of Agricultural Chemistry

STUART B. HILL, B.Sc. (Hon.), (Swansea), Ph.D. (Reading)
Assistant Professor of Entomology

HANS J. HUECKEL, M.S. (M.I.T.), Ph.D. (U.C., Davis), B.Sc.
Assistant Professor of Agricultural Chemistry

EDMUND S. IDZIAK, B.Sc.(Agr.), M.Sc., D.Sc. (Delft)
Associate Professor of Microbiology

JORDAN M. INGRAM, Ph.D. (Michigan State), B.Sc.(Agr.), M.Sc.
Assistant Professor of Microbiology

ARCHIBALD R. C. JONES, B.Sc.F. (Tor.), M.Sc. (Syr.)
Associate Professor of Woodland Resources

BRIAN W. KENNEDY, Ph.D. (Cornell), B.Sc.(Agr.)
Assistant Professor of Animal Science

D. KEITH McE. KEVAN, B.Sc. (Edin.), A.I.C.T.A. (Trin.), Ph.D. (Nott.), F.R.S.E., M.I. Biol.
Professor of Entomology

HAROLD R. KLINCK, B.S.A. (Tor.), M.Sc., Ph.D.
Professor of Agronomy, Chairman of the Department and Secretary of Faculty

ROGER KNOWLES, B.Sc. (Birm.), Ph.D. (Lond.)
Professor of Microbiology (on leave)

PAUL C. LAGUE, B.A. (Montr.), B.S.A. (Laval), M.S. (Cornell), Ph.D. (Cornell)
Assistant Professor of Animal Science

NORMAN C. LAWSON, B.Sc. (Glasgow), Dip. Agr. (Reading), M.Sc., Ph.D.
Assistant Professor of Agronomy

JAMES D. MacARTHUR, B.Sc.F. (U.N.B.)
Associate Professor of Woodland Resources and Curator, Morgan Arboretum

GORDON A. MacEACHERN, M.S. (Purdue), Ph.D. (Purdue), B.Sc.(Agr.)
Associate Professor of Agricultural Economics and Chairman of the Department

DAVID L. MacFARLANE, B.S.A., M.Sc. (Sask.), Ph.D. (Minn.)
Emeritus Professor of Agricultural Economics

ANGUS F. MacKENZIE, B.S.A., M.Sc. (Sask.), Ph.D. (Corn.)
Professor of Soil Science and Chairman of the Department of Renewable Resources

ROBERT A. MacLEOD, B.A., M.A. (U.B.C.), Ph.D. (Wis.), F.R.S.C.
Professor of Microbiology and Chairman of the Department

HELEN L. MACONOCHIE (Mrs. A. K.), M.A. (Tor.), P.Dt.
Associate Professor of Food Science

ALFRED MARQUIS, B.S.A., M.Sc. (Laval), Ph.D. (Purdue)
Assistant Professor of Agricultural Engineering

KATHARINE MARTIN (Mrs. S. L. B.), B.H.S. *Sessional Lecturer of Food Science*

JOHN E. McFARLANE, M.A. (Sask.), Ph.D. (Ill.) *Professor of Entomology*

EDWARD McKYES, B.Eng., M.Eng., Ph.D.
Assistant Professor of Agricultural Engineering

J. F. GERARD MILLETTE, B.Sc.(Agr.), Ph.D. (Penn. State)
Associate Professor of Soil Science

FRANK O. MORRISON, B.A., B.Sc. in Agriculture, M.Sc. (Alta.), Ph.D.
Professor of Entomology and Chairman of the Department

J. E. MOXLEY, B.Sc.(Agr.), M.Sc., Ph.D. *Associate Professor of Animal Science*

MACDONALD COLLEGE

ELIZABETH MURPHY (Mrs.), M.Ed. — *Lecturer in Clothing and Textiles*

HELEN R. NEILSON, M.B.E., B.H.S., M.Sc., P.Dt.
Professor of Food Science and Director of the School of Food Science

N. NIKOLAICZUK, B.Sc., M.Sc. (Alta.), Ph.D. (Ohio State)
Professor of Animal Science

ERIC R. NORRIS, B.S.A., M.S.A. (Tor.)
Assistant Professor of Agricultural Engineering

JOHN R. OGILVIE, B.Sc.(Agr.), M.S.A. (Tor.), Ph.D. (Purdue)
Associate Professor of Agricultural Engineering and Chairman of the Department

ELIZABETH PARNAS, B.Sc. (Liverpool), M.Sc.
Assistant Curator, McGill University Herbarium

REAL LUCIEN PELLETIER, L.S.A. (Montr.), Ph.D. (Wis.), M.Sc.
Professor of Plant Pathology

LOUIS PERRON, B.L.A. (Corn.) — *Sessional Lecturer of Horticulture*

JEAN F. PETERSON, B.A. (Grinnell), M.S., Ph.D. (Nebr.)
Assistant Professor of Plant Pathology

BRYAN G. PROCTER, D.V.M. (O.V.C.), M.Sc.
Sessional Lecturer of Animal Science

DIANE A. RAYMOND, B.Sc. (H.Ec.) (Man.), M.S. (Drexell), P.Dt.
Associate Professor of Food Science

WALKER RILEY, B.S.A. (Tor.)
Assistant Professor of Agronomy and Extension Specialist in Agronomy

GRACE T. ROBERTSON (Mrs.), B.A. (Hunter), M.Sc., Ph.D.
Sessional Lecturer of Microbiology

W. ROWLES, B.Sc. (Sask.), M.Sc., Ph.D.
Emeritus Professor of Agricultural Physics

W. E. SACKSTON, B.S.A. (Man.), Ph.D. (Minn.), M.Sc.
Professor of Plant Pathology (on leave)

P. H. SCHUEPP, Dipl. Sc. Nat. (Zurich), Ph.D. (Tor.)
Assistant Professor of Agricultural Physics

VIVIAN H. SHIPLEY (Mrs. W. C.), B.Sc. (H.Ec.), M.A.
Assistant Professor of Food Science

H. A. STEPPLER, B.S.A. (Man.), M.Sc., Ph.D. — *Professor of Agronomy*

ROBIN K. STEWART, B.Sc.(Agr.), Ph.D. (Glas.)
Associate Professor of Entomology

CHARLES D. TAPER, M.S.A. (U.B.C.), Ph.D. (Man.)
Associate Professor of Horticulture and Chairman of the Department

RODGER TITMAN, M.Sc. (Bishop's), B.Sc. — *Assistant Professor of Wildlife Biology*

SHERMAN P. TOUCHBURN, B.S.A., M.S.A. (U.B.C.), Ph.D. (Ohio State)
Professor of Animal Science and Chairman of the Department

MARTIN VAN LIEROP, B.Sc.(Agr.) — *Extension Specialist and Lecturer*

VERNON R. VICKERY, B.Sc.(Agr.), M.Sc.(Agr.), M.Sc., Ph.D.
Associate Professor of Entomology and Curator, Lyman Entomological Museum

MURI A. VISWANATHAN, B.Sc.(Agr.) (Madras), A.I.A.R.I. (New Delhi), Ph.D.
Assistant Professor of Plant Pathology

BENNO P. WARKENTIN, B.S.A. (U.B.C.), M.S. (Wash.), Ph.D. (Corn.)
Professor of Soil Science

SAMUEL WIGDOR, B.Sc., B.Sc.(Agr.), M.Sc. (Mich.)
Sessional Lecturer of Horticulture

DENNIS W. WOODLAND, B.A., M.A. (Walla Walla)
Assistant Professor of Plant Pathology and Curator, McGill University Herbarium

1.4 MACDONALD COLLEGE

Macdonald College, which was founded and endowed by the late Sir William C. Macdonald, is incorporated with McGill University, and is situated twenty miles west of Montreal, at Ste. Anne de Bellevue, Que. It is composed of the Faculty of Agriculture, which includes the School of Food Science.

Ste. Anne de Bellevue, Que., is twenty miles west of Montreal, on the main lines of the Canadian National and Canadian Pacific Railways, and on provincial highways No. 2 and No. 20. Travellers by air book to the Montreal International Airport at Dorval, which is approximately ten miles east of the College. The Anglican Church of Canada, the United Church of Canada and the Roman Catholic Church all have churches in the town. Students of all religious denominations are free to enter Macdonald College. Branches of the Bank of Montreal and of the Banque Canadienne Nationale serve the community.

The College has its own post office and mail should be addressed to Macdonald Campus of McGill University, Ste. Anne de Bellevue, Que. The address for freight and express parcels, and for telegrams, is Macdonald College, Ste. Anne de Bellevue, Que.

FACULTY OF AGRICULTURE

The work of the Faculty falls into three main divisions: teaching, research, and extension in Agricultural Sciences, Biological Sciences and Renewable Resources Development. Teaching and research form the major part of their work. Extension work is undertaken by departments as the need or opportunity may arise.

SCHOOL OF FOOD SCIENCE

The School of Food Science is an administrative unit within the Faculty of Agriculture. The function of the School is teaching to provide the professional qualifications necessary for dietetics and food technology and to provide strong academic training in consumer education, home economics, nutrition, food biochemistry and food administration.

THE INSTITUTE OF PARASITOLOGY

The Institute of Parasitology, attached to the Faculty of Graduate Studies and Research, is located at Macdonald College. Research on animal parasites and the instruction of graduate students are the main functions of this Institute.

THE LYMAN ENTOMOLOGICAL MUSEUM

Originally established in 1914 and formerly housed in the Redpath Museum, the Lyman Entomological Museum was moved to the Biology Building, Macdonald College, in 1962. It houses the largest University collection of insects in Canada, second only in size to the National Collection. The Museum has also an active graduate research program in association with the Department of Entomology. Study facilities are available, on request from the Curator, to all *bona fide* students of entomology.

2 GENERAL INFORMATION

2.1 FACILITIES

Sir William Macdonald planned so well for future needs that the facilities of Macdonald College for instruction in agriculture and food science are still pro-

vided almost entirely in the buildings constructed in 1905. The picturesque brick buildings and red-tile roofs of the Chemistry, Biology, Agriculture and Main Buildings, together with Stewart Laird and Brittain Halls (residences for women and men), and the well laid out grounds on the shore of Lac St. Louis, combine to provide a campus which is attractive and functional.

Laboratory and lecture rooms are exceptionally well supplied with modern and efficient teaching facilities, while the reference section of the Library and the research laboratories associated with the various science departments are well equipped to permit the vigorous investigation of problems connected with post-graduate studies.

The land associated with the College consists of approximately 1,600 acres, at the western end of the Island of Montreal, and is in Town of Ste. Anne de Bellevue. The campus proper consists of about 200 acres south of Routes 2-20, and contains the buildings and fields devoted to research in poultry science and horticulture. The College farm represents a wide variety of the soils of the Ottawa St. Lawrence Valley Lowland, with podsols, brown forest and dark-grey gleizolic (poorly drained) soils, including the Ste. Amable, St. Bernard, Rideau and Ste. Rosalie series. It has good examples of many breeds of livestock. The principal purpose of the farm is to provide facilities for teaching, demonstration, and applied research by the various departments of the faculty.

The Morgan Arboretum, established in 1945, has 540 acres of natural woodlands and plantations set up and operated as a model for integrated multiple use forestry. It combines forest production with intensive recreational use in an urban region. The northern hardwood forest is used for research, teaching, and demonstration projects relating to forest resources and values. Groups of all the Canadian native trees and many useful and important exotics are also present. The Arboretum features a botanical trail, a bird sanctuary, twelve miles of wooded trails, a variety of forest ecosystems, soil and water conservation projects, forest operations such as reforestation, plantation management, timber harvesting and maple syrup production, and related forestry-wildlife ecological activities. An intensive nature interpretation program is offered for school children.

2.2 THE MACDONALD COLLEGE LIBRARY

The library, with a seating capacity for 360 persons, is located off the central hall of the Main Building. Reading and stack rooms have accommodation for about 120,000 volumes. The Library subscribes to 1,500 journals.

The choice of books is directed towards bringing together the best modern literature on subjects of the College curriculum.

The Walter M. Stewart Collection, purchased through the generosity of the late Mr. Walter M. Stewart, contains books of more general interest, including biography, history, travel, science and fiction.

2.3 EXTENSION DEPARTMENT

COMMUNITY PROGRAMS DIVISION

This division is responsible for College extension activities in rural communities by providing liaison between the College and those involved in agriculture, home management, family living, resource development and environmental control. Through the organization of seminars and workshops in the country, through consultation with individuals and groups, the resources of the College and University are made available to those without daily access to the campus. In

addition, radio items and special weekly newspaper columns provide a link between the campus and the community.

This division also coordinates and encourages the extension services of various departments of Macdonald College. These are represented by such activities as the Soil Testing Service, the Land Use Planning Service, the Feed Testing Service, the Dairy Herd Analysis Service and the Agricultural Engineering Consulting Service. Each of the College's departments welcomes requests for information on subjects relating to agriculture and food science.

EXTENSION FILM LIBRARY

The Extension Department operates a film library service for schools, community organizations and individuals. Advice with respect to program planning and the use of audio-visual aids with special emphasis on films is available from the Library. A rental fee is charged for films and other audio-visual aids.

EXTENSION COURSES

Several courses are offered in a wide variety of technical and popular subjects. These courses are generally offered in the evening during the regular academic year.

As well, several conferences, workshops and seminars are held each year at the College. The Department also cooperates with regional school boards and community schools in planning programs and assisting in adult night schools.

MACDONALD JOURNAL

The Journal is a monthly publication dealing with matters of interest to the residents of rural communities. Articles and reports by Macdonald College staff, the Quebec Department of Agriculture and Colonization, the Quebec Women's Institutes Inc. and other contributors keep its subscribers up to date.

COLLEGE TOURS

Visits to the College from individuals or groups with a common interest in the farm, the home, or the school, are always welcomed.

Groups of fifteen or more requiring meals and/or rooms are asked to give two weeks' advance notice and to confirm the numbers in the group not later than three days before arrival. All requests for visiting privileges should be addressed to the Extension Department, Macdonald College, Que., who will be pleased to quote rates for meals and rooms, if required.

2.4 STUDENT PLACEMENT SERVICE

The Canada Manpower Service, in cooperation with Macdonald College, has established a Student Placement and Career Counselling Office on the campus to bring together graduating students and potential employers. In addition to permanent employment, the Service also endeavours to assist both undergraduates and employers interested in summer employment and part-time work. The Placement Office operates on a year-round basis, and its services are available to both students now registered and graduates of earlier years.

2.5 REGISTRATION

Students are required to registered at the times indicated in the calendar for the program and year in which they have been accepted, and before entering residence to obtain a residence card during registration. Registration at a later

date is permitted only to those who obtain the consent of the Dean or Director of the Faculty or School concerned.

All students entering for the first time are required to register in advance of upper classmen. This period is devoted to a program of orientation, in which efforts are made to familiarize them with their physical and cultural surroundings, and to acquaint them with the scope of the various fields of learning at the College. Attendance at all sessions of New Students Orientation is compulsory.

Upon registering students are required to sign the following declaration: "I hereby accept and submit myself to the rules and regulations of Macdonald College, and of the Faculty or School thereof in which I am registered, and to any amendments thereto which may be made while I am a student of the College, and I promise to observe the same."

Students are not permitted to enter any class until they have registered.

2.6 FEES

The College reserves the right to make changes without notice in its published scale of tuition, board and room, and other fees. Fees are not refundable except under special conditions as described below.

TUITION AND OTHER FEES

Commencing with the 1974-75 academic session, the College will introduce a new system of tuition fee assessment based on a per credit charge where applicable. The basic charge for tuition fees will be $16.50 per credit and this fee will include all the regular charges of the College for registration, tuition, laboratories and libraries. Student Services fees and Students' Societies fees will be separately assessed in a manner appropriate to those two functions and must be paid at the same time as the tuition fees.

Where credits are applicable, tuition fees of $16.50 per credit will be charged. For example, a student whose faculty uses the credit system and who is taking an academic load of 30 credits would pay $495.00 in tuition fees ($16.50 x 30) plus fees for Student Services and Students' Societies. Tuition fees will vary according to the number of credits taken but Student Services and Students' Societies fees will be as shown below for all students taking 24 or more credits.

Full Time Students

B.Sc.(Agr.) Program	$16.50 per credit
B.Sc.(Agr.Eng.) Program	16.50 per credit
B.Sc.(F.Sc.) Program	16.50 per credit
Diploma in Agriculture	$325.00 per session
Student Services	$60.00
Macdonald Students' Society	28.00
Centennial Centre	15.00
Undergraduate Societies	1.00

PART TIME, SPECIAL AND VISITING STUDENTS

Where the credit system is applicable, $16.50 per credit will be assessed. In addition, the following fees will be assessed:

a) If taking between 18 and 23 credits:	
Student Services	$60.00
Macdonald Students' Societies	44.00
b) If taking more than 9 but less than 18 credits:	
Student Services	30.00*
Macdonald Students' Societies	10.00

c) If taking 9 credits or less:

Student Services	15.00*
Macdonald Students' Societies	10.00

*Foreign Students see p. 18 also.

FOREIGN STUDENTS HEALTH INSURANCE

Compulsory Health Insurance	$78.00

SPECIAL FEES AND PENALTES

Late registration (unless excused by the Dean or Director)	$25.00
Late payment during first 30 days after registration	10.00
Late payment after thirty days	25.00
Residence caution deposit	50.00
Conferring degree *in absentia*	5.00
Duplicate diploma	10.00
Certified transcript of student's record:	
First two copies, each	1.00
Additional copies made at the same time, each	.25
Re-reading examination paper	10.00
Supplemental examination, per paper	
— written at College	10.00
— written elsewhere	25.00

BOARD AND RESIDENCE

Board and residence are paid separately. The fees, per session, exclusive of the Christmas holidays are:*

Board-Meal ticket	$560.00

(5 days per week exclusive of statutory holidays designated by the University)

Students can buy individual meals on a cafeteria basis if they do not wish to pay the full Board fees.

Room (double occupancy)	490.00

Students are not encouraged to remain in residence during the Christmas holidays. If, however, due to exceptional circumstances, special permission to remain in residence has been obtained from the Residence Business Office, the cost for room for this period will be $13.00 double or $15.00 single for a week or any part of a week.

Single Rooms

There are a few single rooms available in each residence at an additional cost of $60.00.

APPROXIMATE COST PER SESSION

Course	Total Fees	Board (optional)	Residence	Textbooks Supplies, etc. (estimate)	Total
Undergraduates (30 credits)	$599.00	$560.00*	$490.00*	$125.00	$1,774.00*
Diploma in Agriculture	429.00	560.00*	490.00*	75.00	1,554.00*

* Subject to change without notice.

SUNDRY

Books

The prescribed textbooks, and classroom and laboratory supplies, may be purchased at the College Book Shop — estimated minimum cost is $125.00.

Supplies

Materials and supplies required for classes in Textiles and Clothing are provided by the students concerned and purchased at the direction of the instructor.

Uniforms

Uniforms are required for food laboratories; students in the B.Sc.(F.Sc.) program will be advised of the uniform requirements on acceptance or promotion.

REGULATIONS CONCERNING PAYMENT, AND REMISSION, OF FEES

1. Fees for tuition and for board and residence are due and payable to the Cashier at the time of registration. A late fee of $10.00 is charged for payment during the first 30 days after registration and $25.00 thereafter.

2. The College does not issue bills for fees.

3. Fees may be paid in two instalments, one at the beginning of the session, and one on January 15 following provided that an application for deferred payment of fees is completed and submitted at the time of registration. Information on payment of fees is available from the Registrar's Office.

More extended terms of payment may be arranged, where necessary, with the permission of the Secretary. In special cases of hardship, application may be made for financial assistance. See section on Scholarships, Prizes, Bursaries and Loan Funds.

4. As soon as possible after the dates prescribed for the payment of fees indicated in 3. above, a list of the registered students whose accounts with the Secretary are in arrears will be sent to the Dean or Director of the Faculty or School concerned, on receipt of which the Dean or Director shall suspend these students from attendance; they will not be readmitted to classes until the account is settled, or a satisfactory arrangement is made with the Secretary.

5. Students who have fees or other accounts outstanding at the end of the session will not be entitled to receive their marks or to have them sent to third parties, until these accounts are paid.

6. A student who withdraws from the College during the course of the academic year must do so at the Registrar's Office and return his identity card. If in residence he must return his residence card and meal ticket if he has one to the Cashier's Office.

7. In the case of students who leave the College before the end of the academic year, but receive full credit for the year towards their degree, there shall be no refund of tuition fees.

8. In the case of students who leave during the academic year and do not receive credit beyond the period of their attendance, tuition fees shall be remitted on the basis that half of the annual fees shall be remitted to a student who leaves prior to the beginning of the second term.

9. No tuition fees shall be refunded for any term during which the student has attended classes, even though he leaves before the term has finished.

10. Residence fees are payable for the full academic year and will not be refunded, except in special circumstances.

11. The Dining Room portion of the residence fees is refundable in special circumstances to students who leave the College permanently during the session.

12. Avoidable breakage or damage to College property or equipment by a student is charged to him on receipt of a report from the chairman of the department concerned.

The Cashier's Office is open to receive payments from 9 a.m. to 12:30 p.m. and 2:00 p.m. to 4:30 p.m., Monday to Friday.

All cheques, money orders, etc., should be drawn to the order of "The Secretary, Macdonald College," and should be made payable in Canadian funds including bank charges.

2.7 RESIDENCE

Men students in residence live in Brittain Hall, named in honour of the late Dr. W. H. Brittain, Vice-principal of Macdonald College from 1935 to 1955. The residences for women are Stewart Hall, named in honour of the late Mr. and Mrs. Walter M. Stewart, long-time friends and benefactors of the College, and Laird Hall, named in honour of the late Dr. Sinclair Laird, Director of the School for Teachers from 1913 to 1949.

Each residence is under the control of a director who is appointed from the academic staff. All applications for residence and inquiries concerning the residences should be addressed to the Residence Business Office, Macdonald College, Que.

APPLICATION FOR RESIDENCE ACCOMMODATION — NEW STUDENTS

A form for applying for residence accommodation and detailed information about the residence are sent to prospective students when they are accepted in the Faculty of Agriculture or the School of Food Science. When the form is received from the College it must be completed and returned immediately to the Residence Business Office. A caution deposit of $50.00 (not part of fees) must accompany the application for accommodation. The College guarantees to refund the deposit if the applicant cancels the room reservation at least three weeks prior to the date of registration.

APPLICATION FOR RESIDENCE — RETURNING STUDENTS

Returning students in the upper years must reserve residence accommodation on the form available from the Residence Business Office. This must be submitted by June 30 together with the usual $50.00 deposit.

ROOM OCCUPANCY

Students will not be admitted to residence before the date set for registration. Students from foreign countries or students from a distance may be admitted early in exceptional circumstances. Permission must be requested by letter and a reply obtained in writing from the Residence Business Office before the student leaves home.

Students who return to write supplemental examinations will be admitted to residence on a specified date and must make application to the Residence Business Office on the form sent by the Registrar's Office with notice of the examination schedule.

Student officers and members of the football team may be admitted before the opening date of courses, if permission is granted by the Residence Business Office.

Students from a distance may remain in residence during the Christmas holidays, provided permission is granted by Residence Business Office.

Students must vacate their rooms at the end of the regular session. The residences are used in the summer for meetings, conferences and summer school and the rooms must also be available for cleaning and maintenance. Only under exceptional circumstances will a student be granted permission to remain in residence during the summer months. Exceptions may be made for students who are employed at the College. In all cases permission must be requested from the Residence Business Office.

RESIDENCE FEES

Residence fees cover only the regular periods when classes are in session. An additional fee is charged for the Christmas holiday period and for residence accommodation during the supplemental examination period in August.

VISITORS

Visitors are welcome at the College. Relatives and friends of students may stay overnight in any residence provided they apply to the Residence Business Office.

NON-RESIDENT STUDENTS

Students living at home or out of residence are subject to College discipline as outlined under CONDUCT AND DISCIPLINE. The Student Affairs Discipline Committee of the Students' Council is responsible for the maintenance of good order and discipline in all areas on the campus and at student sponsored activities away from the campus.

Non-resident students may not stay overnight in any residence without permission of the Residence Business Office. Common rooms are provided for non-resident students in the Centennial Student Centre. The athletic facilities (gymnasium and pool) in both the men's and women's residences are available to non-resident students at appropriate time.

Meals are available in the College dining room for non-resident students.

Lockers are available in the basement of the Student Centennial Centre for non-resident students. These may be arranged for at the Student Centennial Centre one week after registration.

STUDENT AUTOMOBILES

In view of the increasing problem of parking staff and student automobiles on the campus, students living in residence will not be permitted to drive automobiles on College property during the session. They must leave them parked in designated areas. Other students will be allowed to park automobiles on the campus provided they observe the parking regulations and other rules applicable to students' automobiles. Students are required to obtain a permit on registration day. Permits will not be issued to students who do not carry car insurance for public liability, property damage and personal injury.

2.8 EXTRACURRICULAR ACTIVITIES

The program of extracurricular activities is designed to complement the program of studies and to promote both fellowship and wider experiences for the student.

A wide program of athletics is sponsored by the Athletics Board for men and women, particularly at intramural level, supervised by qualified instructors. There are facilities for track and field sports, football, hockey, basketball, volleyball, woodsmen, tennis, badminton, archery, aquatic sports, curling, and ice skating on Glenfinnan Rink.

The Macdonald College Students' Council sponsors a newspaper, *The Harvest,* a Yearbook *Clan Macdonald,* a photography department, a Winter Carnival which is highlighted by a widely attended international woodsmen's competition and numerous other activities. Dances and informal get-togethers are features of student life with the Centennial Centre a favourite meeting place.

Macdonald College can also boast of a Student Union Building. At the corner stone laying ceremony in October of 1967 it was fittingly named "Centennial Centre." The building includes many facilities for extracurricular activities, recreation and relaxation, including a lounge, snack bar, meeting and board rooms, book shop, publication offices, ball room, and areas set aside for table tennis, billiards, a bar area, and a discotheque. The Centennial Centre is a students' facility and students are active in all facets of planning and management of this attractive new focal point of campus life.

On Founder's Day, which is celebrated each year on February 10, a special

dinner and a musical or dramatic program are provided through the generosity of Mr. and Mrs. David M. Stewart. The Memorial Assembly is another annual event, held to commemorate the sacrifices of Macdonald men and women in two World Wars.

2.9 UNIVERSITY HEALTH SERVICE

The University Health Service comprises a main clinical centre at 517 Pine Avenue West, and infirmaries at Royal Victoria College and Macdonald College. Equal importance is placed on the physical and mental health of students and the medical staff are appropriately qualified to deal with both aspects.

PRINCIPAL AIMS

1. To detect any disability in new students liable to interfere with their education or that of others.
2. To maintain and protect the health of students by all practicable means.
3. To provide treatment for minor illness and accidents, and professional help for students with emotional or psychological difficulties.

The Health Service cannot undertake the care of serious illness beyond initial diagnosis and emergency treatment. When necessary, the patient will be referred to a physician of his choice or to the public service of a hospital. The cost after referral is then the student's responsibility. A limited number of house visits by a nurse of the Health Service may be made to such students living away from home and confined to bed; should the illness be serious every effort will be made to notify the student's parents or guardian.

HEALTH REQUIREMENTS FOR NEW STUDENTS

All students entering the University for the first time (whether regular, limited or partial, and whether graduate or undergraduate) must present at the time of registration: (1) a medical report (preferably from their family physician); (2) a complete medical questionnaire, and (3) a medical certificate of vaccination against smallpox within the previous three years. The questionnaire and the form for the doctor's report will be sent to the student when he is notified that there is a place for him at the University.

An appointment will be made for all new students to be seen by a physician at the University Health Service as early as possible during their first academic year. At this interview the health of the student will be reviewed and if it is thought necessary, the student will be medically examined. The examination may include X-ray, and other appropriate laboratory or diagnostic tests. Re-examination may also be required in the interest of the student or of others attending the university.

PARTICIPATION IN ATHLETICS

A student wishing to participate in athletics in any academic year must first obtain a permit from the University Health Service. Permission will depend upon the initial medical report from the student's own physician, supplemented by such other medical examination as may be thought necessary in the Health Service. A student who has received medical attention for an illness or accident must be declared fit by the Health Service before he may again participate in athletics.

MEDICAL EXPENSES

The cost of medical examinations carried out at the Health Service and of medical care obtained through its general or mental health clinics is covered in part by University Funds. Residents of Quebec will be covered for services under Medicare. Non-Quebec Canadian students are strongly urged to obtain compre-

hensive health insurance in their home province. The cost of drugs prescribed by the Health Service will be borne by the student.

FOREIGN STUDENTS

All full-time foreign students (including landed immigrants during their first year at the University) must take out the Health Insurance policy which is available on a group basis at the cost of $78.00 per student per year. They are required to pay the annual premium with the first instalment of their fees. The University will forward these premium payments to the Insurance Company. In general, the policy provides for payments towards hospital, surgical, medical, diagnostic and other medical expenses. Students should make themselves aware of the limitations of such a policy.

2.10 CONDUCT AND DISCIPLINE

"The Vice-Principal of Macdonald College and its Dean of Students each have jurisdiction over all offences committed by students registered at Macdonald College and over all offences committed by students on or about Macdonald College. Directors of residences have jurisdiction over all offences committed in or about their respective residences." (McGill University — Code of Student Disciplinary Procedures, 1965).

The Macdonald College practice has been to delegate the disciplinary function to the students in the first instance. The Students' Council has accepted this responsibility and has designated committees to act on its behalf. These committees are (1) the Student Affairs Disciplinary Committee for affairs outside of residence, (2) the Women's Residence Committee, (3) the Men's Residence Committee and (4) the Post Graduate Sub-committee on Discipline. The final committee of student appeal is the judicial wing of the Students' Council, namely (5) the Student Disciplinary Board. Serious breaches of discipline are referred to the University Committee on Student Discipline.

Students found guilty of improper conduct, violation of rules or wilful causing of damage to persons or property, shall be liable to discipline as set forth in the Code of Disciplinary Procedures approved by the Senate of McGill University in 1965, a copy of which is available on request from the Vice-Principal of Macdonald College. The Code specifies that discipline may include: imposition of fines or assessments for damage caused by individuals or groups; posting of security for good behaviour; reprimand; imposition of conduct probation; suspension or expulsion from classes or residence; expulsion from the University.

Any student who is unwilling to submit to the demands of college life, or whose work is definitely unsatisfactory, may be placed on probation, or may be required to withdraw from the College.

All students registered at Macdonald College are obliged to inform themselves of the rules and regulations of the College. A few of these are listed below but the main body of them will be found in the *Residence Handbook* or in other documents distributed at registration.

Possession or consumption of liquor by students is forbidden on the campus, except in authorized places and with special permission.

Initiation or hazing in any form is forbidden.

Unauthorized entrance to Residence or College buildings is forbidden. Violation of this rule is sufficient reason for expulsion.

Gambling is not permitted on College grounds.

Tampering with fire fighting equipment is forbidden.

Students are not permitted to bring firearms into the Residences nor is the use of firearms allowed on College property.

3 SCHOLARSHIPS, PRIZES, BURSARIES AND LOAN FUNDS

3.1 GENERAL

Students registered in the Faculty of Agriculture and the School of Food Science are eligible for Entrance and other Scholarships. Prizes, Bursaries and Loans which are open to all students at McGill University and are described in Section IIIA of the McGill University *Announcement of Scholarships, Bursaries, Prizes, Medals and Loan Funds* obtainable from The Registrar, McGill University, P.O. Box 6070, Montreal, or the Registrar, Macdonald College 800, Que. In addition, the following loans and special awards are available to students registered in Agriculture and Food Science.

3.2 LOANS — GENERAL INFORMATION

A loan is a form of financial aid to supplement a student's resources (where his earnings potential justifies the prospect of reasonably early repayment). An academic record of at least a C average (G.P.A. of 2.0) is required as a condition of eligibility. In general, loans are available only to Canadian students or students with landed immigrant status, and as a general rule not to freshmen students.

Students applying for loans from funds available at the university are required first to apply for Government aid through their home province and otherwise demonstrate that they have exhausted all their possible sources of help, e.g. family, etc.

Students who have financial problems and are unable to pay the full amount of fees due at registration and who are not assured of sufficient funds to pay the second instalment due in January should apply for loan assistance before registration, in order to assure themselves of funds to complete the year. *In any case loan applications in the Faculty of Agriculture must be made before September 30, to the Registrar's Office.* Applications made after this date will not be considered, except in cases of emergency.

LOAN FUND OF THE MACDONALD BRANCH OF THE McGILL GRADUATES' SOCIETY. — Through the generosity of the graduates of Macdonald College loan funds have been made available for deserving students. Students who have at least a G.P.A of 2.4 in their previous year's work will be eligible for loans of up to $500 per year.

The Graduates' Society Loan Funds bear interest at the rate of 4½%, and are limited to Canadian citizens. Applications are to be made to the Registrar's Office.

KIWANIS CLUB OF MONTREAL STUDENT LOAN FUND. — An interest-bearing loan fund for students in Agriculture at Macdonald College established to assist worthy students who are in need of financial help to further their education. Open to students contemplating entering the College as well as by students already enrolled. The loans are to be repaid, in whole or by instalments, as soon as the recipient is able to do so. Except in special cases the maximum loan is $500. Application for a Kiwanis Club loan is to be made to the Registrar's Office, Macdonald College.

3.3 BURSARIES

A bursary is a financial award which does not have to be repaid. It is made, on the basis of need, to a student whose academic achievement makes him worthy

of support. Bursaries are not awarded to students with G.P.A. of less than 2.4 in their previous year's work. In addition to bursaries open to all students at McGill University the following bursaries are open to Faculty of Agriculture and School of Food Science students. Apply to the Registrar's Office, Macdonald College, for information concerning bursaries marked with an asterisk.

*ALUMNI BURSARIES. — Two bursaries ($200 each) offered by the Macdonald Branch of the McGill Graduates' Society, one for a student in the B.Sc.(Agr.) program and one for a student in the B.Sc.(F.Sc.) program at the First or Second year levels.

ANNETTE S. HILL MEMORIAL BURSARIES. — Established in 1962 to assist young men of the Protestant faith and of good character from the Mariitme Provinces or the Province of Ontario to obtain a college education. Apply to the McGill Student Aid Office or to the Registrar, Macdonald College.

*BETA SIGMA PHI BURSARY. — A Bursary of $500, to be awarded annually for three years, commencing in 1972, to a student in the School of Food Science who has satisfactorily completed First or Second year and is in need of financial assistance to continue in the program.

CHILDREN OF WAR DEAD (EDUCATION ASSISTANCE) ACT. — Under this Act fees and monthly allowances are provided for children of veterans whose death was attributable to military service. Inquiries should be directed to the nearest District Office of the Department of Veterans Affairs.

*HOTEL AND RESTAURANT SUPPLIERS ASSOCIATION BURSARY. — A Bursary of $200. to be awarded to a student in the School of Food Science who has satisfactorily completed First or Second year and is in need of financial assistance to continue in the program.

OTTAWA VALLEY GRADUATES' SOCIETY BURSARY of the value of $100, given through the Ottawa Valley Branch of the Graduates' Society, open only to bona fide residents of the territory of the Society.

*STE. ANNE DE BELLEVUE WOMEN'S UNIVERSITY CLUB BURSARY. — A Bursary of $300 is donated by the Ste. Anne de Bellevue Women's University Club to a woman student in any year of any program in the Faculty of Agriculture, the School of Food Science and the Faculty of Education, who is in good standing academically and needs financial assistance.

*JANET MORRISON ROBB BURSARY FOR WOMEN. — The income for one year from an endowment established by the late Hon. James A. Robb, formerly M.P. for Chateauguay-Huntingdon and Minister of Finance, Canada, in memory of his daughter, Janet Morrison Robb, wife of Hugh Harvie Donald.

Preference is given to women students resident in either of the counties of Chateauguay-Huntingdon, or Beauharnois, who are daughters of widows or widowers of limited or moderate means, or daughters of disabled Canadian soldiers who have seen active service.

FISHER TRUST FUND. — In the memory of the late Hon. Sydney A. Fisher, formerly M.P. for Brome County and Minister of Agriculture, Canada. Two grants, normally of $150 each, awarded to students in either the degree or the diploma programs in Agriculture. Under certain conditions, consideration will also be given to applicants in the School of Food Science. Available only to candidates whose parents and guardians have been domiciled in Brome County for at least twelve months prior to the registration date of the study year for which financial assistance is requested. These awards will be continued from term to term only upon favourable report from the Dean of the Faculty of Agriculture or the Director of the School of Food Science.

Application forms may be obtained from Mr. Stanley Quilliams, Secretary, Fisher Trust Fund Trustees, Foster, Que. Completed application forms should reach him by September 1.

THE COLONIZATION SOCIETY'S REGIONAL BURSARIES, available to graduates from the following schools: Gaspesia, New Carlisle; Alexander Galt, Lennoxville; Massey-Vanier, Cowansville; Chateauguay Valley, Ormstown; Richmond, Richmond; Pontiac, Shawville; Philemon Wright, Hull; Laurentian, Lachute.

These bursaries are open to students who register in either the degree course or the diploma course in Agriculture. Preference will be given to students from farm families. Apply to the Registrar, Macdonald College, by September 1.

3.4 SCHOLARSHIPS

A scholarship is granted for distinguished academic standing. In addition to Entrance Scholarships open to all students at McGill University (see Section IIIA, McGill *Announcement of Scholarships, Bursaries, Prizes, Medals and Loan Funds*), the following scholarships are open to students in the Faculty of Agriculture and the School of Food Science.

ELIZA M. JONES SCHOLARSHIPS IN AGRICULTURE AND FOOD SCIENCE. — Established by a bequest of the late F. P. Jones in memory of his mother.

Eleven scholarships of $500.00 each awarded yearly as follows: four scholarships to accompany the Macdonald and Stewart medals in first and second years; two scholarships to high ranking students entering from CEGEP or the equivalent, one for Agriculture, one for Food Science; two scholarships to students entering from the Nova Scotia Agricultural College at any level; and three scholarships to high ranking students at any level.

MACDONALD BRANCH OF THE McGILL GRADUATES SOCIETY ENTRANCE SCHOLARSHIPS. — Eight scholarships of $1000. each will be available to students entering Bachelor's degree programs in the Faculty of Agriculture and in the School of Food Science. Each applicant will be considered on his or her own merits taking into account all or any of the following: academic achievement, participation in athletics, student affairs activities or community service projects. Applications must be submitted prior to August 1 each year.

UNIVERSITY SCHOLARSHIPS. — After one year at the University, University Scholarships may be awarded by the University Scholarships Committee to students in any year of any undergraduate faculty for exceptionally distinguished work in the regular University examinations. No application is required.

All University Scholarships are renewable if in the opinion of the University Scholarships Committee, the holders maintain a sufficiently high academic standing.

University Scholarships carry an automatic award of $100. Where there is financial need, however, winners may apply for assistance. Winners from the Montreal area may, on proof of need, receive up to full tuition fees. Winners from other parts of Canada may receive up to full tuition fees, plus the cost of board and residence, if necessary. Students with need, on notification of winning a University Scholarship, should then apply to the Student Aid Office, McGill University.

OVERSEAS STUDENTS

Non-Canadian students are ineligible for entrance scholarships. Overseas students and non-Canadians from North America are expected to present evidence to immigration authorities that they have adequate funds for their studies in Canada. After completing one year of study at the University, students are eligible for scholarships awarded annually on the results of the sessional examinations.

COMMONWEALTH AND COLOMBO PLAN SCHOLARSHIPS. — These are rarely available for undergraduate studies, but undergraduates from countries where higher educational facilities are inadequate should inquire at their national departments of education.

FOREIGN GOVERNMENT SCHOLARSHIPS. — Several non-Canadian Governments have regional or federal government plans for sending selected students to study in Canada.

SUMMER WORK AND PART-TIME WORK. — When the general employment situation permits, immigration authorities may allow non-Canadians to take employment in the summer vacation if such work is related to their studies.

3.5 B.Sc.(F.Sc.) PROGRAM

MEDALS

STEWART MEDALS. — Named in recognition of the long and continued support and interest of the late Mr. and Mrs. Walter M. Stewart in the academic progress and welfare of

Macdonald College students, and awarded for academic achievement to the students ranking highest in the First and Second years of the B.Sc.(F.Sc.) program.

GOVERNOR GENERAL'S MEDAL. — His Excellency the Governor General of Canada donates a medal to be awarded to the student in Food Science who ranks highest in the graduating class.

PRIZES

MARGARET A. MILTON MEMORIAL PRIZE. — A prize established in memory of Margaret Ann Milton, B.Sc.(H.Ec.) 1965, awarded annually to a student in the Second year of the B.Sc.(F.Sc.) program, based on the results of the final examinations.

NORAH E. HOLCOMB MEMORIAL PRIZE. — An entrance award of $100. given in memory of Mrs. Norah E. Holcomb, supervisor of Home Economics in Montreal. To be awarded to a student who has achieved academic excellence and enrols in the first year of the two-year program at Macdonald College leading to the B.Ed. degree in Home Economics.

MRS. ALFRED WATT MEMORIAL PRIZE. — Value $100. established by the Quebec Women's Institutes as a memorial to a distinguished Canadian, Mrs. Alfred Watt, M.B.E., who introduced the idea of Women's Institutes in England and Wales and was President of the Associated Country Women of the World from 1930 to 1947. Awarded to a student from rural Quebec in the First or Second year of the B.Sc.(F.Sc) program who shows qualities of leadership and is worthy of financial encouragement to complete her program.

FREDERICA CAMPBELL MACFARLANE PRIZE. — $100, donated by the Quebec Women's Institute in memory of the late Frederica Campbell Macfarlane, graduate in Institution Administration, 1912. Superintendent of the Quebec Women's Institute from 1913 to 1919. Open only to students from a rural district of the Province of Quebec, and awarded on the results of the final examinations in any year of the B.Sc.(F.Sc.) program.

GARLAND PRIZE. — $100, donated by Garland Commercial Ranges Ltd. to a graduating student in the dietetics option planning to complete an internship and showing a genuine interest in a career in dietetics.

HARRISON PRIZE. — A prize established by an endowment under the will of the late Dr. F. C. Harrison, Principal of Macdonald College from 1910 until 1926; awarded for academic excellence to a student in the graduating year of the B.Sc.(F.Sc.) program.

CLASS OF 1953 BOOK PRIZE. — Graduates of the class of 1953 (Agriculture and Food Science) have established a fund, the proceeds of which are used to provide a prize in books for the student with the highest standing in all the courses of the Second year curriculum. Awarded in the B.Sc.(Agr.) program in odd-numbered years; in the B.Sc.(F.Sc.) program in even-numbered years.

3.6 B.Sc.(Agr.) PROGRAM

MEDALS

MACDONALD MEDALS. — As a tribute to Sir William Macdonald, and in recognition of academic achievement, the late Mr. and Mrs. Walter M. Stewart of Montreal have donated two medals for annual competition, to be awarded to the students with the highest aggregate standing in the First and Second years respectively of the B.Sc.(Agr.) program.

GOVERNOR GENERAL'S MEDAL. — His Excellency the Governor General of Canada donates a medal to be awarded to the student in Agriculture who ranks highest in the graduating class.

GRAY MEDAL. — A medal and a prize of $100, donated by Merck Frosst Laboratories, in honour of Prof. P. H. H. Gray, longtime Chairman of the Department of Microbiology, to be awarded annually to the student majoring in Microbiology who has demonstrated academic excellence and the most promise in the graduating year.

HARRISON MEDAL. — A medal and a prize of $100, donated by Merck Frosst Laboratories, in honour of Principal F. C. Harrison, first Chairman of the Department of Microbiology, to be awarded annually to the student majoring in Microbiology who has demonstrated academic excellence and the most promise in the second year.

DICKSON MEDAL and a prize of $40 donated by Rohm and Haas Company of Canada Limited, to the student standing highest in the second year of the Plant Pathology Option.

COULSON GOLD MEDAL and a prize of $60 donated by Rohm and Haas Company of Canada Limited, to the student standing highest in the final year of the Plant Pathology Option.

PRIZES

CHEMICAL INSTITUTE OF CANADA PRIZE. — A medal and a prize of $25 for the student in the Chemistry option with the highest standing at the end of the Second year.

EMILE A. LODS MEMORIAL PRIZE. — A prize of $100. given in memory of Emile A. Lods, M.S.A., D.Sc., F.A.I.C., and awarded to a student in the second year of the university program majoring in Agronomy.

LOCHHEAD MEMORIAL PRIZE. — A prize established by an endowment in memory of William Lochhead, B.A., M.Sc., the first Professor of Biology at Macdonald College. It is awarded to a student whose major interest is in entomology and who has emphasized entomological and directly related courses in the undergraduate program. If there is no suitable candidate, the Chairman of the Department of Entomology and Zoology may recommend a graduate student for this prize. The prize, in value equal to the revenue from the endowment, is to be in books, selected by the winner.

CLASS OF 1953 BOOK PRIZE. — Graduates of the class of 1953 (Agriculture and Household Science) have established a fund, the proceeds of which are used to provide a prize in books for the student with the highest standing in all the courses of the Second year curriculum. The prize will be awarded in the B.Sc.(Agr.) program in odd-numbered years; in the B.Sc.(F.Sc.) program in even-numbered years.

CUTLER SHIELD. — The late Professor Garnet H. Cutler, the first lecturer in Cereal Husbandry, Macdonald College, has donated a bronze challenge shield which is held for one year by the student majoring in Agronomy with the highest aggregate in the final year.

CANADIAN SOCIETY OF ANIMAL PRODUCTION BOOK PRIZE. — Awarded to the student in the final year for academic excellence in Animal Science, Poultry Science, Nutrition or Food Science.

RAYMOND L. CONKLIN PRIZE. — A prize in the amount of the yearly interest from an endowment established by Raymond L. Conklin, M.D. To be awarded to a student in the first or second years who has achieved high academic standing.

THE RICHARD LEVESQUE MEMORIAL PRIZE. — Valued $100 to be awarded to a student entering his final undergraduate year of a B.Sc.(Agr.) program. To qualify, students should have high academic standing and preference is given to a student who is active in the campus sports program and participates in student organizations.

LES ENGRAIS CHIMIQUES DU QUEBEC INCORPORE PRIZE — A prize of $300 for a senior undergraduate or postgraduate student specializing in Soil Science with particular interests in soil fertility. Students must have high academic standing and be residents of Quebec to be considered for this prize.

THE JUTRAS AND KOHEN INC. PRIZE IN AGRICULTURAL ENGINEERING. — A prize of $500 awarded each year to a student who registers in the second last or last year of the Agricultural Engineering Major. In selecting the winning student, consideration will be given to high academic standing, participation in extra-curricular activities, and interest in the agricultural drainage or agricultural machinery industries.

SCHOLARSHIPS

HOLLIS J. M. FISKE SCHOLARSHIP. — Awarded to a student in the Third or Fourth years of the B.Sc.(Agr.) program for academic achievement on registration in the succeeding year of the course. Preference will be given to a Canadian.

RALSTON PURINA SCHOLARSHIP. — A scholarship of $500 to be awarded to a student in the Agricultural Engineering, Animal Science or Food Science options entering the senior year. In selecting the winning student, consideration will be given to high academic standing, a record demonstrating good citizenship, sincerity of purpose in agriculture as the chosen field and demonstrated financial need.

LYNDEN LAIRD LYSTER MEMORIAL AWARDS IN PARASITOLOGY. — A Scholarship/Bursary award is available to an undergraduate student for excellence in Parasitology. Apply to the Director of the Institute of Parasitology.

3.7 DIPLOMA PROGRAM

SCHOLARSHIPS

MACDONALD BRANCH OF THE McGILL GRADUATES SOCIETY SCHOLARSHIPS. — Two scholarships of $500 each available to students admitted to the Faculty of Agriculture

in the program leading to a Diploma in Agriculture. Each applicant will be considered on his or her own merits, taking into account all or any of the following: academic achievement, participation in athletics, student affairs activities or community service projects. Applications must be submitted prior to August 1 each year.

MEDALS

MINISTER OF AGRICULTURE AND COLONIZATION MEDALS. — The Honourable Minister of Agriculture and Colonization of the Province of Quebec offers annually two bronze medals in connection with the Diploma Program, Second year Class, to be presented to the students ranking first in the Animal Science and in the Horticulture Groups respectively.

BURSARIES

QUEBEC LANDSCAPE GARDENERS AND NURSERYMEN'S ASSOCIATION BURSARY. — A bursary of $300 to be awarded to a student entering the Second Year of the Diploma Program, who is interested in pursuing a career in ornamental horticultural work. Applicants must apply in writing to the Director of the Diploma Program before September 1, indicating study and carreer interests. The bursary will be awarded on academic performance, extracurricular activities, financial need and interest in a career in Horticulture.

QUEBEC WOMEN'S INSTITUTE BURSARY. — $100 for the student entering the Second year of the Diploma Program, who: (1) is a professional farmer's son (or daughter) from the Province of Quebec, (2) has spent at least one season (seed time to harvest) in his father's employ on the farm. (3) intends to return to his father's farm for at least one year on completion of his course or to manage his own farm, (4) and who, if more than one candidate meets the above three requirements, takes the highest proficiency in agricultural subjects in the First year or, if he is the only candidate, obtains at least class II standing in these subjects.

If no student can qualify for the above, this bursary will be made available as an entrance bursary to the First year of the Diploma program.

ELLIN BEIT-SPEYER BURSARY. — Miss Ellin Beit-Speyer, of Springmount Jersey Farm, Massawippi, Que., provides a bursary of $200 to a student in the First or Second year of the Diploma Course.

Participation in Club activities, farm background and need will be considered in making the award. Apply to the Registrar's Office before September 1.

PRIZES

THE RALSTON-PURINA DIPLOMA PROJECT PRIZE. — A prize of $50 is given annually by Ralston-Purina of Canada Limited for the best project submitted by a student registered in the Diploma Project Course.

3.8 GRADUATE SCHOLARSHIPS AND FELLOWSHIPS

Financial assistance is available for graduate students in the form of fellowships, teaching and research assistantships. Application is made to the Faculty of Graduate Studies and Research, McGill University, on forms obtained from that Faculty. The deadline for Fellowships and Scholarships is February 1.

Graduate students should refer to the McGill *Announcement of Scholarships, Bursaries, Prizes, Medals and Loan Funds,* available from the Registrar's Office, McGill University, or from the Registrar, Macdonald College H9X 3M1, Quebec.

THE WALTER M. STEWART POSTGRADUATE SCHOLARSHIP IN AGRICULTURE. — Value $1,000, established to permit promising students from the Faculté d'Agriculture, Université Laval, to undertake postgraduate studies at Macdonald College. Apply to the Dean of the Faculty at Laval before May 1 each year. The scholarship will not be awarded to students who would, including this scholarship, be in receipt of scholarships, assistantships, etc. to a value of $2,000 or more per annum.

DEPARTMENT OF EDUCATION POSTGRADUATE SCHOLARSHIPS. — Scholarships for predoctoral (postgraduate) studies and for work leading to higher degrees in artistic, scientific or technical training are awarded for one year at a time to residents in the Province of Quebec. The number of scholarships is determined by a jury. Candidates

wishing to take part must obtain the application form from: Student Aid Service, Division of Higher Degrees, Department of Education, Parliament Buildings, Quebec, Que.

THE SIR VINCENT MEREDITH FELLOWSHIP IN AGRICULTURAL ECONOMICS. — The Fellowship valued at $2,500 per year is tenable for a two-year period. The fellow must qualify for admission to graduate work in Economics at the Ph.D. level as set out in the *Announcement of the Faculty of Graduate Studies and Research* of McGill University, and will be required to pursue research or thesis work on an approved subject in the area of Agricultural Economics. Limited teaching or other duties attach to the tenure of this Fellowship. Inquiries and applications should be addressed to the Department of Agricultural Economics, Macdonald College, prior to March 15.

OTHER GRADUATE FELLOWSHIPS. — A number of Graduate Fellowships are available to students entering the Faculty of Graduate Studies and Research. These have a fixed value of $1,200 for ten months plus tuition fees. Further particulars may be obtained from the Dean of the Faculty of Graduate Studies and Research, McGill University.

4 ACADEMIC PROGRAMS AND CURRICULA

4.1 PROGRAMS

The programs in the Faculty of Agriculture and the School of Food Science are normally of three years' duration following the completion of a 2 year post-secondary Collegial program (CEGEP) in the Pure and Applied Sciences or the Health Sciences or its equivalent.

Courses	Pure and Applied Sciences (semesters)	Health Sciences (semesters)
English or French	4	4
Humanities	4	4
Mathematics	4	3
Physics	3	3
Chemistry	2	4
Biology	1	2
Elective	6	4

PROGRAMS IN AGRICULTURE

Bachelor of Science in Agriculture [B.Sc.(Agr.)]

A three-year program from the Diploma of Collegial Studies leading to professional qualification in agricultural science or in one of its related specialized branches in the Biological Sciences and Renewable Resources

Bachelor of Science in Agricultural Engineering [B.Sc.(Agr.Eng.)]

A three year program from the Diploma of Collegial Studies in Pure and Applied Sciences leading to professional qualifications in Agricultural Engineering.

Diploma in Agriculture

A two-year program in practical agriculture designed to prepare students for careers in farming or work closely associated with agriculture at the production level.

Postgraduate programs in Agricultural Science

These lead to the degrees of Master of Science and Doctor of Philosophy, with study and research in one or more of the departments of the Faculty or the

School of Food Science. The program of studies and examinations are controlled by the Faculty of Graduate Studies and Research.

PROGRAMS IN FOOD SCIENCE

Bachelor of Science in Food Science [B.Sc.(F.Sc.)]

A three-year program from the Diploma of Collegial Studies leading to the professional qualifications neecssary for dietetics, or food science as well as the following regions in the Food and Consumer Sciences area: Food Chemistry, Nutrition, Food Administration, Home Economics and Consumer Education.

NOTE: *Students with a CEGEP diploma in Social, Physical, or Health Science, may enter the Home Economics Education program which qualifies for the B.Ed. degree majoring in Home Economics.*

4.2 GENERAL ENTRANCE REQUIREMENTS

All candidates for admission must furnish medical certificate of physical health on forms supplied by the College. All students entering the University for the first time are required to present a medical certificate of vaccination against smallpox within the previous three years.

Applications for admission from Canadian students should, as a rule, be received before August 15 of the calendar year in which they are to be considered for acceptance.

NON-CANADIAN STUDENTS

Applications for admission from students whose homes are outside Canada must be received before March 1 of any year if they are to be considered for acceptance for that calendar year. No decision on these applications will be made by the Committee on Admissions before March 1, and the applicant will be notified whether or not his application is accepted as soon after that date as possible.

CLASSES OF STUDENTS

Full-Time Students

Full-time students in Satisfactory standing take a minimum of 12 credits per term.

Full-time students in Probationary standing take between 10 and 12 credits per term, and may add to this load a repeated course in which a grade of "D" was originally obtained.

Part-Time Students

Part-time students carry fewer than 12 credits per term (fewer than 10 credits per term for students in Probationary standing). New students apply through the Registrar's Office and the applicant must have the qualifications to enter a full-time program. Full-time students who wish to become part-time must consult the Office of the Associate Dean. Certain programs must be completed within a specified number of years; such information is available from the Associate Dean.

Special Students

A special student takes regular credit courses, but is not working towards a degree. To qualify for this status a student must hold an undergraduate degree and have a specific approved plan of study. Applications must be made at the Office of the Associate Dean.

Visiting Students

A visiting student is one who is taking courses at McGill for credit at another university. Applications must be made at the Office of the Associate Dean.

4.3 ACADEMIC STANDING — B.Sc.(Agr.), B.Sc.(Agr.Eng.) and B.Sc.(F.Sc.)

All students are required to give satisfactory evidence of mastery of the material of lecture and laboratory. Examinations are normally held at the end of each course but other methods of evaluation may also be used. The grade assigned for a course represents the standing of the student in all the work of the course.

Examinations may be written in either of the two official languages of Canada.

Upon payment of a fee of $10.00 a student may apply to the office of the Dean of the Faculty to have an examination re-read.

CREDIT SYSTEM

All courses carry a credit value. Courses are graded by letter. Ratings of 4, 3, 2, 1, and 0 are attached to the letter grades of A, B, C, D, and F, respectively. the letter grade F is a failure. The letter grade only appears on the transcript.

The grade points for each course are calculated by multiplying the credit value of the course by the student's earned grade rating. Standing in each semester will be determined on the basis of a grade point average (GPA) computed by dividing the sum of the grade points earned for the semester by the total course credits attempted.

The cumulative grade point average (CGPA) will be the grade point average calculated using the student's entire record in the faculty. A failed course will continue to be used in the calculation of the CGPA even after the course is repeated and passed, or if a supplemental examination is taken.

ACADEMIC CREDIT TRANSFER

Exemption may be obtained for a course taken and passed at another university, upon approval of the instructor concerned. Normally, no grade will be recorded but the credit value established by the Faculty will be granted.

Full time students may, with the written permission of the Dean of the Faculty, register for up to 40% of a full course load in each semester at any university in the province of Québec. These courses, successfully completed according to the standards of the university giving the course, will be recognized for the purpose of the degree. Further details are found in the section entitled "Academic Credit Transfer Agreement" in the *General Announcement.*

STANDING

The program for the degree will normally be completed in 3 academic years or 6 semesters. For the purposes of student classification, the years will be termed U1; U2 and U3.

Year 1 0-29 completed credits at initial registration
Year 2 at least 29-50 completed credits at registration
Year 3 at least 50 credits at registration

A student's academic standing is based on his CGPA. CGPA is calculated on courses taken while he is registered as a full-time or part-time undergraduate in the degree program. If his CGPA drops below 2.00, he is in academic difficulty.

Students in Academic difficulty.

1. When a student's CGPA (or SGPA in the first semester of his program) drops below 2.00, he is advised to withdraw. If he chooses to reregister, he is on *probation* until he raises his CGPA to 2.00.
2. A student on *probation* is advised to register for not more than 12 credits per semester. He is not permitted to be on *probation* for more than one semester unless he obtains a SGPA of 2.50 or higher.

3. A student who does not raise his CGPA to 2.00 (or obtain a SGPA of 2.50) while on *probation* is not permitted to register. He is required to withdraw from the degree program for at least one semester. If after this, the student wishes to reregister he must apply in writing to the Committee on Academic Standing.

SUPPLEMENTAL EXAMINATIONS

A student who has failed a course may either reregister for and repeat the course, or he may apply to write one supplemental examination and will receive the grade earned. In the case of an elective course, the student may substitute another elective. Supplemental privileges or reregistration are available for students who wish to upgrade a course in which a grade of D has been obtained.

Supplemental examinations may be written at the August supplemental period or at the next regular final examination period, i.e. December for first term courses and April for second term courses. In addition, by arrangement with the instructor, an examination may be made available at the end of a term in which there is no regular end of term examination in that course.

A student may register only twice in any course.

DEGREE REQUIREMENTS

To be eligible for a degree a student must have passed all required courses and also any specified electives recommended by his major professor. He must have accumulated at least 90 credits (B.Sc.(Agr.) and B.Sc.(F.Sc)) or 96 credits (B.Sc.(Agr.Eng.)) and have a CGPA of at least 2.00.

ACADEMIC ADVISERS

Before registration, every student entering the Faculty must select a major program of study. He must consult with the Major professor of his chosen program for the selection and time-tabling of required and elective courses. The Major professor will continue to act as his adviser during his studies in the Faculty.

4.4. ATTENDANCE AND CONDUCT IN CLASSES

Matters of discipline connected with or arising from the general arrangement for teaching are under the jurisdiction of the Dean of the Faculty or Director of the School concerned.

Students may be admonished by a professor or instructor for dishonest or improper conduct or may be reported to the Dean or Director concerned for disciplinary action. Parents or guardians may be advised of such conduct.

Punctual attendance at all classes, laboratory periods, tests, etc., is expected of all students. Absences can only be excused on the ground of necessity or illness, of which proof may be required. Special attention is called to the fact that the completion of all laboratory work is obligatory and the opportunity to make up work missed can only be provided in the case of properly excused absences.

The Faculty has the power to refuse examinations to those students who persist in absenting themselves from classes without permission.

Students are requested not to make application for additional leave either before or after holiday periods, as such leaves can only be granted in case of illness or other exceptional circumstances.

4.5 CURRICULA

CURRICULA FOR THE B.Sc.(AGR.) IN AGRICULTURAL SCIENCES

Programs leading to professional qualification in agricultural science with specialization in either Agricultural Economics, Animal Science, Plant Science, Soil Science, General Agricultural Science.

Prof. H. R. Klinck, Coordinator

Agricultural Economics Major

The curriculum leads to specialized studies in economics and/or commerce in the Faculty of Arts and in the Faculty of Management on the Montreal Campus. Graduates may enter private business at the marketing, production and management levels; the public service in Canada and in international agencies; teaching; self-employment; or graduate studies.

Prof. . . . . , Major Professor

Required courses 22 credits

COURSE NUMBER	SUBJECT	CREDITS
334-231B	Economics of Agriculture	3
334-230B	Economics of Marketing	3
334-332A	Farm Production Economics	3
334-333B	Resource Economics	3
342-250A	Principles of Animal Science	2
330-211B	Principles of Plant Science	2
372-210A	Principles of Soil Science	3
360-201A, B	Statistical Methods	3
		22

Elective courses

Primary electives: 33 credits selected from an approved list in consultation with major professor, as follows:

Agricultural sciences: 9 credits, two course sequences in a department offering preferred.

Arts and Management Faculties: 24 credits.

Free electives: selected to round out the students program and meet the requirement of 90 credits for the degree.

Animal Science Major

The curriculum in Animal Science involves intensive training in both the basic and applied biological sciences as related to domestic animals. Concentration in either Animal Genetics, Nutrition or Physiology is possible within the Animal Science major. Graduates are professionally qualified and generally enter agricultural industries, mainly sales and marketing, government service (Provincial or Federal), extension, teaching or post-graduate studies. Students in the Animal Science major may, with appropriate selection of electives, apply for entrance to the Ontario Veterinary College. **Prof. R. B. Buckland, Major Professor**

Required courses 65 credits

COURSE NUMBER	SUBJECT	CREDITS
372-210A	Principles of Soil Sciences	3
330-211B	Principles of Plant Science	2
342-250A	Principles of Animal Science	2
356-201A	Introduction to Genetics	3

376-340A	Chemistry of Food Products I	3
	Two Economics courses	6
		63

Elective courses: 28 credits selected in consultation with major professor.

General Agricultural Science Major

The curriculum is designed to provide a general scientific and applied background for modern agriculture without the requirements of a specialized program and to develop an appreciation of applied agriculture in its on-farm environment. Graduates may be employed in agri-business, agricultural extension and communications, sales and marketing, teaching or farm management. **Prof. B. W. Kennedy, Major Professor**

Required courses 28 credits

362-230B	Microbial World	3
		31

Elective courses:

Primary electives: a minimum of 12 credits selected from the following list, chosen in consultation with the Major Professor.

COURSE NUMBER	SUBJECT	CREDITS
338-201A	Introductory Meteorology	3
338-301B	Biothermodynamics	3
340-435B	Plant Breeding	3
340-439A	Field Management	3
350-330A	General Entomology	3
356-202B	Advanced Genetics	3
366-404B	Diseases of Horticultural Crops	3
372-310B	Soil Chemistry and Fertility	3

Free electives: to meet the minimum requirement of 90 credits for the degree.

Plant Protection Orientation

Additional required courses 19 credits:

COURSE NUMBER	SUBJECT	CREDITS
350-452A	Economic Entomology I	3
350-453B	Economic Entomology II	3
362-230B	The Microbial World	3
366-301B	Introductory Mycology	3
366-405A	Intermediate Mycology	3
366-495D	Seminar	1
Either		
366-403B	Diseases of Field and Forest Crops	3
or		
366-404B	Diseases of Horticultural Crops	3
		19

Elective courses:

Primary electives: the student is advised to consider the following courses:

COURSE NUMBER	SUBJECT	CREDITS
338-201A	Introductory Meteorology	3
340-434A	Weed Biology and Control	3
340-436B	Crop Adaptation and Distribution	3
340-439A	Field Management	3
346-365A	Economic Botany	3
356-202B	Advanced Genetics	3
358-443A	Storage and Handling of Horticultural Crops	3
362-442A	Food Microbiology and Sanitation	3
366-490A	Project	3
372-310B	Soil Chemistry and Fertility	3

Free electives: to meet the minimum requirements of 90 credits for the degree.

NOTE: Students taking the Plant Science Major may not take 330-211A — Principles of Plant Science for credit.

Soil Science Major

The soil science major provides a program of specialization in soil science combined with application to an area of soils use such as soil fertility and crop growth (soils and crops orientation), or conservation of soil and water (soil conservation orientation). Students planning graduate study and a career in research should choose the soil research orientation.

Prof. A. F. Mackenzie, Major Professor

Required courses 35 credits

342-250A	Principles of Animal Science	2
334-231B	Economics of Agriculture	3
360-201A, B	Statistical Methods	3
		35

General Soil Science Orientation

Primary electives: 39 credits selected from an approved list in consultation with the major professor.

Free electives to meet the minimum requirement of 90 credits for the degree.

Soils and Crops Orientation

Primary electives: 33 credits selected from an approved list in consultation with the major professor.

Soil Conservation Orientation

Primary electives: 24 credits selected from an approved list in consultation with the major professor.

Free electives to meet the minimum requirement of 90 credits for the degree.

Soil Research Orientation

Primary electives: 21 credits selected from an approved list in consultation with the major professor.

Free electives to meet the minimum requirement of 90 credits for the degree.

CURRICULUM FOR THE B.Sc. (Agricultural Engineering)

The curriculum integrates the fundamentals common to all branches of engineering with the agricultural and biological sciences. It allows persons to proceed from an understanding of why and how certain conditions affect plants and animals to the design of systems that enhance the condition of the environment and improve food handling and processing methods.

Prof. R. S. Broughton, Major Professor

Required courses 64 to 68 credits

COURSE NUMBER	SUBJECT	CREDITS
336-201A	Mechanics I	4
336-211B	Mechanics II	4
336-216B	Materials Science	3
336-312A	Circuit Analysis and Electric Machines	3
336-315B	Machine Design	4
336-341B	Strength of Materials	4
336-490D	Seminar and Project	3
372-210A	Principles of Soil Science	3
372-330B	Soil Physics	3
360-202A	Calculus	3
360-207A	Linear Algebra	3
360-205B	Differential Equations	3
360-201A, B	Statistical Methods	3
360-203A	Digital Computing I	3
305-040A	Thermodynamics	3
305-246A	Heat Transfer	3
	or	
302-211A	Heat Transfer	4
305-211B	Fluid Mechanics	3
	or	
305-230A	Fluid Mechanics	4
336-417B	Soil Mechanics and Foundations	2
	An Animal Science Course	2 or 3
	An Agronomy or Horticulture Course	2 or 3
	An Economics Course	3
		64 68

Electives selected in consultation with Major Professor.

A. Advanced Agricultural Engineering — 12 credits from:

COURSE NUMBER	SUBJECT	CREDITS
336-215B	Principles of Hydrology	3
336-314A	Agricultural Structures	3
336-320A	Systems for Processing Food Products	3
336-321B	Unit Operations in Food Processing	3
336-322B	Food Production and Processing Waste Management	3
336-323A	Physical Properties of Biological Materials	3
336-410B	Instrumentation and Control	3
336-411B	Off-Road Power Machinery	3
336-412A	Agricultural Machinery	3
336-413B	Materials Handling Systems	3
336-416B	Engineering for Land Development	3
336-419B	Structural Design	3

In special cases graduate level courses may be taken.

B. Humanities and Social Sciences — Minimum 6 credits.

C. Other courses from Faculties of Agriculture or Engineering to round out the student's program and meet the requirement of a minimum of 96 credits for the degree.

CURRICULA FOR THE B.Sc.(Agr.) DEGREE IN BIOLOGICAL SCIENCES

This area of specialization covers many aspects of biology and gives first, a training in fundamentals of science and second, an opportunity to develop specialization. All students are required to take certain 'core' courses followed by required and elective courses related to the chosen specialty to meet a credit total of 90. The aim of the program is to develop expertise in applications of biology based on fundamental aspects.

Professor R. K. Stewart, Coordinator

Core Courses Required for all major areas of specialization.

COURSE NUMBER	SUBJECT	CREDITS
332-232A	Biochemistry I	3
344-200A	Biology of Organisms I	3
344-201B	Biology of Organisms II	3
344-202B	Cellular Biology	3
344-205B	Principles of Ecology	3
360-201A, B	Statistical Methods I	3
	Total	18

Botanical Sciences Major

Botanical Sciences offers foundation courses for those who like to work with green plants or fungi. This is the option for anyone planning a career in some aspect of Botany, Mycology or Plant Pathology.

Major Professor, R. H. Estey

Required courses 31 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core Courses	18
346-251A	Plant Histological and Cytological Methods	3
346-252B	Plant Anatomy and Histology	2
346-256A	Systematic Botany	4
366-490D	Project	3
366-495D	Seminar	1
	Total	31

Elective courses: At least 8 courses selected from the following list in consultation with the Major Professor.

COURSE NUMBER	SUBJECT	CREDITS
344-306B	Biological Instrumentation	3
346-254B	Plant Morphology	2
346-353A	Plant Physiology	4
346-355A, B	Special Topic in Botanical Sciences	2
346-451B	Plant Ecology	3
356-201A	Introduction to Genetics	3
356-202B	Advanced Genetics	3
362-230B	The Microbial World	3
362-331B	Microbial Ecology	3
366-301B	Introductory Mycology	3
366-355A, B	Special Topic in Plant Pathology	2
366-402A	General Plant Pathology	3
366-403B	Diseases of Field and Forest Crops	3
366-404B	Diseases of Horticultural Crops	3
366-405A	Intermediate Mycology	3

Free electives: to meet the minimum requirements of 90 credits for the degree.

Environmental Biology Major

This program aims at training scientists with basic knowledge in Biology and strong emphasis in Ecology. As ecologists they will be best equipped to investigate the scientific aspects of the relationships between organisms and their environment and they will be less oriented towards the political and sociological components of the ecosystem.

Major Professor, D. W. Woodland

MACDONALD COLLEGE

Biological Orientation
Required courses 26 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core courses	18
375-300A	Renewable Resources	3
	Project (in an appropriate department)	3
344-495D	Seminar	2
	Total	26

Elective courses: A minimum of 12 courses selected from the following list in consultation with the Major Professor.

COURSE NUMBER	SUBJECT	CREDITS
338-201A	Introductory Meteorology	3
346-255A	Systematic Botany	3
346-451A	Plant Ecology	3
349-307A	Natural History of the Vertebrates	3
349-312A	Principles of Systematic Zoology I	3
349-315A	Biology of Inland Waters I	3
349-316B	Biology of Inland Waters II	3
349-418A	Terrestrial Animal Ecology I	3
349-419B	Terrestrial Animal Ecology II	3
350-444B	Soil Fauna Ecology	3
356-201A	Introduction to Genetics	3
360-203A, B	Digital Computing I	3
360-206A	Mathematical Methods in Ecology	3
360-610A	Statistics Methods II	3
362-230B	The Microbial World	3
366-215B	Principles of Hydrology	3
372-210A	Principles of Soil Science	3
372-230B	Physical Environment	3
375-400A	Fisheries and Wildlife	3
375-410B	Wildlife Ecology	3

Free electives: To meet the minimum requirements of 90 credits for the degree.

Major Professor, R. H. Douglas

Physical Orientation
Required courses 39 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core Courses	18
332-330A	Physical Chemistry I	3
338-201A	Introductory Meteorology	3
338-301B	Biothermodynamics	3
338-495D	Project	3
360-202A	Calculus	3
372-210A	Principles of Soil Science	3
375-300A	Renewable Resources	3

Elective courses: A minimum of 8 courses from the following list in consultation with the Major Professor.

COURSE NUMBER	SUBJECT	CREDITS
336-215B	Principles of Hydrology	3
338-303A	Principles of Atomic and Nuclear Physics	3
338-304B	Physical Basis of Climate	3
338-308B	Biometeorology	3
338-404B	Radiation Biophysics	3
346-353A	Plant Physiology	4
346-451B	Plant Ecology	3
360-203A	Digital Computing I	3
360-204A	Linear Algebra	3
360-205B	Differential Equations	3
360-206A	Mathematical Methods in Ecology	3
360-610A	Statistics Methods II	3
362-230B	Microbial World	3
372-330A	Soil Physics and Mechanics	4
375-410B	Wildlife Ecology	3

Free electives: To meet the minimum requirements of 90 credits for the degree.

Microbiology Major

Students receive training in fundamental principles and applied aspects of microbiology. Successful graduates are competent to work in government and industrial research laboratories and in the pharmaceutical, fermentation and food industries.

Major Professor R. A. MacLeod

Required courses 39 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core Courses	18
344-306B	Biological Instrumentation	3
362-230B	The Microbial World	3
362-331B	Microbial Ecology	3
362-338B	Physiology of Microorganisms	3
362-437D	Frontiers in Microbiology	1
362-492D	Project	5
362-495D	Seminar	3
	Total	39

Elective courses: A minimum of 8 courses selected from the following list in consultation with the Major Professor.

332-222B	Introductory Analytical Chemistry	3
332-230A*	Organic Chemistry I	3
332-324A	Quantitative Inorganic Analysis	3
338-301B	Biothermodynamics	3
356-201A	Introduction to Genetics	3
360-202A	Calculus	3
362-340A	Pathogenic Microbiology and Epidemiology	3
362-438A	Immunology	3
362-442A	Food Microbiology and Sanitation	3
366-301B	Introductory Mycology	3
366-406A	Virology	3

Free electives: To meet the minimum requirements of 90 credits for the degree.
*Replace by another elective if already taken at CEGEP.

Zoological Sciences Major

This program is a three-pronged one. By careful course selection the candidate may emphasize general zoology, entomology or soil and fresh water zoology. Students are given a basic background to proceed into various areas of Zoological research and into professional work in entomology and applied zoology. Those who plan careers in animal taxonomy, zoological field work, pest control, etc., are especially advised to consider this area of specialization.

Major Professor, S. B. Hill

Required courses 29 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core Courses	18
349-205B	Laboratory Techniques in Zoology	3
349-490D or 350-490D	Zoology or Entomology Project	3
349-495D	Seminar and Literature Review	2
356-201A	Introduction to Genetics	3
	Total	29

MACDONALD COLLEGE

Elective courses: A minimum of 14 courses selected from the following list in consultation with the Major Professor. Check the Announcement for years in which alternating courses are offered.

COURSE NUMBER	SUBJECT	CREDITS
177-670A	Cytology (by permission of instructor)	3
177-671B	Cytogenetics (by permission of instructor)	3
332-230A	Organic Chemistry I	3
332-231B	Organic Chemistry II	3
332-339A	Physical Chemistry	3
338-301B	Biothermodynamics	3
338-308B	Biometeorology	3
342-323A	Mammalian Physiology	4
342-422B	Reproductive Physiology	3
346-256A	Systematic Botany	3
349-203B	Invertebrate Zoology	3
349-307A	Natural History of the Vertebrates	3
349-308B	Comparative Morphology of the Vertebrates	3
349-312A	Principles of Systematic Zoology I	3
349-313B	Principles of Systematic Zoology II	3
349-315A	Biology of Inland Waters I	3
349-316B	Biology of Inland Waters II	3
349-418A	Terrestrial Animal Ecology I	3
349-419B	Terrestrial Animal Ecology II	3
349-422A	Parasitology I	3
349-423B	Parasitology II	3
350-330A	General Entomology	3
350-331A	Insect Morphology I	3
350-332B	Insect Morphology II	3
350-333A	Invertebrate Physiology I	3
350-334B	Invertebrate Physiology II	3
350-440B	Systematic Entomology	3
350-442A	Arachnida and Other Terrestrial Arthropods	3
350-444B	Soil Fauna Ecology	3
350-452A	Economic Entomology I	3
350-453B	Economic Entomology II	3
356-202B	Advanced Genetics	3
356-454A	Pest Insects	3
360-203A, B	Digital Computing I	3
360-301A	Numerical Methods	3
360-680A	Nematology (by permission of instructor)	3
362-230B	The Microbial World	3
362-331B	Microbial Ecology	3
362-338B	Physiology of Microorganisms	3
366-406A	Virology	3
372-230B	The Physical Environment	3
375-200B	Conservation	3
375-410B	Wildlife Ecology	3
375-400A	Fisheries and Wildlife	3

Free electives: To meet the minimum requirements of 90 credits for the degree.

CURRICULA FOR THE B.Sc.(Agr.) DEGREE IN RENEWABLE RESOURCES DEVELOPMENT

Students registered in any of the 5 Majors of this Group can expect to gain a comprehensive overview of the renewable resources, the socio-economic implications of development and planning as well as a thorough knowledge of the basic science disciplines involved.

Professor A. F. MacKenzie, Coordinator

Core of required courses for all major areas of specialization — 33-38 credits.

COURSE NUMBER	SUBJECT	CREDITS
334-200A	Principles of Economics	3
334-343B	Resource Economics	4
344-205B	Principles of Ecology	3
352-300A	Communication —Extension Methods	3
360-201A, B	Statistical Methods	3
370-230A	Introductory Sociology	3
372-230B	The Physical Environment — *or any two of 372-210A Princ. of Soil Sci. 338-201A Intro. Met. 336-215B Prin. of Hydrology*	3-6
375-300A	Renewable Resources	3
375-491D	Seminar	2
375-496D or 375-497D	Project I (or a project in an approved Dept. or Division) Project II	3-5
		30-35

*These courses are required for Environmental Conservation, and suggested for Agric. Land Planning and Development, and Community Resource Development.

Agricultural Land Planning and Development

This major prepares the student to carry out development, experiment with solutions of integrated resource management in terms of optimal land use under any given set of economic, social and ecological conditions. **Prof. J. F. G. Millette, Major Professor**

Required courses 44-49 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core	30-35
372-210A	Principles of Soil Science	3
372-250A	Geology and Geomorphology	3
372-320A	Soil Geography	3
372-420A	Soil Survey	3
		12

Elective courses

Primary electives: a minimum of 18 credits selected from an approved list in consultation with major professor.

Primary electives (18 credits from the following)

336-215B	Principles of Hydrology	3
336-214E	Surveying	2
336-416B	Engineering for Land Development	3
334-410A	Land and Resource Appraisal	3
358-332D	Landscape Architecture	3
370-341A	The Urban Community	3
370-360B	Rural Sociology	3
372-330B	Physical Properties of Soils	3
374-200E	Forest Resources	3
338-201A	Introductory Meteorology	3

Free electives: to meet the minimum requirement of 90 credits for the degree.

MACDONALD COLLEGE

List of recommended elective courses on the Macdonald Campus.

336-212A	Graphics	3
336-417B	Soil Mechanics and Foundations	2
330-211B	Principles of Plant Science	2
346-451A	Plant Ecology	3
340-332B	Industrial crops	3
348-310B	Studies in the Mass Media	3
348-330A	Technical and Research Writing	3
352-301B	Community Development	3
358-335B	Floriculture	3
360-203A	Digital Computing I	3
360-401A	Mathematical Statistics I	3
360-402A	Mathematical Statistics II	3
360-202A	Calculus	3
360-303B	Digital Computing II	3
338-308B	Biometeorology	3
338-304B	Physical Basis of Climate	3
375-200B	Conservation	3
375-333A	Phys. & Biol. Aspects of Pollution I	3
375-334B	Phys. & Biol. Aspects of Pollution II	3
375-410B	Wildlife Ecology	3
375-412B	Field techniques in Area Development	3
370-350A	Research Methods for Social Surveys	3
349-315A	Biology of Inland Waters I	3
349-316B	Biology of Inland Waters II	3
372-310B	Soil Chemistry and Fertility	3

List of recommended electives on the Montreal Campus.

154-250D	Introduction to Economic Theory	6
154-313D	Economic Development	6
154-425D	Economics of Ecology	6
280-221A	Behavioural Science I (Management)	3
280-222B	Behavioural Science II (Management)	3
183-308B	Air Photo Interpretation (Geography)	3
301-001A	History of Architectural Theory I	3
301-102B	History of Architectural Theory II	3
301-010A	Architecture, Communication and Behaviour	4
301-230A	Landscape (Architecture)	2
473-144A	Property I (Law)	3
495-471B	Environment and the Law (Law)	2

Community Resource Development

This Major concentrates on interdisciplinary study of the development, use and management of natural and community resources for human needs. It involves an integration of the physical, economic, social, and institutional approaches to the development of an area's resources. Emphasis is placed on public policy considerations affecting resource use and the attempts by community citizens and government organizations to increase the economic opportunity and quality of living of communities and their surrounding regions.

Prof. M. Chevrier, Major Professor

Required core courses 30-35

Primary electives: at least 24 credits from the following courses to constitute a primary area of specialization. These are to be chosen by the student and approved by the major professor.

COURSE NUMBER	SUBJECT	CREDITS
372-210A	Principles of Soil Science	3
330-211B	Principles of Plant Science	2
342-250A	Principles of Animal Science	2
370-360B	Rural Sociology	3
370-342B	Social Processes and Institutions	3
370-350A	Research Methods for Social Surveys	3
375-212B	Community Resource Development	3
375-412A	Field Techniques	3
360-203A	Digital Computing I	3
334-231A	Economics of Agriculture	3
334-420B	Political and Economic Aspects of Resource Problems	3

Secondary electives: at least 18 credits in related courses from any area of specialization normally from within renewable resources development major areas including area of primary interest.

Free electives: to meet the minimum requirement of 90 credits for the degree. Selected in consultation with major professor.

Environmental Conservation

This Major concentrates on the physical environment, bringing to bear areas of study such as soil and water management and resource development.

Prof. E. R. Fillmore, Major Professor

Required core courses 30-35 credits

Elective courses

Primary electives: a minimum of 24 credits selected from the following list in consultation with major professor.

COURSE NUMBER	SUBJECT	CREDITS
Year I		
332-222B	Introductory Analytical Chemistry	3
332-232A	Biochemistry I	3
338-201A	Introductory Meteorology*	3
356-201A	Introduction to Genetics	3
362-230B	The Microbial World	3
372-210A	Principles of Soil Science*	3
372-250A	Geology and Geomorphology	3
375-200B	Conservation	3
274-200B	Forest Resources	3
Year II		
336-215B	Principles of Hydrology*	3
338-201B	Biothermodynamics	3
338-307B	Atmospheric Physics	3
349-315A	Biology of Inland Waters I	3
349-316B	Biology of Inland Waters II	3
362-331B	Microbial Ecology	3
372-320A	Soil Geography	3
372-330B	Physical Properties of Soils	3
375-333A	Physical and Biological Aspects of Pollution I	3
375-334B	Physical and Biological Aspects of Pollution II	3
332-451A	Food Chemistry I	3
340-434A	Weed Biology and Control	3
346-451B	Plant Ecology	3
350-450A	Economic Entomology	3
375-410B	Wildlife Ecology	3

*required courses

Secondary electives: a minimum of 18 credits in related courses selected in consultation with major professor.

Free electives: to meet the minimum requirement of 90 credits for the degree.

Resource Economics and Management

Students in this Major will concentrate on the interaction of social and economic systems and their impact on the human environment through the emphasis on economics and management courses.

Prof. G. R. Bachman, Major Professor

Required core course 30-35 credits

Primary electives: at least 30 credits from the following courses constitute a primary area of specialization. These are chosen by the student and approved by the major professor.

Introductory courses in economics and management must be elected early in the course sequences to meet prerequisite requirements to other courses.

COURSE NUMBER	SUBJECT	CREDITS
*154-250D	Intro. Economic Theory	6
*154-302D	Money and Banking	6
*154-425D	Economics of Ecology	6
*154-307D	Economic Statistics	6
*280-221A	Behavioural Science	3
*280-222B	Behavioural Science	3
*280-330D	Elements of Marketing	6
*280-410D	Commercial Law	6
*280-300D	Management Accounting	6
*160-211D	Comparative Government	6
334-231A	Economics of Agriculture	3
334-420B	Political and Economic Aspects of Resource Problems	3
*280-204A, B or 360-203A	Digital Computing I	3
360-202A	Calculus	3

Secondary electives: at least 18 credits of related courses from any area of specialization that can be related to renewable resources development, including the area of primary interest.

Free electives: to meet the minimum requirements of 90 credits for the degree.

*Offered on the McGill campus.

Wildlife Resources

This Major concentrates on the Biological resources emphasizing the co-development of competence in wildlife ecology and other complementary disciplines. This Major leads to work in resource planning, wildlife socio-economies, wildlife administration, wildlife management and wildlife resource evaluation.

Prof. J. R. Bider, Major Professor

Required Core courses 30-35 credits

Elective courses

Primary electives: a minimum of 24 credits selected from the following list in consultation with major professor.

COURSE NUMBER	SUBJECT	CREDITS
349-308B	Vertebrate Morphology	3
349-307A	Natural History of the Vertebrate	3
349-312A	Principles of Systematic Zoology I	3
349-313B	Principles of Systematic Zoology II	3
349-315A	Biology of Inland Waters I	3
349-422A	Parasitology I	3
349-423B	Parasitology II	3
350-330A	General Entomology	3
356-201A	Introduction to Genetics	3
356-202B	Advanced Genetics	3
356-203A	Heredity, Evolution and Society	3
375-400A	Fisheries and Wildlife	3
375-410B	Wildlife Ecology	3
349-418A	Terrestrial Animal Ecology I	3
349-419B	Terrestrial Animal Ecology II	3
346-451B	Plant Ecology	3
346-256A	Systematic Botany	3
374-200B	Forest Resources	3
374-330A	Private Forestry	3
342-301B	Principles of Animal Breeding	3
342-323A	Mammalian Physiology	4
342-330A	Fundamentals of Nutrition	3
342-422B	Reproductive Physiology	3
342-332B	Applied Animal Nutrition	3
375-200B	Conservation	3
375-411B	Recreation Resource Management	3

Secondary electives: a minimum of 18 credits in related courses selected in consultation with major professor.

Free electives: to meet the minimum requirement of 90 credits for the degree.

CURRICULA FOR THE B.Sc.(F.Sc.) DEGREE IN FOOD AND CONSUMER SCIENCES

This area of specialization offers the student a number of related Majors in the field of Food and Consumer Sciences. Depending on the Major selected the student upon completion a) is prepared to serve the community in all types of consumer information services, b) has the necessary background to become a Home Economics Specialist Teacher, c) can enter the professions of dietetics, food technology, or food administration, d) can proceed to a career in research and development, or e) do graduate work in the different scientific fields.

Prof. E. S. Idziak, Coordinator

Core courses:* Required by all students taking the non-professional Majors within the Food and Consumer Sciences area of specialization — 18-20 credits.

COURSE NUMBER	SUBJECT	CREDITS
332-232A	Biochemistry I	3
344-202B	Cellular Biology	3
360-201A, B	Statistical Methods I	3
362-230B	The Microbial World	3
377-200A	Perspectives in Food Science	3
377-490D or 377-491D	Food and Consumer Sciences Project I Food and Consumer Sciences Project II	3 5
		18 or 20

*Students entering without any organic chemistry must take Organic Chemistry I (332-230A) in their first term.

Consumer Services Major

This Major is directed to subject matter dealing with areas of consumer interests and problems. By a judicious selection of electives, students may concentrate on nutrition, economics, communications arts, etc., as related to consumer education. Graduates find careers in Consumer Information Services, Marketing Research and the Communication Media.

Prof. C. L. Fergusson, Major Professor

Required courses — 39 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core courses: (page 43)	18
334-200A	Economics I	3
334-201B	Economics II	3
376-210A	Food Standards I	3
376-211B	Food Standards II	3
381-330A	Consumer Education I	3
381-331B	Consumer Education II	3
386-332A	Textiles — Natural and Man Made Fibres	3

Elective courses: To meet the minimum requirements of 90 credits for the degree. Chosen in consultation with major professor.

Nutrition Major

The graduate from a nutrition Major has a narrow but challenging and unlimited future. Normally the graduate will continue on to further studies preparing for careers in research or as specialist in nutrition for government agencies, particularly those agencies concerned with the maintenance of the good health of our society. **Prof. H. J. Hueckel, Major Professor**

Required courses — 57 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core courses: (page 43)	18
332-222B	Introductory Analytical Chemistry	3
332-324B	Quantitative Inorganic Analysis	3
332-451A	Food Analysis I	3
342-234B	Biochemistry II	3
342-323A	Mammalian Physiology	4
342-330A	Fundamentals of Nutrition	3
342-331B	Fundamentals of Human Nutrition	3
344-200A	Biology of Organisms I	3
376-210A	Food Standards I	3
382-305B	Normal Human Nutrition	3
382-435B	Applied Human Nutrition	3
382-441A	Diet Therapy I	3
382-442B	Diet Therapy II	3

Elective courses: To meet the minimum requirements of 90 credits for the degree. Chosen in consultation with major professor.

Food Chemistry Major

This selection of courses is intended for those who look to careers as food or foodstuffs chemists in industry or the public services. The selection is also appropriate for those who may wish to proceed to graduate work in food science, biochemistry, nutritional sciences, or clinical chemistry.

Prof. B. E. Baker, Major Professor

Required courses 60 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core courses: (page 43)	20
332-231B	Organic Chemistrly II	3
332-222B	Introductory Analytical Chemistry	3
332-234B	Biochemistry II	3
332-324A	Quantitative Inorganic Analysis	3
332-333A	Chemical Syntheses and Laboratory Techniques	3
332-339A	Introductory Physical Chemistry	3
332-340B	Advanced Physical Chemistry	3
332-434B	Chemical Structure and Instrumentation	3
332-451A	Food Analysis I	3
332-452B	Food Analysis II	3
342-330A	Fundamentals of Nutrition	3
342-331B	Fundamentals of Human Nutrition	3
or		
342-332B	Applied Animal Nutrition	3
362-442A	Food Microbiology and Sanitation	3
377-495D	Food and Consumer Sciences Seminar	1

Elective courses: To meet the minimum requirement of 90 credits for the degree. Chosen in consultation with major professor.

Food Administration Major

A wide choice of management careers exists in the Food Industry. Graduates may choose from opportunities in the hospitality area of hotel, motel, or tourist administration or in food service areas of public restaurants, cafeterias, catering services, in-plant feeding, the armed services, institutional operations, as well as in the related fields of sales and advertising.

Prof. D. A. Raymond, Major Professor

Required courses: 57 credits.

COURSE NUMBER	SUBJECT	CREDITS
	Core courses: (page 43)	18
334-200A	Principles of Economics I	3
334-201B	Principles of Economics II	3
368-301A	Psychology	3
376-210A	Food Standards I	3
376-211B	Food Standards II	3
380-343A	Accounting & Cost Control	3
380-345B	Food Facility Layout and Planning	3
380-441B	Food Service Production Management	3
380-442A	Organization & Management	3
380-444A	Personnel Management I	3
380-445B	Personnel Management II	3
382-212B	Basic Nutrition	3
384-452A	Instructional Communication II	3

Elective courses: To meet the minimum requirement of 90 credits for the degree. Chosen in consultation with major professor.

Majors leading to membership in Professional Associations
Dietetics Major

The majority of dietitians practise their profession as a member of a health care team in hospitals, health care units or public service agencies. Within the profession there are six areas of concentration: 1) Diet therapy, 2) Teaching, 3) Administration of Dietary Services,

4) Public Information, 5) Research, and 6) Consultative Services. Selection of appropriate courses gives the students a sound foundation in their chosen field of study.

Prof. D. A. Raymond, Major Professor

Required courses: 63 credits.

COURSE NUMBER	SUBJECT	CREDITS
332-232A	Biochemistry I	3
332-234B	Biochemistry II	3
334-200A	Principles of Economics I	3
342-321A	Mammalian Physiology	3
342-330A	Fundamentals of Nutrition	3
342-331B	Fundamentals of Human Nutrition	3
344-200A	Biology of Organisms I	3
344-202B	Cellular Biology	3
360-201A	Statistics Methods	3
362-230B	The Microbial World	3
368-301A	Psychology	3
376-210A	Food Standards I	3
376-211B	Food Standards II	3
377-200A	Perspectives in Food Science	3
377-490D	Food and Consumer Sciences Project 1	
or		
377-497D	Food and Consumer Sciences Seminar III	
380-441B	Food Service Production Management	3
380-444A	Personnel Management I	3
380-445B	Personnel Management II	3
382-441A	Diet Therapy I	3
382-442B	Diet Therapy II	3
384-452A	Instructional Communication II	3

Students will be informed of the recommended courses for each specialization by the major professor. In addition electives will be selected in an amount to meet the minimum requirement of 90 University credits for the degree.

Food Science Major

The course selection reflects the requirements for membership in the professional association of Food Technologists. Graduates find employment in the areas responsible for product quality control, food processing management, industrial research and development, or they may continue to do graduate studies in the applied sciences. **Prof. H. J. T. Beveridge**

Required courses: 57 credits.

COURSE NUMBER	SUBJECT	CREDITS
332-222B	Introductory Analytical Chemistry	3
332-232A	Biochemistry I	3
332-234B	Biochemistry II	3
332-324A	Quantitative Inorganic Analysis	3
332-339A	Introductory Physical Chemistry	3
332-451A	Food Analysis I	3
332-452B	Food Analysis II	3
334-200A	Principles of Economics I	3
336-320A	Systems for Processing Food Products	3
342-330A	Fundamentals of Nutrition	3
348-330A	Technical & Research Writing	3
358-444B	Fruit & Vegetable Processing	3
360-201A	Statistics Methods	3
360-203A	Digital Computing I	3
or B		
362-230B	The Microbial World	3

376-210A	Food Standards I	3
377-200A	Perspectives in Food Science	3
377-490D	Food and Consumer Sciences Project I	3

Elective courses: To meet the minimum requirement of 90 credits for the degree. Chosen in consultation with major professor.

Major leading to a Bachelor of Education Degree
Home Economics Education Major

This program leads to a B.Ed. degree majoring in home economics. The student registers for two years in the School of Food Science (Macdonald Campus) followed by one year in the Faculty of Education (Montreal Campus). Graduates also receive a Teaching Permit for secondary schools in Quebec which is replaced by a Teaching Certificate after two years of successful teaching. This program also prepares the student for extension of communications positions in home economics.

Prof. V. Shipley, Major Professor

Required courses: 33 credits.

COURSE NUMBER	SUBJECT	CREDITS
376-210A	Food Standards I	3
376-211B	Food Standards II	3
378-331B	Family Management	3
378-332A	Family Living — Development	3
381-330A	Consumer Education I	3
381-331B	Consumer Education II	3
382-212B	Basic Nutrition	3
384-320B	Instructional Communications I	3
386-220A	Contemporary Clothing Construction	3
386-322B	Psychological and Social Bases of Clothing	3
386-332A	Textiles — Natural and Man Made Fibres	3

Elective courses: To meet the minimum requirements of 60 credits. Chosen in consultation with Major Professor. A further 30 credits will be taken in the Faculty of Education for completion of the degree.

4.6 ASSOCIATED COLLEGES

By special agreement, the Nova Scotia Agricultural College, Truro, N.S., has arranged to provide their students with a program of study permitting transfer to the upper years in Agriculture or Food Science at Macdonald College. Students who have completed such a program of study with satisfactory standing in courses equivalent to those of the B.Sc.(Agr.), the B.Sc.(Agr.Eng.) and the B.Sc.(F.Sc.) curricula will be admitted to the appropriate years of the program, provided that their overall averages, and their grades in individual courses are considered satisfactory by the Committee on Admissions.

4.7 REQUIREMENTS FOR GRADUATION

The requirements for graduation are:

(a) A minimum CGPA of 2.00 with the minimum credit requirements for the Major.

(b) *Practical experience.* Satisfactory fulfilment of regulations concerning practical and professional experience, as below.

At least one season of farm experience is essential for admission to certain options in agricultural sciences. Students who have not secured such experience by the beginning of the Second year may find themselves ineligible for admission to these options. In the case of students from outside Canada, this experience is best obtained in the country from which the student comes.

Students majoring in Agronomy are advised to spend one summer in the Agronomy Department at the College, or at some other approved college or experimental farm. This may be between the First and Second or Second and Third years.

Students majoring in Agricultural Engineering are required to have at least 1,000 hours experience in some phase of agricultural engineering work approved by the Agricultural Engineering Department.

In General Agricultural Science, farm experience or experience in a related area is not a prerequisite to registration in this option. However, some background is desirable and can be reviewed with the Chairman in terms of the specific interests of the students at first registration in the Option.

Students majoring in Horticulture are advised to spend one summer in the Horticulture Department at the College, or at some approved vegetable farm, fruit farm, or nursery.

No summer work or practical experience requirements need be met in the case of students majoring in other options.

5 DESCRIPTION OF COURSES

5.1 AGRICULTURAL ENGINEERING

NOTE: Instructors may refuse registration in a course to any student who does not have, in their opinion, an adequate academic background in the area.

330-210A. MECHANICS I. (4 Credits; 3 lectures and 2 hours-problems.) Non-concurrent force systems; analysis of simple trusses and multiforce frames; friction; shearing forces and bending moments in beams and frames; centres of gravity; solution of problems by energy methods. PROFESSOR MARQUIS

336-211B. MECHANICS II. (4 Credits; 3 lectures and 2 hours-problems; *Prerequisite:* Agricultural Engineering 336-210A.) Moments of inertia of areas and masses; curvilinear motion of particles, kinematics and kinetics of particles; kinematics and kinetics of rigid bodies, relative motion, kinetics of rigid bodies; simple harmonic motion, pendulums governors, gyroscopes; statics in three dimensions; shearing forces and bending moments in beams and frames and rotating bodies and link assemblies. PROFESSOR MALIK

336-212A. GRAPHICS. (3 Credits; 2 lectures and 2 2-hour labs.) Solution of two- and three-dimensional geometry problems by graphical techniques, charts and nomography. Graphical calculus. PROFESSOR OGILVIE

336-214E. SURVEYING. (2 Credits; 2 weeks following second term.) Use of engineer's tape, level, transit, plane table, hand level, and compass for land measurement, differential levelling, topographic mapping, surveying computations and preparation of plans. PROFESSOR BROUGHTON

336-215B. PRINCIPLES OF HYDROLOGY. (3 Credits; 3 lectures and one 2-hour lab.) Measurement and analysis of components of the water cycle. Precipitation, mass curves, intensity — duration — frequency relationships. Energy balance, evapotranspiration from lakes, soil and vegetal covers. Interception, infiltration, ground-water and wells. Runoff hydrograph components. Estimation of water quantities and water flow rates for design of water control projects. Snowmelt, basin yield. PROFESSOR BROUGHTON

336-216B. MATERIALS SCIENCE. (3 Credits; 2 lectures and 1 2-hour lab.) Relation between structure and properties in ceramic and organic materials. Bonding, structures, imperfections. Phase diagrams. Shaping, joining and testing of materials. Heat treatment, work in hardening and annealing of metals, introduction to physical metallurgy and processes. Failure theories. PROFESSOR McKYES

336-305A. FLUID MECHANICS. (4 Credits; 3 lectures and one 2-hr. lab. or problems.) (Offered in alternate years, given in 1974-75.) Properties of fluids; principles of flow of incompressible and compressible fluids; pressure variations; flow measurement; dimensional analysis; introduction to model studies; energy conversion; friction; boundary layers; conduit and open channel systems; simple applications to turbo machinery. PROFESSOR BROUGHTON

336-312A. CIRCUIT ANALYSIS. (3 Credits; 3 lectures and one 2-hr. lab. or problems.) General circuit laws and d.c. circuits; electromagnetic circuits; inductance and capacitance; natural and forced response of circuits; analysis of single phase and three phase networks; electromechanical, electrochemical and electron energy conversion; electrical instruments. PROFESSOR McKYES

336-314A. AGRICULTURAL STRUCTURES. (3 Credits; 3 lectures and 2-hr. lab.) Analysis and design of structures to house animals and plants and to process and store animal and plant products. Introduction to environmental control systems and animal waste management. PROFESSOR OGILVIE

336-315B. MACHINE DESIGN. (4 Credits; 3 lectures, 2 hours-problems; *Prerequisite:* Agricultural Engineering 336-341B.) (Offered in alternate years, given in 1975-76.) Design of shafting, bearings, gear, belt and chain drives, clutches, brakes, vibrations, fasteners, welded joints, frames. Principles and practices of Engineering Drawing will be adhered to in laboratory submissions. PROFESSOR NORRIS

336-316B. INSTRUMENTATION AND MEASUREMENT. (3 Credits; 2 lectures and 1 conference.) Problems of measurement, with principles behind use of instruments in chemical and physical measurements, and the errors inherent in such analyses. Laboratory practice in instrumentation and measurement techniques.
PROFESSORS NORRIS, HENNEBERRY, SCHUEPP AND MACKENZIE

336-320A. SYSTEMS FOR PROCESSING FOOD PRODUCTS. (3 Credits; 3 lectures and one 2-hr. lab.) Principles and use of electricity, steam, refrigeration and hydraulics in food plants; design features of specialized processing equipment, and process control. PROFESSOR.....

336-321B. UNIT OPERATIONS IN FOOD PROCESSING. (3 Credits; 3 lectures and one 2-hr. lab.; *Prerequisite:* 336-320A or 302-211A.) Analysis and design of such processes as drying, dehydration, refrigeration, size reduction, separation and materials handling, including applications of heat and mass transfer. PROFESSOR.....

336-322B. FOOD PRODUCTION AND PROCESSING WASTE MANAGEMENT. (3 Credits; 2 lectures and one 2-hr. lab.) (Offered in alternate years, given in 1974-75.) Characteristics of waste; storage, transport and disposal, treatment processes, aspects of pollution control. PROFESSOR OGILVIE

336-323A. PHYSICAL PROPERTIES OF BIOLOGICAL MATERIALS. (3 Credits; 2 lectures and one 2-hr. lab.) (Offered in alternate years, given in 1975-76.) An engineering analysis of the structure, physical attributes, mechanical and rheological properties of biological materials, emphasizing the relationship of these properties to production and processing of agricultural products and food. Mathematical models considering size, shape, volume, surface area, density, quasistatic and dynamic viscoelastic behaviour; non-Newtonian fluid models; optical properties; behaviour of granular materials. PROFESSOR NORRIS

336-341B. STRENGTH OF MATERIALS. (4 Credits; 3 lectures and one 3-hr. lab.; *Prerequisite:* Agricultural Engineering 336-210A.) Stress, strain, resilience, elastic and plastic properties of materials; bending moment and shear force diagrams; bending and shear stress; deflections; simple, fixed and continuous beams, torsion and helical springs, reinforced concrete beams; columns, bending and direct stress; general case of plane stress; Mohr's circle. PROFESSOR MARQUIS

336-410B. INSTRUMENTATION AND CONTROL. (3 Credits; 3 lectures and one 2-hr. lab.; *Prerequisite:* Agricultural Engineering 336-312A.) (Offered in alternate years, given in 1974-75.) Principles and operating characteristics of electrical transducers with emphasis on their application in agricultural process control and research. PROFESSOR NORRIS

336-411B. OFF-ROAD POWER MACHINERY. (3 Credits; 2 lectures and one 3-hr. lab.; *Prerequisite:* Agricultural Engineering 336-211B.) (Offered in alternate years, given in 1975-76.) Mechanics of wheels and tracks; terrain vehicle mobility and soil trafficability; vehicle stability, steering forces and steering geometry; compression and spark ignition engines; fuels and lubricants, introduction to combustion. PROFESSOR McKYES

336-412A. AGRICULTURAL MACHINERY. (3 Credits; 3 lectures and 1 lab.) Study and analysis of machines for tillage, harvesting, crop processing and handling. Field tests, load studies, design requirements; design of machines and components for agricultural applications. PROFESSOR NORRIS

336-413B. MATERIALS HANDLING SYSTEMS. (3 Credits; 3 lectures; *Prerequisites:* Mathematics 360-201A and 360-203A.) (Offered in alternate years, given in 1974-75.) Systems and equipment for handling agricultural and food products. Introduction to work study methods and operations research. PROFESSOR MALIK

336-416B. ENGINEERING FOR LAND DEVELOPMENT. (3 Credits; 3 lectures and one 2-hr. lab.) (Offered in alternate years, given in 1974-75.) The engineering aspects of irrigation, drainage, erosion control and land clearing, water conservation, projects, dam and reservoir design and integrated development projects. PROFESSOR BROUGHTON

336-417B. SOIL MECHANICS AND FOUNDATIONS. (2 Credits; 2 lectures and one 2-hr. lab.) (Offered in alternate years, given in 1974-75.) Subsurface explorations methods, soil strength, settlement and consolidation, foundation stability, slope stability. PROFESSOR McKYES

336-419B. STRUCTURAL DESIGN. (3 Credits; 3 lectures and one 3 hr. lab.; *Prerequisites:* Agricultural Engineering 336-341B, Civil Engineering 303-213A.) Structural Design in Steel and Timber; Application of complete design procedures to building beams, columns, tension members, wind bracing and roof trusses. Riveted, bolted, welded, nailed and glued connections; working stress design; plastic design for ultimate loading. PROFESSOR MARQUIS

336-490D. PROJECT. (3 Credits; 1 lecture.) Presentation of oral and written reports on approved Agricultural Engineering topics. Library and laboratory research will be required. PROFESSOR OGILVIE AND STAFF

Graduate courses available to undergraduates:

336-602A. ENVIRONMENT CONTROL IN AGRICULTURAL STRUCTURES. (3 Credits; 3 lectures and one 2-hr. lab.; *Prerequisites:* Mech. Engineering 305-040A, 305-246A.) Offered in alternate years, given in 1975-76.) PROFESSOR MARQUIS

336-605A. FUNCTIONAL ANALYSIS OF MACHINES. (3 Credits; 3 lectures; *Prerequisites:* Agricultural Engineering 336-211B and 336-323A.) (Offered in alternate years, given in 1974-75.) PROFESSOR NORRIS

The following courses to be taken with the Faculty of Engineering, McGill Campus. (See Faculty of Engineering for calendar descriptions.)

305-246A. HEAT TRANSFER. (3 Credits; 3 lectures and 1 hr. problems.)
or
302-211A. HEAT TRANSFER. (4 Credits; 3 lectures and 3 hrs. lab.)
303-211B. FLUID MECHANICS. (4 Credits; 3 lectures and 3 hrs. lab.)
or
305-230A. FLUID MECHANICS. (3 Credits; 3 lectures and 1 hr. lab.)
305-040A. THERMODYNAMICS I. (3 Credits; 3 lectures and 1 hr. problems.)

5.2 AGRICULTURE

330-211B. PRINCIPLES OF PLANT SCIENCE. (2 Credits; 3 lectures.) Plants as the basic food resource for man. The relation between plants and different segments of the ecosystem with respect to ability to manage the system. PROFESSORS TAPER AND . . . . . .

330-310B. FOOD FOR MAN-AGRICULTURE AND SOCIETY. (3 Credits; 2 lectures and one 2-hr. conference.) This course will develop understanding and awareness of agriculture's role in society. The nature of agriculture, the impact of changes in agricultural technology on society and on environment, use of natural resources by agriculture, and present and future role of agriculture in developed and less developed countries will be examined. PROFESSOR STEPPLER

330-310A. Same as above. Given on the Montreal Campus.

330-495D. SEMINAR AND ASSIGNMENT. (2 Credits; 1 lecture.) Preparation, presentation and discussion of reports upon approved agricultural subjects chosen in consultation with staff members of the departments concerned. PROFESSOR B. W. KENNEDY

5.3 AGRONOMY

340-331A. CEREAL CROPS. (3 Credits; 3 lectures and 1 3-hr. lab. period.) (Offered in alternate years, given in 1974-75.) *Textbook: Cereal Crops,* by Leonard and Martin

(Collier-Macmillan Ltd.) An intensive study of cereal crops (small grains, corn, etc.), including historical development, economic importance, botanical relationships, geographical distribution of types and cultivars; cultural practices in cereal crop production; quality factors associated with grading, processing and utilization of cereal crop products.
PROFESSOR KLINCK

340-332B. INDUSTRIAL CROPS. (3 Credits; 3 lectures and 1 3-hr. lab.) (Offered in alternate years, given in 1974-75.) A study of temperate and subtropical crops grown for oil, fibre, sugar and other industrial products. Attention is given to historical development and economic importance, botanical types and cultivars, cultural practices, quality factors, grading, processing and utilization.
PROFESSOR GENDRON

340-333A. FORAGE CROPS. (3 Credits; 3 lectures and 1 3-hr. lab.) An intensive study of the scientific information available relevant to forage crop production. The plant materials will be studied from a morphological, physiological and ecological point of view. Cultural practices, seed production, conservation methods and quality evaluation will all be considered.
PROFESSOR STEPPLER

340-350A. EXPERIMENTAL METHODS IN AGRONOMY. (2 Credits; 8 days prior to Fall term.) A course designed to provide the student with practical knowledge of handling experimental plant materials in Agronomy. Practice in preparation and establishment of research plots in the field and in controlled environment rooms, recording and analysing data from crop measurements, harvesting and processing research materials, crop hybridization, preparation of reports.
PROFESSOR KLINCK AND STAFF

340-434A. WEED BIOLOGY AND CONTROL. (3 Credits; 3 lectures and 1 3-hr. lab.) The science of plants applied to those species called weeds. The biology of weeds as related to the principles of biological, physical and chemical control.
PROFESSOR RILEY

340-435B. PLANT BREEDING. (3 Credits; 3 lectures and 1 3-hr. lab.) Problems, methods and the interpretation of results, in the breeding and improvement of plants.
PROFESSOR LAWSON

340-436B. CROP ADAPTATION AND DISTRIBUTION. (3 Credits; 3 lectures and 1 3-hr. lab.) Factors influencing crop adaptation and their effect on distribution.
PROFESSOR GENDRON

340-439A. FIELD MANAGEMENT. (3 Credits; 2 lectures and 1 3-hr. lab.) Application of soil science and biology to crop production. Limiting factors to crop yields and treatments to overcome limitations. Use of fertilizers and manures, herbicides, crop rotation, tillage, drainage and irrigation, etc. to overcome limitations and to conserve soil productivity.
PROFESSOR GENDRON

340-440B. SEED DEVELOPMENT, PRODUCTION AND ANALYSIS. (3 Credits; 2 lectures and 1 3-hr. lab.) (Offered in alternate years, given in 1975-76.) The development and life processes of seeds in relation to seed production, processing and storage. A study is made of seed characteristics and their utilization in seed separation, analysis and grading. Attention is given to seed marketing services, seed certification systems and seed laws.
PROFESSOR KLINCK

340-490D. PROJECTS. (3 Credits; 1 lecture.) Directed stydy on an approved problem, requiring both oral and written presentation. U2 and U3 students must attend all oral presentations.
PROFESSOR KLINCK AND STAFF

5.4 ANIMAL SCIENCE

342-230E. PRINCIPLES OF HUMAN NUTRITION. (One 3-hr. lecture.) A discussion of the nutrients, water, carbohydrates, lipids, proteins, minerals and vitamins, with emphasis on their functions and utilization by humans. Nutrient content of foods and human nutrition requirements will be included. Current topics of concern will be integrated with the fundamental concepts of nutrition. (Designed to suit the requirements of the Faculty of Medicine.)
PROFESSORS DONEFER AND HARTSOCK

342-250A. PRINCIPLES OF ANIMAL SCIENCE. (2 Credits; 3 lectures.) Scientific principles underlying the livestock and poultry industries i.e., breeding, physiology, nutrition and disease — and their influence upon management practices. Emphasis is placed on the adjustment of environment to the animal.
PROFESSOR TOUCHBURN

342-301B. PRINCIPLES OF ANIMAL BREEDING. (3 Credits; 3 lectures and 1 2-hr. lab.; *Prerequisite:* Genetics 356-201A.) The qualitative and quantitative aspects of genetics as

they apply to the economic improvement of domestic mammals and birds. Areas covered include animal domestication, animal cytology, mendelian traits of economic importance, principles of population genetics, statistical tools to describe populations, environmental effects, selection and mating systems. PROFESSORS MOXLEY AND BUCKLAND

342-312B. ANIMAL PATHOLOGY. (3 Credits; 3 lectures.) An introductory course of Animal Pathology. Includes discussion of causative agents, the development of the disease process, degenerative changes, protective mechanisms, factors influencing spread of disease and the control of disease. DR. PROCTER

342-323A. MAMMALIAN PHYSIOLOGY. (4 Credits; 3 lectures and 1 3-hr. lab.; *Prerequisite:* Biology 344-202B.) A study of the functions of various organs in mammals including the nervous system, muscle, blood, the cardiovascular system, respiration, gastrointestinal and metabolic systems, urinary systems, the endocrine glands and the reproductive system. PROFESSORS LAGUE AND R. D. BAKER

342-330A. FUNDAMENTALS OF NUTRITION. (3 Credits; 3 lectures and 1 2-hr. lab.; *Prerequisites:* Chemistry 332-232A and 332-234B.) A discussion of the nutrients; water, carbohydrates, lipids, proteins, minerals and vitamins, with particular emphasis on their functions in and essentiality for the animal organism. PROFESSOR HARTSOCK

342-331B. FUNDAMENTALS OF HUMAN NUTRITION. (3 Credits; 3 lectures and 1 2-hr. lab.; *Prerequisite:* Animal Science 342-330A.) Emphasis on applied quantitative aspects of human nutrition. Nutrient utilization, evaluation and requirements, as related to dietary standards. PROFESSOR DONEFER

342-332B. APPLIED ANIMAL NUTRITION. (3 Credits; 3 lectures and 1 2-hr. lab.) Classification of feedstuffs based on their function in rations; discussion of digestibility and utilization of nutrients, energy and nutrient requirements for maintenance, production and reproduction and integration of these into feeding programs for livestock and poultry. PROFESSORS DONEFER, HARTSOCK AND TOUCHBURN

342-422B. REPRODUCTIVE PHYSIOLOGY. (3 Credits; 3 lectures and 1 3-hr. lab.; *Prerequisite:* Animal Science 342-321A.) Comparative physiology of reproduction in laboratory and domestic animals. Hypothalamic, pituitary and gonadal interrelationships, synchronization of estrus, artificial insemination, livability of spermatozoa and ova "in vivo" and "in vitro", ova transplantation, prenatal and early post-natal development and infertility problems are discussed. PROFESSOR R. D. BAKER

342-424B. METABOLIC ENDOCRINOLOGY AND GASTRO-INTESTINAL PHYSIOLOGY. (3 Credits; 3 lectures and 1 3-hr. lab.; *Prerequisite:* Animal Science 342-321A.) A detailed study of the metabolic endocrine system and its role in the maintenance of homeostasis, and a detailed study of the physiology of digestion. PROFESSOR LAGUE

342-432A. ADVANCED ANIMAL NUTRITION. (3 Credits; 2 lectures and 1 1-hr. conference; *Prerequisite:* Animal Science 342-332B.) Critical discussion of criteria for nutritive evaluation of feedstuffs, current practices and development of feeding programs, specific aspects of ruminant nutrition, discussion of feed additives. PROFESSORS HARTSOCK, DONEFER AND TOUCHBURN

342-450A. DAIRY CATTLE PRODUCTION. (3 Credits; 3 lectures and 1 2-hr. lab.) The application of biological principles of genetics, physiology, nutrition and pathology as well as principles of economics and engineering and the integration of these principles, through management, for the maximum production efficiency of milk and meat by dairy cattle. Recent developments in livestock production will be emphasized. Trips to dairy farms and related enterprises will comprise part of the laboratory work. PROFESSOR. . . . . .

342-452A. BEEF CATTLE AND SHEEP PRODUCTION. (3 Credits; 3 lectures and 1 2-hr. lab.) The application of biological principles of genetics, physiology, nutrition and pathology as well as principles of economics and engineering and the integration of these principles, through management, for the maximum production efficiency of beef and sheep. Trips to beef and sheep farms and related enterprises will comprise part of the laboratory work. PROFESSOR DONEFER

342-454B. SWINE PRODUCTION. (3 Credits; 3 lectures and 1 2-hr. lab.) The application of biological principles of genetics, physiology, nutrition and pathology as well as principles of economics and engineering and the integration of these principles, through management, for the maximum production efficiency of swine. Trips to swine farms and related enterprises will comprise part of the laboratory work. PROFESSOR HARTSOCK

342-456B. POULTRY PRODUCTION. (3 Credits; 3 lectures and 1 2-hr. lab.) The application of biological principles of genetics, physiology, nutrition and pathology, as well as

principles of economics and engineering and the integration of these principles, through management for the maximum production efficiency of poultry meat and eggs. Trips to poultry farms and related enterprises will comprise part of the laboratory work.
PROFESSOR BUCKLAND

342-490D. PROJECT IN ANIMAL SCIENCE. (3 Credits.) A project to be completed under the supervision of a staff member of the Department of Animal Science. An agreement between student and the involved staff member must be reached prior to registration.
PROFESSOR BUCKLAND

Graduate courses available to undergraduates

G342-602D. PROBLEMS IN ANIMAL BREEDING. (6 Credits.)

G342-632D. ADVANCED NUTRITION. (6 Credits.)

G342-650D. ADVANCED ANIMAL BIOCHEMISTRY. (6 Credits.)

G342-690D. SEMINAR. (1 Credit.)

G342-603A. PHYSIOLOGICAL GENETICS OF DOMESTIC ANIMALS. (3 Credits.)

5.5 BIOLOGY

344-200A. BIOLOGY OF ORGANISMS I. (3 Credits; 3 lectures and 1 lab.) The major taxonomic divisions of living organisms; the Protozoa with special reference to holozoic and saprozoic forms; animal embryology as an introduction to the Metazoa; a survey of the structure and biology of the major invertebrate phyla, with emphasis on animal parasites and entomology.
PROFESSOR McFARLANE

344-201B. BIOLOGY OF ORGANISMS II. (3 Credits; 3 lectures and 1 lab.) Comparative evolutionary review of the plant kingdom, excluding the angiosperms, except for the embryology and seed germination. Plant evolution, including some fossil genera, isotopic age determination, continental drift sequential evolution and telome theory. Pollination as a case study of plant evolution.
MR. WOODLAND

344-202B. CELLULAR BIOLOGY. (3 Credits; 3 lectures and 1 demonstration.) The aim of this course is to develop a working concept of cellular biology in procaryotic and eucaryotic cells, including their interaction with viruses. This concept includes structure, function and replication of theoretical cell types with the emphasis on structure and structurally related function. Some examples of specialized cells are then provided to illustrate some of the differences between cell types.
PROFESSORS DEVOE AND .....

344-205B. PRINCIPLES OF ECOLOGY. (3 Credits; 2 lectures and 1 conference.) This introductory course is designed to give the student an understanding of the interactions of organisms and the physical environment. Ecological principles will be discussed at the level of the individual, the population and the community.
PROFESSORS BIDER, KNOWLES AND STEWART

344-306B. BIOLOGICAL INSTRUMENTATION. (3 Credits; 2 3-hr. labs.) Physical and chemical methods applied to biology including theory and practice of modern instrumentation as applied to pH, chromatography, spectroscopy, centrifugation, radioactivity and electrophoresis.
PROFESSORS INGRAM AND PETERSON

344-495D. ENVIRONMENTAL BIOLOGY SEMINAR. (1 Credit; 1 lecture.) Presentation of papers on, and discussion of, topics from the field of Environmental Biology.
PROFESSOR STEWART

5.6 BOTANY

346-251A. PLANT HISTOLOGICAL AND CYTOLOGICAL METHODS. (3 Credits; 2 3-hr. labs.) A laboratory lecture course dealing with methods for the study, measurement and reproduction of plant cells and tissues by various physico-chemical means, including microscopy and photography.
PROFESSOR ESTEY

346-252B. PLANT ANATOMY AND HISTOLOGY. (2 Credits; 2 lectures and 1 2-hr. lab.) A detailed study of cells, cell division, tissues and their development, and the general anatomy of vascular plants.
PROFESSOR ESTEY

346-254B. PLANT MORPHOLOGY. (2 Credits; 2 lectures and 1 lab.) A comparative study of plant structure in fossil and living plants, with special emphasis on the higher plants.
PROFESSOR WOODLAND

346-256A. SYSTEMATIC BOTANY. (4 Credits; 2 lectures and 2 3-hr. labs.) Principles of classification and identification of vascular plants with special emphasis on those families of economic and practical importance; also an introduction to modern taxonomic methods. Field trips.
PROFESSOR WOODLAND

346-353A. PLANT PHYSIOLOGY. (4 Credits; 3 lectures and 1 3-hr. lab.) Respiration, photosynthesis, mineral nutrition, nitrogen nutrition, water relations, translocation of solutes, development and reproduction.
PROFESSOR PELLETIER

346-355A, B. SPECIAL TOPIC IN BOTANICAL SCIENCES. (2 Credits; 1 conference.) A course of independent study by the student with the guidance of a person of recognized competence in the general area of the chosen topic.
STAFF

346-451A. PLANT ECOLOGY. (3 Credits; 3 lectures and 1 3-hr. lab.) A study of the major vegetation units; the influence of environmental factors on the evolution, distribution, and succession of plant communities, and on the distribution, form and function of plant species. Methods of ecological analyses.
PROFESSOR WOODLAND

346-455A. SPECIAL TOPIC IN THE BOTANICAL SCIENCES. (2 Credits; 1 conference.) A course of independent study by the student with the guidance of a person of recognized competence in the general area of the chosen topic.
STAFF

346-490D. PROJECT. (3 Credits; 1 lecture and equivalent 1 3-hr. lab.) Each student is assigned a botanical problem entailing individual investigation, preparation of report in publication form, and oral presentation of scientific paper.
STAFF

346-495D. SEMINAR. (1 Credit; 1 lecture.) (Plant Pathology and Botany.) Written and oral presentation of critital reviews of important topics and current research articles in Plant Pathology and Botany for group discussion.
STAFF

5.7 CHEMISTRY

332-222B. INTRODUCTORY ANALYTICAL CHEMISTRY. (3 Credits; 2 lectures and 1 lab.) An introduction to qualitative and quantitative analysis in the laboratory. The lecture material will deal with hydrolysis reactions, sampling techniques, preparation of samples for analysis and the theory of acidemetry.
PROFESSOR HENNEBERRY

332-230A. ORGANIC CHEMISTRY I. (3 Credits; 3 lectures and 1 lab.) Fundamental concepts of organic chemistry; structure, nomenclature and properties of typical aliphatic and aromatic compounds, lipids, carbohydrates and proteins. Laboratory work includes exercises on recrystallization, distillation, extraction, chromatography and some simple organic preparations.
PROFESSOR B. E. BAKER

332-231B. ORGANIC CHEMISTRY II. (3 Credits; 2 lectures and 1 lab.; *Prerequisite:* Chemistry 332-230A.) Introduction to organic synthesis and reactions of functional groups of aliphatic, aromatic and heterocyclic compounds. Basic concepts of S_N1 and S_N2 displacement reactions, resonance, geometrical and optical isomerism, free radicals and polarimetry. Laboratory work includes the preparation, purification and studies on the properties of several organic compounds.
PROFESSOR R. E. BAKER

332-232A. BIOCHEMISTRY I. (3 Credits; 3 lectures and 1 lab.; *Prerequisite:* Chemistry 332-230A.) The biological elements; chemical evolution and biogenesis; water; carbohydrates; lipids; amino acids and proteins; nucleotides and polynucleotides; enzymes.
PROFESSOR COMMON

332-234B. BIOCHEMISTRY II. (3 Credits; 3 lectures and 1 lab.; *Prerequisite:* Chemistry 332-232A.) Enzymology. Alimentary digestion and absorption of nutrients. Urinary and fecal excretion; detoxication mechanisms. Cellular anabolism and catabolism of carbohydrates, lipids and proteins.
PROFESSOR COMMON

332-324A. QUANTITATIVE INORGANIC ANALYSIS. (3 Credits; 2 lectures and 1 lab.) *Prerequisite:* Chemistry 332-222B.) A continuation of the Quantitative methods introduced in Analytical Chemistry I. Course work will consist of discussions of and practical exercises in the use of redox titrations, ion exchange resins, potentiometric methods of analysis, colorimetry and atomic absorption.
PROFESSOR HENNEBERRY

332-333A. CHEMICAL SYNTHESES AND LAB. TECHNIQUES. (3 Credits; 2 lectures and 1 lab.; *Prerequisite:* Chemistry 332-231B.) Principles of organic synthesis. Stress will be laid on laboratory procedures and methodology.
PROFESSOR B. E. BAKER

332-339A. INTRODUCTORY PHYSICAL CHEMISTRY. (3 Credits; 3 lectures and 1 lab.) Introduction to kinetic theory, thermodynamics, properties of liquids and solids; chemical equilibrium and the law of mass action, phase rule, properties of solutions, surface and colloid chemistry, chemical kinetics, photochemistry, electrochemistry and radioactivity.
PROFESSOR ANASTASSIADIS

332-340B. ADVANCED PHYSICAL CHEMISTRY. (3 Credits; 2 lectures and 1 lab.; *Prerequisite:* Chemistry 332-339A.) An advanced course of thermodynamics, molecular structure, kinetics, properties of electrolytes, absorption and macromolecules. Quantum aspects of physical chemistry.
PROFESSOR ANASTASSIADIS

332-434B. CHEMICAL STRUCTURE AND INSTRUMENTATION. (3 Credits; 2 lectures and 1 lab.; *Prerequisites:* Chemistry 332-333A, Mathematics 360-202A.) Modern concepts of atomic and molecular structures. Bond energies and reaction mechanisms. Determinations of purity and structure of chromatographic and spectrometric techniques.
PROFESSORS B. E. BAKER AND HENNEBERRY

332-451A. FOOD ANALYSIS I. (3 Credits; 2 lectures and 1 lab.; *Prerequisite:* Chemistry 332-232A.) Proximate analysis. Chemical examinations of sugars, starches, cereals, oil seeds, fat and fat products, fruits, dairy and meat products. Vitamins, food colours, flavours. Contaminants. Physiochemical methods used in food analysis.
PROFESSORS ANASTASSIADIS AND COMMON

332-452B. FOOD ANALYSIS II. (3 Credits; 2 lectures and 1 lab.; *Prerequisite:* Chemistry 332-451A.) A specialized course on the principal analytical techniques used for analysis of carbohydrate, lipid, protein and vitamin constituents of foods and feedstuffs, and for detection and determination of chemical additives and contaminants.
PROFESSORS ANASTASSIADIS AND COMMON

5.8 COMMUNICATION ARTS

384-320B. INSTRUCTIONAL COMMUNICATION I. (3 Credits; 3 lectures and 1 lab.; *Prerequisite:* Food Standards 376-210A.) An insight into the management of demonstrations for live and television audiences. Students apply and evaluate their techniques through the use of videotape. Mass media communications are also explored.
PROFESSOR V. SHIPLEY

384-452A. INSTRUCTIONAL COMMUNICATIONS II. (3 Credits; 3 lectures and 1 lab.; *Prerequisite:* Psychology 368-301A.) The understanding and application of education principles to personnel development. The organization of small group and transcribed instruction as well as the planning and conducting of meetings. Audiovisual aid preparation, the use of equipment and the exploration of its potential.
PROFESSOR V. SHIPLEY

5.9 CONSUMER SERVICES

381-330A. CONSUMER EDUCATION I. (3 Credits; 3 lectures and 1 lab.) Role of the consumer in the economy, problems in modern buyer/seller relationships.
PROFESSOR FERGUSSON

381-331B. CONSUMER EDUCATION II. (3 Credits; 3 lectures and 1 lab.) Management of financial and material resources.
PROFESSOR FERGUSSON

5.10 ECONOMICS

334-200A. PRINCIPLES OF ECONOMICS I. (3 Credits; 3 lectures.) The economics of the business firm and industry in a Canadian context.
PROFESSOR MacFARLANE

334-201B. PRINCIPLES OF ECONOMICS II. (3 Credits; 2 lectures; 1 conference; *Prerequisite:* Economics 334-200A or equivalent.) Continuation of Economics 334-200A; the economics of the individual business firm. Leads to analysis of private *vs* public accounting in the area of environmental protection.
PROFESSOR MacFARLANE

334-230B. ECONOMICS OF MARKETING. (3 Credits; 3 lectures; *Prerequisite:* Economics 334-200A and 334-201B or equivalent.) Marketing problems of the major commodity sectors of Canadian agriculture. The agricultural marketing and food processing industries. Family income and expenditure patterns. Public policy in marketing.
PROFESSOR MacFARLANE

334-231B. ECONOMICS OF AGRICULTURE. (3 Credits; 2 lectures; 1 conference; *Prerequisite:* Economics 334-200A or equivalent.) The economics of the Canadian farm industry. Structure and organization. Commodity sectors. Farm credit. Public policy.
PROFESSOR MacFARLANE

334-240B. ECONOMICS OF MARKETING. (4 Credits; 4 lectures; *Prerequisite:* Economics 334-200A or equivalent.) Marketing problems of the major commodity sectors of Canadian agriculture. The agricultural marketing and food processing industries. Public policy in marketing. Family income and expenditure patterns. Plus supplementary work in general economics.
PROFESSOR MacFARLANE

334-332A. FARM PRODUCTION ECONOMICS. (3 Credits; 3 lectures; *Prerequisite:* Economics 334-200A or equivalent.) The economics of farm production and farm management decisions.
PROFESSOR MacFARLANE

334-333B. RESOURCE ECONOMICS. (3 Credits; 2 lectures; 1 conference; *Prerequisites:* Economics 334-200A and 334-201B or equivalent.) Economic principles applied to resources use, development and conservation. Applied to agricultural, forest, urban, water, air and energy resources.
Professor. . . . . .

334-343B. RESOURCE ECONOMICS. (4 Credits; 3 lectures; 1 conference; *Prerequisite:* Economics 334-200A or equivalent.) Economic principles applied to resources use, development and conservation. Applied to agricultural, forest, urban, water, air and energy resources. Plus supplementary work in general economics. PROFESSOR. . . . . .

334-410A. LAND AND RESOURCE APPRAISAL. (3 Credits; 3 lectures; *Prerequisite:* Economics 334-200A or equivalent.) Land and other resource appraisal with emphasis on valuation procedures; relationships of factor and product prices, taxes and interest rates to value. Critical evaluation of appraisal methods; benefit-cost analysis.
PROFESSOR. . . . . .

334-490D. PROJECT AND SPECIAL PROBLEMS. (3 Credits.)
PROFESSOR MacFARLANE AND. . . . . .

Electives from the following courses offered on the Montreal campus.

154-205A. AN INTRODUCTION TO APPLIED POLITICAL ECONOMY. (3 Credits.)
154-250D. INTRODUCTION TO ECONOMIC THEORY. (6 Credits.)
154-300A. INTERMEDIATE ECONOMIC THEORY. (3 Credits.)
154-302D. MONEY AND BANKING. (6 Credits.)
154-303D. INTERNATIONAL TRADE AND FINANCE. (6 Credits.)
154-304D. CANADIAN ECONOMIC POLICY. (6 Credits.)
154-305D. GOVERNMENT AND BUSINESS. (6 Credits.)
154-307D. BUSINESS STATISTICS. (6 Credits.)
154-310B. INTERMEDIATE ECONOMIC THEORY. (3 Credits.)
154-313D. ECONOMIC DEVELOPMENT. (6 Credits.)
154-317D. ECONOMIC STATISTICS. (6 Credits.)
154-352D. MACROECONOMICS. (6 Credits.)
154-400D. ECONOMIC ANALYSIS. (6 Credits.)
154-423D. INTERNATIONAL TRADE AND FINANCE. (6 Credits.)
154-425D. ECONOMICS OF ECOLOGY. (6 Credits.)
154-453D. INTERNATIONAL ECONOMICS. (6 Credits.)
160-211D. INTRODUCTION TO COMPARATIVE GOVERNMENT. (6 Credits.)
271-313A. MANAGEMENT ACCOUNTING I. (3 Credits.)
273-333B. SYSTEMS ANALYSIS. (3 Credits.)
275-425B. CONSUMER BEHAVIOUR. (3 Credits.)
278-384D. BUSINESS LAW. (6 Credits.)
279-491D. INDUSTRIAL RELATIONS IN PRACTICE. (6 Credits.)
280-341A, B. FINANCE I. (3 Credits.)
280-393A, B. MANAGERIAL ECONOMICS. (3 Credits.)
280-351A, B. MARKETING I. (3 Credits.)

5.11 ENGLISH

348-310B. STUDIES IN THE MASS MEDIA. (3 Credits; 3 lectures.) An exploration of the uses and abuses of language in such modern communication media as newspapers, magazines and advertising. In addition, the course will study McLuhan and the devices of semantics and logic, particularly as they apply to the appraisal of the mass media.
PROFESSOR. . . . . .

348-330A. TECHNICAL AND RESEARCH WRITING. (3 Credits; 1 lecture and 1 lab.) A practical course in scientific writing with emphasis on basic writing competence and the techniques of clear exposition. In addition, study will be made of certain scientific articles and essays and the means by which they stimulate interest and attention.
PROFESSOR. . . . . .

348-343A. THE SHORT STORY. (3 Credits; 3 lectures.) A study and discussion of representative short stories with particular reference to their theme and techniques.
PROFESSOR. . . . . .

5.12 ENTOMOLOGY

350-330A. GENERAL ENTOMOLOGY. (3 Credits; no lectures or labs.; modular course with 1 conference and directed practical work.) Each student plans, in consultation with the instructor, his program from a wide range of modules. The modules are designed to introduce insect structure, physiology, development, systematics, evolution, ecology and control. The course stresses interrelationships, integrated pest control and information storage and retrieval.
PROFESSOR HILL

350-331A. INSECT MORPHOLOGY I. (3 Credits; 2 lectures, 1 lab. and project.) (Offered in alternate years, given in 1975-76.) A course discussing in depth the morphology of the integument and associated organs of insects and relating structure to function.
PROFESSOR STEWART

350-332B. INSECT MORPHOLOGY II. (3 Credits; 2 lectures, 1 lab. and project; *Prerequisite:* Entomology 331A.) (Offered in alternate years, given in 1975-76.) A course discussing in depth the morphology of the internal organs, sense organs and development of insects and relating structure to function.
PROFESSOR STEWART

350-333A. INVERTEBRATE PHYSIOLOGY I. (3 Credits; 2 lectures, 1 lab. and project.) (Offered in alternate years, given in 1975-76.) Comparative physiology with special reference to invertebrates, particularly insects. Topics of more general physiological interest are considered, including respiration, nutrition, digestion, excretion, circulation and endocrinology.
PROFESSOR McFARLANE

350-334B. INVERTEBRATE PHYSIOLOGY II. (3 Credits; 2 lectures, 1 lab. and project; *Prerequisites:* Entomology 350-330A and 350-333A.) (Offered in alternate years, given in 1975-76.) Topics of special interest in insect physiology, including the integument, the special senses, nerve and muscle, flight, orientation reactions and circadian rhythms. Current literature in insect physiology is read and discussed by the students.
PROFESSOR McFARLANE

350-440B. SYSTEMATIC ENTOMOLOGY. (3 Credits; 1 lecture, 1 lab. and project; *Prerequisite:* Entomology 350-330A.) (Offered in alternate years, given in 1974-75.) The classification of the principal orders, suborders and super-families of insects; use of keys; collecting methods.
PROFESSORS KEVAN AND VICKERY

350-442A. ARACHNIDA AND OTHER TERRESTRIAL ARTHROPODS. (3 Credits; 3 lectures, 1 lab.; *Prerequisite:* Biology 344-200A.) (Offered in alternate years, given in 1974-75.) The morphology, biology and general systematics of land arthropods other than true insects with special emphasis on those living on the ground and in the soil; some parasitic and other forms are also considered. Parathropods, land crustaceans, millipedes, centipedes, collembolans, scorpions, spiders, mites, ticks, etc.
PROFESSORS HILL AND KEVAN

350-444B. SOIL FAUNA ECOLOGY. (3 Credits; 3 lectures, 1 lab.; *Prerequisite:* Biology 344-204B.) (Offered in alternate years, given in 1974-75.) Introduction to the fauna of soil and litter, its biology, ecology and role in soil formation and amelioration; particular atten-

tion is paid to certain groups of worms and insects and especially to collembola and mites; methods of sampling, extraction, and identification.
PROFESSORS HILL AND KEVAN

350-446B. BEES AND BEEKEEPING. (3 Credits; 3 lectures and 1 conference.) Theory and practical application in beekeeping. Social insects; development of social behaviour; coevolution of flowering plants and social insects; life and behaviour of honeybees; insect pollination; honey production; properties of honey; practical beekeeping. Demonstrations and written assignments essential.
PROFESSOR VICKERY

350-452A. ECONOMIC ENTOMOLOGY I. (3 Credits; 3 lectures; *Prerequisite:* Entomology 350-330A.) A survey of non-chemical pest controls and why these succeed; control methods under investigation, integrated control, problems of application and degree of success; physical, cultural and biological methods including genetic and the sterile male techniques. Laboratory work consists of studies of organisms now effectively managed by non-chemical methods.
PROFESSOR MORRISON

350-453B. ECONOMIC ENTOMOLOGY II. (3 Credits; 3 lectures; *Prerequisite:* Entomology 350-330A.) A survey of the chemicals used in pest control, their characteristics, the hazards posed, their legal status, their effectiveness, pollution problems and techniques for safe and effective use.
PROFESSOR MORRISON

350-454A. PEST INSECTS. (3 Credits; 2 lectures, 1 lab.) A survey of important pest insects of the world, their current status and control. Each species will be taken as representative of a taxonomic group of real or potential pests. Interrelations of life-histories, biology, importance and control will be stressed.
PROFESSOR MORRISON

350-490D. PROJECTS. (3 Credits; 1 lab.) A problem involving literature and private investigation will be allotted to each student taking the course.
STAFF

5.13 EXTENSION METHODS

352-300A. COMMUNICATIONS — EXTENSION METHODS. (3 Credits; 2 lectures and 1 2-hr. lab.) An introductory survey course in communication techniques including journalism skills (newswriting, design, etc.), strategies of change, and extension methods (meetings, panel discussions, etc.)
PROFESSOR BACHMAN

352-301B. COMMUNITY DEVELOPMENT. (3 Credits; 2 lectures and 1 lab.) The principles and processes of area resource development will be studied by readings, lectures, group discussions and case studies. Guest lecturers from organizations and agencies involved in community resource development will be invited to participate.
PROFESSOR BACHMAN

5.14 FOOD AND CONSUMER SCIENCES

377-200A. PERSPECTIVES IN FOOD SCIENCE. (3 Credits; 3 lectures, 1 conference.) A survey of the interrelationships of the major disciplines concerned in Food Science Studies. Involved staff members and guests will discuss the processing and handling of foods for humans, including public health regulations, food additives, toxic contamination, human nutrition, and the world food outlook.
PROFESSOR NEILSON AND STAFF

377-490D. FOOD AND CONSUMER SCIENCES PROJECT I. (3 Credits.) A project involving a review of the literature, experimental work and submission of a report. Assigned to students in their final year.
COORDINATOR, MAJOR PROFESSOR, STAFF

377-491D. FOOD AND CONSUMER SCIENCES PROJECT II. (5 Credits.) A project involving a review of the literature, experimental work and submission of a report. Assigned to students in their final year.
COORDINATOR, MAJOR PROFESSOR, STAFF

377-495D. FOOD AND CONSUMER SCIENCES SEMINAR I. (1 Credit.) Oral presentation of a selected topic within the field of Food and Consumer Sciences.

377-496D. FOOD AND CONSUMER SCIENCES SEMINAR II. (2 Credits.) Oral presentations of selected topics within the field of Food and Consumer Sciences.

377-497D. FOOD AND CONSUMER SCIENCES SEMINAR III. (3 Credits.) Oral presentations of selected topics within the field of Food and Consumer Sciences.

5.15 FOODS

376-210A. FOOD STANDARDS I. (3 Credits; 3 lectures and 1 lab.) Introduction to the principles and practices involved in selection, preparation and conversion of food. Development of awareness and recognition of food quality standards.
PROFESSOR FERGUSSON

376-211B. FOOD STANDARDS II. (3 Credits; 3 lectures, 1 lab.; *Prerequisite:* Foods 210A.) Application of the principles and practices involved in quality food production.
PROFESSOR FERGUSSON

376-312A. ADVANCED FOODS. (3 Credits; 3 lectures and 1 lab.; *Prerequisite:* Foods 210A.) The study of uncommon foods and their preparation. The gourmet preparation of foods appropriate to all courses of the formal menu. An understanding of meal management including planning, preparation, service and evaluation. Library research and the interpretation of food in relation to cultural, historical, sociological, economic or other factors.
PROFESSOR.....

376-340A. CHEMISTRY OF FOOD PRODUCTS I. (3 Credits; 3 lectures and 1 3-hr. lab.; *Prerequisite:* 332-232A.) A study of the composition, chemistry and technology of milk, meat and eggs. Analytical methods, processing procedures and market quality.
PROFESSOR BEVERIDGE

376-341B. CHEMISTRY OF FOOD PRODUCTS II. (3 Credits; 3 lectures and 1 3-hr. lab.; *Prerequisite:* 332-232A.) A study of the composition, chemistry and technology of selected food products derived from cereals, oil seeds, sugar cane and sugar beet, sea weed and spice plants. Analytical methods, processing procedures and market quality.
PROFESSOR BEVERIDGE

376-413B. PRODUCT DEVELOPMENT. (3 Credits; 3 lectures and 1 lab.) (Offered in alternate years, given in 1975-76.) Representatives from food industry will present research procedures used to develop new products. Students will prepare a report on the development of a new product, incorporating an analysis and evaluation of the production, processing equipment and sanitation requirements and a summary of consumer acceptance and market feasibility of the product.
PROFESSORS IDZIAK AND RAYMOND

5.16 FRENCH

354-200A, B. FRENCH. (3 Credits; 3 lectures.) Practice in French for students who expect to work in Quebec Province: preparatory work for postgraduate students who intend to meet second language requirements in French. Emphasis will depend on needs of students enrolled.
MRS. GEROLS

354-300A, B. TECHNICAL FRENCH. (3 Credits; 3 lectures; *Prerequisite:* French 200A or B or equivalent.) An introduction to the language of Agriculture and Food Science. Oral practice and translation — topics will be selected in function of students' requirements.
MRS. GEROLS

354-302B. INTRODUCTION TO FRENCH CANADIAN LITERATURE. (3 Credits; 3 lectures; *Prerequisite:* French 354-200A or B or equivalent.) A survey of French Canadian Literature and Civilization. Study of two novels and a play by modern French Canadian writers. This course will be conducted in French.
MRS. GEROLS

5.17 GENETICS

356-201A. INTRODUCTION TO GENETICS. (3 Credits; 3 lectures and 1 lab.) The modern concepts of genetics are presented so that present and future developments in biology may be understood and appreciated.
PROFESSOR LAWSON

356-202B. ADVANCED GENETICS. (3 Credits; 3 lectures and 1 lab.; *Prerequisite:* Genetics 201B.) A detailed study of the genetic material, gene action, and population genetics.
PROFESSOR LAWSON

356-203A. HEREDITY, EVOLUTION AND SOCIETY. (3 Credits; 3 lectures.) Inheritance, variation and evolution in plants, animals and man. Social implications of genetics and evolution. PROFESSOR LAWSON

Graduate courses available to undergraduates

Biology	177-670A *or* 177-770A.	CYTOLOGY.
Biology	177-671B *or* 177-771B.	CYTOGENETICS.
Biology	177-672B *or* 177-772B.	MICROBIAL GENETICS.
Biology	177-673A *or* 177-773A.	MUTAGENESIS AND RADIATION BIOLOGY.
Biology	177-675B *or* 177-775B.	STATISTICAL METHODS IN GENETICS.

5.18 HOME ECONOMICS

378-331B. FAMILY MANAGEMENT. (3 Credits; 3 lectures and 1 lab.; *Prerequisites:* Foods 376-211B and Consumer Services 381-331B.) (Given in 1974-75.) An awareness of the influence of societal forces and family values on family management decisions and the use of its resources. An insight into management practices of the "special" homemakers such as the handicapped or employed. The application of management principles in the campus home management house. PROFESSOR V. SHIPLEY

378-332A. FAMILY LIVING — DEVELOPMENT. (3 Credits; 3 lectures and 1 conf.; *Prerequisite:* Sociology 230A or Psychology 301A.) A study of the development of the individual in the family from birth to old age. The recognition and understanding of variations in developmental environment and human potential. PROFESSOR V. SHIPLEY

378-333B. FAMILY LIVING — RELATIONSHIPS. (3 Credits; 3 lectures and 1 conf.; *Prerequisite:* Sociology 230A or Psychology 301A.) An understanding of the role of the family in society. The interaction and interrelationships of family members of varying ages. An analysis of various family structures and problems. PROFESSOR V. SHIPLEY

5.19 HORTICULTURE

358-332D. LANDSCAPE ARCHITECTURE. (3 Credits; 1 3-hr. lab.; *Prerequisite:* Agricultural Engineering 336-214E.) (Offered in alternate years, given in 1975-76.) Description, characteristics, and identification of ornamental plants, nursery practices and care of plant material. A brief history of gardens and architecture. Landscape design, plans, sketches, drafting, and construction specifications, as applied to rural and urban homes, estates, parks and playgrounds, etc. MR. PERRON

358-335B. FLORICULTURE. (3 Credits; 2 lectures and 1 2-hr. lab.; *Prerequisite:* Botany 346-353A.) (Offered in alternate years, given in 1974-75.) Construction and equipment of greenhouse and related structures. Principles involved in the propagation of all horticultural plants. Production of florists' crops including harvesting, storage and marketing, as well as costs of production and distribution. MR. WIGDOR

358-338A. POMOLOGY I. (3 Credits; 2 lectures and 1 2-hr. lab.) Small fruits. The biology of small fruit species, and the technology of small fruit production; major aspects, significant research, recent advances. PROFESSOR TAPER

358-339B. POMOLOGY II. (3 Credits; 2 lectures and 1 2-hr. lab.) Orchard Fruits. The biology of orchard species, and the technology of tree fruit production; major aspects, significant research, recent advances. PROFESSOR TAPER

358-430A. VEGETABLE PHYSIOLOGY I. (3 Credits; 2 lectures and 1 2-hr. lab.) Application of plant physiology and other sciences to the production of vegetable crops. Original literature is used to illustrate the principles involved. Crops discussed include: tomato, pepper, eggplant, cucumber, muskmelon, squash, pumpkin, beans, peas, sweet corn, asparagus and rhubarb. Selected vegetable crops are grown by students in the laboratory to amplify lecture topics. PROFESSOR BIBLE

358-431B VEGETABLE PHYSIOLOGY II. (3 Credits; 2 lectures and 1 2-hr. lab.) Application of plant physiology and other sciences to the production of vegetable crops. Original literature is used to illustrate the principles involved. Crops discussed include: lettuce,

celery, cabbage, brussels sprouts, cauliflower, broccoli, kale, radish, spinach, beet, onion, carrot, and potato. Selected vegetable crops are grown by students in the laboratory to amplify lecture topics. PROFESSOR BIBLE

358-443A. STORAGE AND HANDLING OF HORTICULTURAL CROPS. (3 Credits; 2 lectures and 1 2-hr. lab.) The post-harvest chemistry and physiology of horticultural crops as they affect quality and marketability; handling methods at and after harvest; principles and practices in pre-cooling, storage, transportation and packaging. PROFESSOR DAVID

358-444B. FRUIT AND VEGETABLE PROCESSING. (3 Credits; 2 lectures and 1 2-hr. lab.) The principles and practices of food processing with emphasis on canning, freezing and dehydration, survey of the newer methods of food preservation such as the use of radiation and antibiotics; quality control, grading and sanitation are discussed. PROFESSOR DAVID

358-495D. SEMINAR. (2 Credits; 1 lab.) PROFESSOR TAPER AND STAFF

5.20 INSTITUTIONAL ADMINISTRATION

380-343A. ACCOUNTING AND COST CONTROL. (3 Credits; 2 lectures.) Introduction to basic accounting principles and practices; preparation and use of financial statements, ratio comparisons. Cost control programs for food operations. PROFESSOR RAYMOND

380-345B. FOOD FACILITY LAYOUT PLANNING AND EQUIPMENT. (3 Credits; 3 lectures.) Menu analysis for space and equipment determination. Planning for efficiency, sanitation and safety in layout construction, and equipment. Equipment specification. PROFESSOR RAYMOND

380-441B. FOOD SERVICE PRODUCTION MANAGEMENT. (3 Credits; 1 lecture and 2 labs.) Developing quantity food standards, food purchasing specifications, recipe formulation, menu construction, organization and scheduling of production, use of quantity equipment. PROFESSOR RAYMOND

380-442A. ORGANIZATION AND MANAGEMENT. (3 Credits; 3 lectures.) Functions of a manager; modified techniques of scientific management and their place as management tools in food production and service operations. PROFESSOR RAYMOND

380-444A. PERSONNEL MANAGEMENT I. (3 Credits; 3 lectures.) The fundamentals of organizational behaviour, employee development and the leadership role. PROFESSOR NEILSON

380-445B. PERSONNEL MANAGEMENT II. (3 Credits; 3 lectures.) Organizational environment and the management of people at work. The nature of collective bargaining, the roles of unions and management. PROFESSOR NEILSON

5.21 MATHEMATICS

360-201A, B. STATISTICAL METHODS I. (3 Credits; 3 lectures and 1 2-hr. lab.) Measures of central tendency and dispersion; normal distribution; estimation and testing hypotheses; analysis of variance for simple experimental designs; regression and correlation; binomial, chi-square and Poisson distribution; non-parametric tests. PROFESSOR FANOUS

360-202A. CALCULUS. (3 Credits; 3 lectures.) Partial differentiation; multiple integrals; vector calculus; infinite series. PROFESSOR BARTHAKUR

360-203A, B. DIGITAL COMPUTING I. (3 Credits; 3 lectures.) Introduction to Fortran Programming; numerical and non-numerical application of computers; computer oriented mathematics. PROFESSOR BURRAGE

360-205B. DIFFERENTIAL EQUATIONS. (3 Credits; 3 lectures; *Prerequisite:* Mathematics 360-202A.) Ordinary differential equations with constant coefficients; techniques for solution; introduction to partial differential equations; separation of variables; applications of differential equations to biological, chemical, and physical problems. PROFESSOR SCHUEPP

360-206A. MATHEMATICAL METHODS IN ECOLOGY. (3 Credits; 3 lectures.) An introduction to mathematical tools used in building models of biological and ecological systems. These include probability theory, set theory, vector and matrix algebra, differential and difference equations. PROFESSORS BARTHAKUR AND SCHUEPP

360-207A. LINEAR ALGEBRA AND VECTOR ANALYSIS. (4 Credits; 4 lectures.) Linear equations; vectors in R^n and C^n, linear transformations; matrices; vector spaces and subspaces; bases and dimensions; eigenvalues and eigenvectors; vector analysis. PROFESSOR .....

360-301A. NUMERICAL METHODS. (3 Credits; 3 lectures; *Prerequisite:* Mathematics 360-202A.) Numerical solution of equations, finite differences, interpolation, matrix algebra, linear programming, practice and instruction on the digital computer. PROFESSOR SCHUEPP

360-303B. DIGITAL COMPUTING II. (3 Credits; 3 lectures; *Prerequisite:* Mathematics 360-203A.) More advanced Fortran, including the use of magnetic tapes and disks. Further applications of computers in simulation, linear programming, critical path techniques. An introduction to assembly language and computer organization. PROFESSOR BURRAGE

360-401A. MATHEMATICAL STATISTICS I. (3 Credits; 3 lectures; *Prerequisite:* Mathematics 360-202A.) (Offered in alternate years, given in 1975-76.) Probability, random sampling; mathematical models; basic concepts of estimation and testing hypotheses; frequency distributions. PROFESSOR FANOUS

360-402A. MATHEMATICAL STATISTICS II. (3 Credits; 3 lectures; *Prerequisite:* Mathematics 360-401A.) (Offered in alternate years, given in 1974-75.) Correlation and regression; principles of testing hypotheses and estimation; small sample distributions; simple experimental designs; stratified sampling, sequential analysis. PROFESSOR FANOUS

5.22 MICROBIOLOGY

362-230B. THE MICROBIAL WORLD. (3 Credits; 3 lectures and one 3-hr. lab.) Natural occurrence and importance of microorganisms (especially bacteria) in relation to man. Principles governing their growth and metabolic activities as illustrated by nutrient cycles, and by soil, water, and food microbial populations. Microorganisms as agents of disease and the principles of immunity and chemotherapy. PROFESSOR MacLEOD AND STAFF

362-331B. MICROBIAL ECOLOGY. (3 Credits; 3 lectures and one 3-hr. lab.) A detailed study of microorganisms in the food, animal, soil, fresh water and marine environments. Population regulation in pure and mixed cultures and in natural communities in homogeneous and discontinuous environments. Principles of biochemical ecology in relation to biodeterioration, pollution, biogeochemical cycles. PROFESSOR KNOWLES AND STAFF

362-338B. PHYSIOLOGY OF MICROORGANISMS. (3 Credits; 3 lectures and one 3-hr. lab.) Principles of Microbial Physiology including cell structure, growth, nutrition, intermediary metabolism, catabolic and anabolic reactions. The laboratory includes isolation, induction and assay of selected enzymes plus special individual projects to illustrate various aspects of physiology. PROFESSOR INGRAM AND STAFF

362-340A. PATHOGENIC MICROBIOLOGY AND EPIDEMIOLOGY. (3 Credits; 3 lectures and 1 3-hr. lab.) A survey of the principal pathogenic microorganisms causing disease in man, factors involved in pathogenicity, host responses to infection, epidemiology and control. Viral, fungal and bacterial diseases will be considered, with greater emphasis on the latter. PROFESSOR DEVOE

362-437D. FRONTIERS IN MICROBIOLOGY. (1 Credit; irregular meetings.) This course involves the preparation of a comprehensive term paper based on a search of the literature on a topic assigned to include an area of recent development new to the student. STAFF

362-438A. IMMUNOLOGY. (3 Credits; 2 lectures and 1 3-hr. lab.) A review of the host defence mechanisms with particular reference to antigen-antibody reactions. The nature of antigens and antibodies, the mechanism of antibody formation, polymorphism, hypersensitivity and transplantation are discussed. PROFESSOR C. E. TANNER

362-442A. FOOD MICROBIOLOGY AND SANITATION. (3 Credits; 2 lectures and 1 3-hr. lab.) Consideration of microorganisms, and their products, of importance to the food

industry. These will be discussed in terms of production of foods, preservation and processing of foods, facility sanitation and waste disposal, potential for causing food poisoning outbreaks.
PROFESSOR IDZIAK

362-491D. PROJECT. (3 Credits; equiv. 2 3-hr. labs.) A project involving laboratory work. May be elected by any final year students other than Microbiology Major. STAFF

362-492D. PROJECT. (5 Credits; equiv. 3 3-hr. labs.) A project involving laboratory work assigned each Microbiology Major student in his final year. STAFF

362-495D. SEMINAR. (3 Credits; equivalent of 1 lecture.) STAFF

Graduate courses available to undergraduates

362-760D. TOPICS IN MICROBIAL PHYSIOLOGY. (6 Credits; 2 lectures.) (Offered in alternate years, given in 1974-75.) PROFESSOR INGRAM AND STAFF

362-761D. SOIL MICROBIOLOGY. (6 Credits; 2 lectures.) (Offered in alternate years, given in 1975-76.) PROFESSOR KNOWLES

362-762D. MICROBIAL BIOCHEMISTRY. (6 Credits; 2 lectures.) (Offered in alternate years, given in 1975-76.) PROFESSOR MacLEOD

5.23 NUTRITION AND DIETETICS

382-212B. BASIC NUTRITION. (3 Credits; 3 lectures.) The scientific basis for the dietary recommendations for energy, protein, minerals and vitamins for infants, humans. For students who wish to take a single course in human nutrition. PROFESSOR FARMER

382-305B. NORMAL HUMAN NUTRITION. (3 Credits; 3 lectures; *Prerequisite:* Animal Science 342-330A or Nutrition and Dietetics 382-212B.) Study of normal nutrient requirements of humans in pregnancy and lactation and during infancy, childhood and adolescence. The needs of the elderly and of non-hospitalized patients suffering from allergies, obesity, anemia and dental caries, will be included. A special section will deal with world problems in nutrition. PROFESSORS FARMER AND MACONOCHIE

382-435B. APPLIED HUMAN NUTRITION. (3 Credits; 3 lectures; *Prerequisite:* Animal Science 342-330A.) Lectures in body composition, nutritional status, parasites in food, natural toxicants in plants and world food problems. Class projects include carrying out different types of dietary surveys and presenting these in class. Experience in teaching nutrition and budgeting to a family or group.
PROFESSORS FARMER AND MACONOCHIE

382-441A. DIET THERAPY I. (3 Credits; 2 lectures and 1 lab.; *Prerequisites:* Animal Science 342-330A and 342-331B.) Dietary modification in treatment of pathological conditions including gastro-intestinal, metabolic, circulatory and renal disorders.
PROFESSOR MACONOCHIE

382-442B. DIET THERAPY II. (3 Credits; 2 lectures and 1 lab.; *Prerequisite:* Nutrition and Dietetics 382-441A.) Seminar in which recent developments in dietetics are presented and discussed by the students. Lectures in hospitals and visits to clinics and hospital dietary departments. Laboratory periods for the preparations of special diets.
PROFESSOR MACONOCHIE

5.24 PHYSICS

338-201A. INTRODUCTORY METEOROLOGY. (3 Credits; 3 lectures.) The atmosphere — its properties (structure, motion, geostrophic, cyclostrophic), and thermodynamics (stability, dry and moist). Clouds and precipitation. Air masses and forecast; synoptic analysis. Radiation and the global radiation budget; large-scale wind systems. Physical basis of climate. PROFESSOR DOUGLAS

338-301B. BIOTHERMODYNAMICS. (3 Credits; 3 lectures and 1 conference.) The laws of thermodynamics and their application to living systems. PROFESSOR BARTHAKUR

338-303A. PRINCIPLES OF ATOMIC AND NUCLEAR PHYSICS. (3 Credits; 3 lectures and 1 conference.) This course deals with contributions made by the 20th century physical sciences towards understanding of the atomic concept; classical and quantum-mechani-

cal models of molecules, atoms and nuclei; wave- and corpuscular-theory of electromagnetic radiation; particle-wave duality; natural and artificial radioactivity.
PROFESSOR SCHUEPP

338-304B. PHYSICAL BASIS OF CLIMATE. (3 Credits; 3 lectures and 1 conference; *Prerequisite:* 338-201A or equivalent.) Global energetics; radiation, latent heat and the hydrologic cycle. General circulation; semi-permanent, and migratory, centres of high and low pressure; air-masses and fronts. Regional circulations (e.g. monsoon). Local circulations. Factors affecting microclimate.
PROFESSOR DOUGLAS

338-308B. BIOMETEOROLOGY. (3 Credits; 3 lectures and 1 conference; *Prerequisite:* Physics 338-201A or 338-307B.) Radiative, convective and evaporative energy exchange on the microscale. Applications to ground, crop and forest, to individual members of the plant/forest community, and to animals. Plants and animals as radiators, convectors, evaporators. Hazards (heat loads, frost, etc.). Growing-degree-days, and other integrative indicators.
PROFESSOR DOUGLAS AND STAFF

338-404B. RADIATION BIOPHYSICS. (3 Credits; 3 lectures.) Electromagnetic radiation, interaction of radiation with matter; radiation dosimetry; biological effects of ionizing radiation; target theory; principles of radiation protection; bioluminescence; biological action of light; x-ray diffraction of protein and nucleic acids. (This is intended to be an interdisciplinary course, with some lectures supplied by the Biologists.)
PROFESSOR SCHUEPP AND GUEST LECTURERS

338-405B. ELEMENTARY TRACER TECHNIQUES. (3 Credits; 3 lectures and 1 3-hr. lab.; *Prerequisite:* Physics 338-303A.) Operation and theory of various radiation detectors; ionization chambers, G-M counter, proportional counter, solid and liquid scintillation counters, and autoradiography; counting statistics, measurements of environmental radioactivity; practice of radiological safety.
PROFESSOR BARTHAKUR

5.25 PLANT PATHOLOGY

366-301B. INTRODUCTORY MYCOLOGY. (3 Credits; 2 lectures and 1 3-hr. lab.) A lecture and laboratory course dealing with elements of the biology and physiology of fungi; their cultural characteristics and the identification of selected species.
PROFESSOR ESTEY

366-355A, B. SPECIAL TOPIC IN PLANT PATHOLOGY. (2 Credits; 1 conference.) A course of independent study by the student, guided by a plant pathologist who has specialized in the general area of the chosen topic.
STAFF

366-402A. GENERAL PLANT PATHOLOGY. (3 Credits; 2 lectures and 1 3-hr. lab.) A study of common diseases, with emphasis on disease expression, causation, ecology, and principles underlying plant disease control. An introduction to methods of studying plant diseases in the laboratory and field.
PROFESSOR VISWANATHAN

366-403B. DISEASES OF FIELD AND FOREST CROPS. (3 Credits; 3 lectures and 1 3-hr. lab.; *Prerequisite:* Plant Pathology 402A.) (Offered in alternate years, given in 1975-76.) The distribution, economic importance, symptoms, causes, and principles underlying control of diseases of major field and forest crops.
PROFESSOR VISWANATHAN

366-404B. DISEASES OF HORTICULTURAL CROPS. (3 Credits; 2 lectures and 1 3-hr. lab.; *Prerequisite:* Plant Pathology 402A.) (Offered in alternate years, given in 1974-75.) The distribution, economic importance, symptoms, causes, and principles underlying control of diseases of major horticultural crops.
PROFESSOR VISWANATHAN

366-405A. INTERMEDIATE MYCOLOGY. (3 Credits; 2 lectures and 1 3-hr. lab.) A lecture and laboratory study of the higher fungi, and others of general interest or importance, that are not dealt with in the introductory course.
PROFESSOR ESTEY

366-406A. VIROLOGY. (3 Credits; 2 lectures and 1 3-hr. lab.) A study of the viruses affecting animals, bacteria and plants, with main emphasis on the chemical and physical properties of viruses; virus infection; and virus epidemiology. Laboratory culture of viruses, their isolation, and characterization by chemical and physical methods.
PROFESSOR PETERSON

366-490D. PROJECT. (3 Credits; 1 lecture and 1 3-hr. lab.) Each student is assigned a plant pathological or botanical problem entailing individual investigation, preparation of a report in publication form, and oral presentation of a scientific paper.
STAFF

366-495D. SEMINAR. (1 Credit; 1 lecture.) Written and oral presentation of critical reviews of important topics and current research articles for group discussion.
STAFF

Graduate courses available to undergraduates by permission

366-607B. PLANT VIRUS DISEASES. (3 Credits; 2 lectures and 1 lab.)
PROFESSOR PETERSON

366-680A. NEMATOLOGY. (3 Credits; 2 lectures and 1 lab.) PROFESSOR ESTEY
366-681B. NEMATODE DISEASES OF PLANTS. (3 Credits; 2 lectures and 1 lab.)
PROFESSOR ESTEY

5.26 PSYCHOLOGY

368-301A. PSYCHOLOGY. (3 Credits; 3 lectures.) A study of the general characteristics of physical, social, emotional and intellectual development, the psychology of learning, and the growth and development of personality with special emphasis on the problems of adolescence.

5.27 RENEWABLE RESOURCES DEVELOPMENT

375-200B. CONSERVATION. (3 Credits; 3 lectures.) An ecological, economic, ethical and political evaluation of man's effect on his environment and the ultimate values of his ingenuity and present rate of progress. PROFESSOR TITMAN

375-300A. RENEWABLE RESOURCES. (3 Credits; 3 lectures.) The production, exploitation, and utilization of agricultural, forestry, fisheries and wildlife resources. The geography of the resources as well as the populations which exploit them and the markets which consume them. PROFESSOR TITMAN AND OTHER STAFF

375-333A. PHYSICAL AND BIOLOGICAL ASPECTS OF POLLUTION I. (3 Credits; 3 lectures.) The environmental contaminants which cause pollution; sources, amounts and transport of pollutants in water, air and soil; pollution and ecology; genetic effects of pollutants. PROFESSOR WARKENTIN AND OTHERS

375-334B. PHYSICAL AND BIOLOGICAL ASPECTS OF POLLUTION II. (3 Credits; 3 lectures.) Specific pollutants such as pesticides, noise, radioactivity and thermal pollution; disposal of domestic, industrial and animal wastes; economic and social aspects of pollution control. PROFESSOR WARKENTIN AND OTHERS

375-400A. FISHERIES AND WILDLIFE. (3 Credits; 3 lectures, 1 lab. and one week field laboratory prior to fall term and occasional field trips.) An overview of fisheries and wildlife research and management outlining principles underlying the practices presently used. PROFESSOR TITMAN

375-410B. WILDLIFE ECOLOGY. (3 Credits; 3 lectures, 1 lab. and one week field laboratory prior to fall term, and occasional field trips.) Principles of animal ecology as they relate particularly to North American birds and mammals. Topics covered include species distribution, population dynamics, geographic speciation, habitat selection, and social behaviour. PROFESSOR TITMAN

375-411B. RECREATION RESOURCE MANAGEMENT. (3 Credits; 3 lectures.) Outdoor recreation management principles as related to regional resources, needs, programs, opportunities, policies and administration in the public and private sectors, economic aspects. PROFESSOR FILLMORE

375-412A. FIELD TECHNIQUES IN AREA DEVELOPMENT. (3 Credits; 2 labs.) (Offered in alternate years, given in 1975-76.) This course will be conducted in the field and will provide an opportunity for the student to apply the principles of human, social and economic inventory, analysis and planning techniques. PROFESSOR CHEVRIER

375-414A. POLICY AND POLITICS OF RENEWABLE RESOURCES DEVELOPMENT. (3 Credits; 2 lectures and one conference.) This course will answer the following questions: How are policies made and implemented? Who makes policy decisions? How are desirable goals achieved within the political system? PROFESSOR FILLMORE

375-420A. TOPICS IN ORNITHOLOGY. (3 Credits; 3 lectures and occasional field trips; *Prerequisite:* Zoology 349-307A or permission of instructor.) Taxonomic relationships and evolution of birds will be outlined. Zoogeography, reproduction, migration and population processes of North American birds will be examined. PROFESSOR TITMAN

375-450A, B. SPECIAL TOPICS IN RENEWABLE RESOURCES DEVELOPMENT. (2 Credits.) Students will pursue topics that are not otherwise available in formal courses. An individualized course of studies will be followed under the supervision of a member of staff qualified in the appropriate discipline or area. STAFF

375-491D. SEMINAR. (2 Credits; 1 lecture and 1 lab.) Each student is assigned a renewable resource problem entailing an individual investigation, the preparation of a report in publication form, and an oral presentation as a scientific paper.
MAJOR PROFESSORS AND STAFF

375-496D. PROJECT I. (3 Credits; 1 lab.) Development of research techniques through selection of hypotheses, review of literature, original research and formulation of conclusions in an area of renewable resource development.
COORDINATOR, MAJOR PROFESSOR AND STAFF

375-497D. PROJECT II. (5 Credits; 2 labs.) Development of research techniques through selection of hypotheses, review of literature, research and formulation of conclusions in an area of renewable resource development.
COORDINATOR, MAJOR PROFESSOR AND STAFF

5.28 SOCIOLOGY

370-230A. INTRODUCTORY SOCIOLOGY: SOCIETY TODAY. (3 Credits; 3 lectures.) The study of man in his relationship to human groups and institutions. The patterns and arrangements of human societies, their development and change. Major theoretical views of sociology and basic sociological concepts related to contemporary conditions and problems. PROFESSOR CHEVRIER

370-240B. THE SOCIAL DEVELOPMENT OF THE INDIVIDUAL. (3 Credits; 3 lectures; *Prerequisite:* Sociology 370-230A.) The social nature of man. Language and communication. Socialization. Self, personality and social character in the sociological perspective.
PROFESSOR CHEVRIER

370-341A. THE URBAN COMMUNITY. (3 Credits; 3 lectures; *Prerequisite:* Sociology 370-230A.) (Given in 1974-75.) Population phenomena and their implications for the organization of society. Human ecology. The structure of urban communities in industrial and developing countries. Urban planning. City government. Social institutions in the urban setting. PROFESSOR CHEVRIER

370-342B. SOCIAL PROCESSES AND SOCIAL INSTITUTIONS. (3 Credits; 3 lectures; *Prerequisite:* Sociology 370-230A.) (Given in 1974-75.) Sociological theories of society. Systems of stratification, classes and mobility. Social control and the maintenance of order. Bureaucracy and modern organization. Power, authority and the political order. The realm of ideas: education, science, religion and ideologies. Social change and the future of society. PROFESSOR CHEVRIER

370-350A. RESEARCH METHODS FOR SOCIAL SURVEYS. (3 Credits; 2 lectures and one 2-hr. lab.; *Prerequisite:* Sociology 370-230A.) (Given in 1975-76.) Science and the scientific method. Formulation of the research project. Data collection. Sampling. Measurement and scaling. Analysis of data and interpretation. Presentation of research findings.
PROFESSOR CHEVRIER

370-360B. RURAL SOCIOLOGY. (3 Credits; 3 lectures; *Prerequisite:* Sociology 370-230A.) (Given in 1975-76.) Settlement patterns and their social significance. The major social systems of the rural community. Farms and Farmers. Government policies. Rural life in traditional societies and in urbanized societies. PROFESSOR CHEVRIER

5.29 SOIL SCIENCE

372-210A. PRINCIPLES OF SOIL SCIENCE. (3 Credits; 3 lectures and 1 3-hr. lab.) Origin, development and classification of soils, chemical and physical properties related to crop production, soil conservation and land use. PROFESSOR MACKENZIE

372-230B. THE PHYSICAL ENVIRONMENT. (3 Credits; 3 lectures and 1 3-hr. lab.) Description and classification of soils, geomorphology, and landscape, organic matter, water and

nutrients. The hydrologic cycle, surface drainage, ground water, water quality. Energy balance at the ground surface, evaporation, temperature regimes, freezing temperatures, micro-climate, meteorological records. MR. . . . . AND OTHERS

372-250A. GEOLOGY AND GEOMORPHOLOGY. (3 Credits; 3 lectures and 1 3-hr. lab.) (Offered in alternate years, given in 1975-76.) Geology, petrology and stratigraphy of the common igneous, sedimentary and metamorphic rocks. Principles of geomorphology related to landscape features and their interpretation. Weathering, mass wasting, erosion and deposition. PROFESSOR . . . . . .

372-310B. SOIL CHEMISTRY AND FERTILITY. (3 Credits; 3 lectures and one lab.; *Prerequisite:* Soil Science 372-210A.) Chemical composition of soils, origin and chemistry of plant nutrients, influence of soil properties on nutrient absorption and plant growth, instrumental analysis, other analytical techniques. PROFESSOR MACKENZIE

372-320A. SOIL GEOGRAPHY. (3 Credits; 3 lectures and 1 3-hr. lab.) A study of soil as a main constraint in geography. Utilization of soils in relation to agriculture, forestry, recreation, wild life, urbanization, industrialization and engineering. Interpretation of soil maps in relation to the society, the economy and the physical environment, with suggested methods of planning land development. PROFESSOR MILLETTE

372-330B. PHYSICAL PROPERTIES OF SOILS. (3 Credits; 2 lectures and 1 3-hr. lab.) Soil structure, fluxes of water, heat, gases and solids in soils; physical properties and plant growth; applications to soil dynamics. PROFESSOR WARKENTIN

372-420A. SOIL SURVEY. (3 Credits; 1 lecture and two weeks of soil mapping before session begins.) Technique of taking soil descriptions and establishing mapping units. Preparation of soil, land use and other interpretation maps. Interpretation of aerial photographs. PROFESSOR MILLETTE

372-491A. PROJECT I. (3 Credits; 2 labs.) Studies of selected problems involving laboratory and library research. STAFF

372-493B. PROJECT II. (3 Credits; 2 labs.) Studies of selected problems involving laboratory and library research. STAFF

372-495D. SEMINAR. (1 Credit; 1 lecture.) Discussions of selected topics in Soil Science. STAFF

5.30 TEXTILES AND CLOTHING

386-220A, B. CONTEMPORARY CLOTHING CONSTRUCTION. (3 Credits; 2 labs.) Principles and techniques of garment construction. The application of these principles in the construction of garments using the commercial pattern; and in the making of a sample laboratory manual. MRS. MARTIN

386-221B. ADVANCED CLOTHING CONSTRUCTION. (3 Credits; 2 labs.; *Prerequisite:* Textiles and Clothing 386-220A.) Principles and techniques of advanced clothing and their application in the construction of custom tailored or semi-tailored garments while exploring the structural potential of contemporary fabrics. MRS. MARTIN

386-321A. APPAREL DESIGN. (3 Credits; 2 labs.) Practical study of garment design by the Flat Pattern method. An introduction to drafting and draping. Experiments in applied design through mediums such as batik, tie-dying and creative stitchery. MRS. MURPHY

386-322B. PSYCHOLOGICAL AND SOCIAL BASES OF CLOTHING. (3 Credits; 3 lectures.) A study of the function and use of clothing at different stages in the life cycle of the individual. The use of colour and styling as an expression of personality. Historical and contemporary perspectives of dress as a reflection of social rank and life styles. PROFESSOR . . . . . .

386-332A. TEXTILES — NATURAL AND MAN-MADE FIBRES. (3 Credits; 3 lectures and 1 lab.) A consumer-oriented study of the history, properties, characteristics and performance limitations of natural and man-made fibres; yarns; fabric constructions; finishings and finishes as well as mixtures and blends. MRS. MURPHY

386-433B. TEXTILES CHEMISTRY. (3 Credits; 3 lectures and one lab.) A study of cellulose protein, synthetic and mineral fibres; dyestuffs and dyeing; finishes and finishing. Modern problems and developments in textiles. PROFESSORS ANASTASSIADIS AND HENNEBERRY

5.31 WOODLAND RESOURCES

374-200B. FOREST RESOURCES. (3 Credits; 3 lectures and project.) Classification of Canadian forests; forest policy; industrial utilization and products; forest economics; management, harvesting methods and ecological implications, costs and other factors affecting levels of management; problems in reforestation and afforestation; multiple-use concepts; recreational aspects; forest influences. PROFESSOR A. R. C. JONES

374-210A, C. METHODS OF ENVIRONMENTAL INTERPRETATION. (3 Credits; 2 lectures and 1 lab.) (Summer session 3 weeks; 2-hr. lecture and field trip each day.) For people interested in conducting effective field study trips; organization and operation of studies, class preparation, field methods, basic information and sources, functions of tour guides, utilization of different study areas, special problems and possibilities for follow-up class work. Field work at the Morgan Arboretum nature and the Gault Estate.

374-330A. PRIVATE FORESTRY. (3 Credits; 3 lectures and 1 3-hr. lab.) Trees and forests of eastern Canada; forest ecology; products; multiple use potentials; silviculture, management, and marketing; diverse objectives of forest owners, management alternatives; relation to agriculture; analysis of management problems; present and future socio-economic significance of this segment of land resource. PROFESSOR MACARTHUR

374-440B. SILVICULTURE. (3 Credits; 2 lectures; 1 conference; Desirable *Prerequisites:* Botany 346-451A, Woodland Resources 374-330A; or consent of instructor.) A generalized treatment of applied forest ecology and current silvicultural practices with emphasis on Eastern Canadian conditions. The principles of regeneration, nursery practice, planting, tending and harvesting of natural and artificial stands, accompanied by field observations and study of selected forestry and related operations. STAFF AND GUEST LECTURERS

374-490D. PROJECT — WOODLAND RESOURCES. (3 Credits; 1 lecture; 1 conference.) Study of a selected problem in one of the areas related to forest land use, urban forestry, arboriculture and recreational use of forest land involving field study and literature review. Project will include preparation of a report and an oral presentation. STAFF

5.32 ZOOLOGY

349-203B. INVERTEBRATE ZOOLOGY. (3 Credits; 2 lectures, 1 3-hr. lab. and conference.) The biology, structure, physiology and evolution of the invertebrates, exclusive of insects. PROFESSOR MORRISON AND STAFF

349-205B. LABORATORY TECHNIQUES IN ZOOLOGY. (3 Credits; 1 lecture, 1 3-hr. lab. and project.) The preparation of histological slides and the technique of making scientific illustrations. PROFESSOR MCFARLANE

349-307A. NATURAL HISTORY OF THE VERTEBRATES. (3 Credits; 3 lectures and 1 3-hr. lab.) (Offered in alternate years, given in 1975-76.) A general review of the higher taxonomic groups of vertebrates along with the prochordates. Major emphasis is on the diagnostic characters which serve to separate the groups, and also their evolution and distribution. PROFESSOR BIDER

349-308B. COMPARATIVE MORPHOLOGY OF THE VERTEBRATES. (3 Credits; 2 lectures, 1 3-hr. lab. and project.) (Offered in alternate years, given in 1975-76.) An overview of the morphological adaptations, and their evolution, of the vertebrates. Major differences between vertebrates and invertebrates; the early embryology, supporting systems including the axial skeletal system and paired structures; muscular, digestive, and nervous systems; sensory systems of vision, acoustics, and taste, the endocrines; and the tegumentary system. MRS. (DR.) ALI-KHAN

349-312A. PRINCIPLES OF SYSTEMATIC ZOOLOGY I. (3 Credits; 3 lectures, and assignments.) (Offered in alternate years, given in 1975-76.) Introduction to animal taxonomy; 'the New Systematics'; the species concept; variation; speciation; reproductive isolation; evolution; phylogeny; phenetics: zoological nomenclature; methodology, etc. PROFESSORS KEVAN AND VICKERY

349-313B. PRINCIPLES OF SYSTEMATIC ZOOLOGY II. (3 Credits; 3 lectures and project; *Prerequisite:* Zoology 349-312A.) (Offered in alternate years, given in 1975-76.) Present and past factors affecting the areal, regional and world distribution of animal groups and

species, with particular reference to the post-Mesozoic fauna; related aspects of evolutionary and phylogenetic theory, e.g., adaptation, mimicry, parallel and convergent evolution, etc., 'Continental Drift', climatic and topographical variation, dispersal, etc.
PROFESSORS KEVAN AND VICKERY

349-315A. BIOLOGY OF INLAND WATERS I. (3 Credits; 2 lectures and 1 3-hr. lab.; *Prerequisite:* Any basic Botany or Zoology.) General nature and history of limnology; divisions of inland waters; properties of fresh water; habitats; zones; nutrient cycles; biota; adaptations; seasonal variation; distributions; pollution; succession and evolution of fresh water environment. Some field excursions will be arranged.
MRS. (DR.) ALI-KHAN

349-316B. BIOLOGY OF INLAND WATERS II. (3 Credits; 2 lectures and 1 3-hr. lab.; *Prerequisite:* Zoology 349-315A.) (Offered in alternate years, given in 1975-76.) A continuation of Biology of Inland Waters I, covering in greater detail those areas related more particularly to animal life, with particular reference to invertebrates (especially insects); faunal groups according to systematic position and habitat; identification; distribution within water bodies; locomotion, food relations; effects of environment; indicators of pollution.
MRS. (DR.) ALI-KHAN

349-418A. TERRESTRIAL ANIMAL ECOLOGY I. (3 Credits; 2 lectures, 1 3-hr. lab and one week field laboratory prior to fall term; *Prerequisite:* Biology 344-204B.) A more advanced course in animal ecology considering concepts and methods in physiological and population ecology by using case studies from land environments.
PROFESSOR STEWART

349-419B. TERRESTRIAL ANIMAL ECOLOGY II. (3 Credits; 2 lectures and 2 conferences; *Prerequisite:* Zoology 349-418A.) A more advanced course considering concepts and methods in synecology using case studies, mainly from land environments.
PROFESSOR STEWART

349-422A. PARASITOLOGY I. (3 Credits; 2 lectures and 1 3-hr. lab.; *Prerequisite:* Biology 344-200A.) (Offered in alternate years, given in 1974-75.) The systematics, morphology, biology and ecology of the parasitic protozoa and flatworms with emphasis on economically and medically important species.
PROFESSORS . . . . . , KEVAN AND MEEROVITCH

349-423B. PARASITOLOGY II. (3 Credits; 2 lectures and 1 3-hr. lab.; *Prerequisite:* Zoology 349-422A.) (Offered in alternate years, given in 1974-75.) The systematics, morphology, biology and ecology of the parasitic roundworms and arthropods with emphasis on economically and medically important species.
PROFESSORS . . . . . , KEVAN AND MEEROVITCH

349-490D. PROJECT. (3 Credits; 1 lab.) A problem involving literature review and private investigation will be allotted to each student taking the course.
STAFF

349-495D. SEMINAR AND LITERATURE REVIEW. (2 Credits; 2 lectures.) Presentation of papers on, and discussion of, topics from selected fields of Zoology (including Entomology) and of research reports; reviews of recent literature.
PROFESSOR MORRISON AND STAFF

6 GRADUATE PROGRAMS

Graduate work, under the Faculty of Graduate Studies and Research, McGill University, Montreal, may be undertaken at Macdonald College, in Agricultural Engineering, Agronomy, Animal Science (Animal Breeding, Animal Physiology or Nutrition), Chemistry, Economics, Entomology, Genetics, Horticulture, Microbiology, Parasitology, Plant Pathology, Soil Science and Wildlife Biology. The advanced courses of study offered lead to the degrees of Master of Science and Doctor of Philosophy.

A number of scholarships and student assistantships are available.

The Faculty of Graduate Studies and Research issues an *Announcement* giving full information regarding graduate courses, and scholarships, theses, registration, etc., in connection therewith, which will be sent on application to the Dean of the Faculty of Graduate Studies and Research, McGill University, Montreal or to the Registrar, Macdonald College, Que.

7 DIPLOMA IN AGRICULTURE

Director — Professor N. C. LAWSON

In this two-year program, the practical application of the principles of agricultural science is emphasized. The objectives of the program are:

— To provide the student with the best possible instruction in the agricultural practices of eastern Canada.

— To develop in the student an understanding of the problems of agriculture and provide the knowledge required for an intelligent approach to their solution.

— To prepare the student for leadership in the community.

The graduates of the Diploma program find careers in agricultural production and its industries closely related to agriculture.

The work of the first year is taken by all students in common. In the second year certain courses are taken by all students, but each student must choose, in addition, a minimum number of courses from a list of elective courses. The student must indicate his choice on the registration form at the beginning of the second year, and is strongly advised to make his choice before the end of his first year. In the event that too few students select an elective course in any year, that course may not be given in that year.

7.1 ENTRANCE REQUIREMENTS

1. Students must have passed their seventeenth birthday before entering the program.
2. Students should have a good practical knowledge of farming, either coming from a farm or having worked for at least one full season on an approved Eastern Canadian farm.
3. The education requirement is the Grade XI Quebec High School Leaving Certificate or its equivalent with passes in a minimum of eight papers which must include at least one mathematics and one science subject.
4. Students of mature years who do not meet the academic requirements and who intend to make agriculture a career may apply for admission. Their application will be considered in an interview with the Diploma Course Committee.

Information on other matters of concern to Diploma students is found under the following headings (see index): Registration, Residence, Conduct and Discipline, Fees, Health Service.

7.2 SYLLABUS

Diploma Course

FIRST YEAR

TERM 1 COURSE NUMBER	SUBJECT	CREDITS
336-D12A	Agricultural Engineering-Machinery	3
340-D13A	Hay and Pasture Crops	2
342-D12A	Animal Anatomy and Physiology	2
344-D11A	Agricultural Botany	2
344-D13A	Zoology	2
332-D11A	Elementary Chemistry	2
348-D15D	English	1
360-D15A	Algebra, Geometry and Trigonometry	2
372-D11A	Soils	2

TERM 2

336-D13B	Ag.Eng. - Shopwork and Metallurgy	2
342-D13B	Applied Animal Nutrition or Feeds and Feeding	2
342-D11B	Principles of Livestock Improvement	2
334-D17B	Economics of Canadian Agriculture	2
348-D15D	English	1
358-D15B	General Horticulture	2
362-D11B	Microbiology	1
338-D16B	Physics	1
340-D19B	Grains and Miscellaneous Crops	2
	Total	33

SECOND YEAR

TERM 1

Required Courses

COURSE NUMBER	SUBJECT	CREDITS
336-D22A	Land Measurement and Water Control	3
334-D28D	Farm Management	2
352-D21A	Extension Methods	2
330-D26D	Farm Project	1
340-D24B	Weeds and Weed Control	2

Electives (Minimum of 6 Credits)

372-D21A	Farm Forestry	2
342-D23A	Dairy Cattle Production	3
342-D24A	Beef Cattle and Sheep Production	3
358-D22A	Vegetable Cash Crops	2
358-D23A	Fruit Cash Crops	2
338-D21A	Agricultural Weather and Climate	2
340-D22A	Seed Production, Processing and Analysis	2

TERM 2

Required Courses

344-D21B	Pest Control	2
334-D28D	Farm Management (Cont'd)	2
340-D27B	Crop Management	2
330-D26D	Farm Project (Cont'd)	1

Electives (Minimum of 6 credits)

336-D23B	Structures, Environments and Materials Handling	3
342-D22B	Animal Products	3
342-D25B	Animal Disease Control	2
342-D26B	Swine Production	3
342-D27B	Poultry Production	3
358-D21B	Commercial Handling of Horticultural Products	2
358-D24B	Commercial Ornamental Horticulture	2
350-D22B	Bees and Beekeeping	2
	Total	33

7.3 DESCRIPTION OF DIPLOMA COURSES

Courses designated "A" are given in first term only.
Courses designated "B" are given in the second term only.
Courses designated "D" continue throughout both terms.

AGRICULTURAL ENGINEERING

336-D12A. AGRICULTURAL POWER AND MACHINERY. (3 Credits; 3 lectures and 2 labs.) Principles of tillage, planting, fertilzer distribution, crop protection, harvesting and transport. Agricultural prime movers and power transmission; mechanical and hydraulic systems. Traction, trafficability and mobility. Operator comfort, efficiency and safety.

Machinery maintenance. Cost analysis and machinery management. Use of Nebraska Test Reports. PROFESSOR NORRIS

336-D13B. AGRICULTURAL SHOP PRACTICE. (2 Credits; 3 lectures and 1 lab.) Principles and practice in material cutting, shaping, forming, joining, fabrication. Practical exercises in welding, soldering, riveting, gluing; use of nails, bolts, screws. Operation of hand power tools. Metallurgy and properties of materials. Principles and applications of protective coatings. PROFESSOR NORRIS

336-D22A. LAND MEASUREMENT AND WATER CONTROL. (3 Credits; 3 lectures and 2 labs.) Surveying measurements and computation; land drainage; water supply; waste management. PROFESSORS BROUGHTON AND OGILVIE

336-D23B. STRUCTURES, ENVIRONMENT AND MATERIALS HANDLING. (3 Credits; 3 lectures and 2 labs.) Agricultural structures for animal housing and crop storage; environmental control; agricultural materials handling; agricultural application of electric power and control. PROFESSORS MARQUIS AND CASSIDY

AGRONOMY

340-D13A. HAY AND PASTURE CROPS. (2 Credits; 3 lectures and 1 2-hr. lab.) Hay and pasture crops from the standpoint of their importance, variety, culture, management preservation and seed production. PROFESSORS RILEY AND LAWSON

340-D19B. GRAIN AND MISCELLANEOUS CROPS. (2 Credits; 3 lectures and 1 2-hr. lab.) These crops will be studied from the standpoint of their importance, variety, culture and management. PROFESSORS RILEY, GENDRON AND KLINCK

340-D24B. WEEDS AND WEED CONTROL. (2 Credits; 2 lectures and 1 2-hr. lab.) Weeds will be studied from the standpoint of their relative importance as crop contaminants, their control by chemical and cultural means. Each student is required to make a collection of 20 farm weeds, suitably mounted. This collection will be used in the laboratory. PROFESSOR RILEY

340-D25A. SEED PRODUCTION, PROCESSING AND ANALYSIS. (2 Credits; 1 lecture, 2 2-hr. labs.) A study of production, processing, storage and marketing of seed. Attention is given to seed characteristics and their utilization in seed separation and analysis. Seed characteristics and their utilization in seed separation and analysis. Seed certification systems, seed grading and seed laws are examined. Considerable emphasis is placed on laboratory assignments dealing with seed processing and quality evaluation. PROFESSOR KLINCK

340-D27B. CROP MANAGEMENT. (2 Credits; 2 lectures and 1 2-hr. lab.) Factors determining the crops to grow, cropping schemes for typical situation in Eastern Canada. PROFESSOR RILEY

ANIMAL SCIENCE

342-D11B. PRINCIPLES OF LIVESTOCK IMPROVEMENT. (2 Credits; 3 lectures and 1 2-hr. lab.) The fundamental principles underlying the improvement of animals through breeding and the application of these principles to the improvement of livestock and poultry. PROFESSORS MOXLEY AND BUCKLAND

342-D12A. ANIMAL ANATOMY AND PHYSIOLOGY. (2 Credits; 2 lectures and 1 3-hr. lab.) A study of the structure and function of the various organ systems of farm animals with special reference to those features associated with animal production. PROFESSOR R. D. BAKER

342-D13B. APPLIER ANIMAL NUTRITION. (2 Credits; 3 lectures and 1 2-hr. lab.) Nutrients in feeds and their function in the body. A study of common feeds and their use in animal rations. Ration formulation and feeding programs. PROFESSOR DONEFER

342-D28A. DAIRY CATTLE PRODUCTION. (3 Credits; 3 lectures and 1 2-hr. lab.) The application of biological principles of genetics, physiology, nutrition and pathology as well as principles of economics and engineering and the integration of these principles, through management, for the maximum production efficiency of milk and meat by dairy cattle. Trips to dairy farms and related enterprises will comprise part of the laboratory work. PROFESSOR.....

342-D29A. BEEF CATTLE AND SHEEP PRODUCTION. (3 Credits; 3 lectures and 1 2-hr. lab.) The application of biological principles of genetics, physiology, nutrition and pathology as well as principles of economics and engineering and the integration of these principles, through management, for the maximum production efficiency of beef cattle and sheep. Trips to beef and sheep farms and related enterprises will comprise part of the laboratory work. PROFESSOR DONEFER

342-D30B. SWINE PRODUCTION. (3 Credits; 3 lectures and 1 2-hr. lab.) The application of biological principles of genetics, physiology, nutrition and pathology as well as principles of economics and engineering and the integration of these principles, through management, for the maximum production efficiency of swine. Trips to swine farms and related enterprises will comprise part of the laboratory work. PROFESSOR HARTSOCK

342-D31B. POULTRY PRODUCTION. (3 Credits; 3 lectures and 1 2-hr. lab.) The application of biological principles of genetics, physiology, nutrition and pathology as well as principles of economics and engineering and the integration of these principles, through management, for the maximum production efficiency of poultry meat and eggs. Trips to poultry farms and related enterprises will comprise part of the laboratory work.
PROFESSOR BUCKLAND

BIOLOGY

344-D11A. AGRICULTURAL BOTANY. (2 Credits; 2 lectures and 1 2-hr. lab.) The course consists of a study of the fundamentals of growth and reproduction processes in plants. The botany of economic plants will be studied as much as possible and consideration given to weeds and weed seeds and their control. PROFESSOR PELLETIER

344-D13A. ZOOLOGY. (2 Credits; 2 lectures and 1 lab.) A review of general zoology and its taxonomic basis, followed by elementary treatment of insects, including structure, classification, principles of ecology, principles of pest control, and use of literature on insects. PROFESSOR VICKERY

344-D21B. PEST CONTROL. (2 Credits; 2 lectures and 1 2-hr. lab.) Amplification of the principles of pest control and a summary of pest control chemicals. The student prepares notes on recognition, habits and control of eight plant diseases and eight insect pests of crops or animals of special interest to him.
PROFESSORS VISWANATHAN AND VICKERY

CHEMISTRY

332-D11A. ELEMENTARY CHEMISTRY. (2 Credits; 2 lectures and 1 lab.) A chemistry course with special application to soils, fertilizers, feeding stuffs, and insecticides and fungicides. PROFESSOR HENNEBERRY

ECONOMICS

334-D17B. ECONOMICS OF CANADIAN AGRICULTURE. (4 Credits; 3 lectures.) The economics of the Canadian farm industry. Structure and organization. Commodity sectors. Marketing institutions and practices. Farm credit. PROFESSOR MacFARLANE

334-D28D. FARM MANAGEMENT. (2 Credits; 2 lectures and 1 lab.) The keeping of farm accounts and production records and their analysis as a means of improving the efficiency of production. Farm credit and partial budgeting as applied to farming. A study of the economic guides to farm management decisions. Farm income tax.
PROFESSOR.....

ENGLISH

348-D15D. ENGLISH. (2 Credits; 2 lectures.) Principles and practice of oral and written English. PROFESSOR.....

ENTOMOLOGY

350-D22B. BEES AND BEEKEEPING. (2 Credits; 2 lectures, 1 conference.) Social insects, development of social behaviour and coevolution of flowering plants and social insects. Life and behaviour of honeybees. Insect pollination of plants. Economics of pollination and honey production. Practical beekeeping including all modern beekeeping practices.
PROFESSOR VICKERY

EXTENSION METHODS

352-D21A. EXTENSION METHODS. (2 Credits; 1 lecture and 1 lab.) A course to develop rural leadership and the ability to communicate ideas. Includes a study of the changing rural community and its redevelopment; the function of rural organizations; extension methods and communication skills. MR. VAN LIEROP

HORTICULTURE

358-D15B. GENERAL HORTICULTURE. (2 Credits; 3 lectures and 1 2-hr. lab.) A general course dealing with the principles of farm horticulture including the farm garden, the

improvement of the home surroundings, potato production, the farm orchard and small fruit plantations, and home storage.
PROFESSOR TAPER AND STAFF

358-D21B. THE COMMERCIAL PACKAGING, HANDLING, AND STORAGE OF HORTICULTURAL PRODUCTS. (2 Credits; 2 lectures and 1 lab.) Storages and storage practices. Canning, quick freezing and other means of food preservation will be considered.
PROFESSOR DAVID

358-D22A. VEGETABLE CASH CROPS. (2 Credits; 2 lectures and 1 2-hr. lab.) A study of commercial vegetable production with reference to canning crops such as peas, beans, sweet corn, and tomatoes; and storage crops such as potatoes, carrots, onions and cabbage.
PROFESSOR BIBLE

358-D23A. FRUIT CASH CROPS. (2 Credits; 2 lectures and 1 2-hr. lab.) The production of fruit cash crops for market and processing.
PROFESSOR TAPER

358-D24B. COMMERCIAL ORNAMENTAL HORTICULTURE. (2 Credits; 2 lectures and 1 2-hr. lab.) A consideration of commercial nurseries and nursery practices, turf farming and the operation of garden centres.
MR. WIGDOR

MATHEMATICS

360-D15A. ALGEBRA, GEOMETRY AND TRIGONOMETRY. (2 Credits; 3 lectures.) An introductory course including a study of exponents, logarithms, the slide rule, characteristics of lines and planes, equations of line and circle, charts and graphs, trigonometrical functions, number bases, interest and annuities.
PROFESSOR DOUGLAS

MICROBIOLOGY

362-D11B. AGRICULTURAL MICROBIOLOGY. (1 Credit; 1 2-hr. lab.) A study of bacteria in relation to milk, water, sewage, soil fertility, fermentation, food preservation and food poisoning.
PROFESSOR ROBERTSON

PHYSICS

338-D16B. PHYSICS. (1 Credit; 2 lectures.) A course dealing with the fundamental principles of Physics particularly in regard to energy.
PROFESSOR DOUGLAS

338-D21A. AGRICULTURAL WEATHER AND CLIMATE. (2 Credits; 1 lecture, 1 2-hr. lab.) An introduction to weather and climate, with emphasis on such observations as can be made easily and inexpensively on a farm, and on the interpretation of these in terms of the weather map and forecast.
PROFESSOR DOUGLAS

PROJECT

330-D26D. PROJECT. (2 Credits; equivalent of 2 labs.) A project is required of each Second year student. This will consist of a detailed analysis of the operation of a Canadian farm, and projected plans for the enterprise selected by the student to provide for full farm operations covering a period of five or more years. To be completed not later than March 31.
Supervising Committee: *The Diploma Course Committee*
PROFESSOR HAMILTON (CHAIRMAN)

SOIL SCIENCE

372-D11A. SOILS. (2 Credits; 2 lectures and 1 2-hr. lab.) Soil properties and characteristics; classification and mapping of soils; recognizing differences among soils on a farm; use of fertilizers, lime and manure; soil testing; tillage and soil management.
PROFESSOR MILLETTE

WOODLOT MANAGEMENT

374-D21A. FARM FORESTRY. (2 Credits; 1 lecture and 2 2-hr. labs.) Principal trees of Eastern Canada and their silvicultural characteristics; woodlot protection; forest communities. Volume estimates of trees and woodlot products; woodlot timber cruising; calculation of annual cut; cutting methods; forest stand improvement; logging practices; reforestation and Christmas tree crops; sugar bush management; marketing of woodlot products
PROFESSOR A. R. C. JONES

7.4 ACADEMIC STANDING — DIPLOMA IN AGRICULTURE

CREDIT SYSTEM

All courses carry a credit value. Courses are graded by letter. Ratings of 4, 3 2, 1, and 0 are attached to the letter grades A, B, C, D, and F respectively. The letter grade F indicates a failure.

YEAR 1

A student, in order to proceed to the second term of Year 1, must achieve pass standing in at least half of the credits for which he was registered in the first term. Supplemental examination privileges will be granted up to a maximum of 12 credits at the end of Year 1. Students who have failed more than 12 credits will be required to withdraw. Students with more than 6 credits outstanding will not be allowed to register for Year 2.

YEAR 2

To be eligible for a Diploma, a student must have passed all the required courses and the electives approved by the Director of the Diploma Course. He must have accumulated a minimum of 63 credits. He must achieve a cumulative grade point average of at least 2.0 for all courses taken from the syllabus for Year 2.

The grade points for each course are calculated by multiplying the credit value of the course by the student's earned grade rating. The grade point average (G.P.A.) is computed by dividing the sum of the grade points earned by the total course credits attempted. A failed course will remain in the calculation of the G.P.A. even after the course is repeated and passed, or if a supplemental examination is taken.

SUPPLEMENTAL EXAMINATIONS

A student who has failed a course may either re-register for and repeat the course, or may apply to write one supplemental examination and will receive the grade earned. In the case of an elective course, the student may substitute another elective.

Supplemental privileges or re-registration are available for students who wish to up-grade their standing in a course in which a grade of D has been obtained. A student may re-register only once in any course. Supplemental examinations may be written at the August supplemental period or at the next regular final examination (i.e. December for first semester courses and April for second semester courses). By arrangement with the instructor, an examination may be made available at the end of a term in which there is no regular end of term examination in that course.

Candidates for a supplemental examination must make application for the examination at least three weeks prior to the examination date on forms available in the Registrar's office. The fee is $10 per paper.

CALENDAR FOR SESSION 1974-75

1974

May 13, Monday to June 21, Friday	Pre-Summer Session.
May 20, Monday	Victoria Day — Administrative Offices closed.
June 5, Wednesday and June 6, Thursday	Convocations.
June 24, Monday	St. Jean Baptiste Day — Administrative Offices closed.
June 24, Monday to August 11, Sunday	French Summer School.
July 1, Monday	Dominion Day — Administrative Offices closed.
July 2, Tuesday to August 9, Friday	Summer Session.
August 12, Monday to September 6, Friday	Freshman Orientation and pre-registration counselling.
August 13, Tuesday to August 23, Friday	Supplemental examination period.
September 2, Monday	Labour Day — Administrative Offices closed.
September 6, Friday *September 9, Monday* *September 10, Tuesday* *September 11, Wednesday*	Registration of all students in Arts, Social Work, Visiting and Special students in Arts.
September 11, Wednesday *September 12, Thursday* *September 13, Friday*	Registration of all students in Science, Visiting and Special students in Science.
September 16, Monday	Lectures begin in all years of Arts and Science.
September 30, Monday	Late registration.
September 30, Monday to October 4, Friday	Change of course period.
October 14, Monday	Thanksgiving — Lectures cancelled — Administrative Offices closed.
October 18, Friday	Deadline for withdrawing ("W") from "A" (first term) courses.
November 6, Wednesday	Fall Convocation.
November 29, Friday	Deadline for withdrawing ("W") from "D" (year) courses.
December 20, Friday	Last day of lectures in Arts and Science.
December 24, Tuesday to January 1, 1975 Wednesday	Christmas and New Year Holiday — Administrative Offices closed.

1975

January 3, Friday to January 17, Friday	Examinations in first term courses in Arts and in Science.
January 16, Thursday	January Registration (for students entering in January ONLY).
January 20, Monday	Second term lectures begin in Arts and in Science.
January 27, Monday to January 31, Friday	Change of course period for "B" (second term) courses ONLY.
February 21, Friday	Deadline for withdrawing ("W") from "B" (second term) courses.
February 21, Friday and February 22, Saturday	Mid-term weekend holiday.
March 28, Friday to March 31, Monday	Easter — Lectures cancelled — Administrative Offices closed.
April 18, Friday	Last day of lectures in Arts and in Science.
April 21, Monday	Examinations begin in Arts and in Science.
May 19, Monday	Victoria Day — Administrative Offices closed.
June 4, Wednesday to June 7, Saturday	Convocations.

1 THE UNIVERSITY

HISTORY

In 1813 the Hon. James McGill, a leading merchant and prominent citizen of Montreal, died and left in his will a property of 46 acres and a sum of 10,000 pounds to the already existing Royal Institution for the Advancement of Learning upon condition that the latter erected "upon the said tract or parcel of land, an University or College, for the purpose of education and the advancement of learning in this Province"; and further upon conditon that "one of the Colleges to be comprised in the said University shall be named and perpetually be known and distinguished by the appellation of 'McGill College'."

Owing to a lack of funds and persistent opposition the complete University which had been planned by the Royal Insitution was not built, but after years of litigation and effort a Royal Charter was granted in 1821 and the University of McGill College was opened in 1829 with what remained of James McGill's legacy as its endowment, and teaching then started in the Faculties of Medicine and Arts. The medical faculty grew steadily, and after an amended Charter was secured in 1852 a new era of progress began for the Faculty of Arts with the appointment in 1855 of Sir William Dawson as Principal, a position which he held for thirty-eight years.

Since 1855 the University has grown vigorously, dividing itself into further faculties. In 1899 the Royal Victoria College was opened, a gift of Baron Strathcona, to provide separate teaching and residential facilities for women students. Gradually, however, classes for men and women were merged, and now the University is wholly coeducational. In 1907 Macdonald College was established at Ste. Anne de Bellevue, as a residential college for Agriculture, Household Science, and the School for Teachers. This general development was greatly facilitated by the generosity of Sir William Macdonald, whose gifts to the University included a Physics Building, a Chemistry and Mining Building, and an Engineering Building, in addition to the college named after him.

At present more than seventeen thousand students are taking regular university courses. New buildings have been erected or acquired to provide the undergraduate and research facilities needed by the increased student body, and include residences, gymnasium, swimming pools and winter stadium as well as a University Centre and a concert hall.

GOVERNMENT

McGill University is a Corporation created by a Royal Charter granted by the Crown of the United Kingdom, a general supervisory power being retained by the Crown and exercised through the Governor-General as *Visitor*.

The *Governors* of the University constitute the Royal Institution for the Advancement of Learning, a corporation existing under the laws of the Province of Quebec. In them is vested the management of finances, the appointment, in consultation with Senate, of Professors, and other duties. Twenty-five of the Governors are elected by the Board from amongst those nominated by the Nominating Committee; five are elected by the Graduates' Society; and five are elected by Senate from amongst its members, student members being eligible. The Board elects the Chancellor of the University and also, from among its members, a Chairman to preside at its meetings, who may also be the Chancellor. The Chancellor and the Principal are *ex officio* members.

The *Chancellor* is President of the Royal Institution for the Advancement of Learning, and Presiding Officer of Convocation and of Joint Sessions of the Board of Governors and the Senate.

The *Principal* is the academic head and chief administrative officer. He is appointed by the Board of Governors after consultation with Senate. He also holds the office of Vice-Chancellor of the University and is, *ex officio,* Chairman of Senate.

Senate consists of eighty-four voting members: the Chancellor, the Principal, the Chairman of the Board of Governors, the Vice-Principals, the Deans of the Faculties, the Dean of Students, the Director of Libraries, the Director of the Centre for Continuing Education, the President of the Students' Society, all ex *officio,* forty-one members elected by their Faculties, two librarians elected by the librarians, four Governors elected by the Board, and fourteen students elected by the students. The Senate is the highest academic authority of the University and has control over admission, courses of study, discipline, and degrees.

The carrying out of the regulations of Senate along with primary responsibility for the conduct of the educational work of the University is entrusted to the various Faculties and Schools.

FACULTY GOVERNMENT

The Faculties of Arts and of Science were formed in 1971 out of component parts of the Faculty of Arts and Science.

The Faculty of Arts comprises the following departments and programs: Anthropology, Art History, Centre d'Etudes Canadiennes-Françaises, Classics, East Asian Studies, Economics, English, French Language and Literature, French as a Second Language, German, History, Industrial Relations, Italian, Jewish Studies Program, Linguistics, Philosophy, Political Science, Religious Studies, Russian and Slavic Studies, Social Work, Sociology, Spanish Language and Literature.

In addition, some members of the departments of Geography, Mathematics and Psychology are affiliated with the Faculty of Arts, and these departments offer B.A. programs.

The Faculty of Science comprises the Departments of Biology, Chemistry, Geography, Geology, Mathematics, Meteorology, Physics and Psychology.

In addition, some members of the Departments of Anatomy, Biochemistry, Microbiology and Immunology, and Physiology in the Faculty of Medicine are affiliated with the Faculty of Science and these departments offer B.Sc. programs.

The Faculties each meet monthly to decide academic and other policy, and to receive reports of Faculty Committees.

The Faculties share a joint Student Affairs Office where students may obtain counselling and arrange for course changes, deferred examinations, etc. The Office is located on the ground floor of Dawson Hall (see pages 24 and 43 for additional information).

STUDENT GOVERNMENT

All students registered in the University are members of the Students' Society except for students governed by the constitution of the Macdonald College Students' Society and students registered in the Faculty of Graduate Studies and Research who are non-resident students or full-time members of the teaching staff.

The executive and legislative authority of the Society is vested in the Executive Committee and Students' Council respectively. The Council, as the governing body, is responsible for the proper functioning of all activities of the Society. All undergraduate societies, major activities, clubs, societies, publications and other campus organizations of the Students' Society are under its jurisdiction. It is the only recognized medium, apart from the Students' Athletics Council, between the student body and the University authorities.

The Council is responsible to the students through open meetings and referendums of the Students' Society, and operates according to the constitution of the Students' Society.

Full details of the operations, constitution, officers and committees of the Students' Society are given in the *Student Handbook*, obtainable from the Students' Society upon request.

UNIVERSITY LIBRARIES

The University libraries include the McLennan Library, the Redpath Library and various faculty and departmental libraries in other buildings and the library at Macdonald College in Ste. Anne de Bellevue. The McLennan Library houses the main research collections for humanities and the social sciences, while the Redpath Library provides expanded facilities for the undergraduate library, the Blacker-Wood collection and the Blackader-Lauterman collection. The libraries of McGill now contain almost 3,000,000 items and receive 16,000 serial titles, many Government publications and transactions of various literary and scientific societies. The McLennan Library is rich in early printed books, in Canadiana, including the Lande Collection, and in rare pamphlets of the sixteenth to eighteenth centuries. It has special collections of David Hume, Rousseau, Rilke, Blake, Napoleon, Stephen Leacock and Rudyard Kipling, the Stearn Library of books and puppets, illustrating the history of the marionette theatre of all nations, and the William Colgate collection devoted to typography.

THE McLENNAN LIBRARY (General information: 392-4953)

1) THE MAIN LOAN AND RESEARCH COLLECTION, concentrated on the social sciences and humanities as well as other subjects — monographs, journals, documents, microfilms.
2) THE REFERENCE COLLECTION of encyclopaedias, dictionaries, bibliographical aids, indexing and abstracting services, etc., is located on the main floor.
3) A CURRENT PERIODICALS READING ROOM housing approximately 2,400 titles is on the second floor.
4) A GOVERNMENT DOCUMENTS COLLECTION AND READING AREA is located on the second floor.
5) A RARE BOOKS AND SPECIAL COLLECTIONS DEPARTMENT including a reading room is on the street floor. The Lande Collection of Canadiana is on the fourth floor.

THE REDPATH LIBRARY (General information: 392-5818)

1) THE UNDERGRADUATE LIBRARY. This is an open access circulation collection of some 111,000 items. Services of the U.L. include Readers' Services, Reserves, Circulation and a Periodical Reading Room. The Undergraduate Library occupies the basement, street and main floor levels.
2) THE BLACKER-WOOD LIBRARY OF ZOOLOGY AND ORNITHOLOGY is on the second floor. This is an internationally-known collection of some 71,000 items.
3) THE BLACKADER-LAUTERMAN LIBRARY OF ARCHITECTURE AND FINE ARTS occupies the entire third floor and houses approximately 37,000 items, numerous periodicals and architectural drawings.
4) THE AUDIO-VISUAL ROOM shares the second floor with the Blacker-Wood Library and is furnished with 225 carrels equipped with audio-visual devices such as slide projector, tape recorder, filmstrip and super-8-loop projectors and television screens.

2 APPLICATIONS AND ADMISSIONS

GENERAL

The Faculty of Arts and the Faculty of Science offer programs leading to the degrees of B.A., B.Sc. and B.S.W.

The academic year at McGill runs from mid-September until early May, with approximately two weeks vacation at Christmas. The normal period of admission is in September; however, it is possible to be considered for admission to certain programs in January, and interested students should contact the Admissons Office in October 1974.

The deadline for submission of applications for September admission is March 1 of the year for which the student wishes to apply. All applications must be accompanied by a non-refundable fee of $15.00 payable by certified cheque or money order in Canadian funds made out to McGill University.

Admission is selective, and students are reminded that fulfilment of the minimum requirements by no means guarantees acceptance.

Although our Admissions Officers are always pleased to meet prospective students, a personal interview is not required for admission.

GENERAL INFORMATION FOR NON-CANADIAN STUDENTS

A pamphlet describing immigration regulations in detail and containing notes and guidance to students from other countries is available from Canadian immigration offices, Canadian Embassies and British Consular offices, or from the Immigration Branch, Department of Citizenship and Immigration, Ottawa, Canada. Local immigration officers will be ready to give advice and help.

A useful handbook entitled *University Study in Canada* can be obtained from Canadian Embassies, Consulates, and the office of High Commissioners and Trade Commissioners. A leaflet entitled *Notes for Foreign Students Who Wish to Attend a Canadian University* may be obtained from The Association of Universities and Colleges of Canada, 151 Slater St., Ottawa, Ontario K1P 5N1.

Further information may also be found in the McGill University *General Announcement*, available at the Registrar's Office.

PROFESSIONAL STUDIES

Students intending to proceed into Dentistry, Divinity, Education, Law or Medicine should consult the Faculties concerned about their prerequisites for admission. Students proceeding into graduate professional studies should note that admission is not automatic and that application forms must be submitted in advance of the prescribed dates. Requirements needed for admission to the Graduate School of Library Science or the School of Social Work may be obtained from these schools.

ENTRANCE QUALIFICATIONS

QUEBEC STUDENTS

Holders of the Diploma of Collegial Studies are considered for admission to the first year of an appropriate three year program (90 credits).

Entrance to the Faculty of Arts

Although it is preferable to begin a specialization at CEGEP, the Faculty feels that the basic courses in English and Humanities remain the minimum requirements for many programs.

It is recommended that students planning to enter Anthropology, Economics, Geography or Psychology should take two Mathematics courses during their CEGEP years.

Entrance to the Faculty of Science

The Quebec Diploma of Collegial Studies (D.C.S.) in Pure and Applied Science (or its equivalent) is the normal pattern of preparation for programs in both physical and biological sciences.

Students with a D.C.S. in the Health Science stream are accepted to programs in the biological sciences. Those with a Health Science D.C.S. wishing a program in the physical sciences should also take Mathematics 201-105.*

Physical Sciences:
Students who intend to continue their studies in the physical sciences are strongly urged to take Mathematics 201-303* (Calculus III) as part of their CEGEP program.

Biological Sciences:
Those proceeding in the biological sciences are strongly urged to take Chemistry 202-202* (Organic Chemistry I), and to select Biology 101-301* and 101-401* as part of their CEGEP program.

NOTE: For students interested in Psychology, Psychology 350-101,* 350-201* (Introduction to Psychology I and II) and Mathematics 201-307* or Mathematics 201-317* (Statistics) are recommended.

Although the pattern of study described above is strongly recommended, students who have obtained a D.C.S. with a concentration other than Pure and Applied Science or Health Science may be considered for admission.

PROVINCES OF CANADA OTHER THAN QUEBEC

Entrance to the Faculty of Arts

Ontario Grade 13 students may be admitted to a 90-credit program if they have completed five academic subjects. English should be included in the students' program; the four elective courses should be appropriate to the program which the student wishes to enter at McGill. Students having only four subjects will be required to make up an additional six credits at McGill.

Students from provinces of Canada other than Quebec, Ontario* and Newfoundland who have completed Grade 12 in appropriate academic subjects may be considered for admission to a program requiring the completion of 120 credits (normally four years of study).

Entrance to the Faculty of Science

All programs in the Faculty of Science require that the student complete the equivalent of introductory college level courses in biology, calculus, chemistry, and physics. Students who have completed these courses with satisfactory performance prior to admission are given credit and exemption.

Ontario Grade 13 courses in biology, chemistry, and physics are accepted for exemption and each is allowed 6 credits. Grade 13 courses in mathematics are allowed 3 credits each; students who have included calculus in their program are generally required to complete calculus II at McGill. A maximum of 6 credits

*CEGEP course numbers — standard throughout the Province of Quebec.
**See footnote — page 13.

is allowed for non-science Grade 13 academic courses, and a maximum of 30 credits for all Grade 13 work. Students planning application to the Faculty of Science should follow a pre-science academic program including mathematics and chemistry prior to Grade 13. A student who has completed Grade 13 is considered for admission to a program requiring the completion of the difference between 120 credits and the number of credits he has been allowed. Thus, a student who has completed biology, chemistry, physics, two (or preferably three) courses in mathematics and one non-science academic course, all at the Grade 13 level, enters a program requiring the completion of 90 credits.

Students from provinces other than Quebec, Ontario,* and Newfoundland who have completed Grade 12 with appropriate subjects may be considered for admission to a program requiring the completion of 120 credits (normally four years of study). In general, students should have completed a course in functions or trigonometry and a course in chemistry at the Grade 11 or 12 level (preferably Grade 12 level). A course in physics is strongly recommended.

NOTE: Applicants to the Faculty of Science from outside Quebec who believe they have taken the equivalent of one or more introductory college level science courses but who do not have acceptable certification of their performance in these courses, should inquire at the Admissions Office as to their eligibility to take Placement Examinations at McGill for credit. These examinations are generally written before registration.

NON-CANADIAN APPLICANTS

Entrance to the Faculty of Arts

Students from the United Kingdom and Commonwealth countries may be admitted into a program requiring the completion of 90 credits (three years) with five General Certificate of Education papers in different subjects with at least two at the Advanced Level. An average grade of C or better is required. One of the five (or four) G.C.E. papers must be English Language.

Students with very good grades in five appropriate Ordinary Level papers PLUS one full year of formal schooling beyond Ordinary Level may be considered for entrance to an undergraduate program requiring the completion of 120 credits (usually four years).

High School graduates from the United States may be admitted to an undergraduate program requiring the completion of 120 credits. All applicants should have followed academic programs designed for university entrance. Students who have passed Advanced Placement examinations in appropriate subjects with a grade of "3" or better will be granted some advanced standing. Students with three suitable Advanced Placements may be admitted to a program requiring completion of 90 credits.

Entrance to the Faculty of Science

The three-year programs in the Faculty of Science have been designed on the assumption that the student has completed, or will complete at McGill, the equivalent of introductory college-level courses in biology, chemistry, physics, and mathematics.

A student who has completed Grade 12 in the United States is considered for admission to a program requiring the completion of the difference between 120 credits and the number of credits he has been allowed. An Advanced Placement science course is allowed 6 credits, a grade of "3" or better is required for Advanced Placement credit. All applicants should have a strong background

*Exceptions are sometimes made in the case of Grade 12 students with an average of over 80% in appropriate subjects. Such students may apply to a program requiring the completion of 120 credits.

in mathematics, chemistry, and physics. Biology is also desirable in the case of a student applying to one of the biological or health science programs.

Students from the United Kingdom and Commonwealth countries are normally required to have completed examinations in five different G.C.E. subjects including English, chemistry, physics, and mathematics, at least two of which must be at the Advanced Level. Each G.C.E. Advanced Level paper in a science subject (biology, chemistry, mathematics, physics) with a grade of "C" or better is granted the equivalent of ten credits. Such students are considered for admission to a program requiring the completion of the difference between 120 credits and the number of credits they have been allowed.

Students with very good grades in five appropriate Ordinary Level papers PLUS one full year of formal schooling beyond Ordinary Level will be considered for entrance to an undergraduate program requiring the completion of 120 credits. The five Ordinary Levels should include English, a second language, mathematics, and one of biology, chemistry or physics.

NOTE: Applicants to the Faculty of Science from outside Quebec who believe they have taken the equivalent of one or more introductory college-level science courses, but who do not have acceptable certification of their performance in these courses, should inquire at the Admissions Office as to their eligibility to take Placement Examinations at McGill for credit. These examinations are generally written before registration.

Students From Other Countries

Students from other countries are advised to consult the *General Announcement* or the Admissions Office for specific information on the status of their national education certificates.

ADDITIONAL ENTRANCE REQUIREMENTS

1) STUDENTS FROM THE UNITED STATES must write College Entrance Examination Board tests; the two scholastic aptitude tests, the English Composition test, and two other achievement tests appropriate to the program which they wish to enter at McGill. Students from the Eastern United States may obtain information about the tests by writing to:

   The College Entrance Examination Board
   Box 592
   Princeton, New Jersey 08540

   Students from the West should write:

   The College Entrance Examination Board
   Box 1025
   Berkeley, California 94701

2) STUDENTS FROM OVERSEAS are advised to write CEEB Aptitude and Achievement tests to support their application.

3) NON-CANADIAN APPLICANTS WHOSE MOTHER TONGUE IS NOT ENGLISH must submit acceptable evidence of facility in English. The following evidence is acceptable: the Test of English as a Foreign Language (TOEFL); the University of Michigan English Language test; the Certificate of Proficiency in English issued by the Universities of Cambridge and Michigan.

   TOEFL is preferred by the University; it is administered by the College Entrance Examination Board and is easily available throughout the world. Students who cannot obtain a TOEFL bulletin and registration form locally should write well in advance for them to: Test of English as a Foreign Language, Box 899, Princeton, New Jersey 08540, U.S.A.

TRANSFER STUDENTS FROM OTHER UNIVERSITIES

McGill University accepts applications from students wishing to transfer from other universities. At least sixty credits towards graduation must be earned at McGill for students proceeding to the B.Sc. degree; at least forty-five McGill credits are normally required for the B.A. degree.

Such applications are considered when the student's cumulative grade point average (CGPA) is 3.0 or higher, and when his course background suits his intended program at McGill.

MATURE STUDENT ADMISSION POLICY

In the case of prospective students 23 years of age or older, who have never been enrolled in any university, some of the normal admission requirements may be replaced or waived. For more detailed information, inquire at the Admissions Office.

HOLDERS OF A BACHELOR'S DEGREE

Students wishing to obtain a BA or BSc degree who already have a Bachelor's degree will, if admitted, be required to complete a minimum of 60 credits for the second degree.

READMISSION

A student wishing to return to the Faculty of Arts or Faculty of Science after an absence of a portion of an academic year or more must follow the procedures outlined in the section on Faculty Regulations, page 48.

INTER-FACULTY TRANSFER

In certain cases students will be permitted to transfer from another faculty to Arts or to Science. Information and inter-faculty transfer forms are available at the office of the Associate Dean.

3 FINANCIAL INFORMATION

The University reserves the right to make changes without notice in the published scale of fees.

Fees for the semester in which a student withdraws from the University are not normally refundable, except under special conditions. See "Regulations Concerning Withdrawals", page 19.

UNIVERSITY FEES

The University reserves the right to make changes without notice in the published scale of fees. Commencing with the 1974-75 academic session, the University will introduce a new system of tuition fee assessment based on a per credit charge where applicable. The basic charge for tuition fees will be $19.00 per credit and this fee will include all the regular charges of the University for registration, tuition, laboratories and libraries. Student Service fees and Students' Societies fees will be separately assessed in a manner appropriate to those two functions and must be paid at the same time as the tuition fees.

FULL-TIME STUDENTS PURSUING A McGILL DIPLOMA OF COLLEGIAL STUDIES

Quebec students pay a tuition fee of $12.50 per credit for the credits required to complete the McGill D.C.S. and $19.00 per credit for all other credits. Fees for Student Services and Students' Societies are assessed separately and for full time students (24 credits or more) are the same as those specified for University level students (see below).

Non-Quebec students pay $19.00 per credit for all courses plus fees for Student Services and Students' Societies.

UNIVERSITY-LEVEL STUDENTS (Degree Candidates)

In the Faculties of Arts and of Science, tuition fees of $19.00 per credit will be charged. For example, a student who is taking an academic load of 30 credits would pay $570.00 in tuition fees ($19.00 x 30). Tuition fees will vary according to the number of credits taken but Student Services and Students' Societies fees will be as shown below for all students taking 24 or more credits.

Students will be charged a fee of $60.00 for Student Services and as follows for Students' Societies:

Arts	B.A.	$28.00
	B.S.W.	30.00
Science		28.00

PART-TIME, SPECIAL AND VISITING STUDENTS

All Part-Time, Special and Visiting students will be assessed $19.00 per credit. In addition the following fees will be assessed:

	Student Services	*Student Societies*
18 credits or more	$60.00	$28.00
10 - 17 credits	30.00*	10.00
9 credits or less	15.00*	10.00

*Excludes Athletics. At the discretion of the Director of Athletics, a student may participate in the Athletics program upon payment of an additional $30.00.

SPECIAL FEES	
Application for Admission*	$15.00
Late Registration	25.00
Late Payment fee (after specified date):	
1st 30 days	10.00
After 30 days	25.00
Graduation (including academic dress for those *in presentia*)**	10.00
Duplicate Student Identity Card	5.00
Duplicate diploma	10.00
Certified transcript of student's record:	
First two copies each	1.00
Additional copies made at the same time, each	.25
Re-reading examination paper	10.00
Supplemental examinations, each paper	10.00
Change in course (Arts, Science), each change after specified change of course period	5.00

Residence fees (see page 26).

*Students already at McGill who are making application to a professional faculty or to the Faculty of Graduate Studies and Research are not required to pay this fee.

** Graduation Fee: Applications by students who expect to graduate at the Spring Convocation must be filed by March 1st of each year and by those who expect to graduate at the Fall Convocation by August 1st of each year. An application form will be mailed to each eligible student and must be returned to the Registrar's Office together with the graduation fee of $10.00 by the appropriate date listed above. This fee will cover all expenses in connection with graduation including academic dress. It is the student's responsibility to ensure that his or her name is included in the graduation list.

REGULATIONS FOR PAYMENT OF FEES

1. Students entering the University for the first time are required to pay their fees either by mail or in person at the Accounting Office within 10 days of registration. For students registering in September the second instalment is due before January 15th, 1975.
2. Returning students must pay one half of the total required fee by mail or in person to the Accounting Office before August 23rd, 1974, otherwise they will not be permitted to register. Instructions for paying fees in advance will be mailed to all returning students, either with their Sessional Reports of Standing or a short time later. Students who have been notified by the University of the award of a scholarship, bursary or student loan, and who require this award for payment of the first instalment of fees, must obtain permission to delay payment of fees from the Student Aid Office.

   The second instalment is due by January 15th, 1975. A late payment fee as stated above is charged for payment after the specified dates.
3. Students registering late must pay their fees at the time of registration, failing which they become subject to the late payment fee and the provisions of the following paragraph:

   As soon as possible after the prescribed dates for the payment of fees the Chief Accountant will send to the Dean of each Faculty a list of the registered students who have not paid their fees. The Deans will thereupon suspend them from attendance until such time as the fees are paid or a satisfactory arrangement is made with the Chief Accountant.

REGULATIONS CONCERNING WITHDRAWAL

A student who wishes to withdraw from the University* or from certain courses** (whether or not he wishes to apply for remission of fees) must secure the permission of the Dean or Associate Dean of his Faculty. The Office of the Associate Dean will supply the necessary form which must be completed and submitted. Students withdrawing from all their courses must attach their ID card to the withdrawal form. A student considering withdrawal is strongly advised to consult his Dean before making a final decision. Fees for the term in which the student withdraws are not refundable, except under special conditions. A student wishing to apply for remissions of fees must consult the Chief Accountant.

SCHOLARSHIPS

ENTRANCE SCHOLARSHIPS

In general, the University's system of entrance scholarships is designed to enable good students from all parts of Canada to attend McGill. The policy of the University is to recognize and honour scholarship, and the University Scholarships Committee selects scholarship winners from among those students who have obtained or who expect to obtain *a first class academic standing.*

Every student who has been selected for an Entrance Scholarship receives an honorary $100 award. Such a student in financial need may have this amount substantially augmented. Scholarships such as the J.W. McConnell Memorial and Morris W. Wilson Memorial Scholarships will be awarded to scholars who need full tuition, board and residence. J.W. McConnell Entrance Scholarships in Science and Engineering may provide for tuition, books, board and residence or a lesser amount depending upon need.

Entrance Scholarships are open to Canadian citizens, landed immigrants with one year's residence in Canada, and graduates of Canadian high schools, colleges and other educational institutions. Entrance Scholarships are awarded only to full-time students taking a course leading to an undergraduate degree, and applicants must be entering the First year of a University program.

Students should apply for an Entrance Scholarship by completing the Application for Entrance Scholarship. These forms may be obtained from the Admissions Office and must be submitted by March 1. Students who have completed this application will be considered automatically for every entrance scholarship for which they are eligible. As many as 250 entrance scholarships may be awarded in any one academic year.

UNDERGRADUATE AWARDS TO McGILL STUDENTS IN COURSE

Once a student is in course at McGill all scholarships, prizes and medals are awarded on the year-end examination results, and *no applications are required.*

The University Scholarships Committee is responsible for awarding Entrance Scholarships, University Scholarships and Special-Named Awards. The Committee is also responsible for overseeing all scholarship policy of the University and is composed of Chairmen of Faculty Scholarship Committees, representatives from the University at large and student members.

Faculty scholarships and awards are made by Faculty Scholarship Committees.

*See Faculty Regulations — Withdrawal from the University, page 47.
**See Faculty Regulations — Withdrawal from Course, page 45.

ARTS/SCIENCE

Scholarships are awarded only to full-time students taking a course leading to a degree. In the case of the Faculties of Arts and of Science, normally only those students who have completed at least 30 credits in the year preceding the award will be eligible for scholarships. Scholarships are awarded or renewed only if an adequate standing is attained.

Students whose University Scholarships have been renewed and who need financial assistance should apply directly to the Student Aid Office.

All awards, with the exception of prizes, are credited to the tuition fee accounts of students for the following academic year.

Inquiries concerning undergraduate scholarships should be referred to the Scholarships Office in the Registrar's Office.

FINANCIAL AID

PROVINCIAL AND FEDERAL AID

In all cases, a basic qualification is that the applicant must be a Canadian citizen or a Landed Immigrant with one year's residence and domicile in the province to which he applies.

In all provinces, except Quebec, the provincial authority listed below administers the Canada Student Loan Plan (Federal) as well as their own programs. The addresses are as follows:

Quebec: Apply for a Quebec registration card, after May 15, at the Student Aid and Foreign Student Adviser Office, McGill University, 3465 Peel Street, P.O. Box 6070, Station A, Montreal, Quebec, H3C 3G1.

Ontario: Student Aid and Foreign Student Adviser Office, 3465 Peel Street, McGill University, P.O. Box 6070, Station A, Montreal, Quebec, H3C 3G1.

New Brunswick: Department of Youth & Welfare, Fredericton, N.B.

Yukon Territory: The Students Financial Assistance Awards Committee, c/o Superintendent of Schools, Box 2703, Whitehorse, Yukon.

Northwest Territories: c/o Education Division, Department of Northern Affairs & Resources, 150 Kent Street, Ottawa, Ontario.

For the Provinces of Newfoundland, Prince Edward Island, Nova Scotia, Manitoba, Saskatchewan, Alberta, British Columbia: write to the Provincial Department of Education.

BURSARIES AND LOANS

These may also be available to non-scholarship students through the Student Aid Office if other sources of aid are genuinely inadequate.

STUDENTS FROM SCHOOLS OUTSIDE CANADA

Students from schools outside Canada are ineligible for entrance scholarships. They are expected to present evidence to immigration authorities that they have adequate funds for their studies in Canada. All who wish to study in Canada should consult the Ministry of Education in their home country for financial assistance.

SUMMER WORK AND PART-TIME WORK

Non-Canadian students who were in Canada prior to January 1, 1973, must obtain a written offer of employment from a prospective employer and submit

the written offer to the Canadian Immigration authorities in order to obtain an employment visa. Non-Canadian students who came to Canada after January 1, 1973, must obtain a written offer of employment and submit the offer to the Canada Manpower Office in order to obtain their permission before submitting the offer to the Canadian Immigration autorities. Consult the Student Aid Office for any further information needed.

UNITED STATES CITIZENS

The National Defence Loan is not tenable in Canada, but several states have long term loan plans which are tenable here. Students should inquire at the Department of Education in their state capital and also at local banks which may operate a Higher Education Loan Plan.

4 STUDENT SERVICES AND FACILITIES

OFFICE OF THE DEAN OF STUDENTS

The Dean of Students has the responsibility for the provision of and coordination of all student services and works closely with the Students' Society in the interests of all students. The Dean, Associate Dean and Executive Assistant to the Dean are available for consultation with individual students who may wish to discuss problems not already provided for by one or other of the existing services. Legal problems which cannot be dealt with by the Legal Aid Service may be referred to the Executive Assistant. The Office of the Dean of Students maintains an "open-door" policy and students are invited to make use of these services at any time.

Location: 3465 Peel St.

Dean, Dr. Saeed Mirza 392-5287/5364

Assoc. Dean, (to be appointed)

Executive Assistant, Mr. J. Stanley Kennedy 392-5288/4551

ORIENTATION SERVICE

The Orientation Service is a pre-registration counselling service designed to assist incoming students in selecting their courses and to introduce new students to the various aspects of the University.

The objectives of the program are: to provide information and advice on courses and programs of study according to the students' vocational expectations, interest, ability and aptitude; to acquaint students with the many services available at McGill, and to encourage their use; to tell students about registration procedures and offer suggestions which might facilitate the process; to provide the kind of information new students need to resolve academic and other problem (i.e. change of course, etc.); to familiarize students with the geography of the campus, and to introduce them to the libraries; to provide the opportunity for incoming students to meet individual members of the academic staff in an informal and friendly atmosphere.

Incoming students are invited to participate in a one-day orientation session consisting of the following:

A group meeting in the morning to discuss registration procedures, student services, the program for the day and questions of a general nature.

Campus tours conducted by McGill students in the morning and in the afternoon. The staff of both the Redpath and McLennan libraries provide an introduction to the libraries.

A Social Hour held daily between August 12 and September 6. Academic staff and representatives of Student Services drop in to enjoy a cup of coffee and chat with the students. The students in turn are given the opportunity to learn more about the University and discuss programs on a friendly basis.

COUNSELLING IN THE FACULTIES OF ARTS AND OF SCIENCE

Students are urged to make full use of the advice and counselling offered by the Faculties of Arts and Science. Prospective students who are undecided as to a choice of program or orientation should consult an adviser in the Student Affairs Office, Dawson Hall. These advisers are ready to provide information and advice on courses and programs of study. Incoming students are asked to contact the office as early as the month of March.

The advisers in the Student Affairs Office are available to undergraduates for consultation throughout the academic year. Experienced personnel answer questions and offer guidance each weekday from 9:00 a.m. to 5:00 p.m.

TUTORIAL SERVICES

The Office of the Dean of Students, with the cooperation of the Arts and Science Undergraduate Society, and the Faculties of Arts and of Science sponsor an extensive Tutorials Program; its services are available to students during the Fall and Spring terms. Students may be tutored by senior honours and graduate students specializing in the majority of fields within the Faculties. Sessions are approximately one hour in length and normally two to four students are tutored at each session. The cost to the student is minimal and depends on the number of students in the group; the Arts and Science Undergraduate Society and the University by joint agreement finance the difference between the nominal fees and the tutors' honorarium. Interested students may obtain further information from the Tutorial Centre (392-6741), 522 Pine Avenue West; or from the Office of the Dean of Students (392-5364); or the ASUS office, University Centre — Room B41 (392-8921).

BOOKSTORE

The McGill University Bookstore, located in the Bronfman Building at 1001 Sherbrooke Street West, provides a comprehensive stock of current textbooks, reference material and academic supplies as well as items of general interest. It is administered by a Senate committee representing the students, the faculty and the administration. For general information, telephone 392-4871.

RESIDENTIAL FACILITIES

Types of Residences

McGill offers three types of residence accommodation:

1. Royal Victoria College houses undergraduate women.
2. Douglas Hall houses both men and women, and is exclusively a graduate residence.
3. Gardner, McConnell and Molson Halls each house both men and women, most of whom are undergraduates, although some graduate students also choose to live there.

Location

The Co-educational Residences are located on the wooded slopes of Mount Royal, adjacent to the University playing fields. They are approximately ten blocks away from the main campus, and a ten-minute walk from the centre of downtown Montreal.

Royal Victoria College is on campus close to the major shopping and cultural areas of the city. Bus and subway stops are nearby.

Academic Staff

The academic staff of each hall consists of a Residence Director or Warden, Assistant Directors, and Residence Fellows or Dons. Dr. Donna Runnalls is Warden of Royal Victoria College and Dr. John Southin is Director of Residences for all the co-educational residences. One of the main functions of the academic staff is to get to know students individually and, if a student requests it, to give advice on personal or academic matters.

Rooms and Facilities

Except for a few double rooms at Royal Victoria College all rooms are for single occupancy and in each, besides a bed and bed-linen, there is a desk, chair, chest of drawers and closet. Linen and towels are changed weekly. The co-ed residences have maids who clean the rooms, but in all halls residents are expected to make their own beds and tidy up. Each hall has coin-operated automatic washers and dryers, as well as ironing facilities; an outside dry cleaning firm also calls regularly at the residences. Telephones located on each floor are operated through hall switchboards; in addition, each room is wired for a private telephone. There is storage space for ski equipment, trunks, and suitcases in every hall. Limited parking space is available in the co-ed complex only.

The halls have TV, music, sewing, and stereo rooms, and a well-stocked library of magazines, books and newspapers. The co-ed residences provide a calculating and typing room, and R.V.C. has the use of a swimming pool located within the building.

Meal Service

Residents at Molson, McConnell and Gardner halls take their meals together in a large centrally located dining hall. Douglas Hall and the Royal Victoria College have their own dining rooms. Students may choose either a seven or five day meal plan. Bag lunches are available. There are kitchenettes on every wing of the co-ed residences where residents may keep food and prepare hot or cold snacks at any time. In addition vending machines in every hall dispense soft drinks, sweets and pastries. Students in the co-ed residences can rent small refrigerators for their rooms.

Diets

Limitations of facilities do not permit catering for special religious diets in the dining halls, although the kitchens will seek to meet special needs whenever possible. Temporary diets because of sickness may be prepared on doctors' orders.

Health

In case of illness residents are usually referred to the University Health Service nearby. However, there is a nurse on duty every day in the residence dispensary or infirmary, and live-in nurses who keep evening office hours and who are also available for emergency treatment any time.

Government

Each hall has a Residents Council, elected yearly by the residents at a designated time during the academic year. It is the job of Council to gather hall opinions, set policy, supervise financial affairs, and organize sporting and recreational activities within the residences.

Guidelines

McGill's residences are run for the convenience and advantage of the students living in them. What "rules and regulations" do exist are decided upon and administered by the students themselves. Basically, living together in any community requires just a single rule: respect for the rights of others. In each hall there is a House Committee which is elected from the student body at the beginning of each year to deal with any problems that may arise.

Application and Admissions

Please note that the procedure governing residence admissions is entirely separate from that of University admissions. Application forms for both the Royal Victoria College and the Co-ed Residences are mailed out with all academic application forms.

The University is able to house in residence only a small fraction of its students. Because of the growing popularity of residence living, only a few hundred rooms become vacant each year. It is imperative, therefore, that students seeking residence accommodation apply early and fill out the residence application thoughtfully. The deadline for applications from American and Canadian students is April first; however, applications from *overseas* students may be considered even if they arrive somewhat later than April first. Otherwise, all late applications are automatically wait-listed and not considered until late August.

Among the applications that arrive on time, final selections are made with the following factors in mind: date of application, date of University acceptance, course of study, national origin, and interests as given on the application form.

Room and Board Charges in University Residences

Single Rooms — The following sessional fees apply from lunch September 9 to breakfast May 1 and include room and board charges, key deposit and residence activities fees.

Room and all meals	$1,325
Room and weekday meals	1,170

A limited number of students, whose academic programs make it difficult for them to dine in residences may be accommodated on a room only basis at lower sessional fees which are available on request.

Double Rooms — There are a limited number available in Royal Victoria College. Sessional rates are $100.00 lower than those indicated above.

Exclusions — Meals on the following holidays are not included: September 2, Labour Day; October 14, Thanksgiving; February 21, Mid-Term; March 28 and 31, Easter; May 19, Victoria Day; Christmas recess of 16 days, dates to be announced.

Meal Prices — Residents may obtain meals, in addition to those covered by sessional fees, at the following student rates.

Breakfast	$1.00
Lunch	1.50
Dinner	2.00

Extended Stays

Because of registration, examinations or other special circumstances, residents may be permitted to occupy their rooms for a limited time before or after the

period covered by their sessional fees. The charges for such extended stays are $3.12 per day, excluding meals and $5.90 per day, including meals. One of these options must apply for the full period of the extended stay. Payment for extended stays must be made in advance for the duration of the stay or a period of one week, whichever is less.

Other Regulations

Students accepted for residence must pay a security deposit of $50.00. If a student does not remain in residence the full academic year, the deposit is not returned unless written notification is received before July first or unless the examination results do not permit registration. The deposit is returned by mail in late spring to those who stayed the full academic session. Deductions, however, are made for wanton damages to the premises by the resident or by anyone when the particular individual responsible cannot be determined.

Payment of Residence Fees

Entering or transfer students: Fees may be paid in two instalments — the first within ten days after registration, and the second before January 15.

Returning students: First instalment must be paid August 23 and the second before January 15.

The sessional fees include a house fee of $10.00 collected by the University on behalf of the Residents' Council of each hall, and a $5.00 key deposit which is refunded at the end of the session.

OFF-CAMPUS HOUSING SERVICE

Available to all McGill students, this year-round service is operated under the direction of Mrs. Sadie Hempey. Up-to-date listings of various types of accommodation in the downtown area and surrounding suburbs on bus and metro routes are maintained with the use of McGill computers. The service also attempts to accommodate English-speaking students wishing to live with French-speaking families and vice-versa. Students wishing to make use of the service are asked to apply in person.

Location: 3465 Peel St.

General Information	392-4554
Director, Mrs. S. Hempey	392-4875

STUDENT COUNSELLING SERVICE

The Student Counselling Service is an expansion of the former Guidance Service and now provides all types of counselling to students of all faculties.

Among the services offered are individual counselling, human awareness groups, psychological assessment, vocational testing, effective reading courses, career planning and the Career Information Library. The service is free to all McGill students.

Location: 522 Pine Ave. W.

General Information	392-5119
Director (to be appointed)	

STUDENT AID & FOREIGN STUDENT ADVISER OFFICE

The Student Aid section of this office handles all matters relating to financial assistance whether University, Provincial or Federal. Non-Canadian students requiring certification of registration and/or letters of advice to Foreign Exchange Control Boards obtain these from this office.

The Foreign Student Adviser section of this office deals with all matters which may affect non-Canadian students such as problems with the Canadian Department of Manpower and Immigration and information concerning the necessity of the compulsory health insurance.

Location: 3465 Peel St.

General Information	392-5256
Director, Mr. J. H. Richardson	392-5258
Counsellor, Miss N. Jameson	392-5257

STUDENT PLACEMENT OFFICE – CANADA MANPOWER CENTRE

The Placement Office provides a range of services to McGill students and recent graduates in the field of student and graduate employment.

Students who seek information about job and career opportunities can meet with a placement counsellor, individually, or in groups. There is literature available, such as employer directories, company brochures, advice on career opportunities, writing a résumé, preparing for an interview, etc. Meetings, seminars and panels are arranged for the purpose of providing information on the world of work. (Students are reminded of the career library and other assistance available through the Student Counselling Service.)

Students looking for specific jobs will find employment opportunities posted at the Placement Office. A number of employers visit the Placement Office during the first term to interview students, particularly those seeking permanent employment. Registered students who have been interviewed by a placement counsellor are referred to suitable job vacancies that are not posted.

Location: 762 Sherbrooke St. W.

General Information: 283-4411

HEALTH SERVICE

When students enrol at McGill University they have available to them a full range of medical service provided by the McGill University Health Service. Medical clinics operate daily, five days of the week from 9:00 a.m. - 5:00 p.m. A physician is always on call at night and on week-ends and he can be contacted by dialing the Health Service number. There are both male and female physicians on staff as well as a competent staff of college health nurses.

This service is available to all full-time students, undergraduate and post-graduate. Students are asked to bring their Medicare cards or equivalent. *All information is completely confidential and forms no part of any "University record".*

Many students are seen for discussion about sexual life, contraception, drug problems and venereal disease. We urge students who suspect that they have V.D. to consult us because to neglect this condition can be most damaging. We invite students who are concerned about a drug problem to contact the Health Service and most particularly the Mental Health Section.

Part of the Health Service consists of a Mental Health Service which makes available to students psychiatric and psychological help. Students who wish to come are advised to make an appointment. If a psychological emergency arises the student should come directly to the Mental Health Service or phone immediately. All contacts by students with their service are kept completely confidential.

PARTICIPATION IN ATHLETICS: A student in any academic year wishing to participate in heavy contact athletics, e.g. football, will be required by the Athletics Department to undergo a physical examination at the University Health Service. A student who has received medical attention for an illness or accident must be declared fit by the Health Service before he may again participate in athletics.

In order to ensure medical coverage while a student at McGill, Canadian students from provinces other than Quebec are advised to consult with the medicare and hospital insurance offices of their own province before coming to McGill. This is particularly important since residents of other provinces are not covered by Quebec Medicare and Hospitalization while studying at McGill.

Non-Canadian students, whether undergraduate or postgraduate, are obliged to enrol in a medical and hospital insurance program. Consequently, the student and his dependents are covered to a large extent for medical and hospital expenses during the academic year. Information concerning this program can also be obtained at the general office of the Health Service.

Location: 517 Pine Avenue West

Appointment and General Office	392-5441
Mental Health Section	392-5449

CHAPLAINCY SERVICE

A counselling service is available through the campus chaplains independent of McGill administration. It is established to serve the needs of all students through individual counsel or group encounter. The service is related to areas such as marriage counselling, value systems and group dynamics. In general an attempt is made to respond to the varying crises of the student community. There are also open meetings on pertinent topics throughout the year. These are announced in the McGill Daily when they occur. Counsellors are available either through "3521" or through the listed sponsoring agencies.

There is a lounge and reading area and books and periodicals are available to students free of charge. The lounge is open for student use throughout the day. Information concerning individual denominational services is available at "3521".

Location: 3521 University Street

General Information:	392-5890

UNIVERSITY CENTRE

The University Centre at 3480 McTavish is the home of most of the extra-curricular activities at McGill. It houses offices for the Students' Society and all the major activities including the McGill Daily and Radio McGill. There are meeting rooms that are available to students, a pizza shop and cafeteria on the first and second floors, a coin laundry in the basement, a free telegram service provided by the amateur radio club, and a free lunchtime theatre. For information call 392-8922.

Extra-Curricular Activities

Complete details of all extra-curricular activities may be found in the Student Handbook, published yearly by the Student Society and available at registration.

The Student Handbook lists over 250 activities and clubs which students may join. These include international clubs, religious groups, political clubs, fraternities, communications (Radio McGill) and some 50 miscellaneous groups (such as science clubs, literary, theatrical and musical societies, chess and bridge clubs, and the Voyageurs' Society).

ATHLETICS

McGill's facilities for athletics, physical education, and recreation are centred in the Sir Arthur Currie Memorial Gymnasium, the Percival Molson Memorial Stadium and the McGill Winter Stadium. Sports facilities in the gymnasium include basketball, squash, badminton, and volleyball courts; swimming pool; facilities for gymnastics, wrestling, fencing, judo, and track. For the use of all women students of the University, staff and graduates, the Garfield Weston Swimming Pool is available.

The physical education programs for men and women provide instruction for students in various sports.

Numerous intramural and recreational sports clubs provide opportunities for students to participate in sports for relaxation and to represent their faculty, or residence on intramural teams of their choice.

On the intercollegiate level McGill participates in sports sponsored by the Quebec Universities Athletics Association and the Ontario Women's Intercollegiate Athletics Association.

For a complete description of the McGill athletics facilities and intercollegiate, intramural, and recreational sports programs, see the Student Handbook.

OTHER SERVICES

Bus and Train Passes

Students, after having registered, may obtain an application form for reduced rates on buses and trains from the Registrar's Office.

Lockers

Certain buildings have locker facilities available to students. To obtain a locker, students should apply to the building porter and present their I.D. cards.

5 REGISTRATION AND ENROLMENT

GENERAL INFORMATION

Registration takes place early in September and January (only for students entering in January); lectures begin shortly thereafter. Complete information for the use of accepted candidates is sent with the letter of admission.

Incoming students in programs requiring 96 or fewer credits who have made their choice as to area of study may proceed directly to the appropriate Academic Adviser for completion of a Study Plan Form. Such students must bring to this interview their letter of acceptance, a copy of the transcript of their previous studies and should have read carefully the relevant parts of this Announcement as well as departmental supplements available from departmental offices. In planning the choice of elective or optional courses, students should check that there are no timetable conflicts.

Students who have not decided on their area of study or who are seeking additional advice should first consult a counsellor in the Student Affairs Office, Dawson Hall, for guidance.

Students admitted to a 97 to 120 credit program will, in most cases, be assigned to an adviser in the Office of the Associate Dean. Such students should consult the Orientation Service, Room 109, Dawson Hall (telephone 392-5084).

To obtain an Academic Adviser in either the Arts programs or the Science programs, see pages 43, 44.

LATE REGISTRATION

There will be a period of registration for those unable to register at the stipulated time. (See Calendar of Dates, page 3.) There will be a late registration fee of $25.00.

TIMETABLE

An official lecture timetable is available before and at registration. A preliminary version of the timetable (omitting lecture locations) is available in early June.

CHANGE OF COURSE

Students who wish to make any changes (*i.e.* drop a course, change from one course to another, add a course) in the courses for which they are registered must, within the change of course period, apply to the Associate Dean. (See page 44).

CHANGE OF SECTION

Refer to section on Faculty Regulations, page 45.

WITHDRAWAL FROM A COURSE

Students who wish to withdraw from a course for which they are registered either before, during or after the change of course period must apply to the Associate Dean (See page 45).

CONFIRMATION OF PROGRAM

Each student is responsible for his or her registration in the proper courses and programs. A print-out will be sent to every student soon after the change

of course period and it is the student's responsibility to check it for errors and return it, signed, to the Office of the Associate Dean, Dawson Hall. Students who expect to graduate at the end of the academic year should so indicate on this verification form.

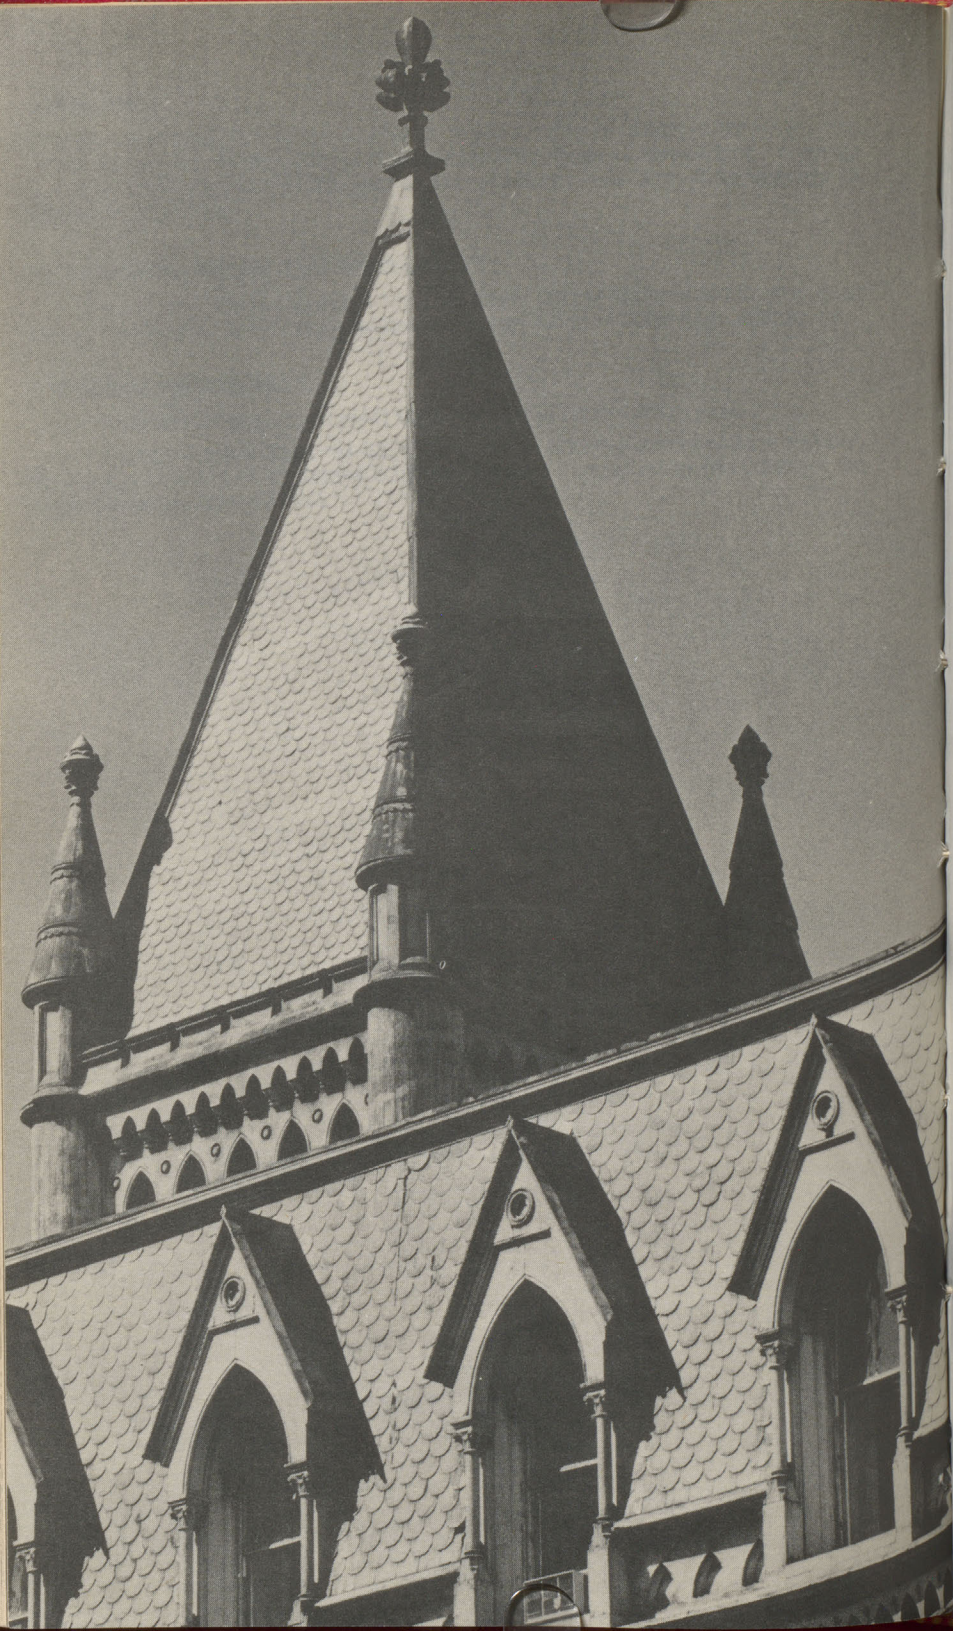
WITHDRAWAL FROM THE UNIVERSITY

A student who wishes to leave the University during the academic year must formally withdraw. Details may be found on page 47 on Faculty Regulations.

PERSONAL INFORMATION

It is important that every student keep his official record up to date.

Any change in name (*e.g.* marital status), home address and telephone number, Montreal address and telephone number should be reported to the Office of the Associate Dean, Dawson Hall.



6 COURSE NUMBERING SYSTEM

Courses are given a 7 place designation. The first three digits specify the department by a numerical code (see table below), the next three symbols form the course number proper, and the final letter indicates the term or terms during which the course is offered, according to the following scheme:

A — First term
B — Second term
D — Full session
C — Summer session
F — Field course

To illustrate: 189-223A designates Mathematics (189) course 223 given in the First term; 180-222A, B denotes Chemistry (180) course 222 given in either the First or Second terms; 204-201D designates Psychology (204) course 201 given over the full session.

The level of a course is generally indicated by the fourth character.

DEPARTMENTAL CODES

101 — History
104 — Linguistics
107 — Philosophy
110 — English (formerly 120)
111 — African Studies

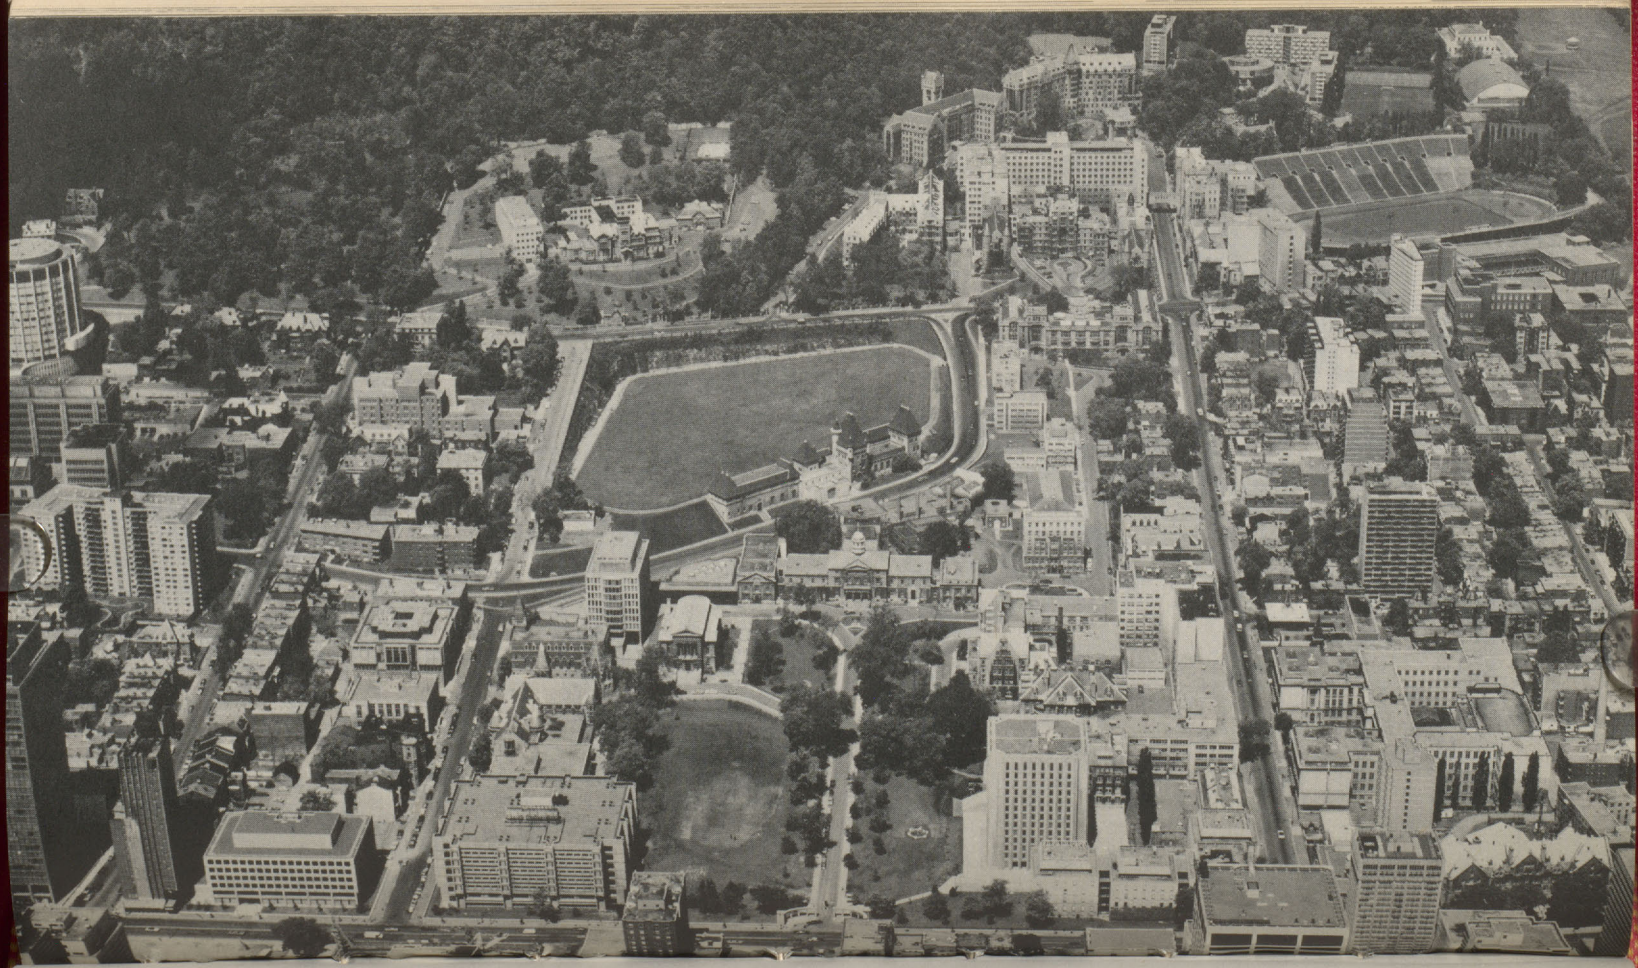
549 — Pharmacology
552 — Physiology



7 FACULTY REGULATIONS

GENERAL INFORMATION

ARTS

The Faculty of Arts offers Major and Honours programs in a wide range of fields as well as a series of interdisciplinary majors. In cooperation with the Faculty of Science, B.A. Faculty Programs are also offered in three areas. (See page 55.)

In a Major Program, 54 credits must normally be approved as part of that program, and the student may select his remaining courses from the offerings of the Faculties of Arts and of Science. Special permission is required for a student who wishes to choose an elective from another Faculty, *e.g.* Education, Management, etc .

Honours programs involve a high degree of specialization, and require the student to satisfy specific departmental Honours requirements while maintaining a good academic standing. Joint Honours programs are available in many related disciplines. Consult departmental listings.

SCIENCE

There are three types of programs: Faculty Programs, Major Programs and Honours Programs.

A Faculty Program is an approved coherent selection of courses giving the student a useful concentration in a recognized area. Three-fifths of the student's course load in a Faculty Program is specified, the remaining courses being freely elected from those offered in the Faculties of Science and of Arts. A student in a Faculty Program may thus choose a pattern of study which can range from one yielding a broad education to one specializing in particular interests.

Major Programs are more specialized than Faculty Programs, and are usually centred around a specific discipline or department. Between three-fifths and four-fifths of the course load is specified in the program and the student is free to elect the remaining courses from the offerings of the Faculties of Science and of Arts. Special permission is required for a student who wishes to choose an elective from another Faculty, *e.g.* Education, Management, etc.

Honours Programs require the student to maintain academic performance at a high standard in addition to involving a very high degree of specialization. They are designed for those students wishing an intensive preparation for Graduate Studies.

LANGUAGE POLICY

The normal language of instruction at McGill is English. Students may if they wish write term papers and examinations in French, but reasonable competence in English is essential to success at the University. It is recommended that students who lack fluency in English take a course in English as a second language at McGill's Summer School or elsewhere before embarking on a university program of studies.

There are no language requirements in either faculty. English-speaking Quebec students are encouraged to develop proficiency in French.

GRADING AND CREDIT SYSTEM

All courses carry a credit rating indicated beside the course title in the calendar listing.

Courses are graded either by letter grades or in percent with the following correspondences: A (80-100%), B (65-79%), C (55-64%), D (45-54%), F (0-44%). (All reports of standing, verification forms, transcripts and other documents will show both letter grades and reported percentage grades.) Grades A, B, C are termed satisfactory passes, D a conditional pass and F a failure. Certain courses have been approved for Pass/Fail (P/F) grading.

Although the grade of D is a passing grade, a grade of C or higher (Satisfactory Pass) is required in all courses specified as requirements for an Honours, Major or Faculty Program. Moreover, no student may register for a course for which he has not passed all the prerequisite courses with a grade of C or better, except by written permission of the department concerned.

Numerical equivalents of 4, 3, 2, 1, 0 are attached to the grades of A, B, C, D, F respectively. The earned grade point for each course is calculated by multiplying the credit rating of the course by the numerical equivalent of the letter grade earned. Standing will be determined on the basis of a grade point average (GPA) computed by dividing the sum of the grade points accumulated during the year by the total course credits attempted.

The cumulative grade point average (CGPA) will be the grade point average calculated using the student's entire record at McGill in a degree program. Grades of D or F continue to be used in the calculation of the CGPA even after the course is repeated or a supplemental examination is taken.

Example: A new student has taken the following courses and receives the indicated grades:

		Credits	*Mark*	*Grade*	*Grade Point*
Art History	123-315D	6		B	18
Chemistry	180-212A	4	62%	C	8
English	110-314A	3		A	12
Geography	183-315B	3	50%	D	3
History	101-328B	3		F	0
Philosophy	107-420D	6		A	24
Psychology	204-211D	6	78%	B	18
		31			83

$$\text{Sessional GPA} = \frac{83}{31} = 2.68$$

Supplemental Examination				
History	101-321B	3	C	6
	total	34		total 89

$$\text{CGPA} = \frac{89}{34} = 2.62$$

DEGREE REQUIREMENTS

Holders of a Quebec Diploma of Collegial Studies must complete a total of 90 credits (*i.e.* have passed courses whose total credit value is 90) to be eligible for a degree, must have passed satisfactorily all courses required by their program, and have a CGPA at McGill of at least 2.0.

Out-of-Province students will have the minimum number of credits required for their degree indicated on their acceptance letter. To be eligible for a degree, they must in addition pass satisfactorily all courses required by their program, and have a CGPA at McGill of at least 2.0.

Departments may recommend to Faculty that a student be awarded Honours or First Class Honours under the following conditions: that the student complete all requirements imposed by the department, and that the CGPA at graduation be 2.8 to 3.49 for Honours and 3.5 or better for First Class Honours.

Students in a Major or Faculty program who complete 60 credits at McGill and graduate with a CGPA of 3.5 or better will be awarded their degrees with "Great Distinction"; those with a CGPA between 3.3 and 3.49 will receive their degrees with "Distinction".

TRANSFER CREDITS

In certain cases, credit may be granted by Faculty for courses taken at other universities. Approval by the Associate Dean is necessary and should generally be obtained in advance.

There is an agreement among the universities in the Province of Quebec whereby a student, under special circumstances, may take some of his course load in any academic year with Faculty permission at another university in the Province of Quebec and have these courses recognized by McGill. Further information may be obtained from the office of the Associate Dean.

NOTE: Transfer credits are not calculated in the GPA or CGPA and the grades are not entered on the student's McGill transcript.

ACADEMIC STANDING

Satisfactory Standing

A student enters the University in satisfactory standing and remains in this standing unless his GPA for any year drops below 2.0.

Probationary Standing

A student whose GPA drops to between 1.5 and 1.99 (1.2 and 1.99 for his entering year) is placed in probationary standing.

A student in probationary standing must return to satisfactory standing within one year by obtaining a GPA of 2.5 or CGPA of 2.0, otherwise he will be placed in unsatisfactory standing.

NOTE: A student in satisfactory or probationary standing who has failed to obtain a satisfactory grade in a course required by his program is conditioned in that course. He will then be required either to pass the supplemental examination in the course (if available) or to repeat the course. If the course is taken as an option in his program, he may choose to replace it with another option.

Unsatisfactory Standing

A GPA of less than 1.5 (1.2 in the entering year) places a student in unsatisfactory standing.

Students in unsatisfactory standing must withdraw from the Faculty. They may be readmitted after appealing to the Committee on Student Standing and considered in probationary standing for the next academic session. A student in unsatisfactory standing for the second time will be required to withdraw permanently.

Honours

To be registered in an Honours program after his or her first year, a student must have attained a GPA and CGPA of 2.8 or better in the previous year, unless the student has special permission from his Department and the Associate Dean. Departments may impose additional Honours requirements. These, where applicable, will be found with the departmental Honours program descriptions.

STUDENT CATEGORIES AND COURSE LOADS

Full-Time Students

Full-time students take 12 or more credits per term. Students in satisfactory standing may take up to 17 credits per term. A load of up to 19 credits per term is permitted students whose GPA is above 3.0.

Full-time students in Probationary standing take 12 credits per term, except that they may add to this load a repeated course in which a grade of "D" was originally obtained.

Part-Time Students

Part-time students carry fewer than 12 credits per term; such students normally register for at least 6 credits per term. Students who wish to become part-time must consult the Office of the Associate Dean, Dawson Hall. Certain programs must be completed within a specified number of years; such information is available from the Departments concerned and from the Associate Deans.

Special Students

A special student takes regular credit courses, but is not working towards a degree. To qualify for this status a student must hold an undergraduate degree and have a specific approved plan of study. Applications must be made at the Office of the Associate Dean, Dawson Hall.

Visiting Students

A visiting student is one who is taking courses at McGill for credit towards his program at another university. Applications must be made at the Office of the Associate Dean, Dawson Hall.

TRANSCRIPT OF ACADEMIC RECORD

Certified transcript(s) of a student's academic record may be obtained by applying to the Registrar's Office, F. Cyril James Building.

All courses taken at McGill and all results (both letter grades and reported percentage grades) obtained appear on the transcript.

The following is an explanation of the codes used:

A, B, C } satisfactory pass
D — conditional pass
F — failure
P — pass
} See credit system, page 40.

K — incomplete; see incomplete courses, page 47.

KF — failed to meet the extended deadline for submission of work in a course; counts as a failure in the GPA.

KK — further extension granted.

J — absent; the student is registered for a course but does not write the examination or do other required work. The J will be calculated as a failure in the GPA and CGPA.

W — withdrew; a course dropped, with special permission, after the change of course period; see Change of Course, page 44. Does not enter into the GPA calculation.

WF — withdrew failing; a course dropped, with special permission, the student's work at that stage being on the level of an F, see Change of Course, page 44. Does not enter into the GPA calculation.

L — deferred; see deferred examinations, page 46.

WL — Faculty permission to withdraw from a deferred examination.

NOTE: Although students register in only one program, some students may also complete the courses required in a second program. Recognition of this situation on the final transcript of such a student is possible in the form of a notation that the student has also completed the second program. A student wishing to arrange for this recognition on his transcript should consult the Office of the Associate Dean before registering for his final year.

ADVISERS

It is essential that each student consult with an adviser and complete a study plan form before registration.

General Counselling

General program and course information is available at the office of the Associate Dean. Students who are undecided as to their program or who may wish to change programs may consult a counsellor at Dawson Hall or may seek further information from a department in their general area of interest. The student will subsequently be referred to an Academic Adviser (see below) for approval of his program and completion of a study plan form before registration.

Academic Advisers

Each program has appointed Academic Advisers who will meet with students and approve their programs by signing the study plan form in Honours, Major and Faculty programs. (See the departmental listings for their names and/or locations.)

New Students

A student admitted to a program requiring 96 or fewer credits must consult an Academic Adviser and must present his transcript and letter of admission to facilitate program planning.

A student admitted to a program requiring 97-120 credits will normally be considered in a Freshman Program until he completes his first year and must consult a counsellor in Dawson Hall (telephone 392-5084) to obtain advice and complete a study plan form before registration.

SPECIAL TERMS APPLIED TO COURSES

Option: A course or sequence of courses that may be selected as part of an Honours, Major or Faculty program.

Elective: A course which a student selects to fulfil part of the credit requirements for his degree but which is not counted as part of the Honours, Major or Faculty program in which he is registered.

NOTE: Any course offered by the Faculties of Arts and of Science for which the student is eligible (*i.e.* has the necessary prerequisites, if any) may be taken as an elective.

Prerequisite: Course A is prerequisite to course B if a satisfactory pass in course A is required for admission to course B.

Corequisite: Course A is corequisite to course B if course A must be taken concurrently with (or prior to) course B.

Paired Courses: Two one-term courses given in different terms in which the final marks for students taking both courses are given at the end of the second term by averaging the results of both courses. An exception is made when the student does not enter the second term course.

Linked Courses: Two one-term courses where no credit will be given for either course unless the other is taken. The marks will not be averaged.

CHANGE OF COURSE

Students who wish to change course (change from one course to another, add a course, drop a course) for which they are registered must obtain change of course cards from the office of the Associate Dean within the change of course period. Such changes must not introduce conflicts in timetable nor destroy the required sequence of courses and must be approved by the instructor of any new course added and by the Honours, Major or Faculty program adviser.

Change of Course Period*

A courses (first term) — Monday, September 30 to Friday, October 4, 1974.

D courses (full year) — Monday, September 30 to Friday, October 4, 1974.

B courses (second term) — Monday, January 27 to Friday, January 31, 1975.

* Students who wish to change a course after the change of course period may apply to the office of the Associate Dean until October 11, 1974 for "A" and "D" courses and February 8, 1975 for "B" courses and must pay a fee of $5 for each change. After these dates no change of course will be allowed.

Change of Section

Many courses with large enrolments are given in several sections at different times. For any change of section within the same course, the department concerned should be consulted. Such changes need not be reported to the Associate Dean's office.

WITHDRAWAL FROM COURSE

Withdrawal from a course after the change of course period will be allowed* (the student must apply at the office of the Associate Dean) up to the following dates:

A courses (first term) — Friday, October 18, 1974.

D courses (full year) — Friday, November 29, 1974.

B courses (second term) — Friday, February 21, 1975.

The transcript will continue to show the course with the code of W, but the course will not be counted in the GPA.

After the deadline listed above, the Associate Dean may, under exceptional circumstances, grant permission for a student to withdraw from a course. (Permission will not be granted merely because a student is doing unsatisfactory work.) W or WF as appropriate will appear on the transcript, but will not be calculated in the GPA.

*See Financial Information, Regulations Concerning Withdrawals, page 19.

ATTENDANCE AND TERM WORK

No student will be permitted to write an examination in any course unless he has fulfilled the requirements of the course to the satisfaction of the instructor and the Associate Dean.

It is the responsibility of each student to make sure at the time of registration that there is no conflict in the timetable of the courses which he proposes to follow.

Students may be required to attend lectures regularly if Faculty so rules. Excuses for absences are dealt with only by the Office of the Associate Dean. A medical certificate should be presented at the Office of the Associate Dean immediately after a student's return to normal attendance.

Students arriving late for lectures may be denied entrance by the instructor.

EXAMINATIONS

Students may write term papers and their answers to examinations in English or French, except in the case of certain language and literature courses.

CLASS TESTS

Members of the teaching staff may from time to time give interim class tests if they think them necessary.

FINAL EXAMINATIONS

Final examinations are held during an examination period following the term in which the course is given. In some courses there is no final examination; standing in these courses is determined on the basis of term work and class tests.

Instructors are not permitted to grant any special treatment regarding examinations to any student. If a student believes there is some circumstance which might be legitimately taken into account in evaluating his performance, he should apply to the Associate Dean.

SUPPLEMENTAL EXAMINATIONS

There is a supplemental examination period during the month of August. A student may receive permission to write supplemental examinations, if available, in courses in which he obtained a D or an F. He should avail himself of this privilege at the time of the next supplemental examination period. His supplemental result will not erase the D or F originally obtained which was used in calculating his GPA. Both the original mark and the supplemental result will be calculated in the CGPA (i.e. the taking of supplemental examination has the same effect on a student's GPA as does repeating the course). Written application to write a supplemental examination must be received at the Associate Dean's Office before July 2. Special permission is required if a student wishes to write supplementals totaling more than 6 credits. A fee of $10.00 for each supplemental paper is payable to the Cashier as soon as the application has been approved.

In certain cases, a student may be permitted to write one supplemental examination during the April-May examination period in a first term course in which he has obtained a D or an F, if the course is also given in the second term. No attempt is made to avoid conflict between this supplemental and the student's required final examinations, and in the case of such a timetable conflict the student will be required to write the final examination and postpone the supplemental to the August period.

Depending on the course, the supplemental result may or may not include the same proportion of class work as did the original grade. The instructor will announce the arrangements to be used for his course early in the term.

DEFERRED EXAMINATIONS

A student who, for reasons such as illness or family affliction, verified and accepted by the Associate Dean's Office, has been unable to write one or more examinations, may receive permission to write deferred examinations in their stead which will normally be written in the next supplemental examination period. The Associate Dean's Office must be informed within one week of the examination of the reasons for absences. An "L" will appear on the Report of Standing in place of a grade in such courses, followed by the grade obtained in the deferred examination after it has been written.

REASSESSMENT OF A GRADE

Papers are marked and grades calculated and handled with considerable care. However, if a student wishes his marks checked or his examination paper re-read, he should apply in writing to the Office of the Associate Dean. There is a fee of ten dollars which will be refunded if an error is found in the student's favour. If the result is a lower mark, the lower mark will stand and there will be no refund. Requests for Reassessment of standing in more than one course will not be permitted.

Any request to have a term paper reassessed must be made directly to the professor concerned.

CREDIT BY EXAMINATION

In certain cases a student may apply to write the final examination in order to obtain credit in a course for which he has not registered (this is possible only in those courses where there is no other assessment except the final examination).

SPECIAL FACILITIES

Students with visual or other disabilities should consult the office of the Associate Dean about the possibility of special examination facilities.

INCOMPLETE COURSES

If, in the instructor's opinion, there is sufficient reason to permit a delay in the submission of required term work, an extension of deadline of up to four months after the end of the course may be granted the student. In this case, the instructor will submit a grade of "K" (incomplete). If a new grade is submitted within the deadline by the instructor, this will appear on the student's Faculty reports and verification forms following the K and will replace the K on the student's official transcript.

If the required work is not completed before the deadline the grade of KF will be recorded in the same way as the grade above. (KF denotes a failed course and has the same effect on the GPA as an F.)

In exceptional circumstances, and with the approval of the Associate Dean, the four month deadline may be extended further, in which case the grade of KK will appear.

A student who has not, without accepted excuse, participated or written the final examination in a course for which he has registered may be given a grade of J (absent). In the calculation of the GPA, this is treated as an F.

WITHDRAWAL FROM THE UNIVERSITY

The responsibility for initiating withdrawals rests solely with the student. Neither notification of the course instructors nor discontinuance of class attendance will suffice. A student who wishes to withdraw officially from the University during the academic year must secure permission from the Office of the Associate Dean. The appropriate form will be supplied. A student considering withdrawal is strongly urged to consult his Academic Adviser before making a final decision. Fees for the term in which the student withdraws are not refundable except under special circumstances — see Financial Information — Regulations Concerning Withdrawals, page 19.

READMISSION

A student who has withdrawn from his Faculty or who has not re-registered for a term or more must make application in writing to the Associate Dean (not to the Admissions Office) to be readmitted, stating the reasons for his absence from the University and giving a summary of his activities during that period.

Students who withdrew because of illness should provide some indication that they are ready to resume studies.

SUMMER SESSION – 1974

The 1974 Summer Session will consist of two parts: The Pre-Summer Session, to be held from May 13 to June 21, and the Summer Session, from July 2 to August 9. Each Session has in turn been divided into two terms in order to distinguish between full courses (6 credits) which will run the length of the six week session and half courses (3 credits) which will be held over a period of three weeks. Pre-Summer Session — first term: May 13 — May 31; final examinations June 3. Pre-Summer Session — second term: June 4 — June 21; final examinations June 25. Summer Session — first term: July 2 — July 19; final examinations July 22. Summer Session — second term: July 23 — August 9; final examinations August 12. Final examinations for full courses will be held on June 25 and August 12 respectively.

Students may register by mail up to one week before the start of courses or they may register in person on the first day of each session (i.e. May 13, June 4, July 2 or July 23).

McGill students wishing to attend the Pre- and/or Summer Session will be required to submit an authorization from the Faculty in which they are currently registered, outlining the specific course(s) to be taken and indicating whether the course(s) is (are) part of the regular program they are pursuing.

New students will have to be admitted to McGill before being allowed to register in Pre- and/or Summer Session. Students wishing to apply to McGill must do so before March 1. Those unable to complete admission procedures before March 1 will be required to wait until the summer of 1975 before attending Summer Session.

Please note that the French Summer School, The Accountancy Summer School and the Centre for Continuing Education will offer summer courses which are not administered by the Summer Session Office. Individuals interested in these specific programs should contact the respective offices concerned.

Full information concerning course offerings, applications, and requirements may be obtained from:

8 FACULTY OF ARTS

STAFF

ADMINISTRATIVE OFFICERS

ROBERT E. BELL, C.C., B.A., M.A. (U.B.C.), D.Sc. (U.N.B., Laval), LL.D. (Tor.), Ph.D., F.R.S., F.R.S.C. — *Principal and Vice-Chancellor*
EIGIL PEDERSEN, B.A. (Sir G. Wms.), Ed.D. (Harv.), M.A. — *Vice-Principal (Academic)*
LEO YAFFE, B.Sc, M.Sc. (Man.), Ph.D. — *Vice-Principal (Administration)*
DALE C. THOMSON, D.F.C., B.A. (Alta.), D.U. (Paris) — *Vice-Principal (Planning)*
JEAN-PAUL SCHULLER, B.A. (Ott.) — *Registrar*
PEGGY SHEPPARD, B.A. (Sir G. Wms.), B.Ed. — *Director, Admissions Office*
ROBERT VOGEL, B.A. (Sir G. Wms.), M.A., Ph.D. — *Dean of the Faculty of Arts*
D. C. FRYE, B.A. (N.Y.U.), M.A. (N.Y.U.), Ph.D. (Wisc.) — *Associate Dean of the Faculty of Arts*
ISOBEL OSWALD, B.A. — *Assistant Secretary of the Faculty*
LOUISE W. SMITH, B.A. (Carleton, Minn.), M.A. (Harvard) — *Recorder*
ANGELINE LUCAS — *Senior Adviser*
LILA WILLIS — *Senior Adviser*

TEACHING STAFF

African Studies Program

Advisers — M. J. ECHENBERG, *Chairman,* African Studies Committee (History); D. R. ARONSON (Anthropology); M. DORSINVILLE (English); P. C. W. GUTKIND (Anthropology); F. A. KUNZ (Political Science); J. G. SMITH (Economics); I. WALLERSTEIN (Sociology)

Anthropology

Professors — BRUCE G. TRIGGER, *Chairman;* PETER C. W. GUTKIND; RICHARD F. SALISBURY *(on leave 1974-75)*
Associate Professors — DAN R. ARONSON; FUMIKO IKAWA-SMITH *(on leave 1974-75)*; PHILIP C. SALZMAN
Assistant Professors — BERNARD ARCAND; GEORGE GMELCH; CARMEN LAMBERT; JEROME ROUSSEAU; PETER SINDELL

Art History

Professors — WINTHROP JUDKINS *(Chairman);* GEORGE GALAVARIS
Associate Professor — RIGAS BERTOS
Assistant Professor — ROSEMARIE BERGMANN
Lecturers — ROBERT GIFFORD; ROBERT LANGSTADT

Canadian Studies Program

Co-ordinator — A. LUCAS (English)
Co-ordinating Committee — J. R. MALLORY (Political Science); P. McNALLY (Library Science); C. MILLER (History); J. GILMOUR (Geography); R. T. NAYLOR (Economics); B. G. TRIGGER (Anthropology)

Centre for East Asian Studies

Director — P. T. K. LIN
Associate Director — S. J. NOUMOFF

The Interdisciplirary Committee on East Asian Studies consists of faculty members in all relevant departments.

Centre d'Etudes Canadiennes-Françaises

Director — JEAN-LOUIS ROY
Committee — C. MILLER *(History)*; M. PINARD *(Sociology)*; A. SMITH *(French)*; M. STEIN *(Political Science)*; E. WADDELL *(Geography)*
Professors — A. BERNARD; E. CLOUTIER; M. DORSINVILLE; Y. LAMONDE; J. LANGUIRAND; D. LATOUCHE; J.-L. ROY

Classics

Professors — A. SCHACHTER *(Chairman)*; COLIN D. GORDON; PAUL F. McCULLAGH *(Hiram Mills Professor of Classical Philology)*
Associate Professors — A. FARMAKIDES; J. M. FOSSEY; P. VALERI TOMASZUK; P. VIVANTE *(on leave first term)*; G. M. WOLOCH
Assistant Professors — M. J. SILVERTHORNE; G. L. SNIDER

East Asian Languages and Literatures

Associate Professor — P. T. K. LIN *(Chairman)*
Lecturers — J. CHANG; P. WANG

Economics

Professors — A. ASIMAKOPOULOS; E. F. BEACH; I. BRECHER; E. KIERANS; J. C. WELDON; H. R. C. WRIGHT
Associate Professors — P. BRIANT; A. DEUTSCH; A. FENICHEL; M. FRANKMAN; C. GREEN; J. A. GALBRAITH; J. HANDA; S. H. INGERMAN; J. ITON; D. KHAZZOOM *(on leave 1974-75)*; J. KURIEN *(on leave 1974-75)*; K. LEVITT *(on leave 1974-75)*; M. A. LOUTFI *(on leave 1974-75)*; J. G. SMITH; T. VELK *(on leave 1974-75)*; A. VICAS
Assistant Professors — P. DAVENPORT; G. GRANTHAM; M. F. LOUTFI; F. MARTIN; R. T. NAYLOR; L. SODERSTROM; B. WURZBURGER
Lecturer — H. ROMOFF

English

Professors — DONALD F. THEALL *(Chairman)*; PETER BUITENHUIS; C. D. CECIL; LOUIS DUDEK; JOYCE HEMLOW; ALAN HEUSER; ALEC LUCAS; HUGH MacLENNAN; A. E. MALLOCH *(on leave 1974-75)*; HUGO McPHERSON
Associate Professors — BHARATI BLAISE; M. BRISTOL; M. BRUCE; D. COLE; D. C. FRYE; I. GOPNIK; SLAVA KLIMA; P. H. OHLIN; PAUL H. PIEHLER; MARTIN PUHVEL; RONALD REICHERTZ; JOHN RIPLEY; B. ROBINSON; J. RONSLEY; D. SUVIN; B. F. WEEMS *(on leave 1974-75)*; W. WEES
Assistant Professors — H. S. ANDERSON; DONALD F. BOUCHARD *(on leave 1974-75)*; A. CONWAY; M. DAVISON; M. DORSINVILLE; L. T. DUER *(on leave 1974-75)*; L. T. ELLIOTT; A. R. GODFREY; ALAN GOLDBERG; C. A. E. HEPPNER *(on leave 1974-75)*; M. LAFON; LEANORE LIEBLEIN; YEHUDI LINDEMAN; D. S. RUBIN; M. SIMON; R. TEMBECK; DAVID WILLIAMS *(on leave 1974-75)*
Assistant to the Chairman — W. T. BOOTH

French Language and Literature

Professors — J. G. NICHOLSON *(Chairman)*; G.-P. COLLET; J. ETHIER-BLAIS; J. L. LAUNAY

Associate Professors — M. ANGENOT *(on leave first term)*; M. T. CARTWRIGHT *(on leave)*; YVONNE CHAMPIGNEUL; G. DI STEFANO; J.-P. DUQUETTE; F. FURLAN; H. JONES; R. McGILLIVRAY; J.-C. MORISOT *(on leave)*; M. RABOTIN; D. W. STEEDMAN; J. TERRASSE *(on leave)*; L. VAN DELFT *(on leave)*; R. VIGNEAULT *(on leave)*
Assistant Professors — J. P. BOUCHER; J.-C. LEMYZE *(on leave)*; A. MAUGEY; GABRIELLE PASCAL; G. POMET; F. RICARD; Y. RIVARD; A. SMITH; A. TICHOUX *(on leave)*
Sessional Lecturer (part-time) — A. JULIEN

French as a Second Language

Lecturers — J.-P. AUBERT; J.-P. BOUCHARD; N. LeGALL; M.-N. LEGOUX; H. MIGNAULT; B. SHEPPARD *(Director)*

German

Professor — A. ARNOLD *(Chairman)*
Visiting Professor — H. BOESCHENSTEIN
Associate Professors — M. BIRCHER; V. R. BLOCK; T. GOLDSMITH-REBER; A. HSIA; H. J. MAITRE; J. SCHMIDT; I. SCHUSTER
Assistant Professors — E. GALLATI; E. LACH; H. RICHTER

History

Professors — C. C. BAYLEY; V. BOSS; P. C. HOFFMANN; H. SENIOR; R. VOGEL;
Associate Professors — N. BAMBA *(on leave 1974-75)*; P. H. BOÚLLE *(on leave 1974-75)*; L. L. LaPIERRE; P. T. K. LIN; M. P. MAXWELL *(Chairman)*; A. R. RIGGS
Assistant Professors — J. N. CHARTERIS; L. DECHENE; M. J. ECHENBERG; J. W. HELLMAN; E. LAFFEY *(on leave 1974-75)*; C. MILLER *(on leave 1974-75)*; S. J. RANDALL; H. S. WEINROTH
Lecturers — R. RICE; H. C. SCHLIEPER; D. M. SWETSCHINSKI; J. H. THOMPSON
Visiting Lecturers — Y. OTA; P. S. ROPP

Industrial Relations Studies Program

Advisers — FRANCES BAIRSTOW *(Director)*; WILLIAM A. WESTLEY *(Director of Research)*

Italian Language and Literature

Professor — ANTONIO D'ANDREA *(Chairman)*
Visiting Professor — RICCARDO SCRIVANO
Associate Professor — PAMELA D. STEWART
Assistant Professor — MICHELANGELO PICONE
Lecturer — COSTANZO DI GIROLAMO
Sessional Lecturer — CARMELA MINDEL

Jewish Studies Program

Professors — HARRY M. BRACKEN; RICHARD H. POPKIN
Associate Professor — RUTH WISSE
Assistant Professors — EUGENE ORENSTEIN *(Chairman)*; WARREN HARVEY; LAWRENCE KAPLAN; YEHUDI LINDEMAN
Lecturers — SHIMEON LEVY; DANIEL SWETSCHINSKI
Sessional Lecturers — C. GASCH; B. MUSZKATEL; L. TENCER

Linguistics

Professors — C. D. ELLIS *(Chairman)*; ANDRE A. RIGAULT
Associate Professors — R.-M. WEBER *(on leave 1974-75)*; M. GOPNIK
Assistant Professors — D. W. LIGHTFOOT; G. L. PIGGOTT
Visiting Assistant Professor — I. BELLERT

Music

Department of Theory — D. B. MINORGAN *(Acting Chairman)*
Department of Performance — R. LAWTON *(Chairman)*

North American Studies Program

Committee of Advisers — PETER BUITENHUIS *(English)*; ALEC LUCAS *(English)*; HUGO McPHERSON *(English)*; JEAN-PIERRE DUQUETTE *(French)*; THOMAS VELK *(Economics)*; MICHAEL STEIN *(Political Science)*; A. RIGGS *(History)*

Philosophy

Professors — HARRY M. BRACKEN; MARIO BUNGE; RAYMOND KLIBANSKY; ALASTAIR McKINNON; ALAN MONTEFIORE *(part time)*; RICHARD H. POPKIN *(part time)*; CHARLES TAYLOR; J. A. TRENTMAN *(on leave 1974-75)*
Associate Professors — DAVID FATE NORTON; JONATHAN ROBINSON *(Chairman)*; WILLIAM SHEA; JEREMY WALKER *(on leave 1974-75)*
Assistant Professors — GEORGE DIGIOVANNI; WARREN HARVEY; J. McGILVRAY; MICHAEL SCHLEIFER

Political Science

Professors — MICHAEL BRECHER *(on leave 1975-76)*; J. R. MALLORY; BALDEV RAJ NAYAR *(on leave 1974-75)*; CHARLES TAYLOR
Associate Professors — THOMAS BRUNEAU *(on leave 1974-75)*; FRANK A. KUNZ; PAUL C. NOBLE; JANICE STEIN; MICHAEL STEIN; BLEMA S. STEINBERG; HAROLD M. WALLER *(on leave 1974-75)*
Assistant Professors — BARBARA HASKEL; DANIEL LATOUCHE; SAMUEL J. NOUMOFF; HAROLD SARF; JOHN SHINGLER *(on leave second term 1974-75)*; PAULINE VAILLANCOURT
Visiting Professors — ANDRE BERNARD; EDOUARD CLOUTIER

Religious Studies

Professors — C. J. ADAMS; E. G. JAY; G. JOHNSTON; J. C. KIRBY; J. C. McLELLAND *(on leave second term 1974-75)*
Associate Professors — J. A. BOORMAN *(on leave first term 1974-75)*; R. C. CULLEY; M. PEASTON
Assistant Professors — D. R. RUNNALLS; R. W. STEVENSON

Russian and Slavic Studies

Professor — J. G. NICHOLSON *(Chairman)*
Visiting Professors — J.-Y. LE GUILLOU; R. V. PLETNEV
Assistant Professors — P. M. AUSTIN; LUDMILA BAUER; A. FODOR; IRENE PAVILANIS

School of Social Work

Professors — MYER KATZ *(Acting Director)*; D. E. WOODSWORTH *(Director) (on leave first term)*
Associate Professors — PATRICK DEEHY; GLENN DROVER; DOROTHY R. FREEMAN; LOTTE MARCUS; F. J. McGILLY; EDWARD V. SHINER; LAWRENCE SHULMAN
Assistant Professors — BEN ZION DALFEN; SHEILA GOLDBLOOM; ESTELLE HOPMEYER; DIANE REICHERTZ; DOROTHY SIROTA; SHIRLEY STEELE; JAMES TORCZYNER; ELIZABETH URTNOWSKI
Lecturers — CLAIRE ARSENEAU; CAROLE CHRISTENSEN; SYDNEY DUDER; NORMA FETTERLY; MARION GARMAISE; IRENE GORDON; ZELDA HARRIS; FRANÇOISE LECLAIRE; JANET MACDONALD; JUDITH MAGILL; JACOB RABY; TRYNA ROTHOLZ; AMY SHULMAN; CAROL SPEIRS; ANNETTE WERK

Sociology

Professors — DAVID N. SOLOMON *(Co-Chairman)*; WILLIAM A. WESTLEY *(Co-Chairman)*; RICHARD F. HAMILTON *(on leave 1974-75)*; MAURICE PINARD; IMMANUEL WALLERSTEIN
Associate Professors — ROGER G. KROHN; DONALD VON ESCHEN
Assistant Professors — MICHAEL P. CARROLL; MARLENE DIXON; WILLIAM EATON; PHILIP EHRENSAFT; JOSEPH LELLA; PRUDENCE RAINS; GERTRUDE J. ROBINSON; MALCOLM SPECTOR *(on leave 1974-75)*

Spanish Language and Literature

Professor — SOLOMON LIPP *(Chairman)*
Associate Professors — MONICA HARVEY; ANDRE MICHALSKI; VICTOR OUIMETTE; JULIO SANCHEZ; VICTORIANO UGALDE-CUESTA
Assistant Professors — MARCELINO AMASUNO; NELLY MARTINEZ; JEAN MARC VARY
Lecturers — KAY SIBBALD; DIANE WILLIAMSON

PROGRAM INFORMATION

The Faculty of Arts offers the Bachelor of Arts (B.A.) and the Bachelor of Social Work (B.S.W.) degrees.

B.A. DEPARTMENTAL MAJORS

The following majors are described in detail in the departmental entries in the Calendar:

ANTHROPOLOGY
ART HISTORY
CLASSICS
ECONOMICS
ENGLISH
FRENCH
GEOGRAPHY
GERMAN
HISTORY
ITALIAN
JEWISH STUDIES
LINGUISTICS
MATHEMATICS
PHILOSOPHY
POLITICAL SCIENCE
PSYCHOLOGY
RELIGIOUS STUDIES
RUSSIAN
SOCIOLOGY
SPANISH

B.A. INTERDISCIPLINARY MAJORS

AFRICAN STUDIES
CANADIAN STUDIES
CENTRE D'ETUDES CANADIENNES-FRANÇAISES
CENTRE FOR EAST ASIAN STUDIES
INDUSTRIAL RELATIONS
NORTH AMERICAN STUDIES

For further information on the above, consult the alphabetical listings in the Calendar.

A brief outline of the other interdisciplinary majors follows. For further information please consult the appropriate Adviser.

CLASSICS AND LINGUISTICS (See page 79).

HUMANISTIC STUDIES:

18 credits in one language (Latin, Greek, German, Italian, Russian, Spanish); 6 credits in a Social Science; 30 credits in no more than three humanities

departments (languages other than one already chosen, Philosophy, English, French, History, Music and Religion).
Please consult Professor Ouimette, Department of Spanish.

LATIN AMERICAN STUDIES:
Minimum of 12 credits in Spanish; 42 credits from Departments of Anthropology, Economics, Geography, History, Political Science, Sociology and Spanish.
Please consult Professor Lipp, Department of Spanish.

MODERN LANGUAGES:
6 credits in Social Sciences; 12 credits in Linguistics; 18 credits in each of two foreign languages (not English or French).
Please consult Professor Richter, Department of German.

MODERN LITERATURE:
6 credits in English; 6 credits in French; 12 credits in English or French Literature; 18 credits in each of two modern foreign literatures.
Please consult Professor D'Andrea, Department of Italian.

B.A. HONOURS

The following Honours programs are described in detail in the departmental entries in the Calendar:

ANTHROPOLOGY
ART HISTORY
CLASSICS
EAST ASIAN STUDIES
ECONOMICS
ENGLISH
FRENCH
GEOGRAPHY
GERMAN
HISTORY
ITALIAN
JEWISH STUDIES
LINGUISTICS
MATHEMATICS
PHILOSOPHY
POLITICAL SCIENCE
PSYCHOLOGY
RELIGIOUS STUDIES
RUSSIAN
SOCIOLOGY
SPANISH

JOINT HONOURS

Joint Honours programs are available in many related disciplines. Please consult departmental listings.

B.A. FACULTY PROGRAMS

MATHEMATICS and PHILOSOPHY:
Mathematics 189-217A; 218B; 245A,B; 318A, 328B; 348A, 349B; One of Mathematics 189-222A,B, 314A,B, 323A,B, 324B; Three additional credits in Mathematics. One of Philosophy 107-340D, 341D, 350D, 351D; and two full courses in Philosophy approved by the Department. Nine additional credits in Philosophy. 54 credits. (This faculty program leads to a B.A. degree. Consult the Department of Philosophy to obtain an Adviser.)

MATHEMATICS and PSYCHOLOGY:
Mathematics 189-222A,B, 223A, 323A,B, 324B, 423A, 424B, or Psychology 204-305A,B, 307D, six credits Introductory Psychology, 335A, 336B, twelve credits of options selected from Mathematics 189-217A, 218B, 314A,B, 317A, 318A, 328B, 417A, 447B, Computer Science 308-200A, or other approved courses, twelve credits selected from Psychology non-statistics courses. 54 credits. (This faculty program leads to either a B.A. or a B.Sc. degree. Consult the Department of Mathematics or the Department of Psychology to obtain an Adviser.)

PSYCHOLOGY, GENERAL:
Any of the Major sequences in Psychology with the substitution of 6 credits from U2 courses in Psychology for 204-211D and Psychology 204-305A,B. 54 credits. (Consult the Department of Psychology to obtain an Adviser.)

NOTE: An information booklet describing courses related to Environmental Studies may be obtained from the office of the Director of Environmental Studies, Stewart Biology Building.

DEPARTMENTS AND CENTRES OFFERING PROGRAMS IN THE FACULTY

African Studies Program, Leacock Building, Rm. 633
Anthropology, Leacock Building, Rm. 719
Art History, Arts Building, Rm. W225
Canadian Studies Program, Arts Building, Rm. 220
Centre d'Etudes Canadiennes-Françaises, 3475 Peel Street, Rm. 201
Centre for East Asian Studies, 3434 McTavish St.
Classics, Leacock Building, Rm. 517
Economics, Leacock Building, Rm. 434
English, Arts Building, Rm. 120
French Language and Literature, Peterson Hall, 3460 McTavish Street, Rm. 100
French as a Second Language, 3438 McTavish Street, Rm. 205
Geography, Burnside Hall, Rm. 513

DEPARTMENTAL OFFERINGS AND PROGRAMS OF STUDY

For graduate courses in all Departments see the *Announcement of the Faculty of Graduate Studies and Research.*

An official lecture timetable is available before Registration.

AFRICAN STUDIES PROGRAM (111)

Leacock Building, Room 633, Tel. 392-4721

The "Interdisciplinary Area Major" in African Studies is designed for those students who wish to take advantage of the growing resources at McGill, and elsewhere in the Montreal area, for the pursuit of an interdisciplinary approach to the African continent.

Students wishing to major in African Studies should consult one of the advisers (see Staff Listing, page 51) at the beginning of their first academic year. While pursuing their Major, they will be expected to concentrate as well in a regular discipline of the university. Disciplinary specialization is not, however, restricted to those for which an Adviser is listed.

The Major consists of 54 credits (9 full courses of the equivalent), including African Studies 499D in the final year. All the courses listed below must be taken (45 credits), while 9 credits should be selected in consultation with Major Advisers. One or two relevant prerequisites may be included in the total, and the seven should include courses from at least three departments (for full descriptions and prerequisites of courses see listings under individual departments.)

Training in an African language is encouraged, and may form a part of the Major program. Formal training is available at McGill in Arabic. In addition, tapes for the study of Swahili and other languages are available through the Linguistics Department and the Language Laboratory in Peterson Hall.

Modifications in, or additions to, the program from relevant courses in Economics, Education, Geography, Linguistics and other disciplines, may be made with the consent of the African Studies Committee.

The culmination of the Major is the Research Seminar, 111-499D.

Options

Anthropology 151-215A. Peoples and Cultures of Africa. (3 credits.)
Anthropology 151-216B. Culture and Social Change in Modern Africa. (3 credits.)
Economics 154-314B. African Economic Development. (3 credits.)
English 110-421A. Modern African Literature. (3 credits.)
English 110-320D. Third World Literature. (6 credits.)
History 101-200D. A History of Africa. (6 credits.)
History 101-430D. France and the Africans. (6 credits.)
Political Science 160-324D. Politics and Government in Africa. (6 credits.)
Sociology 166-360A. National Liberation Movement in Africa. (3 credits).

Final Year Requirement

111-499D. Research Seminar in African Studies. (6 credits; *Prerequisite:* Open to Area Majors in good standing, and to others by permission.) An interdisciplinary research seminar on topics of common interest to staff and students of the African Studies Program. As part of their contribution, students will prepare a research paper under the supervision of one or more members of the staff. STAFF

ANTHROPOLOGY (151)

Stephen Leacock Building, Room 719; Telephone 392-5179

The Honours and Major programs in Anthropology provide a liberal arts education which emphasizes the similarity and diversity of human behaviour, understanding of social and cultural systems, and the processes of socio-cultural changes from man's origins to the present day. Although neither the Honours nor the Major programs provide a professional training geared to specific jobs, they may serve as a useful background for those who are planning a career in law, foreign service, community organization, public administration, journalism, and teaching and research in social sciences and humanities. Needless to say, to be a qualified professional in most of these fields requires further training at professional or graduate schools.

While the Major program allows a greater freedom to choose from courses offered by other departments to suit the student's needs and interest, the Honours program provides a greater concentration in anthropology with substantial breadth and depth. It should be noted that the completion of an Honours program is frequently required for admission into graduate or professional schools.

Major Program

There is no prerequisite for admission into the Major program in Anthropology. The program requires that the student take 10 courses (30 credits) in Anthropology, of which three must be "advanced courses" (400 level) and eight courses (24 credits) in no more than three of the following fields: Biology, Classics, Economics, Geography, History, Linguistics, Philosophy, Political Science, Psychology, Religion and Sociology. Contact Mrs. Jeanette Fernandez at the Department Office for inquiry (392-5176).

Honours Program

The entrance requirement for admission to the Honours program in Anthropology is satisfactory completion of one anthropology course at CEGEP. In order to continue in the Honours program students must meet the academic standing requirements set forth by the Faculty, and in order to complete the Honours program in Anthropology in the final, graduating year, the grade-point average for the preceding year (usually the U2 year) must be 3.0 or higher for all courses as well as for anthropology courses.

An Honours degree in Anthropology will be granted to a student who has satisfied the requirements of the program and who has an average of 3.0 or better for all the anthropology courses credited towards the program and for all the courses taken during the last two years (usually U2 and U3 years). A First Class Honours degree in Anthropology will be given to a student with an average of 3.5 or better.

An Honours student in Anthropology is required to take 20 anthropology courses (60 credits) of which two can be anthropology courses taken in CEGEP. Up to three of the courses can be courses given by other departments, if they are directly related to the student's focus of study within anthropology and are approved by the student's adviser on the Undergraduate Committee of the Anthropology Department.

The 20 anthropology courses should include at least three of the five "core courses" (151-354A, 355B, 356B, 357A, and Linguistics 104-230A); 151-358B and 462A and/or 463B (in which an honours project is prepared); and at least three other "advanced courses" (400 level courses).

Each student has the opportunity to construct within the Honours program a concentration focused on a particular field of interest, such as prehistory and evolution, cultural systems, social and political organization, or on a particular geographical area, such as Africa, North America or Middle East. Such concentration is made possible by the use of the "Special Topics" courses, in which a student works under the supervision of a staff member in an area not covered by courses currently given. Special Topics courses can be coupled, concurrently or sequentially, with regular courses, under the supervision of the instructors of the regular courses, in order to allow more intensive work in the area covered by regular courses. Papers or projects can be submitted to two or more courses, provided that prior written arrangements have been made with the instructors with the approval of the student's adviser.

For more information on the Honours program, consult an appropriate adviser on the Undergraduate Committee of the Department, through Mrs. Jeanette Fernandez at the Department Office (392-5176).

Joint Honours Programs

Joint Honours programs are established with Art History, Classics (Classical Archaeology), Economics, English, Geography, History, Linguistics, Philosophy, Political Sciences, and Sociology. The Anthropology part of the requirements for these programs is the completion for 11 courses (33 credits) in Anthropology, which must include three of the "core courses" (see above for the Honours program), 151-358B, two "advanced courses" and 151-462A or 151-463B in which an Honours project with an interdisciplinary approach is prepared. For more information on the Anthropology requirements of the joint Honours programs, contact Mrs. Jeanette Fernandez at the Department Office (392-5176) who will direct the students to an appropriate adviser on the Undergraduate Committee. For information on the requirements for the other discipline making up the Joint Honours program, consult the department concerned.

Course Descriptions

FIRST LEVEL COURSES

There are no prerequisites for this group of courses, except in the case of 151-216B.

151-201A. PREHISTORIC CULTURES. (3 credits.) Consideration of the origin of cultural behaviour, and culture as adaptive mechanism for human survival. Examination of prehistoric socio-cultural changes in certain selected areas of the world from the earliest times to the rise of urban literate civilizations. STAFF

151-202B. COMPARATIVE CULTURES. (3 credits.) Analysis of different cultural and social systems: adaptation, economics, social and political organization, ideology. PROFESSOR GMELCH

151-203A. HUMAN EVOLUTION. (3 credits.) An examination of man's biological origins and the significance of his physical diversity. The behaviour of non-human primates, primate evolution, the role of culture in human evolution, racial classifications, the dynamics and behavioural significance of racial variation. PROFESSOR TRIGGER

151-206A. CULTURE AND ADAPTATION. (3 credits.) An ecological approach to the study of human society and culture. PROFESSOR SALZMAN

151-209B. ANTHROPOLOGY OF RELIGION. (3 credits.) Nature and function of religion. Systems of belief; the interpretation of ritual. The relation of religion to social organization. Religious change. PROFESSOR ROUSSEAU

151-210B. THE ANTHROPOLOGY OF THE ARTS. (3 credits.) The arts in cultural context, with special emphasis on non-Western aesthetic systems, the creative process, the purposes and "meanings" of artistic production, and the effects of foreign influences on indigenous art. Examples will be drawn primarily from the plastic and verbal arts of Africa. PROFESSOR ARONSON

151-215A. PEOPLES AND CULTURES OF AFRICA. (3 credits.) An ethnographically-based survey of African cultures. Geographical and historical backgrounds; levels of techno-environmental complexity; patterns in African social organization, economy, politics, religion, and art. Problems of cultural autonomy and structural dependence of contemporary rural peoples. PROFESSOR ARONSON

151-216B. CULTURE AND SOCIAL CHANGE IN MODERN AFRICA. (3 credits; *prerequisite:* 151-215A or the consent of the instructor.) The impact of colonialism on African societies; changing families, religion, arts; political and economic transformation; migration, urbanization, new social categories; social stratification; the social setting of independence and neo-colonialism; continuity and stagnation, change and progressive change. PROFESSOR ARONSON

151-228A. AN INTRODUCTION TO EDUCATIONAL ANTHROPOLOGY. (3 credits.) Anthropological approaches to the study of education will be delineated using case studies from a wide range of cultural situations including the Canadian North and urban North America. A theoretical analysis of such areas as the transmission of values, the classroom as a unit of socio-cultural analysis, and the role and functions of formal education cross-culturally considered. PROFESSOR SINDELL

151-236D. INDIGENOUS PEOPLES OF NORTH AMERICA: A GEOGRAPHICAL AND CULTURAL APPROACH. (6 credits; Also listed as Geography 183-336D.) A survey of North American Indian and Eskimo cultures from ethnographic and ecological perspective. The areal emphasis of the course will be upon Canadian Eskimo and Indian populations. The evolutionary approach will be utilized in the analysis of data pertaining to ecological adaptation and socio-cultural change among selected groups.
PROFESSORS KEMP AND LAMBERT

INTERMEDIATE COURSES

Prerequisite: One anthropology course, which is, in some cases, specified.

151-305B. THE ORGANIZATION OF SOCIAL LIFE. (3 credits; Not given in 1974-75.) An exploration of various dimensions of human organization drawing on data about diverse societies, Western and non-Western, historic and contemporary, preindustrial and industrial. Aspects to be examined include autonomy and interdependence, cooperation and competition, superordination and subordination, centralization and decentralization.
PROFESSOR SALZMAN

151-308A. POLITICAL ANTHROPOLOGY. (3 credits.) The study of political systems and political processes. Conflict and its resolution. The emphasis of the courses will be on communal politics and non-Western states. PROFESSOR ROUSSEAU

151-312A. PERSONAL DOCUMENTS AND THE HUMAN BEING IN ANTHROPOLOGY. (3 credits; *Prerequisite:* 151-202B or permission of the instructor.) An introduction to individuals from a series of traditional, developing, and modern societies through the study of autobiographies, family studies, and fictional accounts. Problems in the definition of "understanding" other cultures and in anthropology as a human science will be considered. PROFESSOR SINDELL

151-313B. SOCIAL INSTITUTIONS OF THE EARLY CIVILIZATION. (3 credits.) A comparative study of the differing social, economic and political institutions of the early civilizations in Mesopotamia, Egypt, India, China and the New World; their historical inter-connections and development from Neolithic times to the early historic period.
PROFESSOR TRIGGER

151-314A. AN INTRODUCTION TO PSYCHOLOGICAL ANTHROPOLOGY. (3 credits; Not given in 1974-75.) A survey of current theories and methods employed in psychological anthropology. Some areas considered are: cross-cultural studies of socialization and personality development; cultural factors in mental illness; individual adaptations to rapid socio-cultural change. PROFESSOR SINDELL

151-316A. ANTHROPOLOGY OF COMPLEX SOCIETIES. (3 credits.) Selected topics in the study of complex societies: rural-urban continuum, migration and adaptation to urban life, poverty culture, cultural scenes. Evaluation of anthropological approaches to the study of complex society. PROFESSOR GMELCH

151-321B. URBAN ANTHROPOLOGY. (3 credits.) A comparative analysis of urbanization in Africa, Asia and Latin America; rural urban migrations; the demography and institutional structures of urban area; tribalism in towns; status, class and elites in towns; family structure; urban network analysis; urban based associations; the role of the city in national development. PROFESSOR GUTKIND

151-325B. PEOPLES OF THE CARIBBEAN. (3 credits; Not given in 1974-75.) History, geography, blending of metropolitan and Afro-Indian influences; implications of slavery and the plantation system; social stratification and religious organizations. The changing socio-political structure; the movement towards self-government and independence; post-independence social, economic and political problems. STAFF

151-326A. NATIVE PEOPLES OF SOUTH AMERICA. (3 credits.) Ethnographic survey of the native peoples of South America and discussion of some of the major themes in South American ethnology including the present political situation of the Indians.
PROFESSOR ARCAND

151-331B. PREHISTORY OF EAST ASIA. (3 credits; Not given in 1974-75.) Comparative study of prehistoric hunting and gathering cultures in China, Japan, Korea, Mongolia and Eastern Siberia; origins and dispersal of food production; cultural processes leading to the rise of literate civilizations in certain regions of East Asia.
PROFESSOR IKAWA-SMITH

151-344A. ETHNOHISTORY OF NEW FRANCE. (3 credits; Not given in 1974-75.) The methods and techniques of Ethnohistory; an interdisciplinary approach to studying the history of peoples who have produced no written records of their own. These methods will be applied to a systematic investigation of interaction between Indians and Europeans in Eastern Canada during the French regime. PROFESSOR TRIGGER

HONOURS COURSES

Restricted to Honours and Joint Honours students in anthropology and those with the permission of the instructor.

151-354A. SOCIAL ORGANIZATION. (3 credits.) Comparative study of human groups and group formation; ethnicity. The role of kinship and marriage in interpersonal relations. Social stratification. PROFESSOR ROUSSEAU

151-355B. THE STRUCTURE OF CULTURE. (3 credits.) The formal analysis of cultural systems, the patterning and integration of cultural, ethos and value systems. PROFESSOR ARCAND

151-356B. ANTHROPOLOGICAL ARCHAEOLOGY. (3 credits; Not given in 1974-75.) Comparative study of prehistoric sociocultural systems from the Palaeolithic period to the rise of the first civilizations in selected parts of the Old and the New Worlds. PROFESSOR IKAWA-SMITH

151-357B. ARCHAEOLOGICAL METHODS. (3 credits.) The collection of materials in field investigations and their analysis to yield cultural information. The processes of inferences and reconstruction in archaeological interpretation. STAFF

151-358B. INTRODUCTION TO RESEARCH. (3 credits.) The nature of anthropological research as evidenced in monographs and articles; processes of concept of formation and interpretation of data; the problem of objectivity. PROFESSOR LAMBERT

151-380A, 151-381B, 151-382A, 151-383B. SPECIAL TOPICS. (3 credits; *Prerequisite:* permission of the instructor.) Supervised reading in special topics under the direction of a member of the staff. PROFESSOR ARCAND AND STAFF

151-462A, 151-463B. INDEPENDENT RESEARCH. (3 credits; *prerequisites:* Honours status and 151-358B and permission of the instructor.) Supervised reading and preparation of a research report under direction of member of the staff. PROFESSOR ARCAND AND STAFF

ADVANCED COURSES

Prerequisite: at least one 300-level anthropology course, which, in some cases, is specified.

151-402B. THE HISTORY OF ANTHROPOLOGICAL THEORY. (3 credits.) Explorations in the history of anthropological theory; schools, controversies, intellectual history, sociology of knowledge. PROFESSOR SALZMAN

151-404B. TOPICS IN PSYCHOLOGICAL ANTHROPOLOGY. (3 credits; *Prerequisite:* 151-314A and consent of instructor; Not given in 1974-75.) Each year one or two problems in psychological anthropology will be discussed and analyzed in depth, for example the development of adolescent identity in a series of cultures or the effects of different household residence patterns on children's development. PROFESSOR SINDELL

151-415A. PROBLEMS IN AFRICAN ANTHROPOLOGY. (3 credits; *Prerequisite:* 151-215A, 151-216B or consent of the instructor; Not given in 1974-75.) A detailed examination of the peoples and cultures of a major region of Africa, with attention to problems in ethnology, social change and development. PROFESSOR ARONSON

151-421A. TOPICS IN URBAN ANTHROPOLOGY. (3 credits; *Prerequisite:* 151-321B or consent of instructor; Not given in 1974-75.) STAFF

151-422A. HISTORY, IDEOLOGY AND THEORY IN SOCIAL CHANGE AND MODERNIZATION OF NON-WESTERN SOCIETIES. (3 credits; Not given in 1974-75.) Socio-cultural perspectives on Colonialism and policies; their impact on preindustrial societies; the structure and dialectic of modernization processes and their impact, ideology and discontent. PROFESSOR GUTKIND

151-423A. IDEOLOGY AND CONCEPTS IN SOCIAL ANTHROPOLOGY. (3 credits; *Prerequisite:* Honours or major status or permission of instructor.) Ideology and Social Science Theory in relation to problem formation in Social Anthropology; the spill-over from romanticism, imperialism, colonialism, neo-colonialism and radicalism to the outlook and problems studied by social anthropologists, traditional limits and the "New Anthropology". Multi- and inter-disciplinary studies. PROFESSOR GUTKIND

151-424A. ECONOMIC ANTHROPOLOGY. (3 credits; Not given in 1974-75.) Analysis of the modes of production, exchange, and consumption of goods and services, in societies occupying different ecological situations; questions of choice and planning; and their concretization into institutional arrangements; relationships between life-ways; problems of economic development. PROFESSOR SALISBURY

151-428B. SEMINAR ON EDUCATIONAL ANTHROPOLOGY. (3 credits; *Prerequisite:* 151-228A and consent of instructor; limited to 15 students.) A seminar focused on methodological and theoretical issues in educational anthropology. Ethnographic techniques applicable to the study of formal education, methodological problems in the analysis of teacher-pupil interaction, and way to ascertain the cultural continuities and discontinuities between the student's school and non-school experience will be discussed. PROFESSOR SINDELL

151-429B. ADVANCED TOPICS IN THE STUDY OF LATIN AMERICA. (3 credits; *Prerequisites:* 151-326A or consent of the instructor.) A detailed examination of selected topics of Latin American society and culture. PROFESSOR GMELCH

151-437A. ANTHROPOLOGICAL APPROACHES TO CULTURE CHANGE. (3 credits.) Consideration of anthropological approaches to directed culture change through a survey and analysis of relevant case materials. History of directed culture change; introduction to theoretical, methodological and ethical issues involved in and deriving from studies of and participation in directed culture change. Role of anthropologists as initiators or participants in, and/or evaluators of directed culture change: past, present and future. PROFESSOR LAMBERT

151-440B. SEMINAR IN THE ANTHROPOLOGY OF COGNITION. (3 credits.) Investigation into how people perceive and organize material phenomena — things, events, people, etc. — in an attempt to understand the organizing principles underlying behaviour. PROFESSOR ARCAND

151-445B. SEMINAR ON MIDDLE EASTERN SOCIETY AND CULTURE. (3 credits.) The ethnography and social anthropology of the Middle East, with special attention to life at the community level and to community-society relations. Such questions as "urban-peasant-tribe" relations, arid land adaptation, the role of folk Islam, and the place of women. PROFESSOR SALZMAN

151-447A. EARLY MAN IN THE NEW WORLD. (3 credits.) Cultures of prehistoric hunters and gatherers of the New World. Peopling of the New World and the Old World origins of the early lithic cultures; cultural adaptations in grassland, woodland, desert and coastal environments; consideration of factors that favoured the shifts from hunting-gathering to agriculture. STAFF

151-448B. SETTLEMENT ARCHAEOLOGY. (3 credits; *Prerequisites:* at least two, and preferably three, lower level courses in anthropology, including 151-356B or 151-347A; Not given in 1974-75.) This course will examine theories that have been developed in recent years concerning human settlement and evaluate the utility of these theories for deriving a variety of kinds of cultural information from spatial distributions of archaeological data. Special attention will be given to factors affecting the evolution of settlement units, from which a more general theory of settlement may be derived. PROFESSOR TRIGGER

151-450B. THIRD WORLD PEASANTRIES: THE CHANGE FROM RURALITY TO URBAN PROLETARIANS. (3 credits; *Prerequisites:* 151-308A or 151-354A, plus one area course, or permission of the instructor.) Review of recent anthropological literature, as well as the approaches of social history and political-economy, focusing on external and internal forces instrumental in transforming peasantries into urban proletarians in "Third World" nations. Analysis of fission and fusion processes, stratification, class, rural and urban protest and mechanisms of incorporation of small units in larger political domains. PROFESSOR GUTKIND

451-461A. RESEARCH TECHNIQUES. (3 credits; *Prerequisite:* consent of the instructor; Not given in 1974-75.) Field techniques, interviewing, participant observation, projective, and other testing techniques such as genealogies and life histories, problems of field work, rapport, contact, role definition, culture shock, etc. PROFESSOR LAMBERT

151-480A, 481B, 482A, 483B, 484A, 485B. SPECIAL TOPICS. (*Prerequisite:* Completion of all available courses relevant to the topic and consent of the instructor.) Supervised reading in advanced special topics under direction of a member of staff.

PROFESSOR ARCAND AND STAFF

ARABIC (397)

397-100D. INTRODUCTION TO LITERARY ARABIC. (6 credits; 5 hours, 1 hour laboratory.) The Arabic alphabet, pronunciation, principles of grammar, basic vocabulary, reading selections, simple composition and oral drills.

397-200D. ELEMENTARY ARABIC. (6 credits; 4 hours.) Further grammar and drills, readings in modern and classical Arabic, composition and oral drills.

397-300D. INTERMEDIATE ARABIC. (6 credits.)

397-400D. ADVANCED ARABIC. (6 credits.)

ART HISTORY (123)

Arts Building W-225 (West Wing, top floor); Telephone: 392-4977.

The Department of Art History at McGill is concerned almost exclusively with the historical-critical study of architecture, sculpture and the two-dimensional arts from ancient times to the present. These arts are treated as an illumination of history — as a visual embodiment and expression of the philosophical, religious, intellectual and social trends of the successive historical periods. The student is thus given an introduction to the richness, scope and significance of our historical and cultural heritage. At the same time the monuments are treated both as products of creative expression and as objects of aesthetic quality, providing the student with a basis for both receptivity to artistic communication and sound critical judgement.

A single, introductory, non-professional studio course is offered primarily as a supplement to the historical-critical study of the subject.

The Department offers major, honours, joint-honours and graduate programs. The major program provides a broad basis in the history and criticism of art, but at the same time retains considerable flexibility enabling the student to participate in the many other disciplines in the humanities and social sciences with which art history is characteristically related. The honours program, while almost equally flexible, offers a deeper and more comprehensive penetration of the subject and provides the necessary foundation for those intending to continue into graduate studies in the discipline. But it is intended also for the undergraduate desiring a more cohesive and challenging intellectual experience and development.

Major in Art History

There are no pre-University requirements for this program.

The student majoring in Art History will take at least 30 and not more than 36 credits in Art History of which not more than 12 may be elected in the First year. Also with the approval of his Faculty Adviser, the student will choose 24 additional credits in at most 3 disciplines in the Humanities and/or Social Sciences, complementary to the study of Art History.

Adviser: Professor Bertos, Arts W-265, Telephone: 392-4976.

Honours in Art History

There are no pre-University requirements for this program.

To qualify for the Honours degree in Art History candidates must pass 36

credits, four Honours seminars (twelve credits), and the Honours comprehensive examinations (Art History 499D).

In the first University year, the candidate will take at least 12, at most 18, Art History credits. In each of the second and third University years the student will normally take 12 Art History credits and two Honours seminars (3 credits each). At the end of the final University year, as well as the final examinations in their Art History courses, Honours students, having prepared themselves in the areas not covered by their formal courses, will take the Honours comprehensive written and oral examinations.

The passing mark for Honours standing in Art History is a GPA of 3.0. For promotion to the second university year, candidates must attain a GPA of 3.0 in their first university year Art History courses and marks not below C in each of their other courses. Qualification for the Honours degree requires a CGPA of 3.0 in all Art History courses and seminars taken, with not more than two of these in the C category; at least a C average in all non-Art History courses; and at least 70 in the Honours comprehensive examinations (Art History 499D).

Honours students intending to proceed to Graduate studies will be encouraged to begin the study of a third language recommended by the Department. (Note: courses in studio practice do not count towards the Honours degree.)

Adviser: Professor Judkins, Arts W-230, telephone: 392-4975.

Joint Honours

There are no fixed pre-University requirements for these programs.

Proposals by qualified students for Joint Honours studies in Art History and certain appropriately related subjects may be submitted for consideration jointly by the Chairmen of the Departments concerned.

Adviser: Professor Judkins, Arts W-230, telephone: 392-4975.

Course Descriptions

123-200D. FORM AND MEANING. (6 credits.) Dealing broadly in terms of Painting, Sculpture and Architecture, the aim of this course is to develop the student's perception and understanding of the work of art — both as a visual medium of expression and as a crystallization of its historical and cultural context. PROFESSOR JUDKINS AND STAFF

123-026D. FUNDAMENTALS IN DRAWING AND PAINTING. (6 credits; No previous training or experience is expected.) The purpose of the course is to develop the creative sensibilities of students by introducing them, through studio work, to basic principles of drawing, painting and sculpture. MR. LANGSTADT

NOTE: Enrolment in this course is limited to fifty students. Selection from among all those registered will be made, by lot, at the time of (not before) the first scheduled meeting of the first section of the course. Except by special consent of the instructor, supplemental assessments will not be given in this course.

123-211A. EARLY AND CLASSICAL GREEK ART AND ARCHAEOLOGY. (3 credits.) A selective survey of the slow emergence of the visual arts in the Hellenic world after the Mycenean Age and their transformation to the end of the fourth century. Emphasis is placed upon the cultural significance of this phase of Greek civilization for modern man. PROFESSOR GALAVARIS

123-212B. HELLENISTIC GREEK AND ROMAN ART AND ARCHAEOLOGY. (3 credits.) The spirit of the forms in the visual arts discussed as manifestations of a new world-view that became predominant from the time of Alexander's conquests to the appearance of Christian Art. Emphasis is placed on Rome's contribution to the classical tradition. PROFESSOR GALAVARIS

123-220A. PRE-COLUMBIAN ART. (3 credits; Not given in 1974-75.) The sculpture, architecture and painting of the major civilizations of the New World prior to Cortes. Within their cultural contexts, emphasis is placed on the visual and expressive qualities of the works in question. STAFF

123-221B. NORTH AMERICAN PAINTING. (3 credits; Not given in 1974-75.) A detailed examination of the emergence of an indigenous cultural expression, from the Colonial

period to the present, dealing in alternate years with either American or Canadian painting. STAFF

123-222D. RENAISSANCE AND POST-RENAISSANCE SCULPTURE. (6 credits; Not given in 1974-75.) European sculpture of the fifteenth through the nineteenth centuries, with emphasis upon the works of the principal sculptors. Attention will be given to the special problems involved in the three-dimensional expression of styles in art. STAFF

123-223A. EARLY RENAISSANCE ART IN ITALY. (3 credits.) The emergence of a new concept of art in Italy during the 15th century expressed in the works of the most important artists of the period. Special consideration will be given to the relationship of the visual arts to the classical tradition and to contemporary literature, philosophy and social conditions. PROFESSOR BERTOS

123-224B. HIGH RENAISSANCE ART IN ITALY. (3 credits.) A systematic investigation of the Italian art of the 16th century — one of the most important periods in art history. Attention will be given also to the relation of the visual arts to the contemporary intellectual and social trends. PROFESSOR BERGMANN

123-312A. EARLY CHRISTIAN AND BYZANTINE ART AND ARCHAEOLOGY. (3 credits; Not given in 1974-75.) The spirit of the art of the Early Church and of the Byzantine World seen through the Fine Arts in relation to other expressions of the civilization of the time. Emphasis is placed on the art of Byzantium, the continuity of the classical tradition and its meaning for western man. PROFESSOR GALAVARIS

123-313B. WESTERN MEDIAEVAL ART AND ARCHAEOLOGY. (3 credits; Not given in 1974-75.) A presentation of the visual arts embodied in the "Mediaeval Cathedral" discussed as cultural manifestations of Mediaeval Man's world-view. PROFESSOR GALAVARIS

123-315D. GOTHIC ARCHITECTURE. (6 credits; Not given in 1974-75.) A study of Gothic architecture with special emphasis upon its contemporary literary documents and upon the analysis of the form and structure of the major monuments. This will be followed by a critical evaluation of modern interpretations of Gothic architecture. STAFF

123-316A. THE ARCHITECTURE OF THE CITY AND CITY PLANNING. (3 credits; Not given in 1974-75.) A survey of the development of the architecture of the city from the Greeks and Romans through the end of the eighteenth century. Special attention will be given to the study of the development of specific cities as well as to theoretical writings by architects on city planning. STAFF

123-332A. RENAISSANCE ARCHITECTURE. (3 credits; Not given in 1974-75.) The study of a selected number of major architects from 1400 to 1600 with special emphasis on the development of architectural theory and the revival of classical antiquity in Italy. STAFF

123-333A. BAROQUE AND ROCOCO ARCHITECTURE. (3 credits.) The development of the Baroque style in Italy and subsequently in the rest of Europe from 1600 to 1750. Emphasis on the relationship between theory and practice. The origins of Classicism, Palladianism and Rococo style will also be studied. STAFF

123-334D. EUROPEAN ART OF THE 17TH AND EARLY 18TH CENTURIES. (6 credits.) The emergence of the Baroque in Rome, its dissemination throughout Europe, and artistic tastes in the 18th century. Attention is given to the relationships between the visual arts and other aspects of the intellectual, religious and social life of these centuries. PROFESSOR GALAVARIS

123-335A. NEO-CLASSICISM, ROMANTICISM AND REALISM. (3 credits.) An investigation of the closely linked movements generated by the intellectual and social revolutions of the mid-eighteenth century. PROFESSOR GIFFORD

123-336B. IMPRESSIONISM, NEO-IMPRESSIONISM AND POST-IMPRESSIONISM. (3 credits.) A stylistic and iconographic investigation of the principal movements in European painting and sculpture of the second half of the nineteenth century. PROFESSOR GIFFORD

123-337D. MODERN PAINTING AND SCULPTURE. (6 credits.) The modern movement in art; its late nineteenth century emergence, problems, character and place in the continuity of art history. PROFESSOR JUDKINS

123-343B. THE EMERGENCE OF RENAISSANCE ART IN NORTHERN EUROPE. (3 credits.) The development from Late Gothic to Renaissance, principally through the rise of

the Early Netherlandish school and its relation to French art, in the 14th and 15th centuries. The monuments are examined within the changing religious and social climate of the times.
PROFESSOR BERGMANN

123-344B. NORTHERN EUROPEAN ART OF THE SIXTEENTH CENTURY. (3 credits; Not given in 1974-75.) The specific character of Northern Renaissance art will be studied with due consideration of its diversity against the background of Christian humanism and Protestantism. Emphasis is placed on the major German artists and the development of graphic art.
PROFESSOR BERGMANN

123-347A. TRADITION AND INNOVATION IN 19TH CENTURY ARCHITECTURE. (3 credits.) An historical review of European and North American architecture from 1750 to 1880, covering Neoclassicism, the Gothic Revival, the development of new technology and city planning, as well as major figures like Schinkel, Pugin, and Richardson.
STAFF

123-348B. 20TH CENTURY ARCHITECTURE: IDEALS AND ACHIEVEMENTS. (3 credits.) A study of architecture from 1880 to the present, focusing on such key men and movements as: Frank Lloyd Wright, Alvar Aalto, Mies van der Rohe, Le Corbusier, Louis Kahn, and the tall building, the Bauhaus, the International Style, Formalism and Brutalism.
STAFF

123-414D. WESTERN MEDIAEVAL PAINTING. (6 credits; Not given in 1974-75.) (Also open to First-year Graduate students.) A systematic study of the important centres and media (book painting, fresco, stained glass, etc.) of Mediaeval "Painting" from Carolingian through High Gothic times. The works of art are studied in relation to the religious spirit and social climate in which they were created.
PROFESSOR BERGMANN

123-430D. EVOLVING CONCEPTS OF THE DISCIPLINE OF ART HISTORY. (6 credits; Not given in 1974-75.) (Also open to First-year Graduate students.) The historical development of approaches and methods employed by art historians since the Eighteenth century. The emergence of Art History as a systematic discipline in the Humanities — its contributions, responsibilities and present status.
PROFESSOR BERTOS

123-440D. THE VISUAL LANGUAGE OF ARTISTIC EXPRESSION. (6 credits; Not given in 1974-75.) (Also open to First-year Graduate students.) A detailed analysis of the nature, technicalities and functions of the factors of Representation, Design and Medium, including their evolving historical development, in combination with a study of their interactive synthesis in the total work, including comparative examination of the principal extant interpretations of the synthesis factor.
PROFESSOR JUDKINS

123-499D. HONOURS COMPREHENSIVE EXAMINATIONS. All Honours students must register for this course in the final year — see Honours in Art History above.

HONOURS SEMINARS. (3 credits each.) Honours candidates in their Second and Third University years will undertake special studies (the work consisting of recommended readings, written papers and discussions) in certain of the following areas as advised by the Department. (6 credits in each year.) Seminar offerings for the current session are obtainable from the Department office.

123-380A. ANCIENT AND EARLY MEDIAEVAL ART AND ARCHAEOLOGY. (3 credits.)
PROFESSOR GALAVARIS

123-381B. ANCIENT AND EARLY MEDIAEVAL ART AND ARCHAEOLOGY. (3 credits.)
PROFESSOR GALAVARIS

123-382A. LATER MEDIAEVAL ART. (3 credits.) PROFESSOR BERGMANN

123-383B. LATER MEDIAEVAL ART. (3 credits.) PROFESSOR BERGMANN

123-384A. ART OF THE RENAISSANCE. (3 credits.) PROFESSOR BERTOS

123-385B. ART OF THE RENAISSANCE. (3 credits.) PROFESSOR BERTOS

123-386A. EUROPEAN ART OF THE 18TH AND 19TH CENTURIES. (3 credits.)
PROFESSOR GIFFORD

123-387B. EUROPEAN ART OF THE 18TH AND 19TH CENTURIES. (3 credits.)
PROFESSOR GIFFORD

123-388A. MODERN ART AND THEORETICAL PROBLEMS. (3 credits.)
PROFESSOR JUDKINS

123-389B. MODERN ART AND THEORETICAL PROBLEMS. (3 credits.)
PROFESSOR JUDKINS

123-480A. Same as Art History 123-380A for Final year students. (3 credits.)

123-481B. Same as Art History 123-381B for Final year students. (3 credits.)

123-482A. Same as Art History 123-382A for Final year students. (3 credits.)
123-483B. Same as Art History 123-383B for Final year students. (3 credits.)
123-484A. Same as Art History 123-384A for Final year students. (3 credits.)
123-485B. Same as Art History 123-385B for Final year students. Also open to First-year Graduate students. (3 credits.)
123-486A. Same as Art History 123-386A for Final year students. Also open to First year Graduate students. (3 credits.)
123-487B. Same as Art History 123-387B for Final year students. (3 credits.)
123-488A. Same as Art History 123-388A for Final year students. (3 credits.)
123-489B. Same as Art History 123-389B for Final year students. (3 credits.)

CANADIAN STUDIES PROGRAM

Arts Building, Room 220; telephone: 392-5005

The Canadian Studies Program attempts to provide students with a comprehensive, inter-disciplinary view of the nature and growth of Canadian civilization.

Students registered in this program will take six credits in each of the following, History, Literature and a Social Science plus 36 credits chosen from the list below.

Please consult Professor Lucas, English Department.

Courses

Prerequisites are required for most courses above the 200 level. Students lacking prerequisites or written permission from the course instructor may be required to drop courses.

Anthropology

151-236D. INDIGENOUS PEOPLES OF NORTH AMERICA: A GEOGRAPHICAL AND CULTURAL APPROACH. (6 credits.)

Architecture

301-204B. HISTORY OF ARCHITECTURE IN CANADA. (*Prerequisite:* 301-102B.)

Economics

154-200D is prerequisite to all upper level courses in Economics except those for which other provision is made in the course description.
154-205A. AN INTRODUCTION TO APPLIED POLITICAL ECONOMY I. (3 credits; *Prerequisite:* 154-200D or consent of instructor.)
154-206B. AN INTRODUCTION TO APPLIED POLITICAL ECONOMY II. (3 credits; *Prerequisite:* 154-205A.)
154-211D. INTRODUCTION TO CANADIAN ECONOMIC HISTORY. (6 credits; *Prerequisite:* 154-200D or consent of instructor.)
154-302D. MONEY AND BANKING. (6 credits.)
154-304D. CANADIAN ECONOMIC POLICY. (6 credits.)
154-305D. GOVERNMENT AND BUSINESS. (6 credits.)
154-306D. LABOUR ECONOMICS AND INSTITUTIONS. (6 credits.)
154-311D. NORTH AMERICAN ECONOMIC DEVELOPMENT. (6 credits; *Prerequisite:* 154-200D or 154-201D.)
154-404D. TRANSPORTATION. (6 credits.)
154-408D. PUBLIC FINANCE. (6 credits.)
154-468A. URBAN AND REGIONAL ECONOMICS. (3 credits.)

English

110-228A. CANADIAN LITERATURE. (3 credits.)
110-229B. CANADIAN LITERATURE. (3 credits.)
110-327D. THE DEVELOPMENT OF PROSE FICTION IN CANADIAN LITERATURE. (6 credits.)
110-528A. CANADIAN LITERATURE. (3 credits.)

French

126-227A. INTRODUCTION A LA LITTERATURE QUEBECOISE I. (3 credits.)
126-228B. INTRODUCTION A LA LITTERATURE QUEBECOISE II. (3 credits.)
126-229D. INITIATION A LA LITTERATURE QUEBECOISE. (6 credits.)
126-264D. HISTOIRE DE LA CIVILISATION QUEBECOISE. (6 credits.)
126-329D. ROMAN QUEBECOIS CONTEMPORAIN. (6 credits.)
126-333D. LE THEATRE QUEBECOIS. (6 credits.)
126-334B. LE CINEMA QUEBECOIS. (3 credits.)
126-361D. ROMAN QUEBECOIS. (6 credits.)
126-364D. LA POESIE QUEBECOISE. (6 credits.)
126-432D. POESIE QUEBECOISE CONTEMPORAINE. (6 credits.)
126-433A. LES CHANSONNIERS QUEBECOIS. (6 credits.)
126-436D. EVOLUTION DES IDEES AU QUEBEC AU 19e SIECLE. (6 credits.)
126-442D. EVOLUTION DE LA LANGUE FRANÇAISE AU CANADA. (6 credits.)
126-461D. ROMAN QUEBECOIS II. (6 credits.)
126-462D. LES ESSAYISTES QUEBECOIS — EXPLOSION DE LA PENSEE DEPUIS BORDUAS. (6 credits.)
126-492B. SEMINAIRE SPECIALISE DE LITTERATURE QUEBECOISE. (3 credits.)

French Canada Studies Program

157-226A. INTRODUCTION A LA VIE POLITIQUE QUEBECOISE. (3 credits.)
157-316A. QUEBEC ET L'AMERIQUE DU NORD. (3 credits.)
157-336B. QUEBEC ET LE CANADA. (3 credits.)

Geography

183-301D. GEOGRAPHY OF CANADA. (6 credits.)
183-325A. PHYSICAL GEOGRAPHY OF QUEBEC (3 credits)
183-326A. HUMAN GEOGRAPHY OF QUEBEC (3 credits)
183-336D. INDIGENOUS PEOPLES OF NORTH AMERICA. (6 credits.)
183-402D. REGIONAL GEOGRAPHY OF NORTHERN LANDS. (6 credits.)

History

101-202D. INTRODUCTION TO THE HISTORY OF CANADA. (6 credits.)
101-323D. FRENCH CANADA FROM THE 17TH CENTURY TO THE MIDDLE OF THE 19TH CENTURY. (6 credits; *Prerequisite:* 101-202D.)
101-332D. CANADA AND THE BIRTH OF CONFEDERATION. (6 credits; *Prerequisite:* 101-202D or consent of instructor.)
101-352D. EMERGENCE OF ENGLISH CANADA: 1791-1867. (6 credits; *Prerequisite:* 101-202D or consent of instructor.)
101-353D. WAR AND SOCIETY IN CANADIAN HISTORY. (6 credits; *Prerequisite:* 101-202D. This course is not open to candidates who have previously taken 101-372D.)
101-362D. THE WEST IN CANADIAN HISTORY. (6 credits; *Prerequisite:* 101-202D.)
101-363D. CONTEMPORARY CANADA, 1890-1970. (6 credits; *Prerequisite:* 101-202D or equivalent, or consent of instructor. This course is not open to candidates who have previously taken 101-302A and 312B.)

101-403D. REGIONAL, SOCIAL AND CULTURAL HISTORY OF QUEBEC. (6 credits; *Prerequisites:* 101-202D or consent of instructor. A reading and speaking knowledge of French is essential.)

Music

214-391B. CANADIAN MUSIC. (3 credits; *Prerequisite:* 214-280D or consent of instructor.)

Political Science

160-211D. INTRODUCTION TO COMPARATIVE GOVERNMENT. (6 credits.)

160-221D. GOVERNMENT OF CANADA. (6 credits.)

160-320A. CANADIAN POLITICAL PROCESS. (3 credits; *Prerequisite:* 160-211D.)

160-337B. PUBLIC ADMINISTRATION. (3 credits; *Prerequisite:* 160-321D or consent of instructor.)

160-415B. POLITICAL PARTIES. (3 credits; *Prerequisites:* 160-211D and one other course in Comparative Government.)

160-418A. ELITES AND POLITICS. (3 credits.)

160-421B. PROBLEMS IN CANADIAN POLITICS AND GOVERNMENT. (3 credits: *Prerequisites:* 160-221D and 160-320A.)

Social Work

407-352B. THE SOCIAL SERVICES IN CANADA. (3 credits.)

407-457B. LEGAL PROBLEMS OF THE POOR. (3 credits.)

Sociology

166-210A. INTRODUCTION TO SOCIOLOGY. (3 credits.)

166-217A. MASS COMMUNICATIONS. (3 credits; *Prerequisite:* Introduction to Sociology.)

166-223B. SOCIAL STRATIFICATION. (3 credits; *Prerequisite:* Introduction to Sociology.)

166-230A. CLASS ETHNICITY, AND POLITICS IN CANADA AND IN QUEBEC. (3 credits.)

166-317B. RESEARCH IN CANADIAN MASS COMMUNICATIONS (3 credits.)

166-326B. SOCIOLOGICAL ASPECTS OF POLITICAL BEHAVIOUR. (3 credits.)

166-435A. SOCIOLOGY OF POPULAR CULTURE. (3 credits; *Prerequisites:* Introductory Sociology, Mass Communications (217A, formerly 317B), or consent of instructor.)

CENTRE FOR EAST ASIAN STUDIES (117)

3434 McTavish Street
Tel: 392-4280; 392-4582

General Information

The Centre for East Asian Studies offers an interdisciplinary program focusing on China and Japan. The courses included in the East Asian Studies program are given in the departments of Anthropology, East Asian Languages and Literatures, Economics, Geography, History, Political Science, Religious Studies and Sociology. These courses are listed below.

The program has been structured to accommodate general students who wish to acquire a basic knowledge of East Asia as well as those students who desire to specialize in the field. Requirements for the Major Program and the Honours Program currently offered are listed below.

Major in East Asian Studies
(In conjunction with the Department of History)

The requirements for a Major in East Asian Studies consist of the following: One compulsory course (History 208D) plus forty-eight credits (or the equivalent) drawn from the course listings in East Asian Studies and the Department of East Asian Languages and Literatures. These forty-eight credits must be spread among more than one department. Students are encouraged to enrol in the language sequence.

Enrolment in the East Asian Studies Major program will take place at the Centre for East Asian Studies just prior to university registration. The date for enrolment will be announced by September.

Inquiries regarding the Major in East Asian Studies should be addressed to Elaine Rubin, Centre for East Asian Studies, 392-4280.

Honours in East Asian Studies
(In conjunction with the Department of History)

The Honours Program in East Asian Studies will consist of a total of 60 credits. Of these 60 credits, the following 30 credits are compulsory: History 208D, 6 credits; a minimum of three levels of Chinese or Japanese language study, 18 credits; History 497D, 6 credits. In addition to these required courses, students must complete 30 additional credits selected from the East Asian Studies course listing. Modifications may be considered by the Honours adviser.

Since this is a multidisciplinary program, students will be encouraged to elect courses in more than one discipline.

Enrolment in the East Asian Studies Honours Program will take place just prior to university registration. The date and place of this enrolment will be announced in early September.

Inquiries regarding the Honours Program in East Asian Studies should be addressed to Professor E. Laffey in the Department of History, Telephone 392-5187.

CENTRE D'ETUDES CANADIENNES-FRANÇAISES (157)

A student who wishes to Major in the French Canada Studies Program will establish, in consultation with an adviser who will become his tutor for the entire program, a detailed sequence of courses and seminars. Students will select a minimum of 54 credits in courses dealing with Quebec and/or Canada. This inter-disciplinary program is being offered in conjunction with various departments, to give undergraduate students an opportunity to have a comprehensive understanding of the Quebec society in its Canadian and North American context.

To inquire about the program, students should contact Professor Jean-Louis Roy (392-5203) or Professor Daniel Latouche (392-5216) at 3475 Peel Street.

Courses Offered by the French Canada Studies Program

157-200A. INTRODUCTION TO QUEBEC SOCIETY. (3 credits.) This special survey course will discuss the major historical developments in the economic, social, intellectual and political life of Quebec society in the XXth century, with special attention to the post 1945 period. This course is designed to familiarize students with some of the fundamental issues in contemporary Quebec and with the various methodological and bibliographical instruments needed for an understanding of Quebec society. Topics covered include English-French relations, the impact of industrialization, labour legislation, the role of the Church and the state, the rise and content of the separatist ideology, the evolution of revolutionary ideas, violence, the role of the media and the study of mass culture. (The course will be given mostly in English, but a reading knowledge of French is required.)
PROFESSOR JEAN-LOUIS ROY AND STAFF

157-210B. INTRODUCTION TO QUEBEC SOCIETY. (3 credits. Same description as 157-200A.)

157-226A. INTRODUCTION A LA VIE POLITIQUE QUEBECOISE. (3 crédits.) Une introduction à la vie politique québécoise à travers l'étude des institutions, des idéologies et des comportements politiques. Une attention particulière sera accordée à la structure et aux changements dans le système politique québécois. PROFESSEUR ANDRE BERNARD

157-300D. HISTOIRE CULTURELLE DU QUEBEC. (6 crédits.) Introduction générale (18e-20e siècle). *Les messages:* impact des révolutions américaine et françaises, signification culturelle du parlementarisme, stratégie progressiste et laïque des notables, réaction cléricale après 1837-38. Culture urbaine et loisirs à la fin du 19e siècle. *Les media:* journalisme, voyages, associations . . . insistance sur l'apparition d'une culture de masse, d'une culture populaire de 1880 à 1920 (cirques, parcs, sports, expositions, vaudeville, cinéma . . .) Les débuts de la consommation culturelle. Travaux pratiques orientés vers la constitution d'un dossier cumulatif. PROFESSEUR YVAN LAMONDE

157-301A. HISTOIRE DE L'EDUCATION AU QUEBEC. (3 crédits.) Ce cours, donné en collaboration avec la Faculté des Sciences de l'Education, traite de l'histoire de l'éducation au Québec depuis la Confédération, y compris toutefois une brève étude de l'éducation à l'époque de la Nouvelle-France, et avant la Confédération. (Ce cours ne sera pas donné en 1974-75.)

157-304A. LE DEVELOPPEMENT ECONOMIQUE DU QUEBEC. (3 crédits; donné en français. Ce cours ne sera pas donné en 1974-75.) Le développement économique du Canada et l'économie du Québec. Attention plus particulière accordée aux phénomènes de la planification économique et au développement industriel.

157-316A. QUEBEC ET L'AMERIQUE DU NORD. (3 crédits.) Ce cours tentera de répondre à la question suivante: dans quelle mesure et de quelle façon le Québec est-il, malgré sa spécificité culturelle, une communauté nord-américaine? En 1974, les principaux thèmes étudiés seront les suivants: les freaks, la contestation, la violence, la drogue, la jeunesse.
PROFESSEUR DANIEL LATOUCHE

157-336B. QUEBEC ET LE CANADA. (3 crédits.) Comment les Canadiens anglais et les Québécois francophones se perçoivent-ils mutuellement? Existe-t-il des stéréotypes et des images communes? Quelles sont les principales différences culturelles entre les deux groupes? Comment la Révolution tranquille a-t-elle été perçue au Canada? Quelles sont les perspectives d'avenir envisagées par les deux groupes?
PROFESSEUR EDOUARD CLOUTIER

157-370D. PROBLEMES ACTUELS DE LA SOCIETE CANADIENNE-FRANÇAISE — L'EXPERIENCE QUEBECOISE DE LA PLANIFICATION. (6 crédits.) Définition de la planification, ses fonctions générales dans les économies socialistes et capitalistes, planification et aménagement du territoire. L'idée de planification au Québec, principales politiques économiques québécoises depuis 1960. La planification régionale au Québec.
PROFESSEUR PIERRE LAMONDE

157-371D. LIVRES ET SOCIETE QUEBECOISE. (6 crédits.) Travaux pratiques: problèmes actuels de la société canadienne-française. Ce séminaire de recherche est consacré à l'analyse des divers phénomènes socio-culturels et idéologiques qui se rapportent à l'Histoire de l'édition, de l'importation et de la distribution du livre au Québec et au Canada entre 1820 et 1960. L'analyse sectorielle et quantitative sera privilégiée. Travaux pratiques orientés vers la constitution d'un dossier cumulatif.
PROFESSEUR JEAN-LOUIS ROY

157-390B. SOCIETE QUEBECOISE ET EXPRESSION VISUELLE. (3 crédits.) Evolution parallèle de la société et des formes visuelles. Conditions et thématique de la production québécoise dans la peinture, dans la photographie, dans la caricature et dans la bande dessinée. (19e et 20e siècles). Enseignement par équipes avec le personnel de musées et d'archives. Projections et analyse de documents. PROFESSEUR YVAN LAMONDE

157-401A. QUEBEC — ETATS-UNIS. (3 crédits; *Prérequise:* Histoire 202D, 302D, 303D, FCSP 201D et l'autorisation du professeur; donné en français). Etude de l'influence des Etats-Unis sur la société canadienne-française au Québec; plus particulièrement dans le domaine des idées et de la culture, à partir de 1762. La période contemporaine (à partir de 1867) fera l'objet d'une attention particulière. (Ce cours ne sera pas donné en 1974-75.)

157-406B. CULTURE ET CONTRE-CULTURE POLITIQUE AU QUEBEC. (3 crédits. Ce cours ne sera pas donné en 1974-75.) Les origines et l'évolution récente de la culture traditionnelle au Québec. L'apparition de la contre-culture, ses protagonistes, son contenu. La contre-culture a-t-elle été récupérée par le système? La libération individuelle face à la libération collective. PROFESSEUR DANIEL LATOUCHE

157-407B. LITTERATURE FRANCOPHONE COMPAREE: QUEBEC, ANTILLES, AFRIQUE. (3 crédits; Ne sera pas donné en 1974-75.) Historique et analyse socio-culturelles des principaux mouvements littéraires; étude intensive d'œuvres capitales dans les genres poétique, romanesque et théâtral; définition de l'unité de ces littératures dans une esthétique post-européenne. PROFESSEUR MAX DORSINVILLE

157-411B. QUEBEC ET CANADIENS-FRANÇAIS. Séminaire de recherche. (3 crédits; *Prérequis:* Hist. 202D, 302D, 313D, ou FCSP 201D ou 401A ou autorisation du professeur.) Etude historique de l'évolution des communautés francophones au Canada, à l'extérieur du Québec et des relations entre ces communautés francophones et la société québécoise. (Ce cours ne sera pas donné en 1974-75.) PROFESSEUR JEAN-LOUIS ROY

157-414B. L'ECONOMIE DU QUEBEC DANS SON CONTEXTE NORD-AMERICAIN. (3 crédits; donné en français.) Etude des structures et des politiques et des forces économiques du Québec dans leur contexte nord-américain. (Ce cours ne sera pas donné en 1974-75.)

157-426B. ATTITUDES POLITIQUES, PARTIS ET COMPORTEMENTS POLITIQUES DANS LE QUEBEC CONTEMPORAIN. (3 crédits.) Ce cours cherchera à identifier les principaux courants politiques que l'on retrouve aujourd'hui au Québec: indépendantisme, fédéralisme, socialisme. Le rôle politique des syndicats et des mouvements de contestation sera par ailleurs étudié de façon particulière. PROFESSEUR DANIEL LATOUCHE

157-470D. THEORIE DES COMMUNICATIONS ET CULTURE DE MASSE. (6 crédits.) Culture de masse du Québec (1940-1970). Evolution de formes culturelles de mythologie québécoise: électrification de la vie (cinéma, radio, télévision, cuisine . . .), vedettes des sports et spectacles de masse. La culture de coin de rue, machines à boules, "juke-box", motos . . . publicité et consommation. Recherche cumulative des participants et relations avec les milieux extra-universitaires concernés (agences de publicité, compagnies . . .)
PROFESSEUR YVAN LAMONDE
PROFESSEUR JACQUES LANGUIRAND

157-480D. LA VILLE. (6 crédits; *prérequis:* Histoire 202D ou l'équivalent et l'autorisation du professeur; Ce cours ne sera pas donné en 1974-75.) Les travaux les plus importants sur l'émergence, la croissance des villes, leurs fonctions et liaisons avec l'arrière-pays, la vie sociale et l'organisation politique en milieu urbain seront utilisés pour aborder l'étude de Montréal au milieu du XIXe siècle. Les recherches des étudiants seront intégrées à un dossier cumulatif. PROFESSEUR JEAN-LOUIS ROY

157-490B. DEVELOPPEMENT DU SYNDICALISME AU QUEBEC DEPUIS LA GUERRE. (3 crédits.) Analyse du développement des syndicats ouvriers au Québec depuis la guerre avec insistance sur l'impact social et les fondements idéologiques de leurs attitudes et comportements.
PROFESSEUR JACQUES ROUILLARD

Courses Offered Jointly by the French Canada Studies Program and Departments

154-211D. INTRODUCTION TO CANADIAN ECONOMIC HISTORY. (6 credits.) A survey of the economic basis of Canadian History from the French Regime to the twentieth century, with a view to examining the historical roots of contemporary problems of the Canadian economy and society. The structure, role and evolution of economic institutions are stressed.
PROFESSOR NAYLOR

166-230A. CLASS, ETHNICITY, AND POLITICS IN CANADA AND IN QUEBEC. (3 credits.) Class and Ethnicity in Quebec and Canada. The segmented nature of the social structure. Types of party systems. Class and ethnic factors in federal politics. Various manifestations of class and ethnic politics in Quebec since the thirties: Elite versus mass behaviour. The Quiet Revolution, Separatism and Quebec politics since the sixties.
PROFESSOR MAURICE PINARD

126-264D. HISTOIRE DE LA CIVILISATION QUEBECOISE. (6 crédits.) Cours offert conjointement par le Centre d'Etudes canadiennes-françaises et le Départment de langue et de littérature françaises. Etude des principaux éléments de l'avancement idéologique, culturel et social au Canada français et leur influence sur la littérature.
PROFESSEUR JEAN-PIERRE BOUCHER

101-323D. FRENCH CANADA FROM THE 17TH CENTURY TO THE MIDDLE OF THE 19TH CENTURY. (6 credits; *Prerequisite:* History 101-202D or consent of instructor.) This course will approach the economic and social history of New France and pre-industrial Quebec as a case study for problems in colonial policies, population movements, rural economy, commercial capitalism, social stratification, collective attitudes and institutional change.
PROFESSOR LOUISE DECHENE

183-326A. HUMAN GEOGRAPHY OF QUEBEC. (3 credits.) A geographic interpretation of selected social, economic and political problems of contemporary Quebec: ethnicity, demography, organization, regional disparities, economic marginality, with the purpose of segregating elements unique to Quebec from more universal aspects that pervade them.
PROFESSOR ERIC WADDELL

183-325A. PHYSICAL GEOGRAPHY OF QUEBEC. (3 credits.) An account of the development of the present natural environment of Quebec with particuular attention to changes following the retreat of the Laurentide ice cap. Topics will include the Quebec Appalachians, emergence of the drainage pattern of the St. Lawrence lowlands, the post glacial sediments of the lowlands and the occurrence of catastrophic earthflows, the Southern shields area, the James Bay area, the Subarctic environment and discontinuous permafrost, and the Quebec Arctic. Attention will be directed to both the evolution of the present environment "landforms soils vegetation" and contemporary processes, resources and problems "water resources, river, lake and sea ice, frost-heaving, etc." The course is intended to serve as a physical basis for Geography 183-326A. Field trips are planned for the early weekends in September and October and will be regarded as an important component of the course.
PROFESSOR CARSON

101-403D. HISTOIRE REGIONALE, SOCIALE ET CULTURELLE DU QUEBEC. (6 crédits; *prérequis:* Histoire 101-333D ou l'autorisation du professeur; donné en français.) Etude du développement de la société québécoise depuis 1867. Retracer la signification des comportements et des idées nées dans un climat physique, spirituél et déterminé, tel est l'objectif de ce cours.
PROFESSEUR JEAN-LOUIS ROY

154-411B. SEMINAR IN ECONOMIC HISTORY. (3 credits.) In 1974-75 the topic will be the Quebec economy in the 20th century. An historical study of industrialization and social change, with emphasis on Quebec's role in Confederation and the North American economy. Reading knowledge of French is recommended.
STAFF

160-417B. THE MILITARY AND POLITICS. (3 credits; *Prerequisite:* 160-211D or consent of instructor.) Identification and comparison of the political and socio-economical roles played by professional military establishments in both the relatively modernized and the relatively non-modernized societies. The course will focus on the dynamics and impact of the military industrial complex in United States and Canada and on the significance of

military coups and the performance of military regimes for the process of political modernization. The contribution of Janowitz, Huntingdon, Pye, Johnson, Lee, Bienen and Hurewitz will be considered. PROFESSOR DANIEL LATOUCHE

126-442D. HISTOIRE DE LA LANGUE FRANÇAISE AU CANADA. (6 crédits.) Cours donné conjointement par le Département de langue et de littérature françaises et le Centre d'Etudes canadiennes-françaises. Etude des origines du franco-canadien dans les dialectes français des XVIe et XVIIe siècles. Description du parler canadien au XVIIIe siècle. Evolution du franco-canadien après 1760. Description du "québécois" contemporain.

Ce cours est organisé en séminaire de recherches. Après une période d'initiation, l'étudiant fera un travail personnel portant sur un aspect particulier et précis, par exemple: la prononciation à la fin du XVIIIe siècle, le vocabulaire parlementaire en 1792, les anglicismes dans la Gazette de Québec en 1765-1770. PROFESSEUR MAURICE RABOTIN

110-418D. STUDIES IN TWENTIETH CENTURY LITERATURE. A study of twentieth century French and English Canadian novels concerned with city life. Particular consideration given to historical, sociological and mythopoeic significance. Reading knowledge of French desirable. PROFESSOR MAX DORSINVILLE

Courses Given by Departments

ANTHROPOLOGY

151-236D. INDIGENOUS PEOPLES OF NORTH AMERICA

ARCHITECTURE

301-204B. HISTORY OF ARCHITECTURE IN CANADA. *(Prerequisite:* 301-102B.)

ECONOMICS

154-200D. INTRODUCTORY (UNIVERSITY) ECONOMICS.
154-211D. AN INTRODUCTION TO ECONOMIC HISTORY.
154-304D. CANADIAN ECONOMIC POLICY.
154-306D. LABOUR ECONOMICS AND INSTITUTIONS.
154-311D. NORTH AMERICAN ECONOMIC DEVELOPMENT.
154-312D. POLITICAL ECONOMY OF DEPENDENCE IN THE WESTERN HEMISPHERE.
154-404D. TRANSPORTATION.
154-426D. LABOUR ECONOMICS.

FRENCH

126-227A, 126-228B. INTRODUCTION A LA LITTERATURE QUEBECOISE.
126-229D. INITIATION A LA LITTERATURE QUEBECOISE.
126-329D. LE ROMAN QUEBECOIS CONTEMPORAIN.
126-333D. LE THEATRE QUEBECOIS.
126-334B. LE CINEMA QUEBECOIS.
126-361D. ROMAN QUEBECOIS I.
126-364D. LA POESIE QUEBECOISE.
126-432D. LA POESIE QUEBECOISE CONTEMPORAINE.
126-461D. ROMAN QUEBECOIS II.
126-462D. LES ESSAYISTES QUEBECOIS: EXPLOSION DE LA PENSEE DEPUIS BORDUAS.

POLITICAL SCIENCE

160-211D. INTRODUCTION TO COMPARATIVE GOVERNMENT AND POLITICS.
160-320A. CANADIAN POLITICAL PROCESS (I).
160-321B. CANADIAN POLITICAL PROCESS (II).

SOCIOLOGY

166-210A. INTRODUCTION TO SOCIOLOGY.
166-217A. MASS COMMUNICATIONS.
166-222A. URBAN SOCIOLOGY.
166-223B. SOCIAL STRATIFICATION.
166-224B. CANADIAN SOCIETY.
166-230A. CLASS ETHNICITY & POLITICS IN CANADA AND IN QUEBEC.
166-317B. RESEARCH IN CANADIAN MASS COMMUNICATIONS.
166-324B. URBAN SOCIAL ECONOMY.
166-326B. POLITICAL SOCIOLOGY.
166-435A. SOCIOLOGY OF POPULAR CULTURE.

GEOGRAPHY

183-217B. INTRODUCTION TO URBAN GEOGRAPHY.
183-302D. ENVIRONMENT: ECOSYSTEMS AND MAN.
183-313A. GEOGRAPHY OF RECREATION
183-333A. MONTREAL URBAN FIELD STUDIES.

CLASSICS (114)

Stephen Leacock Building, Room 517. Telephone 392-5227

Classics for the Specialist

The Department's honours programs are designed to train students who wish to pursue careers in Classics, Ancient History and Archaeology. Major programs give rather less intensive training and provide a useful background for students interested in the liberal arts or the social sciences.

Classics for the Non-Classicist

The Department offers numerous courses — many of which do not require a knowledge of Ancient Greek or Latin — designed for students in other programs such as Anthropology, Art History, English, Linguistics, Modern Languages, Philosophy, Political Science, Religious Studies.

Students of languages, literature and history may in addition be interested in the introductory language courses offered by this Department, which enjoys an international reputation as a pioneer in this field.

The very nature of the subject itself — covering as it does not only the language and literature, but also the history, archaeology, art, religion, philosophy, politics and economics of an entire civilization — can provide the student with a satisfying and relevant background to a wide range of studies.

MAJOR PROGRAMS

NOTE: The following outlines represent *Departmental* requirements only. The attention of students is directed to the regulations of *Faculty* concerning *Programs*. Each student's program must also satisfy the regulations imposed by the Faculty of Arts.

Major in Classics (Classical Culture and Society)

(See the Chairman, L517, 392-5227)

The student will select 27 credits from each of the two groups of courses listed below, choosing a maximum of 12 credits at the 200-level from each group.

The course 114-402B is required for all students in this program, and may be taken as part of either the first or second group.

Group 1: "Ancient Culture": e.g. Classics 200A, 202B, 203A/B, 207A, 208B, 300B, 302B, 305D, 307A, 309A, 400D, 477A, 478B, 402B.

Group 2: "Ancient Society": e.g. Classics 201D, 205D, 301D, 303D, 304B, 306B, 308B, 405D, 406B, 409A, 402B.

NOTES:

1. Students who wish to substitute for Non-Language courses a continuation sequence of courses in the original Ancient Greek or Latin may do so.
2. Students may on occasion substitute for a course offered in the Department of Classics a course offered by another Department, subject to the approval of the Department of Classics.
3. *This Program does NOT lead to post-graduate work in Classics.*

Major in Classics (Ancient Greek)

(See the Chairman, L517, 392-5227)

Minimum Course Requirements

24 Credits in Ancient Greek Literature, including Classics 114-321A and 323D.
18 Credits in Non-Language Courses approved by the Department of Classics.
6 Credits Classics 114-480D (Optional).
Classics 114-210D *or* 213A/B (which must be taken unless the student can prove proficiency in Latin).

Major in Classics (Latin)

(See the Chairman, L517, 392-5227)

Minimum Course Requirements

24 Credits in Latin Literature, including Classics 114-312B and 313A.
18 Credits in Non-Language Courses approved by the Department of Classics.
6 Credits Classics 114-480D (Optional).
Classics 114-220D (which must be taken unless the student can prove proficiency in Ancient Greek).

Major in Classics (Ancient Greek and Latin)

(See the Chairman, L517, 392-5227)

Minimum Course Requirements

12 Credits in Intermediate Ancient Greek Literature, including Classics 114-321A and 323D.
6 Credits in Senior Ancient Greek Literature.
12 Credits in Intermediate Latin Literature, including Classics 114-312B and 313A.
6 Credits in Senior Latin Literature.
18 Credits in Non-Language Courses approved by the Department of Classics.
6 Credits Classics 114-480D (Optional).

Major in Classics (Classical History and Archaeology)

(See J. M. Fossey, L529, 392-5335)

Minimum Course Requirements

24 Credits in Archaeology Courses offered by the Department of Classics (i.e. Classics 114-205D and 305D and 405B and 406B and 409A.)
18 Credits in Ancient History (i.e. Classics 114-201D and 301D and 303D).

6 Credits in Classics in Translation courses given in the Department of Classics.
6 Credits in a course or courses chosen with the approval of the Department of Classics.

NOTE: *This Program does NOT lead to post-graduate work in Classics*, although it could qualify a student for research in various aspects of Roman and European Archaeology.

Major in Classics (Classical and Hellenic Studies)

(See A. Farmakides, L516, 392-5222)

Minimum Course Requirements

Classics 114-220D *or* 221A.
Classics 114-235A/B, 236A/B, 335A/B (which must be taken unless the student can prove proficiency in Modern Greek).
Classics 114-210D *or* 213A/B.
12 Credits in Ancient Greek Literature.
12 Credits in Modern Greek Literature.
12 Credits in Latin Literature.
12 Credits in Non-Language Courses approved by the Department of Classics.

Major in Classics (Ancient and Modern Greek)

(See A. Farmakides, L516, 392-5222)

Minimum Course Requirements

Classics 220D *or* 221A.
Classics 235A/B, 236A/B, 335A/B (which must be taken unless the student can prove proficiency in Modern Greek).
12 Credits in Intermediate Ancient Greek Literature.
6 Credits in Senior Ancient Greek Literature.
18 Credits in Modern Greek Literature.
18 Credits in Non-Language Courses approved by the Department of Classics.

Interdisciplinary Major Programs

The Department of Classics participates in the following Interdisciplinary Major Programs (see page 55):

Classics and Linguistics

1. *Classics:*
27 credits.
The students will select a continuation sequence in either Ancient Greek or Latin. Six credits must be taken in the language not selected.
2. *Linguistics:*
27 credits.

104-200A. INTRODUCTION TO THE STUDY OF LANGUAGE.
104-201B. INTRODUCTION TO LINGUISTICS.
104-400A. THEORY AND METHODS OF HISTORICAL LINGUISTICS.
104-401B. SEMINAR IN HISTORICAL LINGUISTICS.

PLUS 15 Credits in other Linguistics Courses selected with due regard to prerequisites.

Humanistic Studies

The language component may include Latin, Ancient Greek, or Modern Greek.

Modern Languages

One of the modern languages may be Modern Greek.

HONOURS PROGRAMS

Honours in Classics

(See the Chairman, L517, 392-5227)

Minimum Course Requirements

24 Credits in Ancient Greek Literature, including Classics 114-321A and 323D.
24 Credits in Latin Literature, including Classics 114-312B and 313A.
24 Credits in Non-Language Courses.
6 Credits Classics 114-480D (Comprehensive Honours Tutorial Course).

NOTES:

1. The Non-Language Courses may be chosen from among courses given within the Department, or courses offered by other Departments, chosen with the permission of the Department of Classics.
2. Classics 114-480D will appear as a sixth 6-credit course in the student's final year record (i.e., it will be a sixteenth 6-credit course in the fifteen 6-credit course BA program). Every Honours student will be assigned to a Tutor upon entry into the Honours Program. The Tutor will meet with the student regularly during Term, and will assign essays or other work on subjects related to the course work on which the student is engaged. The Tutor may also, where practicable, assign summer reading. It will also be the Tutor's function to assist the student in selecting a suitable sequence of courses. *Honours standing in Classics 114-480D will be a requirement for the Honours degree.*

Honours in Classics (Classical History and Archaeology)

(See J. M. Fossey, L529, 392-5335)

Course Requirements

24 Credits in Ancient Greek or Latin.
12-18 Credits in the language not chosen above.
36-42 Credits in Archaeology and Ancient History courses offered by the Department of Classics.
6-18 Credits in other courses.
6 Credits Classics 114-480D (Comprehensive Honours Tutorial Course).
TOTAL: 90 Credits plus 6 (480D).

NOTES:

1. For Classics 114-480D, please see "Honours in Classics", Note 2.
2. Students proposing to obtain an MA in Classics at McGill are advised to gain 18 credits in the second Classical language, and to consult the Department for the precise requirements for the MA in Classics.
3. Classics 114-200A and 202B may NOT be included in the student's required courses for this program.

Honours in Classics (Classical and Hellenic Studies)

(See A. Farmakides, L516, 392-5222)

Minimum Course Requirements

Classics 114-220D or 221A.
Classics 114-235A/B, 236A/B, 335A/B.
Classics 114-210D or 213A/B.
18 Credits in Ancient Greek Literature.
18 Credits in Modern Greek Literature.
18 Credits in Latin Literature.
18 Credits in Non-Language Courses.

NOTES:

1. Classics 235A/B, 236A/B, 335A/B must be taken unless the candidate has reached a standard sufficient to satisfy the Department that (s)he is proficient in Modern Greek.
2. The Non-Language Courses may be chosen from among courses given within the Department, or courses offered by other Departments, chosen with the permission of the Department of Classics.

Joint Honours Programs

All Joint Honours Programs must have the approval of both Departments concerned. For Classics, see the Chairman, L517, 392-5227.

Formal arrangements exist for the following programs:

Joint Honours in Classics and History

(See G. M. Woloch, L527, 392-5220)

1. Students must complete 36 credits in each Department for a total of 72 credits. The remaining 18 credits of electives may be chosen from among the offerings of other Departments at McGill but these electives should be chosen in consultation with the Honours advisors in the Departments of History and Classics.
2. Students will have the option of 6 credits in history courses offered by the Classics Department as part of the history requirement.

Joint Honours in Anthropology and Classical Archaeology

(See J. M. Fossey, L529, 392-5335)

The Departments of Anthropology and Classics offer the following program leading to a Joint Honours B.A. degree:

1. Students must complete 33 credits in Anthropology and 39 credits in Classics, for a total of 72 credits. The remaining 18 credits may be chosen from among offerings of other Departments at McGill, but these electives should be chosen after consultation with advisors in the Anthropology and Classics Departments.

NOTE: This program does NOT lead to post-graduate work in pure Classics, but it may qualify the student for post-graduate work in Archaeology and Prehistory.

2. *Anthropology Requirements:*
   - 9 Credits consisting of 3 of the following five "core courses": Anthropology 151-354A, 355B, 356B, 357A, Linguistics 104-230A.
   - 3 Credits — Anthropology 151-358B.
   - 6 Credits consisting of 2 advanced level courses (i.e. with a 400 listing).
   - 12 Credits consisting of any other 4 Anthropology courses.
   - 3 Credits consisting of an independent research course (462A or 463B) in the U3 year. The project will be based upon the student's interdisciplinary training in Anthropology and Classical Archaeology. The project will last for the entire year, with registration for one half course in Anthropology and one half course in Classics.

TOTAL: 33 credits.

3. *Classics Requirements:*
   - 18-24 Credits in Archaeology courses.
   - 6-12 Credits in Ancient Greek OR Latin.
   - 6 Credits in Ancient History.
   - 3 Credits Classics 114-482B (Independent Research).

TOTAL: 39 credits.

NOTE: Classics 114-200A and 202B may NOT be included in the student's required Classics courses for this program.

Course Descriptions

NON-LANGUAGE COURSES

114-200A. GREEK CIVILIZATION (FROM ITS BEGINNINGS TO THE PERSIAN WARS). (3 credits.) A survey of Greek civilization (through lectures and self-study modules) from its beginnings in the Bronze Age down through the Persian Wars, including art and architecture, literature (Homer and Hesiod), philosophy and religion, archaeology and history (Herodotus). Classics 114-200A and 114-202B, which completes the survey, are companion courses, but students may elect either course, or both. Original sources will be read in translation.
PROFESSORS SNIDER AND WOLOCH

114-201D. ANCIENT HISTORY. (6 credits.) A survey of Greek and Roman history from the origins to the beginning of the Middle Ages.
PROFESSOR GORDON

114-202B. GREEK CIVILIZATION (FIFTH CENTURY B.C. AND LATER). (3 credits.) A survey of Greek civilization of the fifth century B.C., including art and architecture, drama, philosophy and religion, archaeology and history (Thucydides). The continuation of Greek civilization (Hellenistic and Byzantine) will be studied in modular form. Classics 114-200A and 114-202B, which completes the survey, are companion courses, but students may elect either course, or both. Original sources will be read in translation.
PROFESSORS SNIDER AND WOLOCH

114-203A/B. INTRODUCTION TO GREEK MYTHOLOGY. (3 credits.) A survey of the myths and legends of Ancient Greece.
PROFESSOR SNIDER

114-205D. INTRODUCTION TO CLASSICAL ARCHAEOLOGY, METHODS AND TECHNIQUES. (6 credits.) Concerned essentially with the application of modern techniques to Classical Archaeology, and its connections with contemporary Europe.
PROFESSOR FOSSEY

114-207A. CLASSICS IN TRANSLATION (THE CLASSICAL TRADITION). (3 credits.) Each student will select a single author or a field in which to specialize within the framework of a general discussion of Greek Literature from Homer to Aristotle.
PROFESSOR McCULLAGH

114-208B. CLASSICS IN TRANSLATION: LATIN. (3 credits.) Roman writers and their influence.
PROFESSOR GORDON

114-300B. GREEK DRAMA AND THE THEATRE. (3 credits.) A study of the Greek dramatists, both tragic and comic, in the light of their plays, with special emphasis on the theatrical techniques of the authors and the means of production in the Greek theatre.
PROFESSOR SNIDER

114-301D. GREEK HISTORY. (6 credits.) A seminar on problems in Classical Greek history (social, political and economic) from the beginnings to the time of Alexander.
PROFESSOR GORDON

114-302B. PROBLEMS IN GREEK MYTHOLOGY. (3 credits.) A research-orientated course in which students work on projects dealing with specific mythological themes, either as developed in antiquity, or as they have been used in literature, art and music after the end of antiquity. NOTE: Students who have not taken Classics 114-203A/B are asked to consult the instructor in advance of registration.
PROFESSOR SCHACHTER

114-304B. GREEK POLITICAL IDEAS. (3 credits.) The relations of politics, law and moral values in Greek political writings. Readings in translation from the dramatists and historians, Plato and Aristotle, and the fragments of the pre-Socratics, Epicurus and the early Stoics.
PROFESSOR SILVERTHORNE

114-305D. GREEK AND ROMAN ARCHAEOLOGY. (6 credits; *Prerequisite:* Classics 205D or permission of the Department.) The archaeology of the Greek and Italian peninsulas and related areas from Neolithic times down to the Hellenistic-Roman period.
PROFESSOR FOSSEY

114-307A. INTRODUCTION TO ROMAN COMEDY. (3 credits.) An analysis of selected plays of Plautus and Terence based on the theories of Bergson and Freud; their influence on later comedy.
PROFESSOR TOMASZUK

114-308B. THE BARBARIAN KINGDOMS AND THE LATER ROMAN EMPIRE. (3 credits.) An historical survey of the Romanized barbarians, the Vandals, Goths and Franks, and their political links to the Roman Empire down to A.D. 568. Sources (Cassiodorus, Gregory of Tours) will be read in translation.
PROFESSOR WOLOCH

114-405D. REGIONAL STUDIES IN CLASSICAL ARCHAEOLOGY. (6 credits; *Prerequisite:* Classics 205D and 210D or 213A/B or permission of the Department.)
PROFESSOR FOSSEY

114-471D. ROMAN IMPERIAL HISTORY. (6 credits; *Prerequisite:* a knowledge of Ancient Greek and Latin.) Based on a study of the original sources in Greek and Latin.
PROFFESSOR WOLOCH

114-472D. GREECE UNDER THE ROMAN EMPIRE. (6 credits; *Prerequisite:* A knowledge of Ancient Greek.) Based on a study of the original sources in Greek.
PROFESSOR WOLOCH

LANGUAGE COURSES

114-210D. LATIN: FIRST YEAR. (6 credits; *Prerequisite:* Matriculation in Latin or its equivalent.) Reading from two authors and sight translation. PROFESSOR TOMASZUK

114-211A. LATIN LANGUAGE LEVEL ONE: INTRODUCTORY LATIN. (3 credits.) A course for beginners. NOTE: This class meets four times per week. PROFESSOR McCULLAGH

114-212A/B. LATIN LANGUAGE LEVEL TWO. (3 credits; *Prerequisite:* Latin Language Level One or its equivalent.) Review and reading for students who have had some Latin but who have not recently completed a High School Latin program, or for those who have successfully completed Latin Language Level One. NOTE: This class meets four time per week.
PROFESSOR SILVERTHORNE (A)
PROFESSOR McCULLAGH (B)

114-213B. LATIN LANGUAGE LEVEL THREE. (3 credits; *Prerequisite:* Latin Language Level Two or its equivalent.) Reading and Advanced Grammar.
PROFESSOR SILVERTHORNE

114-220D. INTRODUCTORY ANCIENT GREEK. (6 credits.) For students who have not matriculated in ancient Greek. NOTE: This class meets four times per week.
PROFESSOR SCHACHTER

114-235A/B. MODERN GREEK GRAMMAR 1: READING AND WRITING, ELEMENTARY TO INTERMEDIATE. (3 credits.) A course for all beginners in Modern Greek.
PROFESSOR FARMAKIDES

114-236A/B. MODERN GREEK SPOKEN: UNDERSTANDING AND SPEAKING, ELEMENTARY. (3 credits; *Prerequisite:* A course for non-Greek beginners in 114-235A/B; this course may also be taken on permission of the instructor.) PROFESSOR FARMAKIDES

114-335A/B. MODERN GREEK GRAMMAR 2: TRANSLATION AND COMPOSITION, READINGS, INTERMEDIATE. (3 credits.) A course for students who have had at least one full university course in elementary Modern Greek; this course may also be taken on permission of the instructor. PROFESSOR FARMAKIDES

LITERATURE COURSES: LATIN

114-310B. INTERMEDIATE LATIN LITERATURE; MEDIAEVAL LATIN II. (3 credits; *Prerequisite:* Classics 114-210D or 213A/B or permission of the Department). A rapid reading course. PROFESSOR McCULLAGH

114-311A. INTERMEDIATE LATIN: POETRY. (3 credits; *Prerequisite:* as for 114-310B). Readings in Vergil, *Georgics*. PROFESSOR TOMASZUK

114-312B. INTERMEDIATE LATIN: POETRY. (3 credits; *Prerequisite:* as for 114-310B) Readings from Vergil, *Aeneid*. PROFESSOR TOMASZUK

114-313A. INTERMEDIATE LATIN: PROSE. (3 credits; *Prerequisite:* as for 114-310B) Cicero, *Letters* (selections). PROFESSOR SILVERTHORNE

114-314B. INTERMEDIATE LATIN: PROSE. (3 credits; *Prerequisite:* as for 114-310B) Selections of graded difficulty from various prose authors, including Caesar, Nepos and Livy. PROFESSOR SNIDER

114-417D. SENIOR LATIN: ROMAN ELEGIAC POETRY. (6 credits; *Prerequisite:* Intermediate Latin Literature or permission of the Department.) Readings from Catullus, Propertius, Tibullus and Ovid. PROFESSOR TOMASZUK

114-418D. SENIOR LATIN: VERGIL'S AENEID. (6 credits; *Prerequisite:* as for 114-417D). PROFESSOR GORDON

114-451A/452B, 453A/454B, 455A/456B, 457A/458B, 459D. SENIOR LATIN READING COURSES. (A and B courses are 3 credits each; D course is 6 credits; *Prerequisite:* Permission of the Department) Registration limited. STAFF

LITERATURE COURSES: ANCIENT GREEK

114-321A. INTERMEDIATE ANCIENT GREEK: PROSE. (3 credits; *Prerequisite:* Classics 114-220D or permission of the Department) Plato, *Apology;* Xenophon, *Apology;* composition based on Plato, *Crito;* grammatical review. PROFESSOR SCHACHTER

114-322B. INTERMEDIATE ANCIENT GREEK: PROSE. (3 credits; *Prerequisite:* as for 114-321A). Readings in Greek authors. PROFESSOR SILVERTHORNE

114-323D. INTERMEDIATE ANCIENT GREEK: HOMER. (6 credits; *Prerequisite:* as for 114-321A.) Elements of Homeric grammar, prosody and metre; survey of the historical background; reading and translating of some relevant passages of the *Iliad* and the *Odyssey* with pertinent commentary and discussion.
PROFESSOR McCULLAGH (first term)
PROFESSOR VIVANTE (second term)

114-422B. SENIOR ANCIENT GREEK: HOMER. (3 credits; *Prerequisite:* Intermediate Ancient Greek or permission of the Department.) A survey of Homeric Poetry, with emphasis on its value as poetry. The reading of the text will be accompanied by references to the way in which Homer expresses basic ideas and gives us a full-scale representation of the world. PROFESSOR VIVANTE

114-461A/462B, 463A/464B, 465A/466B, 467A/468B, 469D. SENIOR ANCIENT GREEK READING COURSES. (A and B courses are 3 credits each; D course is 6 credits; *Prerequisite:* Permission of the Department.) Registration limited. STAFF

As of February 1974, the following Senior Ancient Greek Reading courses had been allocated:

114-464B. GREEK COMEDY. (3 credits.) PROFESSOR McCULLAGH
114-465A. GREEK TRAGEDY. (3 credits.) PROFESSORS FOSSEY AND SCHACHTER
114-466B. GREEK LYRIC POETRY. (3 credits.) PROFESSOR VIVANTE
114-467A. HESIOD. (3 credits.) PROFESSOR SNIDER

LITERATURE COURSES: MODERN GREEK

114-435A. MODERN GREEK LITERATURE 1: 19TH CENTURY PROSE, SENIOR. (3 credits.) A course for students holding a Greek high school matriculation and for those who have successfully completed 114-335A/B, or on permission of the instructor.
PROFESSOR FARMAKIDES

SENIOR CLASSICS SEMINARS

One or more senior seminars may be given on subjects of interest to students and Faculty. For information concerning seminars for 1974-75, consult the Chairman (L517, 392-5227) in September.

114-441D/442D, 443A/444B, 445A/446B, 447A/448B. SENIOR CLASSICS SEMINARS. (A and B courses are 3 credits each; D courses are 6 credits each.) Registration limited. STAFF

As of January 1974, the following Seminar had been allocated:

114-447A. SENIOR CLASSICS SEMINAR: STYLE AND COMPOSITION. (3 credits; *Prerequisite:* 12 credits each in Ancient Greek and Latin.) Greek and Latin prose composition. Studies in the style of the major prose authors. PROFESSOR SILVERTHORNE

114-480D. COMPREHENSIVE HONOURS TUTORIAL COURSE FOR STUDENTS IN HONOURS PROGRAMS. (6 extra credits) STAFF

114-482B. INDEPENDENT RESEARCH COURSE FOR STUDENTS IN JOINT HONOURS IN ANTHROPOLOGY AND CLASSICAL ARCHAEOLOGY. (3 credits.) STAFF

Undergraduate Classics Courses which will NOT be offered in 1974-75.

NOTE: Many of these courses will be offered in 1975-76.

114-211B. LATIN LANGUAGE LEVEL ONE.

114-213A. LATIN LANGUAGE LEVEL TWO.

114-221A. ANCIENT GREEK FOR SPEAKERS OF MODERN GREEK.

114-303D. ROMAN HISTORY.
114-306B. THE ROMAN CITY IN CIVILIZATION.
114-309A. THE GREEK AND ROMAN NOVEL (IN TRANSLATION).
114-315A. INTERMEDIATE LATIN LITERATURE: POETRY.
114-316B. INTERMEDIATE LATIN LITERATURE: POETRY.
114-317A. INTERMEDIATE LATIN LITERATURE: PROSE.
114-318B. INTERMEDIATE LATIN LITERATURE: PROSE.
114-319A. INTERMEDIATE LATIN LITERATURE: MEDIAEVAL LATIN I.
114-400D. THE IDEA OF EPIC.
114-401A. HELLENISTIC HISTORY.
114-402B. CLASSICAL IDEAS.
114-403A. MODERN GREEK HISTORY: FROM 1204 TO 1821.
114-404B. MODERN GREEK HISTORY: FROM 1821 TO 1945.
114-406B. HOMERIC ARCHAEOLOGY.
114-407D. LATER GREEK PHILOSOPHY.
114-409A. ROMAN BRITAIN.
114-411D. SENIOR LATIN LITERATUIE: ROMAN HISTORIANS.
114-413D. SENIOR LATIN LITERATURE: ROMAN STOICISM AND EPICUREANISM.
114-414D. SENIOR LATIN LITERATURE: CICERO'S SPEECHES AND LETTERS.
114-415D. SENIOR LATIN LITERATURE: THE MIND OF ROME.
114-416D. SENIOR LATIN LITERATURE: ROMAN COMEDY.
114-419D. SENIOR LATIN LITERATURE: LATIN OF THE SILVER AGE.
114-420D. SENIOR ANCIENT GREEK LITERATURE: GREEK COMEDY.
114-421A. SENIOR ANCIENT GREEK LITERATURE: HOMER.
114-423D. SENIOR ANCIENT GREEK LITERATURE: GREEK ORATORS
114-424D. SENIOR ANCIENT GREEK LITERATURE: GREEK TRAGEDY.
114-425D. SENIOR ANCIENT GREEK LITERATURE: GREEK PHILOSOPHY.
114-426D. SENIOR ANCIENT GREEK LITERATURE: GREEK PHILOSOPHY.
114-427D. SENIOR ANCIENT GREEK LITERATURE: GREEK LYRIC POETRY.
114-428D. SENIOR ANCIENT GREEK LITERATURE: READINGS IN PLATO.
114-429D. SENIOR ANCIENT GREEK LITERATURE: GREEK HISTORIANS.
114-431A. SENIOR MODERN GREEK READING COURSE.
114-432B. SENIOR MODERN GREEK READING COURSE.
114-433D. SENIOR MODERN GREEK READING COURSE.
114-434D. SENIOR MODERN GREEK READING COURSE.
114-436D. SENIOR MODERN GREEK LITERATURE.
114-437D. PURIST MODERN GREEK.
114-473A. GREEK AND ROMAN RELIGIOUS IDEAS.
114-474B. GREEK RELIGIOUS PRACTICES.
114-477A. GREEK AND ROMAN LITERARY CRITICISM.
114-478B. ROMAN COMEDY AND HUMOUR.

EAST ASIAN LANGUAGES AND LITERATURES (117)

3434 McTavish Street, Tel. 4280.

General Information

The Chinese language courses introduce both traditional characters as well as the simplified characters used in the People's Republic of China. Textbooks used are published in China, and supplemented by teaching materials prepared by the departmental staff.

During the academic year 1974-75, three levels of Japanese language will be introduced. Japanese literature courses in translation will be offered for students who are interested in Japanese literature but unable to read Japanese.

It is hoped that students majoring in East Asian Studies will enrol in the language courses in addition to any other students interested in learning the language.

In order to accelerate language proficiency and to approximate a "total immersion" approach, cultural activities are organized by the department and the students, including luncheons where conversation is conducted in Chinese and Japanese.

Course Descriptions

117-210D. FIRST LEVEL CHINESE. (6 credits.) Introduction to the use of modern Chinese language (Mandarin), including instruction in basic grammar and patterns, with emphasis on speaking and pronunciation. Direct methods, as well as film-strips and tape recordings are used for audio-lingual achievements. MRS. WANG

117-211D. INTRODUCTION TO CONVERSATIONAL CHINESE. (6 credits.) This course is designed for students with some background in the Chinese written language, who wish to perfect their ability to speak Chinese. MS. CHANG

117-220D. SECOND LEVEL CHINESE. (6 credits; *Prerequisite:* Chinese 117-210D or Chinese 117-211D or the equivalent.) A continuation of Chinese 117-210D with more advanced study of Chinese language in both aspects of reading and conversation: grammar, vocabulary building and writing practice. Basic literary structures will be introduced, permitting the students to become familiar with the literature. MRS. WANG

117-201D. INTRODUCTION TO CHINESE LITERATURE. (6 credits; *Prerequisite:* Chinese 117-210D or 211D or permission from the instructor.) A survey of the historical background of Chinese literature and the evolution of literary forms and styles in Chinese from the Confucian period to modern times.

117-310D. THIRD LEVEL CHINESE. (6 credits; *Prerequisite:* Chinese 117-220D or the equivalent.) Based upon the literary level achieved in Chinese 220D, more advanced texts will be studied including original materials. Further examination of Chinese compounds and sentences with special emphasis on syntax explanation. MS. CHANG

117-410D. FOURTH LEVEL CHINESE. (6 credits; *Prerequisite:* Chinese 117-310D or the equivalent.) Emphasis is on reading skills and writing ability in addition to free discussion. Materials studied include original texts from Chinese literature, drama, government documents and newspapers. MS. CHANG

117-205D. HISTORY OF JAPANESE LITERATURE. (6 credits.) A survey of the historical background of Japanese literature up to the contemporary period. Students are referred to translated texts, and knowledge of Japanese is not required.

117-215D. FIRST LEVEL JAPANESE. (6 credits.) Introduction to the basic grammar and sentence patterns of the Japanese language, in both oral and written forms. In reading and writing skills, students will be introduced to *katakana* and *hiragana,* and approximately 500 of *kanji.*

117-216D. SECOND LEVEL JAPANESE. (6 credits; *Prerequisite:* 117-215D or the equivalent.) Continuation of the study of oral and written Japanese. More complex sentence structures, the use of *keigo,* and approximately 500 more *kanji* will be introduced.

117-315D. THIRD LEVEL JAPANESE. (6 credits; *Prerequisite:* 117-216D or the equivalent.) More advanced study of the Japanese language. Emphasis will be placed on practice in conversation and composition. On completion of the course, students will have learned all of the *toyo kanji.*

117-305D. CONTEMPORARY JAPANESE LITERATURE. (6 credits.) Discussion of creative writings by several representative authors, using both translations and original texts. Some knowledge of the Japanese language is desirable, but not required.

117-405D. ADVANCED TOPICS IN JAPANESE LITERATURE. (6 credits. *Prerequisite:* 117-305D or the equivalent.) Consideration of selected topics and aspects of Japanese literature. The content of the course may vary from year to year, ranging from contemporary, modern to pre-modern literature.

ECONOMICS (154)

Stephen Leacock Building, Room 434,
Telephone 392-5239

Honours Programs

All Honours students must be registered by the Departmental Honours Adviser at the beginning of each year of their Honours program. An Honours student is not permitted to register for a general course where a parallel Honours course is offered. Honours students in economics are expected to take a minimum of 42 credits in approved economics courses over the three years of their program. These generally include 154-250D, 154-350D, 154-352D, 154-357D and 154-450D.

The Economics Honours program is offered to both B.A. and B.Com. students. There are two basic streams of study: economics and economic history. The economics stream allows for specialization in various fields in economics, such as labour, international trade, money and banking, development, etc.

Honours Standing

Students who wish to enter Honours in their U2 year must show evidence of adequate preparation.

To remain in Honours, a student must obtain an A or B in 154-250D and a 3.0 average in the Honours subjects. An Honours student is expected to maintain a G.P.A. of 3.0 in all his subjects.

A U1 student who narrowly missed the stay-in-Honours criteria stated in the preceding paragraph, may apply for "redemptive" status for his U2 year. If granted, the student is not registered in Honours, but may take Honours courses. If his progress is acceptable, he may be readmitted to Honours in the U3 year.

The Honours standing awarded on graduation is determined by the results of the final year in conjunction with the student's entire record.

Mathematics

Much of the modern literature in Economics makes use of mathematical techniques. To enable honours students to work effectively with this literature, we recommend that during their program our students master as much as possible of the material taught in the following courses (or their equivalents).

189-120A or B — Calculus I
189-121A or B — Calculus II
189-245A or B — Linear Algebra

U1 YEAR

Economics: 154-250D, 154-357D* (Mathematics 189-120A, B and 189-121A, B).

Economic History: 154-241D, 154-250D, 154-357D* (Mathematics 189-120A, B and 189-121A, B).

U2 YEAR

Economics: 154-350D, 154-352D, 154-357D* (Mathematics 189-245A and 189-246B).

Economic History: 154-350D, 154-352D, 154-357D*, one of 154-311D, 154-341A and 154-331A, 154-401A and 154-411B.

U3 YEAR

Economics: 154-450D.

Other Economics courses approved by the Honours Adviser.

( ) — Recommended optional course.

* — May be taken in U1 or U2.

Joint Honours

Joint Honours between Economics and various other departments in the Faculty of Arts exist. As a general rule, a Joint Honours involving Economics requires a minimum of thirty credits from approved courses in Economics. These include 154-250D, 154-350D, 154-352D, 154-357D and 154-450D.

The Major Program

The Major Program in Economics is a planned sequence of courses designed to permit the student a degree of concentration in economics. It consists of 54 credits in courses approved by the Majors Committee of the Economics Department.

A student choosing a Major in Economics must take at least 36 credits of economics in addition to Economics 200D or its equivalent. The economics courses will be selected from the courses shown below.

A. **Prerequisite**
Economics 200D *or* its equivalent: Introductory (University) Economics.

B. **Required Courses** (12 credits)
Economics 300A — Intermediate Microeconomics.
Economics 310B — Intermediate Macroeconomics.
Economics 317D — Economic Statistics, for Arts students
or
Economics 370D — Business Statistics.

C. **Economics Elective Courses:** At least 24 credits from other 200, 300 and 400 level courses.

D. **Other Approved Courses:**
In addition to the minimum of 36 credits in Economics, the student will choose a total of 18 credits from *two* of the following fields:

Anthropology
Economics
French Canada Studies
Geography
History
Mathematics
Philosophy
Political Science
Psychology
Sociology

All students who wish to begin (or continue) a Major *must* register with the Majors Committee in the Department of Economics prior to general registration in *each* of their university years. Further information may be obtained from Professor C. Green, Leacock 828 392-5217.

Course Descriptions

Supplementary Information: This calendar is prepared early in the year and so is likely to need modification by the time the academic year begins. A mimeographed supplement is available at the departmental office in September and should be consulted prior to registration with the Honours or Major advisers.

Economics 200D or 250D is normally a prerequisite for all 300 and 400 level courses in Economics. Students whose previous training is deemed adequate for taking specific courses at the 300 or 400 level may be exempted by the instructor. A departmental representative will be available to advise students and program advisers in other departments on individual course prerequisites.

*Denotes a course not offered in 1974-75.

154-200D. INTRODUCTORY (UNIVERSITY) ECONOMICS. (6 credits.) A University level discussion of price theory, national income determination, money and banking, international trade theory and economic policy. The course will be given in several sections. Sections will be designed to accommodate students with varying backgrounds in economics. PROFESSORS FENICHEL, DAVENPORT AND NAYLOR

154-201D. INTRODUCTION TO EUROPEAN ECONOMIC HISTORY. (6 credits.) A survey course in western economic history from classical times to the twentieth century. The course will consider the evolution of economic institutions and the process of economic growth. Topics covered include demographic change, agrarian institutions, financial and industrial organization, technological change and the expansion of trade and markets.
PROFESSOR GRANTHAM

154-205D. AN INTRODUCTION TO APPLIED POLITICAL ECONOMY. (6 credits.) The concept of the corporation, the economics of crown corporations, the multi-national firm, resources policy and economic development of Quebec. PROFESSOR KIERANS

154-211D. INTRODUCTION TO CANADIAN ECONOMIC HISTORY. (6 credits.) A survey of the economic basis of Canadian history from the French regime to the twentieth century, with a view to examining the historical roots of contemporary problems of the Canadian economy and society. The structure, role and evolution of economic institutions are stressed. PROFESSOR NAYLOR

154-241D. THE INTERNATIONAL ECONOMY SINCE 1850. (6 credits.) The effect of economic change in Britain, France, Germany, and the United States on their role in the world economy and on the economic relations between nations. PROFESSOR WRIGHT

154-250D. INTRODUCTION TO ECONOMIC THEORY. (6 credits.) The standard topics covered in an intermediate level microeconomic course — theory of exchange; theory of consumer behaviour; theory of production and cost curves; theory of the firm; theory of distribution; general equilibrium; welfare economics — will be dealt with in the course. The assumptions underlying the traditional neoclassical approach to economic theory will be carefully specified and alternative theoretical approaches will be considered.
PROFESSOR WELDON

154-300A. INTERMEDIATE ECONOMIC THEORY. (3 credits.) Microeconomics: Analysis of price determination in a market economy, problems of economic efficiency and market structures. PROFESSOR ITON

154-301B. THE MODERN ECONOMIC HISTORY OF SOUTH ASIA. (3 credits; *Prerequisite:* 154-200D or 154-201D or 154-250D or consent of instructor.) PROFESSOR WRIGHT

154-302D. MONEY AND BANKING. (6 credits.) Principles of money, banking, and central banking covering the nature of money, measurement of money supply, determination of the quantity of money; sources of bank funds, uses of bank funds; nature of central banking, monetary policy, and the international payments system.
PROFESSOR GALBRAITH

154-304D. CANADIAN ECONOMIC POLICY. (6 credits.) Analysis of selected topics in a Canadian setting The separation of analytical, empirical and ethical questions in policy making is emphasized. PROFESSOR DEUTSCH

154-305D. GOVERNMENT AND BUSINESS. (6 credits.) A study of the structure and performance of industrial markets, with particular emphasis on the problems of maintaining effective competition. Experience in Canada and other countries will be examined. Readings will cover leading law cases, as well as relevant economic literature.
PROFESSOR GREEN

154-306D. LABOUR ECONOMICS AND INSTITUTIONS. (6 credits.) Part A: Quantitative and qualitative characteristics of the Canadian labour force; evolution of the industrial relations system; history and structure of the labour movement; theories of the labour movement, elements of labour law. Part B: Employment and unemployment; manpower policy; wage theory; collective bargaining and public policy; income distribution and problems of poverty; current policy issues. PROFESSOR SODERSTROM

This is a prerequisite course to 154-426D and 279-492D except in the case of Honours students.

154-307D. BUSINESS STATISTICS. (6 credits; 154-200D or 154-250D is not a prerequisite — for differences between 154-307D and 154-317D, see note attached to 154-317D.) Distributions, averages, dispersions, sampling, testing, estimation, correlation, regression, index numbers, trends and seasonals.

154-310B. INTERMEDIATE ECONOMIC THEORY. (3 credits.) Macroeconomics: Analysis of economic stability; national income determination, economic fluctuations and growth, monetary and fiscal policy. PROFESSOR GRANTHAM

154-311D. NORTH AMERICAN ECONOMIC DEVELOPMENT. (6 credits; *Prerequisite:* any Economics 200 level course.) A study of economic growth and institutional change in Canada and the United States with emphasis on the period since 1880. Topics include: comparative economic growth; big business and foreign investment; the National Policy and the wheat economy in Canada; the Great Depression; economic nationalism in Canada and Quebec; historical analysis of the "welfare state". PROFESSOR DAVENPORT

154-312D. POLITICAL ECONOMY OF DEPENDENCE IN THE WESTERN HEMISPHERE. (6 credits.) A comparative study of contemporary economic structures in the 'peripheral' economies of Canada, the Caribbean and Latin America — with special emphasis on Canada and its constituent regions. The legacy of European colonization; trade and investment; operations of multinational corporations; preferences, common markets and foreign aid; the new economic nationalism of the western hemisphere.
PROFESSOR LEVITT

154-313D. ECONOMIC DEVELOPMENT. (6 credits.) The economics of structural change in developing countries. An examination of the applicability of economic theory in the context of development. Historical patterns of economic change in the developing world; economic planning; role of international trade and foreign aid in economic development; techniques of evaluating development projects; interdisciplinary problems of development.
PROFESSORS KURIEN (1st term) and ITON (2nd term)

154-314B. AFRICAN ECONOMIC DEVELOPMENT. (3 credits; *Prerequisite:* 154-200D or 154-250D or consent of instructor.) An analysis of the processes of economic growth in tropical Africa. Special emphasis will be placed upon natural resources, population, infrastructure, agriculture, trade and aid, the role of government and the parastatal institutions. The course is especially recommended to students enrolled in the African Studies Program, and for those wishing to continue in development economics.
PROFESSOR SMITH

154-315B. ECONOMIC DEVELOPMENT OF CHINA. (3 credits.) A consideration of economic change in China since 1949. Emphasis is on the approach China has taken to development, its success in solving problems in various sectors of the economy and a comparison with approaches to development used in other countries.
PROFESSOR WRIGHT

154-317D. ECONOMIC STATISTICS. (6 credits.) Distributions, averages, dispersions, sampling, testing, estimation, correlation, regression, index numbers, trends and seasonals. PROFESSOR BEACH

NOTE: 154-307D is primarily for Commerce students and 154-317D is primarily for Arts and Science students and Macdonald College students.

***154-327A. POPULATION ANALYSIS IN DEVELOPMENT ECONOMICS.** (3 credits; *Prerequisite:* any course in Development Economics.) A review of theories of population growth, past trends and forecasts. Analysis of population change in developing countries, mortality, fertility, and migration. A study of interrelations between population growth and economic development in these less-developed economies.

154-331A. THE ECONOMIC DEVELOPMENT OF RUSSIA AND THE USSR. (3 credits; *Prerequisite:* 154-200D or equivalent, or consent of the instructor.) An historical and analytical study of the special features of Russian economic development, mainly since 1890. PROFESSOR WRIGHT

154-341A. THE ECONOMIC HISTORY OF CHINA AND JAPAN, MAINLY FROM 1840 TO 1949. (3 credits.) A survey of the economic histories of China and Japan to the mid-20th century, emphasizing the factors underlying their contrasting economic patterns.
PROFESSOR M. F. LOUTFI

154-350D. HISTORY OF ECONOMIC THOUGHT. (6 credits.) A critical study of the writings of the great economists, with particular reference to the period from Adam Smith to the present day.

154-352D. MACROECONOMICS. (6 credits.) A rigorous treatment of basic macroeconomic theory, emphasizing the Classical and Keynesian ideas, for the short-run determination of output, employment, interest rates and prices in the economy. Elements of International Economics, Money and Banking and Growth Theory. The Structure of the Canadian Economy. PROFESSOR WURZBURGER

154-357D. ECONOMIC STATISTICS. (6 credits.) Stochastic phenomena; probability and frequency distributions, introduction to probability theory. Statistical inferences about proportions, means and variances; analysis of variance; non-parametric statistics; index numbers and time series; economic forecasting; regression and correlation analysis; introduction to the general linear economic models; its uses and limitations; uses and misuses of statistics; Canadian economic statistics.

154-367D. MATHEMATICAL ECONOMICS. (6 credits.) A mathematical treatment of basic economic theory.

154-400D. ECONOMIC ANALYSIS. (6 credits.) Analysis of the economic problems of the firm; the determination of the demand curve; the forecasting of demand; the measurement of costs; pricing problems in various types of markets; the determination of optimum policies for such matters as advertising, packaging and premiums. New theories of business behaviour will represent a substantial part of the course.

154-401A. SEMINAR IN ECONOMIC HISTORY. (3 credits. *Prerequisites:* 154-200D or 154-205D or 154-211D.)
STAFF

154-402A. ECONOMIC HISTORY OF LATIN AMERICA. (3 credits.) The historical evolution of economic institutions in Latin America and the effect of that evolution on the economic development of that region from pre-colonial times through the end of World War II.

154-403B. ECONOMIC DEVELOPMENT IN LATIN AMERICA. (3 credits.) An analysis of the process of structural change and development of the Latin American economies since 1945.

154-404D. TRANSPORTATION. (6 credits.) History and development of the Canadian transportation system: economic characteristics of the various transportation media; comparative analysis of cost and rate structures; problems of regulation and control.
MR. ROMOFF

154-408D. PUBLIC FINANCE. (6 credits.) The provision of social goods, benefits and costs of public expenditures, the revenue structure in Canada, attempts at tax reform, the Carter Commission, incidence of various taxes, effects on growth and employment, debt management and federal-provincial fiscal arrangements. PROFESSOR KIERANS

154-409D. INVESTMENT ANALYSIS AND CORPORATION FINANCE. (6 credits.) Part I — Investment; capital markets; investment funds; securities; concepts of income, risk, value and appreciation; analysis of financial statements; stock market; investment policy. Part II — Forms of business organization; growth of the corporation; the managerial revolution; sources of funds; management of fixed and working capital; ratio analysis; expansion, reorganization and valuation. PROFESSOR BRIANT

154-411B. SEMINAR IN ECONOMIC HISTORY. (3 credits. *Prerequisites:* 154-200D or 154-205D or 154-211D.) In 1974-75 the topic will be the Quebec economy in the 20th century. An historical study of industrialization and social change, with emphasis on Quebec's role in Confederation and the North American economy. Reading knowledge of French is recommended. STAFF

154-421D. COMPARATIVE ECONOMIC SYSTEMS. (6 credits; *Prerequisite:* 154-200D or 154-250D or consent of instructor. It is desirable, but not required, that students should have taken 154-331A and 154-341A.) A comparative study of the economic systems of contemporary states. PROFESSOR FENICHEL

154-423D. INTERNATIONAL TRADE AND FINANCE. (6 credits; for Majors students.) Theoretical and policy approaches to the study of international economic relations. Topics examined include: pure trade theory; tariff theory and policy; customs unions among advanced and among less-developed countries; relationship between trade and growth in theory and reality; balance of payments accounts, adjustment, and interaction with the domestic economy; international monetary institutions and their reform; the role of foreign trade in socialist economies. PROFESSOR M. F. LOUTFI

154-425B. ECONOMICS OF ECOLOGY. (3 credits.) A study of the application of economic theory to the problems of ecology. Particular attention will be given to the measurement and regulation of pollution, congestion and waste and other environmental aspects of specific economies.

154-426D. LABOUR ECONOMICS. (6 credits; *Prerequisite:* 154-306D or consent of instructor.) The supply of labour, unemployment theories, the impact of technology on employment and unemployment, government employment and manpower policies, wage level changes, wages policy, the economics of education, social security legislation.

154-450D. ADVANCED ECONOMIC THEORY. (6 credits.) Selected topics in economic theory from recent periodical and monograph literature. Information on the topics to be covered can be obtained from the Department before registration. PROFESSOR WELDON

154-453D. INTERNATIONAL ECONOMIES. (6 credits; for Honours students.) Analysis of the nature, effects and policy implications of international trade and finance. Topics receiving special emphasis will include: the pure theory of trade; the balance of payments and alternative exchange-rate systems; the terms of trade; the foreign-trade multiplier; regional integration; trade policy in developed and developing countries; problems of international liquidity and investment. PROFESSOR ITON

154-454A. CURRENT ECONOMIC PROBLEMS. (3 credits.) A discussion of contemporary economic issues.

154-455B. VALUES, INSTITUTIONS AND ENVIRONMENT IN ECONOMICS. (3 credits.) A critical examination of the scope and method of economics, of the philosophical and value underpinnings of economic theory, and the influence of institutions and environment on 'economic' phenomena. Particular attention will be given to the works of writers who have dissented from the 'mainstream' of economics.

***154-457B. LINEAR PROGRAMMING AND INPUT-OUTPUT ANALYSIS.** (3 credits; *Prerequisite:* consent of the instructor.) National Economic Accounting, including input-output, and flow of funds accounts. Analytical uses relating to the impact of public and other expenditures on incomes, imports, savings, employment, etc.

154-458D. MONEY AND BANKING. (6 credits.) An advanced undergraduate treatment of selected topics in money and banking, including the theory and practice of monetary policy.

154-467D. ECONOMETRICS. (6 credits; *Prerequisite:* 154-357D or consent of instructor.) Special emphasis on statistical tests of economic theories, the construction of econometric models, and problems in estimation methods.

154-468A. URBAN AND REGIONAL ECONOMICS. (3 credits.) This course is meant to be an introduction to location theory and to urban and regional economics. Its purpose is also to teach some elementary tools of analysis to people intending to do research, applied or pure, in this field. PROFESSOR MARTIN

154-480A. RESEARCH PROJECT. (3 credits; *Prerequisite:* open to U3 students.) Students may undertake a research project under close supervision. They must also do such special reading and research as their advisers may direct.

154-481B RESEARCH PROJECT. (3 credits; *Prerequisite:* open to U3 students.) Students may undertake a research project under close supervision. They must also do such special reading and research as their advisers may direct.

The following courses have been given Faculty of Management numbers, but are the same courses that for many years were part of the program in Economics. They continue to have the same place in the program in the department that they earlier had, and can be taken on exactly the same terms as when they were courses with Department of Economics numbers. Where appropriate to a student's program, and with the permission of the program adviser, one or more of these courses may be taken for credit by students enrolled in programs in Economics. 279-293D may be taken for credit by students in the Industrial Relations Major, but not as an elective for students taking a Major in Economics.

279-293D. INTRODUCTION TO INDUSTRIAL RELATIONS. (6 credits; 154-200D or 154-250D is not a prerequisite. This course may not be taken as an elective for students taking a Major in Economics. However it may be taken for credit by students in the Industrial Relation Majors Program.) An introduction to the problems of employer-employee relations, including analysis of the personnel function, the structure, function and government of the modern trade union movement, labour legislation, and the state function and public interest in industrial relations. PROFESSOR BAIRSTOW

279-394B COLLECTIVE BARGAINING. (3 credits; *Prerequisite:* 154-200D.) This course is designed for those students who wish to study principles in collective bargaining in Canada and abroad. It deals with the structure of the bargaining parties and the structure of bargaining itself. It is problem oriented and will rely heavily on empirical data and case problems. PROFESSOR WOODS

279-491D. INDUSTRIAL RELATIONS IN PRACTICE. (6 Credits; Compulsory for fourth year Industrial Relations Majors. Others by permission of the instructor.) Students in this course will be encouraged to come to grips with a wide range of problems in industrial relations theory, policy and practice. This is achieved by means of guided reading and small discussion groups, mock collective bargaining sessions, contact with practitioners in the field and problem oriented research assignments. PROFESSOR GOLDENBERG

279-492D. PUBLIC POLICY IN INDUSTRIAL RELATIONS. (6 credits; *Prerequisite:* 154-306D.) Collective bargaining and public policy towards industrial relations. Emphasis will be placed on recent public investigations into labour relations in the federal and provincial jurisdictions; international comparisons will be included. PROFESSOR WOODS

EDUCATION (413)

See the separate *Announcement of the Faculty of Education* for complete information about courses leading to the Bachelor of Education degree.

The course below is offered by members of the staff of the Faculty of Education as a subject for the B.A. or B.Sc. degree. This course does not lead to a teaching diploma.

413-402D. COMPARATIVE EDUCATION. (6 credits; Open to students in their Third and Fourth years.) A study and comparison of recent educational developments in England, France, Germany, the Soviet Union, and the United States. PROFESSOR LIPKIN

ENGLISH (110) (Formerly 120)

Departmental Office: Room 155, Arts Building, Telephone 392-4987.

The Department of English divides its activities into three options: literary studies, drama, and film and communications. With the exception of the Honours tutorials, all courses in all streams are open to McGill students, irrespective of the Honours or Major programs in which they are enrolled. Honours and Major students in English concentrate in one option, but are required to become acquainted with each of the others.

In literary studies (Option I) the department offers a considerable diversity of courses in the various historical periods of English literature, in Canadian literature, American literature, Caribbean and African literatures in English, the various literary genres, creative writing, literary criticism, stylistics and the linguistic structure of English. While members of the department are engaged in study and research in all of these areas, the Department has come to be regarded as having certain specific strengths, particularly in literary theory, comparative literature, and Renaissance literature. In conjunction with other Montreal universities, there is also considerable activity in the field of Mediaeval literature.

In addition to the study of dramatic literature as a genre, it is possible to pursue undergraduate studies in dramatic theory and various aspects of drama in production (Option II). The Drama Program tries to place its subject in as broad a social and philosophical context as possible. Students are encouraged to include in their studies the maximum number of Humanities, Social Sciences, and Fine Arts classes. The Drama and Theatre Major then chooses his specialized classes from a series of courses in dramatic literature, theatre history, aesthetics and dramatic criticism, acting, stagecraft, design and theatre technology. From year to year classes are also given in special interest areas when student demand is sufficient.

The Study of Communications (Option III), while located in the Department of English, intersects with many other academic disciplines, including fine arts, sociology, psychology, and linguistics. Such an approach means that the student must take a wide variety of courses in English and in other disciplines associated with this study.

A foundation for study of Communication is a concentration on human language, its systemization in linguistics and philosophy, and its extension in social interaction. But the study of Communication includes, as well, the whole range of non-verbal signs, their perceptual basis in biology and psychology, and their function in aesthetic and social contexts. It includes the technological extensions through which such signs may be disseminated and transformed, as well as those larger conceptual structures or myths which enable them to be seen as signs at all.

Major Programs in English

The Major program in English combines both a concentration and a distribution of study. A student majoring in English will normally concentrate his work in one of the three options. In each case, the Major program consists of 54 credits, but the distribution of work in each of the options varies somewhat. *Students are advised to consult the Departmental Handbook for the specific regulations which apply to the various options in the major program.*

OPTION I — LITERATURE

The Major program in Literature (Option I) requires the student to gain a wide acquaintance with the field of literary study. Work is normally distributed among at least three of four categories of courses: periods and national literatures; major authors; literary theory and criticism, and genre, theme and style. In addition to this required distribution, students may elect to pursue a concentration in one of those areas, and all students in Option I must take at least six credits in Option II (Drama) and six in Option III (Film and Communications). Six of the 54 credits may be taken, with permission, in a discipline other than English.

OPTION II — DRAMA AND THEATRE

Students in the Drama and Theatre option may concentrate their studies in either Drama *or* Theatre. Those opting for the former area devote more attention to the literary and theoretical aspects of the subject, while those selecting the latter include more practical classes in their programs. All students must, to some extent, combine both practical and theoretical work.

The Drama and Theatre curriculum is not designed to provide professional theatre training. Our aim is rather to permit students to explore the subject as a Liberal Arts discipline.

In consultation with their faculty advisers, students select a minimum of 54 credits in English. Twelve of these must be chosen from the Literature and Communications options while the rest are drawn from Drama and Theatre offerings in the following areas: Dramatic Literature, Theatre History, Theatre Aesthetics and Dramatic Criticism, Acting, Directing, and Theatre Practice. Classes are also given in special interest areas from year to year. At least two public productions are staged annually.

OPTION III — COMMUNICATIONS

The study of Communications cuts across many disciplines, such as English, Fine Arts, Sociology, Psychology, Drama and Linguistics. It is founded on concepts of interpersonal relationships — in whatever disciplines they may traditionally have been studied.

Such an approach to the study of Communications means that the student must take a wide variety of courses in English as well as outside the English

Department. The goal of the Option III major is an interdisciplinary, not simply a multidisciplinary study, with emphasis on the integration of diverse approaches to the problems of human communication.

Of the 54 credits required for the completion of an Option III major program, at least 12 credits must be drawn from the literature and/or drama options of the English Department. The remaining 42 credits are chosen in consultation with an adviser, and include courses in English and allied subjects.

Honours Programs in English

The Honours Program is characterized by a sequence of tutorials and by the pursuit of a program exhibiting sufficient range and comprehensiveness in depth and breadth within one of the options of Literature, Drama, or Film and Communications, together with some familiarity with the work carried on in each of the other options.

The Honours Program, therefore, requires a minimum of 60 credits within the Department, carried on under the supervision of the Honours Program Committee, which the student must satisfy with respect to the rationale and comprehensiveness of his total program of courses within and outside the Department.

The Honours Committee will review the student's program each year, to determine that it shows sufficient range, depth, breadth and comprehensiveness.

LITERATURE CORE. The Literature core will require the student to show sufficient distribution of program to indicate he or she has pursued work in the major literary types, the study of a writer or author or creator in depth, some familiarity with literary themes, traditions, etc., all within the context of showing a sufficient distribution of study across the periods of human history, such as (i) Mediaeval, (ii) Renaissance, (iii) Enlightenment, (iv) Romantic, (v) Modern. Some of these distributional requirements may be met by work in other Departments in the Faculty of Arts, such as History, Fine Arts, or another literature; but at least ten courses normally must be taken within the Department.

DRAMA. The Drama core will require the student to pursue work in theatre history, and in theatre aesthetics — all within the context of historical distribution represented by Classical, Mediaeval, Renaissance, Enlightenment, Romantic and Modern. The student will be required to show sufficient distribution within the program to indicate he or she has pursued work in the major dramatic types, the study of an individual dramatist in depth, some familiarity with dramatic forms, traditions, and so on, and has gained knowledge of the ways and means of dramatic expression in practice, through voice, gesture, movement, production problems, etc. Some of these distributional requirements may be met by work in other Departments in the Faculty of Arts, such as History, Fine Arts, or another literature; but at least ten courses normally must be taken within the Department.

FILM AND COMMUNICATIONS. The student will be required to pursue a basic program of extra-Departmental courses in Linguistics, Sociology, Fine Arts, and Psychology, as well as as courses in Communications and Film History and Aesthetics within the Department. In this program, the student must demonstrate that he is familiar with the major types of media, the study of an individual dramatist, film producer, or creator in some depth, and a knowledge of the evolution of communicational modes through history by showing a sufficient distribution across the periods delineated above.

HONOURS TUTORIALS

All Honours students whatever their core will be required to pursue one of two sequences of Honours tutorials that will deal with the various theories, concepts, and tools required in the examination of written texts, presentations, productions and the like.

110-290D. Archival and Informational Skills *or* 110-294D Bibliography and Textual Study.

110-390D. Linguistic or Symbolic Analysis *or* 110-394D Approaches to Literature; Drama and Film.

110-490D. Historical Analysis *or* 110-494D History of Literary Theory and Criticism and Aesthetics.

(Students may follow 290D or 294D with either 390D or 394D; but once opting for 390D they must follow with 490D, and for 394D with 494D.)

ADMISSIONS

Any U-1 student may indicate an intention to pursue an Honours program but his admission becomes final only in the U-2 year. Admission to U-2 is based on his having an *overall standing of 'B'* in the year's work and an average of 'B' in all his English courses as well as a recommendation from individual instructors. Since the program may be limited to as few as 25-40 students (though its size will be determined by staff) not all students opting for entry into Honours may be able to do so.

Students electing Honours in the U-1 year must take one of two tutorials (290D or 294D) described above. They also must register in sufficient English courses to provide for the development of an appropriate core program in Literature, Drama or Film and Communications.

JOINT HONOURS PROGRAM

Joint Honours programs in English and various disciplines in the Faculty of Arts are available to qualified students. From the point of view of the Department of English, students in such programs are required to complete one of the tutorial sequences described above (see *Honours in English*). The remainder of each student's program is arranged to suit the particular circumstances and interests involved in consultation with an adviser and the Honours Committee. Admission to this program is quite limited.

FURTHER INFORMATION RELATING TO DEPARTMENTAL PROGRAMS AND DETAILED DESCRIPTIONS OF COURSES MAY BE OBTAINED AT THE ENGLISH OFFICE, ROOM 155, ARTS BUILDING.

ENGLISH LITERATURE ASSOCIATION

The English Literature Association (an association of all students taking courses in the Department of English) publishes a guide to English courses, which is available either in the English office or in Room B-20, Arts Building.

TABLE OF ENGLISH DEPARTMENT COURSES

NOTE 1: ENGLISH DEPARTMENT COURSES HAVE BEEN EXTENSIVELY RENUMBERED. WHERE THIS HAS TAKEN PLACE, THE FORMER NUMBER OF THE COURSE IS INDICATED IN PARENTHESIS. STUDENTS WHO PRIOR TO 1974-75 TOOK SUCH COURSES UNDER THEIR OLD NUMBERS MAY NOT RE-TAKE THEM UNDER THEIR NEW NUMBERS.

NOTE 2: COURSES MARKED WITH A STAR (*) WILL NOT BE GIVEN IN THIS ACADEMIC YEAR.

COURSE DESCRIPTIONS

INTRODUCTORY COURSES

110-100D. ENGLISH LITERATURE AND COMPOSITION. (6 credits.)

200-LEVEL COURSES

***110-200A. SURVEY OF ENGLISH LITERATURE I.** (3 credits.) A general introduction to English Literature to the Restoration.

*110-201B. **SURVEY OF ENGLISH LITERATURE II.** (3 credits.) A general introduction to English Literature from the Restoration to the present.

110-208A. **THE ENGLISH NOVEL OF THE 19TH CENTURY I.** (3 credits.) A study of representative novelists of the earlier 19th century. PROFESSOR BRUCE

110-209B. **THE ENGLISH NOVEL OF THE 19TH CENTURY II.** (3 credits.) A study of representative novelists of the later 19th century. PROFESSOR BRUCE

110-210D (120-214D). **ENGLISH POETRY OF THE 19TH CENTURY.** (6 credits.) A survey course of 19th century English poetry. PROFESSOR SIMON

*110-213A (120-218A). **POETRY OF THE 20TH CENTURY I.** (3 credits.) A critical survey of major British and North American poetry.

*110-214B (120-219B). **POETRY OF THE 20TH CENTURY II.** (3 credits.) A critical survey of major British and North American poetry.

110-215A,B (120-212A,B). **INTRODUCTION TO SHAKESPEARE I.** (3 credits.) Introduction to Shakespeare's plays. PROFESSORS RIPLEY AND BRISTOL

110-216B (120-211B). **INTRODUCTION TO SHAKESPEARE II.** (3 credits.) (Prerequisite: 215A or 215B, or consent of the instructor.) A continuation of 215A,B. PROFESSOR FRYE

110-225A (120-230A). **AMERICAN LITERATURE I.** (3 credits.) A study of the literary works of earlier American writers. In 1974-75, from the Puritans to 1850. PROFESSOR RUBIN

110-226B (120-231B). **AMERICAN LITERATURE II.** (3 credits.) A study of the literary works of later American writers. In 1974-75, from 1850 to 1910. PROFESSOR RUBIN

110-228A. **CANADIAN LITERATURE I.** (3 credits.) Introduction to Canadian literary writing in English. In 1974-75, the emphasis will be on poetry, mainly from the 19th and 20th centuries. PROFESSOR LAFON

110-229B. **CANADIAN LITERATURE II.** (3 credits.) Introduction to Canadian literary writing in English. In 1974-75, the emphasis will be on prose writing, particularly of the 20th century. PROFESSOR LAFON

*110-230D (120-210D). **AN INTRODUCTION TO DRAMA.** (6 credits.) A survey of major types and authors of Western Drama.

*110-235A. **TRAGEDY.** (3 credits.) A study of tragedy as genre and mode in drama and fiction.

110-236A. **COMEDY I.** (3 credits.) A study of comedy through the examination of representative texts. In 1974-75, earlier English stage comedy. PROFESSOR CECIL

110-237B. **COMEDY II.** (3 credits.) A study of comedy through the examination of representative texts. In 1974-75, later English stage comedy. PROFESSOR CECIL

110-245D. **BACKGROUNDS TO ENGLISH LITERATURE.** (6 credits.) English Literature and the evolution of Western civilization. PROFESSOR ROBINSON

110-246D. **ENGLISH LITERATURE AND FOLKLORE.** (6 credits.) A study of representative texts of English Literature in relation to their background in folk tradition. PROFESSOR PUHVEL

110-248D (120-221D). **THE GREAT WRITINGS OF EUROPE, 1550-1850.** (6 credits.) An analysis of representative works of European Literature to 1850. PROFESSOR ROBINSON

110-251D. **ANGLO-SAXON LITERARY CULTURE.** (6 credits.) Old English literature in translation; its social and cultural milieu and language. PROFESSOR CONWAY

110-252A, B (120-233A, B). **THE STRUCTURE OF THE ENGLISH LANGUAGE.** (3 credits.) a linguistic study of the English language. STAFF

110-253A,B (120-234A,B). **THE HISTORY OF THE ENGLISH LANGUAGE.** (3 credits.) (Prerequisite: English 252A,B or Linguistics 200A,B.) A linguistic study of the English language. STAFF

110-254A,B (120-238A,B). **THE ENGLISH LANGUAGE AND THE STUDY OF LITERATURE.** (3 credits.) (Prerequisite: English 252A,B or Linguistics 200A,B.) A continued linguistic study of the English language and its application to literature. STAFF

*110-260 (120-250D). **APPROACHES TO LITERARY STUDY.** (6 credits.) A study of critical methods and their validity in relation to specific literary texts.

110-265D. THEATRE LABORATORY. (6 credits.) An exploration of a dramatic text through production. Co-requisite courses are required. For details of texts and current co-requisites students stould consult the instructor before registration.
PROFESSOR ANDERSON

110-266D (120-377D.) MODERN THEATRE PRACTICE. (6 credits.) Introduction to the technical and practical aspects of drama production. D. HOFFMAN

***110-267D (120-232D). VOICE AND SPEECH I.** (6 credits.) The Voice in theory and practice; development of practical oral skills.

***110-268D (120-213D). HISTORY OF THE THEATRE I.** (6 credits.) History of theatre in Asia and Europe from origins to Renaissance.

110-269D (120-275D). FUNDAMENTALS OF DRAMA AND THEATRE. (6 credits.) A practical and theoretical study of the individual and collective creative process and the actor's approach to it. PROFESSOR RIPLEY

110-275A, B (120-202A, B). COMMUNICATIONS, LITERATURE AND SOCIETY I. (3 credits.) Study of the communication process and its relevance to literature and society.
PROFESSOR LAFON

110-276A, B (120-203A, B). COMMUNICATIONS, LITERATURE AND SOCIETY II. (3 credits; *Prerequisite:* 275A, B.) A further exploration of the communication process.
PROFESSOR LAFON

110-279D (120-338D). INTRODUCTION TO THE FILM. (6 credits.) An introductory study of the cinema as a medium. STAFF

***110-290D. HONOURS TUTORIAL I.** (6 credits.) Archival Skills: study of techniques of research.

110-294D (120-295D). HONOURS TUTORIAL I — ALTERNATE. (6 credits.) Emphasis on biography, bibliography and textual study. PROFESSOR HEUSER

***110-295A (120-309A). SPECIAL TOPICS OF LITERARY STUDY.** (3 credits.) Specific subjects of literary study which vary from year to year.

110-297D (120-307D). SPECIAL TOPICS OF LITERARY STUDY. (6 credits.) Specific subjects of literary study which vary from year to year. PROFESSOR GOLDBERG

300-LEVEL COURSES

110-300D (120-310D). RENAISSANCE ENGLISH LITERATURE. (6 credits.) A study of the major writers of the 16th and early 17th centuries. PROFESSOR LINDEMAN

***110-302A (120-353A). RESTORATION AND 18TH CENTURY ENGLISH LITERATURE I.** (3 credits.) A study of the major writers of the late 17th and earlier 18th centuries.

***110-303B (120-354B). RESTORATION AND 18TH CENTURY ENGLISH LITERATURE II.** (3 credits.) A study of the major writers of the later 18th century.

***110-304D (120-332D). THE ENGLISH NOVEL TO 1800.** (6 credits.) Special emphasis on the novel of the 18th century.

***110-306A (120-324A). MEDIAEVAL AND TUDOR DRAMA.** (3 credits.) A survey of representative examples of Mediaeval and Tudor Drama.

***110-308A (120-325A.) ELIZABETHAN DRAMA.** (3 credits.) A survey of representative examples of Elizabethan Drama.

***110-309B (120-326B). JACOBEAN DRAMA.** (3 credits.) A survey of representative examples of Jacobean Drama.

***110-310A (120-355A). RESTORATION AND 18TH CENTURY DRAMA.** (3 credits.) Representative plays from Etherage to Sheridan.

***110-312B (120-356B). DRAMA OF THE VICTORIAN AND EDWARDIAN AGES.** (3 credits.) Representative English plays from Byron to Galsworthy.

110-314A (120-336A). 20TH CENTURY DRAMA. (3 credits.) A survey of representative works of 20th Century Drama. PROFESSOR ELLIOTT

***110-315D (120-372D). SHAKESPEARE.** (6 credits; *Prerequisite:* 215A, B; or consent of the instructor.) An advanced course in Shakespeare.

110-316B (120-315B). MILTON. (3 credits.) A study of the works of John Milton.
PROFESSOR PIEHLER

110-320D (120-306D). THIRD WORLD LITERATURE. (6 credits.) A study of literary works from Africa, the Caribbean and South America. PROFESSOR DORSINVILLE

110-322D (120-304D). CARIBBEAN LITERATURE. (6 credits.) A study of major Caribbean writers. PROFESSOR ELLIOTT

***110-323A (120-334A). 20TH CENTURY AMERICAN POETRY.** (3 credits.) A study of representative works of 20th century American poetry.

110-325D (120-335D). MODERN NORTH AMERICAN FICTION. (6 credits.) A study of representative American, French and English Canadian writers. PROFESSOR ELLIOTT

110-327D (120-360D). THE DEVELOPMENT OF PROSE FICTION IN CANADIAN LITERATURE. (6 credits.) A survey of Canadian fiction writers from early 19th century to the present. PROFESSOR LUCAS

110-329D (120-340D). 20TH CENTURY CANADIAN LITERATURE. (6 credits.) A study of representative works of 20th century Canadian literature. PROFESSOR DUDEK

110-330D (120-329D). THE MODERN DRAMA. (6 credits.) A study of the major movements in modern drama. PROFESSOR TEMBECK

110-333D. ENGLISH PROSE FROM BACON TO THE PRESENT. (6 credits.) The development of English prose traced through detailed study of authors representative of each period. PROFESSOR MACLENNAN

110-335D (120-314D). THE MODERN NOVEL. (6 credits.) A study of major novels written in English in the 20th century. PROFESSOR MACLENNAN

110-337D (120-342D). THE ART OF POETRY. (6 credits.) Studies in poetics. PROFESSOR GOLDBERG

***110-338B (120-343B). THE SHORT STORY.** (3 credits.) A study of significant trends in short story writing.

***110-343B. CHILDREN'S LITERATURE.** (3 credits.) Historical, sociological and psychological development of Children's Literature. PROFESSOR REICHERTZ

***110-344D. LITERATURE AND SCIENCE.** (6 credits.) A study of the parallel structures of historical evolution in literature and science.

***110-345D. LITERATURE AND SOCIETY.** (6 credits.) A study of literature and its social contexts.

110-346D (120-352D). ART AND LITERATURE. (6 credits.) A study of the relationship between literature and the visual arts. PROFESSOR DAVISON

***110-348D (120-308D). THE GREAT WRITINGS OF EUROPE 1850-1950.** (6 credits.) An analysis of representative works of modern European literature.

110-351D (120-320A). ENGLISH LANGUAGE AND PROSE LITERATURE BEFORE THE NORMAN CONQUEST. (6 credits.) An introduction to Old English (Anglo-Saxon) prose language and literature. PROFESSOR CONWAY

***110-352A (120-320A). AN INTRODUCTION TO OLD ENGLISH LANGUAGE AND LITERATURE.** (3 credits.) A study of the language and culture of the Anglo-Saxons through a reading of primarily prose texts.

***110-353B (120-321B). ANGLO-SAXON POETRY WITH EMPHASIS ON BEOWULF.** (3 credits.) A detailed study of epic *Beowull* and a few short poems.

***110-356A (120-323A). MIDDLE ENGLISH.** (3 credits.) English literature from 1200 to 1500, exclusive of Chaucer.

110-357A (120-382A). CHAUCER: CANTERBURY TALES. (3 credits.) A study of the *Canterbury Tales.* PROFESSOR PIEHLER

110-358B (120-383B). CHAUCER: TROILUS AND CRISEYDE. (3 credits.) A study of *Troilus and Criseyde.* PROFESSOR PIEHLER

***110-359B (120-322B). ENGLISH LITERATURE IN 14TH AND 15TH CENTURIES, Exclusive Of Chaucer.** (3 credits.) Further study in Middle English language and literature.

***110-360D (120-339D). LITERARY CRITICISM.** (6 credits.) An advanced study of critical methods.

110-364D (120-246D). CREATIVE WRITING — INTERMEDIATE. (6 credits.) Students must have the consent of the instructor. PROFESSOR BLAISE

***110-365D. THEATRE LABORATORY.** (6 credits.) An exploration of a dramatic text through production. Corequisite courses are required. For details of texts and current corequisites students should consult the instructor before registration.

110-366D (120-327D). AESTHETIC THEORIES OF DRAMA AND DRAMATIC CRITICISM. (6 credits.) A theoretical study of drama and theatre as forms of human presentation. PROFESSOR TEMBECK

110-368D (120-215D). HISTORY OF THE THEATRE II. (6 credits.) History of the theatre from the Italian Renaissance to the use of realism. PROFESSOR RIPLEY

***110-369D (120-375D). PERIOD AND STYLE IN THE THEATRE.** (6 credits; *Prerequisite:* 260D or the consent of the instructor.) A study, through practical participation, of works from major periods in Western theatre.

110-375D. MASS MEDIA CRITICISM. (6 credits.) The nature of judgments that can be made about the products of the mass media. PROFESSOR OHLIN

110-379D (120-349D). THE FILM. (6 credits.) An advanced study of the film. PROFESSOR WEES

***110-384A or B (120-341B). STUDIES IN COMMUNICATIONS.** (3 credits.) A study of special subjects in communications which vary from year to year.

***110-385D (120-313D). LITERATURE AND FILM.** (6 credits.) Form and image in Literature and Film.

110-390D. HONOURS TUTORIAL II. (6 credits.) Symbolic Analysis. PROFESSOR GOPNIK

110-394D (120-395D). HONOURS TUTORIAL II — ALTERNATE. (6 credits.) Literary theory and analysis. PROFESSOR REICHERTZ

110-395A (120-380A). INDIVIDUAL READING COURSE. (3 credits.) By arrangement with individual instructor. Permission must be obtained from the department before registration.

110-396B (120-381B). INDIVIDUAL READING COURSE. (3 credits.) By arrangement with individual instructor. Permission must be obtained from the department before registration.

***110-398D (120-350A). DEPARTMENTAL SEMINAR.** (6 credits.) Subjects of major interest to the study of English, varying from year to year.

400-LEVEL COURSES

110-401D (120-484D). THE 17TH CENTURY. (6 credits.) Advanced study of the major literary traditions of the 17th century. PROFESSOR DAVISON

110-403D (120-494D). THE 18TH CENTURY. (6 credits.) Advanced study of the major literary traditions of the 18th century. PROFESSOR BRUCE

110-405D (120-274D). THE 19TH CENTURY. (6 credits.) Advanced study of the major literary traditions of the 19th century. PROFESSOR COLE

***110-407A (120-486A). THE 20TH CENTURY.** (3 credits.) Advanced study of the major literary traditions of the 20th century.

***110-408B (120-487B). THE 20TH CENTURY.** (3 credits.) Advanced study of the major literary traditions of the 20th century.

110-417A (120-317A). A MAJOR ENGLISH POET. (3 credits.) The poet studied varies from year to year. PROFESSOR CECIL

110-418D (120-318D). STUDIES IN 20TH CENTURY LITERATURE. (6 credits.) Study of specific subjects in 20th century literature, changing from year to year. PROFESSOR DORSINVILLE

110-419A (120-319A). STUDIES IN 20TH CENTURY LITERATURE. (3 credits.) Study of specific subjects in 20th century literature, changing from year to year. PROFESSOR RONSLEY

110-420D (120-305D). STUDIES IN ANGLO-IRISH LITERATURE. (6 credits.) Selections from Irish authors, works and literary movements in the English language. PROFESSOR RONSLEY

***110-421A (120-499A). AFRICAN LITERATURE.** (3 credits.) A study of representative works of African literature.

110-422D (120-316D). STUDIES IN 19TH CENTURY AMERICAN LITERATURE. (6 credits.) Major figures and themes. PROFESSOR SIMON

***110-430B (120-331B). STUDIES IN DRAMA.** (3 credits.) A study of specific subjects in drama, changing from year to year.

110-431D (120-330D). STUDIES IN DRAMA. (6 credits.) A study of specific subjects in drama, changing from year to year. PROFESSOR SUVIN

110-435D (120-401D). SATIRE. (6 credits.) Origins, techniques and purpose of satire. PROFESSOR KLIMA

110-437A (120-347A). STUDIES IN A LITERARY FORM. (3 credits.) Study of a specific literary form, changing from year to year. PROFESSOR BUITENHUIS

110-438B (120-348B). STUDIES IN A LITERARY FORM. (3 credits.) Study of a specific literary form, changing from year to year. PROFESSOR FRYE

***110-439D (120-311A). STUDIES IN SCIENCE FICTION.** (6 credits.) The study of science fiction as a literary form.

110-447D (120-337D). CROSSCURRENTS BETWEEN ENGLISH LITERATURE AND EUROPEAN LITERATURE OF THE 18TH CENTURY. (6 credits; *Prerequisite:* a reading knowledge of French.) A study of the relationship between Continental and English literature in the 18th century. PROFESSOR KLIMA

***110-456A (120-451A). MIDDLE ENGLISH.** (3 credits.) Malory's *Morte D'Arthur;* a study of the work and its background.

***110-464D (120-346D). CREATIVE WRITING — ADVANCED.** (6 credits.) Students must have the consent of the instructor.

***110-465D. THEATRE LABORATORY.** (6 credits.) An exploration of a dramatic text through production. Corequisite courses are required. For details of texts and current corequisites students should consult the instructor before registration.

110-466D (120-376D.) THEORY AND PRACTICE OF DRAMATIC PRODUCTION. (6 credits.) Emphasis on directorial skills in the theatre. PROFESSOR ANDERSON

***110-469D (120-475D). DRAMA IN THE THEATRE.** (6 credits.) Conditions of performance in various modern modes, with exercises.

110-480A (120-302A). STUDIES IN THE HISTORY OF THE FILM I. (3 credits.) Specific subjects vary from year to year. PROFESSOR OHLIN

***110-481B (120-303B). STUDIES IN THE HISTORY OF THE FILM II.** (3 credits.) Specific subjects vary from year to year.

***110-482B (120-373B). FILMMAKING.** (3 credits.) (Limited enrolment — permission of instructor required.) Theory and practice of filmmaking.

***110-484A or B (120-370B). SEMINAR IN THE FILM.** (3 credits.) In-depth study of specific topics related to the film, which vary from year to year.

***110-485D (120-301D). MODES OF COMMUNICATION.** (6 credits.) A study of literature and media.

110-486D (120-410D). STUDIES IN THE MASS MEDIA. (6 credits.) Theory and practice of the fundamentals of television production. PROFESSOR KARLE

110-490D. HONOURS TUTORIAL III. (6 credits.) Literary history as a means of literary criticism. PROFESSOR BRISTOL

110-494D (120-495D). HONOURS TUTORIAL III — ALTERNATE. (6 credits.) History of Literary Theory. Criticism and Aesthetics. PROFESSOR SUVIN

110-495A (120-480A). INDIVIDUAL READING COURSE. (3 credits.) By arrangement with individual instructor. Permission must be obtained from the department before registration.

110-496B (120-481B). INDIVIDUAL READING COURSE. (3 credits.) By arrangement with individual instructor. Permission must be obtained from the department before registration.

110-498D (120-351D). DEPARTMENTAL SEMINAR. (6 credits.) Subjects of major interest to the study of English, varying from year to year. PROFESSOR GOPNIK

500-LEVEL COURSES. Advanced study in seminar format of special topics as indicated by course titles. Admission by permission of the instructor.

110-500A (120-451A). MIDDLE ENGLISH. (3 credits.) PROFESSOR PUHVEL

110-501A (120-452A). 16TH CENTURY. (3 credits.) PROFESSOR LINDEMAN

110-502A (120-454A). 17TH CENTURY. (3 credits.) PROFESSOR BRISTOL

***110-503A (120-456A). 18TH CENTURY.** (3 credits.)

110-504A (120-457A). 19TH CENTURY. (3 credits.) PROFESSOR RUBIN

110-505B (120-458A). 20TH CENTURY. (3 credits.) PROFESSOR RUBIN

***110-516B (120-453A). SHAKESPEARE.** (3 credits.)

110-525B (120-461B). AMERICAN LITERATURE. (3 credits.) PROFESSOR RONSLEY

110-528A (120-463A). CANADIAN LITERATURE. (3 credits.) PROFESSOR COLE

110-529D (120-496D). INTERDISCIPLINARY SEMINAR IN NORTH AMERICAN STUDIES. (3 credits.) PROFESSOR BUITENHUIS

110-530B (120-466A). LITERARY FORMS. (3 credits.) PROFESSOR REICHERTZ

110-531B (120-468B). LITERARY FORMS. (3 credits.) PROFESSOR ELLIOTT

110-533B. LITERARY MOVEMENTS. (3 credits.) PROFESSOR WEES

110-585D. MODES OF COMMUNICATION IN MODERN LITERATURE AND MEDIA. (6 credits.) PROFESSOR MCPHERSON

The following course(s) may be chosen by English Major and Honours students as part of their programs:

135-351B. STUDIES IN MODERN JEWISH FICTION. PROFESSOR LINDEMAN

DEPARTEMENT DE LANGUE ET LITTERATURE FRANÇAISES (126)

Peterson Hall
3460, rue McTavish
Montréal H3A 1X9
Directeur: Prof. John Greer Nicholson. Tél.: 392-4591 ou 4577 ou 3003
Comité des Etudes sous-graduées — 126 Peterson Hall. Tél.: 392-4670 ou 4671

Généralités

Le Département de langue et littérature françaises de McGill offre un éventail de cours qui couvre, d'une manière aussi complète et approfondie que possible, l'ensemble des littératures française et québécoise, de même qu'un certain nombre de problèmes touchant à la langue, la méthodologie littéraire, la stylistique et la traduction.

Depuis longtemps, le français est la seule "langue de travail" à l'intérieur du Département. Les francophones constituent une proportion importante de nos étudiants. Ceci représente un avantage appréciable pour les anglophones qui peuvent faire leurs études dans un milieu essentiellement français.

Une grande diversité de points de vue quant aux techniques d'enseignement et à la méthodologie littéraire existe parmi les professeurs du Département. Nous veillons à ce que les étudiants soient en contact avec le plus grand nombre de professeurs possible, durant le cours de leurs études, de façon qu'ils puissent bénéficier d'une multiplicité d'"approches".

Programmes Spécialisés

Le Département offre deux types de spécialisation qui conduisent à l'obtention de deux diplômes de Baccalauréat:

— un diplôme de B.A. avec "Honneurs" en français;
— un diplôme de B.A. avec "Major" en français.

Ces deux programmes se subdivisent en plusieurs concentrations.

Le Programme "Honneurs"

Admission

Pour être admis dans le programme "Honneurs" un étudiant doit avoir fait la concentration "Français" au CEGEP et avoir obtenu de bons résultats dans ses cours. Son dossier sera examiné par un Comité de Professeurs du Département.

Information générale sur le programme "Honneurs"

Pour obtenir un diplôme "Honneurs" de la Faculté des Arts de McGill, un étudiant doit concentrer ses études à l'intérieur d'un programme approuvé qui met en jeu un nombre minimum de cours dont certains peuvent être obligatoires.

En principe, cet ensemble de cours doit être pris dans un seul département; toutefois, il existe plusieurs programmes d'"Honneurs-Conjoints", dont nous parlerons plus loin. Au Département de français, le programme d'"Honneurs" exige un minimum de dix cours (un tutorial individuel durant la dernière année peut compter pour un de ces cours) dont certains sont obligatoires. Une autre exigence du programme est d'obtenir une note d'au moins 65% dans chaque cours de français.

Que donne un diplôme d'"Honneurs"?

Avant tout, un "B.A. Honneurs" est une préparation à des études supérieures en français (Maîtrise et Doctorat). Dans cette perspective, nous offrons à l'étudiant une base solide dans les études françaises en même temps que nous l'engageons dans la voie d'une spécialisation. Ces deux aspects complémentaires du programme expliquent la présence de cours obligatoires et la possibilité pour l'étudiant de faire un travail individuel (Tutorial) en fin d'études. Quelle que soit l'orientation future de l'étudiant, le Département veille à ce que le programme du cours de chacun soit établi en consultation avec le Comité des études sous-graduées (C.E.S.G.) de façon qu'il soit cohérent et manifeste une certaine unité d'ensemble.

Cours obligatoires dans le programme "Honneurs"

Le programme "Honneurs" avec concentration en littérature française ou en littérature québécoise comporte des cours obligatoires en stylistique et en littérature. Pour les détails, consulter le Président du CESG.

Tout étudiant "Honneurs" peut suivre 4 cours qui ne sont pas réservés aux étudiants "Honneurs" durant ses 3 années d'études. Il a en outre le droit de suivre un cours complet (ou 2 demi-cours) au niveau de la Maîtrise dans sa troisième année.

Tout étudiant "Honneurs" doit suivre un cours au moins par année hors du Département.

Les étudiants qui ne sont pas inscrits en "Honneurs" ne peuvent suivre un cours "Honneurs" qu'avec l'assentiment du professeur.

"Honneurs-Conjoints"

En consultation avec les départements concernés, un étudiant peut suivre un programme d'"Honneurs-Conjoints", comprenant 36 crédits dans chacune des deux matières. Les "Honneurs-Conjoints" sont autorisés soit en littérature française, soit en littérature québécoise.

Pour les cours obligatoires, consulter le Président du CESG.

Le Programme "Major"

Généralités

Le programme "Major" vous permet d'acquérir un baccalauréat spécialisé en français selon les normes établies par le Ministère de l'Education.

La concentration "Major" exige moins de cours que celle d'"Honneurs" et vous permet ainsi une plus grande variété de matières étudiées et une plus grande souplesse dans l'établissement de votre programme.

L'étudiant "Major" doit suivre, durant sa scolarité, un minimum de sept cours dans le Département.

Les cours obligatoires varient suivant le type de concentration choisi à l'intérieur du programme.

A quoi sert un B.A. "Major in French"?

La plupart de nos étudiants "Major" se destinent à une carrière dans l'enseignement, principalement au niveau secondaire. Ils complètent leur *B.A. Major* par une année de pédagogie qui leur permet d'obtenir leur qualification de professeur. Cette année supplémentaire peut s'effectuer à McGill ou ailleurs. Beaucoup poursuivent des études graduées dans d'autres universités, surtout aux Etats-Unis.

Les différents programmes "Major"

Trois options existent dans le Département pour les étudiants "Major":

— Littérature française;
— Langue et civilisation françaises;
— Littérature québécoise.

Quelle que soit l'option choisie, nous encourageons nos étudiants à harmoniser leur programme de cours au Département avec des cours suivis à l'extérieur de celui-ci: Langues modernes — Sciences sociales — Psychologie ou Linguistique.

Vos chances d'admission dans un programme gradué sont meilleures si votre "Transcript" montre que vos études ont été rationnellement structurées.

Cours obligatoires communs aux trois options

— cours 245D et 345D (pour anglophones)
— cours 247D et 347D (pour francophones)

Cours obligatoires dans les différentes options

Littérature française: 2 cours portant sur la littérature française avant 1900.

Langue et civilisation françaises:

2 cours choisis parmi les suivants: 241D - 341D - 441D

Littérature québécoise:

cours 229D et un cours choisi parmi les suivants: 329D - 333D - 432D

"Major-Conjoints"

Les programmes "Honneurs-Conjoints" existent depuis longtemps dans la Faculté des Arts; les programmes "Major-Conjoints" ("Joint Major") sont encore une nouveauté. Il n'existe actuellement qu'un programme "Major-Conjoints" impliquant le Département de français: "Major-Conjoints" en français et en grec moderne. Les étudiants intéressés consulteront les Départements de français et de Langues Anciennes.

D'autres programmes "Major-Conjoints" seront éventuellement approuvés dans l'avenir.

Traduction

Le Département n'offre pas actuellement de programme en Traduction. Cette question est à l'étude; nous espérons pouvoir répondre sur ce plan aux besoins des étudiants dans un proche avenir.

Cours réservés aux anglophones

Les cours suivants sont conçus spécifiquement pour les étudiants dont le français n'est pas la langue maternelle et sont réservés pour eux: 126-205D, -208A, -209B, -210A, -211B, -219D, -245D, -289D, -345D.

Dans toute la mesure du possible, au moins une section sera réservée aux anglophones dans chacun des cours suivants: 126-220A,B, -222D, -223A, -224B, -227A, -228B.

Description des Cours

126-205D. FRANÇAIS COMMERCIAL. (6 crédits.) Ce cours s'adresse particulièrement aux étudiants non-francophones inscrits à la Faculté de Commerce. Il porte sur le français des affaires: acquisition de vocabulaire, éléments de style du langage commercial, etc. Chaque classe est limitée à 15 étudiants. PROFESSEUR ———

126-208A. INTRODUCTION A LA LITTERATURE QUEBECOISE CONTEMPORAINE (1945-1960). (3 crédits.) Etudes de quelques textes marquants de la littérature québécoise d'après-guerre. Réservé aux anglophones. PROFESSEUR———

126-209B. INTRODUCTION A LA LITTERATURE QUEBECOISE CONTEMPORAINE (1960 A NOS JOURS). (3 crédits.) Etudes de quelques textes marquants de la littérature québécoise d'après-guerre. Réservé aux anglophones. PROFESSEUR———

126-210A. CIVILISATION QUEBECOISE. (3 crédits.) Introduction à la civilisation québécoise (de 1800 à 1945). A l'aide d'oeuvres littéraires et artistiques, introduction aux différents aspects de la société québécoise: vie sociale, économique, culturelle. Réservé aux anglophones. PROFESSEUR ———

126-211B. CIVILISATION QUEBECOISE. (3 crédits.) Introduction à la civilisation québécoise (de 1945 à nos jours). A l'aide d'oeuvres littéraires et artistiques, introduction aux différents aspects de la société québécoise: vie sociale, économique, culturelle. Réservé aux anglophones. PROFESSEUR ———

126-215D. HISTOIRE DE LA LITTERATURE FRANÇAISE. (6 crédits.) Initiation à la littérature française par une étude des principaux textes. PROFESSEUR McGILLIVRAY

126-219D. THEATRE EN ACTION. (6 crédits.) Les étudiants seront appelés à monter et à interpréter une ou plusieurs pièces du théâtre contemporain. Réservé aux anglophones. PROFESSEUR ———

126-220A, B. FRANÇAIS ECRIT. (3 crédits.) Révision systématique de la grammaire; nombreux exercices de grammaire et des compositions. Exercices de traduction littéraire; discussions et compositions à partir de *La France contemporaine.*

PROFESSEUR ———

126-222D. FRANÇAIS ECRIT. (6 crédits.) Ce cours, semblable au 220A,B, est destiné aux étudiants qui désirent suivre un cours annuel de composition française.

PROFESSEUR ———

126-223A. LITTERATURE FRANÇAISE MODERNE. (3 crédits.) Etude de quelques œuvres parmi les plus marquantes de la littérature française du XXe siècle. Ce cours s'adresse aux étudiants qui ne sont pas inscrits dans un des programmes du Département (Major-Honneurs) mais qui désirent suivre un demi-cours en français portant sur la littérature moderne. PROFESSEUR MAUGEY

126-224B. LITTERATURE FRANÇAISE CONTEMPORAINE. (3 crédits.) Prérequis: 126-223A ou permission du professeur. Etude de quelques œuvres parmi les plus marquantes de la littérature contemporaine. Ce cours s'adresse aux étudiants qui ne sont pas inscrits dans un des programmes du Département (Major-Honneurs) mais qui désirent suivre un demi-cours en français portant sur la littérature contemporaine. PROFESSEUR MAUGEY

126-225D. LE ROMAN APRES 1945. (6 crédits.) Dans ce cours on essaiera de dégager les grands problèmes d'ordre technique et philosophique du roman "existentialiste" et du "nouveau roman". On se servira d'analyses serrées de textes en classe pour faire ressortir les traits essentiels de chaque roman et diverses approches critiques.

PROFESSEUR ———

126-227A. INTRODUCTION A LA LITTERATURE QUEBECOISE I. (3 crédits.) Ce cours proposera l'étude des œuvres les plus significatives de la littérature québécoise afin d'arriver à une meilleure compréhension de la société québécoise d'hier et d'aujourd'hui.

PROFESSEURS DUQUETTE ET RIVARD

126-228B. INTRODUCTION A LA LITTERATURE QUEBECOISE II. (3 crédits.) Prérequis: 126-227A ou permission du professeur. Ce cours proposera l'étude des œuvres les plus marquantes de la littérature québécoise afin d'arriver à une meilleure compréhersion de la société québécoise d'hier et d'aujourd'hui. PROFESSEURS DUQUETTE ET RIVARD

126-229D. INITIATION A LA LITTERATURE QUEBECOISE. (6 crédits.) Réservé aux étudiants Major. PROFESSEUR RIVARD

126-231D. LE ROMAN AUX TEMPS ROMANTIQUES. (6 crédits.) Etudes des différents "visages" du romantisme littéraire français par les œuvres les plus marquantes d'écrivains tels que Stendhal, Constant, Balzac, Sand, Hugo, Mérimée. PROFESSEUR ———

126-235D. HISTOIRE DU CINEMA EN FRANCE. (6 crédits.) En même temps qu'une rétrospective du cinéma français des origines à nos jours et de ses principaux "auteurs", ce cours se propose d'aborder l'étude des genres cinématographiques à partir d'exemples français. M. JULIEN

126-236A. LA LITTERATURE FRANÇAISE DU XVIIe SIECLE I. (3 crédits.) Les étudiants qui ont une idée générale de la littérature française pourront approfondir le 17e siècle dans ses différents aspects essentiels par une lecture approfondie d'œuvres intégrales ou de morceaux choisis assez étendus. Les étudiants devront préparer des explications de textes précises et rédiger deux ou trois devoirs dans le semestre sans compter de courtes interrogations en classe. PROFESSEUR CHAMPIGNEUL

126-237B. LA LITTERATURE FRANÇAISE DU XVIIe SIECLE II. (3 crédits.) Prérequis: 126-236A ou permission du professeur. Les étudiants qui ont une idée générale de la littérature française pourront approfondir le 17e siècle dans ses différents aspects essentiels par une lecture approfondie des œuvres intégrales ou de morceaux choisis assez étendus. Les étudiants devront préparer des explications de textes précises et rédiger deux ou trois devoirs dans le semestre sans compter de courtes interrogations en classe. PROFESSEUR CHAMPIGNEUL

126-238D. INTRODUCTION A LA LITTERATURE NOIRE D'EXPRESSION FRANÇAISE. (6 crédits.) Origine particulière de la littérature antillaise et africaine. Ce cours portera principalement sur le mouvement de la négritude et sur ses chantres, à savoir Aimé Césaire, Léopold Sédar Senghor, Léon Gontran Damas, et Jacques Rabemanajara. De même l'étudiant sera introduit dans l'univers romanesque et théâtral de ces créateurs qui apportent au monde une sensibilité et un art nouveaux. PROFESSEUR MAUGEY

126-241D. CIVILISATION FRANCAISE DE LA RENAISSANCE A LA REVOLUTION. (6 crédits.) Ce cours a pour but de faire connaître, au moyen de documents divers (livres, diapositives, films), le milieu humain dans lequel la littérature française s'est développée jusqu'à la fin du dix-huitième siècle. Tous les aspects qui peuvent aider les étudiants à situer et à comprendre les œuvres littéraires seront évoqués: histoire de la vie politique, sociale, artistique, matérielle, etc. . . de la France avant la Révolution.
PROFESSEUR ————

126-245D. STYLISTIQUE COMPAREE DU FRANÇAIS ET DE L'ANGLAIS. (6 crédits.) Réservé aux étudiants anglophones. Ce cours a pour but d'améliorer la qualité du français écrit des étudiants, en éliminant les fautes dues à l'utilisation de structures et de mots anglais. La méthode consiste à comparer systématiquement les moyens d'expression des deux langues. De nombreux exercices pratiques viendront compléter les explications théoriques. STAFF

126-247D. STYLISTIQUE COMPAREE DU FRANÇAIS ET DE L'ANGLAIS. (6 crédits.) Réservé aux étudiants francophones. Par une étude systématique des contrastes entre les structures linguistiques de l'anglais et du français, les étudiants seront amenés d'une part à développer leur sensibilité aux problèmes stylistiques, d'autre part à découvrir, sur le plan théorique et pratique, les principes scientifiques de la traduction.
PROFESSEUR ————

126-251A. LE PREROMANTISME. (3 crédits.) Réservé aux étudiants Honneurs. A travers les œuvres qui montrent la voie au romantisme, on suivra l'évolution de l'esprit préromantique de Des Grieux à Obermann. PROFESSEUR ————

126-252B. LA POESIE ROMANTIQUE. (3 crédits.) Réservé aux étudiants Honneurs. A l'aube du XIXe siècle, en France, la poésie romantique manifeste l'épanouissement d'un mouvement européen né simultanément en Angleterre et en Allemagne, cinquante années plus tôt. Le cours se situera donc dans cette perspective de la littérature comparée avant de se limiter à la poésie française, étudiée à travers les écrits théoriques et les œuvres majeures. On s'attachera, d'une part, à montrer comment le contexte historique et social a favorisé le développement d'une sensibilité et d'une thématique nouvelles; d'autre part, à souligner la diversité des tendances regroupées sous l'étiquette commune.
PROFESSEUR ————

126-262D. LE ROMAN AU XVIIIe SIECLE. (6 Crédits.) Réservé aux étudiants Honneurs. L'évolution du roman au cours du dix-huitième siècle. Illustration à l'aide de textes caractéristiques choisis chez les auteurs majeurs des différentes tendances qui se manifestent à l'intérieur du "genre" romanesque: roman philosophique, picaresque, sensible, réaliste, de mœurs, etc. PROFESSEUR FURLAN

126-264D. HISTOIRE DE LA CIVILISATION QUEBECOISE. (6 crédits.) Réservé aux étudiants Honneurs. Etude des différents secteurs de la société québécoise (économiques,

politiques, social, culturel). Analyse sociologique d'œuvres littéraires et artistiques.
PROFESSEUR BOUCHER

126-275D. LE ROMAN APRES 1945. (6 crédits.) Réservé aux étudiants Honneurs. Autobiographique (Camus, Sartre, Céline), expérimental (Céline, Robbe-Grillet) ou traditionnel (Bazin), le roman moderne ne manque pas de diversité. Ce cours abordera: a) les relations entre l'univers imaginaire des romanciers et l'histoire; b) les techniques de composition propres à chacun des auteurs.
PROFESSEUR SMITH

126-289D. INTRODUCTION A L'ANALYSE LINGUISTIQUE DES TEXTES LITTERAIRES. (6 crédits.) Réservé aux étudiants Honneurs anglophones. Cours analogue au 126-290D.
PROFESSEUR ———

126-290D. INTRODUCTION A L'ANALYSE LINGUISTIQUE DES TEXTES LITTERAIRES. (6 crédits.) Réservé aux étudiants Honneurs francophones. Introduction à la linguistique et à l'analyse linguistique de textes littéraires. Notions de lexicologie. Les figures du discours. Exercices pratiques sur des textes littéraires de différentes époques et différents genres.
PROFESSEUR ———

126-312D. LE ROMAN AVANT 1939. (6 crédits.) La crise du roman français au tournant du siècle: problèmes et solutions. Evolution du roman entre les deux guerres. L'étude se fera sous deux formes: 1. Analyse approfondie de quelques œuvres marquantes (cours magistraux et travail de groupe); 2. Aperçu plus général (travaux et lectures personnels).
PROFESSEUR RICARD

126-317A. LA POESIE AU XXe SIECLE. (3 crédits.) L'étude de la poésie française au XXe siècle commencera avec Paul Valéry et les néo-symbolistes. Puis le pseudo-cubisme sera abordée avec Guillaume Apollinaire et P. Reverdy, l'aspect "machiniste-expressioniste" de l'époque étant représenté par Blaise Cendars. Près de ces mouvements, une tendance plus métaphysique sera illustrée par J. Supervielle et Saint-John Perse, tandis que Guillevic, Schéhadé et Michaux nous conduiront à la poésie de notre temps. Les thèmes de la Résistance auront leur place avec Aragon.
PROFESSEUR JONES

126-324A. LA TRAGEDIE CLASSIQUE. (3 crédits.) Plus aucun auteur dramatique n'appelle ses pièces "tragédies", aujourd'hui. Pourquoi? Ce cours s'attache: 1. à analyser la tragédie classique, l'esthétique de Corneille et celle de Racine; 2. à définir la notion de tragique et à voir comment elle a évolué au cours de l'histoire littéraire.
PROFESSEUR CHAMPIGNEUL

126-325B. LA COMEDIE CLASSIQUE. (3 crédits.) Rire. Mais de qui? De nous? De l'autre? Et *comment* un Molière fait-il rire? Lui-même affirme qu'il est plus facile d'écrire une tragédie que d'"entrer comme il faut dans le ridicule des hommes". On se propose ici de revivre son "aventure théâtrale" et celle de ses contemporains.
PROFESSEUR CHAMPIGNEUL

126-329D. LE ROMAN QUEBECOIS CONTEMPORAIN. (6 crédits.) Evolution de la technique romanesque au Québec depuis 1960. Analyse formelle de plusieurs romans contemporains choisis parmi les auteurs les plus connus (Godbout, Ferron, Aquin, Bessette . . .)
PROFESSEUR BOUCHER

126-330A. REALISME ET NATURALISME. (3 crédits.) De Balzac à Zola et Maupassant: Naissance et développement de la vision réaliste; évolution vers le roman expérimental, et illustration par l'étude d'œuvres significatives.
PROFESSEUR DUQUETTE

126-331B. REALISME ET NATURALISME. (3 crédits.) Prérequis: 126-330A ou permission du professeur. De Balzac à Zola et Maupassant: Naissance et développement de la vision réaliste; évolution vers le roman expérimental, et illustration par l'étude d'œuvres significatives.
PROFESSEUR DUQUETTE

126-333D. LE THEATRE QUEBECOIS. (6 crédits.) Etudes de pièces représentatives du théâtre québécois contemporain: littérature, langue, société.
PROFESSEUR SMITH

126-334A, B. LE CINEMA QUEBECOIS. (3 crédits.) Etude thématique du cinéma québécois à travers ses principaux films. Les approches seront: poétique, sociologique, psychologique et politique.
M. JULIEN

126-336A. LA LITTERATURE AU XVIIIe SIECLE. (3 crédits.) Ce cours aura pour but de présenter une image de la société du 18e siècle à travers un éventail de textes. On mettra un premier accent sur le théâtre, genre qui a joui d'une faveur particulière à l'époque et qui rend vite accessible son climat littéraire. Une étude du roman permettra de tracer l'évolution du sentiment au 18e siècle et donnera un aperçu de l'être humain présenté dans le cadre d'un réalisme narratif. Ces deux courants principaux seront complétés par un examen d'ouvrages dits "philosophiques", afin de mettre l'étudiant en rapport avec certaines idées sociales, politiques et scientifiques du siècle des lumières.
PROFESSEUR STEEDMAN

126-337B. LA LITTERATURE AU XVIIIe SIECLE. (3 crédits.) Prérequis: 126-336A ou permission du professeur. Même description que ci-dessus. PROFESSEUR STEEDMAN

126-341D. CIVILISATION FRANÇAISE DE LA REVOLUTION A LA IIIe REPUBLIQUE. (6 crédits.) Ce cours n'est ni un cours d'histoire, ni de littérature. Il se propose de faire la synthèse de l'histoire politique, économique, sociale et culturelle de la période 1789-1875. PROFESSEUR LAUNAY

126-342D. EVOLUTION ET STRUCTURES DE LA LANGUE FRANÇAISE. (6 crédits.) Histoire de la langue française, du bas-latin à la langue moderne. Etude de l'évolution phonétique, syntaxique, sémantique. Etude de textes des différentes époques. PROFESSEUR RABOTIN

126-345D. LANGAGE ET METHODOLOGIE LITTERAIRE. (6 crédits.) Prérequis: 126-245D ou permission du professeur. Réservé aux étudiants anglophones. Il offre une étude des phénomènes de synonymie, des effets intellectuels et affectifs, destinés à sensibiliser l'étudiant étranger aux différents niveaux de la langue en français. D'autre part, une acquisition systématique du vocabulaire étudié en contextes vise à l'enrichissement de la langue. Parallèlement à ces exercices de stylistique, on étudiera, à travers leurs textes, les différentes méthodes des principaux représentants de la critique littéraire en France jusqu'à nos jours. PROFESSEUR PASCAL

126-347D. LANGAGE ET METHODOLOGIE LITTERAIRE. (6 crédits.) Prérequis: 126-247D ou permission du professeur. Réservé aux étudiants francophones. Ce cours offre une étude des phénomènes de synonymie, des effets intellectuels et affectifs, destinée à sensibiliser l'étudiant aux différents niveaux de la langue en français. D'autre part, une acquisition systématique du vocabulaire étudié en contextes vise à l'enrichissement de la langue. Parallèlement à ces exercices de stylistique, on étudiera, à travers leurs textes, les différentes méthodes des principaux représentants de la critique littéraire en France jusqu'à nos jours. PROFESSEUR PASCAL

126-356D. LA LITTERATURE DE LA RENAISSANCE. (6 crédits.) Réservé aux étudiants Honneurs. Un cours panoramique sur la littérature de la Renaissance, de Marot à Montaigne. Les lectures obligatoires seront complétées par des lectures facultatives ayant trait notamment aux courants d'idées et à la poésie. Les étudiants seront en outre invités à entreprendre soit individuellement, soit en petits groupes, une recherche guidée sur un sujet qui les intéresse. PROFESSEUR ———

126-361D. ROMAN QUEBECOIS I. (6 crédits.) Réservé aux étudiants Honneurs. Naissance du roman d'aventure et de récit fantastique; étude de mœurs et romans de la terre, évolution du roman paysan. PROFESSEUR ———

126-363D. REALISME ET NATURALISME. (6 crédits.) Réservé aux étudiants Honneurs. Les "écoles" réaliste et naturaliste dans la seconde moitié du dix-neuvième siècle. Les principes, leurs fondements et leur portée. Illustration, par l'étude systématique d'œuvres caractéristiques des plus grands écrivains, essentiellement des romanciers (Flaubert, Maupassant, Zola, etc.). PROFESSEUR FURLAN

126-364D. LA POESIE QUEBECOISE. (6 crédits.) Réservé aux étudiants Honneurs. Panorama de la poésie québécoise des origines à nos jours; nous examinerons les rapports entre poésie et société aux divers moments de l'histoire. Au XIXe siècle: l'école de Québec, Crémazie, Fréchette; au XXe siècle: l'école de Montréal, Nelligan, le poète de la solitude; nous terminerons ce cours en analysant les œuvres majeures du mouvement de l'Hexagone; celles de Gaston Miron, de Paul-Marie Lapointe, de Roland Giguère, etc. PROFESSEUR ———

126-375D. LE ROMAN AVANT 1939. (6 crédits.) Réservé aux étudiants Honneurs. Ce cours aura pour objet, en partant des œuvres étudiées, de dégager les tendances principales et fort diverses d'une des grandes époques du roman français. Nous tenterons, en utilisant différentes approches (thématique, psychanalytique, sociologique, etc.) de cerner l'originalité de chaque texte tout en le reliant à la tradition romanesque et aux formes d'aujourd'hui. PROFESSEUR COLLET

126-376D. LE THEATRE AU XXe SIECLE. (6 crédits.) Réservé aux étudiants Honneurs. La fantaisie qui suivit la première guerre mondiale sera traitée à travers l'unanimisme de J. Romains et l'impressionnisme de Giraudoux, puis ce sera la gravité de Salacrou et de Claudel. Au terme de la deuxième guerre, on étudiera l'engagement existentialiste chez Sartre, Camus et Genet, avant de considérer l'attitude expressioniste de Ghelderode qui nous conduira au "théâtre de l'absurde". La forme expérimentale de l'expression dramatique sera représentée par Raymond Roussel et par Arrabal. PROFESSEUR JONES

126-390D. TENDANCE CONTEMPORAINE DE LA CRITIQUE LITTERAIRE. (6 crédits.) Réservé aux étudiants Honneurs. Ce cours vise à mettre en lumière les tendances principales de la critique depuis Bachelard: phénoménologie, existentialisme, psycho-critique, thématique, sociologie, structuralisme. Le travail sera centré sur l'étude approfondie de quelques œuvres critiques particulièrement significatives. PROFESSEUR———

126-400D. STYLISTIQUE AVANCEE. (6 crédits.) Continuation de l'étude systématique des différents modes d'expression dans le complexe message-contexte, avec recours à la stylistique comparée (Français-Anglais). Etude plus particulière des techniques stylistiques littéraires, avec examen d'œuvres représentatives. Notions de description formelle et de typologie. PROFESSEUR ———

126-414A. LE SYMBOLISME. (3 crédits.) Symbolique et symbolisme; la philosophie du romantisme et le renouveau de la pensée symbolique. Le baudelairisme. Le courant et l'"école" symbolistes: le débat théorique; la poésie symboliste; le théâtre symboliste et le wagnérisme en France. PROFESSEUR———

126-415B. LE SURREALISME. (3 crédits.) Les grands précurseurs du surréalisme seront rappelés: Sade, Lautréamont, Rimbaud, Jarry. Etude du dadaïsme: naissance de l'anti-littérature et de l'anti-art. Passage du dadaïsme parisien au surréalisme (1922-1924). Formation de l'école surréaliste. Importance accordée à l'art. Le surréalisme et la psychanalyse. Aspects mystique et politique du mouvement: scissions et rapprochements avec d'autres groupes. Reprise de l'expérience entre 1946 et 1950. Répercussions à l'étranger. PROFESSEUR JONES

126-421A. LE NOUVEAU ROMAN. (3 crédits.) Tout en replaçant le mouvement littéraire du "Nouveau Roman" dans sa perspective historique, on mènera dans ce séminaire une analyse du phénomène qui sera fondée sur les problèmes de forme et de fond que pose le roman dans la société moderne. PROFESSEUR POMET

126-422D. HISTOIRE DES DOCTRINES LITTERAIRES DU XVIe SIECLE A NOS JOURS. (6 crédits.) Ce cours donnera un aperçu des doctrines littéraires qui se sont succédées en France depuis la Renaissance jusqu'à nos jours. Classicisme, romantisme, Parnasse, symbolisme, surréalisme, existentialisme, nouveau roman . . ., tous ces mouvements sont nés en partie d'écrits théoriques qu'on se propose d'étudier dans leur contenu et dans leur forme. A titre d'exemples, on analysera quelques œuvres susceptibles d'illustrer les principes mis en avant par les grandes écoles littéraires. On aidera ainsi l'étudiant à se faire une idée de l'évolution de la littérature française à ses différentes époques, et à comprendre le pourquoi de cette évolution. PROFESSEUR ———

126-432D. POESIE QUEBECOISE CONTEMPORAINE. (6 crédits) Effets de la renaissance culturelle québécoise sur la société. De l'introspection au surréalisme et l'automatisme (Alain Grandbois, Paul-Marie Lapointe, Roland Giguère, Gilles Hénault et Claude Gauvreau) en passant par les mouvements divers, tels que ceux de l'Hexagone, de Liberté, de Parti-pris (Paul Chamberland) et de La Barre du Jour. Différentes approches seront utilisées pour l'étude des œuvres. Nous réserverons une place importante à *l'Homme rapaillé* de Gaston Miron. PROFESSEUR MAUGEY

126-433A. LES CHANSONNIERS QUEBECOIS. (3 crédits.) De l'inspiration folklorique à la musique "pop". Sources, thèmes et originalité de la chanson québécoise des dernières années: Félix Leclerc, Jean-Pierre Ferland, Gilles Vigneault, Robert Charlebois. PROFESSEUR———

126-436D. EVOLUTION DES IDEES AU QUEBEC AU XIXe SIECLE. (6 crédits.) Les grands courants idéologiques du XIXe siècle et leur constante influence sur la littérature de cette époque: le voltairianisme, le libéralisme, grandeur et décadence des "Rouges", Tardivel ou l'ultramontanisme, Buies ou la libre pensée, etc. PROFESSEUR———

126-441D. LA FRANCE CONTEMPORAINE: EVOLUTION ECONOMIQUE, SOCIALE ET POLITIQUE DEPUIS 1870. (6 crédits.) Les trois principaux centres d'intérêt seront:

1. La France à l'heure du Marché Commun: situation économique et sociale, planification.
2. Les institutions politiques et sociales en vigueur: Constitution, Parlement, partis, syndicats, Sécurité sociale, système judiciaire, etc.
3. Les crises de la démocratie républicaine depuis un siècle: effets sur l'éducation nationale et les forces religieuses. M. JULIEN

126-442D. EVOLUTION DE LA LANGUE FRANÇAISE AU CANADA. (6 crédits.) Le franco-canadien (ou franco québécois) à partir de 1760. Etude des rapports entre l'évolution de la société et l'évolution de la langue. Le cours est conçu pour donner aux étudiants l'occasion d'effectuer des recherches personnelles. PROFESSEUR RABOTIN

126-445D. PROBLEMES DE TRADUCTION. (6 crédits.) Ce cours portera, avec un minimum d'appareil théorique, sur les problèmes que pose la traduction, particulièrement dans le domaine littéraire. Donné sous la forme de travaux pratiques, il permettra aux étudiants de mieux maîtriser leur langue et d'affiner leur perception des problèmes sémantiques et stylistiques. PROFESSEUR ————

126-447D. PROBLEMES LITTERAIRES. (6 crédits.) Ce cours dont le contenu sera déterminé chaque année par le C.E.S.G. après consultation des étudiants et des professeurs permettra de traiter un certain nombre de questions littéraires dont la nature échappe au découpage traditionnel des programmes. Ces questions toucheront aux genres, aux thèmes ou à des problèmes de langage ou de critique. PROFESSEUR ————

126-448D. ATELIER PRATIQUE DE THEATRE. (6 crédits.) PROFESSEUR ————

126-455D. INTRODUCTION A LA LANGUE ET A LA LITTERATURE MEDIEVALES. (6 crédits.) Réservé aux étudiants Honneurs.

1er trimestre: Il s'agit de faire une première connaissance directe, à l'aide d'une anthologie, avec les différents genres littéraires qui constituent l'ensemble de la production médiévale. Des séances seront dédiées au système de la langue.

2ème trimestre: Le 2ème trimestre sera dédié à la lecture des aventures de Renard le "goupil". Sujet de discussion: la parodie et satire dans l'épopée animale. PROFESSEUR DI STEFANO

126-458B. LA LITTERATURE FANTASTIQUE. (3 crédits.) Réservé aux étudiants Honneurs. Ce cours abordera le fantastique en l'opposant successivement à d'autres genres tels que l'étrange et le merveilleux. A travers les œuvres choisies, les thèmes du fantastique et ses techniques seront analysés et différenciés. PROFESSEUR ————

126-460D. LE CLASSICISME. (6 crédits.) Réservé aux étudiants Honneurs. Etudes d'œuvres marquantes du "siècle d'or" français, et de leurs rapports avec la civilisation du dix-septième siècle. Ce cours s'adresse aux étudiants qui, après les vastes synthèses des cours d'introduction, désirent cerner de plus près la pensée et l'art des grands auteurs classiques. Ceux-ci sont moins des "monuments historiques" que des écrivains toujours actuels. PROFESSEUR CHAMPIGNEUL

126-461D. ROMAN QUEBECOIS II (depuis 1945). (6 crédits.) Réservé aux étudiants Honneurs. Le renouvellement des thèmes, des formes et des influences à la faveur de la deuxième guerre mondiale. L'évolution du roman québécois de 1945 à 1960, puis de 1960 à nos jours. L'étude se fera sous deux formes:

1. Analyse approfondie de quelques œuvres marquantes (cours magistraux et travail de groupe);
2. Aperçu plus général (travaux et lectures personnels). PROFESSEUR RICARD

126-462D. LES ESSAYISTES QUEBECOIS: EXPLOSION DE LA PENSEE DEPUIS BORDUAS. (6 crédits.) Réservé aux étudiants Honneurs. Ce cours portera sur l'évolution de la pensée au Canada français depuis 1946. On tentera d'y engager les tendances littéraires et socio-culturelles qui ont permis au climat actuel de se préciser. PROFESSEUR ETHIER-BLAIS

126-490D. HONOURS TUTORIAL. (6 crédits.) Réservé aux étudiants Honneurs.

126-491B. SEMINAIRE SPECIALISE DE LITTERATURE FRANÇAISE. (3 crédits.) Réservé aux étudiants Honneurs. Le sujet de ce séminaire, orienté vers la recherche personnelle, sera déterminé chaque année par le C.E.S.G. en consultation avec les étudiants et les professeurs. PROFESSEUR DI STEFANO

126-492A. SEMINAIRE SPECIALISE DE LITTERATURE QUEBECOISE. (3 crédits.) Réservé aux étudiants Honneurs. Le sujet de ce séminaire, orienté vers la recherche personnelle, sera déterminé chaque année par le C.E.S.G. en consultation avec les étudiants et les professeurs. PROFESSEUR ————

FRENCH AS A SECOND LANGUAGE (127)

3438 McTavish St.
Office: Room 205. Telephone 392-5727;
Office Hours: 9 a.m. to 1 p.m.

The department offers French language courses of a practical nature, for those who will be required to use the language in future, whether in Quebec or elsewhere.

Grades are awarded on the basis of term work, regular tests, and an oral examination.

Eligibility

127-401D is open to any students, from Quebec or elsewhere, in any Faculty and degree program.

Priority to those in their final year of undergraduate studies (U.3.) ADMISSION BY INTERVIEW ONLY, AT REGISTRATION.

127-341D is open to students in any Faculty and degree program *who attended High School in Quebec Province.* Students may be from any Faculty and degree program and will be admitted to the appropriate level after an interview at registration and tests given at the beginning of term.

Limited Registration

Numbers are limited in all classes; in order to be sure of a place students from all Faculties must register with this department during the official registration period.

Accelerated Sequence of Courses

Students who have achieved very good results in 127-201D or 127-211D may be considered for admission directly to 127-401D.

Course Descriptions

127-201D. INTENSIVE BEGINNERS' FRENCH. (For students from outside Quebec Province.) (6 credits; 6 hours including language laboratory.) Open to students in any degree program having no previous knowledge of French. *Text:* Politzer, Hagiwara, Carduner *L'Echelle* (Ginn) and laboratory workbook. B. SHEPPARD AND STAFF

127-211D. ORAL AND WRITTEN FRENCH I. (For students from outside Quebec Province.) (6 credits; 3 hours + language laboratory.) Open to students in any degree program having only an elementary knowledge of French. Grammar review, comprehension, vocabulary, conversation. Text to be announced. STAFF

127-321D. ORAL AND WRITTEN FRENCH II. (For students from outside Quebec Province.) (6 credits; 3 hours + language laboratory.) For those having taken 127-211D or equivalent. Comprehension, discussion, reading, grammar review. Text to be announced. STAFF

127-341D. INTERMEDIATE FUNCTIONAL FRENCH. (For students in any degree program who attended High School in Quebec Province.) (6 credits; 3 hours per week.) Practice in oral French via discussions; use of records, films, etc. Systematic study of recurrent language problems. STAFF

127-401D. FUNCTIONAL FRENCH. (For any students in their final year of undergraduate studies.) (6 credits; 5 hours.) An intensive course in conversational French, in groups of 8 students. For those with an adequate theoretical knowledge of the language who need to improve comprehension and expression through practice.
J.-P. BOUCHARD, H. MIGNAULT AND STAFF

GEOGRAPHY (183)

Burnside Hall,
Dept. Chairman: Room 510, Phone 392-5489
General Inquiries: Room 513, Phone 392-5700

The Geography Department offers degrees in both the Faculty of Arts and the Faculty of Science. For a full description of the courses and for an outline of the nature of Geography and the opportunities for study in this discipline, the student should consult the listings under Geography in the Faculty of Science section of the calendar (page 214).

B.A. students planning to take an Honours or a Major in Geography should arrange an interview with the departmental chairman or his representative at least one week before registration.

B.A. Major in Geography

General Inquiries: Room 513, Burnside Hall, 392-5700
Advisers: Professor B. Massam, Room 611, 392-8083
Professor G. Ewing, Room 418, 392-4720

36 approved credits in Geography. 18 approved credits in related subjects from the Social Sciences. The Geography courses must include:
Geography 183-201A, 202B, 214A, 216A, 203D and 6 credits of regional courses.

B.A. Major in Geography (Special Programs)

NOTE: It is recommended that courses which are underlined be take in UI.

CULTURAL ECOLOGY

Geography 183-201A, 214A, 215B, 203D, 312B, 317B, 319A, 324B, 451D (or Biology 177-305A and 328B or Biology 177-305A and Geography 183-300B)
Biology 177-111A, 348D, 328B or Geography 183-451D
Anthropology 151-203A, 206A
57 credits

GEOGRAPHY OF ECONOMIC ACTIVITY

Geography 183-201A, 202B, 216A, 217B, 301D, 314A, 315B, 318B, 351A
Economics 154-200D, 300A, 301B, 313D plus 9 other approved credits.
54 credits

HUMAN GEOGRAPHY OF THE INDIANS AND ESKIMOS IN CANADA

Geography 183-201A, 202B, 203D, 214A, 215B, 301D, 316A, 402D
Anthropology 151-203A, 347A, 336A, 424A
Linguistics 104-240A
Economics 154-200D
54 credits

REGIONAL GEOGRAPHY

Geography 183-201A, 202B, 203D, 214A, 216A, 217B, 301D, 303D, 306A, 308B, 314A, or 317B plus 9 approved credits
54 credits

URBAN SYSTEMS

Geography 183-201A, 202B, 216A, 217B, 314A, 316A, 331A, 333A, 351A (or one of Computer Sciences 308-200A, B, 220A, B), 412B

Architecture 301-205A, 232A, 235A, 431A, 433A, 434B
Engineering 303-133B
Anthropology 151-202B, 321B, 421A
Economics 154-200D, or 250D, 468A
Sociology 166-222A

60 credits

B.A. Honours in Geography

General Inquiries: Room 513, Burnside Hall, 392-5700
Adviser: Professor B. Massam, Room 611, 392-8083

The Geography Department offers three streams in the B.A. Honours sequence. The General stream permits the student to pursue a broad program including courses in physical geography and environmental studies, whereas the Economic/Urban and Cultural streams provide for more specialized instruction in areas of human geography. The three streams are very similar in the first year and a student may defer the choice of stream until the beginning of the second year.

B.A. HONOURS — ECONOMIC/URBAN STREAM

First year: Geography 183-201A, 202B, 203D, 214A, 216A, 217B and 9 approved credits

Second and Third year: Geography 183-351A, 481A, 482D

3 credits in Regional Geography, 15 approved credits in Urban and/or Economic courses, and 27 approved credits.

B.A. HONOURS — CULTURAL STREAM

First year: Geography 183-201A, 202B, 203D, 214A, 215B, 216A and 9 approved credits

Second year: Geography 183-351A, 481A; either 305A and 307B or two of 217B, 306A, 308B; 301D or 303D or 304A and 317B; and 9 approved credits

Third year: Geography 183-482D; 402D or 451D; (317B and 414A) or (314A or 316A and 315B) and 12 approved credits

B.A. HONOURS — GENERAL STREAM

First year: Geography 183-201A, 202B, 203D, 214A, 216A and 12 approved credits.

Second year: Geography 183-302D, 306A or 308B, 325A, 351A; 9 optional Geography credits and 6 approved credits.

Third year: Geography 183-481A, B, 482D; 9 optional Geography credits and 12 approved credits.

For detailed description of Geography courses see under Faculty of Science, page 214.

There are no prerequisites in geography for entrance to the Majors or Honours B.A. or B.Sc. in Geography. Arts students should include six credits of Mathematics in their CEGEP or pre-university programs. Students who have completed college or pre-university Geography courses fully equivalent to those at First year university may substitute other approved courses as part of their Majors or Honours programs.

GERMAN (129)

Departmental Office, Room 613, Samuel Bronfman Bldg., 392-5091

NOTE: Students may begin at the Intermediate or Advanced level in their first year if they have taken German courses in High school or in CEGEP or in a McGill Summer Session. During the six week Summer Sessions, the following courses are offered every year: 129-202D, 252D, and 302D.

By registering in German 129-200D-250D, a student may pass the Beginners' and the Intermediate level in one academic year. By registering in 129-200D-250D and an advanced level summer course, a student may complete all three levels in one year and proceed to senior literature and philology courses in his second year.

Students with German background should consult the Chairman in order to find out for which level they should register.

Honours in German

Prof. A. Arnold, Room 613, Samuel Bronfman Bldg. 392-5091

The Department offers an Honours Program in German and Joint Honours with nine Departments. In Single Honours, a student normally takes German 200D-250D or 201D plus one of German 210A, 211B, 212A, 213B, 260D, 261A, 262B in his first year. In his second year he takes 18, in his third year 24 approved credits in German.

A student may register for Single or Joint Honours in his second year if he has assembled the necessary credits in German. Some courses can be taken during the Summer Session.

Joint Honours Programs

Prof. A. Arnold, Room 613, Samuel Bronfman Bldg. 392-5091

Joint Honours are possible with the following Departments: Classics, English, French, History, Italian, Linguistics, Philosophy, Russian, Spanish. Students enrolled in Joint Honours are requested to take 12 credits in German each year in consultation with the Department.

Major in German

Prof. A. Arnold, Room 613, Samuel Bronfman Bldg. 392-5091

42 credits in German and 12 credits in a related field (another language, History, Linguistics, Philosophy, etc.). The courses are to be selected in consultation with the Department.

Junior Year Abroad

Prof. H. Richter, Room 617, Samuel Bronfman Bldg. 392-5094

Second year Honours students are eligible. They will study at a German-speaking European University and receive full credit for the year. Detailed information can be obtained from the Department.

Beginners' Level

A. EMPHASIS ON LANGUAGE

129-200D. GERMAN LANGUAGE INTENSIVE BEGINNERS' COURSE. (12 credits.) Intensive language course, covering the first two levels in one year rather than the usual two, is before Faculty for final approval according to guidelines to be determined by Faculty. Information will be available at registration. DR. ARNOLD AND STAFF

129-201D. GERMAN LANGUAGE. ACCELERATED BEGINNERS' COURSE. (6 credits; 5 + 1 hours; *Prerequisite:* none.) *Texts:* H. Kessler: *Deutsch für Ausländer* (Parts 1, 1a); H. Wittmann: *Workbook in Beginning German.* An audiovisual course. The stress is on oral comprehension and expression.
DR. HSIA AND STAFF

129-202D. GERMAN LANGUAGE. BEGINNERS' COURSE. (6 credits; 3 + 1 hours; *Prerequisite:* none.) *Text:* Curts, Groenke, Vail: *German for Beginners.* A solid, traditional method. The stress is on oral and written comprehension and expression.
DR. BIRCHER AND STAFF

129-202D (Special). GERMAN LANGUAGE. BEGINNERS' COURSE. (6 credits; 6 + 2 hours.) This is a special section of 129-202D *beginning in January 1975,* ending in April 1975.

129-203D. GERMAN LANGUAGE. BEGINNERS' COURSE. (6 credits; 3 hours; *Prerequisite:* none.) *Text:* Jannach: *German for Reading Knowledge.* The stress is on written comprehension. Recommended for B.Sc. students, engineers, graduate students.
DR. SCHMIDT AND STAFF

129-004D. GERMAN READING COURSE. METHOD AND PRACTICE OF TRANSLATION. (No credit; 2 hours; *Prerequisite:* none.) *Text:* as in 129-203D. Recommended for Ph.D. candidates preparing to fulfil the Language Requirement.
DR. BLOCK

B. EMPHASIS ON LITERATURE AND CIVILIZATION

129-210A. GERMAN LITERATURE IN TRANSLATION. (3 credits; 3 hours; *Prerequisite:* none; in English.) Recommended for students taking a Beginners' Language Course concurrently. Major works from Goethe to the end of the 19th Century will be discussed.
DR. SCHMIDT

129-211B. GERMAN LITERATURE IN TRANSLATION. (3 credits; 3 hours; *Prerequisite:* none; in English.) Recommended for students taking a Beginners' Language Course concurrently. Major works of the 20th Century will be discussed (Mann, Kafka, Brecht).
DR. SCHMIDT

129-212A. GERMAN LIFE AND INSTITUTIONS I. (3 credits; 3 hours; *Prerequisite:* none; in English.) Recommended for students taking a Beginners' Language Course concurrently.
MR. MACZEWSKI

129-213B. GERMAN LIFE AND INSTITUTIONS II. (3 credits; 3 hours; *Prerequisite:* none; in English.) Recommended for students taking a Beginners' Language Course concurrently.
MR. MACZEWSKI

Intermediate Level

A. EMPHASIS ON LANGUAGE

129-251D. GERMAN LANGUAGE. ACCELERATED INTERMEDIATE COURSE. (6 credits; 5 + 1 hours; *Prerequisite:* German 201D or equivalent.) *Texts:* Schulz-Sundermeyer: *Deutsche Sprachlehre für Ausländer;* several shorter literary works. Students completing this course will be admitted to any senior course in the Department.
DR. MAITRE AND STAFF

129-252D. GERMAN LANGUAGE. INTERMEDIATE COURSE. (6 credits; 3 + 1 hours; *Prerequisite:* 202D or equivalent.) *Texts:* Sparks-Vail: *German in Review;* Richmond-Kirby: *Auslese.* The stress is on oral and written comprehension and expression.
DR. GALLATI AND STAFF

129-253D. GERMAN LANGUAGE. INTERMEDIATE COURSE. (6 credits; 3 hours; *Prerequisite:* German 203D or equivalent; Not given in 1974-75.) *Texts:* Bergethon: Grammar for Reading German. *A Second Year Workbook;* Luyster: *Naturforschung von Heute;* newspapers and periodicals. The stress is on comprehension of scientific texts.

129-254D. GERMAN LANGUAGE. ADVANCED INTERMEDIATE COURSE. (6 credits; 3 + 1 hours; *Prerequisite:* high marks in 202D or two years of German at the Highschool or CEGEP level or equivalent; Not given in 1974-75.) *Texts:* Lermann, Rehder, Shaw and Werbow: *Review and Progress;* short novels and stories.

B. EMPHASIS ON LITERATURE AND LINGUISTICS

Text lists for and details about all of the following courses are available from the German Department office.

One or two of the following courses are usually taken by students who are concurrently registered in 251D.

129-260D. INTRODUCTION TO GERMAN LITERATURE. (6 credits; 3 hours; *Prerequisite:* 201D or equivalent or permission of the Department.) *Texts: Kompass 3;* several literary works. MISS GAPMANN

129-261A. DESCRIPTIVE GERMAN GRAMMAR. (3 credits; 3 hours; *Prerequisite:* 201D or an intermediate language course or permission of the Department.) MISS STEINLE

120-262B. DESCRIPTIVE GERMAN LINGUISTICS. (3 Credits; 3 hours; *Prerequisites:* 201D and 261A or an intermediate language course or permission of the Department.) MISS STEINLE

Advanced Level

A. EMPHASIS ON LANGUAGE

129-301A, 129-302B. FUNCTIONAL GERMAN. (3 + 3 credits; 5 hours; *Prerequisite:* 251D or 250 — 300 hours of German or equivalent or permission of the Department.) Discussion of newspaper articles (Die Zeit, Der Spiegel), literary texts (selected by each group), and general topics. The stress is on vocabulary building and on fluency of speech. DR. SCHUSTER AND STAFF

129-303A, 129-304B. FUNCTIONAL GERMAN. (3 + 3 credits; 5 hours; *Prerequisite:* 252D or 254D or 200 hours of German or equivalent.) Aim of the course: same as in 301D. DR. SCHUSTER AND STAFF

129-305D. GERMAN LANGUAGE (SPECIAL COURSE). (6 credits; 3 hours.) This course is intended for students who have a conversational knowledge of German, but little formal training in *writing* the language. The stress is on grammar and stylistics. DR. GOLDSMITH-REBER

B. EMPHASIS ON LITERATURE

129-310D. GERMAN LITERATURE FROM LESSING TO BRECHT. (6 credits; 3 + 1 hours; *Prerequisite:* 251D or 252D or 200 hours of German or equivalent.) *Texts:* Several plays, "Novellen" and anthologies. DR. RICHTER AND STAFF

Senior Courses

(Literature, Linguistics, Philology, Stylistics)

NOTE: Text lists for and details about all of the following courses are available from the Departmental office. Not all courses are offered every year!

Prerequisites for all senior courses are German 250D or 251D or any course at the advanced level or permission of the Department.

A. LITERATURE

129-340A or B. SCANDINAVIAN LITERATURE (in English). (3 credits.) DR. SCHUSTER

129-350D. GERMAN LITERATURE IN THE NINETEENTH CENTURY (1830-1880). (6 credits.) DR. BLOCK

129-360A. GERMAN LITERATURE IN THE TWENTIETH CENTURY I. (3 credits.) DR. BLOCK

129-361B. GERMAN LITERATURE IN THE TWENTIETH CENTURY II. (3 credits.) DR. BLOCK

129-362A. GERMAN LITERATURE IN THE TWENTIETH CENTURY III. (3 credits.) DR. MAITRE

129-363B. GERMAN LITERATURE IN THE TWENTIETH CENTURY IV. (3 credits.) DR. GALLATI

129-365A or B. MEDIA STUDIES IN GERMAN. (3 credits.) DR. MAITRE

129-380A. GERMAN LITERATURE OF THE ENLIGHTENMENT. (3 credits.) DR. HSIA

126-381B. GERMAN LITERATURE OF THE "STURM UND DRANG" PERIOD. (3 credits.) DR. HSIA

129-390D. HONOURS TUTORIAL. (6 credits.) DR. HSIA

129-450A. THE CLASSICAL PERIOD IN GERMAN LITERATURE. (3 credits.) DR. GOLDSMITH-REBER

129-451B. GERMAN ROMANTICISM. (3 credits.) DR. SCHUSTER

129-460A. GERMAN LITERATURE IN THE AGE OF THE REFORMATION. (3 credits.) DR. BIRCHER

129-461B. GERMAN LITERATURE OF THE BAROQUE PERIOD. (3 credits.) DR. BIRCHER

129-490D. SPECIAL SUBJECT (Honours Tutorial). (6 credits.) DR. ARNOLD

B. PHILOLOGY AND LINGUISTICS

129-370A. GERMANIC PHILOLOGY. (3 credits.) A survey of the history of the Germanic languages from their Indo-European origin until the end of the Germanic migrations. The main topics of study will be the Germanic sound shift, West Germanic phonological developments and the emergence of the West Germanic dialects. The course will be given in English. DR. RICHTER

129-371B. HISTORY OF THE GERMAN LANGUAGE. (3 credits.) An outline of the history of the language from Charlemagne to the present. The main developments in phonology, syntax and lexicon will be covered together with the essentials of the cultural background. DR. RICHTER

129-500A or B. READINGS IN A GERMANIC LANGUAGE (Gothic, or Old Icelandic, or Old Saxon). (3 credits.)

129-501A or B. INTRODUCTION TO OLD HIGH GERMAN. (3 credits. DR. RICHTER

129-510A. MIDDLE HIGH GERMAN LANGUAGE. (3 credits.)

129-511B. MIDDLE HIGH GERMAN LITERATURE. (3 credits.) DR. RICHTER

C. STYLISTICS, TRANSLATION, PHONETICS, RHETORIC

129-320A. TRANSLATION AND COMPOSITION I. (3 credits.) DR. LACH

129-321B. TRANSLATION AND COMPOSITION II. (3 credits.) DR. LACH

129-401A, 129-402B. FUNCTIONAL GERMAN (ADVANCED). (3 + 3 credits; 5 hours; *Prerequisite:* 129-301A and 129-302B or permission.) The stress is on building a highly specialized vocabulary and on fluency of speech. DR. MAITRE

129-403A, 129-404B. FUNCTIONAL GERMAN (ADVANCED). (3 + 3 credits; 5 hours; *Prerequisite:* 129-303A and 129-304B or permission.) Aim of the course: same as 129-401A and 129-402B. DR. MAITRE

129-520A. ADVANCED COMPOSITION AND TRANSLATION. (3 credits.) DR. LACH

129-521B. GERMAN STYLISTICS. (3 credits.) DR. LACH

129-530A or B. THEORETICAL AND PRACTICAL GERMAN PHONETICS (CONTRASTIVE). (3 credits.) DR. GOLDSMITH-REBER

HISTORY (101)

General Office and Information: Room 625, Sixth Floor, Stephen Leacock Building
Telephone: 392-5192
Academic Advisers:
L. Dechêne, A. R. Riggs, H. C. Schlieper, J. H. Thompson, H. S. Weinroth

The Department of History offers a wide range of courses in the history of such areas as Africa; Britain; Canada, with considerable emphasis being placed on French Canada and Québec; East Asia; Eastern Europe; France, Germany, Russia and the United States. In addition, courses are offered on such topics as International Relations, History of Medicine, Ethno-history of Canada, Jewish History and War and Society. Greek, Roman, and Islamic history are taught in other departments with which the Department of History is closely associated.

The Department offers two kinds of programs — Honours and the Major. The Honours program offers a high degree of specialization in history with much individual instruction to qualified students. The Major provides for a measure of concentration in history in conjunction with an opportunity to take courses in other disciplines. Candidates who wish to study history as an Honours or Joint Honours subject, or who wish to major in History, must consult the Department as to their program. The general description of the Honours and Major programs will be found below.

Candidates entering University as U1 students may take all courses at the 200 level and courses at the 300 level for which they have prerequisites.

Major in History

Director: Professor J. H. Thompson
Office: Room 620, Stephen Leacock Building
Telephone Number: 392-5190

REQUIREMENTS:

Students who choose a Major in History should consult with the Department on or before the day of their formal registration at the University.

The History major generally consists of fifty-four (54) credits, determined by the History Department in consultation with the student. The Department offers students five different types of Program: an area major; thematic major; double major in history and another department, interdisciplinary major and a period major (e.g. 19th century). Additional information is available at departmental offices.

Under normal circumstances candidates who have completed the major program in History will not be eligible to enter the graduate program of the History Department unless they are prepared to do qualifying work.

Honours in History

Director: Professor H. C. Schlieper
Office: Room 631, Stephen Leacock Building
Telephone Number: 392-4723

REQUIREMENTS:

Students are reminded that owing to the transition to a three year University, the Honours Programs of the Department might change somewhat in their Upper years due to possible alterations of some course offerings which may be necessary.

Candidates are required to arrange their individual programs in consultation with the Department at the beginning of each academic year and to maintain a high CGPA.

The Honours Programs in the History Department are divided into four major areas of concentration: the history of North America, the history of Great Britain, European history and East Asian history. Honours students are required to have a reading knowledge of such foreign language or languages as may be appropriate to their proposed course of study. Provision is made in the program for students to continue their studies in such a language into their Upper years.

In the U1 year, three courses in history which are appropriate to their field of interest are chosen. In the U2 and U3 years the program is designed to allow candidates to concentrate in their field of interest and to give them a full range of undergraduate courses in history. Candidates may offer appropriate courses in related disciplines in place of one of their history courses in the U2 and U3 years but they are normally expected to have completed eleven full courses in history in the three years of the Honours program.

In addition to the examinations in the subjects taken in the last year, U3 students, both Full and Joint Honours, will have a comprehensive oral examination on their whole field of historical study.

Candidates for the Honours degree may at the beginning of the U2 year choose to proceed in one of two ways:

a) They may offer History 490D/491D — a two-year tutorial program chosen from one of the following areas —

England in the Age of Wycliff,
England from the Restoration to the Accession of George IV,
Selected topics in Canadian history,
France in the 16th and 17th centuries,
A topic in German history after 1800,
Some aspects of the political history of the Balkans in the 14th and the 15th centuries,
The Russian Revolutions of 1917,
Topics in Jewish history,
West African history,

OR

b) They may choose to take one undergraduate seminar per year. (See page 124).

Joint Honours

The Department offers Joint Honours programs with the Departments of Philosophy, Political Science (International Relations and Comparative Government), Russian, Economics, English, Geography, German, Anthropology, Classics, and may arrange other programs with other Departments. Students should consult both Departments with regard to programs and registration in Joint Honours courses. Programs will be designed to fit the individual interests of candidates but normally require an equal number of Upper Year courses in both disciplines.

For information on the Honours program in East Asian Studies which is offered in conjunction with the History Department, see page 71.

Course Descriptions

101-200D. A HISTORY OF AFRICA. (6 credits. This course is not open to candidates who have previously taken History 210A and History 220B.) A study of African cultures from the beginning of the Iron Age to the contemporary emergence of African States, with emphasis on the period since 1780. Stress is placed on the political and cultural relations of African societies with each other, with Europe and with Islamic civilization.

PROFESSOR ECHENBERG

101-202D. AN INTRODUCTION TO THE HISTORY OF CANADA. (6 credits.) This course will be a survey of the evolution of Canada, from the pre-Columbian explorations to the end of the Second World War. Social, economic, political, and intellectual developments will all be considered in a general way. Special emphasis will be placed on the themes of French-English relations, regional particularism, Canadian-American relations, and the influence of technology on Canadian society. PROFESSORS RICE AND THOMPSON

101-204D. HISTORY OF GREAT BRITAIN. (6 credits.) Survey of the development of Britain from the Middle Ages. Emphasis will be placed on political changes, seen in relation to the economic, social and intellectual background. PROFESSOR MAXWELL

101-206D. HISTORY OF EASTERN EUROPE (FROM 4th CENTURY). (6 credits.) The emergence of the first barbarian states; the Christianization of the Slavs; the Byzantine heritage; the Ottoman conquest; the golden age of Bohemia; mediaeval Poland; Lithuania-Russia and the Ukraine; Renaissance and Reformation in eastern Europe; the rise of nationalism and the formation of national states before and after World War I.

PROFESSOR BOSS

101-207D. A HISTORY OF THE JEWS FROM LATE CLASSICAL TIMES TO THE PRESENT. (6 credits. *Prerequisite:* History 215D, possibly concurrently, is recommended.)

A general introductory survey of the history of the Jewish people from late classical times to the present in the context of general world history. Emphasis will be placed on general trends and developments, and special attention will be paid to areas of major Jewish settlement. The first term will deal with the period up to 1492, while the second term will cover the period from 1492 to the present. PROFESSOR SWETSCHINSKI

101-208D. THE DEVELOPMENT OF EAST ASIAN CIVILIZATION. (6 credits. Open to Upper year students with permission of instructor.) History and salient features (social, political, economic, and intellectual) of the traditional civilization of China and Japan, from earliest times to the mid-19th century. PROFESSOR LIN

101-211A. THE UNITED STATES TO 1865. (3 credits.) English colonization of North America, development of representative government, colonial wars and revolution, the Constitution, society and politics of the nineteenth century, and the Civil War. Emphasis is placed on Puritanism, the American Revolution, and the men who fashioned and guided the new republic. PROFESSOR RIGGS

101-215D [Formerly 105D]. EUROPEAN CIVILIZATION IN THE MEDIAEVAL AND MODERN PERIODS. (6 credits.) This course will entail discussions of various themes in the evolution of European civilization, based on extensive readings in the works of major figures in Western cultural history and will seek an empathic understanding of each author, and some grasp of the historical context in which he wrote as well as of his influence on the development of European civilization. PROFESSOR HELLMAN

101-221B. THE UNITED STATES SINCE 1865. (3 credits. *Prerequisite:* History 211A or consent of instructor.) The growth of industry, reconstruction, populism and progressivism, and progressivism, World War I, the New Deal, and World War II. Stress is placed on the political and social consequences of industrialization and urbanization. PROFESSOR RANDALL

101-225D. A HISTORY OF FRANCE. (6 credits.) A survey of French society since the fall of the Roman Empire, with particular emphasis on the post-mediaeval period and economic, social and political developments. PROFESSOR DECHENE

101-235D. A SURVEY OF GERMAN HISTORY. (6 credits.) This course will give an overview of German history from its beginnings to the present. Selected aspects will be dealt with in depth; the foundations of the mediaeval Empire; the Reformation; the era of the World Wars. The course is an introduction to the entire field and will include some discussion of historiography. PROFESSOR HOFFMANN

101-280D. MEDIAEVAL LIFE AND INSTITUTIONS. (6 credits.) The history of the Middle Ages is approached in terms of its typical institutions — the Church, the Holy Roman Empire, feudalism, the towns, the gilds, the representative system — with an analysis of the social groups attached to each. The crises which modified these institutions in the late Middle Ages are analysed as phases of the transition to the modern period of European history. PROFESSOR BAYLEY

101-304D. BRITISH IMPERIAL POLICY FROM 1783. (6 credits; *Prerequisite:* Any course in British or Colonial history or consent of the instructor.) The composition and development of British policy, stressing the interplay between domestic attitudes and imperial needs and opportunities as demonstrated in humanitarian, missionary, intellectual, economic and strategic interests. PROFESSOR SENIOR

101-305D. WAR AND SOCIETY IN MEDIAEVAL AND MODERN EUROPE. (6 credits. *Prerequisite:* one general course in European history is desirable.) War in Roman, Carolingian, and feudal society; rise of permanent armies and navies; military institutions of eastern Europe; warfare from Wallenstein to Napoleon; emergence of the national army in Russia; the Western military tradition after Clausewitz; the Communist doctrine of war. PROFESSORS BAYLEY AND VOGEL

101-306D. HISTORY OF RUSSIA TO THE EARLY 20th CENTURY. (6 credits. *Prerequisite:* History 206D or consent of the instructor. This course is not open to candidates who have previously taken History 306A.)The formation of the Kievan state, the Mongol occupation, the emergence and integration of the Muscovite state, the Petrine reforms, the "modernisation" of Russia, the evolution of imperial Russian society. Emphasis is placed on social, economic and internal political themes. PROFESSOR SCHLIEPER

101-308D. HISTORY OF CHINA. (6 credits.) A survey course in the history of China from earliest times to 1911 with particular attention to social, intellectual and institutional change. PROFESSOR ROPP

101-314D. TUDOR AND STUART ENGLAND. (6 credits. *Prerequisite:* History 204D or consent of the instructor. Not given in 1974-75.) A study of English society, politics, and

thought from the end of the Middle Ages to the eighteenth century. Among the topics discussed are the developments of the English state: economic expansion; the religious revolution; the civil war and its consequences; the intellectual and social changes.

PROFESSOR MAXWELL

101-315D. CONTEMPORARY EUROPEAN HISTORY. (6 credits. *Prerequisite:* any course in European history, e.g., 204D, 206D, 215D, 225D, 235D, or equivalent.) This course will be devoted to a study of major developments in the 19th and early 20th centuries. Special emphasis will be given to the French Revolution, the rise of the working classes, liberalism, nationalism, imperialism and the European balance of power.

PROFESSOR WEINROTH

101-316D. RUSSIA IN ASIA. (6 credits. *Prerequisite:* History 206D or consent of the instructor. This course is not open to candidates who have previously taken History 316B.) The steppe empires and the impact of the Eurasian plain on Russian history, tsarist expansion to the East, Russian ventures on the Pacific, Islam in Russia, the Russification of Siberia, economic development of Soviet Siberia and Central Asia.

PROFESSOR SCHLIEPER

101-317D. JEWISH HISTORY FROM THE REFORMATION TO THE FRENCH REVOLUTION. (6 credits. *Prerequisite:* History 207D or one course in Modern European History is recommended. Not given in 1974-75.) An examination of the main events, trends and issues in Jewish history in the context of the general background. The first term will be devoted to the Sephardic experience, the second to the Ashkenazi.

PROFESSOR SWETSCHINSKI

101-318D. A HISTORY OF JAPAN. (6 credits.) A survey course in the history of Japan from the transmission of Buddhism (552 A.D.) to the 20th century, with particular attention to Modern Japan.

PROFESSOR OTA

101-323D. FRENCH CANADA FROM THE 17th CENTURY TO THE MIDDLE OF THE 19th CENTURY. (6 credits; *Prerequisite:* History 202D or consent of instructor; Not given in 1974-75.) This course will approach the economic and social history of New France and pre-industrial Quebec as a case study for problems in colonial policies, population movements, rural economy, commercial capitalism, social stratification, collective attitudes and institutional change.

PROFESSOR DECHENE

101-324D. ENGLAND FROM THE GLORIOUS REVOLUTION UNTIL THE MID-VICTORIAN ERA. (6 credits. *Prerequisite:* History 204D or consent of the instructor.) This course deals with the rise of parties, the evolution of Cabinet Government, and the growth of the Constitution in an age of material progress, revolutionary ideas, and social change.

PROFESSOR SENIOR

101-325D. WESTERN EUROPE FROM THE RENAISSANCE TO THE 18th CENTURY. (6 credits. Not given in 1974-75.) A study of the development of political and social institutions, religon, and culture, e.g. the Italian communes and principalities; humanism; the Reformation; the scientific revolution of the 18th century; the changing character of social classes, the development of absolutism; the critical thought of the 18th century.

PROFESSOR SENIOR

101-328B. WAR AND DIPLOMACY IN THE EAST ASIAN SOCIETIES. (3 credits. *Prerequisite:* History 208D or 308D or 318D or consent of instructor. Not given in 1974-75.) This course surveys the transformation of East Asian societies through war and diplomacy since the Opium War, leading up the Communist revolution in China and modernization in Japan.

PROFESSOR ———

101-331D. EMERGING MODERN AMERICA, 1877-1945. (6 credits. *Prerequisite:* History 211A and 221B or consent of the instructor. This course is not open to candidates who have previously taken History 311A and/or History 321B.) The development of society in the United States from the end of Reconstruction until the death of Franklin D. Roosevelt. Emphasis is placed on the impact of industrialization and urbanization, the growth to world power, and the various movements of reform, including Populism, Progressivism, and the New Deal.

PROFESSOR RIGGS

101-332D. CANADA AND THE BIRTH OF CONFEDERATION. (6 credits. *Prerequisite:* History 202D or equivalent or consent of the instructor.) This course will examine the social, cultural, political and constitutional development of Canada from 1840 to 1896. Particular attention will be given to the effect of federal policy on regional development, the interaction of the various sections of Canada, and on church and state relations.

PROFESSOR LaPIERRE

101-334D. THE COMING OF THE FIRST WORLD WAR. (6 credits. *Prerequisite:* Any course in modern European History. Not given in 1974-75.) While this course will deal principally with the diplomatic relations between the major European Powers and the various crises which disturbed European peace, it will also attempt to examine the political and social structure of the Great Powers and the bearing this had upon the course of international diplomacy.
PROFESSOR WEINROTH

101-336D. A HISTORY OF FRANCE SINCE 1789. (6 credits.) A study of the major social, political, and cultural changes which France has undergone since the Revolution. Special emphasis will be placed on the struggle between religious and anti-clerical (or anti-religious) forces in the nineteenth century, on the history of revolutionary movements of the Left and of the Right, and on the transformations of these phenomena in the contemporary period.
PROFESSOR HELLMAN

101-337D. JEWISH HISTORY FROM THE FRENCH REVOLUTION TO THE PRESENT. (6 credits. *Prerequisite:* History 207D and/or one course in modern European history.) Major developments (social, economic, political, religious and cultural) within the Jewish community and affecting the Jews. The emphasis will be on a comparative analysis of parallel developments in such major countries as England, France, Germany, Poland and Russia.
PROFESSOR SWETSCHINSKI

101-342A. THE HISTORY OF CANADA'S EXTERNAL RELATIONS: 1867-1939. (3 credits. *Prerequisite:* History 202D. This course is not open to candidates who have previously taken History 422D. Not given in 1974-75.) This course will examine the historical development of Canadian external relations before World War II. Particular emphasis will be placed on Canadian-American relations, Canadian-Imperial relations, the growth of Canadian diplomatic autonomy and participation in the League of Nations.
PROFESSOR ———

101-344A. THE ETHNOHISTORY OF NEW FRANCE. (3 credits. *Prerequisite:* History 202D. Not given in 1974-75.) The methods and techniques of ethnohistory: an interdisciplinary approach to studying the history of peoples who have produced no written records of their own. These methods will be applied to a systematic investigation of interaction between Indians and Europeans in eastern Canada during the French regime. A reading knowledge of French is highly desirable.
PROFESSOR TRIGGER (of the Department of Anthropology)

101-345D. FRANCE IN THE 17th AND 18th CENTURIES. (6 credits. Not given in 1974-75.) Selected topics in French internal history from the end of the Wars of Religion to the outbreak of the French Revolution. Topics to be selected after discussion with the class; emphasis to be placed on class participation, class presentations and class discussion.
PROFESSOR BOULLE

101-352D. EMERGENCE OF ENGLISH CANADA, 1791-1867. (6 credits. *Prerequisite:* History 202D or consent of instructor.) This course will be primarily concerned with the history of Upper Canada from its pioneer origins until Confederation. Special consideration will be given to immigration, urbanization and to relations with French Canada after the Union of 1841.
PROFESSOR SENIOR

101-353D. WAR AND SOCIETY IN CANADIAN HISTORY. (6 credits. *Prerequisite:* History 202D. This course is not open to candidates who have previously taken History 372D.) The first half of this course will consist of lectures by members of the staff on various social problems which have arisen in the pursuit of war, the fighting of rebellions, the development of armed forces, and the attempts to cope with civil disobedience and terror. The second half of the course will be devoted to individual study through supervised and guided reading and research.
STAFF

101-355D. GERMANY IN THE 19th CENTURY. (6 credits. *Prerequisite:* History 235D or consent of the instructor.) German political, constitutional and social history, 1740-1914. Emphasis: the struggle of the two German Great Powers for control of Germany; Reform Era and Industrialization; the evolution of Prussian hegemony: diplomatic and social development leading to 1914.
PROFESSOR HOFFMANN

101-362D. THE WEST IN CANADIAN HISTORY. (6 credits. *Prerequisite:* History 202D.) This course will be an examination of the development of British Columbia and the Prairie Provinces from their initial exploration and settlement until the present. Political and economic developments will be considered, but emphasis will be placed primarily on the social and cultural history of the post-Confederation period.
PROFESSOR THOMPSON

101-363D. CONTEMPORARY CANADA, 1890-1970. (6 credits. *Prerequisite:* History 202D or equivalent, or consent of instructor. This course is not open to candidates who have previously taken History 302A and 312B.) This course will study Canadian social and political development since 1890. It will give particular attention to reform movements, third party protest, urbanization, regionalism, war, foreign policy (notably Canadian-American relations) and the Quiet Revolution. PROFESSOR LaPIERRE

101-403D. REGIONAL, SOCIAL AND CULTURAL HISTORY OF QUEBEC. (6 credits. *Prerequisite:* History 202D or consent of instructor. A reading and speaking knowledge of French is essential.) A study of the development of Quebec society since 1867. The objective of the course is to retrace this development, to define the meaning of ideas and behaviour which have developed in Quebec's specific physical, political, spiritual and cultural environment. Special attention will be given to the cultural development of modern Quebec. (Course to be given in French.)

PROFESSOR ROY (of the French Canadian Studies Centre)

101-405D. THE HISTORY OF EUROPEAN THOUGHT SINCE THE RENAISSANCE. (6 credits. Not given in 1974-75.) This course begins with the Renaissance and studies various trends in European thought down to the present time. It is conducted primarily by means of discussions based on extensive reading in the sources — Erasmus, Luther, Descartes, Voltaire, Goethe, Comte, Marx, Nietzsche, Ellul, Beckett, etc. — and seeks an empathic understanding of each thinker as well as a grasp of the historical context, and influence, of his thought. PROFESSOR HELLMAN

101-406D. RUSSIA IN THE TWENTIETH CENTURY. (6 credits. *Prerequisite:* History 306D or consent of the instructor.) The 'revolution' of 1905, the collapse of constitutionalism, Bolsheviks, Mensheviks, and the First World War, the fall of the tsarist regime, the Revolution of 1917, civil war and intervention, Lenin and the Comintern, Marxism and Soviet culture, the industrialization debate, Trotsky and the rise of Stalin, collectivization and the purges, Nazi-Soviet relations and the Second World War, Soviet society after Stalin. PROFESSOR BOSS

101-407D. TECHNOLOGY AND SOCIETY IN MEDIAEVAL AND MODERN EUROPE: A HISTORICAL SURVEY. (6 credits.) The technological leadership of the East; the period of borrowing and advance in Europe, 12th-16th centuries; the expansion of Europe and its repercussion; technology as an instrument of power and welfare in 19th century Europe; the effects of the diffusion and adoption of European technology in the non-European world. PROFESSOR BAYLEY

101-409A. THE INTELLECTUAL AND SOCIAL BACKGROUND TO MODERN MEDICINE. (3 credits. This course is not open to candidates who have previously taken History 429D.) A survey of medicine in the West from antiquity to the 18th century.

PROFESSOR BATES (of the Department of the History of Medicine)

101-414D. GREAT BRITAIN: DEVELOPMENT OF THE WELFARE STATE. (6 credits. *Prerequisite:* History 204D or consent of the instructor.) The course deals with economic conditions in the later 19th century; the growth of working class organization; Conservatism, Liberalism, Socialism, Imperialism; the origins of World War I; the economic and political effects of World War I; the origins and causes of World War II; post-war reconstruction. PROFESSOR WEINROTH

101-418D. PROBLEMS IN MODERNIZATION OF JAPAN. (6 credits. *Prerequisite:* History 208D or 318D, or consent of instructor.) Political, social, ideological change, and war and diplomacy from the Imperial Restoration to the present. PROFESSOR OTA

101-419B. MEDICINE AND SOCIETY. (3 credits; *Prerequisite:* History 409A or consent of instructor. This course is not open to candidates who have previously taken History 429D.) A survey of medicine in the West during the 19th and 20th centuries with special reference to the social aspects.

PROFESSOR BATES (of the Department of the History of Medicine.)

101-420D. FORMS OF PROTEST IN TRADITIONAL CHINA. (6 credits. *Prerequisite:* One prior course in Chinese history. Not given in 1974-75.) An examination of the ideological and social roots and the forms of expression of protest in traditional China, at both the elite and popular levels. (This course will be given in alternate years.).

PROFESSOR LAFFEY

101-428D. CONTINUITY AND CHANGE IN TWENTIETH CENTURY CHINA. (6 credits. *Prerequisite:* History 308D or consent of instructor. Not given in 1974-75.) Problems in the radical political and social transformation of China, as confronted and dealt with by twentieth-century revolutionary movements, particularly in the period from the May Fourth Movement to the present. PROFESSOR LIN

101-430D. FRANCE AND THE AFRICANS: A HISTORY OF THEIR RELATIONS FROM 1700 TO THE PRESENT. (6 credits. *Prerequisite:* An introductory course in either African or French history, and a reading knowledge of French.) An advanced study of the reciprocal nature of contacts between France and Africa south of the Sahara, the course will stress such topics as the slave trade, African resistance to French conquest, colonial rule and its legacy. PROFESSOR ECHENBERG

101-432A. THE HISTORICAL LITERATURE OF THE MARITIME PROVINCES. (3 credits. *Prerequisite:* History 202D or equivalent or consent of instructor. Not given in 1974-75.) An examination of themes in the history of the Maritime Provinces since 1755, based on historical novels, poetry and travel accounts. This course will examine maritime attitudes and responses to Canada, the American Revolution, settlement, industrialization, confederation and World War I. PROFESSOR MILLER

101-435D. GERMANY IN THE 20TH CENTURY. (6 credits. *Prerequisite:* History 235D or consent of instructor. Not given in 1974-75.) First World War: national and international aspects; another revolution arrested; unsolved problems; Weimar: economic crisis, frustrated energies, and nationalism; rise of Hitler; structure of the National Socialist state; blue-print for World Power; Second World War; attempts to overthrow Hitler; the revolt of conscience; defeat and division; the Cold War and the question of German unity; the two German states in the post-War era. PROFESSOR HOFFMANN

101-443B. COMMUNICATIONS, SOCIETY, AND PUBLIC POLICY IN CANADA. (3 credits. *Prerequisite:* History 202D. Not given in 1974-75.) This course will be a study of the development of Canada's communication systems and its repercussions on the political, social, and cultural life of Canadians. PROFESSOR LaPIERRE

101-448B. JAPANESE INTELLECTUAL HISTORY. (3 credits. *Prerequisite:* History 208D or 308D or 318D or consent of instructor. Not given in 1974-75.) Basic schools of Japanese thought, premodern and modern, which helped to shape and reshape Japanese civilization from the Buddhist theory of negation to Shinto nationalism, from Tokugawa Neo-Confucianism to Christian-socialist pacifism. PROFESSOR ———

101-452D. SOURCES OF CONFLICT IN CANADIAN HISTORY. (6 credits. *Prerequisite:* History 202D. Not given in 1974-75.) A study of the effect of sectionalism, regionalism, separatism and ethnic problems upon Canadian development since 1867. Themes will include Maritimes' dissatisfaction, Western integration, the role and scope of "ethnic groups", religious divisions, the French Canadian presence, regional economic disparities and the impact of native peoples. PROFESSOR LaPIERRE

101-458D. PROBLEMS IN TRADITIONAL CHINESE HISTORY. (6 Credits. *Prerequisite:* History 308D or the equivalent, or consent of the instructor.) Development of Chinese social organization. The peasantry, family and kinship, settlement and land tenure patterns, the elite, class structure, social mobility. PROFESSOR ROPP

101-468D. TRANSFORMATION AND DEVELOPMENT IN THE PEOPLE'S REPUBLIC OF CHINA. (6 credits. Prerequisite: History 208D or consent of the instructor.) The transformation of China's society and economy and of Chinese institutions and ideas since 1949, with special reference to the dynamics of phased transition, both in conceptual approach and in actual practice. PROFESSOR LIN

101-484D. THE COMING OF THE FIRST WORLD WAR. (Honours section of History 334D.) (6 credits. *Prerequisite:* Any course in Modern European History. Not given in 1974-75.) PROFESSOR WEINROTH

101-485D. CONTEMPORARY EUROPEAN HISTORY. (Honours section of History 315D.) (6 credits. *Prerequisite:* Any course in European History.) PROFESSOR WEINROTH

HISTORY 473D, 479D, 481D, 482D, 483D, 486D, 488D, 489D, 490D, 491D, 493D, 494D-498D. Honours Subjects and Seminars.

101-001. HISTORY AND HISTORICAL STUDIES. (Non-credit optional series of lectures). A series of lectures by the members of the Department devoted to the place of history in the social sciences, the methodology of historical studies and the relation of history to the humanities and to the sciences. Lectures will be primarily designed for Upper year Honours students in History — but lectures will be open to interested students. MEMBERS OF THE DEPARTMENT

Honours Seminars

101-473D. SEMINAR: CANADIAN HISTORY: ITS METHODOLOGY AND HISTORIOGRAPHY. (6 credits. This course is not open to candidates who have previously taken History 412D and/or 472D. Not given in 1974-75.) A reading knowledge of French is essential. STAFF

101-479D. SEMINAR: JEWISH HISTORY. (6 credits. *Prerequisite:* History 207D or its equivalent; Not given in 1974-75.)
PROFESSOR SWETSCHINSKI

181-481D. SEMINAR: UNITED STATES IN THE COLONIAL ERA. (6 credits. Not given in 1974-75.)
PROFESSOR RIGGS

101-482D. SEMINAR: BRITISH RADICALISM AND LEFT-WING MOVEMENTS ON THE EUROPEAN CONTINENT. (6 credits.)
PROFESSOR WEINROTH

101-483D. SEMINAR: THE CITY. (6 credits; Not given in 1974-75.)
PROFESSOR DECHENE, AND PROFESSOR ROY
(from the French Canadian Studies Centre)

101-486D. SEMINAR: AFRICA AND THE TWO WORLD WARS. (6 credits. Not given in 1974-75.)
PROFESSOR ECHENBERG

101-488D. SEMINAR: MODERN FRENCH INTELLECTUAL HISTORY. (6 credits. Not given in 1974-75.)
PROFESSOR HELLMAN

101-489D. SEMINAR: PROBLEMS IN GERMAN HISTORY IN THE 20th CENTURY. (6 credits.)
PROFESSOR HOFFMANN

101-493D. SEMINAR: TOPICS IN CANADIAN SOCIAL HISTORY. (6 credits.)
PROFESSOR DECHENE

101-494D. SEMINAR: POLITICAL AND SOCIAL IDEAS IN TUDOR AND STUART BRITAIN. (6 credits. Not given in 1974-75.)
PROFESSOR MAXWELL

101-495D. SEMINAR: FRANCE DURING THE ANCIEN REGIME. (6 credits. Not given in 1974-75.)
PROFESSOR BOULLE

101-496D. SEMINAR: REVOLUTIONARY MOVEMENT IN RUSSIA IN THE NINETEENTH CENTURY. (6 credits.)
PROFESSOR SCHLIEPER

101-497D. SEMINAR: TRADITION AND CHANGE IN CHINA. (6 credits. *Prerequisite:* History 208D or 308D or consent of the instructor.
PROFESSOR ROPP

101-498D. SEMINAR: PROBLEMS IN MODERN JAPANESE HISTORY. (6 credits. Not given in 1974-75.)
PROFESSOR ———

INDUSTRIAL RELATIONS PROGRAM

General Office, Room 505, Samuel Bronfman Building, Telephone 392-3022

The Industrial Relations Major is designed for the Undergraduate student who wishes to earn a B.A. or B. Com. degree with a concentration of courses chosen from disciplines with an emphasis upon Industrial Relations. The main economic and social forces which affect the employer-employee relationship are examined in a theoretical and practical setting. The student can choose from a wide range of courses in deciding how he or she will constitute the program, being able to concentrate to an extent in the area of industrial relations which interests him or her.

Advisers: Professor F. Bairstow, Room 515, Bronfman Building, 392-3077
Dr. William A. Westley, Room 513, Bronfman Building, 392-3075

All Industrial Relations Majors regardless of option must take the following courses:

Economics 154-200D
Industrial Relations 279-293A or B, 394B, 491D, 492D, 278-688B 27 credits
For those selecting the Economics option the following courses are required:
Economics 154-306D, 317D
A choice of the following groups:
Sociology: 166-312A, 260B

or

Behavioural Science I and II (see Faculty of Management Book) 18 credits
For those selecting the Sociology option the following courses are required:
Sociology: 166-260B, 312A, 326B, 350A, 417B, 420B 18 credits

In addition to the required courses listed above, 9 credits must be selected by students in both streams from the options listed below:

History 101-202D, 221B, 311A, 363D, 403D
Political Science 160-320A, 321D, 325D, 327D
Economics 154-311D, 306D, 426D
Sociology 166-342A, 343B, 224B, 410A
Management 272-420A, 421B, 422A, 462D.

Course Descriptions

279-293A, B. INTRODUCTION TO INDUSTRIAL RELATIONS. (3 credits.) An introduction to the problems of labour-management relations, the structure, function and government of labour unions, labour legislation, the collective bargaining process, and the public interest in industrial relations. PROFESSOR BAIRSTOW

279-394B. COLLECTIVE BARGAINING. (3 credits.) This course is designed for those students who wish to study principles in collective bargaining in Canada and abroad. It deals with the structure of the bargaining parties and the structure of bargaining itself. It is problem oriented and relies heavily on empirical data and case problems. PROFESSOR WOODS

279-491D. INDUSTRIAL RELATIONS IN PRACTICE (6 credits.) The object of this course is to give the students an opportunity to apply the knowledge that they have gained in their Industrial Relations Program. Students in this course will be encouraged to come to grips with a wide range of problems in industrial relations theory, policy and practice. This is achieved by means of guided reading and small discussion groups, mock collective bargaining sessions, contact with practitioners in the field and problem-oriented research assignments. (Compulsory for Final Year Industrial Relations Majors. Others by permission of the instructor.) PROFESSOR GOLDENBERG

279-492D. PUBLIC POLICY IN INDUSTRIAL RELATIONS. (6 credits.) Collective bargaining and public policy towards industrial relations. Emphasis is placed on recent public investigations into labour relations in the federal and provincial jurisdictions: international comparisons are included. PROFESSOR WOODS

278-688B. LABOUR RELATIONS IN THE PUBLIC SECTOR. (3 credits.) This course covers labour relations in a broad area of public services, federal, provincial, and municipal, as well as in the so-called quasi-public services such as hospitals, schools and government agencies and boards. Students will be encouraged to come to grips with some of the more contentious current issues in public service labour relations and compare and analyse the alternative methods that have so far been evolved to deal with them. This course is open to MBA II students who have completed 272-627A (Collective Bargaining) and to final year undergraduate students majoring in Industrial Relations. Others by permission of the instructor. PROFESSOR GOLDENBERG

ITALIAN LANGUAGE AND LITERATURE (132)

Samuel Bronfman Building, Room 637; *General Telephone Number:* 392-4567

Major in Italian

30 credits to be chosen from the following: Italian 230D, 240D, 251A, 252B, 301A, 302B, 351A, 352B, 401A, 402B, 451A, 452B, 461A, 462B, 464B;

12 credits: 2 compulsory courses, Italian 360D and 470D;

12 other credits in Arts or Social Sciences subjects chosen in consultation with the Department.

Prerequisites: see under individual courses.

Adviser: Professor P. D. Stewart, Samuel Bronfman Building, Room 637-A, 392-4567.

Honours in Italian

Admission to the Honours program in Italian requires departmental approval. Students wishing to register in the program should consult with the Department as early as possible.

Students may begin Honours in Italian in the Second year, instead of the First year, if in the opinion of the Department they are found qualified to do so.

Courses required: 36 credits to be chosen from the following: Italian 230D, 240D, 251A, 252B, 301A, 302B, 351A, 352B, 401A, 402B, 451A, 452B, 461A, 462B, 464B;

12 credits: 2 compulsory courses, Italian 360D and 470D;

6 credits: 1 compulsory tutorial, Italian 490D. This will appear as a sixth course on the student's final year record, i.e. it will be a 16th course in the 15 course B.A. program.

A minimum mark of 65% is required in each of the above listed courses.

Prerequistes: see under individual courses.

Adviser: Professor P. D. Stewart, Samuel Bronfman Building, Room 637-A, 392-4567.

Joint Honours

Students may combine Honours in Italian with Honours in any one of the following subjects: English, French, German, Latin, Linguistics, Philosophy, Russian, Spanish. Admission to Joint Honours requires departmental approval. Students wishing to register in the program should consult with the Department as early as possible.

Students may register for Joint Honours in the Second year, instead of the First year, if in the opinion of the Departments they are found qualified to do so.

Italian courses required: 36 credits to be chosen from the following: 230D, 240D, 251A, 252B, 301A, 302B, 351A, 352B, 360D, 401A, 402B, 451A, 452B, 461A, 462B, 464B, 470D.

A minimum mark of 65% is required in each of the above listed courses.

Prerequisites: see under individual courses.

Adviser: Professor P. D. Stewart, Samuel Bronfman Building, Room 637-A, 392-4567.

Course Descriptions

Two sets of courses are offered by the Department:

a) Italian 132-200D, 205D, 210D, 215D, 230D, 240D, 251A, 252B, 301A, 302B, 351A, 352B, 360D, 401A, 402B, 451A, 452B, 461A, 462B, 464B, 470D, 490D: courses intended for students wishing to learn, or improve their knowledge of the language, and to study Italian literature in the original;

b) Italian 132-225D, 325A and 326B: courses on Italian literature given in English; Italian authors will be read in the original or in translation as preferred by students; knowledge of the Italian language is not required.

132-200D. ITALIAN LANGUAGE INTENSIVE. (12 credits.) For students who have had no opportunity to acquire any knowledge of Italian. Intensive language course, covering the first two levels in one year rather than the usual two, is before Faculty for final approval according to guidelines to be determined by Faculty. Information will be available at registration. STAFF

132-205D. ITALIAN LANGUAGE FOR BEGINNERS. (6 credits; 3 hours and laboratory; *Texts:* D'Andrea & Stewart, *Il manuale italiano; Mondadori's Pocket Dictionary;* Buzzati, *Un caso clinico:* Appleton-Century-Crofts.) Grammar, reading, dictation. Intensive practice in speech patterns and written structures. Conversation and composition. Visual material and selected readings will be used in describing the making of contemporary Italy.

Opportunity for extra practice in Italian conversation is provided by the Department.
STAFF

132-210D. ITALIAN LANGUAGE AND CIVILIZATION. (9 credits; 5 hours; *Prerequisites:* Permission of the Department; *Texts:* D'Andrea & Stewart, *Il manuale italiano;* D'Andrea & Stewart, *Antologia italiana;* Pacifici, *Italia: vita e cultura:* Random House; Olken, *Racconti del Novecento:* Appleton-Century-Crofts; Buzzati, *Un caso clinico:* Appleton-Century-Crofts.) Grammar, reading, conversation and composition. An outline of Italian civilization. This course is intended to enable students who have no formal grounding in the Italian language, to obtain in one year the same level of competence as students who have taken CEGEP Intermediate Italian.
MISS SACCONAGHI

132-215D. INTRODUCTION TO ITALIAN LITERATURE. GRAMMAR. CONVERSATION, AND FREE COMPOSITION. (6 credits; *Prerequisite:* Italian 205D or the equivalent; *Texts:* D'Andrea & Stewart, *Il manuale italiano;* D'Andrea & Stewart, *Antologia italiana; Dizionario Garzanti della lingua italiana;* Sansone, *Storia della letteratura italiana:* Principato; Lussu, *Un anno sull'altipiano:* Einaudi; Fenoglio, *Una questione privata:* Garzanti.) A survey of Italian literature with special emphasis on some aspects of the Italian Novel. Reading of selected works and group discussion.
STAFF

132-225D. MAIN TRENDS AND MAJOR WRITERS OF ITALIAN LITERATURE. (6 credits; 1 lecture hour and 2 conference hours; Not given in 1974-75.) Lectures are given in English. Readings in Italian or in translation, as preferred by students. This course is intended to give students, whether they know Italian or not, an insight into the main problems of the Italian literary tradition.
PROFESSOR D'ANDREA & STAFF

132-230D. SURVEY OF ITALIAN LITERATURE. (6 credits; *Prerequisite:* CEGEP Intermediate Italian, or permission of the Department.) Readings from representative works of Italian literature; special emphasis on the nineteenth and twentieth centuries.
STAFF

132-240D. MANZONI AND THE ITALIAN LITERATURE OF THE "RISORGIMENTO". (6 credits; *Prerequisite:* CEGEP Intermediate Italian, or permission of the Department.) The Italian Romantic movement and its social and political background. The intellectual life of Alessandro Manzoni as reflected in his novel, *I promessi sposi.*
PROFESSOR PICONE

132-251A. THE "COMMEDIA DELL'ARTE". (3 credits; *Prerequisite:* CEGEP Intermediate Italian, or permission of the Department; *Texts: Dizionario Garzanti della lingua italiana;* D'Amico, *Storia del teatro drammatico:* Garzanti; D'Andrea & Stewart, *Antologia italiana.*) Playhouses, actors, stage techniques, masks and scenarios of the "Commedia dell'arte."
PROFESSOR STEWART

132-252B. ITALIAN DRAMA FROM GOLDONI TO PIRANDELLO. (3 credits; *Prerequisite:* Italian 251A, or permission of the Department; *Texts: Dizionario Garzanti della lingua italiana;* D'Amico, *Storia del teatro drammatico:* Garzanti; Goldoni, *Il Teatro Comico, La Bottega del Caffè, Il Bugiardo, La Locandiera, I Rusteghi, Il Ventaglio;* Signorelli; Pirandello, *Sei Personaggi in cerca d'autore, Enrico IV;* Mondadori.) A study of drama in Italy from the eighteenth to the twentieth century, with emphasis on Goldoni and Pirandello.
PROFESSOR STEWART

132-301A. LEOPARDI AND THE ITALIAN POETRY OF THE 19th CENTURY. (3 credits; *Prerequisite:* Italian 240D, 251A or 252B, or permission of the Department.) Readings from Leopardi's *Canti* and from representative works of other nineteenth-century poets.
PROFESSOR PICONE

132-302B. CONTEMPORARY ITALIAN PROSE. (3 credits; *Prerequisite:* Italian 240D, 251A or 252B, or permission of the Department; Not given in 1974-75.) Italian novelists, playwrights, diarists, and essayists from 1945 to the present in the context of the Italian post-war society.
PROFESSOR PICONE

132-325A. DANTE AND THE MIDDLE AGES. (3 credits; *Prerequisite:* Italian 225D, or permission of the Department; Not given in 1974-75. Lectures are given in English. Readings in Italian or in translation, as preferred by students. Students are not required to take language courses as prerequisites.) Special emphasis will be placed on the history of ideas and on the cultural contacts of Italy with England and France during the Middle Ages.
PROFESSOR D'ANDREA & STAFF

132-326B. THE RENAISSANCE: PETRARCH, BOCCACCIO, AND MACHIAVELLI. (3 credits; *Prerequisite:* Italian 225D, or permission of the Department; Not given in 1974-75. Lectures are given in English. Readings in Italian or in translation, as preferred by students. Students are not required to take language courses as prerequisites.) Special emphasis will be placed on the history of ideas and on the cultural contacts of Italy with England and France during the Renaissance.
PROFESSOR D'ANDREA & STAFF

132-351A. ARIOSTO'S ORLANDO FURIOSO. (3 credits; *Prerequisite:* Italian 240D, 251A or 252B, or permission of the Department.) The chivalresque genre and the courtly life of the Renaissance. Readings from Pulci's *Morgante,* Boiardo's *Orlando innamorato,* Castiglione's *Cortegiano,* and from the *Orlando Furioso.* PROFESSOR STEWART

132-352B. FROM THE RENAISSANCE TO THE BAROQUE AGE: TASSO; THE ITALIAN PROSE FROM THE LATE 16th TO THE EARLY 18th CENTURY. (3 credits; *Prerequisite:* Italian 351A, or permission of the Department.) The crisis of the Italian Renaissance and Tasso's *Gerusalemme Liberata.* Literary criticism; erudition; scientific and philosophical prose from Galilei to Vico. PROFESSOR STEWART

132-360D. SEMINAR ON ITALIAN STYLISTICS AND COMPOSITION. (6 credits; 2 lecture hours per week and report on special assignment; *Prerequisite:* Permission of the Department.) Intensive practice in stylistics and composition, with special emphasis on literary style. Seminar discussions on exercises and papers submitted by the students. Oral dissertations on various subjects, mainly of a literary character, prepared and delivered by students. STAFF

132-401A. VERGA AND THE "VERISMO". (3 credits; *Prerequisites:* Italian 240D, 251A or 252B, or permission of the Department.) The realistic movement in Italian narrative prose (end of the 19th and beginning of the 20th century), with special emphasis on the novels and short stories of its main representative, Giovanni Verga. PROFESSOR PICONE & STAFF

132-402B. MODERN ITALIAN LITERATURE. (3 credits; *Prerequisite:* Italian 401A, or permission of the Department.) A study of representative works of major Italian twentieth-century authors. PROFESSOR PICONE

132-451A. BOCCACCIO AND THE ITALIAN NOVELLA. (3 credits; *Prerequisite:* Italian 240D, 251A or 252B, or permission of the Department; Not given in 1974-75.) A study of Boccaccio's *Decameron* and of the Italian narrative prose up to the sixteenth century. PROFESSOR STEWART

132-452B. THE ITALIAN DRAMA OF THE RENAISSANCE. (3 credits; *Prerequisite:* Italian 451A, or permission of the Department; Not given in 1974-75.) The role of Humanism in the revival of Drama. Secular and religious festivals. The audience and the stage. Representative works of the major playwrights. PROFESSOR STEWART

132-461A. DANTE: THE DIVINE COMEDY. (3 credits; *Prerequisites:* Italian 240D, 251A or 252B, or the equivalent, and permission of the Department.) The structure and intellectual background of the *Divine Comedy:* a reading and interpretation of the poem; a discussion of the main trends in contemporary Dante scholarship. PROFESSOR D'ANDREA

132-462B. PETRARCH AND PETRARCHISM. (3 credits; *Prerequisites:* Italian 240D, 251A or 252B, or the equivalent, and permission of the Department.) Petrarch's life, his temperament, his works; a reading and interpretation of his lyrical poetry; an account of his influence as a lyric poet in Italy and abroad. PROFESSOR D'ANDREA

132-464B. MACHIAVELLI: THE PRINCE. (3 credits; *Prerequisites:* Italian 240D, 251A or 252B, or the equivalent, and permission of the Department; Not given in 1974-75.) An analysis of the text of *The Prince.* Selected readings from Machiavelli's other works. PROFESSOR D'ANDREA

132-470D. SEMINAR ON ITALIAN LITERATURE. (6 credits; 2 lecture hours per week and report on special assignment; *Prerequisite:* permission of the Department.) Students will be assigned a reading program designed to integrate their knowledge of Italian literature, and will be required to take part in weekly Seminar discussions with Staff members. PROFESSOR D'ANDREA & STAFF

132-490D. TUTORIAL. (6 credits; *Prerequisite:* For Honours students only.) Upon entry into the Honours program in Italian, every student will be entrusted to a Tutor. The Tutor will meet the student regularly during the term to discuss special assignments (readings, essays, etc.) STAFF

JEWISH STUDIES PROGRAM (135)

3511 Peel Street, Room 103, telephone 392-5969

The Jewish Studies Program of McGill University, established in 1968, offers an interdisciplinary approach to Jewish learning at the undergraduate level. The aims of the Program include:

— Providing a selection of courses which will enable the student not majoring in Jewish Studies to broaden his knowledge of Jewish history and culture;

— Providing specialized courses in the various disciplines that comprise Jewish Studies for the student who has specific academic interests;

— Providing comprehensive undergraduate majors and honours programs, culminating in advanced seminars and tutorials for students contemplating careers in the various and ramified fields of Judaica. The Honours program in Jewish Studies will give the student the necessary linguistic, textual and bibliographical knowledge to enable him to pursue graduate work in Jewish Studies.

The Program consists of courses in Hebrew and Yiddish language and literature, complemented by courses in Jewish history and philosophy offered in their respective departments. Offerings currently include complete language sequences in both Hebrew and Yiddish, as well as advanced courses in Hebrew literature — Rabbinic, Medieval and Modern — and Yiddish literature. Some of the advanced courses involve textual studies requiring a knowledge of the original languages; others are intended for students unacquainted with the languages. Many of the courses in the Jewish Studies Program are cross-listed with those offered by other departments viz. History, Philosophy, Comparative Literature; these courses are credited towards the Major or Honours program.

Although the Jewish Studies Program at McGill is multifaceted, treating many of the most significant areas of Judaica, our major focus, we hope, will be on the modern period, emerging from an intensive interdisciplinary study of 19th and 20th Century Hebrew and Yiddish literature and intellectual and social history. Consonant with this orientation, the establishment of an M.A. program in comparative Hebrew and Yiddish literature is projected in the near future.

Major in Jewish Studies

A major in Jewish Studies is composed of nine Jewish Studies courses, including at least one Jewish language completed after three years of instruction. In addition, at least two of the nine courses should be taken within the Program's offerings in Philosophy, History, and Religious Studies. A student who meets the third year language requirement in one Jewish language may submit the first year of the second Jewish language towards the nine course total.

Honours in Jewish Studies

A B.A. (Honours) in Jewish Studies is composed of eleven courses within the Program's offerings. The student shall take three courses in Hebrew (given in Hebrew) at at least the third year of instruction. In addition, the student will take at least two courses in Jewish history (History 207D is required), at least one course in Jewish philosophy, and also *at least* one tutorial or seminar course in Hebrew, Yiddish, Jewish History or Jewish Philosophy. A student who meets the third year language requirement in Hebrew may submit the first year of Yiddish towards the eleven course total. In addition to the requirement for the Honours B.A. degree, Honours in Jewish Studies requires (a) a grade of at least B in every Jewish Studies course and (b) a senior thesis in some phase of Jewish Studies prepared under the direction of a staff member.

Honours/Major Advisor: Professor Warren Harvey 392-4517

Course Descriptions

Courses listed below fall under two categories — those which are primarily devoted to Jewish material, and those which are secondarily so concerned.

The middle digit of a Jewish Studies course number designates the cultural domain of the course: Middle digits 0, 1 designate a Hebrew course in English; Middle digits 2, 3, 4 designate a Hebrew course in Hebrew; Middle digit 5 designates a miscellaneous Jewish Studies course given in English; Middle digits 6, 7 designate a Yiddish course in English; and Middle digits 8, 9 designate a Yiddish course in Yiddish.

HEBREW LANGUAGE AND LITERATURE SEQUENCE

135-201D. SURVEY OF HEBREW LITERATURE OF THE BIBLICAL PERIOD. (6 credits; Not given in 1974-75.)

135-220D. INTRODUCTORY HEBREW. (6 credits.) STAFF

135-301D. LITERATURE OF THE SECOND COMMONWEALTH AND TALMUDIC PERIODS. (6 credits.) A study of classic post-Biblical texts. First term: Midrash, Mishnah and Talmud. Second term: Historical and sectarian works; Apocrypha, Philo, Josephus, Dead Sea Scrolls. Lectures and readings in English. PROFESSOR KAPLAN

135-309D. THE IDEA OF THE JEWISH PEOPLE. (6 credits; *Prerequisite:* History 207D or permission of instructor; Not given in 1974-75.) The history and significance of "peoplehood" in Judaism from the Biblical Period until the French Revolution. The foci of the course will be (a) The meaning of the concept in Jewish thought and (b) The political structures that evolved from it.

135-311D. HISTORY OF JEWISH MESSIANISM AND MESSIANIC THOUGHT FROM BIBLICAL TIMES UNTIL SABBETAI ZEVI. (6 credits; Not given in 1974-75.) First term: Messianic thought in the Bible, apocalyptic literature, Dead Sea Scrolls, and Rabbinic literature. Second term: Messianic thought in Mediaeval Jewish philosophy and mysticism. Messianic movements in the Middle Ages. Sabbatianism. Lectures and readings in English. PROFESSOR KAPLAN

135-320D. INTERMEDIATE HEBREW. (6 credits.) STAFF

135-340D. ADVANCED HEBREW. (6 credits; *Prerequisite:* Intermediate Hebrew (320D).) A study of Hebrew using theatrical and/or radio productions as texts. Productions of the material studied will be scheduled. A general approach to the theatre is recommended. PROFESSOR LEVY

135-343D. INTRODUCTION TO BIBLICAL TEXTS. (6 credits; *Prerequisite:* Hebrew 320D or its equivalent; Not given in 1974-75.) Detailed number of Biblical texts will be carefully examined and analysed. In Hebrew.

135-345D. INTRODUCTION TO RABBINIC LITERATURE. (6 credits.) An introduction to the study of rabbinic texts (Tannaitic and Amoraic) in the original. Both conceptual analysis and critical method will be stressed. This course is given in Hebrew and may be taken as an alternative to Hebrew 340D. PROFESSOR KAPLAN

135-403D. MAJOR IDEAS AND MOTIFS OF CLASSICAL JUDAISM. (6 credits; *Prerequisite:* Hebrew 301D or Hebrew 345D or permission of instructor; Not given in 1974-75.) First term: Basic motifs and values of rabbinic thought; God, man, and peoplehood. Second term: the basis, function and scope of rabbinic ethics; law, justice, and community. Lectures and readings in English.

135-410D. THE IMAGE OF THE ISRAELI IN MODERN HEBREW LITERATURE. (6 credits.) The course will deal with the transition of the Israeli from the two-dimensional treatment in earlier Hebrew Literature to the more recent three dimensional characterization of the subject. Basic themes will include the attitude of the Israeli towards Diaspora Jewry, Jewish religion, Israel as a state, its ideologies, etc. In English. PROFESSOR LEVY

135-420D. MODERN HEBREW DRAMA. (6 credits; *Prerequisite:* Hebrew 340D or permission of instructor; Not given in 1974-75.) Theatre, a relatively recent phenomenon in Jewish culture, bears the tension engendered by the quest for an authentic national idiom and the desire to integrate with contemporary developments in Western theatre and culture. PROFESSOR LEVY

135-421D. HEBREW LITERATURE IN THE ISLAMIC WORLD. (6 credits; *Prerequisite:* Hebrew 340D or permission of instructor; Not given in 1974-75.) Through the reading of the original Hebrew texts, the student will be introduced to the civilization of the Jews in

the Islamic world and the cultural relationships between Jews and Arabs in the period 500-1500 A.D.

135-444D. TUTORIAL IN HEBREW LITERATURE. (6 credits.) Topic for 1974-75: To be announced. PROFESSOR KAPLAN

135-445D. TUTORIAL IN HEBREW LITERATURE. (6 credits; *Prerequisite:* Third year Hebrew or permission of instructor.) Topic for 1974-75: Talmud: Bava Kamma PROFESSOR KAPLAN

135-446D. TUTORIAL IN HEBREW LITERATURE. (6 credits.) PROFESSOR KAPLAN

135-447D TUTORIAL IN HEBREW LITERATURE. (6 credits; *Prerequisite:* Advanced Hebrew 340D or permission of instructor.) Topic for 1974-75: The Modern Hebrew Short Story. PROFESSOR LEVY

135-448D. TUTORIAL IN HEBREW LITERATURE. (6 credits.) PROFESSOR LEVY

135-449D. TUTORIAL IN HEBREW LITERATURE. (6 credits.) PROFESSOR LEVY

YIDDISH LANGUAGE AND LITERATURE SEQUENCE

135-280D. YIDDISH LANGUAGE. (6 credits; 1 laboratory period.) Concentrated introduction to spoken and written Yiddish. Selected readings in Yiddish literature. MR. TENCER

135-360D. MODERN YIDDISH PROSE. (6 credits; Not given in 1974-75.) Treats the development of Yiddish prose and poetry from 1864 to the present. Lectures and readings in English. PROFESSOR WISSE

135-362D. THE SHTETL. (6 credits.) Using historical, sociological, literary, and cultural sources, this course will examine various aspects of communal and individual life in the *shtetl*, the Jewish — or largely Jewish — town of Eastern Europe. Readings and discussion in English. PROFESSOR WISSE

135-380D. INTERMEDIATE YIDDISH. (6 credits; *Prerequisite:* Yiddish 280D or permission of instructor.) This course is designed to develop the student's language skills upon completion of the text *College Yiddish* (Vol. 1). Selected literary texts will be studied and themes will be set for composition in Yiddish to improve the student's grasp of proper usage and style. PROFESSOR ORENSTEIN

135-381D. YIDDISH LITERATURE. (6 credits; *Prerequisite:* Reading knowledge of Yiddish.) The course will treat the development of the Yiddish short story in the 19th and 20th centuries. PROFESSOR WISSE

135-495D. TUTORIAL IN YIDDISH LITERATURE. (6 credits.) PROFESSOR ORENSTEIN

135-496D. TUTORIAL IN YIDDISH LITERATURE. (6 credits.) Topic for 1974-75: Sholem Aleichem: Intensive readings and research in the work of Sholom Aleichem. Materials and classwork in Yiddish. PROFESSOR WISSE

135-497D. TUTORIAL IN YIDDISH LITERATURE. (6 credits.)

JEWISH STUDIES SEQUENCE

135-351A. STUDIES IN MODERN JEWISH FICTION. (3 credits.) Emphasis on North American authors but some others will be included. Attention will be given to historical background with part of the emphasis on the social and political position of the Jews since early 19th century. Authors: A.M. Klein, I.B. Singer, and Elie Wiesel among others. PROFESSOR LINDEMAN

135-354A. INTERDISCIPLINARY LECTURES IN JEWISH STUDIES. (3 credits.) Topic for fall 1974; Conformism and Nonconformism in Jewish History. The dynamics of tradition and innovation in Jewish history: society, community and individual; heretics and revolutionaries; the Jew as proverbial nonconformist. Readings and lectures in English. STAFF

135-358A. INTERDISCIPLINARY LECTURES IN JEWISH STUDIES. (3 credits.) STAFF

135-353B. INTERDISCIPLINARY LECTURES IN JEWISH STUDIES. (3 credits.) STAFF

135-357B. INTERDISCIPLINARY LECTURES IN JEWISH STUDIES. (3 credits.) STAFF

135-359B. INTERDISCIPLINARY LECTURES IN JEWISH STUDIES. (3 credits.) Topic for spring 1975; to be announced. STAFF

135-356D. THE JEWISH LABOUR MOVEMENT. (6 credits.) This course treats the development of the Jewish Labour Movement both in Eastern Europe and North America from the last quarter of the 19th Century to the Bolshevik Revolution. Special emphasis is given to the problem of nationalism and cosmopolitanism within the Jewish Labour Movement and to the movement's influence on secular Jewish culture. PROFESSOR ORENSTEIN

ADDITIONAL PROGRAM COURSES

101-207D. A HISTORY OF THE JEWS FROM LATE CLASSICAL TIMES TO THE PRESENT. (6 credits; *Prerequisite:* History 105D possibly concurrently is recommended.) A general introductory survey of the history of the Jewish people from late classical times to the present in the context of general world history. Emphasis will be placed on general trends and developments, and special attention will be paid to areas of major Jewish settlements. The first term will deal with the period up to 1492, while the second term will cover the period from 1492 to the present. PROFESSOR SWETSCHINSKI

101-317D. JEWISH HISTORY FROM THE REFORMATION TO THE FRENCH REVOLUTION. (6 credits; *Prerequisite:* History 207D or one course in Modern European History is recommended; Not given in 1974-75.) An examination of the main events, trends and issues in modern Jewish history in the context of the general background. The first term will be devoted to the Sephardic experience, the second to the Ashkenazi.
PROFESSOR SWETSCHINSKI

101-337D. JEWISH HISTORY FROM THE FRENCH REVOLUTION TO THE PRESENT. (6 credits.) Major developments (social, economic, political, religious and cultural) within the Jewish community and affecting the Jews. The emphasis will be on a comparative analysis of parallel developments in such major countries as England, France, Germany, Poland and Russia. PROFESSOR SWETSCHINSKI

101-479D. JEWISH HISTORY. (6 credits; Not given in 1974-75.)
PROFESSOR SWETSCHINSKI

107-345D. SURVEY OF JEWISH PHILOSOPHY. (6 credits.) Discussions of major works of Jewish Philosophers with focus on the nature of man, prophecy, love. First term: Philo of Alexandria to the Maimonidean Revolution; Second term: Renaissance to Existentialism.
PROFESSOR HARVEY

107-452A. THEMES IN THE HISTORY OF JEWISH PHILOSOPHY. (3 credits; *Prerequisite:* Permission of instructor.) Topic for 1974-75: An exploration of the origin and development, together with a study of the philosophical and theological significance, of the theory that the American Indians are the Lost Tribes of Israel. PROFESSOR POPKIN

107-448A/449B. LEGAL AND MORAL PHILOSOPHY OF THE JEWISH TRADITION. (3 credits; *Prerequisite:* Consent of lecturer.) Readings of philosophical texts will be done in Hebrew. Texts will be chosen in conjunction with the interest of participating students. 107-449B is a continuation of 107-448A. PROFESSOR HARVEY

260-300A. THE POST-BIBLICAL JEWISH TRADITION. (3 credits.) Topic for fall 1974: The Origins of Rabbinic Judaism. A survey of Jewish history and thought from Ezra to the Tannaim; oral tradition; Torah interpretation in the Mishna and Midrashim.
PROFESSOR RUNNALLS

260-301B. THE POST-BIBLICAL JEWISH TRADITION. (3 credits.) Topic for spring 1975: The religion and literature of Secterian groups. Apocalyptic thought, wisdom thought; Dead Sea Scrolls; Josephus. PROFESSOR RUNNALLS

JEWISH TEACHER TRAINING PROGRAM

This program was established in 1973 in the Faculty of Education in conjunction with the Jewish Studies Program. The goal is to train teachers of Jewish Studies for the elementary and secondary school levels through exposure to educational theory and methodology and courses in Jewish Studies. A B.Ed. with Jewish Studies as a specialization is available.

Director, Prof. S. Epstein, 392-8257.

422-401A. TEACHING BIBLICAL LITERATURE I. (3 credits.) A survey of the narrative portion of the Pentateuch with a view to teaching this material in Jewish schools. An examination of some of the techniques presently being developed in Bible teaching.

422-402B. TEACHING BIBLICAL LITERATURE II. (3 credits.) A survey of selected material in Prophets and Writings with a view to teaching this material in Jewish schools. An examination of some of the techniques presently being developed as they relate to Prophets and Writings.

422-404A. TEACHING HEBREW/YIDDISH AS A SECOND LANGUAGE. (3 credits.) A study of the most up-to-date method and theory related to the teaching of Hebrew and Yiddish as a second language in both day schools and supplementary settings.

422-400B. TEACHING JEWISH CUSTOMS AND CEREMONIES. (3 credits.) An exposure to all facets of Jewish practices; life cycle, calendar cycle, prayer, etc. Methods for applying this material to the Jewish classroom.

COURSES OF REALTED INTEREST

260-390D. HEBREW LANGUAGE. (6 credits.) PROFESSOR RUNNALLS

260-490D. ADVANCED BIBLICAL HEBREW. (6 credits.) PROFESSOR CULLEY

NOTE: The two above courses are designed to provide a reading knowledge of Biblical Hebrew. They may be taken only with the instructor's permission.

260-200D. RELIGIOUS TRADITION OF THE ANCIENT NEAR EAST. (6 credits.) The religion of Ancient Israel in the setting of the Ancient Near East: a brief consideration of religion in general, its origin, nature and study; other religions of the Ancient Near East, e.g. those of Egypt and Mesopotamia: the religion of Ancient Israel.

PROFESSOR RUNNALLS

LINGUISTICS (104)

Samuel Bronfman Building, Room 584. Tel. 392-4433

General Information

The field of Linguistics deals with the study of language as a phenomenon of human behaviour and the following course list indicates the several areas covered. The Department of Linguistics does not normally undertake the teaching of any specific language, especially where provision for such instruction is made elsewhere in the University. Many linguistics courses, however, serve as a useful basis for or adjunct to language learning as well as to other fields of study.

In its undergraduate section the Department of Linguistics offers a Major, Honours and Joint Honours program to students wishing various degrees of concentration in Linguistics.

Major Program

The Major program in Linguistics includes:

1) 36 Credits in Linguistics. The following courses are required: 104-200A and 201B or 200B and 201A, 350A, 351B, 360A, 361B, 400A, 480A. The other courses are selected in consultation with the Department;
2) 18 Credits taken in one or two of the following disciplines: Anthropology, Language (classical or modern), Philosophy, Psychology, Mathematics, Sociology. One of the three courses may be taken in Linguistics.

For information on the Major in Classics and Linguistics, see page 79, Department of Classics.

Inquiries may be addressed to the departmental office or the advisers for undergraduate studies.

Honours Program

The Honours program in Linguistics includes:

1) 42 Credits in Linguistics, to include 104-200A and 201B or 200B and 201A, 350A, 351B, 360A, 361B, 400A, 401B, 480A, 481B, 482D and two other half courses to be selected in consultation with the Department;
2) Four full language courses, beyond the introductory level, in two languages: a major language (18 Credits) and a minor language (6 Credits). Students may choose either a classical language and a modern language, or two modern languages one of which must be French, German or Russian;

3) 24 Credits in two subjects other than language and linguistics. Anthropology, English, Mathematics, Philosophy, Psychology, and Sociology are recommended, but other subjects may also be included with the permission of the Department.

An average B grade (minimum 65% - G.P.A. of 2.8) is required to maintain Honours standing in Linguistics and a minimum mark of 65% is normally required in each of the obligatory Linguistics courses. The normal requirement for First Class Honours is a G.P.A. of 3.6 and a high level of achievement in the research thesis (482D). Inquiries may be addressed to the departmental office or to the advisers for undergraduate studies.

Joint Honours Programs

Joint Honours programs, combining Linguistics with any one of the following subjects, are available: Anthropology, Classics, English, French, German, Ancient Greek, Italian, Latin, Philosophy, Russian, and Spanish.

Linguistics courses required for Joint Honours in Anthropology and Linguistics: 200A and 201B or 200B and 201A, 230A, 241B, 350A, 351B, 360A, 361B, 408A, 481B and another 400 level half course.

Linguistics courses required for Joint Honours combining Linguistics and a language: 200A and 201B or 201A and 200B, 350A, 351B, 360A, 361B, 400A, 401B, 480A, 481B, and two other semester courses to be determined in consultation with the Department.

For courses required in other subjects combined with Linguistics, please consult the other Department.

An average B grade (minimum 65% - G.P.A. of 2.8) is required to maintain Honours standing in Linguistics. Inquiries may be adressed to the departmental office or to the advisers for undergraduate studies.

Course Descriptions

NOTE: One A and one B section from Linguistics 200 or 201 is the normal prerequisite to all upper level Linguistics courses.

104-200A,B/104-201A,B. INTRODUCTION TO THE STUDY OF LANGUAGE. (3 credits each semester.) The first section of the course will discuss some of the fundamental questions in explaining and describing language. A core of obligatory topics deals with sound, syntax, semantics and language change. In addition to these, the student will make a choice from an extended list of related issues. The second section covers additional areas including linguistics as science, non-verbal communication, language acquisition and loss, bilingualism, language as a formal system, cross-cultural linguistics, language in the arts, the empiricism/rationalism dispute as seen by linguists, and others. There will be only a few introductory lectures following which the student will work independently and in private and group tutorials. The aim of the course is to acquaint beginners in Linguistics with the wide range of contemporary views on language.

104-230A. ANTHROPOLOGICAL LINGUISTICS. (3 credits.) This course will introduce students to language and its place in culture. Major topics will include the following: human language as a unique system, the development of language in mankind and individuals, similarity and diversity among languages, the interdependence between language and culture, the ethnography of speaking, linguistic change.

104-241B. SOCIOLINGUISTICS. (3 credits; *Prerequisite:* Linguistics 200A, 201A or 230A.) This course will focus on linguistic correlates, determinants, and consequences of social behaviour. Major topics will include linguistic variation, the description of speech events, the determinants of stylistic and linguistic choice, types of multilingual communities and language planning.

104-305D. SELF-INSTRUCTIONAL LANGUAGE MODULE. (6 credits.) A self-instructional course in the active control of a language required by the student and not offered by any department within the university. The course will be under the supervision of a staff-member, with guided practice with a native speaker. *(Given by special arrangement with the Department only.)*

104-321B. LINGUISTICS APPLIED TO LANGUAGE LEARNING. (3 credits.) A critical study of the application of linguistic theory and description to first and second language learning. The relationship between spoken and written language.

104-330A. INDIAN LANGUAGES OF NORTH AMERICA. (3 credits; *Prerequisite:* Linguistics 200A, 201A, 230A or permission of instructor.) An introduction to Indian languages of North America: a study of their distribution and classification with special attention to selected structural types; a consideration of certain socio-linguistic problems.
PROFESSOR ELLIS

104-350A. GENERAL PHONETICS. (3 credits; *Prerequisite:* Linguistics 200A or 201A.) Intensive training in the identification and production of speech sounds, followed by an acoustical analysis of speech and study of the process of auditory perception. Demonstration sessions in the Phonetics Research Laboratory form part of the course.
PROFESSOR RIGAULT

104-351B. PHONOLOGY. (3 credits; *Prerequisite:* Linguistics 350A.) Survey of the development of phonology: the concept of the phoneme, structural phonology, generative phonology. Introduction to the various techniques of phonological analysis. Discussion of current issues in phonological theory.
PROFESSOR RIGAULT

104-360A. THEORY OF MORPHOLOGY AND SYNTAX. (3 credits.) Proficiency in the techniques of generative grammatical research developed through application of theory to problems of limited scope.
PROFESSOR LIGHTFOOT

104-361B. SEMINAR IN MORPHOLOGY AND SYNTAX. (3 credits; *Prerequisite:* Linguistics 360A.) Detailed research into some linguistic problem, with regard to either language-particular or universal significance, or both.
PROFESSOR LIGHTFOOT

104-400A. THEORY AND METHODS OF HISTORICAL LINGUISTICS. (3 credits.) Theory of linguistic change; philological techniques (contrasted with field methods); exemplification from familiar languages.

104-401B. SEMINAR IN HISTORICAL LINGUISTICS. (3 credits; *Prerequisite:* Linguistics 400A.) Problems in the history of selected languages studied for their importance both to particular and to universal grammar.

104-410A. STRUCTURE OF A SPECIFIC LANGUAGE. (3 credits.) (1974: The Structure of Sanskrit.) A detailed study of the structure of a specific language is offered each year. For 1974 the language selected for study is Sanskrit.
PROFESSOR LIGHTFOOT

104-425A. LANGUAGE AND THOUGHT. (Same as PSYCHOLOGY 425A. For description, see under PSYCHOLOGY.)

104-430A/104-431B. AREAL LINGUISTICS. (3 credits; *Prerequisite:* Linguistics 200A or 201A. Not given in 1974-75.) Intensive study of a selected language block relating to a specific geographical, political or cultural area. While the orientation is necessarily linguistic, problems examined may be drawn from the total range of contact between language on the one hand and human culture and society on the other.

104-450A. GENERATIVE PHONOLOGY. (3 credits.) The principles and methods of modern generative phonology. Attention will be given to the sound structure of natural languages and the insights which the theory of generative phonology brings to bear on the nature of phonological systems in general. Basic differences between this theory and other theories of sound structure will be examined. A number of illustrative problems will be drawn from a wide range of languages.
PROFESSOR PIGGOTT

104-460A. PROSEMINAR IN A SELECTED FIELD. (3 credits.) Intensive study of a selected field or topic chosen to balance the requirements of the Honours program or provide for coverage of developing or less familiar areas of linguistic inquiry.
PROFESSOR BELLERT

104-461B. ADVANCED SYNTAX. (3 credits; *Prerequisite:* Linguistics 361B.) Consult department for detailed description.

104-480A. SEMINAR IN LINGUISTIC THEORY. (3 credits.) Discussion of advanced topics chosen for their importance to linguistic theory. Competing views will be compared.
PROFESSOR GOPNIK

104-481B. FIELD METHODS OF LINGUISTICS. (3 credits.) Elicitation, recording and analysis of linguistic data under simulated field conditions; consideration of typical problems confronting the field analyst.
PROFESSOR ELLIS

104-482D. FIELD OR RESEARCH PROJECT. (6 credits.)

MATHEMATICS (189)

Burnside Hall, Room 1005, Telephone 392-5369

General information, Courses and Course descriptions appear on page 225. The following programs of study are designed to provide students with every opportunity to enter a wide variety of fields.

Major in Mathematics

Programs of study for students entering U1 in 1974-75.

The compulsory courses are 189-120A,B, 189-121A,B, 189-221A,B, 189-222A,B, 189-245A,B.

Advisers will approve a program of which 54 credits will be in Mathematics (excluding 120A,B, 121A,B, 221A,B) or allied courses including at least 36 credits from the following: 189-217A, 189-218B, 189-242A, 189-243B, 189-246A,B, 189-314A,B, 189-315A,B, 189-316B, 189-317A, 189-318A, 189-319A,B, 189-323A,B, 189-324B, 189-327B, 189-328B, 189-333A, 189-346B, 189-348A, 189-349B, 189-360B, 189-369D, 189-415A, 189-416A, 189-417A, 189-419B, 189-423A, 189-424B, 189-425A, 189-447B.

Guidelines for Selection of Courses in the Major Program

a. Students are advised to include the following courses in their program: 189-246A,B, 189-314A,B, 189-315A,B, 189-317A, 189-323A,B, 189-324B, 308-200A,B.

b. Students planning to pursue graduate studies are advised to include 189-242A, 189-243B and 189-333A in their program, and to consider substituting one or more honours courses for the corresponding courses in the Major program.

c. Students considering a career in teaching are advised to include in their program the following courses: 189-217A, 189-218B, 189-242A, 189-318A, 189-328B, 189-346B, 189-349B.

d. Students interested in probability and statistics are advised to also include in their program the following courses: 189-242A, 189-423A, 189-424B, 189-425A, 189-447B, as well as a course in Fortran such as 308-200A,B. With the instructor's permission the graduate courses 189-682A, 308-690A, 308-691B might also be included.

e. Students interested in applied mathematics are advised to include in their program some or all of the following courses: 189-218B, 189-242A, 189-316B, 189-319A,B, 189-323A, 189-324B, 189-327B, 189-415A, 189-416A, 189-417A, 189-419B, 308-200A,B.

f. Students interested in computer science are advised to register in the following courses: 189-318A, 189-327B, 189-328B, 189-417A, 308-200A,B, 308-300A,B; they should choose additional courses from 189-319A,B., 189-415A, 189-416A, 189-419B, 189-423A, 189-424B, 189-425A, 189-447B, 308-640D*, 308-610A*, 308-690A*, 308-691B* or 308-698A* and 308-699B*.

g. Students interested in careers in actuarial work, in industry or government are advised to select courses from the following list: 189-319A,B, 189-327B, 189-328B, 189-329D, 189-369D, 189-415A, 189-416A, 189-417A, 189-419B, 189-423A, 189-424B, 189-425A, 189-447B, 308-200A,B.

The student's attention is called to the fact that a B.Com. degree with a Major in Mathematics is available from the Faculty of Management. In addition the Faculty of Music offers a degree of B.Mus. (Honours in Theory with Mathematics Option.)

*These courses require special permission from the instructors.

Honours Program

The minimum requirement for entry into the Honours Program is that the student has completed with high standing the following courses: 189-120A,B, 189-121A,B, 189-221A,B. He should preferably also have taken 189-222A,B.

Requirements for Honours in Mathematics

For an Honours Degree in Mathematics the student must obtain 90 course credits; at least 60 of these should correspond to Honours courses, or their equivalent not less than 45 to Honours courses in Mathematics. In addition to the latter, the student may count towards his 60 credit Honours requirement:

i) half of the courses he has taken from the Major Program in Mathematics (including Computer Science courses) for which no equivalent Honours course exists;

ii) (with the approval of the Department of Mathematics) certain courses in other departments which are at an Honours level, and are closely linked to Mathematics;

iii) (with the approval of the Department of Mathematics) half the courses he has taken in other departments, which while not necessarily explicitly mathematical in nature, are at an Honours level and broaden the student's scientific training. Students who transfer to Honours in Mathematics from other programs will have credits for previous courses assigned, as appropriate, by the Department.

The following courses are compulsory: 189-271D, 189-272D, 189-371D, 189-372D.

To remain in the Honours Program, and to be awarded the Honours Degree, the student must maintain a 2.8 Grade Point Average.

Guidelines for selection of courses in the Honours Program

a. The compulsory courses may be spread over the three years study.

b. Students taking 189-271D and 189-272D simultaneously are advised to register also for 189-273D.

c. Students are advised to include in their program the following courses: 189-273D, 189-356A, 189-357B, 189-374D, 189-380D.

d. Students interested in Statistics should register for 189-556D and 189-587D in addition to 189-356A and 189-357B.

e. Students in Applied Mathematics should register for some or all of the courses 189-407B, 189-574A, 189-575B, 189-478A and 189-479B in addition to 189-374D. They are also advised to select courses in areas to which they can apply their mathematics.

MUSIC (211, 214, 243)

The Faculty of Music offers several courses that may be taken by students in the Faculties of Arts and of Science. Students following the Bachelor of Arts or Bachelor of Science curriculum may take music courses as electives.

Sequence A is designed for students who have at least high school Matriculation Music or the equivalent. The courses in this series offer a technical study of the theory, analysis, history and literature of western music.

Sequence B is intended for those students who have had little or no formal training in music before coming to university. The courses of this sequence emphasize the study of the history and literature of western music, and contain

only that amount of technical study (notation, theory) indispensable to the objectives of these courses.

Students who begin their studies in sequence A normally continue in the same series. However, a change from sequence A to sequence B is allowed after either Music 211-111B or Music 214-185B.

Sequence A

211-110A. MELODY AND COUNTERPOINT. (3 credits; *Prerequisite:* Matriculation Music or McGill Preparatory Theory Secondary II [Grade 9] or equivalent; 3 hours.) For course description see Music *Department of Theory Handbook.* STAFF

211-111B. ELEMENTARY HARMONY. (3 credits; *Prerequisite or co-requisite:* 211-110A; 3 hours.) For course description see Music *Department of Theory Handbook.* STAFF

211-224D. TONAL THEORY AND ANALYSIS. (6 credits; *Prerequisites:* 211-110A and 211-111B [or old course 211-223D or 211-121D]; 3 hours.) For course description see Music *Department of Theory Handbook.* STAFF

211-321D. LATE 19th AND 20th CENTURY THEORY AND ANALYSIS. (6 credits; *Prerequisite:* 211-224D [or old course 211-221D]; 3 hours.) For course description see Music *Department of Theory Handbook.* STAFF

214-184A. HISTORY SURVEY. (Classical, Romantic, and 20th Century.) (3 credits; *Prerequisite or co-requisite:* 211-110A and 211-111B [or old course 211-121D or 211-223D] or permission of the instructor; 3 hours.) *Note: This course will be a condensation of the previous History Survey 214-180D that will no longer be offered.*

214-185B. HISTORY SURVEY. (Classical, Romantic, and 20th Century.) (3 credits; *Prerequisite or corequisite:* 214-184A [or old course 214-180D] or permission of the instructor; 3 hours.) *Note: This course will be a condensation of the previous History Survey 214-280D that will no longer be offered.*

NOTE: Music History and Literature courses 214-380A to -389A all have prerequisites of History Survey 214-184A, *and* -185B, or permission of the instructor. These courses are *not* restricted to Honours students.

214-380A. MEDIAEVAL MUSIC. (3 credits.)

214-381A. RENAISSANCE MUSIC. (3 credits; Not given in 1974-75.)

214-382A. BAROQUE MUSIC. (3 credits.)

214-383A. CLASSICAL MUSIC. (3 credits; Not given in 1974-75.)

214-384B. ROMANTIC MUSIC. (3 credits.)

214-385B. TWENTIETH CENTURY MUSIC. (3 credits; Not given in 1974-75.)

214-386A. CHAMBER MUSIC LITERATURE. (3 credits.)

214-387B. OPERA LITERATURE. (3 credits.)

214-388B. KEYBOARD LITERATURE. (3 credits; Not given in 1974-75.)

214-389B. ORCHESTRAL LITERATURE. (3 credits.)

214-390A. VOCAL LITERATURE. (3 credits; Not given in 1974-75.)

214-391B. CANADIAN MUSIC. (3 credits; Not given in 1974-75.)

Sequence B

214-215D. INTRODUCTION TO THE ART OF MUSIC. (6 credits; 3 hours plus 1 hour of guided listening; no music prerequisite needed.) A course designed to provide grounding in the historical styles, materials, and forms of western music as well as in related elementary theory and notation. Selected masterpieces of various periods will be presented and analysed. PROFESSOR MARKS

214-316A. MUSIC OF THE MIDDLE AGES. (3 credits; 3 hours plus 1 hour of guided listening; *Prerequisite:* Music 214-215D or by permission of the instructor; Not given in 1974-75.) European music from 600 to 1400 with special emphasis on the social milieu and performance practice of the period.

214-317B. MUSIC OF THE RENAISSANCE. (3 credits; 3 hours plus 1 hour of guided listening; *Prerequisite:* Music 214-215D or by permission of the instructor; Not given in

1974-75.) A study of the main developments in sacred and secular music of the 15th and 16th centuries. Franco-Flemish tradition and its diffusion in Italy, Spain, Germany and England. Renaissance music and contemporary thought. Poetry and music in the Renaissance. Instrumental music of the Renaissance.

214-318A. MUSIC OF THE BAROQUE. (3 credits; 3 hours plus 1 hour of guided listening; *Prerequisite:* Music 214-215D or by permission of the instructor; Not given in 1974-75.) The historical and sociological development of music from 1600 to 1750. Vocal and instrumental music, both sacred and secular. New forms (opera, cantata, oratorio, sonata, concerto grosso, etc.). Musical instruments. Works of composers from G. Gabrieli and Monteverdi to Handel and Bach.

214-319B. MUSIC OF THE CLASSICAL PERIOD. (3 credits; 3 hours plus 1 hour of guided listening; *Prerequisite:* Music 214-215D or by permission of the instructor; Not given in 1974-75.) The course will survey the music written in the period encompassed by the Pre-Classic foundations of the music of Haydn, Mozart and Beethoven, beginning about 1750, and proceeding up to the death of Franz Schubert in 1828.

214-326A. MUSIC OF THE ROMANTIC PERIOD. (3 credits; 3 hours plus 1 hour of guided listening; *Prerequisite:* Music 214-215D or by permission of the instructor.) The course will trace the development of the Romantic idiom from its beginnings in the late eighteenth century to the end of the nineteenth century, and follow the development by an analysis of works by major composers in the form of lied, symphony, symphonic poem, chamber music and opera.

214-327B. MUSIC OF THE 20th CENTURY. (3 credits; 3 hours plus 1 hour of guided listening; *Prerequisite:* Music 214-215D or by permission of the instructor.) Major musical developments of the 20th century from turn-of-the-century experimentalism to the present. Nationalism, neo-classicism, dodecaphony, serialism, stochastic music, microtonal music, computer music, etc. Works of composers from Debussy and Mahler to Boulez and Stockhausen.

214-328D. MUSIC CULTURES OF THE WORLD. (6 credits; 3 hours plus 1 hour of guided listening; *Prerequisite:* Music 214-215D or by permission of the instructor.) An introductory course in folk music designed to provide a basic technical understanding of the theories and methods of Ethnomusicology through the study of representative musical cultures from Asia, the Middle East, the Balkans, and Africa. A survey of the ballad traditions of Europe circulating in oral transmission. In addition, musical aspects will be related to their social and cultural context.

Music Ensembles

Arts or Science students may, with the permission of the instructor and the Associate Dean, participate in one of the following ensembles in a given year. Students should arrange through the Faculty of Music office (392-4501) for the necessary audition.

These courses are *not* restricted to Honours students.

243-287A/243-387B. CONTEMPORARY CHAMBER MUSIC CHOIR. (6 credits; *Prerequisite:* Audition.)

243-289A/243-389B. WOODWIND ENSEMBLES. (6 credits; *Prerequisite:* Audition.) STAFF

243-290A/243-390B. BAND. (6 credits; *Prerequisite:* Audition.) PROFESSOR HUGHES

243-291A/243-391B. BRASS ENSEMBLES. (6 credits; *Prerequisite:* Audition.) Dr. GIBSON

243-292A/243-392B. CONCERT CHOIR. (6 credits; *Prerequisite:* Audition.) PROFESSOR RIDDELL

243-294A/243-394B. CONTEMPORARY MUSIC ENSEMBLE. (6 credits; *Prerequisite:* Audition.) PROFESSOR PLAWUTSKY

243-296A/243-396B. OPERA WORKSHOP. (6 credits; *Prerequisite:* Audition.) PROFESSOR DELLA PERGOLA

243-297A/243-397B. ORCHESTRA. (6 credits; *Prerequisite:* Audition.) PROFESSOR PLAWUTSKY

243-299A/243-399B. STRING ENSEMBLES. (6 credits; *Prerequisite:* Audition.) PROFESSOR CULBREATH

NORTH AMERICAN STUDIES PROGRAM

This interdisciplinary program is being offered to give undergraduates an opportunity to gain a fairly comprehensive view of the growth and achievement of Canadian or United States civilizations, or a combination of both. For a fuller description of the Canadian Studies option, see p. 68.

The other choices are: 1) an option in U.S. Studies, concentrating on courses in the American field, or 2) an option in North American Studies in which courses from both areas are elected.

In taking the U.S. Studies Option the student will select a minimum of 54 credits dealing with the United States. These will be drawn from the Departmental offering listed below.

In taking the North American Studies Option the student will select a minimum of 54 credits among those listed below.

Please consult Professor Buitenhuis, Department of English.

For more information concerning courses, please turn to listings under departmental headings.

Anthropology

151-236D. INDIGENOUS PEOPLES OF NORTH AMERICA: A GEOGRAPHICAL AND CULTURAL APPROACH. (6 credits.)

Architecture

301-204B. HISTORY OF ARCHITECTURE IN CANADA. *(Prerequisite:* 301-102B.)

Economics

154-200D or 154-250D is prerequisite to all upper level courses in Economics except those for which other provision is made in the course description.

154-205D. AN INTRODUCTION TO APPLIED POLITICAL ECONOMY. (6 credits.)
154-211D. INTRODUCTION TO CANADIAN ECONOMIC HISTORY. (6 credits.)
154-302D. MONEY AND BANKING. (6 credits.)
154-304D. CANADIAN ECONOMIC POLICY. (6 credits.)
154-305D. GOVERNMENT AND BUSINESS. (6 credits.)
154-306D. LABOUR ECONOMICS AND INSTITUTIONS. (6 credits.)
154-311D. NORTH AMERICAN ECONOMIC DEVELOPMENT. (6 credits; *Prerequisite:* any Economics 200 level course.)
154-312D. POLITICAL ECONOMY OF DEPENDENCE IN THE WESTERN HEMISPHERE. (6 credits.)
154-352D. MACROECONOMICS. (6 credits.)
154-400D. ECONOMIC ANALYSIS. (6 credits.)
154-404D. TRANSPORTATION. (6 credits.)
154-408D. PUBLIC FINANCE. (6 credits.)
154-468A. URBAN AND REGIONAL ECONOMICS. (3 credits.)

English

110-225A. AMERICAN LITERATURE. (3 credits.) Puritans — 1860.
110-226B. AMERICAN LITERATURE. (3 credits.) 1860 to present.
110-228A. CANADIAN LITERATURE. (3 credits.)
110-229B. CANADIAN LITERATURE. (3 credits.)
110-323A. 20TH CENTURY AMERICAN POETRY. (3 credits.)
110-325D. MODERN NORTH AMERICAN FICTION. (6 credits.)

110-327D. THE DEVELOPMENT OF PROSE FICTION IN CANADIAN LITERATURE. (6 credits.)
110-329D. 20TH CENTURY CANADIAN LITERATURE.
110-504A. 20TH CENTURY. (3 credits.)
110-525B. AMERICAN LITERATURE CONFERENCE COURSE. (3 credits.) Poetry of T. S. Eliot.
110-528A. CANADIAN LITERATURE. (3 credits.)
110-531B. LITERARY FORMS. (3 credits.)

French

126-210A. CIVILISATION QUEBECOISE. (3 credits.)
126-211B. CIVILISATION QUEBECOISE. (3 credits.)
126-227A. INTRODUCTION A LA LITTERATURE QUEBECOISE I. (3 credits.)
126-228B. INTRODUCTION A LA LITTERATURE QUEBECOISE II. (3 credits.)
126-229D. INITIATION A LA LITTERATURE QUEBECOISE. (6 credits.)
126-264D. HISTOIRE DE LA CIVILISATION QUEBECOISE. (6 credits.)
126-329D. ROMAN QUEBECOIS CONTEMPORAIN. (6 credits.)
126-333D. LE THEATRE QUEBECOIS. (6 credits.)
126-334B. LE CINEMA QUEBECOIS. (3 credits.)
126-361D. ROMAN QUEBECOIS I. (6 credits.)
126-364D. LA POESIE QUEBECOISE. (6 credits.)
126-432D. POESIE QUEBECOISE CONTEMPORAINE. (6 credits.)
166-461D. ROMAN QUEBECOIS II. (6 credits.)
126-462D. LES ESSAYISTES QUEBECOIS — EXPLOSION DE LA PENSEE DEPUIS BORDUAS. (6 Credits.)

French Canada Studies Program

Consult page 73 of this Announcement.

Geography

183-301D. GEOGRAPHY OF CANADA. (6 credits.)
183-325A. PHYSICAL GEOGRAPHY OF QUEBEC. (3 credits.)
183-326A. HUMAN GEOGRAPHY OF QUEBEC. (3 credits.)
183-336D. INDIGENOUS PEOPLES OF NORTH AMERICA. (6 credits.)

History

101-202D. INTRODUCTION TO THE HISTORY OF CANADA. (6 credits.)
101-211A. THE U.S. TO 1865. (3 credits.)
101-221B. THE U.S. SINCE 1865. (3 credits.)
101-331D. EMERGING MODERN AMERICA, 1877-1945. (6 credits; *Prerequisite:* History 211A and 221B or consent of the instructor.)
101-323D. SOCIAL AND ECONOMIC PROBLEMS IN THE HISTORY OF FRENCH CANADA FROM THE 17TH CENTURY TO THE MIDDLE OF THE 19TH CENTURY. (6 credits; *Prerequisite:* 202D.)
101-332D. CANADA AND THE BIRTH OF CONFEDERATION. (6 credits; *Prerequisite:* History 202D or equivalent or consent of instructor.)
101-344A. THE ETHNOHISTORY OF NEW FRANCE. (3 credits; *Prerequisite:* History 202D.)
101-352D. EMERGENCE OF ENGLISH CANADA: 1791-1867. (6 credits; *Prerequisite:* 202D or consent of instructor.)
101-353D. WAR AND SOCIETY IN CANADIAN HISTORY. (6 credits; *Prerequisite;* History 202D; This course is not open to candidates who have previously taken History 372D.)
101-362D. THE WEST IN CANADIAN HISTORY. (6 credits; *Prerequisite:* 202D.)

101-363D. CONTEMPORARY CANADA, 1890- 1970. (6 credits; *Prerequisite:* History 202D or equivalent, or consent of instructor; This course is not open to candidates who have previously taken History 302A and 312B.)

101-403D. REGIONAL, SOCIAL AND CULTURAL HISTORY OF QUEBEC. (6 credits; *Prerequisite:* History 202D or consent of instructor. A reading and speaking knowledge of French is essential.)

North American Studies

110-529D. INTERDISCIPLINARY SEMINAR IN NORTH AMERICAN STUDIES. (3 credits; formerly 120-496D.)

Political Science

160-211D. INTRODUCTION TO COMPARATIVE GOVERNMENT. (6 credits.)

160-221D. GOVERNMENT OF CANADA. (6 credits.)

157-226A. INTRODUCTION A LA VIE POLITIQUE QUEBECOISE. (3 credits.)

157-316A. QUEBEC ET L'AMERIQUE DU NORD. (3 credits.)

160-320A. CANADIAN POLITICAL PROCESS. (3 credits; *Prerequisite:* 160-211D.)

157-336B. QUEBEC ET LE CANADA. (3 credits.)

160-337B. PUBLIC ADMINISTRATION. (3 credits; *Prerequisite:* 160-321D or consent of instructor.)

160-415B. POLITICAL PARTIES. (3 credits; *Prerequisites:* 160-211D and one other course in Comparative Government.)

160-421B. PROBLEMS IN CANADIAN POLITICS AND GOVERNMENT. (3 credits; *Prerequisites:* 160-221D and 160-320A.)

Sociology

166-210A INTRODUCTION TO SOCIOLOGY. (3 credits.)

166-217A. MASS COMMUNICATIONS. (3 credits *Prerequisite:* Introduction to Sociology.)

166-223B. SOCIAL STRATIFICATION. (3 credits; *Prerequisite:* Introduction to Sociology.)

166-224B. CANADIAN SOCIETY. (3 credits; *Prerequisite:* Introduction to Sociology.)

166-230B. CLASS, ETHNICITY AND POLITICS IN CANADA AND IN QUEBEC. (3 credits.)

166-317B. RESEARCH IN CANADIAN MASS COMMUNICATIONS. (3 credits; *Prerequisite:* 160-217A.)

166-326B. POLITICAL SOCIOLOGY. (3 credits.)

166-435A. SOCIOLOGY OF POPULAR CULTURE. (3 credits; *Prerequisites:* Introductory Sociology, Mass Communications (217A), or consent of instructor.)

PHILOSOPHY (107)

Samuel Bronfman Building, Telephone 392-5170

Major in Philosophy

Seven full courses or equivalent half courses (42 credits) in Philosophy, to be selected with the approval of the Department, plus two other full courses, or equivalent (12 credits), from Arts or Science Departments. Students are required to take the following three courses:

FIRST YEAR: Introduction to Philosophy 107-200D *or* Introduction to Moral Philosophy 107-205D.

ANY YEAR: Greek Philosophy 107-340D
Either Mediaeval Philosophy 107-341D, *or* Modern Philosophy 107-350D, *or* 19th Century Philosophy 107-351D.

The Philosophy course offerings are grouped below under several headings. These categories are not intended to be definitive, but merely to serve as a rough guide to the student. Note that two additional full courses are required for the Philosophy major. Thus the student emphasizing (for example) the history of philosophy will find appropriate related courses within Classics, Islamic Studies, and Jewish Studies, etc. The student emphasizing philosophy of language will find related courses in Linguistics. However, approval of the Departmental Adviser is required both for the seven Philosophy and the two "outside" courses.

Logic & Philosophy of Science:
107-210A, 211B, 321D, 335D, 410D, 411D, 420D, 423A, 424B, 427A, 428B

Philosophy of Language:
107-212B, 313D, 317A, 318B, 411D, 417D, 413A, 414B, 483A, 484B

Value Theory & Philosophy of Religion:
107-301D, 305A, 306B, 332D, 401A, 402B, 404D, 406A, 407B, 413A, 432B, 448A, 472D

Epistemology & Metaphysics:
107-205D, 212B, 317A, 318B, 335D, 381D, 411D, 413A, 414B, 481D, 485A, 486B

History of Philosophy:
107-340D, 341D, 350D, 351D, 345D, 401A, 402B, 411D, 413A, 414B, 441A, 442B, 444D, 448A, 449B, 452B, 455A, 456B, 458D, 463D, 465D

Major Adviser: Professor Jeremy Walker — 392-5169

Honours in Philosophy

Eleven courses (66 credits) in Philosophy, as prescribed below. In addition, a reading competence in a language which is taught at McGill: this to be demonstrated either by taking a third-year level course or by an examination. (Competence in English and French is presupposed.)

FIRST YEAR:
- One approved course in logic
- *Greek Philosophy 107-340D
- *Either Introduction to Philosophy 107-200D, or Introduction to Moral Philosophy 107-205D

SECOND YEAR:
- One advanced course in Ethics
- Mediaeval Philosophy 107-341D, or Modern Philosophy 107-350D, or 19th century Philosophy 107-351D
- Tutorial 107-398A & 399B, or other optional course in Philosophy
- Optional course in Philosophy

THIRD YEAR:
- Mediaeval Philosophy 107-341D, or Modern Philosophy 107-350D, or 19th-century Philosophy 107-351D
- Half course in 20th-century analytic philosophy
- Half course in 20th-century metaphysics or epistemology
- Tutorial 107-498A & 107-499B with Honours Thesis
- Optional course in Philosophy

Exceptions to the prescribed pattern may be petitioned before the Department through the Adviser.

Joint Honours in Philosophy

Six full courses or equivalent half courses (36 credits) in Philosophy. Courses marked with an asterisk are required; normally Introduction to Philosophy 107-200D or Introduction to Moral Philosophy 107-205D will be taken in First year. Consult the Department for specific arrangements.

ADMISSION REQUIREMENT: 3.0 CGPA. A 3.0 GPA overall and 3.0 average in Philosophy courses must be maintained.

Honours Adviser: Professor George DiGiovanni, Tel.: 392-5155.

Course Descriptions

The Department of Philosophy does not use the second digit of the course number to distinguish Honours courses. Where such distinctions exist they will be noted in the prerequisites. Rather, the second digit indicates the general subject category of the course according to the following scheme:

0 — Value theory and related subjects; 1 — Logic and related subjects; 2 — Philosophy of Science; 3 Philosophy of Religion; 4,5,6 — History of Philosophy; 7 — Philosophy of Politics; 8 — Metaphysics; 9 — Tutorials and special seminars.

107-200D. INTRODUCTION TO PHILOSOPHY. (6 credits.) Topic for 1974-75: Freedom, Morality and Language. An introduction to some of the main themes of philosophy.
PROFESSOR TAYLOR

107-205D. INTRODUCTION TO MORAL PHILOSOPHY. (6 credits.) An introduction to some of the basic issues in moral philosophy. PROFESSOR NORTON

107-210A. INTRODUCTION TO DEDUCTIVE LOGIC. (3 credits.) The Propositional and first-order predicate calculus. Topics to be discussed include: Entailment, Reference, Meaning, and Theory of Definition. DR. SPENCER

107-211B. INTRODUCTION TO DEDUCTIVE LOGIC. (3 credits.) The techniques of the propositional and predicate calculi; completeness, etc. The various uses of formal logics will be discussed, *e.g.*, in the axiomatization of certain scientific theories.
MR. O'MALLEY-KEYES

107-212B. INTRODUCTION TO PHILOSOPHICAL ANALYSIS. (3 credits; Not given in 1974-75.)

107-301D. ETHICS. (6 credits; Not given in 1974-75.)

107-305A. AESTHETICS I. (3 credits; Not given in 1974-75.)

107-306B. AESTHETICS II. (3 credits; Not given in 1974-75.)

107-313D. PHILOSOPHY OF LANGUAGE. (6 credits; Not given in 1974-75.)

107-317A. PROBLEMS IN ANALYTIC PHILOSOPHY. (3 credits; *Prerequisite:* Consent of the lecturer.) Topic for 1974-75: Idealism versus Empiricism; the theory of mind and the "Linguistic turn". PROFESSOR McGILVRAY

107-318B. PROBLEMS IN ANALYTIC PHILOSOPHY. (3 credits; *Prerequisite:* Philosophy 317A.) Topic for 1974-75: Consideration of the theories of some of the leading figures in the analytic movement such as Frege, Russell, Wittgenstein, Austin, Ryle and Strawson.
PROFESSOR McGILVRAY

107-321D. PHILOSOPHY OF SCIENCE. (6 credits.) A survey of the history of science since the ancient Greeks to the twentieth century with special emphasis on the Scientific Revolution of the seventeenth century. PROFESSOR SHEA

107-332D. PHILOSOPHY OF RELIGION. (6 credits; *Prerequisite:* One full course in Philosophy or consent of the lecturer.) A discussion of the main problems of the philosophy of religion as considered in the works of various philosophers.
PROFESSOR McKINNON

107-335D. INTRODUCTION TO THE PHILOSOPHY OF HISTORY (6 credits.)
PROFESSOR ROBINSON

107-340D. GREEK PHILOSOPHY. (6 credits.) A study of ancient philosophy concentrating on the pre-Socratic Philosophers, Plato, and Aristotle. (See also Classics 407D.)
PROFESSOR HARVEY

107-341D. MEDIAEVAL PHILOSOPHY. (6 credits.) An examination of philosophers selected from among the great Latin, Arabic, and Jewish thinkers. PROFESSOR BRACKEN

107-345D. SURVEY OF JEWISH PHILOSOPHY. (6 credits.) Topic for 1974-75: Discussions of major works of Jewish philosophers, with focus on the nature of man, phophecy, love. First term: Philo of Alexandria to the Maimonidean revolution; Second term: Renaissance to Existentialism. PROFESSOR HARVEY

107-350D. MODERN PHILOSOPHY. (6 credits; *Prerequisite:* One full course in Philosophy or consent of the lecturer.) From the Renaissance to Kant. A study of philosophers selected from among such thinkers as Montaigne, Descartes, Malebranche, Spinoza, Leibniz, Locke, Berkeley, Hume and Reid. PROFESSOR BRACKEN

107-351D. NINETEENTH CENTURY PHILOSOPHY. (6 credits; *Prerequisite:* Phil. 350D.) A study of philosophers selected from among such traditions as the Kantian, Hegelian, Marxist, Existentialist, Utilitarian, and the forebearers of Phenomenology. PROFESSOR DiGIOVANNI

107-381D. PROBLEMS OF PHILOSOPHY. (6 credits; *Prerequisite:* One course in philosophy or final year majors students in psychology, or permission of instructor.) Philosophical Problems of Psychology. An examination of the relevance of theories and data for moral and legal concepts, particularly in regard to questions of responsibility and punishment. PROFESSOR SCHLEIFER

107-398A/107-399B. TUTORIALS. (6 credits.) Open to Second year Full Honours students in Philosophy, and to other students, with consent of the Department. PROFESSOR ROBINSON AND STAFF

107-401D. SEMINAR IN THE HISTORY OF ETHICS. (6 credits; Not given in 1974-75.)

107-404D. MORAL PHILOSOPHY. (6 credits; *Prerequisite:* Introduction to Ethics.) A critical examination of the concepts of liberty and justice with a consideration of a number of contemporary moral, political, and educational debates. PROFESSOR SCHLEIFER

107-406A. PHILOSOPHY AND LITERATURE. (3 credits; Not given in 1974-75.)

107-407B. PHILOSOPHY AND LITERATURE. (3 credits; Not given in 1974-75.)

107-510D. INTERMEDIATE LOGIC. (6 credits; *Prerequisite:* Philosophy 211B or equivalent.)

107-511D. MEDIAEVAL LOGIC AND GRAMMAR. (6 credits; Not given in 1974-75.)

107-513A. RECENT AND CONTEMPORARY BRITISH PHILOSOPHY. (3 credits; Not given in 1974-75.)

107-514B. RECENT AND CONTEMPORARY BRITISH PHILOSOPHY. (3 credits; Not given in 1974-75.)

107-517D. PROBLEMS IN SEMANTICS. (6 credits.) An elucidation and systematization of the concepts of designation, reference, representation, intension, sense, meaning, interpretation, truth, extension, model, definite description, and their relatives. The discussion will be focused on science and mathematics rather than on natural languages. PROFESSOR BUNGE

107-520D. METHODOLOGY AND PHILOSOPHY OF SCIENCE. (6 credits; Not given in 1974-75.)

107-523A. FORMAL METHODS IN PHILOSOPHY AND SOCIAL SCIENCES. (3 credits.) Topic for 1974-75: Philosophy of Psychology. An examination of some of the methodological, epistemological and metaphysical problems arising in the study of the mental — e.g. the mind-body relations, the objectification and measurement of mental states, and the mathematization of psychological theories. PROFESSOR BUNGE

107-524B. FORMAL METHODS IN PHILOSOPHY AND SOCIAL SCIENCES. (3 credits.) Topic for 1974-75: Philosophy of Sociology. A discussion of some of the methodological, epistemological and metaphysical problems arising in the study of societies and social relations — e.g. the methodological individualism-holism issue, the question of societal laws, and building of mathematical models in social science. PROFESSOR BUNGE

107-527A. PHILOSOPHY OF PHYSICS. (3 credits; Not given in 1974-75.)

107-528B. PHILOSOPHY OF PHYSICS. (3 credits; Not given in 1974-75.)

107-531A. SEMINAR IN PHILOSOPHY OF RELIGION. (3 credits; Not given in 1974-75.)

107-532B. SEMINAR IN PHILOSOPHY OF RELIGION. (3 credits; Not given in 1974-75.)

107-541A. SEMINAR IN ANCIENT PHILOSOPHY. (3 credits: Not given in 1974-75.)

107-542B. SEMINAR IN ANCIENT PHILOSOPHY. (3 credits; Not given in 1974-75.)

107-544D. SEMINAR IN THE HISTORY OF PHILOSOPHY. (6 credits.) Topic for 1974-75: The Rise of the Mechanical Philosophy: Galileo and Descartes. In the seventeenth century, the ordered cosmos of Greek thought gave way to the mechanical universe which was not conceivable without a new conception of rationality. The intellectual difficulties involved and the challenges of the new philosophy will be discussed with special reference to Galileo and Descartes. PROFESSOR SHEA

107-548A. LEGAL AND MORAL PHILOSOPHY OF THE JEWISH TRADITION. (3 credits; *Prerequisite:* Consent of the lecturer.) Readings of philosophical texts in Hebrew. Texts will be chosen in conjunction with interests of participating students.
PROFESSOR HARVEY

107-549B. LEGAL AND MORAL PHILOSOPHY OF THE JEWISH TRADITION. (3 credits; *Prerequisite:* Philosophy 548A.) Continuation of Philosophy 448A. PROFESSOR HARVEY

107-552A. THEMES IN THE HISTORY OF JEWISH PHILOSOPHY. (3 credits.) Topic for 1974-75: An exploration of the origin and development, together with a study of the philosophical and theological significance of the theory that the American Indians are the Lost Tribes of Israel. PROFESSOR POPKIN

107-555A. SEMINAR IN 17TH AND 18TH CENTURY PHILOSOPHY. (3 credits; Not given in 1974-75.)

107-556B. SEMINAR IN 17TH AND 18TH CENTURY PHLILOSOPHY. (3 credits; *Prerequisite:* Graduate Standing.) Topic for 1974-75: Hume's Epistemology.
PROFESSOR NORTON

107-558D. SEMINAR IN HEGEL. (6 credits; Not given in 1974-75.)

107-563D. SEMINAR IN KIERKEGAARD. (6 credits; *Prerequisite:* consent of the lecturer.) Topic for 1974-75: Kierkegaard's Religious Writings. PROFESSOR McKINNON

107-565D. SEMINAR IN KANT. (6 credits; *Prerequisite:* consent of the lecturer.) Topic for 1974-75: The *Critique of Practical Reason,* the *Critique of Judgement* and the very late writings. PROFESSOR DiGIOVANNI

107-572D. PHILOSOPHY OF POLITICS: (6 credits; Not given in 1974-75.)

107-581D. METAPHYSICS, DIALECTICS, LOGIC AND EPISTEMOLOGY. (6 credits; Not given in 1974-75.)

107-583A. SEMINAR IN SYSTEMATIC PHILOSOPHY. (3 credits; *Prerequisite:* consent of the lecturer.) Topic for 1974-75: An examination of several problems in the philosophy of language, e.g. translation, meaning, truth, and reference. PROFESSOR McGILVRAY

107-584B. SEMINAR IN SYSTEMATIC PHILOSOPHY. (3 credits; *Prerequisite:* Philosophy 583A.) Topic for 1974-75: Further issues in the Theory of Language. An analysis of two or three issues selected from among these: presuppositions, tenses, referential semantics, the performance/competence distinction. PROFESSOR McGILVRAY

107-585A. METAPHYSICS. (3 credits.) Topic for 1974-75: Issues to be examined include the nature of teleological explanation, intentionality, action and cause . . . feeling and emotion and their non-contingent links with dispositions and situations.
PROFESSOR TAYLOR

107-586B. METAPHYSICS. (3 credits; Not given in 1974-75.)

107-587A. SEMINAR IN PROBLEMS OF PHILOSOPHY. (3 credits; *Prerequisite:* One full course in Philosophy or consent of the lecturer.) Topic for 1974-75: L'homme et l'histoire. Philosophie française, philosophie allemande et philosophie anglaise: Comparaison des concepts et des problèmes fondamentaux. Lecture et interprétation de textes choisis de Hegel et Nietzsche. (In French and English.) PROFESSOR KLIBANSKY

107-588B. SEMINAR IN PROBLEMS OF PHILOSOPHY. (3 credits.) Topic for 1974-75: Continuation of Philosophy 587A. PROFESSOR KLIBANSKY

107-593A. SEMINAR IN PHILOSOPHY. (3 credits.) PROFESSOR KLIBANSKY

107-594B. SEMINAR IN PHILOSOPHY. (3 credits.) PROFESSOR KLIBANSKY

107-598A/599B. TUTORIALS. (6 credits.) Open to Third year Full Honours students in Philosophy, and to other students with consent of the Department.
PROFESSOR ROBINSON AND STAFF

POLITICAL SCIENCE (160)

Stephen Leacock Building, Room 434, Telephone 392-5239

Major Program

The Major program in Political Science consists of 9 full courses (54 credits) of which at least 7 full courses (42 credits) must be in Political Science. A student is encouraged to take up to 2 (12 credits) of these 9 courses outside the Department provided they are closely related to his Political Science program.

In the U1 year, a majors student must take a total of twelve credits in Political Science, covering at least two of the four main fields of concentration offered by the Department (Comparative Government and Politics, Canadian and Quebec Government and Politics, International Politics, and Political Theory). The course requirements in the various fields are outlined below.

A student is asked to choose one of the fields (named above) as his field of concentration in political science. Overall, while some concentration in one area of the discipline is considered beneficial, excessive specialization is discouraged. Students are therefore required to take at least twelve credits in Political Science outside their field of concentration. Further information may be obtained from the Majors Adviser (392-5239).

Other Major Programs

Major programs are available with the Departments of Economics and History. Other programs may be arranged at a student's request. The requirements for these degrees are a minimum of 54 credits in both majors subjects to be divided on a 4-5 basis between the two subjects. Students should consult their advisers. A student in such a major must take 12 credits in 2 Political Science areas in U1 and at least 12 credits in Political Science, but outside his field of concentration, during his 3 university years.

Honours Program

The Honours program in Political Science consists of 10 full courses (60 credits) of which at least 7 full courses (42 credits) must be in Political Science. A student may take up to three of these 10 courses outside the Department provided they are closely related to his Political Science program.

In the U1 year, a student must take a total of two full courses (12 credits) in Political Science, covering at least two of the four main fields offered by the Department (Comparative Politics, Canadian and Quebec Government and Politics, International Politics, Political Theory). The course requirements in the various fields are outlined below.

Overall, while some concentration in one area of the discipline is considered beneficial, excessive specialiaztion is discouraged. Students are therefore required to take at least two full courses (12 credits) in Political Science outside their area of concentration.

To be eligible for entry into an Honours program, a student should have a good B average in his CEGEP level work. To remain in Honours, a CGPA of at least 3 in Political Science courses and an overall CGPA of at least 2.8 is required. Students must also maintain a satisfactory pattern of performance in their Political Science courses (i.e., very few, if any, grades below 70%).

Students awarded Honours standing in U1 may lose it at the end of the year or in subsequent years if their performance is not up to these standards. Conversely, students who were not awarded Honours standing in U1 may attain it in subsequent years if their performance merits it. To be awarded Honours at graduation, a student must normally be registered as an Honours student at the beginning of his U3 year. At graduation, a student's Honours standing will be determined by his overall record in the Honours program.

Further information may be obtained from the Honours Adviser, 392-5239.

Joint Honours Programs

Joint Honours programs are currently available in the following areas:

Political Science and Economics
History
Philosophy
Sociology
Anthropology

Students who are interested in pursuing a joint honours program in some other area (ex. Political Science and Psychology or Political Science and one of the languages) should get in touch with the Honours Adviser to see if a suitable program can be devised. Such programs will then be submitted for approval to a Faculty Committee.

The requirements for joint honours degrees are a minimum of 5 to 6 full courses (30 to 36 credits) in Political Science and 5 to 6 full courses (30 to 36 credits) in the other Honours subject depending on the particular program. The same principles concerning the distribution of courses that were outlined above for the single Honours program apply here too, both at the U1 level and overall.

Course Descriptions

This calendar is prepared early in the year and so is likely to need modification by the time the academic year begins. A mimeographed supplement is available in the department office and should be consulted.

U1 students may take 300 level and U2 students may take 400 level courses without restriction subject only to having taken the necessary prerequisites.

Specific course prerequisites may be waived by instructors in individual cases.

160-211D. INTRODUCTION TO COMPARATIVE GOVERNMENT AND POLITICS. (6 credits.) This course approaches the basic concepts, institutions and processes of politics in Canada, the United States, Great Britain, France and the Soviet Union through the utilization of fundamental tools of comparative analysis.

***160-212A. TECHNIQUES OF SOCIAL RESEARCH.** (3 credits.) An introduction to the practical and theoretical problems and sociological research. Among the topics considered are the formation of research problems, the selection of samples, interviewing, and questionnaire construction, and the analysis and interpretation of data. Students will have practical experience in these techniques. PROFESSOR VAILLANCOURT

160-221D. GOVERNMENT OF CANADA. (6 credits.) An examination of the operation of parliamentary institutions in a federal state, and of the operation of federalism in Canada. PROFESSOR MALLORY

157-226A. INTRODUCTION A LA VIE POLITIQUE QUEBECOISE. (3 credits.) Une introduction à la vie politique québécoise à travers l'étude des institutions, des idéologies et des comportements politiques. Une attention particulière sera accordée à la structure et aux changements dans le système politique québécois. Bilingue. PROFESSEUR BERNARD

160-227A. POLITICAL CHANGE IN THE THIRD WORLD: INDEPENDENCE AND NATION BUILDING. (3 credits.) An introductory course on the politics of the Third World, dealing primarily with the role of forces in the achievement of independence and the building of nations. Several theories on independence movements and revolutions will be discussed and then related to experiences in Asia, Africa and Latin America.

160-231D. POLITICAL THEORY. (6 credits. This course is normally a prerequisite for all upper level courses in political philosophy.) The first half will be taken up with a discussion of contemporary political issues: e.g., the understanding of politics, the politics of violence, and community on the grounds of authority. The second term will be devoted to the study of certain works of philosophy and literature which reflect political reality. PROFESSORS TAYLOR, SHINGLER, NOUMOFF, SARF

160-244A. INTERNATIONAL POLITICS. (3 credits.) This is an experimental course that deals with the factors, domestic and international, which determine foreign policy behaviour. There will be a minimum of compulsory lectures. Students will choose among a number of options of study which best suit their individual needs. Students are asked to consult the course description distributed in Leacock 434. PROFESSOR J. STEIN

160-245B. THE INTERNATIONAL SYSTEM. (3 credits.) The course will focus on the setting of world politics. Particular emphasis will be placed on the nature of contemporary international politics. The stratification of the international system to which differences in technology and military power, economic power, legitimacy, and skill contribute, will be

* Not offered in 1974-75.

treated as well as forces such as increasingly rapid communications, nationalism, and ideology which cut across the system.
PROFESSOR HASKEL

160-247B. FOREIGN POLICY IN THE THIRD WORLD. (3 credits. Recommended: 160-244A or 160-227A.) This course will examine domestic and external sources of conflict within the Third World. It is experimental in form: students will work at their own pace through the use of individually designed modules. Students are requested to consult the special course description which is available in Leacock 434.
PROFESSOR J. STEIN

160-312B. PUBLIC OPINION. (3 credits.) Three major aspects of public opinion will be covered: theory of public opinion and its function in the political system, measurement, and evaluation of some of the major Canadian and American studies. Students will have an opportunity to engage in secondary analysis of survey data. Computer applications in political research will be stressed.
PROFESSOR VAILLANCOURT

***160-313D. POLITICAL AND SOCIAL MOVEMENTS AND EXTRA-PARLIAMENTARY POLITICAL ACTION.** (6 credits.) After a general theoretical introduction of Fascism, Anarchism, Marxism and Democracy, case studies of various movements will be examined. These include labour movements, student movements, youth politics and the new left, minority group movements, anti-war movements and protests in the U.S.A., women's liberation and feminist movements.
PROFESSOR VAILLANCOURT

157-316A. QUEBEC ET L'AMERIQUE DU NORD. (3 crédits.) Ce cours tentera de répondre à la question suivante: Dans quelle mesure le Québec est-il, malgré sa spécificité culturelle, une communauté nord-américaine? En 1974 les principaux thèmes étudiés seront les suivants: le freaks, la contestation, la violence, la drogue, la jeunesse.
PROFESSOR LATOUCHE

160-319D. POLITICS OF LATIN AMERICA. (6 credits.) This course will deal with the dynamics of political change in Latin America today.

160-320A. THE CANADIAN POLITICAL PROCESS (I). (3 credits; *Prerequisite:* At least one other course in Canadian or Comparative Government and Politics.) A critical analysis of different aspects of the Canadian Political Process. The first semester will be devoted to the socioeconomic and political environment, political ideology and political culture, the electoral system, the party system, the ideology, structure and behaviour of parties and pressure groups.
PROFESSOR M. STEIN

***160-321B. THE CANADIAN POLITICAL PROCESS (II).** (3 credits; *Prerequisite:* At least one other course in Canadian Government or Comparative Government and Politics.) A critical analysis of aspects of the Canadian Political Process. The second semester will treat the socialization and communications processes, voting structures, elites and certain aspects of legislative, executive and administrative behaviour.

160-322A. POLITICS AND GOVERNMENT IN SOUTH ASIA (INDIA AND PAKISTAN.) (3 credits.) An examination of the politics of traditional society in South Asia; the nature of Western impact; the crises of modernization; nationalism; the nature of institution-building; the goals and performance of the political systems.

160-323B. POLITICS AND GOVERNMENT IN EAST ASIA (CHINA AND JAPAN.) (3 credits.) A survey of traditional and modern political society in China and Japan. Special emphasis is placed on governmental policy and institutions in relation to ideology in the Peoples' Republic of China and post-1945 Japan.
PROFESSOR NOUMOFF

160-324D. POLITICS AND GOVERNMENT IN AFRICA. (6 credits.) The government and politics of African states south of the Sahara with reference to traditional political systems, colonial policies, nationalism, and the problem of nation building.
PROFESSOR KUNZ

160-325D. GOVERNMENT AND POLITICS OF THE UNITED STATES. (6 credits.) A survey of American politics, including formal and informal processes of government; American political thought, political culture and socialization, public opinion, parties, interest groups, and formal institutions. In addition, problem areas, such as racism and the military-industrial complex, are discussed.

160-327A. *THE PRINCIPLES OF PUBLIC ADMINISTRATION. (3 credits.) An outline of the basic concepts employed in public administration will include organizational structure and behaviour, the concept of management and personnel development, the decision-making processes and the problems of change and innovation. The subject matter will be general although references will be made to Canadian examples.

160-328D. EUROPEAN GOVERNMENT AND POLITICS. (6 credits.) A systematic examination of major institutions of European political systems, both West and East, and of the processes of decision-making. Special attention will be paid to the problems of political change and to the role played by the bureaucracy, by parties and interest groups.

160-329A. THE POLITICAL SYSTEM OF THE U.S.S.R. (3 credits.) The course will be a study of Soviet politics: its roots in the past; its formative revolutionary experiences; the major domestic strategies which have been pursued under Lenin, Stalin, Khrushchev, and contemporary leaders; the concomitants of these choices in different spheres, for example in culture, in the economy, in organizational life. PROFESSOR HASKEL

160-332D. NON-WESTERN POLITICAL PHILOSOPHY. (6 credits; *Prerequisite:* 160-231D or consent of instructor.) This course will concentrate on the major political-philosophical traditions of China, India, Islam and Africa. Students are required to have a background in political philosophy of one of the regions under consideration. Particular emphasis will be placed on the relationship between the underlying political/philosophic culture and its impact upon contemporary political forms. PROFESSOR NOUMOFF

160-333A. HISTORY OF POLITICAL AND SOCIAL THEORY (I). (3 credits. Recommended: 160-231D.) This course will explore the major themes and writers in Political Theory from the dawn of Greek political consciousness through the writings of St. Augustine. The political ideas of Hesiod, Thucydides, Plato, Aristotle, the Hellenistic philosophers, Hebrew political thought and prophecy, the Christian revolt against Classicism and the early church fathers will be explored through the significant texts of this period.
PROFESSOR SARF

160-334B. HISTORY OF POLITICAL AND SOCIAL THEORY (II). (3 credits. *Prerequisite:* 160-231D.) Political theory of the Middle Ages and the early modern period until the Enlightenment. This course will deal with the Mediaeval writers and those of the early modern period up to and including the Enlightenment: e.g. Aquinas, Marsilio, Machiavelli, the Reformers, Hobbes, Locke, Montesquieu, Voltaire, d'Holbach, Bentham.
PROFESSOR SARF

157-336B. QUEBEC ET LE CANADA. (3 crédits. *Prérequis:* 157-226A ou le consentement du professeur.) Comment les Canadiens anglais et les Québécois francophones se perçoivent-ils mutuellement? Existe-t-il des stéréotypes et des images communes? Quelles sont les principales différences culturelles entre les deux groupes?
PROFESSOR CLOUTIER

160-337B. CANADIAN PUBLIC ADMINISTRATION. (3 credits; *Prerequisite:* 160-327A.) The student will undertake basic research work examining at least one problem in Canadian public administration. Attention will be directed towards all three levels of government, federal, provincial and municipal.

***160-343B. CONTEMPORARY INTERNATIONAL SYSTEMS: LATIN AMERICA.** (3 credits; *Prerequisite:* 160-319D or consent of instructor.) An examination of the evolution of the inter-American system since the turn of the century. Particular attention will be given to the role of the United States in the dynamics of the system as illustrated by case studies including Cuba in 1959 and Santo Domingo in 1965. The role of Canada in the system will be studied with regard to the OAS and regional economic relations.
PROFESSOR BRUNEAU

160-344A. CONTEMPORARY INTERNATIONAL SYSTEMS: EUROPE. (3 credits; *Prerequisite:* 160-244A or 160-245B or consent of instructor. 160-346A would be a helpful preparation for this course.) An examination of the evolution of the European system since 1945 focusing on three problem areas — East-West relations, the Atlantic Alliance and West European integration. Special attention will be paid to the politics of the U.S., Britain, France and West Germany. Part of the course will consist of a simulation dealing with current foreign policy problems in Europe. PROFESSOR NOBLE

160-345A. INTERNATIONAL ORGANIZATION. This course will focus on the United Nations — its performance and problems. Special emphasis will be placed on three of its roles: as an agent for conflict management; as a forum for interest articulation and as a source of pressure to redistribute values, wealth and skills. PROFESSOR STEINBERG

***160-346A. THE FOREIGN POLICIES OF THE SUPER POWERS.** (3 credits; *Prerequisite:* 160-244A.) An analysis of American and Soviet foreign policies within the context of the major conceptual approaches to foreign policy behaviour. Special emphasis will be placed on the examination of similar patterns of behaviour, i.e. cold war politics, the arms race, hegemonial behaviour, etc., with a view to uncovering the major explanatory variables and comparing them. PROFESSOR STEINBERG

160-347A. THE POLITICS AND FOREIGN POLICY OF ISRAEL. (3 credits.) This course will focus on the political system of Israel and her foreign policy since 1948. It will explore her political culture, parties, the electoral system and election results, political leadership, the constitutional problem, etc. The second half of the course will analyse the setting for policy choices; party programs and interest group pressures; decision-makers and their images; and the process of formulating and implementing decisions. Several important foreign policy issues will be examined to illuminate the structure and process of Israel's behaviour.
PROFESSOR BRECHER

160-348B. CONTEMPORARY INTERNATIONAL SYSTEMS: THE MIDDLE EAST. (3 credits; *Prerequisite:* 160-244A or 160-245B or consent of instructor. 160-247B would be a helpful preparation for this course.) An examination of the evolution of the Middle Eastern system since 1945 focusing on three problem areas: Inter-Arab relations, Arab-Israeli relations, Arab-Great Power relations. Part of the course will consist of a simulation dealing with current foreign policy problems in the Middle East.
PROFESSOR NOBLE

160-349B. CONTEMPORARY INTERNATIONAL SYSTEMS AND FOREIGN POLICY: ASIA. (3 credits.) A study of the foreign policies of the major Asian powers — China, Japan, India and Pakistan. Emphasis is on student research in the context of a common framework for the study of foreign policy. Focus is on foreign policy goals and behaviour and their relationship to economic and military capabilities, societal characteristics and governmental features.
PROFESSOR BRECHER

160-363A. RADICAL POLITICAL THOUGHT (I). (3 credits.) This course will focus on the origins and meaning of radicalism in the 19th century and trace its evolution in this period. A study of the impact of the French Revolution and the dislocations wrought by industrialization will provide background for a close examination of Marx and his Hegelian roots. A close look at anarchist theories and critiques will close the work of the first term.
PROFESSOR SARF

160-364B. RADICAL POLITICAL THOUGHT (II). (3 credits.) The transformation of Marxist and anarchist theory in response to new theoretical and practical problems in the 20th century is our major focus. Such thinkers as Lukacs, Gramsci, Marcuse and Habermas will be studied in depth. The rise of "new left" radicalism and its significance in the era of technology will be probed.
PROFESSOR SARF

***157-406B. CULTURE ET CONTRE-CULTURE AU QUEBEC.** (3 crédits.) Quelles sont les origines et l'évolution récente de la culture traditionnelle au Québec? L'apparition de la contre-culture, ses protagonistes, son contenu. La contre-culture a-t-elle été récupérée par le système? La libération individuelle face à la libération collective.
PROFESSEUR LATOUCHE

160-413A. CRITICAL POLITICAL SCIENCE. (3 credits.) The course will consider the state of the discipline of political science, the political behaviour of masses and elites and their respective roles in western democracies, the control and the political message of the mass media, and relationship of business to politics. Major political studies will be criticized and evaluated; alternative interpretations and explanations of data will be offered.
PROFESSOR VAILLANCOURT

160-415B. POLITICAL PARTIES. (3 credits; *Prerequisite:* One other course in Comparative Government.) The course will explore various approaches to and models of political parties and party systems, and apply them to party systems in different societies. Among the models to be considered are those of Maurice Duverger, R. Michels, Samuel Eldersveld, Anthony Downs, W. H. Riker, Seymour Lipset and Stein Rokkan.
PROFESSOR M. STEIN

160-416B. POLITICAL SOCIALIZATION. (3 credits.) The following topics will be considered: 1) Theoretical approaches and conceptual frameworks; 2) the content and timing of political socialization; 3) agents and mechanisms of socialization; 4) role of early learning on later life behaviour; 5) approaches to the study of political leadership and elite socialization; 6) system level implications of political socialization; 7) problems and issues in the study of political socialization.
PROFESSOR VAILLANCOURT

160-417B. THE MILITARY AND POLITICS. (3 credits; *Prerequisite:* 160-211D or consent of the instructor.) Identification and comparison of the political and socio-economic roles played by professional military establishments in both the relatively modernized and the relatively non-modernized societies. The course will focus on the dynamics and impact of the military-industrial complex in the United States and Canada and on the significance of military coups and the performance of military regimes for the process of political modernization. The contributions of Janowitz, Huntington, Pye, Johnson, Lee, Bienen and Hurewitz will be considered.
PROFESSOR LATOUCHE

160-418A. ELITES AND POLITICS. (3 credits; *Prerequisite:* At least one course in Canadian or Comparative Government and Politics.) A critical examination of the major theoretical approaches to the study of elites (political, economic, intellectual, media, bureaucratic) and politics, and an evaluation of elite studies of Quebec, Canada, the United States, Britain, France, and other societies. Research into problems of elites in different societies will also be conducted.
PROFESSOR M. STEIN

160-421B. PROBLEMS IN CANADIAN POLITICS AND GOVERNMENT. (3 credits. *Prerequisites:* 160-221D and either 160-320A or 160-321B, or permission of the instructor.) This course will enable advanced students to deal with selected problems of Canadian socio-economic and political structures; political culture; constitutional development; and governmental structure. In 1974-75 the course will deal with the response of socio-political movements to changes in the political and economic environment in Canada since Confederation.
PROFESSORS MALLORY AND STEIN

160-424A. PROBLEMS IN CONTEMPORARY POLITICS. (3 credits.) In 1974-75 the course will be devoted to a study of the political systems of some of the Scandinavian countries as they illuminate problems of industrial and post-industrial society: economic policy making and democratic authority, equality and incentives, the development of a welfare ethic and institutions as well as the problems of small states in international politics.
PROFESSOR HASKEL

160-426B. ATTITUDES POLITIQUES: PARTIS ET COMPORTEMENTS POLITIQUES DANS LE QUEBEC CONTEMPORAIN. (3 credits.)
PROFESSOR LATOUCHE

160-433A. HISTORY OF POLITICAL AND SOCIAL THEORY (III). (3 credits; *Prerequisite:* 160-231D.) This course will deal with the political theories which underlay the French revolution, and with those to which it gave rise. It will begin with a discussion of the theory of Enlightenment and with a closer study of Rousseau. It will then continue with an examination of different reactions to the Revolution: those of Burke, de Maistre, and later that of de Tocqueville. It will also examine the development of the themes launched by Rousseau and the French Revolution by the German Idealists, Kant, Fichte, Hegel. Finally it will examine the revolutionary streams which rise in the period: Marx and Marxism, and anarchist thought.
PROFESSOR TAYLOR

160-434B. HISTORY OF POLITICAL AND SOCIAL THEORY (IV). (3 credits. Recommended: 160-231D.) A consideration of selected writers and themes of late 19th and 20th century political theory. Such topics will include the theoretical foundations of scientism and technology, the existentialist revolt, the political ideas of Freud and other depth psychologists, the theoretical foundations of modern social science, elite theory and implications for democracy, and other themes in political and social theory.
PROFESSOR TAYLOR

***160-453A. THE HISTORY OF BRITISH CONSTITUTIONAL THOUGHT.** (3 credits; *Prerequisite:* 160-231D.) A survey of the historical development of the British Constitution and the interpretation attendant upon its growth. Documents and writing to be studied include the Magna Carta, the Petition of Right, and the Bill of Rights, and the commentaries of Fortescue, Bracton, Coke, Selden, Blackstone, Burke, Bagehot and Dicey.
PROFESSOR SHINGLER

160-454A. THE HISTORY OF BRITISH POLITICAL THOUGHT. (3 credits; *Prerequisite:* 160-453A.) An historical and textual examination of selected writers and themes in British social and political thought drawn from: the rise of Puritanism; Hooker, Harrington, Filmer; Bacon, Hobbes, Locke and Sydney; Shaftesbury, Bolingbroke, Swift and Pope; Godwin, Shelley and their circle; Edmund Burke; the Utilitarians; the Clapham Sect; and various 18th and 19th century literary figures including Cobbett, Hazlitt, Carlyle, Ruskin and Morris.
PROFESSOR SHINGLER

160-460B. POLITICAL IDEOLOGIES. (3 credits.) A study of the origins, content and functions of ideologies, and their relationship to political action and institutions, through a comparative survey of some of the major political ideologies in the modern world.
PROFESSOR KUNZ

***160-465A. THE POLITICS OF PLANNING AND POLICY MAKING.** (3 credits.) This course will take up: (1) cultural, ideological, political and organizational influences on policy-making; (2) problems in the logic of policy-making. Students will focus on a problem in policy-making in such areas as science, regional development, language, economics, management, etc.
PROFESSOR HASKEL

160-471A. THE ANALYSIS OF RAPID SOCIAL CHANGE. (3 credits; *Prerequisite:* For majors and honours students only, or consent of instructor.) This is a seminar in which

various theories of revolution will be analysed with reference to the empirical reality of revolutionary phenomenon. The course will follow a comparative perspective with the goal being evaluation of revolutionary explanation and an attempt to formulate alternative theories. PROFESSOR BRUNEAU

160-475B. PROBLEMS IN INTERNATIONAL POLITICS. (3 credits.) A research oriented seminar dealing with selected topics in the field of International Politics and Foreign Policy. This seminar is intended for advanced undergraduates with good records or graduate students. In 1974-75 the seminar will examine the problem of conflict with special reference to the Arab-Israeli conflict and/or conflicts between developed and developing states. PROFESSOR NOBLE

***160-478A. RECENT THEORY IN INTERNATIONAL RELATIONS: STATE BEHAVIOUR.** (3 credits; *Prerequisite:* Consent of the instructor.) The seminar will explore representative theoretical and empirical studies which examine components of the foreign policy-making process. An attempt will be made to relate these components to foreign policy behaviour and to assess the utility and validity of alternative theoretical approaches. Students will be asked to prepare weekly evaluations of major articles in the field and will be responsible for three short essays dealing with major problem areas. PROFESSOR STEINBERG

160-479A. INTERNATIONAL CONFLICT. (3 credits. *Prerequisite:* At least one course in International Relations beyond U1.) An examination of the literature dealing with international conflict. Topics to be covered include the sources of international conflict, bargaining, strategies and dynamics of conflict, crisis behaviour, and the management of international conflict. PROFESSOR NOBLE

160-490A/160-491B. INDEPENDENT READING AND RESEARCH. (3 credits each.) Fourth year honours students wishing to pursue a specialized interest will be allowed to undertake a program of independent reading and/or research in that area under the supervision of a member of staff. Such programs may be undertaken by students either individually or in small groups. It is the responsibility of the student(s) to obtain the instructor's consent prior to registration.

160-494A. HONOURS SEMINAR IN INTERNATIONAL RELATIONS. (3 credits; *Prerequisite:* Consent of the instructor.) Honours students in this seminar will evaluate advanced material in foreign policy relevant to problems discussed in the introductory course. They will also assist in the teaching functions of Political Science 244A and will write papers evaluating the substantive content presented in the seminar. PROFESSOR J. STEIN

NOTE: U3 honours students with good records in Political Science are strongly encouraged to take First year graduate courses in their particular area of concentration. Those wishing to do so must receive permission from the course instructor. The courses available are as follows: 160-612B, 160-614A, 160-615B, 160-616A, 160-617B, 160-621A, 160-628A, 160-647A, 160-649A, 160-671B.

PSYCHOLOGY (204)

Stewart Biological Building, Room W8/1, Telephone 392-4708.

Psychology is the scientific study of man's mind and behaviour. It is both a social and biological science. As a social science, psychology studies man in his interactions with other members of his own species. As a biological science, it regards man as the product of evolution and so studies him in biological perspective, comparing and contrasting his behaviour wth that of other species.

The data of psychology are collected within the psychological laboratory by the use of experimental methods in the study of behaviour, and outside the laboratory by systematic observation of the behaviour of man and lower animals. The combination of experimentation and observation results in a knowledge of man's behaviour as he perceives his world, learns, directs his behaviour towards certain goals, and reacts to stress, frustration, and other men. Experimentation, laboratory techniques, observational procedures, measurement and statistical methods are important tools of the psychologist in the study of behaviour.

Psychology has many interdisciplinary aspects. The study of many psychological problems involves knowledge drawn from other disciplines such as biology, physiology, linguistics, sociology, philosophy, and mathematics. For this

reason a student with varied interests can frequently find a place for these interests in psychology.

Psychology is a young science so that explanations of the processes underlying observed phenomena are often theoretical and speculative. The major objectives of psychological study are to reduce the discrepancy between theory and fact and to provide better answers about why man thinks and behaves as he does.

Although a number of undergraduate courses in psychology have applied implications, applied training is in no way the purpose of the undergraduate curriculum. The purpose of that curriculum is to introduce the student to an understanding of the basic core of psychological knowledge, theory, and method, regardless of questions of practical application.

The B.A. or B.Sc. with a Major or Honours degree in psychology is not a professional qualification. It does not qualify the individual to carry on professional work in psychology. In the Province of Quebec the minimum requirement for membership in the Corporation of Psychologists of the Province of Quebec, the professional association governing the work of psychologists in the Province, is an M.A. or M.Sc. degree, or other equivalent degree.

Although requirements for admission to graduate studies in psychology vary from one university to another, both the Honours and Major degrees in psychology may qualify the student for admission to many graduate schools, provided of course that sufficiently high marks are obtained.

The essential difference between the Honours and the Majors program is that higher standards are required of Honours students. Honours students also have an opportunity to work in small groups closely with staff members.

PROGRAM INFORMATION. The Psychology Department offers 11 different options in its 54 credit programs. Except where otherwise stated, each of these programs may be taken as Major, Honours or Faculty programs. The differences between these three categories of programs are outlined below. The descriptions of the 11 options available in the B.A. program follow. See page 248 for descriptions of the options available only in the B.Sc. program.

PREREQUISITES. It is expected that most students who major in psychology will have taken introductory psychology and statistics at the collegial level. In the First year all Major students must take Psychological Statistics (204-305A or B). Those students who have not taken a college level statistics course must also take Psychology 204-204A or B in addition to the other courses in their program.

A student who has not taken an introductory psychology course at the collegial level may major in psychology by taking Psychology 204-201D in their U1 year and also the courses in Psychological Statistics 204-204A or B and 204-305A or B.

MAJOR PROGRAM. The following options are available in the Major program in Psychology:

1. General Psychology
2. Experimental Psychology
3. Cognition and Thinking
4. Child Psychology
5. Personality and Abnormal Psychology
6. Human Communications Disorders
7. Social Psychology
8. The Psychology of Language
9. Psychology in Relation to Problems in Education
10. Major in Psychology & Philosophy
11. Quantitative Psychology

Call the Chief Adviser, Ms. Olga Favreau (392-4694) to obtain an adviser. In the First year of any of the above programs all Major students take Psychology

204-305A, B. Detailed descriptions of the programs will be found on page 157. Students majoring in Psychology must obtain a minimum grade of C in all 54 credits required by their program. A grade lower than C may be made up by taking another equivalent course (if there is one), by successfully repeating the course, or by successfully writing a supplemental examination (if there is one).

HONOURS PROGRAM. Honours in Psychology prepares students for graduate study, and so emphasizes practice in the research techniques which are used in graduate school and professionally later on. Honours students take Psychology 204-380D in the first year (normally U2) of their program, and they take Psychology 204-480D and 204-481D in the second year (normally U3). These courses have limited enrolments, and admission to Honours is selective. There is normally room for 30-35 new Honours students each year. Students with a cumulative grade point average of 2.8, or better, are eligible to apply.

Students are normally accepted into Honours at the beginning of U2, and the two-year sequence of Honours courses continues through U3. Students who have had Introductory Psychology and Statistics at the institution preceding McGill, *who have an exceptional academic record,* and who apply for admission to Honours in U1 will be considered for acceptance. Failure to be admitted to Honours in U1 will not prejudice application for admission in U2.

Applications can be obtained from the general office of the Department of Psychology, Room W8/1, Stewart Building. The applications must be completed and returned to the general office by 1 September of the year for which admission to Honours is sought. Candidates will be advised of the department's decision by letter shortly after September 1. For information (other than application forms) about the Honours program, phone Professor Don Donderi, Honours Committee Chairman, at 392-4693.

FACULTY PROGRAMS. A Faculty Program in Psychology is a sequence of courses which represents a lesser degree of specialization than a Major or an Honours program. A Faculty Program may be made up of any of the Major programs with the substitution of 6 credits from U2 Psychology courses for Psychology 204-211D and 204-305A or B. The Joint Program in Psychology and Mathematics is also a faculty program. For further details see program information at beginning of the Arts section.

PROGRAM DESCRIPTIONS. The courses in the programs are ordered sequentially so that it will normally take three years to complete a program. The Major and Faculty Programs all include 18 credits in each of U1, U2, and U3. Students may, with the consent of their Faculty Adviser, substitute up to 6 credits in a program. Any further changes must be approved by the Associate Dean of the Faculty.

When selecting optional program courses from other departments, it is the student's responsibility to see that she or he has taken the appropriate prerequisites and/or obtained permission of the department where necessary.

None of the B.A. or B.Sc. programs provides professional training. They are all intended to give the student a general academic background in the interest area indicated by their titles. Those who are interested in practising psychology professionally must obtain graduate degrees at least at the Master's level, and should preferably continue on to the Ph.D. The Honours programs are most specifically designed to train students who intend to go to graduate school. However, it is important to remember that admission to graduate studies is highly competitive, and that no degree guarantees entry to advanced study. Students with a Major in Psychology may also, if they have chosen their courses appropriately and obtained high enough standing, be admitted to graduate studies, although they may sometimes be required to complete a qualifying year. Students in Faculty programs who decide to go into graduate study in psychology will most probably have to complete a qualifying year first. Further information about

advanced study in Psychology may be obtained from the American Psychological Association's Handbook on the topic. It is usually on sale in the University Bookstore.

Courses in the Faculty of Management

The Faculty of Management offers the following courses in the Behavioural Sciences: 280-221A, Behavioural Science I (3 credits); 280-222B, Behavioural Science II (3 credits); 272-420A, Group Dynamics and Interpersonal Relations (3 credits); 272-421B, Strategies of Management and Organization Development (3 credits); 275-458A, Consumer Behaviour (3 credits); 275-495A, Marketing Research (3 credits).

Where appropriate to a student's program, and with the permission of the program adviser, one or more of these courses may be taken for credit by students enrolled in programs in psychology. Programs in such fields as personnel management, administrative behaviour, and consumer behaviour are also available to students through a cooperative arrangement between the Faculty of Management and the Department of Psychology.

Graduate Study

Students planning to work for a graduate degree in Psychology are advised to include Psychology 204-300A, 301B, 302A, 303B, 400D and 450D among their courses. The adviser to Major students will, whenever possible, assist students in planning their courses to coincide with their professional aims. Most graduate schools require not only a record of high achievement, but also adequate performance on some entrance examinations such as the Graduate Record Examination and the Miller Analogies Test, as well as letters of recommendation.

Major Program

GENERAL PSYCHOLOGY OPTION

This program is intended to give maximum flexibility to students in choosing their own courses. In this 54 credit program at least 36 and as many as 54 credits must be in psychology courses. The latter must include Psychology 204-305A or B and 12 credits in U3 psychology courses. If fewer than 54 credits in psychology are taken, then the difference between that number and 54 must be made up by selecting courses in other departments from the following list (the list may not be up to date in September 1974; the relevant department should be consulted before choosing). Students in the Faculty of Science who select arts courses from this list must have a total of at least 54 credits in science courses among the 90 credits for the B.Sc. degree. Students are expected to have whatever prerequisites are described in the Calendar.

Anatomy 504-421A; Anthropology 141-202B, 203A, 206A, 228A, 303B, 305B, 312A, 316A, 321B, 428B, 437B, 440A; Biochemistry 507-455B; Biology 177-111A, 112B, 201D, 205D, 274A,B, 303A, 305A, 325A, 326B, 351B, 352A, 370B, 372B, 385B, 386A, 391A, 392B, 394B, 471B, 488A, 493B; Computer Science 308-220A,B; Geography 183-214A, 215B, 217B, 300B; Linguistics 104-200A,B, 104-201A,B, 230A, 241B, 321B; Mathematics 189-120A,B, 121A,B, 217A, 218B, 223A, 224A, 314A,B, 317A, 318A, 323A, 324B, 327B, 328B, 417A, 423A, 424B, 447B; Philosophy 107-210A, 211B, 313D, 321A, 322B, 410D; Physiology 552-201A, 202B, 211D; Sociology 166-210A or 212A, 222A, 223B, 225B, 227A, 247B, 303A, 309A, 417B.

EXPERIMENTAL PSYCHOLOGY OPTION

U1 Courses: Psychology 204-211D, 305A,B; plus 12 credits selected from 200 and 300 level courses for which you have the prerequisites.

U2 Courses: At least 9 credits from: Psychology 204-300A, 301B, 315A, 302A, 303B, 308D; plus enough credits from the following list to make up 18: Psychology 204-307D, 309B, 310D, 335A, 336B, 342A.

U3 Courses: Psychology 204-400D plus 12 credits selected from: Psychology 204-401D, 416A, 417B, 403B, 404B, 406B, 423A, 424B, 425A, 430B, 450D.

COGNITION AND THINKING OPTION

U1 Courses: Psychology 204-305A,B; plus 9 credits selected from *List A:* Psychology 204-201D, 211D, 301B, 302A, 303B, 340A, 341B, 401D, 404B, 425A; plus at least 3 credits from *List B:* Psychology 204-214D, 300A, 304D, 307D, 308D, 310D, 335A, 336B, 400D, 403B, 405B, 406B, 408A, 410D, 423A, 424B, 431B, 450D, 452D, 455D; plus at least 3 credits selected from *List C:* Philosophy 107-200D, 212B, 210A, 211B, 313D, 321A, 322B, 350D, 351D, 317A, 318B; Art History 123-200D, 335A, 440D; Biology 177-111A, 112B, 205D, 386B, 392B; Mathematics 189-120A,B, 121A,B, 205A, 206B, 217A, 218B, 231A,B, 232A,B, 271D, 318A, 328B; Linguistics 104-200A,B, 201A,B, 321B, 350A, 351B, 360A, 361B; Computer Science 308-100A,B, 200A,B, 210A,B, 300A,B; Physics 198-101A,B, 102A,B, 120A,B, 224B. A total of 18 credits must be taken.

U2 Courses: At least 9 credits from list A; at least 3 credits from list B; at least 3 credits from List C for a total of 18 credits.

U3 Courses: A least 9 credits from List A, 6 credits of which must be Psychology 204-401D; at least 3 credits from List B; at least 3 credits from List C for a total of 18 credits.

NOTE: Honours courses must be substituted for List B options.

CHILD PSYCHOLOGY OPTION

U1 Courses: Psychology 204-211D, 305A,B plus 6 credits selected from: Psychology 204-201D, 300A, 301B, 302A, 303B, 306A; plus 6 credits selected, in consultation with adviser, from Sociology, Anthropology, and Biology.

U2 Courses: Psychology 204-304D plus 9 credits to be selected, in consultation with adviser, from any 300 level course in psychology provided prerequisites have been met; plus 3 credits to be selected, in consultation with adviser, from Biology, Anthropology and Sociology.

U3 Courses: Psychology 204-410D plus 9 credits to be selected, in consultation with adviser, from any 400 level course in psychology provided prerequisites have been met; plus 3 credits to be selected, in consultation with adviser, from Anthropology, Biology and Sociology.

PERSONALITY AND ABNORMAL PSYCHOLOGY OPTION

U1 Courses: Psychology 204-305A,B; plus 15 credits to be selected from: Psychology, 204-201D, 211D and courses selected, in consultation with adviser, from Biology, Sociology, Anthropology and Philosophy.

U2 Courses: Psychology 204-337A, 338B; plus 12 credits to be selected from: Psychology 204-300A, 301B, 302A, 303B, 304D, 308D, 309B, 332A, 404B; and/or selected subjects, in consultation with adviser, from Biology, Physiology, Sociology and Philosophy.

U3 Courses: Psychology 204-491D, 408A; plus 9 credits from: Psychology 204-310D, 400D, 405B, 412A, 433B, 451D, 458B, 434B.

HUMAN COMMUNICATION DISORDERS OPTION

U1 Courses: Psychology 204-214D, 211D, 305A,B, plus 6 credits to be selected from the following relevant courses: Psychology 204-301B or 306A, 302A, 303B, 304D, 308D, 310D, 340A, 341B, 404B, 425A, 434B, 455D, 458D.

U2 Courses: Linguistics 104-200A, 201B; Psychology 204-300A, 337A plus 6 credits to be selected from the list of relevant courses above.

U3 Courses: Psychology 204-408A; Linguistics 104-350A, 351B, plus 9 credits to be selected from the list of relevant courses above.

SOCIAL PSYCHOLOGY OPTION

U1 Courses: Psychology 204-305A,B plus 6 credits selected from: Psychology 204-201D, 300A, 301B, 302A, 303B; plus 9 credits selected, in consultation with adviser, from Anthropology, Sociology, Economics, Political Science, Philosophy and Linguistics.

U2 Courses: Psychology 204-330A, 331B plus 12 credits selected in consultation with adviser from Psychology 300 level courses.

U3 Courses: Psychology 204-411D; plus 12 credits selected in consultation with adviser from Psychology 400 level courses.

NOTE: The total number of psychology credits required for this program is 45 out of the 90 needed. The professors in charge of the program feel that this proportion provides a sound coverage of the field and that the student would be wise to choose his alternatives from a wide variety of disciplines in the University.

PSYCHOLOGY OF LANGUAGE OPTION

U1 Courses: Psychology 204-305A,B; Linguistics 104-201D; plus 3 credits to be selected from the following optional courses: Linguistics 104-230A, 241B; Philosophy 107-210A, 211B.

U2 Courses: Psychology 204-340A, 341B; Linguistics 104-350A; plus 9 credits to be selected from the list of optional courses under U1 or from the following list: Psychology 204-214D, 301B, 302A, 303B; Linguistics 104-321B, 351B; Philosophy 107-317A, 318B.

U3 Courses: Psychology 204-425A, 455D; Linguistics 104-360A, 361B; plus 3 credits to be selected from optional courses listed under U1 and U2 or: Psychology 204-401D, 404B, 406B, 450D; Linguistics 104-430A or 431B, 461B, 480A; Philosophy 107-483A, 484B; Mathematics 189-328B; Anthropology 151-440B; Sociology 166-217A, 217B.

PSYCHOLOGY IN RELATION TO PROBLEMS IN EDUCATION

U1 Courses: Psychology 204-210D; 305A,B; Anthropology 151-228A; plus 6 credits from U2 Psychology courses which are open to U2 students.

U2 Courses: Psychology 204-301B; 304D; plus 9 credits from: Psychology 204-302A; 303B; 310D; 330A; 332A; 337A; 341B; Sociology 166-422A; Anthropology 151-428B; Education 414-492A,B.

U3 Courses: Psychology 204-406B; Education 413-402D; plus 9 credits to be selected from: Psychology 204-410D; 451D; 452D; 408A; 415D; or any U2 course not yet taken.

JOINT MAJOR IN PHILOSOPHY AND PSYCHOLOGY

U1 Courses: Psychology 204-305A,B; Philosophy 107-200D, plus 9 credits to be selected from: Philosophy 107-340D, 341D, 210A; Psychology 204-201D, 211D.

U2 Courses: Philosophy 107-301A, 302B; Psychology 204-302A, 303B; plus 6 credits to be selected from: Philosophy 107-350D, 351D, 313D; Psychology 204-340D, 301B, 337A, 330A, 332A.

U3 Courses: Philosophy 107-321A, 494B; Psychology 204-400D; plus 6 credits to be selected from: Philosophy 107-493A; Psychology 204-425A, 404B, 401D, 403A.

QUANTITATIVE PSYCHOLOGY OPTION

U1 Courses: Mathematics 189-222A,B, 245A,B; Computing Science 308-200A,B, or 220A,B; plus 6 credits to be selected from Psychology 204-201D, 302A, 303B.

U2 Courses: Mathematics 189-323A, 324B; plus 3 credits selected from Mathematics 189-314A,B, 317A, 318A, 327B, 328B; plus 9 credits selected from Psychology courses (other than 204-204A,B; 305A,B), which must include Psychology 204-302A, 303B if not taken in U1.

U3 Courses: Psychology 204-335A, 336B; Mathematics 189-423A, 424B, 417A, 447B; plus 6 credits selected from psychology courses other than Psychology 204-204A,B; 305A,B.

Course descriptions: See Psychology in Science section of calendar.

RELIGIOUS STUDIES (260)

William and Henry Birks Building, 3520 University Street.

Courses are offered to students in other Faculties and Schools in the University through the Faculty of Religious Studies. They may be taken as individual electives, or through the Major and Honours programs in Religious Studies which can lead to teaching, social work, professional religious service, and graduate study in religion or theology. Religious Studies courses may be usefully combined with other concentrations, e.g. Art History, Classics, Jewish Studies, History, Philosophy.

For general information on courses and Major and Honours programs, consult the Adviser, Professor Stevenson, Room 108, phone 392-4835. For specific course information consult the instructor.

Major and Honours students must consult the Adviser prior to registration each year.

Major in Religious Studies

A Major in Religious Studies consists of 54 credits as follows

1) At least 36 credits are to be chosen from the Religious Studies courses described below. (Major Students may choose their courses from the list below; but also from the B.Th. program in the Faculty of Religious Studies calendar and certain courses in the Jewish Studies Program, after consultation with the Adviser.) Students must choose at least one full course (6 credits) in a tradition other than their own.
2) Up to 18 credits to be chosen from approved Related Courses. Students taking such courses must fulfil any requirements (prerequisites, grades, etc.) laid down by the department concerned.

INTERDISCIPLINARY MAJOR programs may be arranged in consultation with the Adviser. Joint programs are in operation between Religious Studies and Classics, Philosophy and Art History.

Honours in Religious Studies

The Honours program in Religious Studies offers a degree of analysis and concentration beyond that of the Major program through course work, intensive research and discussion with peer groups.

There are no prerequisites for entry to the program which will normally be at the beginning of the first year. Students must maintain a GPA of 2.8; or 3.5 for First Class Honours.

The program consists of a minimum of 66 credits chosen as follows:

1) At least 48 credits from the Religious Studies courses described below. (Honours students may also choose from the B.Th. program in the Faculty of Religious Studies calendar, and certain courses in the Jewish Studies Program, after consultation with the Adviser. In special cases, permission may be given for admittance to graduate seminars in the Faculty of Religious Studies.) Among these the following are required: 200D and 251D in U1; the Honours Colloquium (3 credits) in U2 and U3; one course (6 credits) in a religious tradition other than the student's own in U2 or U3.
2) Up to 18 credits from approved Related Courses (see below).

Joint Honours in Religious Studies

Please consult the Adviser for latest information.

Course Descriptions

260-200D. RELIGIOUS TRADITIONS OF THE ANCIENT NEAR EAST. (6 credits.) The Religion of Ancient Israel in the setting of the Ancient Near East: a brief consideration of religion in general, its origin, nature and study; other religions of the Ancient Near East, e.g. those of Egypt and Mesopotamia; the Religion of Ancient Israel.
PROFESSOR RUNNALLS

260-251D. HISTORY OF RELIGION. (6 credits.) An introduction to the Buddhist, Christian, Hindu, Jewish and Muslim religious traditions. PROFESSOR STEVENSON AND STAFF

260-280D. NEW TESTAMENT GREEK. (6 credits.) An introduction to the language. STAFF

260-300A. POST-BIBLICAL JEWISH TRADITION. (3 credits.) The origins of Rabbinic Judaism: a survey of Jewish history and thought from Ezra to the Tannaim; oral tradition; Torah interpretation in the Mishnah and Midrashim. PROFESSOR RUNNALLS

260-301B. POST-BIBLICAL JEWISH TRADITION. (3 credits; *Prerequisite:* Religion 300A or the consent of the instructor.) The religion and literature of sectarian groupings: Apocalyptic thought; Wisdom; Dead Sea Scrolls; Josephus. PROFESSOR RUNNALLS

260-310D. THE NEW TESTAMENT — ITS MAKING AND MEANING. (6 credits.) The beginnings of the Christian Movement; the mission and achievement of Jesus. Early Christian Missions and the growth of institutions. Religion 200D is a desirable but not mandatory previous course. PROFESSOR KIRBY

260-320D. A HISTORY OF CHRISTIAN THOUGHT. (6 credits.) A survey of the development of Christian thought from the post-apostolic period to the present day, in relation to the concurrent cultural and philosophical movements. The work of prominent Christian thinkers, ancient, mediaeval and modern, will receive special attention.
PROFESSOR JAY

260-322A. HISTORY OF THE CHURCH (TO AD 325). (3 credits.) An historical introduction to the emergence of the Christian Tradition as catholic and orthodox, its conflict with the Roman Imperial State, and the development of Christian missions and institutions. This half-course ends with the first Ecumenical Council at Nicaea (AD 325), and it is normally to be taken as a prerequiste to 260-323B. PROFESSOR JOHNSTON

260-323B. HISTORY OF THE CHURCH (AD 325-604). (3 credits.) The history of the Imperial State Church from Constantine I to Justinian the Great; the rise of the Papacy (to Gregory I); the theological controversies, monasticism, the inner life of the Church, liturgy, and Byzantine Art. The emphasis will be on the growth of a Christian culture and the tensions which prepared the way for Islam in North Africa and the East, and for the Dark Ages in the West. PROFESSOR JOHNSTON

260-340B. RELIGION AND THE SCIENCES. (3 credits; Not offered in 1974-75.) Modern philosophy of science and of religion have created a more positive dialogue on questions of method, symbolism and rationality. We examine key issues (e.g. creation and evolution; objectivity and involvement; determinism and freedom) raised by natural and social sciences and various possible solutions. PROFESSOR McLELLAND

260-345A. RELIGION AND THE ARTS. (3 credits; Not offered in 1974-75.) Studies in relationships between religious symbolism and aesthetic forms. Literary criticism will provide an approach to comparative analysis of art forms as conveyors of images of man, critics of social types and forms of ultimate concern. PROFESSOR McLELLAND

260-359B. HONOURS COLLOQUIUM. (3 credits.) Primarily for Honours students; but may be taken by Undergraduate or Graduate students with special permission. STAFF

260-361A. RELIGIOUS BEHAVIOUR. (3 credits.) A study of some significant aspects of religious life (e.g. worship, mysticism, prayer) and some contemporary religious phenomena (e.g. glossolalia, chemical ecstasy). Religious growth and the religious personality are also considered. PROFESSOR PEASTON

260-371B. THE HUMAN CONDITION. (3 credits.) A critical examination of representative theories about man, his situation and his values in the light of traditional interpretations of Christian anthropology and ethics, together with an attempt to formulate some contemporary clues in response to man's search for meaning. PROFESSOR BOORMAN

260-380D. ADVANCED NEW TESTAMENT GREEK. (6 credits.) Advanced course in the language with reading of selected biblical texts. STAFF

260-390D. HEBREW LANGUAGE. (6 credits.) Introduction to the language. PROFESSOR RUNNALLS

260-440D. RELIGION AND THE MODERN MIND. (6 credits; Not offered in 1974-75.) Three main questions: What is religion? How are faith and reason related? What is man's nature and destiny? are discussed in terms of such contemporary issues as materialism, atheism, the role of intellectual and artist, the future man. PROFESSOR McLELLAND

260-450D. THE ISLAMIC TRADITION. (6 credits.) The Islamic Community and the elements of its tradition — Scripture, prophet, doctrine, practices, institutions — considered historically and in terms of religious meaning. PROFESSOR ADAMS

260-451D. THE HINDU TRADITION. (6 credits.) An introduction to the Hindu religious tradition, its history, faith and practice. PROFESSOR STEVENSON

260-459B. HONOURS COLLOQUIUM. (3 credits.) Primarily for Honours students; but may be taken by Undergraduate or Graduate students with special permission. STAFF

260-490D. HEBREW TEXTS. (6 credits.) Advanced course in the language. PROFESSOR CULLEY

260-496A. RESEARCH SEMINAR. (3 credits.) Topics to be arranged for Major students. STAFF

260-497B. Topics to be arranged for Major students. STAFF

260-498B. SPECIAL STUDIES. (3 credits.) Topics to be arranged. Reading and research for Major students. STAFF

260-499A. SPECIAL STUDIES. (3 credits.) Topics to be arranged. Reading and research for Major students. STAFF

397-100D. INTRODUCTION TO LITERARY ARABIC. (6 credits.) STAFF

397-200D. ELEMENTARY ARABIC. (6 credits.) STAFF

397-300D. INTERMEDIATE ARABIC. (6 credits.) STAFF

Languages

Arabic is taught by the staff of the Institute of Islamic Studies and students taking it must fulfil the requirements of the Institute.

Students taking other introductory language courses in Religious Studies programs are strongly advised to take the advanced course also.

Instruction in the languages of some other religious traditions (such as Ancient Egyptian and Sanskrit) may be available in any given year. Ask the Adviser for further information.

RELATED COURSES include the following (others might be considered appropriate, depending upon content and the student's interest and qualifications; course numbers may vary from year to year):

ANTHROPOLOGY	151-203A, 209B, 210B, 215A, 313B, 331B, 440B.
ART HISTORY	123-211A, 212B, 222D, 223A, 224B, 312A, 313B, 315B, 343B, 344B, 414D.
CLASSICS	114-200A, 201D, 202B, 203A,B, 302B, 308B, 310B, 471D, 472D, 473A.
EDUCATION	(See Faculty of Ed. announcement. Elementary Education, Catholic Studies).

ENGLISH	110-215A,B, 216B, 230D, 235A, 236A, 237B, 245D, 246D, 251D, 300D, 302A, 306A, 308A, 309B, 310A, 315D, 316B, 333D, 346D, 353B, 356A, 357A, 358B, 359B, 401D, 403D, 405D, 407A, 408B, 417A, 418D, 419A, 420D.
FRENCH CANADA STUDIES	101-403D, 157-300D.
GERMAN	129-371B, 460A, 461B.
HISTORY	101-206D, 207D, 208D, 280D, 308D, 314D, 317D, 318D, 325D, 332D, 336D, 337D, 405D, 418D, 448B, 479D.
ITALIAN	132-325A.
JEWISH STUDIES	135-301D, 309D, 311D, 343D, 345D, 403D, 421D.
MUSIC	214-316A, 317B, 318A.
PHILOSOPHY	107-200D, 205D, 301D, 332D, 340D, 341D, 345D, 350D, 351D, 404D, 531A, 548A, 549B, 552A.

RUSSIAN AND SLAVIC STUDIES (141)

Samuel Bronfman Building, Room 660, Telephone 392-4610 or 392-4616.

Many opportunities are open to students with qualifications in Russian and other Slavic studies. Students may be interested in the organization of human society, comparative literature, linguistics. Russian studies are highly relevant to all of these. In addition, because of similar problems in geography, climate, industrial and economic growth Russian studies may have a particular fascination for the Canadian student.

Major Program

The Major program consists of at least 54 credits (of which at least 42 must be in Russian, preferably twelve credits in U-1, twelve in U-2 and 18 credits in U-3). Various sequences of courses are possible but close consultation with the Department and approval of proposed sequences is essential. Please consult the office at 392-4610 or 392-4616 and say you need information on the Major program. Admission is based on personal interviews to establish how much Russian has been taken previously, if any, and to work out a reasonable program for the individual.

Honours Program

The Department offers a full Honours program in Russian. Single Honours in Russian require at least 10 courses (60 credits) in Russian to be taken during the three university years out of a total of 15 required courses (90 credits). In addition, at least a second class average (B) must be obtained. All Honours programs require consideration and approval by the Department. Normally 200 level courses are taken in U-1, 300 level ones in U-2 and 400 level courses in U-3. However, many exceptions may occur depending on student's abilities. Telephone 392-4610 or 392-4616 and mention you are interested in Honours in Russian.

Joint Honours Programs

The Department also offers Joint Honours programs in cooperation with the Departments of Classics, French, Geography, German, History, Italian, Linguistics, Political Science, Spanish. These programs also require a total of 15 courses (90 credits) with a B average over the three university years. Two courses (12 credits) in Russian and two (12 credits) in the cooperating Department are normally taken each year. As in Single Honours and Majors all programs require consideration and approval by the Departments involved. For information telephone 392-4610 or 392-4616 and mention you are interested in the Joint Honours program.

Course Descriptions

141-210D. RUSSIAN LANGUAGE. (6 credits; *Text:* to be announced.) Reading, grammar, translation, oral practice. STAFF

141-212D. RUSSIAN READING COURSE. (6 credits.) Method and practice of translation. The first half of the course will be devoted to an introduction to Russian, the second half to actual translation of texts from various fields of interest. This course is intended for students wishing to learn to read Russian easily. STAFF

141-215D. RUSSIAN LANGUAGE INTENSIVE. (12 credits.) Intensive language course, covering the first two levels in one year rather than the usual two, is before Faculty for final approval according to guidelines to be determined by Faculty. Information will be available at registration. PROFESSOR BAUER AND STAFF

141-217B. ACCELERATED INTRODUCTION TO RUSSIAN STUDIES. (3 credits; *Prerequisite:* Evidence of ability in modern or classical languages and Departmental permission.) This course is intended for the student who has already shown merit in modern or classical languages, and who wants to obtain a good knowledge of Russian language, literature and civilization in a short time. Successful completion of this course will normally admit to the higher level courses in Russian at McGill. PROFESSOR AUSTIN AND STAFF

141-218A. SOVIET LITERATURE (UP TO WORLD WAR II). (3 credits; *Prerequisite:* None.) The social conditions leading to the creation of post-revolutionary literature. What does the West understand by "socialist realism" and what does this term mean in Russia? The period of different literary schools in Soviet literature and the organization of the Writers' Union. Specific features of the literature of the thirties. This course will be conducted in English. STAFF

141-219B. SOVIET LITERATURE (AFTER WORLD WAR II). (3 credits; *Prerequisite:* None.) The impact of World War II on Soviet literature. Post-war changes in official literary policy; "Zhdanovism." The period of "thaw," and debates on the principles of creative freedom. The three Nobel prize winners. The emergence of young writers with new voices. This course will be conducted in English. STAFF

141-220D. RUSSIAN LANGUAGE. (6 credits; *Prerequisite:* Russian 210D or equivalent; *Text:* Stilman and Harkins, *Introductory Russian Grammar.)* Reading, translation, conversation. STAFF

141-222D. RUSSIAN CIVILIZATION IN THE TWENTIETH CENTURY. (6 credits; *Prerequisites:* Russian 210D or equivalent and permission of the Department.) This is a general introduction to the changing relationships between Russian language, literature, thought and culture in the twentieth century. It will be conducted to some extent in Russian. PROFESSOR AUSTIN AND STAFF

141-223A. RUSSIAN WRITERS OF THE 19TH CENTURY. (3 credits; *Prerequisite:* None.) The course, to be given in English, is designed for students interested in Russian Literature and its authors. The course will offer students a broad overview acquainting them with the main Russian literary currents of the 19th century and with the lives and destinies of its writers. STAFF

141-224B. THE RUSSIAN WRITER OF THE TWENTIETH CENTURY. (3 credits; *Prerequisite:* None.) This course, given in English, examines the rôle of the creative writer in the conditions of Russian society of the twentieth century. Special emphasis is laid on factors affecting the writer's art as well on the writer's own reflections unon his craft. PROFESSOR STAFF

141-225D. RUSSIAN LANGUAGE. (Continuation of Russian 215D.) (6 credits; *Prerequisite:* Russian 215D or equivalent. Registration limited.) Students completing it will have a good working knowledge and appreciation of the language and will be able to go directly into advanced courses in Russian language and literature. Students may, at the discretion of the Department, revert to Russian 220D after two months at the latest. PROFESSOR BAUER AND STAFF

141-226D. OUTLINES OF 19TH CENTURY RUSSIAN LITERATURE. (6 credits; *Prerequisites:* Russian 215D or equivalent, and the permission of the Department; *Texts:* Mirsky, *History of Russian Literature:* Knopf; Slonim, *Outlines of Russian Literature:* Oxford; Other prescribed texts to be selected.) A general introduction to Russian prose, poetry and drama in the 19th Century. Selected texts will be read in the original and discussed. The course will be conducted to some extent in Russian. STAFF

141-227D. INTRODUCTION TO SOVIET RUSSIAN LITERATURE. (6 credits; *Prerequisites:* Russian 215D or equivalent, and the permission of the Department; *Texts:* Reddaway (ed.). *Soviet Short Stories,* Vol. 2, Harper *et al.,* editors. *New Voices;* Other prescribed texts to be selected.) Selected texts will be read in the original and discussed. The course will be conducted mainly in Russian. PROFESSOR AUSTIN

141-235D. INTRODUCTION TO RUSSIAN STUDIES. (6 credits; *Prerequisite:* Permission of the Department.) An introduction to the study of Russian civilization with emphasis on the Russian language as a vehicle of culture, on the literature of the 19th century, on Soviet literature, on the role of the author in Russian society, on literary censorship in the 19th and 20th centuries. PROFESSOR NICHOLSON AND STAFF

141-240D. INTRODUCTION TO UKRAINIAN STUDIES. (6 credits; *Prerequisite:* Permission of the Department.) An introduction to the study of Ukrainian civilization with emphasis on the position of Ukrainian as an Eastern Slavic language with an ancient culture, on the literature of the 19th and 20th centuries, and on the role of the Ukrainian writer in his society. DR. ROMAN OLYNYK

141-245D. INTRODUCTION TO BULGARIAN STUDIES. (6 credits; *Prerequisite:* Permission of the Department.) An introduction to the study of Bulgarian civilization. Emphasis will be laid on Bulgarian as a development of the Slavs' first literary language, on Bulgarian literature from the earliest times and on the role of the Bulgarian writer in his society. PROFESSOR LE GUILLOU

141-255D. INTRODUCTION TO POLISH STUDIES. (6 credits; *Prerequisite:* Permission of the Department.) An introduction to the study of Polish civilization, with emphasis on the Polish as a Western Slavic language, on Polish literature of the 19th and 20th centuries particularly, and on the role of the Polish writer in his society. MR. G. ADRIANOW AND STAFF

141-300D. RUSSIAN LANGUAGE AND LITERATURE IN THE 19TH CENTURY. (6 credits; *Prerequisites:* Russian 220D or equivalent and permission of the Department.) Grammar. Readings from selected authors, conversation and composition. The course will be conducted in Russian. PROFESSOR PAVILANIS

141-320D. RUSSIAN CIVILIZATION IN THE NINETEENTH CENTURY. (6 credits; *Prerequisites:* Russian 220D, 222D or equivalent and permission of the Department.) This course, given in Russian, discusses the relationship between Russian language, literature, thought and culture form Karamzin to Chekhov. PROFESSOR PAVILANIS

141-340D. INTERMEDIATE UKRAINIAN STUDIES. (6 credits; *Prerequisite:* 240D or permission of the Department). Second level Ukrainian studies. DR. ROMAN OLYNYK

141-345D. INTERMEDIATE POLISH STUDIES. (6 credits; *Prerequisite:* 255D or permission of the Department). Second level Polish studies. STAFF

141-350D. ADVANCED RUSSIAN LANGUAGE AND SYNTAX. (6 credits; *Prerequisites:* Russian 225D or equivalent, and permission of the Department.) Prose composition, translation, essay writing. An introduction to Russian stylistics. PROFESSOR AUSTIN

141-355D. RUSSIAN COMPARATIVE GRAMMAR. (6 credits; *Prerequisites:* Russian 225D or equivalent and permission of the Department.) This course, given principally in Russian, will discuss Russian structurally from the viewpoint of the non-Russian student. Each student will prepare at least one original paper to be discussed in class. PROFESSOR NICHOLSON

141-360D. THE RUSSIAN NOVEL FROM 1820 TO 1860. (6 credits; *Prerequisites:* Russian 225D or equivalent, and permission of the Department.) The development of the Russian novel before Tolstoy, and Dostoevsky. Reading texts will be chosen from the prose works of Pushkin, Lermontov, Gogol', Turgenev and Goncharov. This course will be conducted in Russian. PROFESSOR AUSTIN

141-370D. PUSHKIN AND HIS CONTEMPORARIES. (6 credits; *Prerequisites:* Russian 225D or equivalent and permission of the Department.) The Golden Age of Russian poetry. The course will be conducted in Russian. STAFF

141-400D. RUSSIAN LANGUAGE AND LITERATURE AFTER 1917. (6 credits; *Prerequisite:* Russian 300D or permission of the Department.) The development of the Russian novel and language after the October Revolution. The course will be conducted in Russian. STAFF

141-410D. DRAMA IN RUSSIAN LITERATURE. (6 credits; *Prerequisite:* Permission of the Department.) Representative works of the 19th and 20th centuries are studied and discussed. Reading texts will be chosen from the plays of Fonvizin, Griboedov,

Pushkin, Gogol', A. Ostrovsky, Turgenev, Chekhov, Gor'ky and Kataev. The course will be conducted in Russian. STAFF

141-420D. RUSSIAN CIVILIZATION OF THE EARLIER PERIOD. (6 credits; *Prerequisite:* Permission of the Department.) This course, given in Russian, discusses the development of Russian culture from the earliest times to the death of Catherine the Great. STAFF

141-450D. TWENTIETH CENTURY RUSSIAN LANGUAGE AND LITERATURE. (6 credits; *Prerequisites:* Russian 350D or equivalent and permission of the Department.) Specific features of the style of modern literary Russian will be analysed and compared with the language of the 19th century. The origins and development of Soviet Russian literature will be studied in detail. The course is primarily intended for Honours students. It will be conducted in Russian. STAFF

141-460D. THE RUSSIAN NOVEL FROM 1860 TO 1900. (6 credits; *Prerequisites:* Russian 350D or equivalent and permission of the Department.) The Golden Age of the novel in Russian literature. The major works of Turgenev, Dostoevsky and Tolstoy will be read in the original and discussed in Russian. STAFF

141 GRADUATE COURSES. Certain graduate courses may be open to U-2 and U-3 students. Consult the Graduate calendar and the Department.

SCHOOL OF SOCIAL WORK (407)

3506 University Street, Telephone 392-5040

Bachelor of Social Work Degree (B.S.W.)

EDUCATIONAL OBJECTIVES

The Faculty of Arts, through the McGill University School of Social Work, offers an undergraduate program of professional studies in Social Work, leading to the Degree of Bachelor of Social Work (B.S.W.). The B.S.W. degree course has the following principal educational objectives:

1) To prepare students for professional practice in any one of a range of social service positions. (Holding of the B.S.W. degree represents the point of admission into the Corporation of Professional Social Workers of the Province of Quebec and the Canadian Association of Social Workers.)

2) To prepare selected students for entry into more specialized professional studies at the graduate level.

ADMISSION

Admission to the B.S.W. is open to two groups of applicants: a) those who have completed two years of collegiate or equivalent studies, including introductory courses in Sociology, Psychology and French, as recognized by the University Admissions Office, and b) those who hold a B.A. at a B level average, with substantial content in social and behavioural sciences. Both groups should also have had introductory courses in statistics.

Application for admission should be made at the University Admissions Office.

PLAN OF STUDY

a) The regular B.S.W. comprises a combination, over the three years, of professional courses, supervised field practice and practice-related courses drawn principally from the social and psychological sciences.

b) The program is organized so that the proportion of professional content to social and psychological science content increases from year I to year III.

c) The B.S.W. degree will be awarded upon sucessful completion of 90 credits of study, distributed approximately as follows:

Social Work courses, 48-54 credits

Other University courses (at least 24 to 30 credits of which will be selected from social and psychological science offerings) to a total of 36 to 42 credits

d) The distribution of the 48 to 54 credits of Social Work content over the three years will be approximately as follows:
Year I — 9 credits
Year II — 18 to 21 credits
Year III — 21 to 24 credits

e) Students entering their University I year will enrol in Social Work 250A, 251B, plus one other 3 credit social work course. The remaining 21 course credits will be taken elsewhere in the University with the approval of the Director of the School of Social Work.

f) Students entering B.S.W. II will, in consultation with advisers, enrol in Social Work courses having a total credit value of 18 to 21 normally including Social Work 352A or B, Social Work 455D and Social Work 456D in their registration. The remaining credits will be taken elsewhere in the University.

g) Students entering B.S.W. III will enrol in Social Work courses having a total credit of 21 or 24, including 480D, 458B and at least two of the following courses: 472A, 473A,B, 474A, 475B, 476A,B, 477B, 478A, 497A, 498B. The remaining 6 to 9 credits will be taken elsewhere in the University. Students are encouraged to register for Course 127-401D *Functional French* (6 credits) which is specially designed for those in Social Work.

h) The Special B.S.W. for holders of a B.A. will be offered in three time blocks: a pre-summer session of 6 weeks, May-June, one regular academic year, and a summer session of 12 weeks, April-May-June. Students in this program will take at least 48 credits, including courses in social work practice, field practice, and policy. Required courses are Social Work 353C, 352C, 481A, 482C, 456D, 458B, 480C, and at least two of the following courses: 472A, 473A,B, 474A, 475B, 476A,B, 477B, 478A, 497A, 498B. The remaining 12 credits will be selected from other courses offered at the B.S.W. level.

Course Descriptions

407-250A. SOCIAL WELFARE PROBLEMS, POLICIES AND ORGANIZATIONS. (3 Credits; 3 hours per week of classes, 2 hours per week laboratory.) An examination of major social problems associated with life in large urban areas, and the social services, both public and private which have been established to deal with such problems. Each student will be expected to examine in some depth the services associated with one selected problem area, and to make an assessment of their appropriateness and effectiveness in dealing with the problem. Specific problems to be examined include: urban poverty, child neglect, marital and family conflict, housing, illegitimacy. The course includes field observations and analysis of welfare organizations. PROFESSOR SIROTA

407-251B. INTRODUCTION TO SOCIAL WORK PRACTICE THEORY. (3 credits; 3 hours per week of class, 3 hours per week of field work.) An examination of helping or change techniques including the theoretical definitions of personal or social change from which they are derived. Planned change with individuals, families, small groups and communities. Topics will include: the nature of helping relationships, phases of the change process, motivational forces for change, resistance, client-systems, establishing change goals, evaluation of outcomes. One half day per week of field observation forms a part of the course requirement. PROFESSOR KATZ

407-352B, C. THE SOCIAL SERVICES IN CANADA. (3 credits; Modular course.) An introduction to the structure and programs of social services in Canada designed to familiarize students with these services and to increase their ability to evaluate the functions of the services. PROFESSOR McGILLY

407-353C. INTRODUCTION TO PRACTICE. (6 credits.) Introduction to the principles and practice of social work. Approaches to social problem identification and analysis. The role of the social worker as an agent of change or of social control. Elements of working with individual groups and communities. Laboratory periods will permit the application of course content to practice. PROFESSORS KATZ, DALFEN

407-451A, B. CHILDREN'S NEEDS AND SOCIAL SERVICES. (3 credits.) The identification and analysis of the needs of children and their families. Consideration of the processes of selected social services, e.g. day care, visiting homemakers, foster family and institutional care adoption, etc., designed to support, supplement and substitute for the family. Special emphasis will be placed on social legislation related to neglected, abused and dependent children. MEMBERS OF STAFF

407-452A, B. SOCIAL WELFARE ORGANIZATIONS AND DISADVANTAGED CLIENTELE. (3 credits.) An examination of the structure of organizations serving the needs of socially disadvantaged persons or groups, and the processes through which such services are provided. Particular attention will be paid to the definition, screening and serving of disadvantaged clients as compared to those drawn from more "privileged" groups in society. Strategies for changing such organizations will be explored. PROFESSOR DEEHY

407-453A, B. YOUTH AND YOUNG ADULTS: SOCIAL NEEDS AND SERVICES. (3 credits.) The physical, psychological and social development of youth and young adults and the relationship of such development to demands of the social environment. Emphasis is on the effects of societal change on family roles, interpersonal relationships, educational and work achievement, youths' community role, social services for youth and young adults. PROFESSOR DALFEN

407-454A, B. SOCIAL SERVICES IN THE HEALTH FIELD WORK. (3 credits.) An examination of the relationship between illness and social conditions. Social planning, practice and research aspects of health care and the delivery of health services. An evaluation of current and developing professional roles of social workers in health teams, with particular emphasis on social rehabilitation of the physically and mentally ill. PROFESSOR MARCUS

407-455D. SEMINAR ON SOCIAL WORK PRACTICE. (6 credits.) This course will focus on principles of social work practice and on developing skill in working with individuals, families, small groups and communities. Attention will be given to the applicability of selected social and psychological science concepts in constructing models of social work intervention. Methods of practice will be analysed from a range of settings, drawing upon student field experiences. PROFESSOR E. HOPMEYER AND MEMBERS OF STAFF
*For special B.S.W. students, the content of this course will be presented in two courses (one in the fall and one in the summer session) under two course numbers — 407-481A (3 credits) and 407-482C (3 credits).

407-456D. FIELD PRACTICE. (6 credits.) Supervised educational experiences in social work practice designed to integrate practice with theoretical knowledge. Through field placements in university affiliated teaching centres, students will work with individuals, families, groups and communities, receiving both individual and group instruction. Two days per week, September to mid April.

407-457B. LEGAL PROBLEMS OF THE POOR. (3 credits.) A lecture-and-seminar course on law and social welfare, with the emphasis largely on the social-legal problems and rights of the poor, and methods of legal protection and redress available to them. Aspects of Canadian civil law and criminal law will be reviewed. Emphasis will be placed on the Quebec scene, with landlord-tenant, contract and debtor, matrimonial regimes, parental responsibility and social insurance. The total Canadian perspective will be considered in areas of divorce, unemployment insurance, arrest, and bail. ROBERT M. COOPER

407-458B. THE IMPLEMENTATION OF WELFARE POLICY. (3 credits.) An analysis of policy issues which underlie selected social service programs; the administrative structure of such programs, their legislative base, their effectiveness and the role of professionals in the service delivery. Examples will be drawn from the current field experiences of students in the course. PROFESSOR WOODSWORTH

407-460A. POVERTY AND SOCIAL POLICY. (3 credits.) An examination of the nature of poverty and of the characteristic problems of the poor, with comparative evaluation of alternative policies for resolution of the problems, including issues of maintenance of the incomes and social status of threatened populations. MEMBERS OF STAFF

407-461B. SEMINAR IN CORRECTIONS. (3 credits.) An examination of criminal behaviour in Canada and the U.S., and the correctional system designed to deal with such behaviour. The parts played by the Police, Judiciary, Penal System and the Probation and Parole Services will be discussed, together with the role of Social Work in the correctional process. PROFESSOR DEEHY

407-470A. INTRODUCTION TO SOCIAL WORK RESEARCH. (3 credits.) Introduction to the conceptual framework of scientific inquiry and its relationship to social work research and practice. Information on and experience with selected methods of research. Problem identification and formulation is stressed. MRS. DUDER

407-472A. SEMINAR ON FAMILY ASSESSMENT (3 credits.) An advanced seminar designed to integrate knowledge of human personality in social process. Emphasis will be upon the appraisal and assessment of patterns of reciprocity among members of disturbed and disorganized families. MRS. S. BRAVERMAN

407-473A, B. CASEWORK WITH INDIVIDUALS AND FAMILIES. (3 credits.) Theory and practice of work with individuals and families under stress. Topics will include: categories of hazardous events; affective, behavioural and role disorganization; phases in the crisis cycle; techniques of crisis intervention and abatement. PROFESSOR KATZ

407-474A. METHODS OF COMMUNITY DEVELOPMENT, SOCIAL ACTION. (3 credits.) The aim of this course is to develop an understanding of the organizing process and to enrich the student's repertoire of direct organizing skills. Emphasis is on organizational entities, community power and conflict, organizing strategies and their application, in the context of current issues in urban community development. PROFESSOR TORCZYNER

407-475B. COMMUNITY ORGANIZATION. (3 credits.) A continuation of Methods of Community Development, Social Action, with emphasis on the integration of community organization theory and practice. An examination of problems encountered in practice, current issues and trends in the conceptualization of community organization. PROFESSOR TORCZYNER

407-476A, B. SOCIAL WORK PRACTICE WITH GROUPS I. (3 credits.) Theory and practice of work with groups. Focus will be on group development theory and the skills of the worker as he strengthens group potential for mutual aid. Children and adult groups in a range of settings will be examined. MRS. MAGILL

407-477B. SOCIAL WORK PRACTICE WITH GROUPS II. (3 credits.) An advanced course in practice, with emphasis on comparative theories of groups. Not given 1974-75. MRS. MAGILL

407-478A. ACTIVITY GROUP METHODS. (3 credits.) Theory and practice of the use of activity in work with groups. An analysis of a range of mediums through which group members provide mutual aid. An exploration of theoretical models of the role of the worker. MRS. MELAMED

407-480C, D. FIELD INSTRUCTION. (6 credits.) Supervised educational experience in social work practice integrating practice with theoretical knowledge characteristic of the selected field. Individual and group instruction. FIELD INSTRUCTIONAL STAFF

407-481A. SEMINAR ON SOCIAL WORK PRACTICE I. (3 credits.) Principles of Social Work Practice in working with individuals, families, small groups and communities. Methods of practice will be analysed from a range of settings, drawing upon student field experience. PROFESSOR REICHERTZ

407-482C. SEMINAR ON SOCIAL WORK PRACTICE II. (3 credits.) A continuation of 481A. PROFESSOR REICHERTZ

407-497A. SEMINAR IN INTEGRATION OF PRACTICE METHODS. (3 credits.) Discussion seminar in which attention will be given to a range of beginning theoretical attempts to define an integrated method. Emphasis will be placed on the examination of existing practice models; the problems entailed in creating a common model which allows for a differential application, and a study of the central requirements for functional statement of practice. PROFESSOR SHULMAN

407-498B. SEMINAR IN INTEGRATION OF PRACTICE METHODS. (3 credits.) A continuation of 497A. PROFESSOR SHULMAN

SCIENCE FOR ARTS STUDENTS

Course description appears in the appropriate departmental listing in the Faculty of Science section of this Announcement.

PHYSICS 198-224B. PHYSICS OF MUSIC. (3 credits.)

SOCIOLOGY (166)

Stephen Leacock Building, General Information: Room 709, Telephone 392-5178.

Major Program in Sociology

The Major program in Sociology is intended for students who do not wish to confine their studies to the sequence of courses required of Honours students. Admission to the Major program will normally take place after a student has completed an introductory course in sociology. A minimum grade of 65% in introductory sociology is required for acceptance into the Major program.

Required course work is as follows:

Introduction to Sociology
33 additional credits in Sociology
24 credits chosen from one or two of:
- Anthropology
- Economics
- Geography
- History
- Linguistics
- Political Science
- Psychology
- Religious Studies

Students wishing to be admitted to the Program should consult with Professor M. Pinard.

The Honours Program

The Honours program is designed for students who are interested ultimately in pursuing graduate study in Sociology. Honours students are required to take a full program as required by Faculty with at least seven full courses or fourteen half courses (42 credits) in the field of Sociology. An additional 18 credits are required either from courses within Sociology or, with permission of the Undergraduate Honours Adviser, from courses relevant to the student's field of interest that are outside the Department. The total requirement, therefore, is 60 credits in Sociology or related areas.

Honours students must take courses in statistics (166-350A), introduction to quantitative analysis (166-361B), and history of sociological theory (166-451A). The statistics and quantitative analysis courses should be taken in the U-2 year. In addition, the Honours student must take two graduate seminars in the final year. With consent of the Honours Adviser, supervised independent study — reading and research — may be substituted for one of these graduate seminars.

Entry into the program will normally be at the beginning of the U1 year. Entrants are required to have a strong B average including a strong performance in Introductory Sociology and approval of the Department.

In order to be allowed to remain in the program and to receive the Honours degree students must maintain a CGPA of 3.0, as well as GPA of 3.0 in Sociology courses. In addition, no course with a grade below C will be credited towards the 60 credits required for the Honours degree. In the case of courses specified by the program (statistics, methods, history of theory, etc.) a student receiving a grade below C may, with the permission of the Department, take a supplemental examination or repeat the course. In the case of a course being counted as one of the credits required by the program a student receiving a grade below C has the additional option of substituting a new course in Sociology providing that his total grade point average in Sociology remains above 3.0.

First Class Honours in Sociology will be granted based on a CGPA of 3.5 or above as well as a GPA of 3.5 or above in Sociology courses.

Joint Honours Programs

Joint Honours Programs exist with Anthropology, Economics and Political Science. A student taking such Joint Honours Programs must take at least 42 credits in Sociology. These courses must include the required courses indicated above.

Students wishing to be admitted to the Honours Program should consult with Professor M. Pinard.

Course Descriptions

INTRODUCTION TO SOCIOLOGY

Introduction to Sociology is open to all students. The two options, 210A and 212A are somewhat different in their emphases (see the descriptions below) but completion of any of these courses will enable the student to take advanced courses in the Department.

INTRODUCTION TO SOCIOLOGY IS A PREREQUISITE FOR ALL COURSES IN SOCIOLOGY.

166-210A. INTRODUCTION TO SOCIOLOGY. (3 credits.) A general introduction to sociological theory and the analysis of groups in modern society. The course covers comparative cultures, the social development of the individual, ethnic and class groupings, characteristics of urban life, social change, and institutional structures.
PROFESSOR EHRENSAFT

166-212A. INTRODUCTION TO SOCIOLOGY. (3 credits.) The course offers a general survey of several selected traditions within sociology. Specifically, we shall focus on person-centred traditions (e.g. those centering on Weber and Durkheim), conceptual traditions (e.g. structural-functionalism, exchange, balance) and subject-centred traditions (e.g. family, stratification, etc.). PROFESSOR CARROLL

OTHER COURSES

166-217A. MASS COMMUNICATIONS. (3 credits.) Comparative and historical approach to the rise of the media and their impact on modern Canadian and U.S. society. The interrelationships between economic and media structures and their effect on message content. Enriched with modules. PROFESSOR ROBINSON

166-220B. COMPARATIVE SOCIOLOGY. (3 credits.) Comparison of the interrelations of political, economic and cultural institutions in 8 national societies, as they have changed during the 20th century: the United Kingdom, the USSR, China, Brazil, India, Nigeria, the USA, and Canada. Changing relationship of each national society to world-system. Course offered in alternate years only. Modular Course. PROFESSOR WALLERSTEIN

166-221A. CLASS AND POLITICS IN THE UNITED STATES. (3 credits; Not given 1974-75.) Analysis of the class structure of the contemporary United States. Political attitudes and behaviour of elites, upper and lower middle classes, and the working class will be explored. The sources of stability and change will also be considered.
PROFESSOR ———

166-222A. URBAN SOCIOLOGY. (3 credits.) Analysis of the "urban problem", of the major theoretical viewpoints (or the lack thereof) and their political-ideological origins. Specific studies of urban neighbourhoods, the social economy of housing, and urban political structures, will be related to the "problems". Major programs, public housing, urban renewal, and community action will be evaluated. PROFESSOR ———

166-223B. SOCIAL STRATIFICATION. (3 credits.) The theory of caste and class divisions in modern society; the structure of class groups in the United States and Canada; the criteria of rank and the symbols associated with rank; the relationship between occupation, education and class position; problems of upward and downward mobility.
PROFESSOR ———

166-224B. CANADIAN SOCIETY. (3 credits; Not given 1974-75.) Power structures in Canadian Society from Confederation until the present. Quebec and Canada. Social protest movements in 20th Century Canada. Question of Canada's survival as an independent nation by the year 2000. PROFESSOR EHRENSAFT

166-225B. MEDICINE & HEALTH IN MODERN SOCIETY. (3 credits.) Introduction to a series of socio-medical problems and ways in which sociologically oriented analysis and research are being used to understand and deal with them. Emphasizing Canada and Quebec, problems such as the following will be included: Poverty and Health; Mental Illness; Aging; Death and Dying; Professionalism; Health Service Organization. PROFESSOR LELLA

166-226B. ECOLOGY AND SOCIETY. (3 credits.) The social origins of the ecological crisis in industrial societies. Comparison of attempts to protect and regulate the environment in industrialized nations. Sociological basis of ecology-oriented social movements and pressure groups. Intensive studies of selected industries and their effects upon the environment. PROFESSOR EHRENSAFT

166-227A. DEVIANCE AND SOCIAL CONTROL. (3 credits.) Theories of deviance, the relationship between social change in modern society and the development of social problems; crime in modern society; the relationships between social power, the law and crime, the slum community; the police and crime. PROFESSOR RAINS

166-228B. POWER AND SOCIETY. (3 credits.) Comparison of power structures in North America, Western Europe, Japan and the Soviet Union during the 20th Century. National power and international relations during the thermo-nuclear era and multinational corporations and national sovereignty. PROFESSOR EHRENSAFT

166-229A. SOCIOLOGY OF OPPRESSION. (3 credits.) Processes of oppression and exploitation in advanced industrial societies, with special emphasis upon women and upon ethnic and racial populations. Special emphasis upon colonization and imperialism. PROFESSOR DIXON

166-230B. CLASS, ETHNICITY, AND POLITICS IN CANADA AND IN QUEBEC. (3 credits.) Class and Ethnicity in Quebec and Canada. The segmented nature of the social structure. Types of party systems. Class and ethnic factors in federal politics. Various manifestations of class and ethnic politics in Quebec since the thirties: Elite versus mass behaviour. The Quiet Revolution, Separatism and Quebec politics since the sixties. PROFESSOR PINARD

166-247B. FAMILY AND KINSHIP. (3 credits.) The course presents a general survey of the literature dealing with family and kinship in western and non-western settings, including some classic theoretical formulations (by Murdock, Malinowski and Engels) as well as specific examples of research dealing with the nuclear family and its alternatives, illegitimacy, socialization, sexual behaviour, divorce rates, extended kin relations and mate selection. PROFESSOR CARROLL

166-260B. INDUSTRIAL SOCIETIES. (3 credits.) A review and evaluation of the works of modern social critics of industrial society from the perspective of psychodynamics, social psychology, and organizational theory. This review will be used to understand and evaluate developments in family, school, and factory organizations, in Canada, Russia, and Yugoslavia. PROFESSOR ———

166-303A. CONTEMPORARY SOCIAL PSYCHOLOGY. (3 credits.) This course will discuss recent developments in social psychology. Selected topics will include the social psychology of religion, socialization, cognitive consistency, small groups and the sociological research process itself. The nature of the prevailing conceptual frameworks in social psychology will also be reviewed. PROFESSOR CARROLL

166-306A. WOMEN'S LIBERATION. (3 credits.) This course will focus on the social and economic exploitation of women, the modern movement for the liberation of women, the class basis of this exploitation, and the centrality of women in all struggles for human liberation. PROFESSOR DIXON

166-309A. SOCIOLOGY OF HEALTH AND ILLNESS. (3 credits; Not given 1974-75.) A survey of sociological studies of persons who are ill, the occupations providing medical care, and the social organization of medical services. Each student carries out and writes a report on a modest field research project, based on interviewing, participant observation, or some other direct contact with people in medical settings. PROFESSOR SOLOMON

166-312B. INDUSTRIAL SOCIOLOGY. (3 credits.) A modular survey of the literature on industrialization, work organization, work groups, blue and white collar work and workers, and alienation. Students will work, without instruction, in small groups to discuss

the major issues in industrial sociology. On each topic or module (as above) students will complete a short paper on which they will receive detailed criticism. Grades will be based on the number of modules the students choose to complete.

PROFESSOR ———

166-317B. RESEARCH IN CANADIAN MASS COMMUNICATIONS. (3 credits.) An advanced course in mass communications which gives students an opportunity to generate and participate in group research projects analysing the organization, functioning and content of Canadian media. Differences in French-English perspectives, the role of journalists, the portrayal of women in the media are possible research topics.

PROFESSOR ROBINSON

166-324B. URBAN SOCIAL ECONOMY. (3 credits.) Develops a cross-cultural framework for the study of the urban social economy based on the literature of economic anthropology. This framework will be used for the analysis of social and economic processes in contemporary urban contexts. Students will conduct a small empirical study, in Montreal or elsewhere, to test this model. PROFESSOR KROHN

166-326B. POLITICAL SOCIOLOGY. (3 credits.) The relation between social organization and the political process at the individual level; political participation and voting behaviour, with special reference to the Province of Quebec and Canada; problems of mass society and power structures; the effects of social organization on party systems; the role of public opinion and the mass media in politics. PROFESSOR ———

166-332D. SOCIAL ASPECTS OF DEVELOPMENT IN THE THIRD WORLD. (6 credits.) Demographic, cultural, psychological, and structural obstacles to economic growth. Strategies of development, from community organization to revolution, and a comparison of their effectiveness. The transformation of social structure under the impact of industrialization, urbanization, and "Westernization". PROFESSOR VON ESCHEN

166-340A/166-341B. CURRENT PROBLEMS IN SOCIOLOGY. (3 credits each; *Prerequisite:* Introduction to Sociology & permission of instructor. This course is intended for students who are adequately prepared to undertake advanced work. A student may take no more than 6 credits throughout the three year program from the following: 166-340A/341B, 166-342A/343B, 166-440A/166-441B, 166-442A/166-443B. Open to U2 andU3 students only.) A group of students who wish to take a course or seminar in some area of current problems in sociological theory or research, not presently offered in the Department, may request a member of the Department to present such a course or seminar. Topics to be chosen by students and staff jointly. It is the student's responsibility to obtain the instructor's written consent and to inform the Department prior to registration, Rm. L709. STAFF

166-342A/166-343B. INDEPENDENT READING AND RESEARCH. (3 credits each. *Prerequisite:* Introduction to Sociology & permission of instructor. This course is intended for students who are adequately prepared to undertake advanced work. A student may take no more than 6 credits throughout the three year program from the following: 166-340A/166-341B, 166-342A/166-343B, 166-440A/166-441B, 166-442A/166-443B. Open to U2 and U3 students only.) A student having a highly developed and specialized interest not covered by a regular course in the Department will be allowed to pursue it under supervision of a member of the staff. It is the responsibility of the student to acquire the instructor's consent prior to registration and to inform the Department, Rm. L709. STAFF

166-350A. ELEMENTARY STATISTICS IN SOCIOLOGY AND ANTHROPOLOGY. (3 credits. Open to students who have not taken Psychology 204A, 205B, 206B or Economics 317D.) The basic concepts and techniques of statistical analysis applied in sociological and anthropological research problems. Topics include: frequency distributions, measures of central tendency and variation, simple correlation methods, sampling, tests of significance and non-parametric statistics. PROFESSOR ———

166-353A. SOCIAL CONFLICT. (3 credits.) The dynamics of conflict in society. Processes in the initiation and development of conflicts. Types of conflicts. In-group conflicts and conflicts with out-groups. The impact on existing structures. Limiting factors in conflict situations. The role of the agencies of social control. PROFESSOR VON ESCHEN

166-354D. SOCIAL CHANGE. (6 credits.) (Not given 1974-75.) The process of social change in the modern world. National development within a world-system. The first semester will deal with the creation of a European world-economy, 1450-1815: commerce, capitalist agriculture, and statism. The second semester will deal with the capitalist world-system, 1815 to the present: industrialism, nationalism and revolution.

PROFESSOR WALLERSTEIN

166-360A. NATIONAL LIBERATION MOVEMENTS IN AFRICA. (3 credits.) Historical background to national liberation struggles in southern Africa. Social roots and political strategies of African movements and white settler governments Southern Africa's role in world-system. Links of liberation movements to world struggle.
PROFESSOR WALLERSTEIN

166-361B. INTRODUCTION TO QUANTITATIVE ANALYSIS. (3 credits; *Prerequisite:* 350A Elementary Statistics in Sociology and Anthropology.) The course will offer the beginning student an introduction to the application of the scientific method to social phenomena, with examples drawn from the history of sociology. The course will centre around four non-quantitative research exercises, involving the construction and execution of a survey, content analysis, participant observation, and, small group experimentation.
PROFESSOR CARROLL

166-370A. SOCIALIST REVOLUTION. (3 credits.) Analysis of the role of social class in Western Revolution, beginning with the Bourgeois Revolutions (American and French): the European Revolutions of 1848, the Communist Manifesto and the First International; the Paris Commune of 1871 and the establishment and development of the Second International to the Bolshevik Revolution. Recommended as prerequisite to "Process of World Revolution".
PROFESSOR DIXON

166-407A. SOCIAL MOVEMENTS AND COLLECTIVE BEHAVIOUR. (3 credits.) General theoretical perspectives on collective behaviour. Theories of social movements and revolutions. Examination of a theory of communal (ethnic, religious, etc.) conflict and accommodation and its relevance for the analysis of Quebec's separatist movement. Analysis of other social movements and of elementary forms of collective behaviour (panics, crazes, hostile outbursts).
PROFESSOR ———

166-410A. FORMAL SERVICE ORGANIZATIONS. (3 credits.) Existing theories are examined through the study of organizations which have professionals as central participants, such as medical and health organizations. Career strategies of professional and other personnel are related to organizational structure and process.
PROFESSOR LELLA

166-412B. THE PROCESS OF WORLD REVOLUTION. (3 credits.) A study of the development of the Bolshevik and Chinese Revolution and their consequences for worldwide revolution. Special emphasis will be placed on the role of Stalin, Mao Tse Tung and the 3rd International. The course will conclude with the Cold War era of wars of National Liberation and the role of U.S. Imperialism and military intervention after the dissolution of the 3rd International.
PROFESSEUR DIXON

166-417B. THE SOCIOLOGY OF THE PROFESSIONS. (3 credits.) The development of specialized occupations such as medicine, nursing, teaching, law, science, engineering, and the military: occupations in non-Western societies; occupational organization and social control; types and stages of careers; self-involvement and personal identity in the professions.
PROFESSOR SOLOMON

166-420A. THE STUDY OF ORGANIZATIONS. (3 credits.) An undergraduate seminar on theories of organizations and studies of armies, churches, government agencies, hospitals, police departments, schools, welfare agencies, and work organizations. Students will read and discuss the works of the major organizational theories and prepare a paper on typical and alternative organizations in one of the above areas. PROFESSOR WESTLEY

166-435A. THE SOCIOLOGY OF POPULAR CULTURE. (3 credits; *Prerequisite:* Sociology 217A or permission of instructor.) A seminar exploring the nature of popular culture, tracing historical beginnings and contemporary changes in film, TV, comics, magazines, and rock music content. Primary emphasis is placed on developing theoretical perspectives and methodologies for analysing genres and themes, and for making distinctions between so-called folk and popular art.
PROFESSOR ROBINSON

166-440A/166-441B. CURRENT PROBLEMS IN SOCIOLOGY. (3 credits each; *Prerequisite:* Introduction to Sociology & permission of instructor. This course is intended for students who are adequately prepared to undertake advanced work. A student may take no more than 6 credits throughout the three year program from the following: 166-340A/166-341B, 166-342A/166-343B, 166-440A/166-441B, 166-442A/166-443B. Open to U2 and U3 students only.) A group of students who wish to take a course or seminar in some area of current problems in sociological theory or research, not presently offered in the Department, may request a member of the Department to present such a course or seminar. Topics to be chosen by students and staff jointly. It is the student's responsibility to obtain the instructor's written consent and to inform the Department prior to registration, Rm. L709.
STAFF

166-442A/166-443B. INDEPENDENT READING AND RESEARCH. (3 credits each. *Prerequisite:* Introduction to Sociology & permission of instructor. This course is intended for students who are adequately prepared to undertake advanced work. A student may take no more than 6 credits throughout the three year program from the following: 166-340A/166-341B, 166-342A/343B, 166-440A/166-441B, 166-442A/166-443B. Open to U2 and U3 students only.) A student having a highly developed and specialized interest not covered by a regular course in the Department will be allowed to pursue it under supervision of a member of the staff. It is the responsibility of the student to acquire the instructor's consent prior to registration, and to inform the Department, Rm. L709. STAFF

166-448B. ETHNOMETHODOLOGY. (3 credits.) The course will be directed to understanding and coming to terms with this new theoretical development in sociology which considers the methods and practices used by persons to interpret, construct and make sense of their world — to generate social reality. PROFESSOR RAINS

166-451A. THE HISTORY OF SOCIOLOGICAL THEORY. (3 credits.) Social and political debates of the 19th and 20th Centuries seen in their social contexts as the background of current theoretic concerns and developments. Emphasis falls on Smith, St. Simon, Marx, Durkheim, Weber, American functionalists, and the "Chicago School", and the social and theoretic traditions they originated and represent. PROFESSOR KROHN

166-463B. FIELD METHODS IN SOCIOLOGY. (3 credits.) Participant observation; interviewing and the nature of questions and questioning; the relative advantages and disadvantages of these as methods of generating data and theory; ethical questions. PROFESSOR RAINS

166-465B. SURVEY ANALYSIS. (3 credits; *Prerequisite:* 361B Introduction to Quantitative Analysis.) The course involves the analysis of completed surveys. Students will be expected to write an original research paper based on survey materials. PROFESSOR ———

166-502B. EVIDENCE AND INFERENCE IN SOCIO-HISTORICAL COMPARISONS. (3 credits.) Creation, manipulation, and interpretation of quantitative data about large-scale systems analysed over historical time. Use of primary and secondary sources of aggregate national and international statistics. Use of data archives. Systemization of use of narrative sources. PROFESSOR WALLERSTEIN

166-503B. THEORETICAL PARADIGMS IN SOCIOLOGY. (3 credits. Permission of instructor required.) The course will deal with some of the major paradigms used in sociology, including the evolutionary perspectives of the last century (Spencer, Morgan, Engels) and its modern variants, functionalism (both the Durkheim-Kingsley-Davis-Merton and the Durkheim-Mauss-Levi-Strauss traditions) and Freudianism, and then upon more limited paradigm traditions, including Durkheim on suicide and on religion, and Weber on bureaucracy and the rise of capitalism. PROFESSOR CARROLL

GRADUATE SEMINARS

NOTE: The following graduate seminars are open to final year Honours students with adequate preparation:

*166-603A	Seminar:	Dev/Grounded Theory & Organizational Change	Professor Lella
*166-612A	Seminar:	Radical Sociology	Professor Dixon
*166-615A	Seminar:	The Sociology of Medicine	Professor Solomon
*166-618A	Seminar:	The Sociology of Work	Professor Westley
*166-620A	Seminar:	Social Movements	Professor Von Eschen
166-622B	Seminar:	Problems in Mass Communications	Professor Robinson
*166-627B	Seminar:	Political Sociology	Professor Hamilton
*166-631A	Seminar:	Corporations & Society	Professor Ehrensaft
166-640B	Research:	Qualitative Methods of Social Research	Professor Solomon
166-654A	Seminar:	Quantitative Methods of Social Research	Professor Eaton
*166-661B	Seminar:	Sociology of Knowledge	Professor Krohn
166-671A	Seminar:	Deviance & Social Control	Professor Rains
*166-672B	Seminar:	Social Change	Professor Wallerstein
166-680D	Seminar:	Applied Sociology & Alternative Organizations	Professors Solomon, Westley & Lella

166-681D	Seminar:	Social Movements	Professors Pinard & Von Eschen
166-682B	Seminar:	Economic Sociology	Professors Krohn & Ehrensaft
166-683D	Seminar:	World System	Professors Wallerstein, Dixon & Ehrensaft
*166-684D	Seminar:	Deviance & the Labelling Perspective	Professors Rains & Spector
166-720A/B		Reading in Social Theory	Staff
166-730A/B		Reading & Research	Staff

*Not given 1974-75.

SPANISH LANGUAGE AND LITERATURE (144)

Samuel Bronfman Building, Room 680, Telephone 392-4600

The Spanish Department offers courses in language as well as literature and civilization of Spain and Spanish America. The basic philosophy of the Department is dominated by a desire to expand the students' liberal arts background by acquainting them with the culture of other national groups. An enrichment in this area, it is felt, reduces provincialism and broadens one's intellectual horizon. This humanistic approach is indispensable, regardless of professional interests or fields of specialization, such as high school or college teaching, or work in Latin American studies. One is a more competent professional if one has been exposed to this perspective.

Major Program

48 credits including 215A or B, 216A or B, or the equivalent. Students may wish to concentrate either in Peninsular Spanish literature or Spanish American literature. At least twelve credits should be taken in Spanish American literature if the Major is in Spanish literature, and vice versa.

REQUIRED COURSES

6 credits in civilization
6 credits in survey of literature

HIGHLY RECOMMENDED COURSES

Spanish 144-355A (Methods of Literary Analysis)
Spanish 144-451A (Cervantes: *Don Quijote*)
Adviser to Major Program: Miss Sibbald, 392-4618.

Honours Program

With the permission of the Department, a more advanced Spanish course may be taken if the student has studied Spanish previously and has acquired proficiency in oral work.

The Honours program in Spanish has been designed to enable the student to pursue his studies in one of two directions:

1) Emphasis on Spanish Literature

2) Emphasis on Spanish American Literature

Honours students are expected to achieve a high 'B' in all Spanish courses, as well as satisfactory standing in all other courses.

In order to be graduated with Honours in Spanish, a student will be required to write a research paper on a theme of his choice, under the guidance of a member of the Department. For this purpose the student should register in 440A or 440B.

The Department reserves the right to determine whether a student will be advanced or withdrawn from the Honours program.

Prerequisite: A First year Spanish course with a final grade of 75.

Requirements: A minimum of 60 credits including 215A or B, 216A or B.

NOTE: Courses numbered in the 50s (e.g., 351, 453, etc.) are designed primarily for Honours students. However, others may enrol with the permission of the instructor.

OBLIGATORY COURSES (to be taken during the U-2 or U-3 years):
Spanish 144-355A (Methods of Literary Analysis)
Spanish 144-451A (Cervantes: *Don Quijote*)
Spanish 144-456A (History of the Language).

Students concentrating in Spanish Peninsular Literature must take Spanish 144-457B (Mediaeval Literature).

Honours students are expected to take *either* Spanish Civilization and Survey of Spanish American Literature *or* Spanish American Civilization and Survey of Spanish Literature as basic courses.

Honours adviser: Professor Michalski, 392-4602.

Joint Honours

Students may combine Honours in Spanish with Honours in any one of the following subjects: Classics, English, French, German, Italian, Linguistics, Philosophy, Russian. Students enrolled in Joint Honours are required to take 12 credits in Spanish each year. The following two courses must be included in the program: Spanish 144-355A (Methods or Literary Analysis) and Spanish 144-451A (Cervantes: *Don Quijote*). As in the case of single Honours, a research paper will be required.

Students may begin Single or Joint Honours in Spanish in their second year if, in the opinion of the Department, they are qualified to do so.

Adviser: Professor Michalski, 392-4602, or Professor Lipp, 392-4601.

Course Descriptions

144-211A,B. SPANISH LANGUAGE. (3 credits.) First half of a comprehensive course in speaking, reading and writing. An introduction to Spanish and Spanish American civilization. Four hours weekly, including laboratory. PROFESSOR VARY

144-212A, B. SPANISH LANGUAGE. (3 credits; *Prerequisite:* 211A or B, or the equivalent.) Second half of a comprehensive course in speaking, reading and writing. An introduction to Spanish and Spanish American civilization. Four hours weekly, including laboratory. PROFESSOR VARY

144-215A,B. ADVANCED ORAL AND WRITTEN EXPRESSION. (3 credits.) Review of grammar. Practice in speaking and writing. Three hours weekly. MISS SIBBALD

144-216A,B. ADVANCED ORAL AND WRITTEN EXPRESSION. (3 credits; *Prerequisite:* 215A or B.) Review of grammar. Practice in speaking and writing. Three hours weekly. MISS SIBBALD

144-221A. SPANISH CIVILIZATION. (3 credits.) Survey of the culture and history of the Spanish people from the origins to the rise of the Spanish empire. MISS WILLIAMSON

144-222B. SPANISH CIVILIZATION. (3 credits.) Survey of the culture and history of the Spanish people from the Golden Age (including The Conquest of the New World) to the present era. MISS WILLIAMSON

144-231A. SPANISH AMERICAN CIVILIZATION. (3 credits.) From the indigenous period (Aztec, Maya and Inca civilizations) to Independence from Spain. PROFESSOR MICHALSKI

144-232B. SPANISH AMERICAN CIVILIZATION. (3 credits.) From Independence to the present era. PROFESSOR LIPP

144-241A. SURVEY OF SPANISH LITERATURE. (3 credits.) From the origins to the Golden Age, through a study of representative works. PROFESSOR AMASUNO

144-242B. SURVEY OF SPANISH LITERATURE. (3 credits.) From the Golden Age to the modern period through a study of representative works. PROFESSOR AMASUNO

144-243A. SURVEY OF SPANISH AMERICAN LITERATURE. (3 credits.) From the Colonial period to Modernism through a study of representative works. PROFESSOR MICHALSKI

144-244B. SURVEY OF SPANISH AMERICAN LITERATURE. (3 credits.) From Modernism to the present through a study of representative works. PROFESSOR MICHALSKI

144-315A. FUNCTIONAL SPANISH. (3 credits.) A Third Year level course with problems of advanced grammar and syntax. Written exercises, oral reports and summaries of reading selections will provide the basis for discussion. PROFESSOR AMASUNO

144-321A. SPANISH LITERATURE OF THE 18TH CENTURY. (3 credits; Not given in 1974-75.) A critical study of neo-classical drama and poetry; satirical prose; Jovellanos, Iriarte, Moratin and others. MISS SIBBALD

144-322B. NINETEENTH CENTURY POETRY. (3 credits; Not given in 1974-75.) Romanticism in Spain through representative poets such as Espronceda, Zorilla, Bécquer and others. PROFESSOR VARY

144-323A. 19TH CENTURY DRAMA. (3 credits; Not given in 1974-75.) Romantic, Realistic and Neo-romantic movements; theatre of the Generation of 1898. PROFESSOR OUIMETTE

144-324B. 20TH CENTURY DRAMA. (3 credits.) Satirical drama and theatre of social protest. *Literatura comprometida.* Garcia Lorca and Casona; Buero Vallejo, Sastre, Olmo, Muniz, Arrabal and others. MISS SIBBALD

144-325D. THE SPANISH NOVEL OF THE 19TH CENTURY. (6 credits.) The Romantic, Realist and Naturalist novel in Spain, with special emphasis on the works of Pérez Galdós and the development of the Spanish novel in relation to contemporary trends in other European countries. PROFESSOR OUIMETTE

144-327A. LITERATURE OF IDEAS: SPAIN. (3 credits; Not given in 1974-75.) Critical reading and discussion of works of outstanding thinkers as a key to understanding the development of social forces and institutions. PROFESSOR LIPP

144-328B. LITERATURE OF IDEAS: SPANISH AMERICA. (3 credits; Not given in 1974-75.) Critical reading and discussion of works of outstanding thinkers as a key to understanding the cultural development of a continent. PROFESSOR LIPP

144-332A. SPANISH AMERICAN LITERATURE OF THE 19TH CENTURY. (3 credits; Not given in 1974-75.) An intensive study of representative authors from the period of independence to the advent of Modernism. PROFESSOR SANCHEZ

144-333A. SPANISH-AMERICAN DRAMA. (3 credits; Not given in 1974-75.) A study of the outstanding works of the theatre from the colonial period to the present, including pre-Columbian works. PROFESSOR MICHALSKI

144-350D. THE GENERATION OF 1898. (6 credits.) Spiritual and intellectual renewal in Spain from the war of 1898 to the Civil War, as seen principally in the works of Unamuno, Antonio Machado, Baroja and Valle Inclán. Politics and aesthetics. PROFESSOR OUIMETTE

144-351D. SPANISH AMERICAN NOVEL OF THE 20TH CENTURY. (6 credits.) Representative authors of the 20th Century. The novel of the land: The Indianist Novel, The Mexican Revolution. PROFESSOR SANCHEZ

144-355A. METHODS OF LITERARY ANALYSIS. (3 credits.) Discussion of literary style and techniques; recent trends in criticism. Critical study of various authors for purposes of illustration. PROFESSORS LIPP AND MICHALSKI

144-356B. SPANISH AMERICAN SHORT STORY. (3 credits.) Study of style, tendencies and types as reflected in the evolution of this genre, and seen against the background of a developing continent. PROFESSOR MICHALSKI

144-421A. GOLDEN AGE PROSE. (3 credits.) The Picaresque and Pastoral Novels. Satirical prose. PROFESSOR VARY

144-422B. GOLDEN AGE PROSE. (3 credits; Not given in 1974-75.) Didactic Prose. Asceticism and Mysticism.

144-423A. MODERN LYRIC POETRY. (3 credits; Not offered in 1974-75.) Poets in exile and counter movements in 20th Century Spain: Garcia Lorca, Alberti, Salinas, Aleixandre, Cernuda and Hernández. MISS SIBBALD

144-424B. SPANISH NOVEL SINCE THE CIVIL WAR. (3 credits.) Cela and *Tremendismo.* Women novelists. Writers in exile: Goytisolo and others. PROFESSOR AMASUNO

144-432B. SPANISH AMERICAN COLONIAL LITERATURE. (3 credits.) A study of the oustanding works from the period of conquest and colonization to the wars of Independence. PROFESSOR SANCHEZ

144-440A,B THEMES IN HISPANIC LITERATURE (3 credits.) Special group projects may be undertaken dealing with problems or themes not covered in any of the other course offerings. STAFF

144-442B. MODERNIST POETRY. (3 credits.) A study of the Modernist School of Spanish American Poetry, beginning with Rubén Daria. PROFESSOR SANCHEZ

144-451A. CERVANTES: (3 credits.) *Don Quijote.* PROFESSOR LIPP

144-452B. CERVANTES. (3 credits.) *Novelas ejemplares. Comedias. Entremeses.*

144-453B. SPANISH AMERICAN POETRY SINCE MODERNISMO. (3 credits; Not given in 1974-75.) A study of the poetic movements which followed *Modernismo: ultraismo, vanguardismo, creacionismo.* PROFESSOR MARTINEZ

144-454D. THE "NEW" SPANISH AMERICAN NOVEL. (6 credits; Not given in 1974-75.) A study of the "New Novel": its characteristics and techniques as represented by some of its outstanding contemporary exponents.

144-455A. GOLDEN AGE POETRY. (3 credits; Not given in 1974-75.) Study of representative poets of the Renaissance and Baroque periods. From Garcilaso and Italian influences to Góngora and Quevedo. MISS SIBBALD

144-456A. HISTORY OF THE LANGUAGE. (3 credits; *Prerequisite* for 144-457B.) The development of Spanish from its beginnings to the Modern Period, including usage in Spanish America and Judeo-Spanish. PROFESSOR HARVEY

144-457B. MEDIAEVAL LITERATURE. (3 credits; *Prerequisite:* 144-456A.) A study of important works of the period: *Poema de Mio Cid* to *La Celestina.* PROFESSOR HARVEY

144-458A. GOLDEN AGE DRAMA. (3 credits; Not given in 1974-75.) Lope de Vega, Tirso de Molina, Ruiz de Alarcón, and others. PROFESSOR UGALDE

144-459B. GOLDEN AGE DRAMA. (3 credits; Not given in 1974-75.) Calderón de la Barca, Rojas Zorrilla, Moreto and others. PROFESSOR UGALDE

144-470A. TUTORIAL.

144-471B. TUTORIAL.

144-472D. TUTORIAL.

URDU-HINDI (397)

397-110D. INTRODUCTION TO URDU-HINDI. (6 credits; 5 hours, 1 lab.) Pronunciation, basic grammar and vocabulary, oral drills, both the Urdu (Arabic-Persian) and the Hindi (Deva-Nagari) alphabets, simple readings. This course is designed to allow the student to continue on to Elementary Urdu or to Elementary Hindi.

397-210D. ELEMENTARY URDU. (6 credits; 4 hours, 1 lab.) Further grammar and drills, prose, and poetry readings, composition.

Lecturers — K. ANANTHANARAYANAN, N. PAUL

Geography

Professors — J. BRIAN BIRD *(on leave 1974-75)*; H. C. BROOKFIELD; B. J. GARNIER; T. L. HILLS; TREVOR LLOYD
Associate Professors — M. A. CARSON; R. NORMAN DRUMMOND; J. M. GILMOUR *(on leave 1974-75)*; P. G. HOLLAND; J. O. LUNDGREN; B. H. MASSAM; J. T. PARRY; E. WADDELL; R. C. ZIMMERMAN
Assistant Professors — J. DRAKE; G. O. EWING; W. B. KEMP; T. R. MOORE; S. OLSON; L. VEILLEUX *(part time)*; R. G. WILSON
Honorary Professor — F. B. MULLER
Director — Subarctic Research Laboratory — F. C. NICHOLSON *(Assistant Professor)*

Geological Sciences

Professors — G. DONNAY; J. A. ELSON; E .W. MOUNTJOY; V. A. SAULL; C. W. STEARN; J. S. STEVENSON
Associate Professors — R. DOIG; P. R. EAKINS; R. H. GRICE; R. HESSE; H. HELMSTAEDT; W. H. MacLEAN; R. F. MARTIN; G. R. WEBBER

Mathematics

Professors — E. ROSENTHALL *(Chairman)*; M. BARR; I. CONNELL; C. HERZ; H. KAUFMAN; J. LAMBEK; W. MOSER; H. RUBEN *(on leave)*; V. SESHADRI; C. SOLIN; J. TAYLOR

Associate Professors — S. MELAMED *(Assistant Chairman);* W. BROWN; J. CHOKSI; C. COSTLEY; A. EVANS; D. GILDENHUYS; K. GOWRISANKARAN; M. HERSCHORN; W. JONSSON; E. KOUNIAS *(on leave);* J. LABUTE; B. LAWRUK; A. MATHAI; S. NEGREPONTIS; T. OKUBO; B. RATTRAY; R. RIGELHOF; C. ROTH; N. SANCHO; D. SUSSMAN; K. TAM; R. VERMES
Associate Professor (Visiting 1973-74) — *B. RAMACHANDRAN*
Assistant Professors — W. ANDERSON; M. BUNGE; S. DRURY; S. GROSSMAN; W. LANGFORD; S. MASLOWE; T. PAPAIOANNOU; E. ROWLINSON; P. RUSSELL; G. SCHMIDT; G. STYAN; J. TURNER; S. ZLOBEC
Assistant Professors (Visiting 1973-74) — A. BEN-TAL; A. BUCKLEY; CH. CHARALAMBIDES
Research Visitors 1973-74 — R. DIACONESCU; G. KLINCSEK; J.-M. ROLIN; B. SAINT-DONAT; W. STEPHENSON
Special Lecturer — T. BELL
Lecturers — H. de ARAZOZA; W. BUTLER; C. CARUTH; S. COOPER; W. DOUGLASS; G. FLEISCHER; T. FOX; R. GANONG; C. GOWRISANKARAN; V. GURUSWAMI; M. HARROW; D. KINGSBURY; K.MacKENZIE; G. NAIR; A. RAHMAN; H. SCHWERDTFEGER; V. SURKUS; K. TENNENHOUSE; G. VACCARIELLO; M. YALOVSKY

Meteorology

Professors — SVENN ORVIG *(Chairman);* W. F. HITSCHFELD; J. S. MARSHALL; R. R. ROGERS
Associate Professors — J. F. DEROME; P. E. MERILEES; E. VOWINCKEL
Assistant Professors — D. E. DIETRICH; H. G. LEIGHTON
Teaching Fellow — D. ROBERTSON
Special Lecturer — R. W. DALEY

Microbiology and Immunology

Professors — S. I. VAS *(Chairman);* B. H. MATHESON; J. W. STEVENSON; W. YAPHE
Associate Professors — Z. ALI KHAN; C. A. BUTAS; E. C. S. CHAN; P. M. COOKE; *J. de VRIES; P. GILL; L. KAPICA; *G. K. RICHARDS; H. G. ROBSON; R. SIBOO
Assistant Professors — H. ABRAMOVITCH; *J. GORDON; V. GROH; R. HAND; *E. MANKIEWICZ; *J. MENDELSON
Lecturers — *S. NOMMIK; *E. WOOD
Demonstrator — C. SHAW
Teaching Assistants — D. CRISTEANU; L. THERRIEN
*Part-time.

Pharmacology and Therapeutics

Professors — M. NICKERSON *(Chairman);* J. LOWENTHAL
Associate Professors — B. G. BENFEY; B. COLLIER; N. R. EADE; L. E. FRANCIS; R. I. OGILVIE; J. R. RUEDY; J. M. TRIFARO; D. R. VARMA
Assistant Professors — R. CAPEK; L. CHUNG; B. ESPLIN; G. KATO; E. M. KOVACS; A. H. NEIMS; R. E. RANGNO; J. B. RICHARDSON; B. I. SASYNIUK; A. TENENHOUSE; M. S. YONG

Physics

Professors — J. M. ROBSON *(Chairman);* R. E. BELL; F. T. HEDGCOCK; W. HITSCHFELD; M. P. LANGLEBEN; B. MARGOLIS; J. S. MARSHALL; W. M. MARTIN; E. R. POUNDER *(on leave);* R. T. SHARP *(on leave);* D. G. STAIRS; E. J. STANSBURY; R. STEVENSON; P. R. WALLACE
Visiting Professor — G. A. WOONTON

Associate Professors — J. R. ADDISON; A. P. CONTOGOURIS *(on leave)*; J. E. CRAWFORD; S. DAS GUPTA; R. HENZI; J. E. KITCHING; C. S. LAM; J. K.-P. LEE; S. K. MARK; J. F. MATHISON; R. B. MOORE; T. F. MORRIS; W. B. MUIR; P. M. PATEL; D. G. RYAN; N. de TAKACSY; J. M. TRISCHUK; D. WALSH; M. ZUCKERMANN
Visiting Associate Professor — A. I. McPHERSON
Assistant Professors — G. L. AUSTIN; R. HARRIS; M. M. SHAPIRO; J. O. STROM-OLSEN
Honorary Lecturer — P. C. LANDRY *(Faculty of Education)*
Reader — M. LAFLEUR
Curator, Rutherford Museum — F. R. TERROUX

Physiology

Professors — J. MILIC-EMILI *(Chairman)*; R. I. BIRKS; T. M. S. CHANG; K. KRNJEVIC; F. C. MacINTOSH; G. MELVILL JONES
Associate Professors — J. H. DIRKS; P. GOLD; D. R. FIRTH; C. POLOSA; P. SEKELJ
Assistant Professors — M. W. COHEN; M. M. FROJMOVIC; V. KLISSOURAS; W. S. LAPP; M. LEVY; M. MACKEY; G. MANDL; J. S. OUTERBRIDGE; A. WECHSLER; P. WELDON; R. L. WILLIAMS
Lecturer — M. HAZUCHA
Associate Members — N. R. ANTHONISEN *(Assoc. Prof., Exp. Med.)*; B. A. COOPER *(Prof., Exp. Med.)*; R. F. P. CRONIN *(Prof., Med.)*; B. O. DUBROVSKY *(Assist. Prof., Psychiatry)*; E. FALLEN *(Assist. Prof., Med.)*; H. L. GOLDSMITH *(Prof., Exp. Med.)*; C. A. GORESKY *(Prof., Med.)*; C. A. LASZLO *(Assist. Prof., Biomedical Engineering)*; P. T. MACKLEM *(Prof., Med.)*; J. M. McKENZIE *(Prof., Exp. Med.)*; M. M. MORRIS *(Assist. Prof., Anaesthesia)*; D. H. MOSCOVITCH *(Assist. Prof., Otolaryngology)*; J. F. SEELY *(Assist. Prof., Exp. Med.)*

Psychology

Professors — G. A. FERGUSON *(Chairman)*; D. BINDRA; D. G. DOEHRING; VIRGINIA DOUGLAS; D. O. HEBB; W. E. LAMBERT; R. B. MALMO; R. MELZACK; BRENDA MILNER; P. M. MILNER; E. G. POSER; M. S. RABINOVITCH *(on leave)*
Associate Professors — A. BREGMAN; M. CORBALLIS *(on leave)*; J. A. CORSON; D. DONDERI; G. GEIS; R. KANUNGO; J. MACNAMARA; A. A. J. MARLEY; J. R. MILLENSON; R. O. PIHL; J. O. RAMSAY; MURIEL STERN; D. M. TAYLOR; G. R. TUCKER; BLOSSOM WIGDOR
Assistant Professors — SUSAN CAMPBELL; C. PASCAL; W. E. PIPER; T. SCHULTZ; D. TAYLOR; N. WHITE
Lecturer — OLGA FAVREAU
Sessional Lecturers — B. BLIDSTEIN; MARGARET GOLICK; R. KACHANOFF; A. SCHLEIPER; ERIKA GUTBRODT
Clinical Consultants — N. GREENBERG; ERIKA GUTBRODT; A. SURKIS

PROGRAM INFORMATION

The Faculty of Science offers the Bachelor of Science degree (B.Sc.).

The Faculty of Science and the Faculty of Arts offer similar patterns of study towards their degrees. A student may choose among the Faculty programs, Major programs or Honours programs as described in the introductory section of this Announcerent common to both Faculties. (See page 39.)

DEPARTMENTAL ADVISORY OFFICES

Anatomy, Strathcona Anatomy and Dentistry Building, Rm. 148
Biochemistry, McIntyre Medical Building, Rm. 802
Biology, Stewart Biology Building, Rm. W 4/9
Chemistry, Otto Maass Chemistry Building, Rm. 322
Computer Science, Burnside Hall, Rm. 229 or Rm. 214
Crystallography, Frank Dawson Adams Building, Rm. 337
Geography, Burnside Hall, Rm. 513
Geology, Frank Dawson Adams Building, Rm. 238
Mathematics, Burnside Hall, Rm. 1005
Meteorology, Burnside Hall, Rm. 720
Microbiology and Immunology, 3775 University Street, Rm. 515
Physics, Macdonald Physics Building, Rm. 105
Physiology, McIntyre Medical Building, Rm. 1023
Psychology, Stewart Biology Building, Rm. N7/28

FACULTY PROGRAMS

NOTE: A description of the Biological Sciences Core Curriculum may be found on page 194.

Anatomical Sciences

The courses of the Biological Sciences Core Curriculum as listed in the Department of Anatomy, page 190 (30 credits); Chemistry 180-212A; 180-222A, B; Anatomy 504-261A; 504-311A; 504-312B; 504-421A; 504-481B (24 credits); plus 9 credits from upper year Biology, Biochemistry, Physiology, and Microbiology and Immunology courses.

63 credits: consult the Department of Anatomy to obtain an Adviser.

Biochemistry: Chemical Orientation

U1: Biological Sciences U1 Core Curriculum, plus Chemistry 180-204A, 180-214B, 180-222A, B.

U2: Biological Sciences U2 Core Curriculum, except that Physiology 552-211D may be substituted for Biology 117-303A and 177-305A, and Biochemistry 507-352D is also required.

U3: Three credits from: Biochemistry 507-450A, 507-451B, 507-454A. Six credits from: the Biochemistry courses listed above, or: Chemistry 180-207A, 180-217A, B, 180-253B, 180-302A, 180-311A, 180-313A, 180-323B, 180-362A.

58 credits: consult the Department of Biochemistry to obtain an Adviser.

Biochemistry: Biological Orientation

U1: Biological Sciences U1 core Curriculum, plus Chemistry 180-204A, 180-214B, 180-222A, B.

U2: Biological Sciences U2 Core Curriculum, except that Physiology 552-211D may be substituted for Biology 177-303A and 177-305A, and Biochemistry 507-352D is also required.

U3: Three credits from: Biochemistry 507-450A, 507-454A, 507-455B. Six credits from: the Biochemistry courses listed above, or: Biology 177-310B, 177-311B, 177-312A, 177-313B, 177-314A, 177-385A, 177-386B; Anatomy 504-261A, 504-311A, 504-312B, 504-421B; 504-462D; Microbiology 528-311A, 528-312B, 528-314B, 528-424A, 528-425B.

58 credits: consult the Department of Biochemistry to obtain an Adviser.

Biogeography

Biology 177-205D*, 177-305A, 177-328B, 177-427A, 177-429A; Geography 183-214A or 183-300B, 183-201A, 183-271A, 182-272B, 183-203D, 183-302D, 183-305A, 183-324B, 183-351A, 183-451D.

57 credits: consult the Department of Geography to obtain an Adviser.

Biology

Biology 177-201D, 177-205D, 177-274A, B, Chemistry 180-212A; 27 credits Biology courses; 12 credits sciences courses.

58 credits: consult the Department of Biology to otbain an Adviser.

Chemistry, Bioanalytical or Geoanalytical

Common Chemistry Courses: Chemistry 180-207A, 213A, B*, 217A, B, 222A, B, 223A, B*, 227B, 237B, 313A or 323B, 363D or 247A or 267B, 387D, 457B. Chemistry 180-212A must be added if this course has not been taken previously.

To complete Bioanalytical Chemistry; The Core Curriculum in Biological Sciences, page 194.

To complete Geoanalytical Chemistry: Mathematics 189-245A, 323A, 324B, Physics 198-339B, Computer Science 308-200A, B, Geology 186-210A, 211A, 213A. One additional Geology Course.

*Chemistry 180-204A, 214B may be taken by Biology students in lieu of Chemistry 180-213A, B, 223A.

55-58 credits: consult the Department of Chemistry to obtain an Adviser.

Chemistry and Biological Sciences

Chemistry 180-222A, B, 204A*, 214B*, 207A, or 227B, 247A or 267B, 302A*, 352B, 362A, Biology 177-201D, 205D, 301A, Physiology 552-211D, Mathematics 189-231A, B, Physics 198-339B, Computer Science 308-200A, B. Students lacking Chemistry 180-212A may take this program if they include this course in addition to those listed.

*Chemistry 180-213A, B and 223A may be substituted for 180-204A and 214B; Chemistry 180-372A, B may be substituted for 180-302A.

52-56 credits: consult the Department of Chemistry to obtain an Adviser.

Chemistry, Inorganic/Analytical

Chemistry 180-212A, 222A, B, 213A, B, 223A, B, 201A, 207A, 227B, 247A, 267B, 301B, 307B, 311A, 313A or 323B, Geology 186-210A, 211A, 213B, Mathematics 189-222A, B, 315A, B, Physics 198-232B; plus 6 approved credits.

59 credits: consult the Department of Chemistry to obtain an Adviser.

Chemistry, Radioanalytical

Chemistry 180-201A, 207A, 212A, 213A, B, 222A, B, 223A, B, 227B, 301B, 311A, 313A or 323B, 217A, B, 237B, 363D or 247A or 267B, 387D, 457B, 458A, Mathematics 189-245A, 323A, 324B, Physics 198-339B, 237B, Computer Science 308-200A, B.

62 credits: consult the Department of Chemistry to obtain an Adviser.

*Courses that should be taken in U1 are underlined.

Climatology

Computer Science 308-200A, B; Geography 183-203D*, 321A, -324B, -322A, -323B or -327B, -422A, -423B; Mathematics 189-222A, B, -314A, B; Meteorology 195-210D, -310D; Physics 198-231A, B, -233A; Three credits to be approved.

56 credits: consult the Department of Geography to obtain an Adviser.

Dynamics of the Oceans and Atmosphere

Mathematics 189-223A, 189-222A, B, 189-314A, B, 189-315A, B, 189-319A, B, 189-316B, 189-317A, 189-455D; Meteorology 195-210D, 195-410A, 195-411B, 195-652D; Physics 198-231A, 198-233A, 198-309A, 198-319B.

55 credits: consult the Department of Meteorology to obtain an Adviser.

Earth Physics — A

Computer Science 308-200A, B; Geology 186-303D, 186-220B, 186-442A, six further credits approved electives in Geology; Mathematics 189-222A, B, 189-223A, 189-314A, B, 189-315A, B, 189-319A, B; Physics 198-231A, B, 198-232A, B, 198-233A, 198-339B, 198-432A, 198-434B.

58 credits: consult the Department of Physics to obtain an Adviser.

Earth Physics — B

Computer Science 308-200A, B, Geography 183-271A, 183-272B; Geology 186-220B; Mathematics 189-222A, B, 189-314A, B, 189-323A; Meteorology 195-210D, 195-320A, 195-321B, 195-420D, 195-653D; Physics 198-232B, 198-233A, 198-309A, 198-334B.

56 credits: consult the Department of Meteorology to obtain an Adviser.

Geomorphology

Geography 183-271A*, 272B OR Geology 186-242A, 431B; Geography 183-321A OR Geology 186-233B; Geography 183-325A, 453B; Geography 183-308B OR Geology 186-492D; Geography 183-201A, 202B, 305A, 322A, 323B or 327B, 423B, 321A; Geology 186-210A, 243B, 310D, 446A, 449B.

54 credits: consult the Department of Geography *or* the Department of Geology for an Adviser.

Hydrology

Computer Science 308-200A, B; Engineering 303-107A*, B; Geography 183-271A, -272B, -305A, -201A or -308B, -321A, -322A, -323B or -327B, -423B; Geology 186-243B, 449B; Mathematics 189-222A, B; -314A, B, -315A, B, -323A, -324B; Physics 198-231A, B or 233A.

55 credits: consult the Department of Geography to obtain an Adviser.

Marine Geology

Chemistry 180-201A, 180-301B, 180-213A, B; Geology 186-210A, 186-211A, 186-303D, 186-233B, 186-312B, 186-220B, 186-310D, 186-343D, 186-347B; Marine Sciences 395-697B; Mathematics 189-222A, B; Physics 198-233A, 198-309A.

58 credits: consult the Department of Geology to obtain an Adviser.

*Courses that should be taken in U1 are underlined.

Mathematics and Biology

Mathematics 189-221A, B, 222A, B, 223A, 315A, B, 317A, 319A, B, 323A, 324B, 327B, Computer Science 308-200A, B, Biology 177-201D, 205D, 206D, 301A, 303A, 305A, 309B.

Consult the Department of Mathematics to obtain an Adviser.

Mathematics and Chemistry

Chemistry 180-212A, 213A, B, 223A, B, 313A, 323B, nine credits Chemistry electives, three or six credits electronics, Computer Science 308-200A, B, Mathematics 189-222A, B, 223A, 314A, B, 315A, B, 317A, 319A, B, 323A, 324B,

55-58 credits: consult the Department of Chemistry to obtain an Adviser.

Mathematics, Chemistry and Physics

Chemistry 180-213A, B, 223A, B, 212A, 313A, 323B, three credits chemistry electives, Computer Science 308-200A, B, Mathematics 189-222A, B, 223A, 314A, B 315A, B, 319A, B, Physics 198-231A, 232B, 339B, six additional credits in Physics.

54 credits: consult the Department of Mathematics to obtain an Adviser.

Mathematics and Physics

Computer Science 308-200A, B; Mathematics 189-222A, -223A, -314A, B, -315A, B, -317A, -319A, B, -323A, -324B; Physics 198-231A, B, -232A, B, -233A, -341B, -346D, -431A, -432A or 434B, -437B or -438B plus 3 or 6 credits chosen from 198-339B, 308-210A, B, 189-415A, 189-419B, 189-555D.

58 credits: consult the Department of Physics to obtain an Adviser.

Mathematics and Psychology

Mathematics 189-222A, B, 223A, 323A, B, 324B, 423A, 424B or Psychology 204-305A, B, 307D, six credits Introductory Psychology, 335A, 336B, twelve credits of options selected from Mathematics 189-217A, 218B, 314A, B, 317A, 318A, 328B, 417A, 447B, Computer Science 308-200A, or other approved courses, twelve credits selected from Psychology non-statistics courses.

54 credits. (This faculty program leads to either a B.A. or a B.Sc. degree. Consult the Department of Mathematics or the Department of Psychology to obtain an Adviser.)

Microbiology and Immunology

U1: Biological Sciences Core Curriculum plus Chemistry 180-222A, B

U2: Biological Sciences Core Curriculum; Microbiology 528-311A, 528-314B; Biology 177-310B

U2 and U3: Nine additional credits selected from courses offered by the Department.

53 credits: consult the Department of Microbiology and Immunology to obtain an Adviser.

Paleobiology

Biology 177-205D, 177-305A, six credits chosen from 177-325A, 177-326B, 177-440A, 177-348D; Chemistry 180-213A, B; Geology 186-210A, 186-211A, 186-233B, 186-312A, 186-310D, 186-343D, 186-430B, 186-534D, and 3 approved credits.

54 credits: consult the Department of Geology to obtain an Adviser.

Physiology

U1: Biology 177-201D; Chemistry 180-204A; 180-214B; 180-212A; 180-222B; Mathematics 189-231A, B; and Physiology 552-211D.
U2 & U3 Biology 177-301A, B; one of Biology 177-309A, 177-373A, or Mathematics 189-232A, B; Physiology 552-311D and 552-411A; and 14 credits in upper level biological sciences courses.

58 credits. Consult the Department of Physiology for an Adviser.

Psychology

Any of the Major sequences in Psychology with the substitution of six credits from U2 courses in Psychology for Psychology 204-211D; 305A, B.

54 credits: consult the Department of Psychology, 392-4708, or Ms Olga Favreau, 392-4694 to obtain an Adviser.

Quaternary Studies

Anthropology 151-357A; Biology 177-205D, 177-305A, 177-352A, 177-353B, 177-427A and either 177-430A, or 177-325A; Geography 183-271A, 183-272B, 183,321A, 183-324B, 183-305A, 183-451D and either 183-306A or 183-308B; Geology 186-431B. Courses that should be taken in U1 are underlined.

54 credits: consult the Department of Geography to obtain an Adviser.

MAJOR PROGRAMS

Major programs are available in the following disciplines; details are listed with the departmental entries in the Calendar.

Anatomical Sciences
Biology
Chemistry
Crystallography
Geography
Geological Sciences
Mathematics
Meteorology
Microbiology and Immunology
Physics
Physiology
Physiology and Physics
Psychology

HONOURS PROGRAMS

Honours programs are available in the following disciplines; details are listed with the departmental entries.

Anatomical Sciences
Biochemistry
Biology
Chemistry
Crystallography
Geography
Geological Sciences
Mathematics
Meteorology
Microbiology and Immunology
Physics
Physiology
Psychology
Solid Earth Geophysics (See Geological Sciences)

*Courses that should be taken in U1 are underlined.

INTERDEPARTMENTAL HONOURS PROGRAM

The Honours program in Immunology is offered by the three Departments: Biochemistry, Microbiology & Immunology and Physiology. The program will be administered by the Department of Microbiology & Immunology and coordinated by Dr. Julius Gordon. Students interested in the program should contact Dr. Gordon at the Department of Experimental Surgery, Donner Building, Telephone 392-4859.

The program is a rigid one which will prepare the student for graduate work in any of the three participating departments. Admission requirements are: U-1, GPA 3.00 or equivalent; U-2, 3.10 and U-3, 3.20.

The course requirements are as follows:

U1: Biology 177-201D; Chemistry 180-204A, 180-212A, 180-214B, 180-222A, B; Mathematics 189-222A, B; Physiology 552-211D; Anatomy 504-261A.

U2: Biology 177-301A, B, 177-302A, B, 177-309A, 177-310B; Biochemistry 507-352D; Chemistry 180-313A; Microbiology 528-311A, 528-314-B; six credits from the following: Biochemistry 507-451B, Chemistry 180-352A, B; Computer Science 302-220A, B or Physiology 552-312D.

U3: Biology 177-314A; Biochemistry 507-450A, 507-454A, 507-603B; Microbiology 528-527B; Physiology 552-411A, 552-613B, 552-614B; six credits from the following: Anatomy 504-462D, Computer Science 302-220A, B, Microbiology 528-424A, 528-501D or Physiology 552-312D.

NOTE: An information booklet describing courses related to Environmental studies may be obtained from the office of the Director of Environmental Studies, Stewart Biology Building.

ANATOMY (504)

Strathcona Anatomy and Dentistry Building, Room 1/48, Telephone 392-4881.

The Department of Anatomy is deeply concerned with basic research and teaching in Human Anatomy at the undergraduate, graduate and Medical and Dental School levels. The Department houses several units doing basic research into the structure and function of cells, tissues and organs and is well equipped to pursue subjects in cell biology using modern techniques of radioautography and electron microscopy. To carry out research the Department contains numerous large laboratories, a complete radioautography unit and a large electron microscopy unit with five electron microscopes. The teaching program benefits from the use of an advanced T.V. system. Thus, students contemplating an academic career in the Anatomical Sciences have a unique opportunity to work with people actively engaged in advanced research and to observe the influence of their work on the teaching of Anatomy, Histology and Embryology.

Programs in the Anatomical Sciences

The following courses of the Biological Sciences core curriculum are required for all programs in Anatomical Sciences: Biology 177-201D; 177-205D; 177-206D; Mathematics: 189-231A, B; Biology 177-301A, B; 177-303A; 177-305A; one of the following, Biology 177-309B; 177-373A; Mathematics 189-232B; Psychology 204-204A, B. (Total of 30 credits.)

FACULTY PROGRAM (Total of 63 required Credits). For details see Faculty Programs, page 185.

MAJOR PROGRAM

(Total of 66 required credits).

The courses of the Biological Sciences core curriculum as listed above (30 credits); plus, Chemistry 180-212A; 180-222A,B; Anatomy 504-261A (Histology); 504-311A (Musculo-skeletal); 504-312B (Visceral); 504-462D (Dynamic Histology); 504-421A (Neuroanatomy); 504-481B (Embryology); and 504-431D (seminars). Students are also advised to take Physiology 552-211D as an option.

HONOURS PROGRAM

(Total of 90 required credits).

The Department also offers an Honours Program for those students genuinely interested in a career in Anatomy. This program is the usual path for entry into graduate studies. Students who intend to honour must have no failures in the CEGEP program and will register at the Major level in U1. Entrance to the Honours Program is at the beginning of U2. The student must obtain a GPA of at least 3.0 at the end of U1 with no subject below a "C" grade. The Honours degree will be recommended after successful completion of the program with a CGPA of at least 3.0 and with no course below "C" grade at the end of U3. The following courses constitute the Honours Program:

The courses of the Biological Sciences Core Curriculum as listed above (30 credits); plus, Chemistry 180-212A; 180-222A,B; Biology 177-302A,B; Chemistry 180-204A; Anatomy 504-261A (Histology); 504-311A (Musculo-skeletal); 504-312B (Visceral); 504-462D (Dynamic Histology); 504-421A (Neuroanatomy); 504-481B (Embryology); 504-431D (Seminar), 504-515D (Dissection); 504-533D (Experimental); 504-432D (Research), making a total of 90 credits.

Course Descriptions

504-261A. INTRODUCTORY HISTOLOGY. (4 credits; 3 hours lectures, 2 hours laboratory.) A light and electron microscope study of the principal mammalian tissues and organs with emphasis on human histology. Open to U1 students who are taking the core curriculum courses concurrently, or to U2 students. This course is restricted in size.

504-311A. HUMAN MUSCULO-SKELETAL ANATOMY. (3 credits; 2 hours lectures, 2 hours laboratory; *Prerequisites:* First year core curriculum courses, and/or permission of the Department.) Introduction to human anatomy devoted primarily to a description of the skeleton and muscular system.

504-312B. HUMAN VISCERAL ANATOMY. (3 credits; 2 hours lectures, 2 hours laboratory; *Prerequisites:* First year core curriculum courses.) An introductory course in human anatomy devoted to the visceral systems, including the circulatory, respiratory, digestive and reproductive systems. This course, together with 504-311A, constitutes a complete course in human anatomy at the introductory level.

504-413A. ANATOMY OF THE LIMBS AND BACK. (4 credits; 1 hour lecture, 6 hours laboratory dissection per week.) A specialized course in the anatomy of the limbs and axial system designed for Physiotherapists. This course is open by permission only to other specially qualified individuals.

504-414A. ANATOMY OF THE LIMBS AND BACK. (3 credits; 1 hour lecture, 4 hours laboratory on prosected material per week.) A specialized course in the anatomy of the limbs and axial system designed for Occupational Therapists. This course is open by permission only to other specially qualified individuals.

504-421A. GENERAL HUMAN NEUROANATOMY. (3 credits; 2 hours lectures, 2 hours laboratory; *Prerequisites:* Core curriculum courses of U1 or by permission of the Department.) Introductory course in neuroanatomy emphasizing the structure and function of the brain, spinal cord and peripheral nerves.

504-462D. DYNAMIC HISTOLOGY. (6 credits; 2 hours lectures supplemented by occasional laboratory and seminars at suitable intervals; *Prerequisites:* 504-261A Introductory Histology and the Core curriculum courses of U1 and U2.) An advanced course to cover topics such as cell cycle, cell population kinetics and cellular metabolism as related to structure in selected tissues.

504-481B. HUMAN EMBRYOLOGY AND DEVELOPMENT. (3 credits; 2 hours lectures, one 2 hour laboratory every alternate week; *Prerequisites:* Core curriculum courses of U1 and U2; 504-261A Introductory Histology and one of either 504-311A Musculo-Skeletal Anatomy or 504-312B Visceral Anatomy.) A comprehensive treatment of human embryology and development.

504-431D. SEMINARS IN MORPHOLOGICAL SCIENCES. (6 credits.) One advanced research seminar per week over the entire year given by invited local or out-of-town speakers on their own current research activities. All biological science students are invited to attend, but only Anatomical Sciences Majors and Honours students can take this course for credit.

504-432D. RESEARCH PROJECTS IN ANATOMICAL SCIENCES. (6 credits; 1 full day, supplemented by additional time, when available; *Prerequisites:* Honours in Anatomical Sciences in the U2 year; *Corequisites:* Honours Program in U3.) A full year's exposure to individually supervised, original research in anatomical sciences. The concentration will be on the application of morphological methods such as electron miscroscopy and radioautography to the solution of basic problems in cell biology. A research report, plus an oral examination by a Departmental committee will evaluate the candidate's performance.

504-515D. DISSECTION OF THE HUMAN BODY. (6 credits; 6 hours laboratory and tutorial; *Prerequisites:* Honours Program in Anatomical Sciences in U2; *Corequisites:* Honours program in U3.) A full course in human anatomy using dissection, self-paced instruction and tutoriais to cover all the regions and organ systems of the human body. This course is designed for Graduate and Honours students in Anatomical Sciences only and is intended to prepare the student for demonstrating and teaching in Gross Anatomy.

504-533D. EXPERIMENTAL MORPHOLOGY. (6 credits; 3 hours per week, plus additional sessions; *Prerequisites:* Honours Program in Anatomical Sciences in U2; *Corequisites:* Honours Program in U3.) A lecture and practical course on the use of experimental techniques applicable to morphological research. This course is designed for Honours and Graduate students only and stresses methods currently used in the Department, such as radioisotopic tracers, radioautography, light and electron microscopy. For Honours students, this course is a desirable laboratory supplement to Dynamic Histology (504-462D).

BIOCHEMISTRY (507)

McIntyre Medical Sciences Building, Room 802; Telephone 392-4343.

Living organisms — animals, plants, and microorganisms — derive nutrients from their environment and metabolize these various compounds by a series of converging pathways. A relatively small number of metabolites is thus obtained, and can be used to produce energy and as starting material for synthesis of cellular components. The energy produced is used to convert the compounds via a series of diverging metabolic pathways into important building blocks for the synthesis of macromolecules; e.g. nucleotides for DNA synthesis, amino acids for protein synthesis.

The biochemist is interested in the coordination and regulation of the many processes involved in this general scheme. The study of each of these processes in detail results in areas of specialization. For example, biochemists are interested in the mechanisms of nervous activity, muscle contraction, growth and aging, inheritance and evolution. They are finding out how light is used in the production of organic matter by green plants and how some creatures produce light. The knowledge and methods developed by biochemists are applied in all fields of medicine, in agriculture, and in many industries. Biochemistry is a science which is contributing to far-reaching changes in the life of mankind.

The Department of Biochemistry at McGill occupies the 8th and 9th floors of the McIntyre Medical Sciences Building. The teaching and research laboratories were built in 1965 and are well equipped for modern biochemical research. All members of staff of the Department carry out research projects in collaboration with their students and postdoctoral fellows.

An Honours Program and two Faculty Programs are offered in the Department. The Honours Program is the usual path towards postgraduate study in Biochemistry, and eventually to research in hospital, university or industrial laboratories. The Faculty Programs in Biochemistry are less specialized than the Honours Program, but can also lead to graduate studies in the field.

A thorough background in biology, organic and physical chemistry, and mathematics is essential for students following any of the Biochemistry programs. However, the only prerequisite for the introductory Metabolism and Regulation course (507-352D) is Biology 177-201D, and students specializing in related disciplines are welcome to take this course or any other biochemistry course for which they have the necessary prerequisites.

Inquiries about programs or courses should be directed to the Administrative Assistant, Department of Biochemistry, Room 802, McIntyre Medical Sciences Building, telephone 392-5021.

Faculty Programs

For details see Faculty Programs, page 185.

Courses recommended for entry to these programs are: 6 credits elementary Biology, 6 credits general Chemistry, 3 credits organic Chemistry, 6 credits Calculus.

Honours Program in Biochemistry

Courses recommended for entry to this program in U1 are: 6 credits elementary Biology, 6 credits general Chemistry, 3 credits organic Chemistry, 6 credits Calculus and 3 credits Analytical Geometry and Vectors.

A student must have a GPA for the previous year of at least 2.8 with no failures on his CEGEP record to be admitted to Honours in U1. He must achieve a GPA of 3.1 in U1 with a B in every required course to be admitted to the U2 program, and a GPA of at least 3.2 and a B in every course for admission to U3. In borderline cases for admission to U3, the mark received in Biochemistry 352D will be of particular importance. For graduation, all required courses in the Honours Program must have been passed with no grade of less than B and the CGPA must be at least 3.0.

A student who has the required courses and achieves a satisfactory standing in U1 may be allowed at the discretion of the Department to transfer to the Honours Program in U2. There is no entry to the Honours Program in U3.

Courses in the Chemistry Honours Program may be substituted for comparable courses in the Biochemistry Honours Program with the permissions of the Chemistry professor concerned.

The usual program of courses for the three university years follows:

U1: 30-31 Credits

Biology 177-201D, 177-205D, 177-206D;
Chemistry 180-204A, 180-214B, 180-222A,B, 180-257D;
Mathematics 189-222A,B.

U2: 33 Credits

Biology 177-301A, 177-302B; Physiology 552-211D; Biochemistry 507-352D; Chemistry 180-302A, or 180-253B and 180-273A; 180-313A; 180-362A; 180-352A or 180-372A; Mathematics 189-315A, B.

U3: 30 Credits

Biochemistry 507-450A, 507-454A, 507-460A. Total of 15 credits from the following: Biochemistry 507-451B, 507-455B, 507-461B; Biology 177-303A, 177-305A, 177-310B, 177-311B; Chemistry 180-253B if not taken as a U2 requirement, 180-311A, 180-356A; Microbiology 528-314B; Anatomy 504-261A, 504-421B, 504-462D; other courses recommended by the Department. Optional course (3 credits).

Interdepartmental Honours Program in Immunology

The Departments of Biochemistry, Microbiology and Immunology and Physiology are offering an interdepartmental Honours program in Immunology. Details of this program may be found on page 190 of the Calendar.

Course Descriptions

177-301A, 302B. LABORATORY IN CELL AND MOLECULAR BIOLOGY. PARTS I AND II. (See Biological Sciences Core Curriculum listings.)

507-352D. METABOLISM AND REGULATION. (6 credits; *Prerequisite:* Biology 177-201D; *Corequisites:* Biology 177-301A, 177-302B.) A general course in biochemistry, emphasizing the regulatory aspects of carbohydrate metabolism in mammalian systems, and nitrogen metabolism in microorganisms and mammals, with special reference to the action of hormones, allosteric enzymes, and integration of cellular functions.
PROFESSOR JOHNSTONE AND STAFF

507-405A. PROTEIN STRUCTURE AND FUNCTION. (3 credits; *Prerequisites:* Biochemistry 507-352D and/or sufficient organic chemistry. Intended primarily for Biochemistry and Chemistry students at the U3 level.) Primary structures of proteins and their evolution. Secondary, tertiary and quaternary structure of enzymes. Enzyme kinetics and mechanisms of catalysis. Multienzyme complexes. Allosteric enzymes.
PROFESSORS FRASER, MacKENZIE AND MEIGHEN

507-451B. BIOPHYSICAL CHEMISTRY. (3 credits; *Prerequisites:* Chemistry 180-204A, 180-214B or 180-213A, 180-223B; Chemistry 180-313A recommended. This course is also listed as Chemistry 180-404B.) Molecular weight determination and hydrodynamic parameters, optical properties and structure analysis of biopolymers and application to biological systems.
PROFESSORS MEIGHEN AND GALLEY
(Chemistry)

507-454A. NUCLEIC ACIDS. (3 credits; *Prerequisite:* Biochemistry 507-352D or permission of instructor.) Chemistry of mammalian, bacterial and viral nucleic acids; synthesis of polynucleotides; replication, transcription, translation and the control thereof.
PROFESSORS DENHARDT AND SPENCER

507-455B. NEUROCHEMISTRY. (3 credits; *Prerequisite:* Biochemistry 507-352D.) Structure and composition of nervous tissue in relation to its functions. Special aspects of metabolism of nerve and brain including energy metabolism. Water and electrolyte balance. Exchanges between blood and brain, and between brain and cerebrospinal fluid. Neurotransmitters and modulators. Nutrition and development of the nervous system. Neuroendocrinology. Biochemistry of nervous and mental diseases.
PROFESSORS SOURKES AND WOLFE AND STAFF

507-460A. ADVANCED LABORATORY IN BIOCHEMISTRY. (6 credits; limited enrolment.) A laboratory designed to acquaint the student with various biochemical techniques.
PROFESSOR DENHARDT AND STAFF

507-461B. RESEARCH PROJECTS IN BIOCHEMISTRY. (6 credits; registration by departmental permission only; *Prerequisite:* Biochemistry 507-460A.) Individual work on a project to be performed in a research laboratory.
PROFESSOR BRAUN AND STAFF

BIOLOGICAL SCIENCES — CORE CURRICULUM

The Core Curriculum in Biological Sciences is a sequence of courses designed to form a basis for all university level programs in the Biological Sciences. It is sponsored jointly by the Departments of Anatomy, Biochemistry, Biology, Microbiology and Immunology, and Physiology.

Students in programs related to other Departments may take individual courses from the Core Curriculum. It should be noted that most upper year courses in the Biological Departments will have some Core courses as prerequisites, so sequential planning of courses will need to be done carefully.

Inquiries concerning the Biological Sciences Core Curriculum should be directed to the office of the Core Curriculum Director, Stewart Biological Sciences Building, Room W4/9.

THE COURSES OF THE CORE CURRICULUM IN BIOLOGICAL SCIENCES

Course Descriptions

177-201D. CELL AND MOLECULAR BIOLOGY. (6 credits; 2 or 3 lectures per week, 1 hour conference every alternate week; *Prerequisite:* 177-112B, or equivalent, i.e. CEGEP Cell Biology, or permission of course Co-ordinator.) This course is designed to give the student a comprehensive account of the cell in terms of its chemical and physical properties and includes discussions of cell ultrastructure; bioenergetics and biosynthetic pathways; selected biophysical processes; gene expression and regulation mechanisms operative in the control of metabolism. The lectures will be based on the assumption that students have already taken a minimum of 3 credits in organic chemistry (e.g , 180-E22A, B or 180-212A). Further credits in organic and physical chemistry are desirable.
PROFESSOR SINCLAIR AND STAFF

177-205D. BIOLOGY OF ORGANISMS. (6 credits; 3 hours lectures; *Prerequisite:* 177-111A or equivalent.) A study of organisms from the standpoint of structural and physiological adaptation to the environment. Development of the basic levels of organization. Mechanisms of evolution. Adaptations necessary for major evolutionary advances. Life in aquatic, terrestrial and aerial environments.
PROFESSOR CARROLL AND STAFF

177-206D. LABORATORY COURSE IN BIOLOGY OF ORGANISMS. (3 credits; 1 laboratory per week or its equivalent throughout the year; *Co-requisite:* 177-205D.) A companion course to the lecture series in Biology of Organisms. Examination of the functional morphology of micro-organisms, plants and animals, both living and fossil. Experimental studies on the physiological adaptations of organisms to their environment.
PROFESSOR PASZTOR AND STAFF

189-231A,B. MATHEMATICS FOR BIOLOGISTS. (3 credits; 3 hours lectures; *Prerequisite:* 189-121A, B or equivalent.) Introductory probability theory, vectors and matrices, differential and difference equations with applications to the biological sciences.
PROFESSOR TURNER (Mathematics Dept.)

177-301A, B. LABORATORY IN CELL AND MOLECULAR BIOLOGY (PART 1). (3 credits; 1 lecture and one 6-hour laboratory per week; *Prerequisite:* 177-201D.) A half course in laboratory techniques. Together with 177-302A, B, this laboratory course is divided into three 8-week sections which are organized independently in three separate locations. Each section is divided into parts (a) and (b). The topics covered in each are listed under Biology 302A, B. Students taking Biology 301A may choose parts (a) and (b) of any one section, plus (a) of either section 2 or 3. Students taking Biology 301B start with part (b) of either section 2 or 3, followed by parts (a) and (b) of any other section.
PROFESSORS POOLE, SOMERS AND
PROFESSOR WASSERMAN (Biochemistry Dept.)

177-302A, B. LABORATORY IN CELL AND MOLECULAR BIOLOGY (PART 2.) (3 credits; 1 lecture and one 6-hour laboratory per week; *Prerequisite:* 177-301A, B.) Together with Biology 301A, B this laboratory course is divided into three sections. Each section is divided into parts (a) and (b) listed below. Students wishing to take a full year of laboratory work, as recommended for certain programs, may do so by registering for 301A followed by 302B, or 301B followed by 302A. It is not possible to take 301A and 302A or 301B and 302B. These students will complete all experiments listed below (though not necessarily in sequence).

Section 1 (a): Isolation of DNA, hydrolysis and paper and thin layer chromatography of bases. Metabolism of C^{14} by rat adipose tissue; chemical separation of metabolic products and radioactive counting.

(b): Exercise on radioactivity and planchet counting. Subcellular fractionation of tissue; enzymic and chemical markers of organelles: brief enzymology.

Section 2 (a): Ionization, pH and electrophoresis. Photosynthesis in green algae and in isolated chloroplasts. Isolation of mitochondria and study of electron transfer using oxygen electrodes. Spectrophotometry. Membrane potentials and ions.

(b): Enzyme purification and assay. Protein measurement. Enzyme kinetics. Separation of proteins and estimation of molecular weight by gel filtration.

Section 3 (a): Microbial metabolism: control mechanisms and inhibition of macromolecular syntheses.

(b): Microbial genetics: conditional mutants of DNA synthesis and repair of DNA; bacteriophage growth; genetic fine structure analysis; chromosome mapping in bacteria.

PROFESSORS POOLE AND SOMERS, AND PROFESSOR WASSERMAN (Biochemistry Dept.)

177-303A. DEVELOPMENTAL BIOLOGY. (3 credits; 2 lectures and 1 laboratory per week; *Prerequisite:* 177-201D.) A course designed to acquaint the student with the fundamental processes and principles operating during embryogenesis of both plants and animals. The developmental process will be considered at the molecular, cellular and organismic levels with integration of these three levels to give a total appreciation of developmental phenomena. The laboratory will be designed to give the students first-hand experience with embryological materials and experiments relevant to understanding how developmental processes are investigated.

PROFESSORS FROMSON, BRANDHORST, WOLFSON AND STAFF

177-305A. ENVIRONMENTAL BIOLOGY. (3 credits; 3 hours lectures; *Prerequisite* or *Corequisite:* 177-205D.) An introduction to the principles of ecology, dealing with individuals, populations and communities of plants and animals, and concluding with a consideration of Man's relationship with the environment.

PROFESSOR AUCLAIR AND STAFF

177-309A. MATHEMATICAL MODELS IN BIOLOGY. (3 credits; 2 hours lectures and 1 hour conference; *Prerequisites:* 189-231A, B, and elementary calculus.) Use of calculus, matrix algebra and probability theory in analyzing mathematical models of biological problems.

PROFESSOR MACKEY (Physiology Department)

BIOLOGY (177)

Most staff and laboratories of the McGill Department of Biology are located in the Stewart Biological Sciences Building complex on McGregor Avenue (between Peel and Drummond.) The first six floors of the west wing (W2 to W7) and four floors of the north wing (N3 to N6) contain teaching and research laboratories, staff offices, services and administrative centres. The main office is in W4/room 5 (phone 392-4643). The Senior Program Adviser has an office in room W3/19 (phone 392-5828), the Biology Student Union is in N2/8 (phone 392-5765). The south wing contains the greenhouses, Botany and Genetics Library (S3/1) and lecture theatres.

Some full-time and affiliated members of the Department have offices and laboratories elsewhere, e.g., at the Redpath Museum, Marine Sciences Centre, Macdonald College, Montreal Children's and Jewish General Hospitals, and some courses are conducted partly in these locations. Course field work is carried out in facilities at Mt. St. Hilaire, the Morgan Arboretum, Huntsman Marine Laboratories (New Brunswick), the Bellairs Research Institute (Barbados). Libraries at McGill which are used by biology students include the McLennan Undergraduate Library, the Blacker-Wood Library of Zoology, the Botany-Genetics Library and the McIntyre Medical Library.

The Department of Biology was created in June, 1970, by fusion of 3 former Departments (Botany, Genetics and Zoology). Currently it has approximately 50 teaching staff, 50 non-academic supporting staff (secretaries and technicians), 100 graduate students and/or postdoctoral fellows, and 7000 undergraduate full-course registrations.

This Department does not attempt to offer courses or programs in all branches of Biology. At the graduate level, its resources are focused on development of four main areas of study: Cell, Molecular and Developmental Biology, Ecology, Human Genetics and Neurobiology. At the undergraduate level, degrees are offered in these 4 fields and also in Animal Behaviour, Marine Sciences and Plant Sciences. In order to ensure that its graduates have had a suitably broad general background

in modern biology, whatever their branch of specialization, this department co-operates with four departments in the Faculty of Medicine to give a Core Curriculum of basic courses in the biological sciences. Most of the core is required for the various B.Sc. degree programs offered in all of these departments and courses in U2 and U3 are given at a level which assumes one or another of the core courses as prerequisite.

Three types of programs, all lead to the B.Sc. degree in Biology (Faculty, Major and Honours). The Faculty and Major Programs can be used as prerequisite for entry here or elsewhere to various graduate programs in the biological and bio-medical sciences, or to professional schools (medicine, agriculture, nursing, library education, etc.). They also fulfill direct requirements for many jobs, e.g. technical posts in industry and government laboratories, hospitals and research institutes. The Honours program is designed specifically for students intending to proceed to graduate school and to a research career, and is not recommended for students who do not have these interests or career objectives.

The courses listed below are not described in any great detail. For those who want more information, the department has prepared a "blue book" (sold at the McGill Bookstore) which describes in detail the content of each course and the level at which it is given, the aims and methods used, lecturers, references, grading procedures, etc. The book also contains more information on registration, counselling, committee structure and the research interests and facilities which are represented in the department.

Faculty Program

The Faculty Program in Biology has been designed with a minimum of required courses in order to accommodate those students who are either undecided about the area in which they wish to specialize or interested in combining biology with some other field not emphasized in this Department. Students registered in the Faculty Program are free (with approval of a staff adviser) to design their own programs around specific interests or to develop programs with a broader base by incorporating courses from other disciplines. Requirements of the Faculty Program in Biology are listed on p. 185, together with other Science Faculty Programs; some of these include a sequence of courses in Biology.

Major in Biology

There are seven options in the Biology Major Program. These have been designed to offer specialized training in those areas of biology in which the Department has physical resources and the expertise to offer a variety of courses. They are recommended to students who have a clear interest in one of these subject areas, and who wish to obtain an intensive training in it. The requirements of the various options are listed below. Courses are listed in the recommended sequences taking prerequisites and time table into account.

ANIMAL BEHAVIOUR OPTION (61 credits):

Required courses (46 credits): *U1:* Biology 177-201D, -205D, -206D, -274A ,B; *U1 or U2:* Chemistry 180-212A; Mathematics 189-231A, B; Psychology 204-201D. *U2:* Biology 177-391A, -392B. *U2 or U3:* Biology 177-301A, B, -305A; plus one of the following courses: Biology 177-309A, -373A, Mathematics 189-232A, B, Psychology 204-204A, B.

Plus 15 credits, in *U2 or U3,* from the following: Biology 177-303A, -325A, -326B, -348D, -349B, -351B, -385B, -386A, -389B, -394B, -427A, -488A, -493B; Psychology 204-300A, -308D, -309B, -340A, -404B, -423A, -424B.

CELL, MOLECULAR AND DEVELOPMENT OPTION (62 credits):

Required courses (47 credits): *U1:* Biology 177-201D, -205D, -206D, -274A, B; Chemistry 180-212A, -222A, B. *U1 or U2:* Chemistry 180-204A; Mathematics 189-231A, B. *U2:* Biology 177-301A, B, 302A, B, -303A. *U2 or U3:* Biology 177-305A recommended (may be substituted by a U2 or U3 Biology course dealing with whole organisms or populations); plus one of the following courses: Biology 177-309A, -373A, Mathematics 189-232A, B.

Plus 9 credits in *U2* from the following: Biology 177-310B, 177-313B or -321B, 177-318B or -320B; Chemistry 180-214B (required for 177-477A to -480D), -302A; Biochemistry 507-352D.

Plus 9 credits in *U2 or U3* from the above or the following: Biology 177-311B, -312A, -314A, -316B, -319C, -357A, -415B, -417A, -422D, -465B, -471B, -477A (or 478B); Anatomy 504-261A; Biochemistry 507-450A, -451B, -454A; Microbiology and Immunology 528-314B, -423A, -424A; Physiology 552-411A.

ECOLOGY OPTION (60 or 61 credits):

Required courses (37 credits): *U1:* Biology 177-201D, -205D, -206D, -274A, B, -305A; Chemistry 180-212A; Mathematics 189-231A, B. *U2 (or U3):* Biology 177-301A, B, -303A; and one of the following courses: Biology 177-373A (recommended) or one of 177-309A, Mathematics 189-232A, B, Psychology 204-204A, B.

Plus 12 credits, in *U2 or U3,* from the following: Biology 177-325A, -326B, -328B, 331F, -385B, -427A, -429A.

Plus 12 (or 11) credits, in *U2 or U3,* from the above or the following: Biology 177-334B, -348D, -349B, -350A, -351B, -355A, -357A, -358A, -391A, -392B, -432A, -433A, -440A, -441B, -477A (or -478B), -487B; Geography 183-321A, -423B, -451D; Computer Science 308-220A, B.

HUMAN GENETICS OPTION (59 credits):

Required courses (47 credits): *U1:* Biology 177-201D, -205D, -206D, -274A, B; Chemistry 180-212A; Mathematics 189-231A, B. *U1 or U2:* Chemistry 180-222A, B, -204A. *U2:* Biology 177-370B. *U2 or U3:* Biology 177-301A, B, -303A, -372B; and one of the following courses: Biology 177-373A (recommended) or one of 177-309A, Mathematics 189-232A, B, Psychology 204-204A, B.

Plus 12 credits, in *U2 or U3,* from the following: Biology 177-305A, -310B, -313B or -321B, -314A, -320B, -417A, -471B, -422D, -477A (or -478B); Psychology 204-430B; Biochemistry 507-352D.

MARINE BIOLOGY OPTION (58 or 59 credits):

Required courses (47 credits): *U1:* Biology 177-201D, -205D, -206D, -274A, B; Chemistry 180-212A, -222A, B; Mathematics 189-231A, B. *U2 or U3:* Biology 177-301A, B, -305A, -348D, -440A, -441B.

Plus 12 (or 11) credits in *U2 or U3* from the following: Biology 177-303A, -349B, -359B, -373A (recommended, or Mathematics 189-232A, B or Psychology 204-204A, B), Biology 177-384A, -432A, -433A.

NEUROBIOLOGY AND COMPARATIVE PHYSIOLOGY OPTION (61 credits):

Required courses (46 credits): *U1:* Biology 177-201D, -205D, -206D, -274A, B; Mathematics 189-231A, B; Chemistry 180-212A, -204A. *U2 or U3:* Biology 177-301A, B, -305A, -386A, -389B; and one of the following courses: 177-309A, -373A, Mathematics 189-232A, B, Psychology 204-204A, B. *U3:* Biology 177-487B or -488A.

Plus 15 credits in *U2 or U3* from the following: Biology 177-303A, -311B or -390B, -385B, -391A, -392B, -394B, -477A (or -478B), -487B or -488A; Psychology

204-308D*, -342A*, -422B*, -423A*, -424B*; Biochemistry 507-352D*, -455B*; Anatomy 504-421B; Physiology 552-312D*; Physics 198-413A*.

*For courses in Departments other than Biology prerequisites will have to be taken as electives.

PLANT SCIENCE OPTION (61 credits):

Required courses (43 credits): *U1:* Biology 177-201D, -205D, -206D, -274A, B; Chemistry 180-212A, Mathematics 189-231A, B. *U1, U2 or U3:* Biology 177-301A, B, -305A, -355A, -357A, -358A, -429A.

Plus 18 Credits from the following: *U1-U3:* Chemistry 180-222A, B; Biology 177-303A, -316B, -356B, -359B, -361A, -362A, -363B, -364B. *U3:* Biology 177-465B, -477A (or 478B); Geography 183-451D.

Honours in Biology*

The Honours program in Biology is designed expressly as a preparation for graduate studies and research, and provides students with a broad training in Biology and some research experience in a chosen area. A student may apply to enter the Honours program from any of the Biology Major Options at the end of the U2 year. Requirements for Honours are: 1) a cumulative GPA of 3.5 or better at the end of U2; 2) acceptance of a 9-credit Independent Studies proposal (see listing of 177-479D for details); 3) attainment of a minimum GPA of 3.2 in the U3 year; 4) adherence to the following program:

U1 (25 credits): Biology 177-201D, -205D, -206D, -274A, B; Chemistry 180-212A; Mathematics 189-231A, B.

U1-U3 (42 credits): Biology 177-301A, B, - 303A, -305A, -373A; plus 24 credits biology and science courses to fulfil one Major option; plus 6 credits post-core biology courses not listed in above Major Program.

U3 (13 credits): Biology 177-479D, -499D.

Course Descriptions

PRE-CORE COURSES

177-111A. PRINCIPLES OF ORGANISMAL BIOLOGY. (3 credits; 2 lectures and one 3-hour laboratory per week; Prerequisite: none.) This course is an introduction to the structure, function and adaptation of plants and animals in the biosphere. Open to all students (B.Sc., B.A., B.Ed., B.Eng., etc.) wishing introductory biology. This course serves both as a prerequisite for Biology 177-205D and 177-206D, and an alternate to CEGEP Organismal Biology. PROFESSOR MANLEY

177-112B. INTRODUCTION TO CELL AND MOLECULAR BIOLOGY. (3 credits; 2 lectures and a 3-hour laboratory or seminar period per week; Prerequisite: none.) The cell: ultrastructure, division, chemical constituents and reactions. Bioenergetics: photosynthesis and respiration. Principles of genetics and the molecular basis of inheritance. This course serves as a prerequisite for Biology 177-201D and serves as an alternate to CEGEP Cell Biology. PROFESSOR SOUTHIN

THE COURSES OF THE CORE CURRICULUM IN BIOLOGICAL SCIENCES**

177-201D. CELL AND MOLECULAR BIOLOGY. (6 credits.)
177-205D. BIOLOGY OF ORGANISMS. (6 credits.)
177-206D. LABORATORY COURSE IN BIOLOGY OF ORGANISMS. (3 credits.)
189-231A, B. MATHEMATICS FOR BIOLOGISTS. (3 credits.)
177-301A, B. LABORATORY IN CELL AND MOLECULAR BIOLOGY (PART 1). (3 credits.)
177-302A, B. LABORATORY IN CELL AND MOLECULAR BIOLOGY (PART 2). (3 credits.)
177-303A. DEVELOPMENTAL BIOLOGY. (3 credits.)
177-305A. ENVIRONMENTAL BIOLOGY. (3 credits.)
177-309A. MATHEMATICAL MODELS IN BIOLOGY. (3 credits.)

*New program, not applicable to students graduating in 1975.
**Complete descriptions of these courses may be found on pages 194-196.

POST-CORE COURSES

177-274A, B. PRINCIPLES OF GENETICS. (3 credits; 3 hours lectures, 1 hour conference, optional; *Prerequisites:* 177-111A and -112B or equivalent.) A survey of the gene as the fundamental unit of heredity, with a special emphasis on human genetics.
A: PROFESSOR METRAKOS AND STAFF
B: PROFESSOR TRASLER AND STAFF

177-310B. GENERAL MOLECULAR GENETICS. (3 credits; 3 hours lectures, one period every other week used for conferences; *Prerequisite:* 177-201D) A survey of current topics in molecular genetics, including the replication, transcription and translation of nucleic acids and the regulation of these processes. PROFESSOR BUSSEY

177-311B. BIOPHYSICAL APPROACH TO CELL FUNCTION. (3 credits; 2 hours lectures, 1 hour seminar; *Prerequisites:* 177-201D, 180-214B; Structure and function of membranes: state of membrane lipids, transport mechanisms, electrical potentials, electron transfer, phosphorylation and energetics of photosynthesis and respiration. PROFESSOR POOLE

177-312A. CELL GROWTH. (3 credits; 2 hours lectures, 1 hour conference; *Prerequisite:* 177-201D.) Molecular events, metabolism and control mechanisms in the growth and death of cell populations *in vivo* and *in vitro*. Molecular and organelle progression through the cell cycle. Models of cell growth. PROFESSOR SINCLAIR

177-313B. THE ULTRASTRUCTURAL BASIS OF CELL FUNCTION. (3 credits; 2 hours lectures, 2 hours seminar; *Prerequisite:* 177-201D.) A detailed discussion of the functional organization of cells. PROFESSOR GIBBS

177-314A. MOLECULAR BIOLOGY OF SOMATIC CELLS. (3 credits; 3 hours lectures; *Prerequisite:* 177-201D.) How the application of the present knowledge, techniques and experimental systems of molecular biology, cell genetics, virology and immunology has brought us to the threshold of understanding the origin of cancer cells will be discussed with the help of current journal materials. PROFESSORS MUKHERJEE AND PINSKY

177-316B. PLANT GROWTH AND MORPHOGENESIS. (3 credits; 2 hours lectures and seminar; *Prerequisite:* 177-357A or permission of instructor; not given in 1974-75, given in 1975-76.) Physiological, biochemical and physiological-genetic approaches to the study of growth, differentiation and morphogenesis. Hormones and growth regulators, environmental control, physiology of reproduction, and senescence are discussed at a more advanced level than in 357A. PROFESSOR BOLL

177-318B. DEVELOPMENT BIOLOGY, EXPERIMENTAL. (3 credits; 1 hour lecture, 1 hour discussion, 3 hours laboratory; *Prerequisite:* 177-303A and/or permission of instructor; Not given every year, see instructor.) Interactions of developing cells and organisms with their micro- and macro-environments, taking as examples early embryonic cells, protozoa, and immunologically active cells. Laboratory projects will use live embryos.
PROFESSOR WOLFSON

177-319C. DEVELOPMENTAL BIOLOGY, MARINE. (Field course; 3 credits; 3 weeks full-time, lectures and laboratory; *Prerequisite:* 177-303A or equivalent, permission of instructor; Not given every year, see instructor.) The course includes both comparative and experimental studies on embryos of marine organisms available at the Huntsman Marine Laboratory, St. Andrews, in the spring. PROFESSOR WOLFSON

177-320B. GENE ACTIVITY IN DEVELOPMENT. (3 credits; 2 hours lectures, 1 hour discussion; *Prerequisites:* 177-303A; 177-310B recommanded, or permission of instructor.) An assessment of the experimental work dealing with gene activity and its regulation during embryological development. Topics: gene amplification; DNA, RNA, and protein synthesis during embryogenesis; nucleocytoplasmic interactions; hormones as regulators of gene activity and models of differentiation.
PROFESSORS BRANDHORST AND FROMSON

177-321B. CYTOLOGY AND CYTOGENETICS. (3 credits; 2 hours lectures, 3 hours laboratory, or seminar/discussion; *Prerequisites:* 177-201D; 177-274A, B (E27A, B) recommended.) The genetic apparatus, from molecules to chromosomes, is studied with respect to structure, behaviour and function. The main stress is on chromosomes of higher organisms, somatic and meiotic, relating structure and function. PROFESSOR BOOTHROYD

177-323B. TOPICS IN CYTOLOGY AND CYTOGENETICS. (1 credit; 1-2 hours seminar and discussion: Co- or Pre-requisite: 177-321B.) Selected topics in cytology and cytogenetics will be considered in depth through student seminars and discussions, and occasional lectures. PROFESSOR BOOTHROYD

177-325A. PROCESSES IN EVOLUTIONARY ECOLOGY. (3 Credits; 2½ hours lectures and ½ hour conference; *Prerequisites:* 177-305A, 177-274A, B recommended; only one, either 177-325A or 177-372B can be taken for credit.) Genetic properties and dynamics of natural populations with emphasis on qualitative traits. Models of population growth, mating systems, genetic variance, and types of natural selection. PROFESSOR SITTMANN

177-326B. PATTERNS IN EVOLUTIONARY ECOLOGY. (3 credits; 2 hours lectures, 1 hour conference; *Prerequisite:* 177-325A.) The evolution of ecological characteristics, chiefly at the population level. The influence of natural selection upon birth rates, brood size, parental care, age at first breeding, longevity, maximum population size, feeding strategies, competitive relations, etc. PROFESSOR P. R. GRANT

177-328B. RESOURCE BIOLOGY. (3 credits; 2 hours lectures, 2 hours conference; *Prerequisite:* 177-305A or permission of instructor.) A study of the nature of renewable resources, theoretical and applied aspects of management and exploitation, and methods of obtaining data required in decision making. Emphasis on animal populations.
PROFESSOR LEGGETT

177-331F. ECOLOGY FIELD COURSE. 12 day Field Course in early September, with a comprehensive report to be prepared during 'A' term. (3 credits; *Prerequisites:* 177-205D, 305A and permission of instructor.) Methods of sampling natural populations of animal and plant species in fresh water and terrestrial habitats. Estimating population size from samples. Energy flow determinations. Construction of a simple model of an ecosystem, using field estimates for each compartment. PROFESSOR P. R. GRANT AND STAFF

177-334B. ARCTIC ECOSYSTEMS. (3 credits; 2 lectures, 1 conference; *Prerequisite:* 177-305A or permission of Instructors.) This course investigates the biotic and abiotic environment of arctic ecosystems. The patterns of production, energy flow, nutrient cycling and adaptations to the arctic are covered. Unique aspects of the arctic are emphasized, and the environmental impact of northern development is considered.
PROFESSORS OECHEL, AUCLAIR AND STAFF

177-346A. PHILOSOPHY OF BIOLOGY. (3 credits; 3 hours lectures or conferences; *Prerequisite:* Any introductory biology course; given in 1974-75, not given in 1975-76.) An introduction to the philosophical foundations of biology and their relevance to research and theories in various biological disciplines. PROFESSOR SATTLER

177-347B. HISTORY OF BIOLOGY. (3 credits; 3 hours lectures; *Prerequisite:* Any introductory biology course; not given in 1974-75, given in 1975-76.) The development of scientific observation and measurement in plant and animal anatomy, comparative morphology, ecology, embryology, physiology and palaeontology. Theories of the relationships of living organisms, their parts and their evolution. Biological expeditions, societies and journals.
PROFESSOR DUNBAR

177-348D. THE BIOLOGY OF INVERTEBRATA. (6 credits; 2 hours lectures and 3 hours laboratory; *Prerequisites:* 177-205D, 177-206D.) A survey course of the invertebrate groups (with the exception of terrestrial arthropods) stressing comparative morphology, functional anatomy and relationships between major taxa. PROFESSOR REISWIG

177-349B. BIOLOGY OF FISHES. (3 credits; 2 lectures and 1 laboratory per week; *Prerequisites:* 177-205D, 177-206D or permission of instructor.) An advanced course in the biology of fishes with emphasis on their ecology, behavior, and adaptation to specific environmental conditions. PROFESSOR LEGGETT

177-350A. INSECT DEVELOPMENT AND PHYSIOLOGY. (3 credits; 2 lectures and one 3-hour laboratory; *Prerequisites:* 177-201D, -205D and -206D, or permission of instructor.) The physiology of growth and development in insects, and the physiological relations of insects to their environment. PROFESSOR McFARLANE (Entomology Department)

177-351B. BIOLOGY OF MAMMALS. (3 credits; 2 lectures and 1 laboratory per week; *Prerequisites:* 177-205D, 177-206D or permission of instructor.) The Biology of Mammals including their ecology, behavior and adaption to specific ways of life.
PROFESSOR STEVEN

177-352A. VERTEBRATE EVOLUTION. (3 credits; 3 hours lecture; *Prerequisites:* 177-205D, 177-206D or equivalent.) Development of modern evolutionary theory, particularly as it applies to vertebrates. The origin and evolution of the major groups of vertebrates, their anatomy, phylogeny and zoogeography. PROFESSOR CARROLL

177-353B. PROBLEMS IN VERTEBRATE EVOLUTION. (3 credits; 1 hour lecture, 6 hours laboratory; *Prerequisite:* 177-352A.) Investigation of current problems in the phylogeny and anatomy of vertebrates; laboratory work with fossil vertebrates and extensive use of

literature. A series of problems will be investigated involving each of the major vertebrate groups. PROFESSOR CARROLL

177-355A. PLANT ANATOMY. (3 credits; 2 hours lectures, 3 hours laboratory; *Prerequisite:* 177-201D, 205D, 206D or permission of instructor; not given in 1974-75; given in 1975-76.) An introduction to the general organization and development of cells, tissues and organs, the relation of anatomy to other biological disciplines and everyday life. The laboratory includes sectioning, fixing, staining, photography, etc. PROFESSOR SATTLER

177-356B. THE FLOWER. (3 credits; 2 hours lectures, 3 hours laboratory; *Prerequisites:* 177-201D, -205D, -206D, -355A; not given in 1974-75; given in 1975-76.) The morphology, anatomy, development, adaption and evolution of the flower. Brief consideration also will be given to the importance of the flower in history, art and literature. The practical work will include a project, which will be carried out during the laboratory periods. PROFESSOR SATTLER

177-357A. PLANT PHYSIOLOGY. (3 credits; 2 hours lectures, 3 hours laboratory. *Prerequisites:* 177-201D, 177-205D.) Topics include water relations, nutrition, some physiological aspects of respiration and photosynthesis, translocation of solutes, elementary growth and development, response to environmental factors and adaption. PROFESSOR BOLL

177-358A. CANADIAN FLORA. (3 credits; 2 hours lectures, 3 hours laboratory. Field trips early in the term; *Prerequisite:* 177-111A or equivalent; Not given in 1974-75.) A study of the higher plants occurring naturally in Canada, including their recognition, collection, identification and classification. STAFF

177-359B. THE ALGAE. (3 credits; 2 hours lectures, 3 hours laboratory; *Prerequisite:* 177-205D or permission of instructor; not given in 1974-75; given in 1975-76.) The study of the morphology, cytology (including ultrastructure), aspects of physiology, and the ecology of the major groups of the algae. PROFESSOR GOLDSTEIN

177-361A. BRYOPHYTA AND PTERIDOPHYTA. (3 credits; 2 hours lectures, 3 hours laboratory; *Prerequisites:* 177-205D, 177-206D; Not given in 1974-75.) Discussion of the organization and evolution of bryophytes and pteridophytes. STAFF

177-362A. MYCOLOGY I. (3 credits; 2 hours lectures, 3 hours laboratory; *Prerequisite:* Introductory course in Biology.) General characteristics of the slime molds, Phycomycetes and Ascomycetes (Lower Fungi). Emphasis is placed upon the role of these fungi among living things, including their means of reproduction and utilization of complex organic matter. PROFESSOR WILSON

177-363B. MYCOLOGY II. (3 credits; 2 hours lectures, 3 hours laboratory; *Prerequisite:* Introductory course in Biology.) General characteristics of Basidiomycetes and Fungi Imperfecti. Role of the higher fungi among living things including reproduction, utilization of complex organic matter, geographical distribution, mycorrhizal associations and economic factors. Isolation and culture techniques of fungi in general. PROFESSOR WILSON

177-364B. ORIGIN AND USE OF CULTIVATED PLANTS. (3 credits; 2 hours lectures; 3 hours laboratory; *Prerequisite:* Introductory course in Biology.) This course will deal with the rise of early civilizations which first cultivated plants, and the importance of cultivated plants in the advance of man from a primitive to a civilized state, ending with the present world food crisis. PROFESSOR WILSON

177-370B. GENETICS OF MAN. (3 credits; *Prerequisites:* 177-274A, B (E27A, B), 177-201D, or permission.) A contemporary view of the genetic factors determining human characteristics, normal and abnormal. PROFESSORS FRASER, METRAKOS AND MUKHERJEE

177-372B. POPULATION GENETICS. (3 credits; 2½ hours lectures and ½ hour conference; *Prerequisite:* 177-274A, B (E27A, B) or permission of instructor.) Topics include Hardy-Weinberg equilibrium in random mating populations, inbreeding coefficient and rate of gene loss, separation of phenotypic variation into genetic and environmental components, correlated characters, genotype and environment interaction. PROFESSORS SITTMANN AND TYSON

177-373A. BIOMETRY. (3 credits; 2 hours lectures, 2 hours laboratory; *Prerequisite:* 189-112A, B or the equivalent.) Elementary statistical methods for testing hypotheses and designing experiments in biology; probability, sampling, distributions, tests of significance, the analysis of variance, regression, correlation, and the analysis of frequency data. PROFESSOR TYSON

177-384A. PHYSIOLOGY OF MARINE ORGANISMS. (3 credits; 2 lectures and 1 laboratory per week; *Prerequisites:* 177-205D, 177-206D, or permission of instructor.) Physiology of marine organisms, with special reference to fundamental principles underlying operation of the various systems. PROFESSOR DIGBY

177-385B. ENVIRONMENTAL PHYSIOLOGY OF ANIMALS. (3 credits; 2 hours lectures, option of 3 hours laboratory or conference and seminar; *Prerequisites:* 177-201D, 177-205D, 177-206D, 177-305A or instructor's permission.) The physiological adaptations of organisms to different environments with emphasis on energetical aspects and the interactions between internal controls and the environment. STAFF

177-386A. NEUROBIOLOGY. (3 credits; 3 hours lectures; *Prerequisite:* 177-205D.) A comparative study of information processing in sensory systems of animals, the integrative networks within the nervous system, and the co-ordination of the various muscle systems. PROFESSOR PASZTOR AND STAFF

177-389B. LABORATORY IN NEUROBIOLOGY. (3 credits; 2 laboratories of 3 hours each; *Prerequisites:* 177-386A; permission of instructor.) Provides experience in the methods of neurobiological research; experiments include extracellular and intracellular recording from nerve cells, electrical stimulation, and the study of neuro-behavioural problems. Primarily for students in the Neurobiology and Comparative Physiology Major option. PROFESSOR CHASE AND STAFF

177-390B. FUNDAMENTALS OF PHYSIOLOGICAL ACTION. (3 credits; 2 hours lectures, 3 hours laboratory; *Prerequisites:* 177-205D, 177-206D, or permission of instructor.) Biophysical basis of physiological mechanisms mainly as applied to zoological material. Surface phenomena and gas layers; ionic phenomena; electrokinetic effects in biological material; organic semiconductors; pressure sensitivity; photosensitization, calcification in shell, bone and teeth, and properties of artificial membranes. PROFESSOR DIGBY

177-391A. THE STUDY OF SIMPLE BEHAVIOUR. (3 credits; 2 hours lectures, 3 hours laboratory; *Prerequisites:* 177-205D, 177-206D.) The experimental study of the behaviour of lower animals. PROFESSOR STEVEN

177-392B. ANIMAL BEHAVIOUR. (3 credits; 2 hours lectures, 2 hours tutorial; *Prerequisite:* 177-205D or permission of instructor.) An introduction to the concepts of behaviour as expressed by zoologists, including a study of stimulus patterns and recognition, movement sequences, motivation, learning, social behaviour, communication and the development and evolution of behaviour. PROFESSORS LEMON AND MADISON

177-394B. LABORATORY IN ETHOLOGY. (3 credits; *Pre-* or *Corequisites:* 177-392B; permission of instructor.) A laboratory course based on projects whereby students observe the behaviour of vertebrate animals. Primarily for students enrolled in Animal Behaviour. Major Program. PROFESSORS MADISON AND LEMON

177-415B. LIGHT AND ELECTRON OPTICAL METHODS IN BIOLOGY. (3 credits; 1 hour lecture, 6 hours laboratory; *Prerequisite:* 177-313B or permission of instructor; Not given in 1974-75.) A practical introduction to the use of sophisticated microscopical research techniques and instruments. STAFF

177-417A. DEVELOPMENTAL MAMMALIAN GENETICS. (3 credits; lectures and conferences; *Prerequisites:* 180-204A, 180-222A, B, 177-274A, B, 177-303A, 177-310B; 177-372B recommended; and permission of instructor.) An advanced course for final year students where the main emphasis will be on experiments where gene differences altering development or environmentally-induced differences in embryonic development throw light on the processes of normal mammalian development. PROFESSOR TRASLER

177-422D. TOPICS IN GENETIC REGULATION AND RECOMBINATION. (3 credits, may be combined with 177-478B, 3 credits; irregular schedule of seminars or conferences; *Prerequisites:* 177-274A, B, 177-301A, B; 177-310B recommended.) Investigation and discussion of recent advances in molecular genetics, including genetic regulation of protein synthesis, DNA-repair, recombination, etc., and their relevance to studies in higher organisms, including man. PROFESSOR KAFER-BOOTHROYD

177-427A. ECOSYSTEMS. (3 credits; 2 hours lectures, 3 hours laboratory; *Prerequisites:* 177-305A, 189-231A, B.) A study of ecological systems with emphasis on regulation, productivity, energy and nutrient cycling, ecological efficiencies. Systems analysis. Applied aspects. PROFESSOR AUCLAIR

177-429A. PHYSIOLOGICAL PLANT ECOLOGY. (3 credits; 2 hours lectures, 3 hours laboratory; *Prerequisite:* 177-305A.) A consideration of physiological responses and adaptations of plants to their environment. Contemporary approaches to the measurement and study of relevant physiological and micro-environmental parameters will also be presented.
PROFESSOR OECHEL

177-432A. LIMNOLOGY. (2 credits; 2 hours lectures; *Prerequisite:* 177-305A.) A study of the physical, chemical and biological characteristics of fresh-water, with emphasis on the role of the plankton in the economy of lakes.
PROFESSOR KALFF

177-433A. LIMNOLOGY LABORATORY. (2 credits; 5 hours laboratory/field trip per week; *Pre-* and *Corequisites:* 177-305A, 177-432A and permission of instructor.) A laboratory and field trip course on the physical, chemical and biological characteristics of lakes. This course is given in conjunction with Biology 177-432A; restricted enrolment.
PROFESSOR KALFF

177-440A. MARINE ENVIRONMENT. (3 credits; 3 hours lectures, occasional laboratory sessions; *Prerequisite:* 177-305A; 177-348D can be taken concurrently.) An introduction to the physical and chemical factors of the Marine environment; the main ecological divisions of the ocean; history and methods of marine research.
PROFESSORS LALLI AND DUNBAR (Marine Science)

177-441B. BIOLOGICAL OCEANOGRAPHY. (3 credits; 3 hours lectures, occasional laboratory periods; *Prerequisite:* 177-440A.) An ecological account of marine populations and their relationship to the physical and chemical environment; the dynamics of the marine plankton and the levels of production in different regions. Marine biogeography.
PROFESSORS LEWIS AND DUNBAR (Marine Science)

177-465B. TOPICS IN PLANT BIOCHEMISTRY. (3 credits; Lectures and discussion; *Prerequisites:* 177-201D; 177-303A, 507-352D recommended; Not given in 1974-75.) A review by lectures, seminars and discussion of important advances in recent years, e.g. molecular structures of macromolecules, biosynthetic processes, mechanisms of hormone action, metabolic regulation.
PROFESSOR MACLACHLAN

177-471B. HUMAN BIOCHEMICAL GENETICS. (4 credits; 3 hours lectures with some student participation; *Prerequisites:* 177-201D, 177-274A, B (177-E27A, B), 180-302A, 189-231A, B.) An up-to-date and comprehensive account of the biochemical aspects of human genetics, and relationship of this knowledge to broader questions including evolution, eugenics and treatment of genetic disease.
PROFESSORS GOLD, PINSKY, SCHULMAN AND SCRIVER

177-477A. INDEPENDENT STUDIES IN BIOLOGY. (3 credits; open to U2 and U3 students only; *Prerequisite:* Projects have to be arranged individually with instructors.) Research or reading projects, permitting independent study under the guidance of a staff member specializing in the field of interest.
STAFF

177-478B. INDEPENDENT STUDIES IN BIOLOGY. (3 credits; open to U2 and U3 students only; *Prerequisite:* Projects have to be arranged individually with instructors.) Research or reading projects, permitting independent study under the guidance of a staff member specializing in the field of interest.
STAFF

177-479D. INDEPENDENT STUDIES IN BIOLOGY. (9 credits; 8-12 hours per week research project and related seminars; *Prerequisites:* restricted to U3 students in Biology Honours Program. A written proposal outlining the studies to be undertaken must be submitted to the Biology Curriculum Committee by the end of the spring term in the U2 year. The proposal will be reviewed by a committee composed of two instructors in the student's field of study plus one from the Curriculum Committee. Notice of the Committee's decision will be forwarded by mail during the summer.) A program of study designed to provide an introduction to the design, execution and reporting of research. The number of projects that can be handled is limited and their quality will be examined carefully. Proposals should therefore be considered as competitive.
STAFF

177-480D. INDEPENDENT STUDIES IN BIOLOGY. (12 credits; 10-15 hours per week research project and related seminars; *Prerequisites:* restricted to U3 students in Biology Honours Program. A written proposal outlining the studies to be undertaken must be submitted to the Biology Curriculum Committee by the end of the spring term in the U2 year. The proposal will be reviewed by a committee composed of two instructors in the student's field of study plus one from the Curriculum Committee. Notice of the Committee's decision will be forwarded by mail during the summer.) A program of study designed

to provide an introduction to the design, execution and reporting of research. The number of projects that can be handled is limited and their quality will be examined carefully. Proposals should therefore be considered as competitive. STAFF

177-487B. COMPARATIVE METABOLIC PHYSIOLOGY. (3 credits; 2 hours conference, laboratory demonstration; *Prerequisite:* 177-385B.) A seminar organized around comparative aspects of endocrine control of metabolism. Detailed topics to vary from year to year. PROFESSOR MARSDEN

177-488A. ADVANCED NEUROBIOLOGY. (3 credits; 2 hours seminar; *Prerequisite:* 177-386A or permission of instructor.) Discussion primarily of important current research. Topics emphasize cellular neurophysiology and the functional organization of nervous systems. Includes both vertebrate and invertebrate material.

PROFESSORS MANLEY AND CHASE

177-493B. ADVANCES IN ANIMAL BEHAVIOUR. (3 credits; 2 hours seminar; *Prerequisite:* Permission of instructor.) A senior course reviewing topics of current interest, ranging from the behaviour of lower invertebrates to social interactions of higher vertebrates.

PROFESSORS LEMON, MADISON AND STAFF

177-499D. HONOURS SEMINAR IN BIOLOGY. (4 credits; weekly seminars.) Honours students in Biology will attend a selected series of guest speaker seminars of general interest, and participate in discussions led by a staff member specializing in the field. In addition, groups of students will participate in a chosen series of specialized seminars and present approximately 2 seminars. PROFESSOR KAFER-BOOTHROYD AND STAFF

CHEMISTRY (180)

Otto Maass Chemistry Building, Room 322, Telephone 392-4469

Chemistry is both a pure science, offering its students a challenging intellectual pursuit and, simultaneously, an applied science whose technology is of fundamental importance to our economy and society. The modern chemist seeks an understanding of the structure and properties of atoms and molecules. He uses this knowledge to predict and interpret the properties and transformations of matter and the energy changes that accompany those transformations. Many of the concepts of Physics and the methods of Mathematics are basic to Chemistry, while Chemistry is in turn of fundamental importance to many other disciplines such as: the Biological and Medical Sciences, Geology, Metallurgy, etc.

A degree in Chemistry can lead to a wide variety of professional vocations. The large science-based industries (petroleum refining, plastics, pharmaceuticals, etc.) all employ chemists in research and development and in quality control. Many federal and provincial departments and agencies employ chemists in research and testing laboratories. Such positions are expected to increase with the currently growing concern for the environment and for consumer protection. A background in chemistry is also useful as a basis for advanced study in other related fields, such as medicine and the biological sciences. For a business career, a B.Sc. in Chemistry can profitably by combined with a master's degree in Business Administration.

Chemistry courses at the university level are traditionally divided into four areas of specialization: 1) organic chemistry, dealing with the compounds of carbon; 2) inorganic chemistry, concerned with the chemistry and compounds of elements other than carbon; 3) analytical chemistry, which deals with the identification of substances and the quantitative measurement of their compositions; and 4) physical chemistry, which treats the physical laws and energetics governing chemical reactions. Naturally there is a great deal of overlap between these different areas, and the boundaries are becoming increasingly blurred. After a general course at the collegial level, courses in organic, inorganic, analytical and physical chemistry are offered through the university years. Since chemistry is an experimental science, laboratory classes accompany most under-

graduate courses. In addition, courses are offered in polymer, nuclear, radio and biological chemistry to upper year undergraduates.

There are two main programs in Chemistry, Honours and Major. The Honours program is intended primarily for students wishing to pursue graduate studies in Chemistry. While the Major program is somewhat less specialized, it is still recognized as sufficient training for a profession in Chemistry. It can also lead to graduate studies although an additional qualifying year may be necessary. There are also a number of Faculty programs available (see page 185). Interested students may inquire about these at the Department Office.

Core Curriculum in Chemistry

The Core Curriculum in Chemistry consists of 36 specified credits in chemistry to which must be added a minimum of 17 credits in Mathematics and Physics. The courses at present in the Core Curriculum are listed below.

Chemistry: *U1:* 180-281A (3 Credits), 180-257D (4 Credits), 180-253B (2 Credits), 180-273A (1 Credit).

U2: 180-352B (3 Credits), 180-372A (3 Credits), 180-392A, B (3 Credits), 180-381B (3 Credits), 180-387D (4 Credits), 180-356A (2 Credits), 180-353A (1 Credit), 180-373B (2 Credits), 180-383B (1 Credit), 180-363D (4 Credits).

Physics: *U1:* 198-232A, B (4 Credits).
U2: 198-339B (4 Credits).

Mathematics: *U1:* 189-222A, B (3 Credits), 189-223A (3 Credits).
U2: 189-315A, B (3 Credits).

A further 14 required credits in Chemistry are optional courses at the CEGEP level and it is hoped that the majority of Honours and Major candidates will have taken at least 6 of these credits at the CEGEP level. The McGill numbers corresponding to these 14 credits are listed below. Students who have not taken these courses or their equivalents at the CEGEP level must do so to be eligible candidates for Honours or Major degrees in Chemistry.

Chemistry: 180-212A (4 Credits), 180-213A, B (3 Credits), 180-222A, B (4 Credits), 180-223A, B (3 Credits).

The Core Curriculum is completed in the first two university years by Honours students, and is taken over three university years by Major students. Because students may have had individual variations in their CEGEP programs, the particular core courses taken in U1 and U2 will vary.

Honours in Chemistry

The Honours program in chemistry is the Core Curriculum taken in U1 and U2 and an additional 18 credits in chemistry elected from the U3 honours courses. Of the 18 credits 198-465D, MATHEMATICAL PHYSICS FOR CHEMISTS, will be acceptable for four credits. Admission to the Honours program is by application to the Chemistry Department.

A research project is available as an option to U3 honours chemistry students. Further information on this project may be obtained from the Chemistry Department office.

Major in Chemistry

The Major in Chemistry is the Core Curriculum taken over the three university years. All courses chosen outside the Core Curriculum will be free electives. Students intending to major in chemistry may, on application to the Department, be granted permission to take U3 Honours courses in Chemistry as part of their electives. Admission to the Major program is by application to the Chemistry Department.

Faculty Programs in Chemistry

Faculty programs in Chemistry are constructed from the U1 courses and the general courses of U2 and U3 intended for these students. (See pages 185-189.)

Six courses in general analytical chemistry, 180-207A, -217A, -227B, -237B, -247A, and -267B, are listed to permit the synthesis of an individualized program in chemical analysis.

Awards

Attention is drawn to the following awards for which students in Chemistry are eligible: C.A.T.C.C. Scholarship, McGill Pharmacy Alumni Bursary, C.I.C. Prize, Dr. William H. Hatcher Prize, Anne Molson Prize, S.C.I. Student Prize, Corporation of Professional Chemists of Québec Prize, S.C.I. Merit Award, Clifford B. Purves Prize and Frederick J. Lemaistre Award. For further information students are referred to the Scholarships Announcement.

Course Descriptions

180-110A. GENERAL CHEMISTRY I. (3 credits; 3 lectures, 1 tutorial; *Prerequisite/Corequisites:* College level mathematics and physics.) A study of the fundamental principles of atomic structure; valence theory: periodic table; gaseous, liquid and solid states; solutions of non-electrolytes. STAFF

LABORATORY: (2 hours). Illustrative experiments. MRS. BIRNIE

180-120B. GENERAL CHEMISTRY II. (3 credits; 3 lectures, 1 tutorial; *Prerequisite:* Chemistry 110A.) A continuation of Chemistry 110A. A study of the fundamental principles of physical chemistry including thermodynamics, chemical equilibria, acids and bases, ionic equilibria, electrochemistry, redox reactions, chemical kinetics, and the structures and reactions of the simpler aliphatic and aromatic organic compounds. STAFF

LABORATORY: (2 hours). Illustrative experiments. MRS. BIRNIE

180-201A. MODERN INORGANIC CHEMISTRY I. (3 credits; no lectures, modular course; *Prerequisites:* Chem. 110A and 120B or equivalent courses.) The course deals with the chemistry of the main group elements and their role in our everyday lives. The course is based on a series of self-study modules; a minimum of three background modules (on atomic structure and chemical bonding) and five other modules selected by the student must be completed. PROFESSOR BUTLER

180-204A. INTRODUCTORY PHYSICAL CHEMISTRY FOR BIOLOGICAL SCIENCE STUDENTS I. (3 credits; 3 lectures; *Prerequisites:* Chem. 120B or equivalent and one full course in calculus.) Similar to 180-213A, B. An emphasis is placed on the use of biological examples to illustrate the principles of Physical Chemistry. The relevance of physical chemistry to biology is stressed. PROFESSOR GALLEY

180-207A. GENERAL ANALYTICAL CHEMISTRY I. (1 credit; 1 lecture; *Prerequisites:* Chem. 110A and 120B or equivalent courses.) Lecture portion of an individualized program in analytical chemistry. Lecture sequences and laboratories (if any) to be selected by student and his adviser. PROFESSOR FRESCO

180-212A. INTRODUCTORY ORGANIC CHEMISTRY I. (4 credits; 3 lectures; *Prerequisites:* Chem. 110A and 120B or equivalent courses.) A survey of reactions of aliphatic and aromatic compounds including modern concepts of bonding, mechanisms, conformational analysis and spectra. PROFESSOR FARRELL

LABORATORY: (3 hours). Illustrative experiments.
PROFESSOR FARRELL AND MRS. HEYGE

180-213A, B. INTRODUCTORY PHYSICAL CHEMISTRY I. (3 credits; 3 lectures; *Prerequisites:* Chem. 120B or equivalent; Math. 189-120 and 121 or equivalent.) First law of thermodynamics, enthalpy, thermochemistry, bond energies. Second law of thermodynamics; the entropy and the free energy functions. Chemical and thermodynamic equilibrium states. Phase rule. Colligative properties of ideal solutions. Electrochemistry, electrochemical cells. Liquids and liquid surfaces. Chemical kinetics.
PROFESSORS EISENBERG AND PATTERSON

180-214B. INTRODUCTORY PHYSICAL CHEMISTRY FOR BIOLOGICAL SCIENCE STUDENTS II. (3 credits; 3 lectures; *Prerequisites:* Chem. 213A, B or Chem. 204A or equivalent.) Similar to 180-223A, B. An emphasis is placed on the use of biological examples to illustrate the principles of physical chemistry. The relevance of physical chemistry to biology is stressed.
PROFESSOR GALLEY

180-217A, B. GENERAL ANALYTICAL CHEMISTRY LABORATORY I. (1 credit; 3 hours; *Prerequisites:* Chem. 110A and 120B or equivalents.) Laboratory portion of an individualized program in analytical chemistry. Laboratory experiments to be selected by student and his adviser.
PROFESSOR FRESCO

180-222A, B. INTRODUCTORY ORGANIC CHEMISTRY II. (4 credits; 3 lectures; *Prerequisite:* Chem. 212A.) Modern spectroscopic techniques for structure determination. The chemistry of alkyl halides, alcohols, ethers, carbonyl compounds and amines with special attention to mechanistic aspects. Special topics.
PROFESSORS HARPP AND FARRELL

LABORATORY: (3 hours). Illustrative experiments.
PROFESSORS HARPP AND FARRELL AND MRS. HEYGE

180-223A, B. INTRODUCTORY PHYSICAL CHEMISTRY II. (3 credits; 3 lectures; *Prerequisite:* 180-213A, B or equivalent.) Schroedinger Wave Equation; Energy states of atoms; Theory of chemical bonding; Atomic and Molecular structure; Spectroscopy; Electrical and magnetic properties of molecules; statistical thermodynamics.
PROFESSOR SIMKIN

180-227B. GENERAL ANALYTICAL CHEMISTRY II. (1 credit; 1 lecture; *Prerequisite:* Chem. 207A.) Lecture portion of an individualized program in analytical chemistry. Lecture sequences and laboratories (if any) to be selected by student and his adviser.
PROFESSOR FRESCO

180-237B. GENERAL ANALYTICAL CHEMISTRY LABORATORY II. (1 credit; 3 hours; *Prerequisites:* Chem 110A and 120B or equivalents.) Laboratory portion of an individualized program in analytical chemistry. Laboratory experiments to be selected by student and his adviser.
PROFESSOR FRESCO

180-247A. GENERAL ANALYTICAL CHEMISTRY LABORATORY III. (2 credits; 6 hours; *Prerequisites:* Chem. 110A and 120B or equivalents.) Laboratory portion of an individualized program in analytical chemistry. Laboratory experiments to be selected by student and his adviser.
PROFESSOR FRESCO

180-253B. ADVANCED CHEMICAL THERMODYNAMICS. (3 credits; 2 hours; *Prerequisite:* Chem. 213A, B or equivalent.) For Honours and Major Chemistry Students. Thermodynamics of non-electrolyte solutions: partial molar volumes and enthalpies; chemical potentials; regular solution theory; equilibrium between solution and vapour phase; standard states, activities, activity coefficients; phase rule; phase diagrams. Electrolyte solutions; conductivity of solutions; electrode processes; transport numbers; thermodynamics of electrolyte solutions; electromotive force of cells.
PROFESSOR PATTERSON

180-257D. INTRODUCTORY ANALYTICAL CHEMISTRY. (4 credits; 1 lecture, 4 hours laboratory and 1 homework tutorial; *Prerequisites:* Chem. 110A and 120B or equivalents.) For Honours and Major Chemistry Students. A rigorous survey of analytical chemistry including theory and practice of representative gravimetric, volumetric and instrumental methods.
PROFESSOR FRESCO

180-267B. GENERAL ANALYTICAL CHEMISTRY LABORATORY IV. (2 credits; 6 hours; *Prerequisites:* Chem. 110A and 120B or equivalents.) Laboratory portion of an individualized program in analytical chemistry. Laboratory experiments to be selcted by student and his adviser.
PROFESSOR FRESCO

180-273A. CHEMICAL KINETICS. (1 credit; 1 lecture; *Prerequisite:* Chem. 204A or Chem. 213A, B or equivalent.) For Honours and Major Chemistry students. Other students with permission of the lecturer. Order, molecularity, reaction mechanisms, first, second and third order rate constants. Determination of order, effect of temperature on rate, activated state theory. Collision theory. Reactions in solution, homogeneous catalysis. Reaction at surfaces, heterogeneous catalysis, poisoning.
PROFESSOR GROSSER

180-281A. CHEMISTRY OF THE MAIN GROUP ELEMENTS. (3 credits; 3 lectures; *Prerequisites:* Chemistry 110A and 120B or equivalents.) For Honours and Major Chemistry Students. Current theories of atomic structure, chemical bonding and stereochemistry are reviewed and then applied in a systematic survey of the main group elements and

their compounds, with emphasis on trends in physical and chemical properties, molecular and ionic geometries, and mechanisms of reactions.
PROFESSOR ONYSZCHUK

180-301B. MODERN INORGANIC CHEMISTRY II. (3 credits; 3 lectures; *Prerequisites:* Chem. 110A and 120B or equivalent courses.) Modern concepts of metallic bonding and metallic crystals will be reviewed and extended to include descriptions of crystal field theory and molecular orbital theory of coordination compounds. The chemistry of transition metal coordination compounds will be treated in some detail from the viewpoint of structural, chemical, and mechanistic behaviour. PROFESSOR BUTLER

180-302A. BIO-ORGANIC CHEMISTRY. (3 credits; 3 lectures; *Prerequisites:* Chem. 212A and Chem. 222A, B.) Application of the concepts of organic chemistry to selected biological systems. PROFESSOR BELLEAU

180-307B. THE ANALYTICAL CHEMISTRY OF POLLUTANTS. (2 credits; 2 lectures; *Prerequisites:* One course in analytical chemistry and one in physical chemistry.) Description of current analytical practices in air and water pollution; critical evaluation of the reliability of the methods, with particular emphasis on interfering substances; rudiments of automated instrumentation; toxicological analysis as it relates to pollution.
PROFESSORS CAVE AND FRESCO

180-311A. AN INTRODUCTION TO RADIOCHEMISTRY. (3 credits; 3 lectures; *Prerequisites:* Chemistry 110A and 120B or equivalents.) The basic concepts of nuclear chemistry will be described mainly in a qualitative way. Such topics as forces within nuclei, theories of nuclear structure, radioactive decay, nuclear reactions and fission, particle accelerators and reactors, radiocarbon dating, and tracer technique will be treated. PROFESSOR YAFFE

180-313A. INTERMEDIATE PHYSICAL CHEMISTRY I. (3 credits; 3 lectures; *Prerequisite:* Chem. 223A, B or Chem. 214B.) A survey course in physical chemistry beyond the introductory level. PROFESSOR ———

180-323B. INTERMEDIATE PHYSICAL CHEMISTRY II. (3 credits; 3 lectures; *Prerequisite:* Chem. 223A, B or Chem. 214A.) A survey course in physical chemistry with a special emphasis on spectroscopy. PROFESSOR ———

180-331A. INORGANIC CHEMISTRY OF THE SOLID STATE. (3 credits; 3 lectures; *Prerequisites:* Chem. 110A and 120B or equivalents.) Primarily, but not exclusively, for students in the Faculty of Engineering. Electronic structure and properties of the elements in relation to the Periodic Table. The Solid state: structure, bonding, magnetic properties of metals and alloys. Descriptive chemistry of the metals. PROFESSOR HOGAN

180-352A. STRUCTURAL ORGANIC CHEMISTRY. (3 credits; 3 lectures; *Prerequisites:* Chem. 212A and Chem. 222A, B.) For Honours and Major Chemistry Students. Modern methods of structure determination, chemical and spectroscopic techniques; stereochemistry. PROFESSOR JUST

180-353A. SURFACE CHEMISTRY. (1 credit; 1 lecture; *Prerequisites:* Chem. 253B and Chem. 273A.) For Honours and Major Chemistry Students. The nature of surfaces. The thermodynamics of surfaces. The effect of temperature and pressure on surface energies. The wetting of solids. Binary liquid systems and the surface excess. Physi- and chemisorption of vapours on solids. PROFESSOR ———

180-356A. INTRODUCTORY QUANTUM CHEMISTRY. (2 credits; 2 lectures; *Prerequisites:* Chem. 253B and Chem. 273A.) For Honours and Major Chemistry Students. A semi-mathematical course dealing with the development of the quantum theory of chemistry. Commences at the foundations of atomic theory, the electron in a constant potential, the hydrogen atom and the many electron atom and then covers the wave functions of many electron systems, angular momentum and the molecular orbital and valence bond theories of chemical structures and properties. PROFESSOR WHITEHEAD

180-362A, B. ADVANCED ORGANIC LABORATORY. (2 credits; 4 hours; *Corequisite:* Chem. 352A or Chem. 372B.) An advanced laboratory of experiments related to the theoretical principles, synthetic methods and instrumental techniques of modern organic chemistry. The laboratory uses a modular format of self-paced and self-guided instruction. A program of modules is selected in consultation with the instructor.
PROFESSOR JUST AND MR. FINKENBINE

180-363D. PHYSICAL CHEMISTRY LABORATORY. (4 credits; 3 hours; *Prerequisites:* Chem. 253B and Chem. 273A.) For Honours and Major Chemistry Students. Selected experiments to illustrate the application of physical chemical principles of real systems.
PROFESSOR WINKLER AND DR. BROWN

180-372B. SYNTHETIC ORGANIC CHEMISTRY. (3 credits; 3 lectures; *Prerequisites:* Chem. 212A and Chem. 222A, B.) For Honours and Major Chemistry Students. Synthetic methods in organic chemistry. PROFESSOR JUST

180-373B. MOLECULAR SPECTROSCOPY. (2 credits; 2 lectures; *Prerequisite:* 180-356A.) For Honours and Major Chemistry Students. A general survey of the principles of molecular spectroscopy, including electronic, vibrational, and rotational spectroscopy, nuclear and electron spin resonance and Mössbauer effect. PROFESSOR GILSON

180-381A. CHEMISTRY OF THE TRANSITION ELEMENTS. (3 credits; 3 lectures; *Prerequisite:* Chem. 281A.) For Honours and Major Chemistry Students. The history of transition chemistry, coordination numbers and geometry, nomenclature and symmetry. Crystal field theory will be described and applied to problems in spectroscopy, magnetochemistry, thermodynamics and kinetics. Molecular orbital theory is applied to carbonyl and organometallic compounds. PROFESSOR ————

180-383B. INTRODUCTORY STATISTICAL MECHANICS. (1 credit; 1 lecture; *Prerequisite:* Chem. 356A; *Corequisite:* Chem. 373B.) For Honours and Major Chemistry Students. Fundamental assumptions of the statistical method, Maxwell-Boltzmann distribution law. Ideal monatomic, diatomic and polyatomic gases. PROFESSOR EU

180-387D. ANALYTICAL CHEMISTRY. (4 credits; 1 lecture and 3 hours laboratory; *Prerequisites:* Chem. 257D and Chem. 253B.) For Honours and Major Chemistry Students. A rigorous treatment of the theory underlying analytical processes; application of selected techniques, followed by an original project. PROFESSOR CAVE

180-392A, B. INTEGRATED INORGANIC/ORGANIC LABORATORY. (3 credits; 8 hours; *Prerequisite:* Chem. 352A; *Corequisites:* Chem. 381B and Chem. 372B.) An advanced laboratory for Honours and Major Chemistry Students. The laboratory uses a modular format of self-paced and self-guided instruction. A program of modules is selected in consultation with the laboratory staff. The experimental modules consist of projects related to the theoretical principles, synthetic techniques and instrumental methods used in modern organic, inorganic and organometallic chemistry.
PROFESSORS BUTLER, ONYSZCHUK AND MR. FINKENBINE

180-402A. ADVANCED BIO-ORGANIC CHEMISTRY. (3 credits; 2 hours lecture, 1 hour seminar per week.) The application of advanced concepts of organic and physical chemistry to biological systems. The properties of aminoacids, peptides, proteins, enzymes, nucleosides, etc., will be discussed and their relationship to biochemical reactions, the origins of life, co-enzymes, template syntheses, neurochemistry, etc.
PROFESSOR BELLEAU

180-404B. BIOPHYSICAL CHEMISTRY. (3 credits; 3 lectures; *Prerequisites:* Chem. 204A and 214B or 213A, B and 223A, B.) Molecular weight determination, hydrodynamic and spectroscopic properties of biopolymers. The structure and dynamics of biopolymers and biological systems. PROFESSORS GALLEY AND MEIGHEN (Biochemistry)

180-447A. INSTRUMENTAL ANALYSIS. (3 credits; 2 lectures; 3 hours laboratory.) For Honours Students in Biochemistry only. A survey of instrumental methods of analysis.
PROFESSOR CAVE AND COLLEAGUES

180-452A. PHYSICAL ORGANIC CHEMISTRY. (3 credits; *Prerequisite:* Chem. 352A, B.) Intended primarily for Honours Chemistry Students. The correlation of theory with physical measurements on organic systems; an introduction to photochemistry; solvent and substituent effects on organic reaction rates, etc.; reaction mechanisms.
PROFESSOR EDWARD

180-455B. INTRODUCTORY POLYMER CHEMISTRY. (3 credits; *Prerequisites:* Chem. 213A, B, 223A, B, 273A.) For Honours and Major students. A survey course on the structure of polymers, kinetics and mechanisms of polymer synthesis; molecular weight distributions; polymer configurations and the thermodynamics of polymer solutions; rubber, elasticity, osmometry and viscosity. PROFESSOR ST. PIERRE

180-457B. INSTRUMENTAL METHODS OF ANALYSIS. (3 credits; 3 hours laboratory.) For Honours students. Other students with permission of the lecturer. Mass spectrometry; gas chromatography; NMR-ESR spectroscopy; infrared spectroscopy; X-ray diffraction and fluorescence spectrometry; ultracentrifugation; electrophoresis; miscroscopy; activation analysis, polarography. PROFESSOR CAVE AND COLLEAGUES

180-458A. RADIOCHEMISTRY. (3 credits.) For Honours students in Chemistry and Biochemistry, Chemistry Majors and other Honours students with permission of the lecturer. Fundamentals of radiochemistry, radiotracer techniques and applications.
PROFESSOR YAFFE

180-475A. CHEMICAL KINETICS. (3 credits; 3 lectures; *Prerequisite:* Chemistry core.) Kinetic laws, measurement of reaction rates, transition state and collision theory, elementary gas phase reactions. Elementary reactions in solution, reaction mechanisms in solution, reactions on surfaces and in solid state. Heterogeneous catalysis. Complex reactions, homogeneous reactions.
PROFESSOR GROSSER

180-476B. QUANTUM CHEMISTRY. (3 credits; 3 lectures; *Prerequisite:* Chemistry core.) A semi-mathematical course on the development of the quantum theory of chemistry. Commences at the foundations of atomic theory, the electron in a constant potential, the hydrogen atom and the many electron atoms and then covers the wave functions of many electron systems, angular momentum and the molecular orbital and valence bond theories.
PROFESSOR WHITEHEAD

180-477A. ELECTROANALYTICAL CHEMISTRY. (3 credits; 2 lectures, 3 hours laboratory; *Prerequisite:* Chem. 387D.) For Honours Chemistry students. Other students with permission of the lecturer. Mass-transfer processes; theory of electrochemical processes in analytical chemistry; determination of the composition and stabilities of organic and inorganic species in aqueous and nonaqueous solvents.
PROFESSORS CAVE AND FRESCO

180-480A, B. FINAL YEAR RESEARCH PROJECT. (3 credits; Registration by departmental permission only.) A course designed to give Honours students an optional foretaste of research experience. The student will be assigned a project supervisor and a research project at the beginning of the session. The project will consist of a literature survey, experimental work, a written research report and an oral examination.
STAFF

180-481A, B. MODERN TOPICS IN INORGANIC CHEMISTRY. (3 credits; *Prerequisites:* Chem. 281A and 381B.) Chemistry Honours students only. An introduction to areas of current interest in inorganic chemistry. After several lectures given by staff members, each student will lead a seminar on a mutually agreed upon topic selected at the beginning of the course.
PROFESSORS BUTLER, HOGAN AND ONYSZCHUK

180-482A. ADVANCED ORGANIC CHEMISTRY. (3 credits; *Prerequisite:* Chem. 352A, B.) Intended primarily for Honours Chemistry students. Synthetic methods in organic chemistry.
PROFESSOR JUST

180-485A. SURFACE AND COLLOID CHEMISTRY. (3 credits; *Prerequisite:* Chem. 353A.) A topical course on the physical chemistry of phase boundaries. Topics covered vary from year to year and generally include: properties of surfaces; monolayers; colloidal dispersions; spreading and wetting phenomena; absorption; translational and rotary Brownian motion.
PROFESSOR MASON

180-487A. SELECTED TOPICS IN MODERN ANALYTICAL CHEMISTRY. (3 credits; *Prerequisite:* Chem. 387D.) Honours Chemistry students. Other students with permission of the lecturer. Current theories of aqueous and nonaqueous solutions, with application to analytical chemistry; recent advances in analytical techniques (topics covered vary from year to year and may include chromatography; applications of kinetics, solvent extraction and thermal analysis) with emphasis on their theoretical basis.
PROFESSORS FRESCO AND CAVE

180-490A, B. FINAL YEAR RESEARCH PROJECT. (6 credits; 16 hours laboratory; Registration by departmental permission only.) For description, see 180-480A, B.

180-493A. INTRODUCTION TO STATISTICAL THERMODYNAMICS. (2 credits; 2 lectures; *Prerequisite:* Chemistry core.) Fundamental principles of statistical mechanics; microcanonical and canonical ensembles; thermodynamic functions of ideal gases; theories of solids, chemical equilibria; absolute reaction rate theory; Van der Waals gases.
PROFESSOR EU

180-497B. ANALYTICAL SPECTROSCOPY. (3 credits; 2 lectures and 3 hours laboratory; *Prerequisite:* Chem. 387D.) For Honours Chemistry students. Other students with permission of the lecturer. Spectrophotometric measurements and sources of error. Flame photometry, including emission and atomic absorption spectral determination of the composition and stabilities of organic and inorganic species in aqueous and nonaqueous solvents; Tanabe-Sugano diagrams.
PROFESSORS FRESCO AND CAVE

COMPUTER SCIENCE (308)

Burnside Hall. First floor.
Departmental office (undergraduate activities), Room 214.
Telephone: 392-5803.

Computer Science is a subject with both practical and theoretical importance. It has strong links with many other disciplines, particularly with Mathematics in the field of numerical analysis, with electrical engineering in the field of computer hardware and with management in the field of large scale data processing systems.

The courses offered are designed to satisfy the different needs of students from those who will be involved in computer applications in their own area of specialization to those who wish to specialize in Computer Science perhaps with a view to proceeding to Graduate School. Some graduate courses in Computer Science are available to suitably qualified senior undergraduates. For further information, see the Faculty of Graduate Studies and Research Calendar.

McGill possesses two powerful computers, providing both a batch processing and time sharing service to the University. Every effort is made to give a student as much practical experience with the computing facilities as possible.

Although the School of Computer Science does not offer any programs in the Faculty of Science, the Mathematics Department has a major program with a Computer Science option in which Computer Science courses form an integral part. Special programs involving Computer Science are also available in the Faculty of Management and in the Department of Electrical Engineering. For further details, the Calendars of the Faculties of Management and Engineering should be consulted.

Course Descriptions

308-100A, B. INTRODUCTION TO COMPUTING*. (3 credits; No scheduled lectures; No prerequisites.) A beginning course in computing designed to introduce general concepts in computing as well as a basic working knowledge of the programming language FORTRAN. The course consists of modules, containing video tape lectures, module booklets, interactive terminal sessions and assignments to be run on the computer. The student learns at his own pace. The only formal lecture is held the first day of a new semester. This course is intended for Arts students. STAFF

308-200A, B. INTRODUCTION TO COMPUTER SCIENCE*. (3 credits; 2 hours; *Prerequisite:* 189-202A, B or equivalent. Knowledge of linear algebra is desirable.) Number systems; data representation; algorithm design; FORTRAN; computer methods including searching, sorting, solution of equations, numerical integration and matrix manipulation. This course is designed for students in Mathematics and the Physical Sciences. STAFF

308-210A, B. COMPUTER STRUCTURE AND ASSEMBLY LANGUAGE PROGRAMMING. (3 credits; 2 hours; *Prerequisite:* 308-200A, B.) Computer structure, machine language, instruction execution, addressing techniques, and digital representation of data. Symbolic coding and assembly systems, macro definition, program segmentation and linkage. PROFESSOR RATZER

308-220A, B. DIGITAL COMPUTING FOR STATISTICAL ANALYSIS*. (3 credits; 3 hours; *Prerequisite:* An introductory course in Statistics, e.g. 204-204A, B.) Characteristics of a higher level programming language (FORTRAN). Methods for computer solution of statistical problems. Intended for students in the Biological and Social Sciences. MR. PAUL

308-230A. COMPUTERS IN DATA PROCESSING. (3 credits; 2 hours; *Prerequisite:* 308-200A, B or equivalent programming experience.) Uses of computers for data processing; COBOL; job control language; system utility programs including sort/merge; file processing; comparison of languages in business-oriented applications. MR. PAUL

***NOTE:** Credit can be obtained for only one of 308-100, -200, -220. Continuation to other Computer Science courses is only possible from 308-200.

308-300A, B. PROGRAMMING LANGUAGES. (3 credits; 2 hours; *Prerequisite:* 308-210A, B.) A study of scientific programming languages including PL/1, APL and GPSS. Introduction to theory of compilers and interpreters. Computer solution of non-numerical problems.
PROFESSOR THORPE

308-310B. COMPUTER SYSTEMS AND ORGANIZATION. (3 credits; 2 hours; *Prerequisite:* 308-300A, B.) Control and scheduling of large information processing systems. Hardware concepts — CPU, memory, input/output, interrupt, external storage media, dynamic address translation. Operating system software — resource allocation, dispatching, processors, access methods, job control languages. Batch processing, multiprogramming, multiprocessing, time sharing.
PROFESSOR VALENTI

308-315A. INFORMATION STRUCTURES. (3 credits; 2 hours; *Prerequisite:* 308-210A, B.) This course introduces the concepts of data storage and develops competence in data manipulation. The student is expected to write and run his own programs, mainly in FORTRAN. The course discusses the basic types of data structures, their theoretical properties and some of their applications. Contents: storage of arrays, applications to special matrices and scientific computation; queues and stacks, applications to compiler writing; sorting and searching; introduction to list processing and symbolic manipulation.
PROFESSOR MERRETT

308-320B. FILES AND DATA BASES. (3 credits; 2 hours; *Prerequisites:* 308-230A, 308-315A.) PL/1 language essentials; data sets, files and job control language; sequential files; printing, sorting, updating, indexed sequential files; direct files; files of structured data; data bases.
PROFESSOR MERRETT

CRYSTALLOGRAPHY (186)*

Frank Dawson Adams Building, Room 337, telephone 392-5840.

Most solids, from the minerals of the earth and the moon to the proteins and other macromolecular biological materials, have a structure that is characterized by a regular triperiodic arrangement of atoms and molecules; they are crystalline. Crystallography concerns itself with the determination of these interatomic arrangements and their imperfections as well as with the study of the resulting chemical and physical properties of crystalline matter.

Crystallographers find their problems in fields as diverse as mineralogy, crystal physics, molecular biology, solid state chemistry, materials science, group theory, etc. The student's preparation should therefore be as sound and broad as possible in the fundamentals of science. In the Honours and Major programs, which are administered by the Department of Geological Sciences, a student takes more chemistry than the physics student, and more physics and mathematics than the chemistry student. In addition, the student at the undergraduate level will be taught morphological and structural crystallography, symmetry, crystal chemistry, the techniques of X-ray diffraction, and optical crystallography.

Students successfully completing the Crystallography program may proceed to graduate studies in crystallography, where they may specialize in the physical, the chemical, or the biological aspects of the subject. This training will prepare crystallographers for careers in basic research and teaching or in industry.

Major in Crystallography

First year: Geology 186-210A and -211A; Chemistry 180-213A, B or -212A; Mathematics 189-222A, B, -223A; Physics 198-219A and -251A or -231A, B. (9 additional credits)

Second year: Geology 186-213A; Mathematics 189-314A, B; Chemistry 180-281A; Physics 198-346D; Computing Science 308-200A. (12 additional credits)

Third year: Geology 186-503D; Geology 504B; Mathematics 189-315A, B; Physics 198-434B; -438B; Chemistry 180-381B. (10 additional credits)

*Crystallography is a part of the Department of Geological Sciences.

Honours in Crystallography

Honours students will take the same courses required for Major students and will be given 18 additional course requirements, in closely related disciplines, after consultation with their adviser. One additional requirement will be the writing up a research project carried out in 186-503D. They must maintain a 2.8 minimum GPA.

Course Descriptions

186-211A. CRYSTALLOGRAPHY. (3 credits; 2 hours lectures, 3 hours laboratory.) Lattices, crystal systems, point groups, space groups, crystal morphology (stereographic projection, Wulff net), twinning, X-ray diffraction applied to powders and single crystals (rotation, Weissenberg, precession), Fourier summations (electron density and Patterson), approaches to crystal-structure determination. PROFESSOR DONNAY

186-213A. CRYSTAL CHEMISTRY. (2 credits; 2 hours lectures; *Prerequisite:* Geology 186-211A.) Discussion of crystal structures of important mineral groups, especially oxides, sulphides and silicates. Solid solution. Relation of structure to morphology and to chemical and physical properties of crystalline matter. PROFESSOR DONNAY

186-502B. CRYSTAL-STRUCTURE ANALYSIS. (2 credits; 2 lectures.) Elements of crystallography and diffraction physics basic to structure determination. Choice of crystal; principles underlying photographic and counter methods of collecting intensity-data. Data reduction. F^2 synthesis. The phase problem. Trial and error methods, heavy-atom techniques, direct methods. Electron density calculation. Refinement of structure. PROFESSOR DONNAY

186-503D. CRYSTAL-STRUCTURE DETERMINATION. (6 credits; 6 hours laboratory; *Prerequisite:* 186-211A, or 502B.) Techniques of structure determination applied to a research problem. PROFESSOR DONNAY

186-504B. CRYSTAL SYMMETRY. (2 credits; 2 lectures.) Derivation of the 32 crystallographic point groups (the geometric crystal classes), 14 translation groups (the Bravais lattices), 73 arithmetic crystal classes (isomorphic with symmorphic space groups) and 230 space groups. Atomic site symmetry vs. crystal-structure symmetry. Effect of solid solutions on crystal symmetry. Symmetry information to be gained from X-ray diffraction: powder diagrams vs. single-crystal patterns. Generalized symmetry applied to twinning and magnetic structures. PROFESSOR DONNAY

GEOGRAPHY (183)

Burnside Hall, Dept. Chairman, Room 510, Telephone: 392-5489.

General inquiries at Departmental Office, Room 513, Telephone: 392-5700.

Geography is a discipline which bridges the gap between Science and Arts subjects at university. Its central theme is the study of man and the processes which affect him in his physical and social environments. Both a specialist and an interdisciplinary approach are open to students, who, while taking several courses in common, may proceed towards either the B.Sc. or B.A. degrees.

The challenges facing students in geography and the areas for investigation are wide ranging. Current projects include:

A mathematical analysis of air travel in Canada.
Land use, soils and water quality in Quebec.
Weather and human comfort in Montreal.
Social and economic utilization of Arctic resources.
Location of health and welfare facilities for urban planning.
Tourism and recreational land use in developed and developing countries.

Graduates have found career opportunities in accordance with their level of specialization and interests. Many segments of industry, and all levels of education and government employ geographically trained students. The Federal Departments of Environment, Energy, Mines and Resources, Urban Affairs, External

Affairs, Regional Economic Expansion, and those dealing with Parks, Native Peoples and Land Use have areas where geographers may find applications for their skills. Some jobs are in the remote or wilderness areas of various countries, but others are in the offices and laboratories of large urban centres and in quiet rural countrysides. Within these careers, specialization may be very diverse, and include climatology, regional and city planning, industrial location, air photo interpretation or map analysis, and cultural and biological problems in regional development.

The interaction of man with various aspects of his environment is seen in the emphasis given to this interaction throughout many of the courses and programs offered in the department. Some courses, however, focus on a range of local, regional and world problems such as air and water quality or food/population and economic development relationships. In others the emphasis is on the study of physical, economic and cultural processes in a geographical framework. Other courses centre upon methods of geographical analysis.

Students in Geography should focus their studies around groups of geography courses which are informally organized into sequences such as the following:

Introductory	183-111D, -203D
Urban	183-216A, -217B, -314A, -316A, -331A, -346B, -412B
Economic	183-301D, -313A, -315B, -319A, -411A
Cultural-Ecological	183-214A, -215B, -300B, -304A, -317A, -414A, -481A
Geomorphology	183-271A, -272B, -325A, -453B
Hydrology	183-322A, -323B -327B
Climatology	183-321A, -324B, -422A, -423B
Biogeography and Soils	183-302D, -305A, -307B, -451D
Regional	183-303D, -310A, -326B, -402D
Technical (Cartography, Air Photo, Statistical Analysis, Research Methods)	183-201A, -202B, -306A, -308B, -333A, -351A, -482D, -484D

The recommended combinations which lead to these and other interests are outlined in the patterns of courses within the 1) Faculty Program, 2) Major in Geography, and 3) Honours in Geography, which lead to either the B.A. or to the B.Sc. degree.

Faculty Programs

For details see Faculty Programs, page 185.

There are no specific prerequisites to these faculty programs; courses that should be taken in U1 are underlined. Any deficiencies in background should be taken concurrently as one of the optional selections.

Advisers: Professor R. Wilson, Room 627, Burnside Hall, Telephone: 392-8223
Professor J. Parry, Room 322, Burnside Hall, Telephone: 392-5496

Major in Geography

Students are required to take a minimum of 42 credits in Geography and 12 credits in other approved courses in Geology, Meteorology, or Biology.
Adviser: Professor R. N. Drummond, Room 310, Burnside Hall, 392-5497.
First year: Geography 183-201A, -202B, -203D, and 6 credits in Arts Geography.
Second year: Geography 183-271A and -272B, -351A.
Third year: Geography 183-321A, -451D and -306A or -308B.

Honours in Geography

Adviser: Professor R. N. Drummond, Room 310, Burnside Hall, 392-5497.

All Honours students take a basic group of courses in Geography. In addition they must choose an area of specialization. At present these are offered in Biogeography, Climatology, Geomorphology, and Regional Environments.

First year: Geography 183-201A, -202B, -203D, 6 credits in Arts Geography and 12 credits in non-geography courses chosen for their contribution to the topic of specialization.

Second and Third year: Geography 183-271A, -272B, -306A, or -308B, -321A, -351A, -481A, -451D, -484D, 18 credits from the area of specialization and 9 additional credits.

Prerequisites

There are no prerequisites in geography for entrance to the Major or Honours B.A. or B.Sc. in Geography. Arts students should include six credits of mathematics in their CEGEP or pre-university programs. Students who have completed college or pre-university geography courses fully equivalent to those at first year university may substitute other approved courses as part of their Major or Honours programs.

Course Descriptions

Science students wishing to continue in Physical Geography who have not taken physical geography or earth sciences or geology at the College level (or equivalent) should enrol in Geography 183-203D.

B.A. students wishing to have an introduction to physical geography are advised that Geography 183-203D is also suitable for their purposes.

183-111D. INTRODUCTION TO GEOGRAPHY. (6 credits; 2 hours and conference.) An introductory course in two parts. Part I — a survey of the world's physical environments regarded especially from the viewpoint of man's occupance of the world. Part II — deals with the human aspects of the major man-environment system, its subsystems — ecosystems, resource systems and culture areas — and with man/land relations wherever they be located. PROFESSORS GARNIER AND HILLS

183-201A. INTRODUCTION TO CARTOGRAPHY AND AIR-PHOTO INTERPRETATION. (3 credits; 1 hour plus laboratory periods.) The basic principles and technical skills used in cartography and the interpretation of air photos for the presentation and analysis of spatially distributed data. Thematic maps and the communication of ideas in map form. PROFESSOR DRUMMOND

183-202B. INTRODUCTION TO GEOGRAPHICAL ANALYSIS. (3 credits; 2 hours and conference.) An introduction to the application of statistical techniques to the description, analysis and presentation of spatially distributed data. PROFESSOR MASSAM

183-203D. AN INTRODUCTION TO ENVIRONMENTAL STUDIES. (6 credits; 2 hours and conference.) Geographical problems and themes in environmental studies; interactions between components of atmosphere, vegetation, fauna, soils, and terrain: experimental design, sampling methods, data quality, and elementary statistical methods for the analysis and presentation of field results. PROFESSORS MOORE AND DRAKE

183-214A. CULTURAL GEOGRAPHY I. (3 credits; 2 hours and conference; *Prerequisite:* A first year course in Geography or Earth Science or -203D.) Relationships between environment, technology and society: the concept of a man-environment (or ecological) system. Identification of the principal stages and processes of cultural evolution. PROFESSOR WADDELL

183-215B. CULTURAL GEOGRAPHY II. (3 credits. *Prerequisite:* Geography -214A.) Urban cultural phenomena in the "Third World". Topics for 1974-1975: urban demography of developing countries, migration, polyethnic cities, their geopolitics and communications systems. PROFESSOR OLSON

183-216A. GEOGRAPHY OF LOCATION. (3 credits; 2 hours and conference.) Introduction to the geographic organization of economies. Examination of the basic theoretical principles that explain the spatial organization of agriculture, industry and cities.
PROFESSORS EWING AND GILMOUR

183-217B. INTRODUCTION TO URBAN GEOGRAPHY. (3 credits; 3 hours; *Prerequisite:* An introductory geography course at the college level or equivalent.) The internal spatial structure of the city and related processes are analysed in terms of land uses, population density, social and economic characteristics of the population, travel patterns and household migration. Trends in urbanisation and urban growth in Quebec and Ontario are examined.
PROFESSORS EWING AND OLSON

183-271A. PHYSICAL GEOGRAPHY I. (3 credits; 2 hours and conference/laboratory; *Prerequisite:* A course in physical geography or equivalent.) A systematic treatment of the geomorphology of areas of folding, faulting, intrusion and vulcanism and their response to weathering and erosion.
PROFESSOR PARRY

183-272B. PHYSICAL GEOGRAPHY II. (3 credits; 2 hours and conference/laboratory; *Prerequisite:* A course in physical geography or equivalent.) A systematic treatment of the geomorphology of areas dominated by gradational processes: glacial and periglacial, fluvial and mass-wasting, coastal and marine, aeolian and arid. PROFESSOR PARRY

183-300B. GEOGRAPHICAL ASPECTS OF CULTURAL ADAPTATION. (3 credits; 2 hours and conference; *Prerequisite:* Geography 214A or permission of the instructor.) Study of the dynamic processes that structure the relationship between man, culture and environment. The role of energy and information for adaptive processes will be analysed within the context of urban and non-urban societies. Specific attention will focus on the ecological aspects of human nutrition and environmental health. PROFESSOR KEMP

183-301D. GEOGRAPHY OF CANADA. (6 credits; 2 hours and conference; *Prerequisite:* Geography 214A or 216A. Geography E10A and Geography E12B and 203D will be accepted in the case of Science students continuing in Geography.) Evolution of Canadian economic regionalism. The Canadian growth experience and spatial economic structure. The geographic significance of agriculture, urbanism and industrialization, and their transformation of the primary landscape. Regional disparities and contemporary urban problems.
PROFESSOR SLACK

183-302D. ENVIRONMENT: ECOSYSTEMS AND MAN. (6 credits; 3 hours; *Prerequisite:* Geography 203D or Biology E10D or permission of instructor. Field work is emphasized.) An ecological analysis of the physical and biotic components of the environment, with emphasis on the scientific, technological, institutional and other aspects of environmental degradation and restoration. Practical resource management in collaboration with local government and industry.
PROFESSOR ZIMMERMANN

183-303D. THE SOVIET UNION AND EASTERN EUROPE. (6 credits; *Prerequisite:* Geography 214A or 216A. Geography E10A, E12B and 203D will be accepted in the case of Science students continuing in Geography; Not given in 1974-75.) Position; general physical characteristics. The territorial development of Russia. Ethnic groups., Migration and settlement. Population distribution. Land use, agriculture, mining, and other industries including recent developments. Social significance of economic life. Urbanization. The administrative structure of the Soviet State and of Eastern European nations.
PROFESSOR LLOYD

183-304A. HUMID TROPICAL ENVIRONMENT. (3 credits; 2 hours and conference; *Prerequisite:* Geography 214A, Geography 203D is also recommended. Geography 304A will be offered every second year; Not given in 1974-75.) A consideration of the geographically significant cultural, physical and biological characteristics of the humid tropics. Major ecosystems of the region will be delimited and selected rain forest and savanna ecosystems will be analysed in depth.
PROFESSOR HILLS

183-305A. THE GEOGRAPHY OF SOILS. (3 credits; 2 hours and laboratory; *Prerequisite:* An introductory course in physical geography or geology or biology.) Discussion of main properties of soils; principles of soil formation and classification; major soil types of the world; soil survey techniques.
PROFESSOR MOORE

183-306A. ADVANCED CARTOGRAPHY. (3 credits; 1 hour and laboratory periods; *Prerequisite:* Geography 201A, or permission of instructor.) Analysis and interpretation of thematic and topographic maps. Their application to selected problems in physical and cultural geography, design and compilation of maps for geographic communication, map reproduction and computer mapping.
PROFESSOR DRUMMOND

183-307B. SOILS AND LAND UTILIZATION. (3 credits; 2 hours and conference/laboratory; *Prerequisite:* Geography 305A or permission of instructor.) Principles of land utilization and crop growth; case studies of the influence of soils on land use in selected environments. PROFESSOR MOORE

183-308B. AIR PHOTO INTERPRETATION. (3 credits; 1 hour and laboratory periods; *Prerequisite:* Geography 201A, or permission of instructor.) The principles of air photo interpretation and remote sensing of the environment, applications to geomorphology, land use and inventory of natural resources. Elementary photogrammetry and orthophotomapping. PROFESSOR DRUMMOND

183-310A. GEOGRAPHY OF THE CARIBBEAN. (3 credits; 2 hours and conference.) The nature, perception and management of Caribbean resources will be described and analysed from the point of view of historical factors, cultural diversity, and political organization. Models of economic development and attempts at regional organization will be considered. PROFESSOR HILLS AND STAFF

183-312B. THE GEOGRAPHY OF CHINA. (3 credits; 2 hours and conference.) A general overview of the Chinese landscape. Special topics will focus on the distribution and growth of population, the remodelling of agricultural organization since 1949, changes in the industrial sector and spatial pattern of industry, and transportation networks. PROFESSOR VEILLEUX

183-313A. GEOGRAPHY OF RECREATION. (3 credits; *Prerequisite:* Introductory course in either human or physical geography or permission of instructor.) The development of the phenomenon of modern recreation and its geographic characteristics. Outdoor recreation in different forms, with special attention to changing land requirements both on urban and regional scale levels, including the development of park systems; structure and distribution of the recreation service industry and selected institutional recreational systems. Emphasis will be given to the greater Montreal region through field work-oriented term assignments. PROFESSOR LUNDGREN

183-314A. INTERMEDIATE URBAN GEOGRAPHY. (3 credits; *Prerequisite:* Geography 183-216A or 217B or permission of instructor.) A review of selected topics relating to urban policy making, social justice; provision of public goods: public finance: infrastructure planning and impact studies. An examination of spatial interaction analysis, including gravity and space preference models of passenger and commodity flows, shopping trips and migration flows; planning applications. An introduction to urban evironmental perception. PROFESSORS MASSAM AND EWING

183-315B. GEOGRAPHY OF TOURISM. (3 credits; *Prerequisite:* Introductory course in either human or physical geography or permission of instructor.) Geographic characteristics of tourist travelling, including changing tourist attractions, touristic mobility, tourist travel components and, the modern integrated tourist travel system; tourism and regional economic development, especially in Third World economies. PROFESSOR LUNDGREN

183-316A. CONTEMPORARY POLITICAL GEOGRAPHY. (3 credits; 2 hours and conference; *Prerequisite:* Geography 183-202B or permission of instructor; Not given in 1974-75.) The study of the spatial dimensions of political activities at the local and national levels: the principles of urban government reforms. PROFESSOR MASSAM

183-317B. THEMES IN TROPICAL REGIONAL GEOGRAPHY. (3 credits; *Prerequisite:* Geography 214A.) *MELANESIA.* Several geographic themes are considered in the context of Melanesia: nature of responses to population pressure on resources, regional trading (ancient and modern), cultural constraints in the modernization of the traditional economies, rural-urban migration and urbanization. PROFESSOR BROOKFIELD
NOTE: In subsequent years, other parts of the tropical world, including Tropical Africa and Latin America may be offered.

183-318B. SPATIAL ANALYSIS OF MANUFACTURING. (3 credits; 2 hours and conference; *Prerequisites:* Geography 216A and 217B; Geography 351A is also recommended; or by permission of instructor; Not given in 1974-75.) Special aspects of manufacturing industry. Taxonomic and measurement problems. Models of industrial location (inter- and intra-urban.) Dynamics of spatial redistribution in relation to different levels of economy. The changing role of the factors of location. Methods of industrial distribution analysis. Studying the location decision. The behavioural versus the deterministic approach. PROFESSOR GILMOUR

183-319A. GEOGRAPHY OF ECONOMIC DEVELOPMENT. (3 credits; *Prerequisite:* Geography 214A, 216A or 217B or by permission of instructor.) Analysis of the role of geography in the field of economic development; growth and development theories on

different geographic scale levels; behaviour of selected economic activities in change process; regional economic development in relation to changing resource utilization; development planning.
PROFESSOR LUNDGREN

183-321A. CLIMATIC ENVIRONMENTS. (3 credits; *Prerequisite:* Geography E12B or 203D or Meteorology 210D or intsructor's permission.) Scope of climatology, physical, dynamic and applied. The earth/atmosphere system, radiation and energy balances, governing meteorological processes. Movement and circulation of the atmosphere on a local and global scale. Resulting weather systems.
PROFESSOR GARNIER

183-322A. INTRODUCTION TO HYDROLOGY. (3 credits; 2 hours and laboratory/conference; *Prerequisites:* Geography E10A and E12B or equivalent.) Quantitative, experimental study of the principles governing the movement of water at or near the earth's surface.
PROFESSOR DRAKE

183-323B. SURFACE WATER HYDROLOGY. (3 credits; *Prerequisite:* Geography 322A; Not given in 1974-75.) Spatial and temporal variations of the quantity and quality of surface waters as they are affected by geology, geomorphology, and land use.
PROFESSOR DRAKE

183-324B. BIOCLIMATOLOGY. (3 credits; *Prerequisite:* Geography E12B or 203D or Meteorology 210D or permission of instructor.) Climatic classification and weather systems. Influence of climate on plants, animals, and man. Water balance and its application in agriculture and water resource analysis. Principles of physiological climatology; calculation of wind chill, effective temperature, and comfort-indices. Application of physiological climatology to human affairs, e.g. health, urban planning, and house design.
PROFESSOR GARNIER

183-325A. PHYSICAL GEOGRAPHY OF QUEBEC. (3 credits.) An account of the development of the present natural environment of Quebec with particular attention to changes following the retreat of the Laurentide Ice Sheet. Discussion of contemporary processes, resources and problems will provide a background for Geography 326A. Field Work.
PROFESSOR CARSON

183-326A. HUMAN GEOGRAPHY OF QUEBEC. (3 credits; 2 hours and conference.) A geographical interpretation of selected social, economic and political problems of contemporary Quebec; ethnicity, demography, urbanization, regional disparities, economic marginality, with the purpose of segregating elements unique to Quebec from the more universal aspects that pervade them.
PROFESSOR WADDELL AND STAFF

183-327B. WATER RESOURCES AND LAND USE. (3 credits; 2 hours and laboratory; *Prerequisite:* Geography 111D or 203D or permission of instructor.) An introduction to the applications of the principles of hydrology to the development and management of water resources: the constraint imposed by natural systems on man's activities in rural and urban environments and the economic costs and benefits of modifying these constraints.
PROFESSOR DRAKE

183-331A. URBAN SOCIAL GEOGRAPHY. (3 credits; *Prerequisite:* Geography 214A or 216A or permission of instructor.) Social space and social time. The reflection of social structure in the spatial organization of the city. Historical perspective on changing personal mobility, life cycle, family structure and work organization. The appropriation and alienation of urban spaces.
PROFESSOR OLSON

183-333A. MONTREAL URBAN FIELD STUDIES. (3 credits; *Prerequisite:* An introductory geography course or permission of instructor.) Encounters with social and physical environments of Montreal. A phenomenology of the city. This course has a modular organization with weekly individual field exploration by class members.
PROFESSOR OLSON

183-336D. INDIGENOUS PEOPLES OF NORTH AMERICA: A HUMAN GEOGRAPHIC AND CULTURAL APPROACH. (6 credits; 2 hours and conference; *Prerequisite:* Geography 214A or permission of instructor.) A survey of North American Indian and Eskimo cultures from ethnographic and ecological perspectives. The areal emphasis of the course will be upon Canadian Eskimo and Indian populations. The evolutionary approach will be utilized in the analysis of data pertaining to ecological adaptation and sociocultural change among selected groups.
PROFESSOR KEMP

183-346B. GEOGRAPHICAL BACKGROUND OF INTERNATIONAL RELATIONS. (3 credits; 2 hours plus conference; *Prerequisite:* A university level geography course and permission of the instructor.) The principles and practice of political geography at the world and international level. Geographical factors and relationships influencing political events and decision making.
PROFESSOR LLOYD

183-351A. GEOGRAPHICAL ANALYSIS AND QUANTITATIVE METHODS. (3 credits; 3 hours; *Prerequisite:* Geography 202B or permission of instructor.) Basic conditional probability theory, urn schemes, occupancy problems, theoretical probability distributions, sampling theory and univariate statistical inference, multiple regression and one- and two-way analysis of variance. PROFESSORS EWING AND HOLLAND

183-402D. REGIONAL GEOGRAPHY OF NORTHERN LANDS. (6 credits; *Prerequisites:* an introductory geography course and one course in regional geography or permission of instructor.) An introduction to the study of lands north of the areas of continuous settlement, including parts of Canada, Greenland, Iceland, Scandinavia, U.S.S.R., Alaska and related seas. A comparative description of their physical characteristics, human and economic resources, territorial sovereignty and future development.
PROFESSORS KEMP AND LLOYD

183-411A. GEOGRAPHY OF INTERNATIONAL TRADE. (3 credits; *Prerequisite:* Geography 216A or permission of instructor; Not given in 1974-75.) Geographic patterns of international trade, regional resource base and trade generation. Trade systems. The foreland-hinterland concept, commodity innovation, geographic diffusion and range.
PROFESSOR LUNDGREN

183-412B. ADVANCED URBAN GEOGRAPHY. (3 credits; 2 hours and conference; *Prerequisites:* Geography 216A and 351A or 352B or permission of instructor.) Strategies for solving location-allocation problems; on planes and networks; static and dynamic models; applications to selected urban problems. The application of computerized algorithms in solving these problems is stressed. PROFESSORS MASSAM AND EWING

183-414A. TROPICAL AGRICULTURAL SYSTEMS. (3 credits; 2 hours and conference; *Prerequisites:* Geography 214A and preferably 215B or by permission of instructor; Not given in 1974-75.) Three major tropical agricultural systems — shifting, permanent and irrigation — are analysed in ecological terms. Attention is focused particularly on the dynamics of such systems — of changes effected in response to demographic growth and economic diversification particularly — using primarily southeast Asian and Melanesian materials. PROFESSOR WADDELL

183-422A. MICROCLIMATOLOGY. I. URBAN CLIMATIC ENVIRONMENTS. (3 credits; *Prerequisite:* Geography E12B or 203D or Meteorology 210D or permission of instructor.) An examination of factors affecting urban climates. Solar radiation in city areas and the effect of the city on energy exchanges. City air pollution and weather elements. Heat load on buildings. Comparative studies of wind chill and air comfort index in downtown and suburban city areas. PROFESSOR WILSON

183-423B. MICROCLIMATOLOGY. II. AGRO- AND HYDRO-CLIMATOLOGY. (3 credits; *Prerequisite:* Geography 321A or Meteorology 310D.) A detailed examination of the process of evapotranspiration and the transfers of heat, carbon dioxide, and momentum near the earth's surface. Methods of measurement based on energy balance, water balance, and turbulent transport theory. Models of potential and actual evapotranspiration, and their use in soil moisture and crop yield predictions. Snow melt models.
PROFESSOR WILSON

183-451D. BIOGEOGRAPHY. (6 credits; *Prerequisite:* Geography 203D or 302D or permission of intructor; for students in continuation or honours biological sciences.) Study of life according to its environmental and spatial relationships with emphasis on plants. The interaction, geographical distribution, domestication and economic utility of biota in the regional setting. PROFESSORS ZIMMERMANN AND HOLLAND

183-453B. APPLIED GEOMORPHOLOGY. (3 credits; 2 hours lecture and laboratory, *Prerequisite:* a previous course in geomorphology or permission of instructor.) An examination of the role of the geomorphologist in the solution of environmental problems, the planning of environmental changes, and the detection and utilization of environmental resources. PROFESSOR CARSON

183-481A. EVOLUTION OF MODERN GEOGRAPHY. (3 credits; For Honours and Joint Honours and Majors students in Geography only.) A review of the historical development of geography as a separate discipline and a systematic analysis of the main branches of modern geography with emphasis on the theoretical and methodological developments during the last fifty years. PROFESSOR BROOKFIELD

183-482D. RESEARCH AND READING COURSE IN HUMAN GEOGRAPHY. (6 credits; For final year B.A. Honours or Joint Honours in Geography only.) An advanced course designed to familiarize the student with contemporary research and writing in the various aspects of human geography. An essay or undergraduate thesis will be required to complete the requirements of this course. STAFF

183-484D. RESEARCH AND READING COURSE IN PHYSICAL GEOGRAPHY. (6 credits; For final year B.Sc. Honours or Joint Honours in Geography only.) An advanced course designed to familiarize the student with contemporary research and writing in the various aspects of physical geography. An essay or undergraduate thesis will be required to complete the requirements of the course.
STAFF

GEOLOGICAL SCIENCES (186)

Frank Dawson Adams Building, Departmental Office Room 238, Telephone 392-5730

Geology is a study of the planet Earth — its composition, structure, behaviour, and history.

Although geologists must have a basic training in mathematics, physics, and chemistry, geology is a science in itself dealing with events which took place millions of years ago and involved masses of continental dimensions. Most geologists start their research in the field, collecting samples, measuring rocks, and determining their properties with portable instruments. In the laboratory they analyse these specimens and interpret their measurements, using the sophisticated tools of modern science. The forces that molded a mountain chain, built a volcano, or drifted the continents apart cannot be duplicated by man, but the geologist can understand these events by analogy with experimental models and laboratory investigations of the compositions and strengths of the rocks of the crust of the earth. Like most sciences geology has its theoretical and practical aspects; geologists are concerned with the origin of our planet and solar system, the evolution of its surface, the nature of its interior, and the atomic structure of its minerals, as well as with the discovery of mineral deposits, the location of dam sites, and the prediction of earthquakes.

Some geologists specialize in the application of physics to understanding the earth's interior (geophysicists), some in investigating the composition of the earth (geochemists), still others in finding metals, oil and coal (economic geologists). Some study the rocks under the sea (marine geologists), some the history of the earth as revealed in its sedimentary rocks and fossils (stratigraphers and paleontologists), and still others study its land-forms and surface materials (geomorphologists).

Entrance to the Major and Honours programs is through the Physical Sciences profile of the Quebec Collegiate curriculum or its equivalent (see page 12). Although students intending to enter these programs are urged to take geology courses available in their academic preparation for coming to McGill, such courses are not essential to entrance to a Geology program. Students at McGill may study geology as part of a Faculty program, in the Major program, or in the Honours programs. The Honours program in Geological Sciences is designed to prepare the student for graduate work and for a career as a professional geologist. It includes electives in the upper years so that students can follow an interest in one branch of the science. Students interested in geophysics should enrol in the Honours program in Solid Earth Geophysics.

Geologists are employed by companies exploring for minerals and fuels, by government agencies such as the Ministère des Richesses Naturelles and the Geological Survey of Canada, in research laboratories and in universities. They work in cities and in Arctic wastelands, in the laboratory and in the office, in the deserts and in the jungles of developing countries. Canada, a country dependent on vast natural resources, requires the geologist's skills for the development of the economy. A world facing crises in the supply of energy-giving fuels and metals will depend increasingly on the geologist for guidance in finding new supplies. Mankind facing progressive deterioration of his environment by its own wastes

requires the expertise of the earth scientist to maintain the quality of life. When man ventures to the other planets of the solar system, he must take with him a fuller understanding of the workings of his home, the earth.

The Honours and Major programs in Geology include the same "core" courses. Students enrolling in the Honours program must have, and maintain a grade point average of 2.8 or second class standing and their electives must be approved by departmental advisers.

FACULTY PROGRAMS

Faculty programs administered in this department include Geomorphology, Marine Geology, and Palaeobiology; for details, see page 185. Students interested in these interdisciplinary fields should consult the departmental office to obtain an adviser.

MAJOR IN GEOLOGICAL SCIENCES

Students must inquire at Room 238, Frank Dawson Adams Building, telephone 392-5730 to be assigned to an adviser.

The following is a typical sequence of courses.

U1. Geology 186-210A, -211A, -233B, -234A, -242A, -312B;
Chemistry 180-213A, B;
Electives to make 30 credits. Students who have taken no general course in geology must take Geology 186-201A.
Geology 186-231F (Field School I) at the close of the session.

U2: Geology 186-220B, -303D, -310D, -332A, -347B;
Electives to make 30 credits.

U3: Geology 186-331F (Field School II) before the start of the session;
Geology 186-323A, -343D, -345B, -433B, -441D;
Electives to make 30 credits.

HONOURS IN GEOLOGICAL SCIENCES

The core courses are the same as those specified for the major program but students must have above a 2.8 GPA or its equivalent to start the program and maintain such standing throughout. Eighteen of the elective credits must be selected in consultation with the student's adviser from a list of approved courses (available in room 238, Adams Building).

Special arrangements may be made so that students in the Honours program who wish to specialize in Geochemistry, Geophysics, or other interdisciplinary areas, may substitute other science courses in this program.

HONOURS IN SOLID EARTH GEOPHYSICS

U1: Geology 186-210A, -332A;
Physics 198-231A, B, -232A, B;
Chemistry 180-213A, B;
Mathematics 189-222A, B; -223A or 245A, B;
Electives to make 30 credits;
Geology 186-231F (Field School I) at the close of the session.

U2: Geology 186-303D, -310D, -347B, -220B;
Mathematics 189-314A, B, -315A, B; approved elective, 3 credits;
Electives to make 30 credits.

U3: Geology 186-443D, -433B, -331F (Field School, before the start of the session);
Mathematics 189-319B;
Mining 307- (9 credits from the 15 credits offered in Exploration Geophysics);
Electives to make 30 credits.

Course Descriptions

The following courses are without prerequisite and could be taken by students in the Faculty of Arts: 186-201A, -233B, and -243B. Other courses assume as a prerequisite completion of the courses required in the Physical Sciences option of the CEGEP curriculum. (See page 12.)

186-201A. INTRODUCTION TO GEOLOGY. (3 credits; 3 lectures; 1 laboratory.) Earth's place in the universe, moon and planets, minerals and rocks, internal structure of the earth, volcanism and earthquakes, evolution of landscapes, mountains and continental drift.
PROFESSOR STEARN

186-210A. INTRODUCTION TO MINERALOGY. (3 credits; 2 hours lecture, 3 hours laboratory; Full day field trip, 1st Tues. after Thanksgiving.) Mineralogy of the principal ore and rock-forming minerals.
PROFESSOR STEVENSON

***186-211A. CRYSTALLOGRAPHY.** (3 credits.)
PROFESSOR DONNAY

***186-213A. CRYSTAL CHEMISTRY.** (2 credits.)
PROFESSOR DONNAY

186-220B. ELEMENTARY EARTH PHYSICS. (3 credits; 3 hours lectures, one of which may be replaced by a conference.) Physical properties of the earth and the processes associated with its existence as inferred from astronomy, geodesy, seismology, geology, terrestrial magnetic and thermal effects, geochemistry, etc. Critical evaluation of hypotheses explaining above.
PROFESSOR SAULL

186-231F. FIELD SCHOOL I. (3 credits; Two-week field school in May.) Geological mapping of selected areas, preparation of maps, reports from field notes, aerial photographs, etc.
PROFESSOR HELMSTAEDT

186-233B. HISTORICAL GEOLOGY. (3 credits; 3 lectures.) Relative and absolute time scale; biostratigraphy, paleontological correlation. Periods of earth history; evolution of oceans and continents. Paleogeography and paleoclimates. Major steps in evolution of life. Geologic history of sea-water and atmosphere.
PROFESSOR HESSE

186-234A. INTRODUCTORY PALEONTOLOGY. (3 credits; 2 lectures and 1 laboratory period.) A survey of the fossil record. Uses of fossils in dating and correlating sedimentary rocks, determining ancient environments and in the study of evolution.
PROFESSOR STEARN

186-242A. GEOMORPHOLOGY. (3 credits; 2 lectures and 1 laboratory period; one day field work in October.) Weathering, mass wasting, erosional and depositional landforms produced by surface processes except glaciation (see GEOLOGY 431B); relationship of topography to lithology and structure.
PROFESSOR ELSON

186-243B. ENVIRONMENTAL GEOLOGY. (3 credits; 2 hours lectures, 1 conference.) Introduction to the relationship of geological factors to the human environment; optimum land and mineral use, natural hazards, ground water, engineering and urban geology.
PROFESSORS EAKINS AND GRICE

186-303D. STRUCTURAL GEOLOGY. (6 credits; 2 lectures and 3 hours laboratory; *Prerequisite:* 186-231F.) Aims of structural geology, stress and strain, mechanical properties of rocks, elastic behaviour, brittle and ductile deformation, fabric analysis of deformed rocks, time relationships between deformation and metamorphism. Geotectonic theories.
PROFESSOR HELMSTAEDT

186-310D. INTRODUCTORY PETROLOGY. (6 credits; 2 lectures and 3 hours laboratory; *Prerequisite:* 186-210A.) Integrated survey of igneous, sedimentary, and metamorphic rocks and processes leading to their formation. Emphasis in the laboratory on hand specimen description and classification, supplemented by thin sections.
PROFESSORS HESSE, MARTIN AND MOUNTJOY

186-312B. OPTICAL MINERALOGY. (3 credits; 6 hours laboratory and relevant in-lab. lectures; *Prerequisite:* 186-210A.) Optical properties of non-opaque minerals. Minerals in oil immersion mounts and in thin section are studied in the laboratory.
PROFESSOR STEVENSON

186-323A. IGNEOUS PETROLOGY. (3 credits; 2 hours lectures, 3 hours laboratory; *Prerequisites:* Geology 347B, 312B.) Physical properties, nucleation, crystallization, differentiation and emplacement of magmas. Integrated studies on various rock suites, granites, syenites, quartz monzonite, etc.
PROFESSOR MARTIN

***NOTE:** Complete descriptions of Courses 186-211A, -213A, -502B, -503D, -504B may be found in the section on Crystallography, page 213.

186-331F. FIELD GEOLOGY. (3 credits; Two-week field school in September, 1 lecture per week in 1st term.) Geological mapping of selected areas, including preparation of maps, sections, and reports from field notes, aerial photographs and other data.
PROFESSOR HESSE AND STAFF

186-332A. ANALYSIS OF GEOLOGICAL DATA I. (3 credits; 3 lectures, computer laboratory and problems; Not given in 1974-75.) Statistical analysis and computing methods applied to geological problems. PROFESSOR DOIG

186-343D. SEDIMENTARY ROCKS AND STRATIGRAPHY. (6 credits; 2 lectures and 1 laboratory period; 2 full days of field work during October; *Prerequisite:* Geology 310D.) Physical processes of sedimentation. Sedimentary structures. Modern and ancient sedimentary environments. Diagenesis and geochemistry. Sedimentary mineral deposits. Facies associations. Basin analysis. Stratigraphic correlation.
PROFESSORS HESSE AND MOUNTJOY

186-344A. ORE MINERALS. (3 credits; 2 lectures, 3 hours laboratory; *Prerequisite:* Geology 210A.) Microscopy of ore minerals, including identification, interpretation of textures, paragenesis and classification. PROFESSOR STEVENSON

186-345B. METAMORPHIC PETROLOGY. (3 credits; *Prerequisites:* Geology 303D, 347B.) The origin, classification and petrological significance of metamorphic rocks, from the point of view of theory, experiment and field observations. PROFESSOR HELMSTAEDT

186-347B. GEOCHEMISTRY OF HIGH TEMPERATURE PROCESSES. (3 credits; 3 hours lectures; *Prerequisites:* Geology 210A, 211A, 310D, Chemistry 213A or B.) Fundamentals of phase equilibria, chemographic methods in petrology, open and closed natural systems, partition of elements among mineral phases, distribution patterns of specific elements as related to principles of crystal chemistry. PROFESSOR MARTIN

186-430B. GEOLOGY OF ENERGY SOURCES. (3 credits; 2 lectures and 2 hours laboratory or seminar; *Corequisite:* Geology 186-343D.) Properties, origin, migration and occurrence of petroleum and natural gas. Canadian oil fields. Structural and stratigraphic reservoirs and their characteristics. Oil shales, coal, peat, radioactive minerals and solar energy sources. PROFESSOR MOUNTJOY

186-431B. GLACIAL AND PLEISTOCENE GEOLOGY. (3 credits; 2 hours lectures and 1 laboratory or lecture period; *Prerequisite:* Geology 186-242A or permission of the instructor.) Introductory glaciology and glacial geology. The geological record of the Quaternary Era. PROFESSOR ELSON

186-433B. ANALYSIS OF GEOLOGICAL DATA II. (3 credits; 3 hours lectures; Not given in 1974-75.) Advanced methods of statistical analysis applied to geological problems.
PROFESSOR DOIG

186-441D. MINERAL DEPOSITS. (6 credits; 2 lectures and 1 laboratory period; *Prerequisite:* 186-347B.) Nature, origin and mode of occurrence of deposits of metallic and of important non-metallic minerals; typical occurrences; geographical distribution.
PROFESSOR MacLEAN

186-442A. GEOPHYSICAL EXPLORATION. (3 credits; 2 lectures and 2 hours laboratory.) Survey course covering applications of seismic, gravimetric, magnetic and electrical techniques in exploring for oil and minerals. Laboratory work involves experiments illustrating basic principles of the various techniques. PROFESSOR TELFORD

186-443D. SOLID EARTH GEOPHYSICS. (6 credits; 3 hours lectures; *Prerequisite:* 186-220B.) A general coverage of solid earth geophysics including gravity, seismology, heat flow. PROFESSORS SAULL, KU, DOIG, AND JENSEN

186-446A. ENGINEERING GEOLOGY. (3 credits; 2 lectures and 2 hours laboratory or lecture period; *Prerequisite:* Permission of instructor.) Significance of geologic factors in foundation engineering and effects of man's activities in the geologic environment. Strength of materials. Construction materials, geological problems connected with foundations, tunnels, dams, etc PROFESSOR GRICE

186-448A. APPLIED GEOCHEMISTRY. (3 credits; 2 lectures and 1 laboratory period; *Prerequisite:* Geology 186-347B or permission of instructor.) Principles of geochemical prospecting and pertinent aspects of the geochemical behaviour of elements are studied. A field trip and laboratory work provide practical experience. PROFESSOR WEBBER

186-449B. GROUNDWATER GEOLOGY. (3 credits; 2 lectures and 2 hours laboratory or lecture period; *Prerequisite:* Permission of instructor.) PROFESSOR GRICE

186-450B. GEOLOGY OF NORTH AMERICA. (3 credits; 2 hours lectures, 3 hours laboratory; *Prerequisites:* 186-233B, 186-310D.) Systematic consideration of the geology of the various tectonic provinces of the North American continent with emphasis on structure, stratigraphy and resources. PROFESSOR MOUNTJOY AND STAFF

186-480D. GEOLOGICAL RESEARCH PROJECT. (6 credits; *Prerequisite:* for Honours students in 3rd year.) Under the supervision of one of the members of the staff the student will undertake an investigation and prepare the results in the form of a research report. STAFF

186-492D. PHOTOGEOLOGY. (3 credits; 3 hours laboratory and problems; *Prerequisite:* permission of instructor.) Interpretation of surface deposits and bedrock lithology and structure from air photographs. PROFESSOR ELSON

***186-502B. CRYSTAL-STRUCTURE ANALYSIS.** (2 credits.) PROFESSOR DONNAY

***186-503D. CRYSTAL-STRUCTURE DETERMINATION.** (6 credits.) PROFESSOR DONNAY

***186-504B. CRYSTAL SYMMETRY.** (2 credits.) PROFESSOR DONNAY

186-534D. ADVANCED INVERTEBRATE PALEONTOLOGY. (6 credits; 2 lectures and 1 seminar per week; Not given in 1974-75.) The bias of the fossil record. Relationships of the phyla. Taxonomy, classification, paleoecology, functional morphology, and evolution of fossil invertebrates. PROFESSOR STEARN

186-605D. MINERAL EXPLORATION AND MINING GEOLOGY. (6 credits; 2 lectures and 2 hours laboratory; *Prerequisite:* Permission of instructor.) Methods of searching for mineral deposits; modern exploration programs; development of mineral deposits, evaluation of mineral deposits. PROFESSOR EAKINS

395-697B. MARINE GEOLOGY AND GEOCHEMISTRY. (3 credits; 3 lectures; *Prerequisites:* Geology 343D, 347B, 348A.) An introduction with emphasis on deep sea studies. Geophysical nature and morphology of the ocean basins. Geochemistry of pelagic deposits in relation to sea water composition. Deep sea stratigraphy and methods of correlation; the sedimentary record. PROFESSOR D'ANGLEJAN

The following courses are described in the *Announcement of the Faculty of Engineering:* Geological Sciences 186-221A, -232A, -440B.

MATHEMATICS (189)

Burnside Hall, Room 1005, Telephone 392-5369.

Early mathematics consisted for the most part of empirical rules for performing operations on concrete objects by means of numerical processes. From this, mathematics has evolved to a discipline which is mainly characterized by its method of proof, its concern for a progressive broadening of its concepts, and by the search for mathematical entities and operations that represent aspects of reality. It is a subject which is pursued by many for its own sake, and regarded as part of the mainstream of human culture. Mathematics pervades modern society with an impact which, already immense, is rapidly growing.

The two principal divisions of mathematics are pure mathematics and applied mathematics. The pure mathematician is interested in abstract mathematical structures and in mathematics as an intellectual enterprise. He may even view his subject as an art. He is not primarily concerned with its utilitarian aspects or with the current needs of science and technology, although many problems in pure mathematics have developed from the sciences.

The applied mathematician is more interested in how he can use his mathematics to study some aspects of the world around him. He is engaged in the creation, study and application of advanced mathematical methods relevant to scientific problems. Statistical science and methodology today is concerned with

***NOTE:** Complete descriptions of Courses 186-211A, -213A, -502B, -503D, -504B may be found in the section on Crystallography, page 213.

phenomena in which there is a background of uncertainty arising from inherent variability, and the investigator is obliged to arrive at decisions from limited contingent data generated by such phenomena. A key tool in statistics is the calculus of probability.

Some of the fields in which pure mathematicians work are algebra, analysis, geometry, topology, number theory and foundations. Applied Mathematics which once referred to the application of mathematics to such disciplines as mechanics and fluid dynamics, has currently assumed a much broader meaning and embraces such diverse fields as communication theory, theory of optimization, theory of games and numerical analysis.

Mathematics offers many vocational possibilities. Such fields as teaching, computing, applied statistics and actuarial science offer opportunities for B.Sc. graduates. Opportunities to do original research in pure and applied mathematics are available in universities and similar institutions. Employment is to be found in financially or technologically oriented business firms.

The Department of Mathematics through its various programs attempts to provide courses to suit the diverse interests and attitudes within mathematics.

The Honours Program in Mathematics demands of the student a certain talent for abstraction in addition to a high level of competence in the use of mathematical tools. This program is intended for students who plan to work in an area where mathematical innovations may be needed. It is almost essential for students contemplating a career in mathematical research.

The Major Program involves the same subjects as the Honours Program but is less demanding in terms of abstraction. It is designed primarily for students who will need mathematical tools in their work but whose creative activity will involve applications of mathematics to other areas, but not to mathematics itself. Within the framework of the mathematics major, various combinations of courses are suggested to meet the needs of different students. These include course suggestions for secondary school teachers, careers in management, and for careers in industry, government or actuarial sciences.

It is possible for a Major student to include a number of Honours courses in his program. This will be an advantage for those students who plan to use their mathematics in graduate studies.

Students interested in a less intensive mathematics program linked to other disciplines are advised to consider the available Faculty Programs.

In planning their programs students are advised to seriously consider developing some depth in another discipline — preferably one for which mathematics has some relevance and use. Mathematics has always been closely linked to areas such as physics and engineering but has recently come to play an increasingly important role in fields such as biology, linguistics, management and psychology.

Faculty Programs

Programs linking mathematics and other disciplines are available. With careful selection of courses in U1, it is possible to transfer to a Major program in Mathematics in U2. Except where otherwise noted these faculty programs lead to a B.Sc. degree. See details on page 185.

Major Program

Programs of study for students entering U1 in 1974-75.

The compulsory courses are 189-120A, B, 189-121A, B, 189-221A, B, 189-222A, B, 189-245A, B.

Advisers will approve a program of which 54 credits will be in Mathematics (excluding 120A, B, 121A, B, 221A, B) or allied courses including at least 36 credits from the following: 189-217A, 189-218B, 189-242A, 189-243B,

189-246A, B, 189-314A, B, 189-315A, B, 189-316B, 189-317A, 189-318A, 189-319A, B, 189-323A, B, 189-324A, B, 189-327B, 189-328B, 189-333A, 189-346B, 189-348A, 189-349B, 189-360B, 189-369D, 189-415A, 189-416A, 189-417A, 189-419B, 189-423A, 189-424B, 189-425A, 189-447B.

GUIDELINES FOR SELECTION OF COURSES IN THE MAJOR PROGRAM

a) Students are advised to include the following courses in their program: 189-246A, B, 189-314A, B, 189-315A, B, 189-317A, 189-323A, B, 189-324B, 308-200A, B.

b) Students planning to pursue graduate studies are advised to include 189-242A, 189-243B and 189-333A in their program, and to consider substituting one or more Honours courses for the corresponding courses in the Major program.

c) Students considering a career in teaching are advised to include in their program the following courses: 189-217A, 189-218B, 189-242A, 189-318A, 189-328B, 189-348B, 189-349B.

d) Students interested in probability and statistics are advised to also include in their program the following courses: 189-242A, 189-423A, 189-424B, 189-425A, 189-447B, as well as a course in Fortran such as 308-200A, B. With the instructor's permission the graduate courses 189-682A, 308-690A, 308-691B might also be included.

e) Students interested in applied mathematics are advised to include in their program some or all of the following courses: 189-218B, 189-242A, 189-316B, 189-319A, B, 189-323A, 189-324B, 189-327B, 189-415A, 189-416A, 189-417A, 189-419B, 308-200A, B.

f) Students interested in computer science are advised to register in the following courses: 189-318A, 189-327B, 189-328B, 189-417A, 308-200A, B, 308-300A, B; they should choose additional courses from 198-319A, B, 189-415A, 189-416A, 189-419B, 189-423A, 189-424B, 189-425A, 189-447B, 308-640D*, 308-610A*, 308-690A*, 308-691B* or 308-698A* and 308-699B*.

g) Students interested in careers in actuarial work in industry or government are advised to select courses from the following list: 189-319A, B, 189-327B, 189-328B, 189-329D, 189-369D, 189-415A, 189-416A, 189-417A, 189-419B, 189-423A, 189-424B, 189-425A, 189-447B, 308-200A, B.

The student's attention is called to the fact that a B.Com. degree with a Major in Mathematics is available from the Faculty of Management. In addition the Faculty of Music offers a degree B.Mus. (Honours in Theory with Mathematics Option.)

Honours Program

The minimum requirement for entry into the Honours Program is that the student has completed with high standing the following courses (or their equivalents): 189-120A, B, 189-121A, B, 189-221A, B. He should preferably also have taken 189-222A, B (or equivalent).

REQUIREMENTS FOR HONOURS IN MATHEMATICS

For an Honours Degree in Mathematics the student must obtain 90 course credits; at least 60 of these should correspond to Honours courses (or their equivalent), not less than 45 to Honours courses in Mathematics. In addition to the latter, the student may count towards his 60 credit Honours requirement:

i) half of the courses he has taken from the Major Program in Mathematics (including Computer Science courses) for which no equivalent Honours course exists;

*These courses require special permission from the instructors.

ii) (with the approval of the Department of Mathematics) certain courses in other departments which are at an Honours level, and are closely linked to Mathematics;

iii) (with the approval of the Department of Mathematics) half the courses he has taken in other departments, which while not necessarily explicitly mathematical in nature, are at an Honours level and broaden the student's scientific training. Students who transfer to Honours in Mathematics from other programs will have credits for previous courses assigned, as appropriate, by the Department.

The following courses are compulsory: 189-271D, 189-272D, 189-371D, 189-372D.

To remain in the Honours Program, and to be awarded the Honours Degree, the student must maintain a 2.8 Grade Point Average.

GUIDELINES FOR SELECTION OF COURSES IN THE HONOURS PROGRAM

a) The compulsory courses may be spread over the three years of study.

b) Students taking 189-271D and 189-272D simultaneously are advised to register also for 189-273D.

c) Students are advised to include in their program the following courses: 189-273D, 189-356A, 189-357B, 189-374D, 189-380D.

d) Students interested in Statistics should register for 189-556D and 189-587D in addition to 189-356A and 189-357B.

e) Students in Applied Mathematics should register for some or all of the courses 189-467B, 189-574A, 189-575B, 189-478A and 189-479B in addition to 189-374D. They are also advised to select courses in areas to which they can apply their mathematics.

Course Descriptions*

NOTE: The Calculus sequence at McGill assumes satisfactory completion of a course in either Trigonometry or Functions. Students who have not taken such a course are advised to consult the Department of Mathematics about summer study.

189-112A, B. FUNDAMENTALS OF MATHEMATICS. (3 credits.) Sets, relations, functions and graphs, the real number system, inequalities, mathematical induction, permutations and combinations, binomial theorem, trigonometric functions and their properties.
PROFESSOR ROWLINSON

189-120A, B. CALCULUS I. (3 credits.) Analytic geometry of straight line and circle. Limits, continuity, derivative. Differentiation of elementary functions. Applications.
PROFESSOR SOLIN AND STAFF

189-121A, B. CALCULUS II. (3 credits; *Prerequisite:* 189-120A, B.) The definite integral. Techniques of antidifferentiation. Applications. PROFESSOR SOLIN AND STAFF

189-203A. BASIC PRINCIPLES AND METHODOLOGY OF STATISTICS I. (3 credits.) Typical examples of statistical data and the use of graphical means to summarize the data. Some basic distributions arising in the natural and behavioural sciences. The logical meaning of a test of significance with applications to single observations, sums, differences, and means. The analysis of categorical and frequency data. (This course is intended for students in all disciplines and is not open to students in Major Mathematics. No calculus prerequisites.) PROFESSOR PAPAIOANNOU

*Honours courses are indicated when the fifth character of the six digit course number is 5 or 6; when the fifth character is 7 or higher, the course is restricted to honours students.

189-204B. BASIC PRINCIPLES AND METHODOLOGY OF STATISTICS II. (3 credits; *Prerequisite:* 189-203A or equivalent.) The concept of degrees of freedom and the analysis of variability. Planning of experiments. The interrelation of two variables. Polynomial and multiple regressions. The use of correlation coefficients as exploratory tools. Basic principles of estimation and the concepts of likelihood and information. (This course is intended for students in all disciplines and is not open to students in Major Mathematics.)
PROFESSOR PAPAIOANNOU

189-205A. FINITE MATHEMATICS I. (3 credits.) An introduction to probability, vectors and matrices with applications to the social sciences. PROFESSOR SCHMIDT

189-206B. FINITE MATHEMATICS II. (3 credits; *Prerequisite:* 189-205A.) Topics in probability and statistics, linear programming and the theory of games.
PROFESSOR SCHMIDT

189-217A. MODERN ALGEBRA I. (3 credits.) Sets; relations and operations; the natural numbers; the integers; different number bases; Pythagorian triples; congruences and diophantine equations; the rational and real numbers; complex numbers and their representations; primitive roots and De Moivre's theorem.
PROFESSOR ROWLINSON AND MRS. SCHWERDTFEGER

189-218B. MODERN ALGEBRA II. (3 credits; *Prerequisite:* 189-217A or equivalent.) Groups; rings; integral domains; division rings; fields; polynomials; Boolean algebras.
PROFESSOR ROWLINSON AND MRS. SCHWERDTFEGER

189-221A, B. ANALYTICAL GEOMETRY AND VECTORS. (3 credits; *Prerequisite:* 189-121A, B.) Vectors, lines and planes, coordinate systems in three dimensions, inner products, quadric surfaces, vector-valued functions. Applications.
PROFESSOR SOLIN AND STAFF

189-222A, B. CALCULUS III. (3 credits; *Prerequisite:* 189-221A, B.) Infinite series. Length, curvature; partial differentiation, multiple integration and applications.
PROFESSOR SOLIN AND STAFF

189-223A. LINEAR ALGEBRA. (3 credits.) Algebra of matrices and determinants, systems of linear equations. Vector spaces, linear operators and their matrix representations, unitary vector spaces, orthogonality. Eigenvalues and eigenvectors, diagonalization of Hermitian matrices. Applications. (This course covers most of the topics in 189-245, -246. It is not open to students in Major Mathematics.) PROFESSOR MELAMED

189-224A, B. APPLIED MATRIX ALGEBRA. (3 credits.) Matrix addition and multiplication. Partitioning into blocks. Trace and determinant. Simultaneous linear equations. Rank and inverse. Symmetric matrices, and their eigenvalues and eigenvectors; reduction to diagonal form. Positive definite and semidefinite matrices; quadratic forms. Applications to and examples in operations research, linear programming and statistics, with use of the computer. (Intended for students interested in applications of matrix algebra to Management, Social Sciences, and similar fields of endeavour.) PROFESSOR STYAN AND STAFF

189-231A, B. MATHEMATICS FOR BIOLOGISTS. (3 Credits; *Prerequisite:* 189-121A, B.) Introductory probability theory, vectors and matrices, differential and difference equations with applications to the biological sciences. PROFESSOR TURNER AND STAFF

189-232A, B. MATHEMATICAL METHODS IN BIOLOGY AND THE BEHAVIOURAL SCIENCES. (3 credits; *Prerequisite:* 189-231A, B or equivalent.) Topics in probability and statistics, linear programming, and game theory with applications to the behavioural and biological sciences.

189-242A. REAL ANALYSIS. (3 credits.) Real numbers. Limits and continuity, sequences. Properties of continuous functions. Introduction to metric spaces.
PROFESSOR ROSENTHALL

189-243B. REAL ANALYSIS II. (3 credits; *Prerequisite:* 189-242A.) Continuity, uniform continuity and differentiability on the real line; fundamental theorems. Taylor's theorem and applications. Infinite series. PROFESSOR HERSCHORN

189-245A, B. LINEAR ALGEBRA I. (3 credits.) Simultaneous linear equations and inequalities. Matrices. Linear dependence, rank and inverse. Trace and determinant. Partitioning into blocks. Quadratic forms, positive definite and semidefinite matrices. Orthogonal matrices. Characteristic roots and vectors, similarity of matrices. Applications to various disciplines in science and management, with computer orientations.
PROFESSORS LABUTE, RATTRAY AND STAFF

189-246A, B. LINEAR ALGEBRA II. (3 credits; *Prerequisite:* 189-245A, B.) Abstract vector spaces over the real and complex numbers. Linear operations, matrix representations. Vector and operator norms. Eigenvectors and eigenvalues, Jordan canonical form. Linear, quadratic and Hermitian forms. Inner product spaces, unitary and orthogonal transformations, the adjoint of an operator, self-adjoint and normal operators. Applications.
PROFESSORS LABUTE, RATTRAY AND STAFF

189-247A. LINEAR ALGEBRA. (3 credits.) Matrix algebra; elementary operations; rank and inverses; determinants and square matrices; numerical solutions of simultaneous linear equations; eigenvalues and eigenvectors; unitary transformations; similarity transformations; reduction to diagonal form, defective matrices; quadratic forms and the variational principle; norms and error estimates; abstract vector spaces and linear equations; isomorphisms; coordinates, change of basis and linear transformations. Inner product spaces, orthogonality. (This course is intended for Honours Physics students and others suitably qualified.)
PROFESSOR COSTLEY

189-248A. ADVANCED CALCULUS I. (3 credits; *Prerequisite:* 189-221A, B.) Partial derivatives; implicit functions; Jacobians; maxima and minima; Lagrange multipliers. Scalar and vector fields; orthogonal curvilinear coordinates. Improper integrals; multiple integrals; arc length, volume and surface area. Line integrals; Green's theorem; the divergence theorem. Stokes' theorem; irrotational and solenoidal flelds; applications.
PROFESSOR TAM

189-249B. ADVANCED CALCULUS II. (3 credits; *Prerequisite:* 189-248A.) Functions of a complex variable; Cauchy-Riemann equations; Cauchy's theorem and consequences. Taylor and Laurent expansions. Residue calculus; evaluation of real integrals; integral representation of special functions; the complex inversion integral. Conformal mapping; Schwarz-Christoffel transformation; Poisson's integral formulas; applications.
PROFESSOR TAM

189-271D. ALGEBRA I. BASIC ALGEBRAIC STRUCTURES. (8 credits.) Groups, rings and fields; intensive linear algebra, including quadratic forms and the canonical forms of linear transformations; some elementary number theory (diophantine equations and congruences); polynomial rings.
PROFESSOR SCHMIDT

189-272D. ANALYSIS I. (8 credits; *Prerequisites:* 189-221A, B, 189-222A, B.) The real number system, metric properties of R^n, convergence, continuity, elements of Lebesgue integration, multivariable calculus, inverse and implicit function theorems, modern and classical versions of Stokes' theorem.
PROFESSOR BARR

189-273D. PROBLEM SEMINAR. (4 credits; 2 hours conference; *Corequisite:* 189-271D, -272D.) The course is designed to complement Algebra I, and Analysis I courses. Problems in other areas may be selected to suit the class.
PROFESSORS BARR AND SCHMIDT

189-314A, B. ADVANCED CALCULUS. (3 credits; *Prerequisite:* 189-222A, B.) Constrained maxima and minima. Jacobians. Multiple integration. Line and surface integrals. Theorems of Green, Stokes and Gauss. Introduction to elliptic integrals.
PROFESSOR LAWRUK

189-315A, B. ORDINARY DIFFERENTIAL EQUATIONS I. (3 credits; *Prerequisite:* 189-222A, B.) First order ordinary differential equations. Linear equations with constant coefficients, Laplace transform. Series solutions.
PROFESSOR LAWRUK

189-316B. FUNCTIONS OF A COMPLEX VARIABLE. (3 credits; *Prerequisite:* 189-314A, B.) Algebra of complex numbers. Cauchy-Riemann equations. Complex integral. Cauchy's theorem. Taylor and Laurent series. Residue theory and applications.
PROFESSORS BROWN AND MELAMED

189-317A. NUMERICAL ANALYSIS. (3 credits; *Prerequisites:* 189-222A, B, 308-200A, B or equivalent.) Error analysis. Numerical solutions of equations. Numerical solution of differential equations. Programming knowledge is assumed. Some laboratory work needed.
PROFESSORS EVANS AND VERMES

189-318A. MATHEMATICAL LOGIC. (3 credits.) Propositional calculus, truth-tables, calculus as a Boolean algebra, completeness, first order predicate calculus, axiomatic theories, set theory.
PROFESSOR BUNGE

189-319A, B. DIFFERENTIAL EQUATIONS. (3 credits; *Prerequisites:* 189-254A, B, -315A, B.) Systems of first order equations, non-linear differential equations and stability. Fourier series, partial differential equations, boundary value problems.
PROFESSOR LAWRUK

189-323A, B. INTRODUCTION TO PROBABILITY THEORY AND RANDOM VARIABLES. (3 credits; *Prerequisites:* 189-120A, B, -121A, B, or equivalent.) Sample space of an experiment, events. Conditional probability. Statistical independence. Bayes' theorem, with applications. Random variables, univariate distribution functions. The binominal, Poisson, hypergeometric, uniform, exponential and normal distributions. Mathematical expectation. The weak law of large numbers. The Poisson process, with applications. The central limit theorem. (This course is intended for students in science, engineering and related disciplines, who have had one year of calculus.)

PROFESSORS ANDERSON AND MATHAI

189-324A, B. INTRODUCTION TO STATISTICS. (3 credits; *Prerequisite:* 189-323A, B or equivalent.) The notion of a random sample. Sampling distributions, with particular reference to those related to the normal: X^2, *F* and *t*. Point estimation. Hypothesis testing, the notion of power function. Likelihood-ratio tests. Contingency tables, goodness-of-fit and homogeneity tests. Regression and the method of least squares, analysis of variance, with applications. Some nonparametric procedures.

PROFESSORS ANDERSON AND MATHAI

189-325B. ORDINARY DIFFERENTIAL EQUATIONS. (3 credits; *Prerequisite:* 189-222A, B.) First order differential equations; second order linear equations; series solution of second order equations; Fourier series; self-adjoint boundary value problems; more on Legendre polynominals and Bessel functions. (This course is intended for Honours Physics students and others suitably qualified.) PROFESSOR MASLOWE

189-327B. NUMERICAL ANALYSIS. (3 credits; *Prerequisites:* 189-246A, B, -317A.) Numerical methods for solving systems of linear algebraic equations, matrix inversion and eigenvalue problems. Numerical solution of differential equations. PROFESSOR ZLOBEC

189-328B. COMPUTABILITY AND MATHEMATICAL LINGUISTICS. (3 credits.) Propositional calculus, switching circuits, computability, recursive functions, Turing machines, automata, self-reproducing machines, formal and natural languages. Post canonical languages, phrase structure and transformational grammars. PROFESSOR BUNGE

189-329D. THEORY OF INTEREST AND LIFE INSURANCE. (6 credits; *Prerequisites:* 189-120A, B, -121A, B.) Simple and compound interest, discount, annuities certain, sinking funds, bonds, mortgage amortization, depreciation, calculation of life annuities, premiums and reserves on life insurance policies. PROFESSOR SOLIN

189-333A. ANALYSIS. (3 credits; *Prerequisite:* 189-243B.) Riemann-Stieltjes integral; sequences and series of functions; metric spaces; connectedness; completeness and compactness; Weierstrass approximation theorem; Fourier series.

PROFESSOR HERSCHORN

189-346B. NUMBER THEORY. (3 credits.) Divisibility. Congruences. Quadratic reciprocity. Diophantine equations. Arithmetical functions. PROFESSOR ROSENTHALL

189-348A. TOPICS IN GEOMETRY. (3 credits.) Isometry: symmetry and groups. Non-euclidean geometry. PROFESSOR MOSER

189-349B. TOPICS IN GEOMETRY. (3 credits.) Convexity: isoperimetric and combinatorial-geometric problems. Rubber-sheet geometry: classification of surfaces, path problems, map-colour problems. PROFESSOR MOSER

189-356A. INTRODUCTION TO PROBABILITY. (3 credits.) General foundations and applications. Combinatorial probability. The binomial, Poisson, hypergeometric distributions. Simple random walks. Continuous distribution functions. The uniform, exponential, normal distributions. Introduction to Markov processes. PROFESSOR SESHADRI

189-357B. INTRODUCTION TO STATISTICS. (3 credits; *Prerequisite:* 189-356A or equivalent). Data analysis. Measures of location and dispersion. Derived probability distributions. The t, chi-square, F-distributions. Estimation and hypothesis testing. Introduction to Bayesian and decision theory methods. Power of tests. The chi-square goodness of fit test. Introduction to regression analysis, and analysis of variance. PROFESSOR SESHADRI

189-360B. GROUPS AND THEIR REPRESENTATIONS. (3 credits; Not given in 1974-75.) Elements of group theory. Symmetry groups. Unitary vector spaces, linear operators and their matrix representations, invariance of functions and operators, classification of eigenfunctions. Reducibility, Schur's lemmas, general orthogonality relations, character tables. Kronecker product and adjoint representations, Hermitian invariants, Clebsch-Gordon series. Characters of the symmetric group. PROFESSOR ROTH

189-369D. THEORY OF FINITE DIFFERENCES AND LIFE CONTINGENCIES. (6 credits; *Prerequisites:* 189-221A, B, 222A, B.) Finite differences, theory of interest and of single and multiple life functions. MR. BELL

189-371D. ALGEBRA II. (6 credits; *Prerequisite:* 189-271D.) Commutative algebra (modules over a principal ideal domain, extensions of the rationals, unique factorization domains); field theory to include the fundamental theorem of Galois theory; group theory continued up to the Sylow theorems; the Jordan-Hoelder theorem. PROFESSOR SUSSMAN

189-372D. ANALYSIS II. (8 credits; *Prerequisite:* 189-272D.) Metric spaces; Lebesgue-Stieltjes integration; series expansions of functions (including L_2 theory); power series; analytic functions; contour integration; Cauchy's theorem and a wide variety of consequences, normal families. PROFESSOR HERZ

189-373D. PROBLEM SEMINAR. (4 credits; 2 hours conference.) Problems in related areas to suit the class.

189-374D. ORDINARY AND PARTIAL DIFFERENTIAL EQUATIONS. (6 credits; *Prerequisites:* 189-245A, B and 189-272D; *Corequisite:* 189-372D.) Existence and uniqueness theorems; systems of equations; Sturm-Liouville equations; power series solutions and special functions; homogeneous equations, phase space. First and second order partial differential equations; the Laplace wave and heat equation; Fourier transforms, distributions, Hilbert space methods. PROFESSOR EVANS

189-377B. NUMBER THEORY. (3 credits.) Partitions. Geometry of numbers. Dirichlet series. Primes in an arithmetic progression. Algebraic numbers and ideas. PROFESSOR BROWN

189-380D. GEOMETRY AND TOPOLOGY. (6 credits; *Prerequisites:* 189-271D, 189-272D.) A study of curves and surfaces with a view to motivating basic notions of differential geometry, algebraic topology and differential topology. PROFESSOR RUSSELL

189-407B. DYNAMIC PROGRAMMING. (3 credits; *Prerequisites:* 189-245A, B, 189-314A, B.) Optimum allocation of resources. Dynamic programming versus direct enumeration. Optimum equipment replacement models. Investment analysis, selling and purchasing. Optimum Markovian decision processes. The Travelling Salesman problem.

189-414B. MATHEMATICAL MODELS IN APPLICATIONS. (3 credits; *Prerequisites:* 189-245A, B, 323A, B (or 231A, B, 232A, B), 315A, B.) Models in Environmental Science: Population dynamics; birth and death process, dynamics of host-parasite populations. Mathematical regularities — in traffic flow, size of cities, epidemics and rumours. Input-output models with industrial and economic applications. Markov and semi-Markov models. Some models of graphs; networks. PROFESSORS SANCHO AND TURNER

189-415A. ORDINARY DIFFERENTIAL EQUATIONS II. (3 credits; *Prerequisites:* 189-246A, B, 189-315A, B, 189-242A or 189-314A, B.) Systems of linear ordinary differential equations, nonlinear systems, stability of linear systems, stability of periodic solutions, limit cycles, autonomous systems, applications. PROFESSORS ROTH AND LANGFORD

189-416A. COMBINATORICS. (3 credits; *Prerequisites:* i) 189-222A, B, ii) one of 189-217A, -218B, -223A, -231A, B, -245A, B or equivalents.) An introductory half-course in combinatorics intended for Mathematics Majors students and others who lack the time or the prerequisites to enrol in 189-461D (Combinatorial Mathematics). The lectures of the two courses may coincide (for the First term); however, students of 189-416A will be examined at the end of the First term, while students in 189-461D will continue on in the Second term and be exposed to current research papers. (Honours credit is available only through registration in 189-461D.) PROFESSOR MOSER

189-417A. MATHEMATICAL PROGRAMMING. (3 credits; *Prerequisites:* 189-246A, B, -314A, B or equivalent.) Linear programming; simplex method; duality theory. Nonlinear programming; Lagrange-Kuhn-Tucker optimality conditions. Numerical methods for solving unconstrained and constrained maximization problems. Applications to realistic problems. Computer programming knowledge is assumed. PROFESSOR ZLOBEC

189-419B. VARIATIONAL METHODS OF APPLIED MATHEMATICS. (3 credits; *Prerequisites:* 189-245A, B, 189-314A, B, 189-319A, B.) Functionals, Euler-Lagrange necessary condition for an extremum, extrema with constraints, minimum characterization of the eigenvalue-eigenfunction problem, applications selected from optimization, control theory and natural philosophy. PROFESSORS ROTH AND LAWRUK

189-423A. STATISTICAL METHODS I. (3 credits; *Prerequisites:* 189-323A, B and -245A, B or equivalent.) Simple and multiple linear regression. Least squares estimators and their properties. Tests of hypotheses; the *F*-test. One- and two-way analysis of variance. The

general linear model. Prediction and confidence intervals. Orthogonal and non-orthogonal designs. Weighted least squares.
PROFESSOR MATHAI

189-424B. STATISTICAL METHODS II. (3 credits; *Prerequisites:* 189-323A, B, -324B or equivalent.) Tests of goodness of fit: Pearson's chi-square test for multinomial populations. Contingency tables. Sample distribution function. Nonparametric procedures including the Cramer-von Mises and Kolmogorov-Smirnov tests. Order statistics. Tests for normality.
PROFESSOR SESHADRI

189-425A. SAMPLING SURVEY THEORY AND APPLICATIONS. (3 credits; *Prerequisites:* 189-323A, B, -324B or equivalent.) Advantages of sampling compared to complete enumeration, with special reference to human populations and public opinion polls (greater speed in obtaining and analysing results, smaller cost, greater accuracy of results). Requirements of a good sampling scheme. Main types of sampling and their properties. Use of adjustments based on supplementary information.
PROFESSOR PAPAIOANNOU

189-447B. ELEMENTARY STOCHASTIC PROCESSES. (3 credits; *Prerequisites:* 189-245A, B and 189-323A,B.) Random walk on the integers and gambler's ruin problem; the Galton-Watson branching process; Markov chains and their applications in the physical and social sciences; birth and death processes and their applications to biological growth problems.
PROFESSOR ANDERSON

189-461D. COMBINATORIAL MATHEMATICS. (6 credits; *Prerequisites:* 189-246A, B, -242A or equivalent. This course will be given in alternate years.) After a study of fundamentals (partitions and compositions, principle of inclusion and exclusion, etc.) students will be introduced to combinatorial aspects of several fields (graph theory, designs, set theory, group theory, geometry, number theory, etc.) from classical up to and including current research.
PROFESSOR MOSER

189-478A. NUMERICAL ANALYSIS. (3 credits; *Prerequisite:* 189-372D.) Basic error analysis; numerical solutions of nonlinear equations; interpolation; numerical integration and numerical solutions of ordinary differential equations.
PROFESSOR EVANS

189-479B. NUMERICAL ANALYSIS. (3 credits; *Prerequisites:* 189-271D, -478A.) Numerical analysis in normed spaces. Finite and infinite systems of equations. Integral, ordinary and partial differential equations. Finite differences. Numerical realization of the Ritz-Galerkin methods. Convergence and stability of numerical algorithms.
PROFESSOR ZLOBEC

189-483A. TOPOLOGICAL SPACES. (3 credits.) Bases, connectedness, convergence, product and quotient spaces, metrization, compactness, function spaces.
PROFESSOR GOWRISANKARAN

189-489A. MATHEMATICAL LOGIC. (3 credits.) Propositional calculus and first order predicate calculus; completeness, compactness, and normal form theorems; theorems of Herband, Craig, Beth, and Gentzen.
PROFESSOR LAMBEK

189-490B. MATHEMATICAL LOGIC. (3 credits.) Alternately either (1) an introduction to recursion theory, undecidability theorems of Godel and Church, recursively enumerable sets, degrees; or (2) an introduction to model theory, ultraproducts, saturated models, elimination of quantifiers, decidability.
PROFESSOR LAMBEK

189-551A. COMPLEX ANALYSIS I. (3 credits; Not given in 1974-75.) Maximum modulus theorem, Rouche's theorem, Weierstrass and Vitali's theorem on convergence of holomorphic functions, normal families. Conformal mapping, harmonic functions, entire and meromorphic functions.

189-552B. COMPLEX ANALYSIS II. (3 credits; Not given in 1974-75.) Selected topics from the Theory of a Complex Variable.

189-555D. FLUID DYNAMICS. (6 credits.) Kinematics. Dynamics of general fluids, inviscid fluids, Navier-Stokes equations. Exact solutions of the Navier-Stokes equations. Perturbation methods. Flow at small Reynolds number. Flow at high Reynolds number. Stability.
PROFESSOR TAM

189-556D. MATHEMATICAL STATISTICS. (6 credits.) Probability and distribution theory including discussion of some basic distributions in p-space. Regression and correlation theory. Laws of large numbers and central limit theorem. Sampling theory (including large-sample theory.) Likelihood functions and information matrices. Hypothesis testing, estimation theory and decision theory. Distribution-free procedures.
PROFESSOR SESHADRI

189-571D. DIFFERENTIAL GEOMETRY. (6 credits; *Prerequisite:* 189-380D.) The geometry of differentiable manifolds.
PROFESSOR OKUBO

189-572D. REAL AND COMPLEX ANALYSIS. (8 credits; *Prerequisites:* 189-271D, -372D, -551A.) The theory of measure and integration, basic Hilbert and Banach space theory, complex analysis from a modern viewpoint. PROFESSOR CHOKSI

189-574A. ORDINARY DIFFERENTIAL EQUATIONS. (3 credits; *Prerequisite:* 189-374D.) Topics to be selected from the following: existence and uniqueness theorems, dependence of solutions on parameter and initial data, stability theory, perturbation methods, singular points, periodic systems, two point boundary-value problems. PROFESSOR LANGFORD

189-575B. PARTIAL DIFFERENTIAL EQUATIONS. (3 credits; *Prerequisite:* 189-374D.) A continuation of topics introduced in 189-374D. PROFESSOR LANGFORD

189-581D. HIGHER ALGEBRA. (6 credits; *Prerequisite:* 189-371D or equivalent.) The rudiments of category theory, including adjoint functors; noetherian, artinian and semi-simple rings; representations of finite groups; a continuation of commutative algebra, prime ideals, localisation and completion; some algebraic number theory and a deeper study of field extensions. PROFESSOR LABUTE

189-585A. INTEGRAL EQUATIONS. (3 credits; *Prerequisites:* 189-246A, B, 189-374D, or equivalent.) Introduction to the theory of Hilbert spaces. Fredholm and Volterra integral equations; exact and approximate solutions. Equations with Hermitian kernels. Hilbert-Schmidt theorem and consequences. Representation formulas for the solutions of initial and boundary value problems. Green's functions. Applications. PROFESSOR TURNER

189-586B. ADVANCED BOUNDARY AND INITIAL VALUE PROBLEMS. (3 credits; *Prerequisites:* 189-316B, 189-374D, or equivalent.) Partial differential equations of applied mathematics. Dirichlet and Neumann problems; complex variable methods. Homogeneous and non-homogeneous problems: Green's functions, integral transform methods, variational techniques. Perturbation theory. Application. PROFESSOR TURNER

189-587D. ADVANCED PROBABILITY THEORY. (6 credits.) Distribution functions on R^1. Basic measure and integration theory, with special reference to probability measures on (R^1, B^1) and their correspondence with distribution functions. Random variables. Expectation, including basic inequalities. Independence. Conditional probability. Convergence concepts, laws of large numbers. Characteristic functions. Central limit theorem and its ramifications. Random walks.

189-588D. ALGEBRAIC TOPOLOGY. (6 credits.) Introduction to homology and homotopy theory. PROFESSOR RATTRAY

METEOROLOGY (195)

Burnside Hall, Room 722, Telephone, 392-4461.

Meteorology is the study of the earth's atmosphere from the ground up to the heights where it fades into interplanetary space. Most of this atmosphere (80 per cent by mass) is within about 40,000 feet of the surface, and it is here that much of the familiar "weather" occurs; above this height lies the stratosphere, where there still are winds and pressure-patterns, but clouds and up-and-down currents of air are scarce. The atmosphere can be studied as a large ocean of gas by the methods of fluid dynamics; winds, temperature fronts, and planetary waves are the ideas involved in such a program. Or it can be studied from the point of view of its detailed physics: how cloud droplets make rain, or how sunlight warms the ground, and the ground warms the air above it by radiation and convection.

Meteorology is not weather-forecasting, though forecasting is one of the objectives of meteorology. The point of view is always quantitative; meteorology is physics, and like other parts of physics it attempts to devise theoretical models of its complex subject, of the motion and composition of the air, and of its interaction with radiation and the solid or liquid surface.

Meteorology is a good subject when coupled with an approved sequence in mathematics and physics. The program may lead to a B.Sc. with a Major in Meteorology.

In the Honours program in Meteorology there are various options, depending on the student's particular interests. It is, in all cases, a rigorous and specialized study of the theory and practice of meteorology.

Graduates in Honours Meteorology and in Honours Physics, Mathematics, or equivalent courses, can become professional meteorologists through the training offered in the M.Sc. program in Meteorology. Good facilities exist for Ph.D. studies in several areas of current meteorological research.

Graduates who have a Major in Meteorology often find employment in applied work.

Faculty Programs

For details, see Faculty Programs, page 185.

Major in Meteorology

Consult Professor Rogers, Burnside Hall, Room 817.

In view of the fact that meteorology is the physics and mathematics of the atmosphere, the Department will recognize a course of study as a "Major Program in Meteorology" if, in addition to the full sequence of general meteorology courses (195-210D, -320A, -321B, -410A, -411B and -420D), it contains the equivalent of the following program in Physics and Mathematics:

Mathematics 189-223A, -222A, B, -314A, B, -315A, B; Physics 198-231A, B, -232A, B, -233A, plus additional approved courses in Mathematics and Physics, In total, 57 credits are specified, of which 51 are compulsory. The details of the program are available in the Department.

Honours in Meteorology

Consult Professor Derome, Burnside Hall, Room 711.

Prerequisite: High standing in Mathematics and Physics. An advanced program in Physics and Mathematics, with Meteorology courses from those listed below under "Course descriptions". There are three options: Dynamical, Physical and Climatological Meteorology. All of these require the same program in the U1 year (30 credits of which 28 are compulsory and 2 are elective.) The U2 and U3 years are different in the three options. In all options the U3 year will concentrate on the 600-level courses given in the Meteorology Department.

U1: Mathematics 189-316B, -223A, -314A, B, -315A, B; Physics 198-251A, -252A, -261B, -262B, 259D; Computer Science 308-200A, B; 2 credits are elective.

Physical Meteorology Option

U2: Mathematics 189-317A, -323A, B, -319B; Physics 198-353D; Meteorology 195-410A, -411B, -420D; 5 credits are elective.

U3: Physics 198-328A, -452D, -341B; Meteorology 195-651D, -653D, -655D; 5 credits are elective.

Dynamical Meteorology Option

U2: Mathematics 189-317A, -323A, B, -319B, -327B; Physics 198-353D; Meteorology 195-320A, -321B; 8 credits are elective.

U3: Mathematics 189-324B; Meteorology 195-652D, -653D, -654D, -655D; 9 credits are elective.

Climatology Option

U2: Mathematics 189-323A, B, -319B; Physics 198-353D; Geography 183-422A, -423B; Meteorology 195-320A, -321B; 8 credits are elective.

U3: Mathematics 189-317A, -324B; Meteorology 195-652D, 653D, -654D, -655D; -656D; 4 credits are elective.

Course Descriptions*

195-210D. GENERAL METEOROLOGY. (6 credits; 1 lecture and tutorials.) History, instruments and data. Simple and complex climatic elements; world, regional and local climates. Physical properties of the atmosphere; thermodynamics; humidity, clouds and precipitation. Local and major wind systems. Fronts and air masses. Synoptic analysis and principles of weather forecasting. PROFESSOR ORVIG

195-220B. RADIATIVE TRANSFER IN THE ATMOSPHERE. (3 credits; 3 hours.) Radiation laws, solar and terrestrial radiation, solar radiation and the earth's atmosphere. The atmosphere in radiative equilibrium. PROFESSOR LEIGHTON

195-320A. THERMODYNAMICS OF THE ATMOSPHERE. (3 credits; 3 hours lectures; *Prerequisite:* Permission of instructor.) Classical thermodynamics applied to atmospheric air. Meteorological thermodynamic charts. Phase changes of water. Stability and convection. Diffusion and turbulent transfer of heat and particulates.
PROFESSOR ROGERS AND DR. ROBERTSON

195-321B. CLOUD PHYSICS. (3 credits; 3 hours lectures; *Prerequisite:* Meteorology 195-320A.) Nucleation of water and ice. Growth of cloud droplets and the development of precipitation. Structure of clouds and rain; methods of observation.
PROFESSOR ROGERS AND DR. ROBERTSON

195-410A. DYNAMIC METEOROLOGY I. (3 credits; 3 hours lectures; *Prerequisites:* Mathematics 314A and 315B; Meteorology 320A, 321B or permission of instructor.) Momentum equations in rotating coordinates, geostrophic flow, steady curved flow. The vertical structure of wind and pressure systems. The circulation theorem and vorticity equation. Pressure as the vertical coordinate. Analysis of synoptic scale motions in middle latitudes. PROFESSOR MERILEES

195-411B. DYNAMIC METEOROLOGY II. (3 credits; 3 hours lectures; *Prerequisite:* Meteorology 410A.) Atmospheric oscillations: sound waves, gravity-inertia waves and Rossby waves. Origin of middle-latitude waves: barotropic and baroclinic instability mechanisms. Energy transformations in the atmosphere. Finite difference methods applied to the solution of nonlinear atmospheric models. PROFESSOR MERILEES

195-420D. INTRODUCTORY SYNOPTIC METEOROLOGY. (6 credits; 1 hour lecture, 3 hours laboratory; *Prerequisite:* Meteorology 320A, 321B; *Corequisite:* Meteorology 410A and 411B or permission of instructor.) An introduction to meteorological analysis. Effects of boundary layer processes on large-scale energetics of the atmosphere. Diagnostic studies of the development of weather systems. The general circulation. Practical analysis of weather charts. Graphical and computer methods. PROFESSOR DEROME

195-651D. PHYSICAL METEOROLOGY. (6 credits; 2 hours.) Thermodynamics of the atmosphere. Instability and convection. Cloud physics and storm structure. Radar applications. Solar and terrestrial radiation. Radiation calculations and diagrams. Energy budget of the atmosphese. PROFESSORS ROGERS, LEIGHTON AND DR. ROBERTSON

195-652D. DYNAMIC AND NUMERICAL METEOROLOGY. (6 credits; 2 hours.) The equations of motion. Circulation and vorticity, development theorems. Linear perturbations, instability. Mathematical models of the atmosphere; application of difference equations and their numerical solution.
PROFESSORS DEROME, MERILEES AND DR. DALEY

195-653D. CLIMATOLOGY. (3 credits; 1 hour.) The general circulation of the atmosphere and the ocean. Climatic classification. The heat and water balance, climatic change. PROFESSOR ORVIG

195-654D. SYNOPTIC METEOROLOGY. (6 credits; 4 hours.) A laboratory course to complement Meteorology 651 to 653. Analysis of weather charts and diagrams, forecast techniques, diagnostics treatments of atmospheric dynamics and weather processes. Modern statistical and computer methods are used wherever suitable.
PROFESSOR VOWINCKEL AND STAFF

195-655D. SEMINARS "TOPICS IN METEOROLOGY". (3 credits; 1 hour.) One-hour discussions on special topics in meteorology, e.g. hurricanes; tornadoes; charge generation; ozone. STAFF

195-656D. DAILY WEATHER DISCUSSION. (2 credits; 2½ hours.) One-half hour briefing on the current weather situation. PROFESSOR VOWINCKEL

*Courses numbered 651 — 656 are for Graduate students and final-year Honours Meteorology students.

MICROBIOLOGY AND IMMUNOLOGY (528)

Pathological Institute, 3775 University Street, Room 515,
Telephone, 842-1251, ext. 1771.

Microbiology is the study of minute forms of life, which are best examined using a light or electron microscope. It is one of the youngest sciences, despite the fact that the simplest microscope was invented over three hundred years ago, and the existence of microbes was suspected long before that. In its relatively short history, however, microbiology has had tremendous impact in such varied fields as medicine, agriculture, genetics, forestry and industry.

The main groups of microorganisms are the bacteria, protozoa, fungi and viruses, which are now included under the broad term "microbiology." These organisms, although so small as to be measured in thousandths of an inch, have characteristic structures and life habits. Many of their complex chemical, physical and genetic properties are shared with man and other higher organisms. Because of their rapid growth rate, they are widely used as "experimental animals" in studying cell processes. Microorganisms of all kinds are widespread in man's environment and are important in his everyday life in many ways. Some cause diseases of plants, animals or men; others are useful in bread-making, brewing, ripening of cheese, wine-making, manufacture of vaccines, antibiotics, and pure chemicals; some are the cause of food spoilage; and still others are of vital importance in maintaining soil fertility or in the control of forest insect pests.

Opportunities for careers in pure or applied microbiology are many and varied. For interested students, the following introductory reading is suggested:

De Kruif, *The Microbe Hunters* (Pocket Books of Canada)
Camus, *The Plague* (Penguin)
Sistrom, *Microbial Life* (Modern Biology Series).

Faculty Program

For details, see Faculty Programs, page 185.

Major Program

The following courses are required to complete a Major program in Microbiology and Immunology.

U1: 31 credits: Biology 177-201D, 177-205D, 177-206D; Mathematics 189-231A, B; Chemistry 180-204A, 180-222A, B; Physiology 552-211D.

U2: 22 credits: Biology 177-301A, B, 177-302A, B, 177-310B; Microbiology 528-311A, 528-314B, 528-313B or 315B; one of the following: Biology 177-309A, 177-373A; Mathematics 189-232A, B; Psychology 204-204A, B.

U3: 15 credits: Microbiology 528-313B or 315B, 528-421A, 528-422B, 528-423A, 528-424A.

Consult: Dr. P.M. Cooke, Room 508, Pathological Institute, 3775 University Street. Telephone 842-1251, Ext. 1772.

Honours Program

The Honours program is a rigid one and intended for those students planning to enter graduate study after completion of the B.Sc No student will be admitted to the Honours program until U-2. Students hoping to be admitted to Honours in U-2 should follow the U-1 Major program and must obtain a GPA of 3.00 for admission. For continuing in Honours a GPA of 3.10 must be obtained in U-2.

The following courses are required in U-2 and U-3 to complete the Honours program:

U2: Biology 177-301A, B, 177-302A, B, 177-303A, 177-310B; Microbiology 528-311A, 528-314B, 528-313B or 315B; Anatomy 504-261A; one of: Biology 177-309A, 177-373A; Mathematics 189-232A, B; Psychology 204-204A, B.

U3: Microbiology 528-313B or 315B, 528-421A, 528-422B, 528-423A, 528-424A, 528-471A, 528-472B, 528-501D, 528-525B, 528-527B.

Total credits over 3 years: 94.

Consult: Dr. P.M. Cooke, Room 508, Pathological Institute, 3775 University Street. Telephone 842-1251, Ext. 1772.

Interdepartmental Honours in Immunology.

The Departments of Biochemistry, Microbiology and Immunology and Physiology are offering an interdepartmental Honours program in Immunology.

Details of this program may be found on page 190 of the Calendar.

Course Descriptions

528-311A. BIOLOGY OF MICROORGANISMS. (4 credits; *Prerequisite:* Biological Sciences Core Curriculum, U1; *Corequisite:* Biological Sciences Core Curriculum, U2; 3 hours lectures, 3 hours laboratory.) A comprehensive treatment of introductory microbiology bearing specifically on the biological properties of microorganisms. The laboratory sessions introduce general techniques peculiar to the handling of microorganisms.

528-314B. IMMUNOBIOLOGY. (3 credits; *Prerequisite:* Biological Sciences Core Curriculum, U1; *Corequisite:* Biological Sciences Core Curriculum, U2; 3 hours lectures, 3 hours laboratory every other week.) A comprehensive study of the fundamental principles of immunology.

528-315B. THE PATHOGENIC FUNGI. (3 credits; *Prerequisite:* Biological Sciences Core Curriculum, U1 & U2; 2 hours lectures, 3 hours laboratory, alternate years, offered in 1974-75.) A study of the morphological, cultural and physiological characteristics of the pathogenic fungi, their pathogenic activities and the etiology and epidemiology of fungus diseases of importance in human and veterinary medicine.

528-313B. PARASITOLOGY. (3 credits; *Prerequisite:* Biological Sciences Core Curriculum, U1 & U2; 2 hours lectures, 3 hours laboratory; alternate years, not offered in 1974-75.) A study of the biology, bionomics, epidemiology, pathogenicity and diagnosis of the parasites of man. Laboratory will consist of a lecture on techniques, demonstrations and practical work.

528-421A. SYSTEMATIC BACTERIOLOGY. (3 credits; *Prerequisite:* Microbiology 528-311A; 3 hours lectures, 3 hours laboratory.) A study of the taxonomy of bacteria with a review of classical systems and detailed coverage of modern methods. Classification of the bacteria with greater emphasis on the pathogenic groups.

528-422B. PATHOGENIC BACTERIA. (3 credits; *Prerequisites:* Microbiology 528-314B, 528-421A; 3 hours lectures, 3 hours laboratory.) A study of selected pathogenic bacteria emphasizing virulence factors, modes of transmission, spread and control.

528-423A. MICROBIAL PHYSIOLOGY. (3 credits; *Prerequisites:* Microbiology 528-311A, 528-312B; 3 hours lectures.) A broad introduction to the physiology of microorganisms. The chemical activities of microbes will be studied from a basic knowledge of microbiology and biochemistry.

528-424A. FUNDAMENTAL VIROLOGY. (3 credits; *Prerequisite:* Biological Sciences Core Curriculum, U2; 3 hours lectures with demonstrations.) A study of the fundamental properties of viruses (bacterial, plant and animal) and their interaction with host cells. Emphasis will be on phenomena occurring at the cellular level.

528-471A. CURRENT TOPICS IN MICROBIOLOGY AND IMMUNOLOGY. (3 credits; Open only to U3 Honours students.) Seminars and discussions on current topics in Microbiology and Immunology.
PROFESSOR COOKE AND STAFF

528-472B. CURRENT TOPICS IN MICROBIOLOGY AND IMMUNOLOGY. (3 credits; Open only to U3 Honours students.) Seminars and discussions on current topics in Microbiology and Immunology.
PROFESSOR COOKE AND STAFF

PATHOLOGY (546)

546-300A. PRINCIPLES OF DISEASE. (3 credits; *Prerequisite:* A university-level general biology course.) An introduction to the study of diseases with emphasis on changes in normal structure and function and their causes at the host, tissue and cellular level. Students are expected to participate in seminars and a major paper is required.

PROFESSOR H. SHELDON

PHARMACOLOGY AND THERAPEUTICS (549)

549-461D. GENERAL PHARMACOLOGY. (6 credits; *Prerequisite:* Suitable preparation in biochemistry and physiology and permission of the Department.) A course covering basic interactions between chemical agents and living processes.

PHYSICS (198)

Macdonald Physics Building, Room 105, 392-5130.

Physics is in many ways the parent of the other natural sciences and its discoveries and laws continually affect their development. Its range and scope extend in space and time from subnuclear particles to the universe itself. The subfields of physics such as mechanics, thermodynamics, electricity, atomic physics and quantum mechanics, to mention but a few, permeate all other scientific disciplines.

There are two main undergraduate programs in Physics at McGill: the Major and the Honours. The Major program is open to all holders of the DCS in Physical Sciences (see page 45). It offers a broad training in classical and modern physics and yet leaves room for the student to take a meaningful sequence of courses in two other areas. Flexibility and accessibility are two features of the Major program. The Honours program is more highly specialized and the courses are more demanding. High standing in collegial mathematics and physics is a requirement for admission. The Honours program is appropriate for students who wish to make an in-depth study of the subject in preparation for graduate work and an academic or professional career.

For students lacking some of the college level courses in physics and for students wishing to transfer into Physical Sciences after completing a collegial program in another area the Department offers transitional courses in its new -100 series.

Many aspects of physics permeate other scientific fields and people trained in physics are employed in industry, government, and educational systems where they find many challenges as teachers, researchers, administrators and in the rapidly developing area of scientific business.

Program Information

Students wishing to register in one of the undergraduate programs of the Department must consult with the Department and obtain the appropriate Study Plan Form. They will then be assigned an Academic Adviser from the staff of the Department.

HONOURS

Professor W. M. Martin (392-5129), Macdonald Physics Building, Room 106.

MAJOR AND FACULTY PROGRAMS

Professor M. P. Langleben (392-5127), Macdonald Physics Building, Room 60.

The Diploma of Collegial Studies in Physical Sciences is sufficient for admission to the Major and Faculty programs. High standing in Mathematics and Physics and satisfactory performance in the placement examination are required for admission to Honours. The placement examination is held about ten days after the commencement of lectures. Students may register in Honours after they have obtained provisional Honours forms from the Department. This registration will be confirmed if they succeed in the placement examination.

Science Freshman Program

The courses 198-101A, B and -102A, B are intended for students wishing to proceed in Biological Science but lacking one or more of the elements of the CEGEP program in Health Science. Similarly courses 198-120A, B, -121A, B, -122A, B are intended for students who wish to proceed in Physical Sciences but who lack some of the prerequisites. Finally 198-110A is intended for students who have satisfactorily completed the CEGEP Health Sciences sequences and who now wish to proceed in Physical Sciences.

Honours Program

U1: Mathematics 189-247A, -248A, -249B, -325B; Physics 198-251A, -252A, -259D, -261B, -262B. 25 credits.

U2: Physics 198-328A, -351A, -353D, -355A, -357D, -359B, -365B. 26 credits.

U3: Physics 198-451A, -452D, -459D, three of Physics 198-454B, -457A, -458A, 467B, other approved 3-credit course. 24 credits.

A student whose average in the *required* courses in any year falls below GPA 2.8, or whose mark in any individual *required* course falls below 55% may not register in the Honours program the following year except with the permission of the Department.

Major Program

The Department's requirements for the program are:

A) A core of 38 credits as follows: Mathematics 189-222A, B, -223A, -315A, B; Physics 198-231A, -232B, -233A, -235B, -328B, -346D, -432A, and either -439A or -449B. (The student may take *both* 198-439A and -449B if he wishes, for a total of 6 credits.)

B) 15 credits chosen from the following list: Geological Sciences 186-504B Mathematics 189-314A, B, -317A, -319B; Physics 198-214B, -219A, -237B, -314A, 331A, -334B, -341B, -413A, -431A, -434B, -437B, -438B, one approved course 3 credits, not listed above.

Mathematics 189-222A, B, -223A, -315A, B and Physics 198-235B must be completed in U1. While the other courses may be taken at any time subject to prerequisite conditions, it is strongly recommended that they be taken in the year indicated by the course number.

Major in Physiology and Physics

See Department of Physiology, page 245.

Faculty Programs

For details, see Faculty Programs, page 185.

Medals

Attention is drawn to the Anne Molson Gold Medal in Mathematics and Natural Philosophy, and to the Horace Watson Gold Medal in Physics.

Course Descriptions*

198-101A, B. GENERAL PHYSICS FOR BIOLOGICAL SCIENCES AND PRE-MEDICAL STUDENTS. (4 credits; 3 hours lectures; 2 hours laboratory; 1 hour tutorial.) The object of this course is to give the students a basic understanding of the principles of physics, illustrating these, where possible, with current examples of their use in biology and medicine.

198-102A, B. ELECTROMAGNETISM FOR BIOLOGICAL SCIENCES AND PRE-MEDICAL STUDENTS. (4 credits; 3 hours lectures; 2 hours laboratory; *Prerequisite:* 198-101 or E10A plus E11B or equivalent; *Corequisite:* 189-201.) Electric field and potential. D.C. circuits and measurements. Capacitance. Magnetic field and induction. Semiconductor devices and their application. Feedback and control systems. Electromagnetic waves.
These courses, 101A, B and 102A, B together satisfy:
(a) physics requirements for Medical School;
(b) minimum B.Sc. requirements for post-matriculation physics.

198-110A. MECHANICS AND ELECTROMAGNETISM. (3 credits; 3 hours lectures.) This course is intended for those students who have completed nine collegial credits of physics in Health Science or the equivalent and now wish to transfer into Physical Science at McGill. It includes the elements of mechanics and electromagnetism treated with the use of calculus.

198-120A, B. WAVES, OPTICS. (3 credits; 3 hours lectures and tutorial, 3 hours laboratory in alternate weeks.) Wave phenomena and optics.

198-121A, B. MECHANICS. (3 credits; 3 hours lectures and tutorial, 3 hours laboratory in alternate weeks; *Corequisite:* 189-121 or equivalent.) The basic laws and principles of mechanics — a mathematical treatment.

198-122A, B. ELECTRICITY AND MAGNETISM. (3 credits; 3 hours lectures and tutorial, 3 hours laboratory in alternate weeks; *Prerequisite:* 198-121A or E14B or equivalent, 189-121 or equivalent.) The basic laws of electromagnetism; electrical measurements; direct current circuits.

198-214B. ASTROPHYSICS. (3 credits.) An introduction to astronomy and astrophysics with emphasis placed on methods of observations. Astronomy of time and position; solar system; stars; stellar structure and evolution, galaxies. PROFESSOR MORRIS

198-217B. PHYSICS AND THE LIFE SCIENCES. (3 credits, 3 hours lectures; *Prerequisites:* Biological Sciences CEGEP certificate or permission of instructor.) The examination of biological material using radiation including optical and electron microscopy, X-ray and neutron crystallography, radiation measurements in biological matter.

198-219A. STATISTICAL TREATMENT OF EXPERIMENTAL DATA. (3 credits; 3 hours lectures.) Errors in physical measurement. Probability distributions. Fitting of experimental data. Design of experiments. PROFESSOR LANGLEBEN

198-224B. PHYSICS OF MUSIC. (3 credits; 2 hours, conference 1 hour.) An introductory course requiring little mathematical background. Topics include harmonic motion, waveforms and wave motion; vibrating strings and air columns; loudness, pitch and timbre; selected string, woodwind, brass. percussion and keyboard instruments; dissonance and scales; recording and reproduction of music; acoustics. PROFESSOR LANGLEBEN

198-231A, B. MECHANICS. (4 credits; 3 hours lectures, laboratory alternate weeks; *Text:* Skinner, *Mechanics*.) Kinematics. Newton's Laws. Conservation Laws and Symmetry Principles. Two-body Problems. Motion of a Rigid Body. Oscillating Systems. Lagrange's Equations. PROFESSOR MARK

198-232A, B. ELECTRICITY AND MAGNETISM. (4 credits; 3 hours lectures, laboratory alternate weeks.) Electrical measurements; network theorems, resonant circuits, non-sinusoidal waves; semiconductors and modern devices. Electric and magnetic properties of matter. Electromagnetic theory, propagation of electromagnetic waves.
PROFESSORS HEDGCOCK AND MUIR

198-233A. THERMAL PHYSICS. (4 credits; 3 hours lectures, laboratory alternate weeks.) Temperature, heat, work, first law of thermodynamics, kinetic theory. The second law of thermodynamics, statistical mechanics, probability distributions. PROFESSOR MARTIN

*Honours courses are indicated when the fifth character of the six digit course number is 5 or 6.

198-235B. MATHEMATICAL PHYSICS. (3 credits; 3 hours lectures; *Prerequisite:* Mathematics 189-223A; *Corequisite:* Mathematics 189-315B.) Harmonic motion of simple and continuous systems with examples from mechanics and from electrical circuits; the motion of "imperfect" or perturbed systems; linear response; the discussion of heat flow, fluid flow, and electrical conductivity in two dimensional systems. PROFESSOR HARRIS

198-237B. NUCLEAR ENERGY AND ITS APPLICATIONS. (3 credits; 3 hours lectures.) Concepts of nuclear structure with emphasis towards the understanding of nuclear energy sources and radio isotopes. Comparison of various nuclear power systems. Uses of radio isotopes. Health aspects of radioactivity. Stress will be laid on the physical principles rather than on the mathematical background. PROFESSOR ROBSON

198-251A. CLASSICAL MECHANICS I. (3 credits; 3 hours lectures.) Kinematics. Conservation of energy; heat. Conservation of momentum. Lagrange's equations. Angular motion. Oscillators. Special relativity. PROFESSOR ROBSON

198-252A. ELECTRICITY & MAGNETISM. (2 credits; 2 hours lectures.) Electric and magnetic fields; dielectrics and magnetic materials; work and field energy; Maxwell's equations. PROFESSOR STAIRS

198-259D. LABORATORY. (3 credits.) PROFESSOR ROBSON

198-261B. CLASSICAL MECHANICS II. (2 credits; 2 hours lectures.) Rigid bodies. Deformations. Generalized coordinates Lagrangian Mechanics. Principle of least action. Hamiltonians. PROFESSOR ROBSON

198-262B. ELECTRICITY & MAGNETISM. (3 credits; 3 hours lectures.) Magnetism as a relativistic effect; electromagnetic waves; reflection of light waves; dipole radiation; Rayleigh scattering; motion of charged particles in electric and magnetic fields; introduction to physical and geometrical optics. PROFESSOR STAIRS

198-309A. DESCRIPTIVE PHYSICAL OCEANOGRAPHY. (3 credits; *Prerequisites:* Mathematics 189-120A, B and 121A, B.) Properties of sea water. Time and space distribution of ocean properties. Water masses and currents. PROFESSOR D'ANGLEJAN

198-314A. ASTROPHYSICS II. (3 credits; 3 hours lectures; *Prerequisite:* Physics 198-214B.) Topics introduced in 198-214B are treated in more detail and depth. Stellar spectra and classification; Saha ionization formula; introduction to theory of stellar atmospheres; equations of stellar structure and the mass-luminosity relation; nuclear energy generation; the Hertzsprung-Russel diagram. PROFESSOR MORRIS

198-319B. INTRODUCTION TO DYNAMICAL OCEANOGRAPHY. (3 credits; *Prerequisites:* Physics 198-231A, 309A; Mathematics 189-314A; *Corequisite:* Mathematics 189-315B.) Dynamics of ocean movements. Waves and tides. PROFESSOR INGRAM

198-328A, B. ELECTRONICS. (4 credits; 3 hours lectures, 3 hours laboratory; *Prerequisite:* Physics 198-232A, B.) Introduction to solid state devices. Amplifiers, feedback, digital circuits. Examples from modern instrumentation. PROFESSOR TRISCHUK

198-331A. CLASSICAL MECHANICS. (3 credits; 3 hours lectures; *Prerequisite:* Physics 198-231A, B.) Special relativity; Lorentz transformations, 4 vectors, 4 momenta, relativistic kinematics; mechanics, generalized coordinates, Lagrange equations, Hamiltonians, rigid bodies; small oscillations, coupled oscillators, waves. PROFESSOR de TAKACSY

198-334B. TOPICS IN APPLIED PHYSICS. (3 credits; 3 hours lectures; *Prerequisites:* Physics 198-231A, B, -232A, B.) Waves and resonances in physical systems; superposition, interference and diffraction; examples from mechanics, electronics, geophysics. Information theory: band widths, signal to noise ratio; examples from communications. Plane wave transmission. Matter waves in solid earth, oceans and atmosphere; acoustic waves. PROFESSOR AUSTIN

198-339B. ELECTRONICS. (4 credits; 3 hours lectures, 3 hours laboratory alternate weeks; *Prerequisite:* Physics 198-232A, B.) Semi-conductor diodes and transistors, transistor amplifiers; circuits with feedback. Pulse circuits, and pulse logic. PROFESSOR TRISCHUK

198-341B. STATISTICAL MECHANICS. (3 credits; 3 hours lectures; *Prerequisites:* 198-231A, B, 233A.) Ideal gases, density of states, quantum statistics, Bose-Einstein gas, Fermi-Dirac gas, degeneracy, interacting gases, radiation, fluctuations. PROFESSOR DAS GUPTA

198-346D. QUANTUM PHYSICS. (4 credits; 2 hours lectures; *Prerequisite:* Physics 198-231A, B.) Experimental origins of quantum mechanics. Basic postulates. Uncertainty principle; measurement. The Schroedinger equation, eigensolutions, the harmonic oscillator, angular momentum, matrix mechanics. Identical particles, the exclusion principle, spin, statistics. The hydrogen atom.
PROFESSOR PATEL

198-351A. CLASSICAL MECHANICS. (3 credits; 3 hours lectures.) Lagrangian mechanics; Variational methods and Hamiltonian mechanics; transformation theory and the Hamilton-Jacobi equation. Small vibrations treated first in matrix form as an eigenvalue problem. Group theory and symmetry classification of eigenvectors and eigenvalues.
PROFESSOR STRÖM-OLSEN

198-353D. THERMAL PHYSICS. (4 credits; 2 hours lectures.) Topics in thermodynamics and statistical mechanics. The laws of thermodynamics; thermodynamical variables and relations. Entropy, free energy, enthalpy, partition functions. Phase changes, Clausius-Clapeyron equation. Applications to physical systems; free particles, ideal gas. Fermi gas, photons, phonons, bosons.
PROFESSORS POUNDER AND ADDISON

198-355A. MATHEMATICAL PHYSICS I. (3 credits; 3 hours.) Application of mathematical methods in physics. Vectors in 3-space; Fourier analysis; complex analysis; differential equations of mathematical physics; eigenvalue problems.

198-357D. QUANTUM PHYSICS. (6 credits; 3 hours lectures.) Classical electron theory. Quantum Theory of the electron. One-electron problems. Several-electron problems. Radiation from an atom.
PROFESSOR HENZI

198-359B. LABORATORY. (3 credits; 4 hours.) A laboratory in general physics for Honours students.
PROFESSOR STRÖM-OLSEN *et al.*

198-365B. MATHEMATICAL PHYSICS II. (3 credits; 3 hours; *Prerequisite:* Mathematical Physics I.) Three dimensional waves, boundary conditions, use of special functions. Green's functions, applications to scattering, diffusion and heat conduction; stochastic processes, probability distributions, applications to radioactive decay, diffusion, energy distributions and fluctuations.
PROFESSORS WALLACE AND LAM

198-413A. TOPICS IN THE PHYSICAL BASIS OF PHYSIOLOGY. (3 credits; 3 hours lectures; for Majors in Physics, Chemistry, Mathematics or Physiology and Physics or the permission of the instructor.) The physical basis for the operation of cells (neurons) in the peripheral and central nervous system. We will examine the forces responsible for transmembrane ion movement and their role in the generation of electrical potentials and anatomical features of neurons responsible for their cable-like electrical behaviour; the mode of transmission of information along this cable-like structure and the mechanisms involved in the transmission of information between neurons.
PROFESSOR MACKEY (Physiology)

198-431A. APPROXIMATE METHODS IN QUANTUM MECHANICS. (3 credits; 3 hours lectures; *Prerequisite:* Physics 198-346D.) Approximate solutions of the Schrödinger equation. Applications. The Variational Method. Applications, spectral lines, selection rules and perturbation theory.
PROFESSOR ZUCKERMANN

198-432A. THEORY AND APPLICATIONS OF ELECTROMAGNETISM. (3 credits; 3 hours lectures; *Prerequisite:* Physics 198-232A, B, or E22A.) Laplace's equation in electricity and magnetism. Maxwell's equations and wave propagation. Application to transmission lines and antennae.
PROFESSOR WALLACE

198-434B. PHYSICAL AND QUANTUM OPTICS. (3 credits; 3 hours lectures.) Geometric optics. Polarization. Lasers, diffraction and coherence. Holography. Scattering. Optical properties of materials.
PROFESSOR MORRIS

198-437B. NUCLEAR AND PARTICLE PHYSICS. (3 credits; 3 hours lectures; *Corequisite:* Physics 198-346D.) Simple properties of nuclei and particles. Radioactivity and its applications. Particle interactions with application to astrophysics. Experimental high-energy physics. Accelerators and typical experiments. Quarks.
PROFESSOR KITCHING

198-438B. SOLID STATE PHYSICS. (3 credits; 3 hours lectures; *Corequisite:* Physics 198-346D.) Structure of solids. Thermal vibrations in crystals. Electrons in metals, semiconductors and insulators. Selected topics from magnetism, semi-conducting devices, superconductivity, etc.
PROFESSOR WALLACE

198-439A. LABORATORY. (3 credits; 4 hours laboratory; *Prerequisite:* Physics 198-328A, B.) Prescribed laboratory work.
PROFESSOR STRÖM-OLSEN *et al.*

198-449B. LABORATORY. (3 credits; 4 hours laboratory; *Prerequisite:* Physics 198-328A, B.) Supervised project work. PROFESSOR STRÖM-OLSEN *et al.*

198-454B. OPTICS. (3 credits; 3 hours lectures.) Geometrical optics, lenses, electromagnetism and physical optics, diffraction theory, image formation, holography. PROFESSOR MORRIS

198-459D. LABORATORY. (6 credits; 4 hours laboratory.) This laboratory will include experiments associated with electromagnetic theory, as well as the optional courses in U3. PROFESSOR STRÖM-OLSEN *et al.*

198-465D. MATHEMATICAL PHYSICS FOR CHEMISTS. (4 credits; 2 hours lectures; *Prerequisites:* Mathematics 189-314A and 315B.) Advanced dynamics, including theory of vibrations. Continuous systems. Eigenfunctions and eigenvalues. PROFESSOR DAS GUPTA

198-551A. QUANTUM THEORY. (3 credits; 3 hours lectures.) General formulation, scattering theory, WKBJ approximation, time-dependent perturbation, theory and applications, angular momentum, relativistic wave equations. PROFESSOR CONTOGOURIS

198-552D. ELECTROMAGNETIC THEORY. (6 credits; 3 hours lectures.) Electrostatics, boundary value problems, magnetostatics, Maxwell's equations. Wave equations, waveguides, radiation, multipoles and vector spherical harmonics. PROFESSOR CRAWFORD

198-557A. NUCLEAR PHYSICS. (3 credits; 3 hours lectures.) General nuclear properties, nucleon-nucleon interaction and scattering theory, radioactivity, nuclear models, nuclear reactions. PROFESSOR KITCHING

198-558A. SOLID STATE PHYSICS. (3 credits; 3 hours lectures.) Properties of crystals, lattice vibrations and thermal properties of insulators, free electron model and band structure, semiconductors, metals, optical properties. PROFESSOR HEDGCOCK

198-567B. PARTICLE PHYSICS. (3 credits; 3 hours lectures.) Basic interactions and symmetries, kinematics, scattering theory, phase space, symmetry and statistics, boson and baryon spectra, experimental techniques. PROFESSOR CONTOGOURIS

PHYSIOLOGY (552)

McIntyre Medical Building, Room 1023, Telephone 392-4342.

Physiology has its roots in many of the basic sciences including biology, chemistry, mathematics, and physics. As one of the central biomedical sciences, physiology overlaps with other biomedical sciences such as anatomy, biochemistry, pathology and pharmacology, and with psychology and biomedical engineering, and is one of the prime contributors of basic scientific knowledge to the clinical medical sciences.

The Department of Physiology at McGill is engaged in studies ranging from the cell and molecular to the population level in a variety of invertebrates and vertebrates, including man. A wide range of interest and expertise in physiology is represented by the staff of the Department, including cardiovascular, respiratory, renal, exercise, neurophysiology, immunology and biophysics. A number of faculty members in the Department have formal or informal liaisons with basic science (mathematics, physics, electrical engineering, chemistry) and clinical departments (medicine, surgery, paediatrics, neurology, psychiatry, anaesthesia), reflecting and reinforcing the close ties which physiology maintains with other disciplines.

Graduates at the B.Sc. level have found rewarding career opportunities in secondary school science teaching, government service, and laboratory technical assistance, e.g. in pharmaceutical houses, hospitals, and institutions of higher learning. Further, physiology is an excellent background for medicine or dentistry or for other post-graduate work, e.g. in physiology, experimental medicine, pharmacology and physiological psychology.

The programs offered in physiology differ in their orientation but they all contain a common, in depth, core of material covering cardiovascular, respiratory, renal, neurophysiology and immunology. The specified U1 courses are identical for all programs except the Joint Major and Joint Honours Program in Immunology and thus afford the student maximal flexibility before deciding on a particular program to follow in U2 and U3. Consult the Departmental secretary in Room 1023 for an adviser.

Faculty Program

For details see Faculty Programs, page 185.

Major Programs*

The following options are available:

MAJOR PHYSIOLOGY: Optional Orientation (58 credits.)

U2: Physiology 552-311D; Biology 177-301A, B, -303A or -305A; Biology 177-309A or 177-373A or Mathematics 189-232A, B.

U3: 12 Credits from Physiology 400 and/or 600 series, with at least 6 Credits from the 400 series.

MAJOR PHYSIOLOGY: BIOCHEMISTRY ORIENTATION (64 credits).

U2: as Optional Orientation but with
Chemistry 180-214B; Biochemistry 507-352D

U3: Physiology 552-411A and 3 Credits from Physiology 400/600 series, 3 credits from Biochemistry 400 series
Recommended: Chemistry 180-207A or 180-227A, 180-247A or 180-267A, -302A and -362B; Biology 177-302A, B.

MAJOR PHYSIOLOGY: CHEMISTRY ORIENTATION (65 credits)

U2: 26 Credits: Physiology 552-311D; Biology 177-201D; Chemistry 180-253B, -273A, -352A, B, -353A; Mathematics 189-315A, B; Physics 198-339B.

U3: 9 Credits: Physiology 552-411A and 3 Credits from Physiology 400/600 courses; Biology 301A.
Recommended: Biochemistry 400 series; Physiology 552-417A, -418B.

Note that the U1/U2 sequence may be identical for a student registered in our program or a Chemistry Major program. The option for Chemistry Major or Physiology Major can be decided at the end of U2, subject to approval.

Joint Major

MAJOR IN PHYSIOLOGY AND PHYSICS (71 credits)

U1: 26 Credits: Physiology 552-211D; Mathematics 189-222A, B, -223A, -315A, B; Physics 198-232A, B, -233A, -235B.

U2: 26 Credits: Physiology 552-311D; Mathematics 189-319B; Physics 198-328A, B or -339B, -231A, -413A; and 2 of Mathematics 189-317A, Physics 198-334B, -341B.

U3: 22 Credits: Physiology 552-417A, -418B; Physics 198-346D; 6 Credits in Physiology and 6 Credits in Physics to be selected in consultation with Physiology and Physics.

Honours Programs in Physiology

Admission and Continuation:

All admissions to Honours programs will be in U2, and a student must have a U1 GPA of 3.1, with no less than 70% in Physiology 211D. Admission to U3 requires a U2 CGPA of 3.2 with no less than 70% in required U2 Physiology

*The Major Program is in the process of being phased out.

courses. Decisions on borderline cases for admission to U3 will be heavily influenced by student standing in required U2 Physiology courses.

The Department reserves the right to restrict the number of entering students in the Honours programs. Students who do not maintain Honours standing may transfer their registration to the Faculty Program in Physiology.

Graduation: To graduate from an Honours Physiology Program the student will have a CGPA of 3.2 with a mark no less than 70% in all required Physiology courses.

Honours Programs in Physiology

(73-74 Credits)

U1: 29 Credits
Biology 177-201D
Chemistry 180-204A, B, -212A, -214B, -222A, B.
Mathematics 189-231A, B
Physiology 552-211D

U2: 24-25 Credits
Biochemistry 507-352D
Biology 177-301B*, -309A.
Physiology 552-311D

Neurophysiology option (in addition to the above):
Anatomy 504-421A
Physiology 552-351B

Physiology option (as with Neurophysiology option):**
Anatomy 504-261A, -312B

U3: 20-21 Credits

Neurophysiology option:
Biochemistry 507-455B
Mathematics 189-323A
Physiology 552-451A, -452B, -455D

Physiology option:
Physiology 552-459D, 612D, and 12 credits in the Physiology 400 and 600 level series.

Interdepartmental Honours in Immunology.
The Departments of Biochemistry, Microbiology and Immunology, and Physiology are offering an interdepartmental Honours program in Immunology. Physiology students interested in the program should contact Dr. W.S. Lapp.

Details of this program may be found on page 190 of the Calendar.

Course Descriptions

552-201A. PHYSIOLOGY OF MAN: ORGAN AND TISSUE PHYSIOLOGY. (3 credits; 2 hours lecture, with a conference and/or demonstration, and/or laboratory on alternate weeks; *Prerequisites:* College courses in Biology or Anatomy, and in Chemistry and Physics; with Organic Chemistry (212 or equivalent) as a pre- or corequisite.) Physiology of blood and body fluids, nerve and muscle, heart and vessels, lungs and gas transport. (For students in the School of Physical and Occupational Therapy, the School of Nursing, and the Faculty of Education, and for students in the Faculty of Science who are not in the Biological Sciences Core Curriculum described on page 194.

PROFESSOR POLOSA AND STAFF

*Section 2B followed by sections 1A and 1B.
**Students in the Physiology option may replace the sequence 189-231A, B and 177-309A with 189-222A, B and 189-315A, B.

552-202B. PHYSIOLOGY OF MAN: METABOLIC AND REGULATORY PHYSIOLOGY. (3 credits; 2 hours lectures, with a conference and/or demonstration and/or laboratory on alternate weeks; *Prerequisites:* College courses in Biology or Anatomy, Chemistry and Physics, with Organic Chemistry as a pre- or corequisite; or equivalent courses.) Physiology of excretion, digestion, organic metabolism and energy balance, endocrine control systems, reproduction, central nervous system and special senses. (For students in the School of Physical and Occupational Therapy, the School of Nursing, and the Faculty of Education, and for students in the Faculty of Science who are not in the Biology Core Curriculum.)
PROFESSOR POLOSA AND STAFF

PHYSIOLOGY 201A AND 202B are companion courses and it is recommended that they be taken in that sequence, but they may be taken in separate years or in the reverse sequence.

552-211D. MAMMALIAN PHYSIOLOGY WITH EMPHASIS ON THE PHYSIOLOGY OF MAN. (6 credits; First term, 3 hours lectures; Second term, 2 hours lectures; with 3 hours laboratory every second week in both terms; *Prerequisites:* As for Physiology 201A and 202B; Biology 201D if not already taken must be taken concurrently.) For students in the Faculty of Science, and for other students with permission of the Department.
PROFESSORS MacINTOSH, WELDON AND STAFF

552-311D. INTERMEDIATE PHYSIOLOGY. (6 credits; 3 hours of lectures, alternating with 2 hours of lectures and 3 hours laboratory, per week; *Prerequisites:* Physiology 211D, permission of the instructor.) The Physiology of: 1) the Nervous System, 2) the Immune System, 3) the Respiratory System, 4) the Cardiovascular System, and 5) the Renal System. Restricted enrolment.
PROFESSORS COHEN AND LAPP

552-312D. SELECTED TOPICS IN INTERMEDIATE PHYSIOLOGY. (3 credits, with timetable to include one half the hours of Physiology 311D; *Prerequisites:* Physiology 211D, permission of the instructor.) Any combination of three of the topics listed in 311D except the Nervous System; or a combination of the Nervous System and one other topic. Restricted enrolment.
PROFESSORS COHEN AND LAPP

552-313D. SELECTED TOPICS IN INTERMEDIATE PHYSIOLOGY. (3 credits, with timetable to include one half of Physiology 311D; *Prerequisites:* Physiology 312D, permission of the instructor.) The remainder of the topics in Physiology 311D not previously taken in Physiology 312D. Restricted enrolment.
PROFESSORS COHEN AND LAPP

552-351B. EXPERIMENTAL NEUROPHYSIOLOGY. (3 credits; 2 hours lecture, 3 hours laboratory or demonstration; *Prerequisites:* Physiology 211D, Anatomy 421A and concurrent enrolment in 311D or 312D. This course is primarily for Physiology Honours students, but is open to a limited number of others.) The course is aimed at providing the student with an understanding of modern experimental techniques in neurophysiology.
STAFF

552-411A. MOLECULAR PHYSIOLOGY. (3 credits; modular instruction, seminars and projects; *Prerequisites:* Physiology 211D, 311D (or concurrently): Chemistry 222, 204, 214; Biochemistry 451B recommended.) Principles of molecular interactions in and at membranes and cells, including a discussion of experimental techniques; and their application to structure-function relationships in cell adhesion, blood clotting and thrombosis, immunophysiology and other selected areas. Restricted enrolment.
PROFESSOR FROJMOVIC

552-417A, 418B. EXPERIMENTAL PHYSIOLOGY. (3 credits.) Individual project work under Faculty supervision. Restricted enrolment for selected students in Major and Honours Physiology programs.
STAFF AND GRADUATE STUDENTS

552-451A. ADVANCED NEUROPHYSIOLOGY I. (4 credits; 2 hours lecture and 6 hours laboratory weekly; *Prerequisite:* Physiology 351B. This course is primarily for Physiology Honours students but may be open to a limited number of others.) A systematic coverage of sensory and motor mechanisms in the central nervous system.
STAFF

552-452B. ADVANCED NEUROPHYSIOLOGY II. (4 credits; 2 hours lecture and 6 hours laboratory weekly; *Prerequisite:* Physiology 451A. This course is primarily for Physiology Honours students but may be open to a limited number of others.) A systematic coverage of the cellular physiology and morphology of the neurone, and mathematical approaches to the modelling of neurone function.
STAFF

552-455D. NEUROSCIENCE RESEARCH SEMINAR. (6 credits; 2 hours seminar; *Prerequitite:* Permission of the Department.) Selected topics in the neurosciences will be covered with the participation of staff, invited speakers, and students. Students will be required to write one essay per term on topics covered in that term.
STAFF

552-459D. PHYSIOLOGY SEMINAR. (6 credits; 2 hours seminar; *Prerequisite:* Permission of the Department.) Selected topics in mammalian physiology will be covered with the participation of staff, invited speakers, and students. Students will be required to write one essay per term on topics covered in that term. The course is open to Physiology Honours students and to other selected students.

PSYCHOLOGY (204)

Stewart Biology Building, Room W/1, Telephone 392-4708

Psychology is the scientific study of man's mind and behaviour. It is both a social and biological science. As a social science, psychology studies man in his interactions with other members of his own species. As a biological science, it regards man as the product of evolution and so studies him in biological perspective, comparing and contrasting his behaviour with that of other species.

The data of psychology are collected within the psychological laboratory by the use of experimental methods in the study of behaviour, and outside the laboratory by systematic observation of the behaviour of man and lower animals. The combination of experimentation and observation results in a knowledge of man's behaviour as he perceives his world, learns, directs his behaviour towards certain goals, and reacts to stress, frustration, and other men. Experimentation, laboratory techniques, observational procedures, measurement, and statistical methods are important tools of the psychologist in the study of behaviour.

Psychology has many interdisciplinary aspects. The study of many psychological problems involves knowledge drawn from other disciplines such as biology, physiology, linguistics, sociology, philosophy, and mathematics. For this reason a student with varied interests can frequently find a place for these interests in psychology.

Psychology is a young science so that explanations of the processes underlying observed phenomena are often theoretical and speculative. The major objectives of psychological study are to reduce the discrepancy between theory and fact and to provide better answers about why man thinks and behaves as he does.

Although a number of undergraduate courses in psychology have applied implications, applied training is in no way the purpose of the undergraduate curriculum. The purpose of that curriculum is to introduce the student to an understanding of the basic core of psychological knowledge, theory, and method, regardless of questions of practical application.

The B.A. or B.Sc. with a Major or Honours degree in psychology is not a professional qualification. It does not qualify the individual to carry on professional work in psychology. In the Province of Quebec the minimum requirement for membership in the Corporation of Psychologists of the Province of Quebec, the professional associaion governing the work of psychologists in the Province, is an M.A. or M.Sc. degree, or other equivalent degree. Undergraduate courses in psychology may prove of considerable value to students planning careers in professional fields other than psychology, such as medicine, education, social work, communication disorders, or business and industry.

Students who are interested in psychology as a career must pursue graduate studies. Persons who hold graduate degrees in psychology, usually the Ph.D., may find employment in universities, research institutes, hospitals, community agencies, government departments, large corporations, or may act as self employed consultants. At the graduate level, psychology has many specialized branches including social psychology, physiological psychology, experimental psychology, clinical psychology, child psychology, industrial psychology, community psychology, educational psychology, and others. Also at McGill at the undergraduate level, as indicated below, a student may pursue an undergraduate Major program in a wide variety of areas of specialization.

Although requirements for admission to graduate studies in psychology vary from one university to another, both the Honours and Major degrees in psychology may qualify the student for admission to many graduate schools, provided of course that sufficiently high marks are obtained.

The essential difference between the Honours and the Major program is that higher standards are required of Honours students. Honours students also have an opportunity to work in small groups closely with staff members.

Program Information

The Psychology Department offers 12 different options in its 54 credit programs. Except where otherwise stated, each of these programs may be taken as Major, Honours or Faculty programs. The differences between these three categories of programs are outlined below. The descriptions of the 8 options available in the B.Sc. program follow. See page 143 for descriptions of the options available only in the B.A. program.

Prerequisites

It is expected that most students who major in Psychology will have taken introductory Psychology and Statistics at the collegial level. In the first year all major students must take Psychological Statistics (204-305A or B). Those students who have not taken a collegial level statistics course must also take Psychology 204-204A or B in addition to the other courses in their program.

A student who has not taken an introductory psychology course at the collegial level may major in psychology by taking Psychology 204-201D in their U1 year and also the courses in Psychological Statistics 204-204A or B and 204-305A or B.

Major Program

The following options are available in the Major program in Psychology:

1. General Psychology
2. Experimental Psychology
3. Cognition and Thinking
4. Child Psychology
5. Personality and Abnormal Psychology
6. Human Communications Disorders
7. Psychobiology
8. Quantitative Psychology

Call the Chief Adviser, Ms. Olga Favreau (392-4694) to be assigned to an adviser. In the First year of any of the above programs all Major students take Psychology 204-305A, B. Detailed descriptions of the programs will be found starting on page 251. Students majoring in psychology must obtain a minimum grade of C in all 54 credits required by their program. A grade lower than C may be made up by taking another equivalent course (if there is one), by successfully repeating the course, or by successfully writing a supplemental examination (if there is one).

Honours Program

Honours in Psychology prepares students for graduate study, and so emphasizes practice in the research techniques which are used in graduate school and professionally later on. Honours students take Psychology 204-380D in the first year of their program (normally U2) and they take Psychology 204-480D and 204-481D in the second year (normally U3). These courses have limited enrolments, and admission to Honours is selective. There is normally room for 30-35 new Honours students each year. Students with a cumulative grade point average of 2.8 or better, are eligible to apply.

Students are normally accepted into Honours at the beginning of U2, and the two-year sequence of Honours courses continues through U3. Students who have

had introductory psychology and statistics at the institution preceding McGill, *who have an exceptional academic record,* and who apply for admission to Honours in U1 will be considered for acceptance. Failure to be admitted to Honours in U1 will not prejudice application for admission in U2.

Applications can be obtained from the general office of the Department of Psychology, Room W8/1, Stewart Building. The applications must be completed and returned to the general office by September 1 of the year for which admission to Honours is sought. Candidates will be advised of the Department's decision by letter shortly after September 1. For information (other than application forms) about the Honours program, phone Professor Don Donderi, Honours Committee Chairman, at 392-4693.

Faculty Programs

A Faculty Program in Psychology is a sequence of courses which represents a lesser degree of specialization than a Major or an Honours program. A Faculty Program may be made up of any of the Major programs with the substitution of 6 credits from U2 Psychology courses for Psychology 204-211D and 204-305A or B. The joint program in psychology and mathematics is also a Faculty Program. For further details see program information at beginning of the Science section (see page 185).

Program Descriptions

The courses in the programs are ordered sequentially so that it will normally take three years to complete a program. The Major and Faculty Programs all include 18 credits in each of U1, U2, and U3. Students may, with the consent of their Academic Adviser, substitute up to 6 credits in a program. Any further changes must be approved by the Associate Dean of the Faculty.

When selecting optional program courses from other departments, it is the students responsibility to see that she or he has taken the appropriate prerequisites and / or obtained permission of the department where necessary.

None of the B.A. or B.Sc. programs provides professional training. They are all intended to give the student a general academic background in the interest area indicated by their titles. Those who are interested in practising psychology professionally must obtain graduate degrees at least at the Master's level, and should preferably continue on to the Ph.D. The Honours programs are most specifically designed to train students who intend to go to graduate school. However, it is important to remember that admission to graduate studies is highly competitive, and that no degree guarantees entry to advanced study. Students with a Major in psychology may also, if they have chosen their courses appropriately and obtained high enough standing, be admitted to graduate studies, although they may sometimes be required to complete a qualifying year. Students in Faculty Programs who decide to go into graduate study in psychology will most probably have to complete a qualifying year first. Further information about advanced study in Psychology may be obtained from the American Psychological Association's Handbook on the topic. It is usually on sale in the University Bookstore.

Graduate Study

Students planning to work for a graduate degree in Psychology are advised to include Psychology 204-300A, -301B, -302A, -303B, -400D and -450D among their courses. The adviser to Major students will, whenever possible, assist students in planning their courses to coincide with their professional aims. Most graduate schools require not only a record of high achievement, but also adequate performance on some entrance examinations such as the Graduate Record Examination and the Miller Analogies Test, as well as letters of recommendation.

Faculty Programs

For details, see Faculty Programs, page 185.

Major Programs

GENERAL PSYCHOLOGY OPTION

This program is intended to give maximum flexibility to students in choosing their own courses. In this 54 credit program at least 36 and as many as 54 credits must be in psychology courses. The latter must include Psychology 204-305A or B and 12 credits in U3 psychology courses. If fewer than 54 credits in psychology are taken, then the difference between that number and 54 must be made up by selecting courses in other departments from the following list (the list may not be up to date in September 1974; the relevant department should be consulted before choosing). Students in the Faculty of Science who select arts courses from this list must have a total of at least 54 credits in science courses among the 90 credits for the B.Sc. degree. Students are expected to have whatever prerequisites are described in the Calendar.

Anatomy 504-421A; Anthropology 141-202B, 203A, 206A, 228A, 303B, 305B, 312A, 316A, 321B, 428B, 437B, 440A; Biochemistry 507-455B; Biology 177-111A, 112B, 201D, 205D, 274A, B, 303A, 305A, 325A, 326B, 351B, 352A, 370B, 372B, 385B, 386A, 391A, 392B, 394B, 471B, 488A, 493B; Computer Science 308-220A, B; Geography 183-214A, 215B, 217B, 300B; Linguistics 104-200A, B/104-201A, B, 230A, 241B, 321B; Mathematics 189-120A, B, 121A, B, 217A, 218B, 223A, 224A, 314A, B, 317A, 318A, 323A, 324B, 327B, 328B, 417A, 423A, 424B, 447B; Philosophy 107-210A, 211B, 313D, 321A, 322B, 410D; Physiology 552-201A, 202B, 211D; Sociology 166-210A or 212A, 222A, 223B, 225B, 227A, 247B, 303A, 309A, 417B.

EXPERIMENTAL PSYCHOLOGY OPTION

U1 Courses: Psychology 204-211D, 305A, B; plus 12 credits selected from 200 and 300 level courses for which you have the prerequisites.

U2 Courses: At least 9 credits from: Psychology 204-300A, 301B, 315A, 302A, 303B, 308D; plus enough credits from the following list to make up 18: Psychology 204-307D, 309B, 310D, 335A, 336B, 342A.

U3 Courses: Psychology 204-400D plus 12 credits selected from: Psychology 204-401D, 416A, 417B, 403B, 404B, 406B, 423A, 424B, 425A, 430B, 450D.

COGNITION AND THINKING OPTION

U1 Courses: Psychology 204-305A, B; plus 9 credits selected from *List A:* Psychology 204-201D, 211D, 301B, 302A, 303B, 340A, 341B, 401D, 404B, 425A; plus at least 3 credits from *List B:* Psychology 204-214D, 300A, 304D, 307D, 308D, 310D, 335A, 336B, 400D, 403B, 405B, 406B, 408A, 410D, 423A, 424B, 431B, 450D, 452D, 455D; plus at least 3 credits selected from *List C:* Philosophy 107-200D, 212B, 210A, 211B, 313D, 321A, 322B, 350D, 351D, 317A, 318B; Art History 123-200D, 335A, 440D; Biology 177-111A, 112B, 205D, 386B, 392B; Mathematics 189-120A, B, 121A, B, 205A, 206B, 217A, 218B, 231A, B, 232A, B, 271D, 318A, 328B; Linguistics 104-200A, B, 201A, 321B, 350A, 351B, 360A, 361B; Computer Science 308-100A, B, 200A, 210A, B, 300A, B; Physics 198-E10A, E11B, E15A, E20A, B, 224B. A total of 18 credits must be taken.

U2 Courses: At least 9 credits from List A; at least 3 credits from List B; at least 3 credits from List C for a total of 18 credits.

U3 Courses: At least 9 credits from List A, 6 credits of which must be Psychology 204-401D; at least 3 credits from List B; at least 3 credits from List C for a total of 18 credits.

Note: Honours courses must be substituted for List B options.

CHILD PSYCHOLOGY OPTION

U1 Courses: Psychology 204-211D, 305A, B, plus 6 credits selected from: Psychology 204-201D, 300A, 301B, 302A, 303B, 306A, plus 6 credits selected, in consultation with adviser, from Sociology, Anthropology, and Biology.

U2 Courses: Psychology 204-304D plus 9 credits to be selected, in consultation with adviser, from any 300 level course in psychology provided prerequisites have been met; plus 3 credits to be selected, in consultation with adviser, from Biology, Anthropology and Sociology.

U3 Courses: Psychology 204-410D plus 9 credits to be selected, in consultation with adviser, from any 400 level course in psychology provided prerequisites have been met; plus 3 credits to be selected, in consultation with adviser, from Anthropology, Biology and Sociology.

PERSONALITY AND ABNORMAL PSYCHOLOGY OPTION

U1 Courses: Psychology 204-305A, B; plus 15 credits to be selected from: Psychology 204-201D, 211D and courses selected, in consultation with adviser, from Biology, Sociology, Anthropology and Philosophy.

U2 Courses: Psychology 204-337A, 338B plus 12 credits selected from: Psychology 204-300A, 301B, 302A, 303B, 304D, 308D, 309B, 332A, 404B; and/or selected subjects, in consultation with adviser, from Biology, Physiology, Sociology and Philosophy.

U3 Courses: Psychology 204-491D, 408A; plus 9 credits from Psychology 204-310D, 400D, 405B, 412A, 433B, 451D, 458B, 434B.

HUMAN COMMUNICATION DISORDERS OPTION

U1 Courses: Psychology 204-214D, 211D, 305A, B, plus 6 credits to be selected from the following relevant courses: Psychology 204-301B or 306A, 302A, 303B, 304D, 308D, 310D, 340A, 341B, 404B, 425A, 434B, 455D, 458D.

U2 Courses: Linguistics 104-200A, 201B; Psychology 204-300A, 337A plus 6 credits to be selected from the list of relevant courses above.

U3 Courses: Psychology 204-408A; Linguistics 104-350A, 351B, plus 9 credits to be selected from the list of relevant courses above.

PSYCHOBIOLOGY OPTION

U1 Courses: Psychology 204-300A, 301B, 211D, 305A, B; Physiology 552-211D.

U2 Courses: Psychology 204-308D plus 12 credits selected from: Psychology 204-302A, 303B, 309B, 337A, 342A; Biology 177-201D, 305A, 318B, 386B, 391A; Anatomy 504-421B; Computer Science 308-220A, B.

U3 Courses: Six credits from the following: Psychology 204-422A, 423A, 424B; plus 12 credits (a maximum of 6 credits may be substituted from the U2 list) selected from the following: Psychology 204-404B, 430B; Biology 177-302B, 487B, 488B, 493B; Pharmacology 459-461D.

QUANTITATIVE PSYCHOLOGY OPTION

U1 Courses: Mathematics 189-222A, B; Computing Science 308-200A, B, or 220A, B; plus 6 credits to be selected from Psychology 204-201D, 302A, 303B.

U2 Courses: Mathematics 189-323A, 324B; plus 3 credits selected from Mathematics 189-314A, B, 317A, 318A, 327B, 328B; plus 9 credits selected from Psychology courses (other than 204-204A, B; 305A, B), which must include Psychology 204-302A, 303B if not taken in U1.

U3 Courses: Psychology 204-335A, 336B; Mathematics 189-423A, 424B, 417A, 447B; plus 6 credits selected from psychology courses other than Psychology 204-204A, B, 305A, B.

Course Descriptions*

NOTE: *Prerequisites:* A basic two-semester introductory course in psychology is a prerequisite for all psychology courses with the following exceptions: 204-201D, 204A, B, 203A, 206B, 305A, B. All 200 and 300 courses are open to students other than Major and Honours students in psychology provided the prerequisites are met and unless otherwise specified.

For more detailed information about courses in psychology see *Handbook of Courses and Programs in Psychology* which is on sale at the Bookstore.

204-201D. BASIC ISSUES IN PSYCHOLOGY. (6 credits; 2 lectures, 1 conference.) This course deals with the social and biological basis of motivation, emotion, perception, learning, and thinking, with special emphasis on the nature of man and his relation to society. **NOTE:** This course is required of all students majoring in psychology who have not had an introductory psychology course, and is also required for particular Major programs in psychology, at the discretion of the instructors; it is recommended for students at all levels.
PROFESSOR MELZACK

204-203A. EMOTION. (3 credits; 2 lectures, 1 conference.) A review of the available knowledge bearing on the explanation of the behaviour and experience that characterize emotional states, such as anger, elation, anxiety and depression. Implications of current psycho-physiological research on emotion for the problems of health, the arts, and social life will be explored. **NOTE:** This course has no prerequisites; it is designed for students in areas other than psychology. Students in psychology Honours and Major programs may take this course as an elective but may not use credit in this course towards meeting requirements of prescribed programs.
PROFESSOR BINDRA

204-204A, B. INTRODUCTION TO PSYCHOLOGICAL STATISTICS. (3 credits; 2 lectures, 1 conference. Required of all Majors in Psychology and students intending to enter Honours in Psychology.) The statistical analysis of psychological data; frequency distributions; graphic representation; measures of central tendency and variability; elementary probability theory; the normal probability curve; simple correlation methods; elementary sampling theory and tests of significance. *Text:* Ferguson: *Statistical Analysis in Psychology and Education,* 3rd ed. **NOTE:** This course is a prerequisite for Psychology 204-305A, B, 307D, 406B, 453D.
PROFESSOR FERGUSON

204-206B. COMPUTER AND MAN. (3 credits; 2 lectures, 1 conference.) This course considers the basic structures of computers, computer-based psychological theories, the problem of artificial intelligence and the impact of computers on society and man's concept of himself. **NOTE:** This course has no prerequisites; it is designed for students in areas other than psychology. Students in psychology Honours and Major programs may take this course as an elective but may not use credit in this course towards meeting requirements of prescribed programs.
PROFESSOR BREGMAN

204-211D. LABORATORY METHODS IN PSYCHOLOGY. (3 credits; 1 lecture, 1 conference plus independent laboratory work. This course is recommended for students planning a career in psychology.) Training in laboratory methods is given by requiring students to prepare and present demonstrations of psychological experiments. *Text:* Johnson & Solso: *An Introduction to Experimental Design in Psychology: A Case Approach,* 1971.
PROFESSOR DONDERI

204-214D. INTRODUCTION TO HUMAN COMMUNICATION DISORDERS. (6 credits; 2 lectures, 1 conference; Not given in 1974-75.) An introductory survey of speech and language pathology, audiology, and aural rehabilitation, including diagnostic and rehabilitation procedures, theoretical bases, and current research findings. *Text:* Davis & Silverman: *Hearing and Deafness,* 3rd ed.
PROFESSOR BARTHOLOMEUS

204-300A. MOTIVATION I. (3 credits; 2 lectures, 1 conference.) Motivation is considered in terms of the internal and external factors which act to direct behaviour. Basic principles of motivation are developed, based on the behaviour of both animals and humans. Emphasis is on the evolutionary development of behaviour, and therefore the material considered is mainly from animals. *Texts:* Cofer: *Motivation and Emotion;* Bindra and Stewart: (Eds.) *Motivation.* **NOTE:** This course is prerequisite for Psychology 204-309B.
PROFESSOR WHITE

*A course is restricted to Honours students when the fifth character of the six digit course number is 7 or higher.

204-301B. LEARNING. (3 credits; 2 lectures, 1 conference.) A survey of contemporary approaches to research on learning. Topics will include historical background, theories of learning, biological limits, and the application of learning paradigms to practical problems. PROFESSOR ———

204-302A. PERCEPTION. (3 credits; 2 lectures, 1 conference.) The organization of sensory input into a representation of the environment. Topics such as perception and the moving observer, pattern recognition, computers and perception, speech perception, sensory-motor rearrangement. PROFESSOR MARLEY

204-303B. THINKING. (3 credits; 2 lectures, 1 conference.) An introduction to the study of higher mental processes. Topics such as: development of thought and language, problem solving, concept formation, imagery, artificial intelligence. PROFESSOR MARLEY

204-304D. CHILD PSYCHOLOGY. (6 credits; 2 lectures, 1 conference.) A study of current theory and knowledge about psychological processes in children, with particular attention to the development of intelligence, language and social behaviour. **NOTE:** This course is a prerequisite for 204-410D and 412A. PROFESSOR MacDOUGALL

204-305A, B. PSYCHOLOGICAL STATISTICS. (3 credits; 2 lectures, 1 conference. *Prerequisite:* Psychology 204-204A or B.) An introduction to the design and analysis of experiments, including analysis of variance, trend analysis, nonparametric statistics, and multiple regression. *Text:* Ferguson: *Statistical Analysis in Psychology and Education,* 3rd ed. **NOTE:** This course is prerequisite for Psychology 204-453D, 456D. PROFESSORS OLSON AND RAMSAY

204-307B. MULTIVARIATE ANALYSIS OF PSYCHOLOGICAL DATA. (3 credits; *Prerequisite:* Psychology 204-305A, B; Not given in 1974-75.) An introduction to the analysis of multiresponse data by such methods as multivariate analysis of variance, factor analysis, and multidimensional scaling.

204-308D. PHYSIOLOGICAL PSYCHOLOGY. (6 credits; 2 lectures, 1 conference.) The neural basis of motor and sensory functions, motivation, attention, and learning. *Text:* Milner: *Physiological Psychology.* PROFESSOR MILNER

204-309B. MOTIVATION II. (3 credits; 2 lectures, 1 conference; *Prerequisite:* Psychology 204-300A.) The development of motivation in individual organisms is studied, with emphasis on the relationship between emotional and motivated behaviour. Human data are considered, including material from the personality theory and abnormal behaviour literature. Reading consists of assignments made during the course. PROFESSOR WHITE

204-310D. NATURE AND MEASUREMENT OF HUMAN ABILITIES. (6 credits; 2 lectures, 1 conference.) An introduction to the description and theory of human ability, its correlates and the role of learning and heredity in its formation; factors producing changes in ability. Test construction and methods of measurement. *Text:* Tyler: *The Psychology of Human Differences.* PROFESSOR ———

204-315A. THE EXPERIMENTAL ANALYSIS OF BEHAVIOUR. (3 credits; 2 lectures, 1 conference.) Basic principles of behavioural modification and plasticity. The principles will be drawn from reference experiments in the animal learning literature, but their interspecies generality and relevance to man will be stressed. Topics will include: instrumental learning, behavioural units and contingencies, schedules of reinforcement, stimulus control, Pavlovian conditioning, punishment and aversive behaviour, motivational interactions and biological constraints on learning. PROFESSOR MILLENSON

204-330A. INTRODUCTION TO SOCIAL PSYCHOLOGY. (3 credits; 2 lectures, 1 conference.) Introduction to basic concepts and theories in the area of social cognition, attitudes, and interpersonal processes. **NOTE:** This course is prerequisite for 204-331B. PROFESSOR TAYLOR

204-331B. SELECTED TOPICS IN SOCIAL PSYCHOLOGY. (3 credits; *Prerequisite:* Psychology 204-330A. No lectures will be given.) An intensive study of selected research areas in social psychology. Topics will be selected each year that reflect the interests of the instructor and students. The course will emphasize independent study and student-led seminars in which students present and discuss papers which they have prepared. PROFESSOR TAYLOR

204-332A. INTRODUCTION TO PERSONALITY. (3 credits; 2 lectures, 1 conference.) A broad survey of theories of personality. The student is introduced to most of the major theoretical positions. **NOTE:** This course is prerequisite for Psychology 204-433B. PROFESSOR ———

204-335A. FORMAL MODELS OF PSYCHOLOGICAL PROCESSES. (3 credits; 2 lectures, 1 conference; *Prerequisite:* An elementary understanding of computer science, probability theory, and finite mathematics, e.g. Computer Science 308-200A,B, and Mathematics 189-205A, or permission of instructor.) An introduction to formal theories in psychology, and to related experiments. The content of the course will be partially determined by the interests of the class. Topics such as: individual and group decision making, pattern recognition, problem solving, language processing, mathematical learning theory will be discussed.
PROFESSOR MARLEY

204-336B. QUANTITATIVE PSYCHOLOGY. (3 credits, 3 lectures; Not given in 1974-75.) Principles of scientific measurement, various specialized least squares models, multidimensional scaling, game theory, and information theory. *Text:* Coombs, Dawes and Tversky: *Mathematical Psychology.*
PROFESSOR RAMSAY

204-337A. INTRODUCTION TO ABNORMAL PSYCHOLOGY. (3 credits; 2 lectures, 1 conference.) A survey of the genetic, physiological and environmental origins of intellectual and emotional disorders. **NOTE:** This course is prerequisite for 204-338B.
PROFESSOR PIHL

204-338B. BEHAVIOUR PROBLEMS. (3 credits; *Prerequisite:* Psychology 204-337A; 2 lectures and 1 conference.) An introduction to psychotic behaviour problems, character disorders, experimental methods of pathology and behaviour modification. **NOTE:** This course is prerequisite for Psychology 204-491D.
PROFESSOR PIHL

204-340A. THE PSYCHOLOGY OF LANGUAGE. (3 credits; *Prerequisite:* An introductory course in Psychology or Linguistics; 2 lectures, 1 conference.) The nature of the psychological processes involved in speech and language is considered in relation to maturational and environmental factors. *Text:* Slobin: *Psycholinguistics.* PROFESSOR TUCKER

204-341B. SELECTED TOPICS IN PSYCHOLINGUISTICS. (3 credits; 2 lectures, 1 conference.) The course will discuss the psychological aspects of bilingualism in individual, school and society.
PROFESSOR MACNAMARA

204-342A. HORMONES AND BEHAVIOUR. (3 credits; 2 lectures, 1 conference.) The role of hormones in organization of CNS function, as effectors of behaviour, in expression of behaviours and in mental illness.
PROFESSOR ZOLOVICK

204-380D. SEMINAR ON EXPERIMENTAL PROBLEMS. (6 credits; 3 hour seminar. For Honours students only.) Honours students present current literature reports in individual program areas, for discussion. Then each student starts an original investigation in collaboration with an individual staff member.
STAFF

204-400D. CONTEMPORARY PSYCHOLOGICAL THEORY. (6 credits; 2 lectures, 1 conference.) Recent progress towards the integration of psychological knowledge into a coherent framework is discussed with reference to theoretical ideas and experimental evidence in the areas of learning, motivation, perception, thinking, personality, and mental abnormality.
PROFESSOR BINDRA

204-401D. COGNITIVE PROCESSES. (6 credits; 2 lectures, 1 conference; *Prerequisites:* Psychology 204-301B, 302A, 303B.) The study of the acquisition, storage, transformation and use of knowledge. Theories based on associationist, stimulus-response, Gestalt, computer and logical models of thought are evaluated. Application to processes of concept formation, problem solving, language and memory. PROFESSOR BREGMAN

204-403A. MODERN PSYCHOLOGY IN HISTORICAL PERSPECTIVE. (3 Credits; 2 lectures, 1 conference.) A survey of the social and ideological influences on psychology from its philosophical beginnings through the period of the schools to its modern situation.
PROFESSOR RAMSAY

204-404B. ATTENTION AND MEMORY. (3 credits; 2 lectures, 1 conference. This course is restricted to U3 students.) A critical examination of recent research on how man selects, codes, stores and retrieves information. Phenomena of visual and auditory storage, coding and rehearsal in memory, imagery, the nature of forgetting and mechanisms of retrieval are discussed in relation to information processing models. PROFESSOR OLSON

204-405B. AGING. (3 credits; *Prerequisite:* Psychology 204-304D or permission of instructor; 2 lectures, 1 conference.) A review and discussion of the available knowledge on how the process of aging affects the individual's intellectual and personality functioning with attention to the interacting processes. Research as related to intellectual and perceptual changes, memory and adaptive capacity will be assessed and problems related to research in this field considered.
PROFESSOR WIDGOR

204-406B. PSYCHOLOGICAL TESTS AND MEASUREMENT. (3 credits; *Prerequisite:* Psychology 204-204A or B or its equivalent. 2 lectures, 1 conference.) An introduction to the theory and practice of psychological and educational measurement. Special attention will be paid to the theoretical problems involved in the use of measurement techniques and statistics in psychology. A wide variety of tests will be discussed in the areas of clinical, social, educational, and personality psychology. PROFESSOR MACNAMARA

204-408A. PRINCIPLES OF BEHAVIOUR MODIFICATION. (3 credits; *Prerequisites:* Psychology 204-337A and 204-300A or permission of instructor; 2 lectures, 1 conference.) An introduction to theory and research relevant to the modification of human behaviour. Emphasis will be on those studies in which specific behaviour — sub-optimal or maladaptive — is altered in accordance with contemporary principles of learning. Some opportunity for field work may be available. *Text:* Kanfer & Phillips: *Learning Foundations of Behavior Therapy.* PROFESSOR POSER

204-410D. ADVANCED CHILD PSYCHOLOGY. (6 credits; 1 lecture, 2-3 group discussions; *Prerequisite:* Psychology 204-304D.) A study of selected areas of child psychology including cognitive and perceptual development, learning and developmental processes, language development, applications to education, cross-cultural perspectives on development, and social and personality development. PROFESSOR SHULTZ

204-411D. ADVANCED SOCIAL PSYCHOLOGY. (6 credits; 3 lectures, 1 conference.) A broad coverage of various sources of influence that shape personalities and give structure to human behaviour. The attempts of social philosophers to explain man's social nature are contrasted with contemporary, more experimental approaches, e.g. cognitive, learning-theory, group process, and cultural. PROFESSOR LAMBERT

204-412A. DEVIATIONS IN CHILD DEVELOPMENT. (3 credits; *Prerequisite:* Psychology 204-304D; 2 lectures, 1 conference.) This course will consider deviations in perceptual, cognitive, social and emotional development. Emphasis will be on research and theory which underline the complex interactions among constitutional and environmental factors which lead to such disorders as brain injury, psychosis, mental retardation, learning difficulties and behaviour problems. *Text:* Quay & Werry (Eds.) *Psychopathological Disorders of Childhood, 1972.* PROFESSOR S. CAMPBELL

204-415D. STUDY OF ADOLESCENTS. (6 credits; 1 lecture, 1 conference, 3 hours field work: Not given in 1974-75.) The course deals with the adolescent's (a) bodily changes; (b) sex-related behaviour and interests; (c) peer and family relationships; (d) patterns of response to authority; (e) identity strivings; (f) learning, achievement, and vocational concerns; (g) patterns of motivated and emotional behaviours; (h) types of coping style. Students will work with troubled adolescents as tutors and advisers.

204-416A. REINFORCEMENT AND BEHAVIOUR I. (3 credits; 1 three-hour meeting plus optional tutorial. *Prerequisite:* one of the following: 204-301B, 211D, 315A or permission of instructor.) A conceptual analysis of reinforcement and conditioning phenomena, with special emphasis on their systematic relation to learning, motivation and emotion. Topics include: fundamental units of behaviour, the Law of Effect, classical conditioning, adjunctive behaviour, conditioned emotional states, frustration, experimental anxiety, and incentive theory. PROFESSOR MILLENSON

204-417B. REINFORCEMENT AND BEHAVIOUR II. (3 credits; 1 three-hour meeting plus optional tutorial hour. *Prerequisite:* Psychology 204-416A or permission of instructor.) Advanced topics in behaviour theory; autoshaping, avoidance theories, punishment, information and aversiveness, coping behaviour, controllability and predictability, learned helplessness, acquired reinforcement, and observing behaviour. PROFESSOR MILLENSON

204-422B. NEUROCHEMICAL BASIS OF BEHAVIOUR. (3 credits; 2 lectures, 1 conference. *Prerequisite:* Psychology 204-308D.) Anatomical, biochemical and physiological aspects of aminergic systems in the CNS and current theories regarding function of these systems in the mediation of behaviour. PROFESSOR ZOLOVICK

204-423A. ADVANCED PHYSIOLOGICAL PSYCHOLOGY I. (3 credits; 2 lectures, 1 conference; *Prerequisite:* Psychology 204-308D or permission of instructor.) Topics covered in this course will be centred around the problems of motivation, emotion, and reinforcement, and the role of the limbic system in these functions. Student participation in a seminar format will be encouraged, in an attempt to study these problems in terms of the research and theories which bear on them. **NOTE:** This course is first half of what was formerly Psychology 204-420D. PROFESSOR WHITE

204-424B. ADVANCED PHYSIOLOGICAL PSYCHOLOGY II. (3 credits; 2 lectures, 1 conference; *Prerequisite:* Psychology 204-308D or permission of instructor.) Several systems will be chosen from the following list for detailed study, as far as possible, by a seminar approach. Motor system, somatosensory system, auditory system, physiological bases of learning. The neural modelling of behavioural processes will be emphasized. **NOTE:** This course is the second half of what was formerly Psychology 204-420D.
PROFESSOR MILNER

204-425A. LANGUAGE AND THOUGHT. (3 credits; *Prerequisite:* a course in psycholinguistics or in linguistics or in the philosophy of language; 2 lectures, 1 conference.) The meaning of meaning, the psychological nature of linguistic competence, the relations between language and thought, between language and logic, machine translation, the learning of language by infants — these are among the topics which will be discussed in the light of contemporary theory and research in psychology, linguistics and philosophy. The course is for students with a serious interest in language. PROFESSOR MACNAMARA

204-430B. CONSTITUTIONAL FACTORS IN BEHAVIOUR. (3 credits; Seminar.) Individual differences in motivational and temperamental characteristics will be examined in relation to constiutional-experimental interactions with special reference to genetic factors, blood-chemistry variables, and environmental influences. PROFESSOR STERN

204-431B. PHILOSOPHICAL PROBLEMS IN PSYCHOLOGY. (Also Philosophy 107-493B. 3 credits; 1 2-hour seminar, 1 conference; Not given in 1974-75.) The relationship of modern psychological theories and data to ethical problems will be studied. Particular examination will be made of the problems of freedom and responsibility.

204-433B. SELECTED TOPICS IN PERSONALITY. (3 credits; *Prerequisite:* Psychology 204-332A; 2 lectures, 1 conference.) An intensive study of the behavioural approach to personality. The emphasis is on a functional analysis of personality. PROFESSOR ———

204-434B. SELECTED TOPICS ON PSYCHOTHERAPY AND BEHAVIOUR THERAPY. (3 credits; 2 lectures, 1 conference; *Prerequisite:* Psychology 204-337A.) This course will briefly evaluate the therapeutic intervention strategies with neurotics. Approaches to individual, marital and group therapy will also be discussed. The difficulties in specifying objectives for intervention, ethical issues, and research on the therapeutic efficacy will be discussed.
PROFESSOR WRIGHT

204-450D. EXPERIMENTAL PROBLEMS. (6 credits; *Prerequisites:* Psychology 204-300A, 301B, or 302A and permission of instructor.) Practical experience in research methods. The class is divided into sections of 10-12 students which meet for 3 hours each week. Specific procedures may vary among sections, but in addition to class meetings students carry out one or more research projects and write a thesis based on one of them. Primarily for Major and Partial students who intend to proceed to graduate studies. **NOTE:** Students will be admitted on the basis of a written application on forms available from the Department (Room W8/1). Applications must be submitted by September 1. STAFF

204-451D. STUDY OF THE INTELLECTUALLY AND EMOTIONALLY HANDICAPPED: (6 credits; 1 lecture, 1 conference, 4 hours laboratory; *Prerequisite:* Permission of instructor.) The effects of environmental deprivation on intellectual, motivational and emotional development will be examined. Students will participate in a service and research project in community programs dealing with children from disadvantaged environments who have educational and emotional handicaps. PROFESSOR DOUGLAS

204-453D. PSYCHOLOGY AND CONTEMPORARY ISSUES. (6 credits; *Prerequisites:* Psychology 204-204A or B, 305A or B and two other psychology courses. 1 seminar a week.) A student-directed course. Students select their own topics of study and work on them, under the direction of staff members, singly or in groups. Students also evaluate the work done — theoretical papers or research reports — on a pass-fail basis. STAFF

204-454D. LABORATORY METHODS IN PSYCHOBIOLOGY. (3 credits; *Prerequisite:* permission of instructor; 1½ hour seminar; Not given in 1974-75.) Methods used in comparative and physiological studies are reviewed and evaluated with emphasis on the assumptions and principles underlying the major techniques. Laboratory demonstrations and exercises. *Text:* Skinner: *Neuroscience, A Laboratory Manual.*
PROFESSOR ————

204-455D. RESEARCH METHODS IN PSYCHOLINGUISTICS. (6 credits; 3 hour seminar. Restricted to graduate and final year students in psychology and linguistics.) Various research approaches used by psychologists and linguists will be critically evaluated.

Each student will select and conduct a major research project which he will discuss with other seminar members during the course of the year. The use of basic, relevant methodological tools will be reviewed and the effects of experimenter expectancy will be discussed. PROFESSOR TUCKER

204-458B. METHODS OF BEHAVIOUR CHANGE. (3 credits; *Prerequisites:* Psychology 204-408A and permission of instructor; 1 lecture, 2 conferences.) Various techniques of behaviour change will be evaluated in the light of their practical efficacy. In the course of supervised field work, in hospitals and schools, students will have an opportunity to apply some of these techniques systematically. PROFESSOR POSER

204-480D. CONTEMPORARY PSYCHOLOGICAL THEORY. (6 credits. For Honours students only. 2 lectures, 1 conference.) Recent progress towards the integration of psychological knowledge into a coherent framework is discussed with reference to theoretical ideas and experimental evidence in the areas of learning, motivation, perception, thinking, personality, and mental abnormality. PROFESSOR BINDRA

204-481D. EXPERIMENTAL PROBLEMS. (6 credits; 2 hours plus laboratory; for Honours students only.) A seminar on current problem areas. Supervised investigation of a special field. STAFF

204-491D. ADVANCED STUDY IN BEHAVIOURAL DISORDERS. (6 credits; *Prerequisites:* Psychology 204-337A and 338B and permission of instructor; 3 hours lecture or tutorial.) A critical examination of the necessary conditions in behavioural problems. Emphasis will be on analysis of theoretical positions and experimental findings as they relate to both etiology and treatment. PROFESSOR PIPER

204-492A/204-493B. SEMINARS IN SPECIAL TOPICS. (3 credits.) Each seminar under this title is given at the discretion of an individual instructor. A list of all seminars offered in a particular year, together with the description of topics and conditions of admission, will be published annually in the Department's Handbook of Courses and Programs. A student may not register in more than one of these seminars in any year. STAFF

COURSES IN THE FACULTY OF MANAGEMENT

The Faculty of Management offers the following courses in the Behavioural Sciences: 280-221A, Behavioural Science I (3 credits); 280-222B, Behavioural Science II (3 credits); 272-420A, Group Dynamics and Interpersonal Relations (3 credits); 272-421B, Strategies of Management and Organization Development (3 credits); 275-458A, Consumer Behaviour (3 credits); 275-495A, Marketing Research (3 credits).

Where appropriate to a student's program, and with the permission of the program adviser, one or more of these courses may be taken for credit by students enrolled in programs in psychology. Programs in such fields as personnel management, administrative behaviour, and consumer behaviour are also available to students through a cooperative arrangement between the Faculty of Management and the Department of Psychology.

1.1 ADMINISTRATIVE OFFICERS

ROBERT E. BELL, C.C., B.A., M.A.(U.B.C.), D.Sc.(U.N.B., Laval), LL.D.(Tor.), Ph.D., F.R.S., F.R.S.C.
Principal and Vice-Chancellor

LEO YAFFE, B.Sc., M.Sc.(Man.), Ph.D., F.C.I.C., F.A.P.S., F.R.S.C.
Vice-Principal (Administration)

EIGIL PEDERSEN, B.A.(SGWU), Ed.D.(Harvard), M.A. Vice-Principal (Academic)

DALE C. THOMSON, D.F.C., B.A.(Alta.), D.U.(Paris) Vice-Principal (Planning)

MAURICE McGREGOR, M.B., B.Ch., M.D.(Rand), F.R.C.P.(London), F.R.C.P.(C)
Vice-Principal (Health Care)

ALLAN C. McCOLL D.F.C., B.Com., C.A. Director of Finance

COLIN M. McDOUGALL, D.S.O., B.A. Secretary-General

JEAN-PAUL SCHULLER, B.A.(Ottawa) Registrar

ERNEST R. AMBROSE, D.D.S., F.I.C.D., F.A.C.D. Dean of the Faculty

KENNETH C. BENTLEY, D.D.S., M.D., C.M., F.I.C.D.
Dental Surgeon-in-Chief, Montreal General Hospital

WILLIAM D. SANDERS, B.Sc., D.D.S. Assistant Dean (Undergraduate)

GERARD H.G. WEINLANDER, DKFM(Vienna), D.D.S. Co-ordinator, Teaching Clinics

2 GENERAL INFORMATION

2.1 REQUIREMENTS FOR ENTRANCE

The minimum requirement for admission to the study of dentistry is the satisfactory completion of EITHER the Collegiate program in the Province of Quebec OR two full years in a four-year program leading to the B.A. or B.Sc. degree (or the equivalent thereof). Admission is selective, and students are reminded that fulfilment of the minimum requirements by no means guarantees acceptance.

FACULTY OF DENTISTRY

All applicants must have included one full year course in each of the following subjects in their pre-dental program:

Mathematics
Physics, with laboratory
Inorganic or General Chemistry, with laboratory
Organic Chemistry, with laboratory
General Biology or Zoology, with laboratory (half year of Botany and half year of Zoology will be accepted, but not one year of Botany alone)

On the successful completion of the second year of the Dental program, students who have entered this Faculty from the Faculty of Science at McGill University may, under certain circumstances, apply for their B.Sc. degree. Students wishing to be considered must submit a written application to the office of the Associate Dean of Science at least four months before the required convocation.

Canadian applicants are requested to undertake the Canadian Dental Association Aptitude Test and have the results sent to the Faculty. Detailed information may be obtained from the Administrator, Dental Aptitude Test Program, The Canadian Dental Association, 234 St. George Street, Toronto, Ontario, M5R 2P2.

Candidates applying from the United States should take the American Dental Association Aptitude Test and have the results sent to the Faculty of Dentistry.

Application for admission to the Faculty of Dentistry must be made upon the regular application form which may be obtained from the Secretary of the Faculty. As the number of students in each class is limited, application should be made early and in any case not later than the *first of March*. Each application must be accompanied by a *non-returnable fee of $15.00* in the form of a cheque or money order payable to McGill University. Students registered at McGill are exempt from this fee.

A reservation fee of $50.00 is payable by the applicant within ten days of the receipt of notice that he has been accepted for admission. This fee will be credited towards the applicant's University fees, but *will not be returned* if he fails to register at the opening of the session.

2.2 PROFESSIONAL PRACTICE

Applicants are reminded that a University degree in dentistry does not in itself confer the right to practise the profession of dentistry. It is necessary to comply with the dental laws of the country, state, or province in which it is proposed to begin practice. *Students therefore are advised to register their qualifications at the beginning of their University course with the licensing body in the area in which they intend to practise.*

2.2.1 PROVINCIAL REQUIREMENTS

2.2.1.1 Province of Quebec

In the case of those who intend to practise in the Province of Quebec, it is essential that the candidate register with the Order of Dentists of Quebec upon commencing his dental studies. Further information may be obtained from the Registrar of the Order of Dentists of Quebec, 801 Sherbrooke Street East, Montreal, Quebec H2L 1K4.

Candidates who have successfully completed the regular program as given in the Faculty of Dentistry, McGill University, may be granted the licence; provincially, by the satisfactory completion of the Order of Dentists of Quebec progress survey throughout the program; and nationally, by registering with the National Dental Examining Board prior to the completion of the final year of studies.

2.2.1.2 Other Provinces

The following is a list of the provincial Dental Boards in Canada. Students are advised to write to those listed below for information whenever they are in doubt as to the regulations of any province.

ALBERTA – Dr. G.E. Decker, 10240 – 124 Street, Edmonton.
BRITISH COLOMBIA – Dr. D.J. Yeo, 325–925 West Georgia St., Vancouver
MANITOBA – Dr. S.M. Clamen, 308 Kennedy St., Winnipeg 2.
NEW BRUNSWICK – Dr. H.H. Peters, 440 Champlain St., Saint John.
NEWFOUNDLAND – Dr. D.K. Peters, 103 Lemarchant St. St. John's.
NOVA SCOTIA – Dr. D.G. Pentz, 1584 Robie Avenue, Halifax.
ONTARIO – Dr. K.F. Pownall, 230 St. George St., Toronto 180.
PRINCE EDWARD ISLAND – Dr. A.L. MacLean, 293 Water St., Summerside.
QUEBEC – Dr. M.B. Archambault, 801 Sherbrooke Street East, Montreal, Quebec H2L 1K4.
SASKATCHEWAN – Dr. F.R. Smith, 105 – 21st. Street East, Saskatoon.

2.2.2 NATIONAL DENTAL EXAMINING BOARD OF CANADA

The National Dental Examining Board of Canada issues a certificate to successful candidates which may be registered with the Canadian provincial licensing boards for the purpose of securing a licence to practise. This privilege will be granted only on receipt of a proper application dated not later than March 30th of the year of graduation. Failure to apply by that date will entail the passing of an examination in order to receive the certificate.

Candidates must hold a degree in dentistry from a school of dentistry approved by the Council on Education of the Canadian Dental Association at the time of graduation; or be certified by the Dean or Registrar of a University as a bona-fide senior year student of an approved dental school.

Detailed information may be obtained from the Registrar, National Dental Examining Board of Canada, 100 Bronson Street, Suite 601, Ottawa, Ontario K2P 0L9.

2.2.3 NATIONAL DENTAL EXAMINING BOARD OF THE U.S.A.

Students intending to practise in the United States are advised to contact the Secretary, Council of the National Board of Dental Examiners, American Dental Association, 211 East Chicago Ave., Chicago, Illinois 60611. Information should also be obtained from the Secretary of the licensing board of the specific state in which the student intends to practise.

2.3 REGISTRATION

Registration for the 1974-75 session will be held on Tuesday, September 3. Information and forms for payment of fees will be forwarded in the summer. All lectures will begin on Wednesday, September 4, 1974.

2.4 RESIDENCE

Students who wish to apply for residential accommodation must do so on special forms which may be obtained from the Secretary, Co-Ed Residences, McGill University, 3935 University Street, Montreal, Quebec, H3A 2B4.

2.5 FEES

The University reserves the right to make changes without notice in its published scale of fees it, in the opinion of the Board of Governors, circumstances so require. Fees are not refundable, except under special conditions as described in the *General Announcement.*

2.5.1 TUITION FEES

Annual undergraduate tuition fee	$570.00
(all years)	60.00
Student Services fee (all years)	26.50
Student Society fee (all years) (including Dental Review)	$326.25
By instalments: Each of two instalments (plus one half of the applicable equipment supplies and rental fees noted below)	

2.5.2 REPEATING A YEAR

Students repeating a year pay fees as listed above.

2.5.3 EQUIPMENT SUPPLIES AND RENTALS

In First year – Instrument & equipment (rental)	75.00
In Second year – Handpiece (rental) (low speed)	25.00
In Second year – Handpiece (rental) (high speed)	25.00
In Second year – Instrument & equipment (rental)	125.00
In Third year – Handpiece (rental)	25.00
In Third year – Clinic handpiece (rental)	50.00
In Third year – Instrument & equipment (rental)	150.00
In Fourth year – Handpiece (rental)	25.00
In Fourth year – Clinic handpiece (rental)	50.00
In Fourth Year – Instrument & equipment (rental)	150.00

2.5.4 AD EUNDEM FEE

Transfer students entering any year above the first pay a special *ad eundem* fee of $10.00

2.5.5 GENERAL REGULATIONS

1. Students entering the University for the first time are required to pay their fees either by mail or in person at the Accounting Office.

The first instalment is due 10 days after registration, the second instalment before January 15, 1975.

A late payment fee of $10.00 is charged for payment within the first 30 days; and $25.00 thereafter.

2. Students who have completed one or more years and intend to register in the succeeding year must pay one half of the total sessional fee by mail or in person to the Accounting Office before August 23, 1974. Instructions for paying fees in advance will be mailed to all returning students, either with their Reports of Sessional Standing or a short time later. Students who have been notified by the University of the award of a scholarship, bursary or student loan, and who require this for payment of the first instalment of fees, must obtain from the Student Aid Office, McGill University, permission to delay payment of fees.

The second instalment is due January 15, 1975. A late payment fee of $10.00 is charged for payment within the first 30 days; and $25.00 thereafter.

3. Students registering late must pay their fees at the time of registration, failing which they become subject to the late payment fee and the provisions of the following paragraph:

As soon as possible after the prescribed dates for the payment of fees the Chief Accountant will send to the Dean of each Faculty a list of the registered students who have not paid their fees. The Deans will thereupon suspend them from attendance until such time as the fees are paid or a satisfactory arrangement is made with the Chief Accountant.

2.5.6 GRADUATION FEE

Application by students who expect to graduate at the Spring Convocation must be filed by March 1st of each year and by those who expect to graduate at the Fall Convocation by August 1st of each year. An application form will be mailed to each eligible sutdent and must be returned to the Registrar's Office together with the graduation fee of $10.00 by the appropriate date listed above. This fee will cover all expenses in connection with graduation including academic dress. It is the student's responsibility to ensure that his or her name is included in the graduation list.

Note: *Special fees* are given in the *General Announcement.*

2.6 INSTRUMENTS

In addition to the rental fee, certain items of equipment and supplies are purchased by each student. Approximate cost of this equipment is as follows:

First year	$275.00
Second year	$150.00
Third year	$ 50.00

Books are not included in these amounts.

2.7 MEDALS AND PRIZES

FOURTH YEAR:

Dr. A.W. Thornton Gold Medal awarded to the student in the final year attaining the highest overall standing in the four years of the dental undergraduate program.

Dr. J.K. Carver Medal awarded to the student in the final year attaining the second highest overall standing in the four years of the dental undergraduate program.

Dr. A.L. Walsh Prize awarded to the student in the final year for meritorious achievement in Oral Medicine throughout the clinical undergraduate program.

Dr. W.G. Leahy Prize awarded to the student in the final year for meritorious achievement in Restorative Dentistry throughout the clinical undergraduate program.

THIRD YEAR:

Dr. Gerald Franklin Prize awarded to the student attaining the highest standing in the final examinations in the third year of the dental undergraduate program.

International College of Dentists Prize (Canadian Section) awarded to the student attaining the second highest standing in the third year of the dental undergraduate program.

SECOND YEAR:

Dr. D.P. Mowry Prize awarded to the student attaining the highest standing in the final examinations in the second year of the dental undergraduate program.

Dr. I.K. Lowry Prize awarded to the student attaining the second highest standing in the second year of the dental undergraduate program.

Dr. K.I. Melville Prize awarded to the student attaining the highest aggregate standing in the Basic Science subjects in the first two years of the dental undergraduate program.

Dr. W.C. Bushell Prize awarded to the student attaining the highest aggregate standing in Dental Anatomy and Applied Sciences in the first two years of the dental undergraduate program.

FIRST YEAR:

Dr. Arthur S. Solomon Prize awarded to the student attaining the highest standing in the final examinations in the first year of the dental undergraduate program.

Dr. M. Donigan Prize awarded to the student attaining the second highest standing in the first year of the dental undergraduate program.

GRADUATE PRIZE:

Dr. L.A. Cohn Prize awarded to the student in the Diploma or Masters program in Restorative Dentistry and Prosthodontics for outstanding achievement.

2.7.1 SCHOLARSHIPS, BURSARIES AND LOANS

Details of University and other scholarships and bursaries are given in the *Undergraduate Scholarships Announcement*, which may be obtained from the Registrar's Office.

The University has a fund from which loans may be made to students of good academic standing.

The Order of Dentists of Quebec has created a loan fund to assist students of the Faculty who are registered with the Order. The W.K. Kellogg Foundation Loan Fund and the Dental Students' Society Dean D.P. Mowry Memorial Fund are available to assist any student registered in the Faculty.

Loans are made only to students in the upper years. Applications for all loans should be made to the Student Aid Office.

2.8 CLINICAL FACILITIES

The McGill University Dental Clinic is an integral part of the Department of Dentistry of the Montreal General Hospital. At the Clinic, under the guidance of the dental staff, students are taught to carry out all phases of clinical dentistry and related laboratory procedures.

The Third and Fourth year students attend this Clinic daily except for such time as may be taken up by lectures or other University work. Students entering the Third year must spend the period between the last of the regular May examinations and the middle of June in the Clinic.

An abundance of teaching material in all aspects of dentistry is always available. Integration with the Montreal General Hospital offers the facilities of all departments in the Hospital and allows the students to observe a wide variety of interesting and unusual cases under treatment.

Graduate students, interns, registered nurses, and dental assistants are in attendance.

2.9 LIBRARY

Undergraduate dental students are fortunate to have, for their use, a modern dental library on the first floor of the Strathcoma Anatomy and Dentisty Building. There is a wide selection of major textbook publications in all fields as well as a world-wide assortment of periodical literature. There is a full time librarian in charge as well as assistants to enable the staff and students to obtain the advice and help they require in the field of dentistry. The library is open daily and in the evenings for the use of the dental community.

3 PROGRAM FOR THE DEGREE OF D.D.S.

3.1 CURRICULUM*

Candidates for the degree of Doctor of Dental Surgery must have completed the requirements for entrance as noted in Section 2.1, before entering upon the four-year program in this Faculty.

The dental curriculum is as follows:

FIRST YEAR
Anatomy, General
Biochemistry
Dental Anatomy and Applied Sciences
- Dental Materials
- Occlusion
- Operative Dentistry
- Prosthodontics (Fixed)

Histology, General
Histology, Oral
History, Dental
Orientation in Dentistry
Physiology
Statistics

SECOND YEAR
Anaesthesiology, Local
Community Dentistry
Microbiology and Immunology
Occlusion
Operative Dentistry
Orthodontics
Nutrition
Pathology, General
Pathology, Oral
Periodontics
Pharmacology, General
Preventitive Dentistry
Prosthodontics (Fixed)
Prosthodontics (Removable)
Radiology

* It should be understood that this curriculum is subject to change without notice.

THIRD YEAR
Anaesthesiology
Behavioural Science
Dental Pharmacology and Therapeutics
Endodontics
Epidemiology and Dental Health Care
Medicine
Occlusion
Operative Dentistry
Oral Diagnosis and Pathology
Oral Surgery
Orthodontics
Paedodontics
Periodontics
Practice Administration
Prosthodontics (Fixed)
Prosthodontics (Removable)
Radiology

FOURTH YEAR
Endodontics
Essay
Jurisprudence
Occlusion
Oral Surgery
Operative Dentistry
Oral Medicine Seminar
Orthodontics
Paedodontics
Periodontics
Practice Administration
Prosthodontics (Fixed)
Prosthodontics (Removable)
Restorative Dentistry Seminar

590-425P Essay: Final year students must write an essay of approximatetly 4,000 words. The subject will be announced early in September.

3.2 ATTENDANCE

Students who have failed to meet the requirements in any lecture, laboratory or clinical course may be denied the right to attempt the final examination in that course.

3.3 HEALTH INSURANCE

A compulsory health insurance plan for non-Canadian students is operable throughout the University. *All non-Canadian students will be required to participate.* The annual premium will be payable with the first instalment of fees.

3.4 REGULATIONS GOVERNING EXAMINATIONS AND ADVANCEMENT

Occasional oral and written examinations are held throughout the session to test the progress of the student. Final examinations in most subjects are held at the end of the session.

A minimum of 60 per cent in each subject is required to pass and 80 per cent for Honours.

At the discretion of Faculty, the following regulations will apply:

All examinations in each year must be passed before a student is allowed to advance to the next.

Candidates who fail at the regular examinations in not more than two subjects may be allowed to sit supplemental examinations before the beginning of the following session. These examinations are held during the week preceding the regular opening of the session.

Candidates who fail in three subjects at the regular examinations or who are unsuccessful in the supplemental examinations may be permitted to repeat the year.

Candidates who fail at the regular examinations in more than three subjects will be required to withdraw.

A student repeating a year must attain, at the regular examination, satisfactory standing in all courses. Failing this, the student will be required to withdraw.

A single grade D (60%) is considered a passing mark. In the presence of additional D or F grades, all D grades are considered failures.

A student who, in any year, fails in a subject in which practical or clinical work is necessary, may be required to fulfil prescribed additional clinical or laboratory work before presenting himself for supplemental examination. A fee may be attached to these requirements.

The Faculty reserves the right to require the withdrawal of any student at any time, if, in the opinion of his instructors, he displays unprofessional conduct or is incompetent.

The quality of the written language will be considered in evaluating examinations.

Applications for supplemental examinations must be made to the Dean's office at least 30 days before the date set for each examination, and must be accompanied by a fee of $10.00 for each examination.

Subjects comprising practical and theoretical components shall be reported as a single mark in final examinations.

3.5 QUALIFICATIONS FOR THE DEGREE

1. Candidates for the degree of Doctor of Dental Surgery shall have attended courses of instruction for four full sessions in the Faculty of Dentistry of this University.
2. Students of other universities who may be admitted to advanced standing in this University are required to pass a qualifying entrance examination and thereafter the same examinations as regular students of this University.
3. Candidates for the degree, admitted in advanced standing as noted above, shall have completed at least the final year of the course at this University.
4. Every candidate for the degree shall provide evidence of satisfactory completion of all of the required subjects which comprise the dental curriculum.

3.6 DENTAL INTERNSHIPS

3.6.1 INTERNSHIP and RESIDENCY PROGRAMS

a) Rotating Internships

The Faculty of Dentistry, through the McGill-Hospitals Dental Internship Committee, offers eight rotating dental internships in Montreal hospitals beginning *July 1* each year. Applications for internships should be received prior to *December 31* in any year. Further details may be obtained by writing to the Chairman of the Internship Committee.

b) **First Year Residency in Paedodontics**

One candidate is selected each year for this one-year program beginning *July 1.* For further information apply to the Director of Dental Services, Montreal Children's Hospital, 2300 Tupper Street, Montreal, Que. H3H 1P3.

c) **Residency Program in Oral Surgery**

One candidate is selected each year for this program beginning *July 1.* For further information apply to the Department of Oral Surgery, Faculty of Dentistry, McGill University, P.O. Box 6070, Station A, Montreal, Que. H3C 3G1.

d) **Residency in Prosthodontics**

One candidate is selected each year for this program beginning *July 1.* For further information apply to the Department of Prosthodontics, Faculty of Dentistry, McGill University, P.O. Box 6070, Station A, Montreal, Que. H3C 3G1.

3.6.2 STUDENT INTERNS

In the senior year each student serves as a student intern for a minimum period of two weeks. During this time he lives in the Montreal General Hospital with room and uniforms provided. He serves each morning in the Oral Diagnosis and/or Screening Clinics and is on call with the resident intern for the remainder of the entire day for the diagnosis and dental treatment of hospitalized cases both on the wards and in the main hospital operating theatres with the attending oral surgeons. In this way the student is afforded an excellent opportunity to observe and to participate in dental services under hospital conditions. During this student internship, the student functions in a similar capacity for a few days at the Montreal Children's Hospital.

3.7 DENTAL OFFICER TRAINING PLAN

The Dental Officer Training Plan is offered by the Canadian Forces to undergraduates interested in a military career following graduation.

The plan is designed to assist dental students financially, in that it provides for payment of tuition, instruments, supplies and books, and in addition, pay in accordance with rank. The plan also provides training during the summer months for the undergraduate as an officer in the Armed Forces.

To be eligible a student must be able to meet the Canadian Forces standards for enrolment and be academically acceptable, without condition, to any one of the four professional years of the dental faculty.

Full details of the Dental Officer Training Plan may be obtained from Canadian Forces Recruitment and Selection Unit, 1254 Bishop Street, Montreal, Quebec H3G 2E3.

4 COURSES OF INSTRUCTION

Division of Community Dentistry

4.1 BEHAVIOURAL SCIENCE

Lecturer – C. Yung

Third Year (590-327P)

This course consists of lectures and seminars designed to introduce the student to the requirements for the better understanding of human beings, particularly dental patients. The discussions will touch on such topics as the characteristics and behaviour patterns of cooperative and uncooperative patients; fear and anxiety and methods of patient management; motivation and learning, etc.

4.2 EPIDEMIOLOGY AND DENTAL HEALTH CARE

Professor – S. Lee, (Acting Chairman)
Associate Professor – J. Stamm
Assistant Professors – S. Ducic; G. Gibbs; M. Steinmetz; F. White.

Third Year (513-311P)

This course consists of lectures and seminars designed to introduce students to the methods used in the assessment of health in a population. With this background in health evaluation, the student is introduced to modern approaches in the provision of community health services. Various facets of dental health care delivery are discussed. (Text – David F. Striffler, *The Dentist, His Practice, and His Community.)*

4.3 HISTORY, DENTAL

Lecturer – M. Hebert
Guest Lecturer – C.C. Bourne

First Year (590-112P)

A consideration of the evolution of dentistry as a profession from *Zinjanthropus hominid* to the present, comparing primitive conditions and methods of the past with those of today with special attention to the contributions of outstanding personalities and events.

4.4 JURISPRUDENCE, DENTAL

Lecturer – P. Graham

Fourth Year (590-412P)

A discussion of the Dental Act, the Health Act, and other laws governing the practice of dentistry.

The responsibility of the dentist under the laws of the Province and his position as defendant in suits for damages, as plaintiff in suits for fees and as expert witness in cases between other parties are fully explained. Legal and taxation aspects of the business arrangements of dental practice are also considered. (Text – Harvey Sarner, *Dental Jurisprudence)*

4.5 NUTRITION

Lecturer – Mrs. J.H. Geggie

Second Year (590-227P)

This course consists of lectures and seminars on nutrition and diet as they affect both systemic and oral health. The emphasis is on nutritional status assessment and diet counselling with particular reference to dental health. (Text – Abraham E. Nizel, *Nutrition in Preventive Dentistry; Science and Practice)*

4.6 PRACTICE ADMINISTRATION

Lecturers – J.A. Claener and Staff

Fourth Year (590-417P)

A study of the orderly arrangement and administration of all the useful facilities and services needed for a professional practice, based on needs, demands, regulations, system, analysis, psychology and common sense in dealing with people.

It is concerned with all the functions of the dental office which are not part of operative, technical or diagnostic procedures. (Text – Robert K. Steinaff, *Dental Practice Administration)*

Third Year (590-317P)

An introduction to the spectrum of available dental equipment and supplies and how they are most effectively used in practice of general dentistry.

4.7 PREVENTIVE DENTISTRY

Associate Professors – J.W. Stamm; G.H.G. Weinlander
Lecturer – J. Claener

Second Year (590-228P)

This course consists of lectures to give a scientific understanding of the initiation and progression of the major dental diseases. In addition, the student is introduced to the most important techniques and agents which are used in the prevention of these diseases. Included is a look at the current and future research in this field. (Texts – *The Dental Clinics of North America, October, 1972;* Ernest Newburn, editor, *Fluorides and Dental Caries;* Simon Katz, James L. McDonald, George K. Stookey, *Preventive Dentistry in Action.)*

4.8 STATISTICS

Associate Professor – J.W. Stamm

First Year (590-126P)

This course consists of an introduction to the principles of descriptive and inferential statistics as applied to dental science. The course stresses the proper collection, tabulation and presentation of data. In addition, it is intended to familiarize the student with those statistical concepts which will help in the interpretation of dental professional literature. (Text – Olive Jean Dunn, *Basic Statistics: A Primer for the Bio-medical Sciences).*

Division of Preventive and Restorative Dentistry

4.9 DENTAL ANATOMY AND APPLIED SCIENCES

Associate Professor — W.D. Sanders (Chairman)
Assistant Professors — J.F. Giacomelli, D.E. Laszlo
Lecturers — J.T. Elo; J.D. Fenwick; S.M. Kennedy; C.L. Moran; D.T. Shizgal; M.D. Shizgal
Demonstrators — S.S. Blum; G.M. Griffiths; Ć.L. Herscovitch; T.C. Postans; G. Poznak; I. Seltzer; A.F. Small; M. Szikman; A. Tekela; Roxanne M. Whitehead.

4.9.1 DENTAL ANATOMY

First Year (590-114P)

Instruction in the form and function of normal teeth and supporting tissues, and the development of manual dexterity in the student through drawings and waxing procedures, and sectioning of natural teeth.

4.9.2. APPLIED SCIENCES

First Year (590-115P)

An introduction to the theory and practical application of procedures relating to fixed prosthodontics and to operative dentistry.

4.9.3. OCCLUSION

First Year

Occlusal concepts are developed through an appreciation of the anatomy and physiology of the masticatory system. (Text — Wheeler, *Textbook of Dental Anatomy and Physiology*, 4th. ed.: Saunders)

4.10 DENTAL MATERIALS

Assistant Professor — J.M. Gourlay
Lecturers — W. Kowal; M. Pinchuk

First Year (590-115P)

Introduction to basic physical and chemical properties of dental materials used.

Second Year (590-215P)

Presentation in greater detail of the physical and mechanical properties as well as chemical and structural features of clinical dental materials. (Texts — E.W. Skinner, *The Science of Dental Materials*, 5th Edition; Peyton et al., *Restorative Dental Materials).*

4.11 ENDODONTICS

Associate Professor — B. Sedlezky (Chairman)
Lecturers — R.J.C. David; D.J. Munro; B.H. Wiener
Demonstrator — P. Lawrence
Guest Lecturer — (Chosen each year)

Fourth Year (590-411P)

A concentrated course in the theory and clinical practice of endodontics, correlated with the teachings of the Departments of Microbiology and Immunology, Pathology, Histology, Oral Surgery and Dental Anatomy given midway through the junior year and followed by weekly clinical sessions until the end of the senior year. (Texts — L.I. Grossman, *Root Canal Therapy;* Sommer, Ostrander and Crowley, *Clinical Endodontics;* E. Nicholls, *Endodontics;* Ingle, *Endodontics,* Lea and Febiger; Bender and Seltzer, *The Pulp,* Lippincott)

4.12 OPERATIVE DENTISTRY

Associate Professor — G.J. Harasymowycz (Acting Chairman)
Professor — E.R. Ambrose
Associate Professors — Harry Rosen; W.D. Sanders; G.H.G. Weinlander
Assistant Professors — J.R. Fong Chong; H. Greenwald; M. Shevell; J.D. Townsend
Lecturers — N.I. Hanna; P. Hwang; W. Kowal; B.L. Mendel; Z.B. Nyeste; I.I. Silver; D.Solomon; J.W. Whitehead
Demonstrators — S. Blanshay; A.S. Israel; G.M. Johnston; C.P. Jolin; F.A. Kay; J.E. Kehoe; I. Seltzer

Second Year (590-214P)
Third Year (590-314P)
Fourth Year (590-414P)

Students receive the basic and, where indicated, some advanced theoretical laboratory and clinical instruction in: diagnosis and treatment planning; prevention; the "biomechanical" treatment for diseased and/or traumatized tooth structure; the anatomical restoration of individual teeth in all age groups; to physiologic form and function; with the restorative materials generally used by the dental practitioner. (Texts — Howard, *Atlas of Operative Dentistry:* Mosby; Bell and Grainger, *Basic Operative Dentistry Procedures:* Lea & Febiger; Gilmore, *Textbook of Operative Dentistry:* Mosby; Schultz, *Operative Dentistry:* Lea & Febiger; Ingraham and Koser, *An Atlas of Gold Foil and Rubber Dam Procedures:* West Orange County, California.)

4.13 ORTHODONTICS

Associate Professors — M.D. Rennert (Chairman); R.W. Faith
Assistant Professor — A.J. Colle
Lecturer — S.S. Miller
Demonstrator — M. Weinstock
Guest Lecturer — H.T. Oliver

Second Year (590-215P)
Third Year (590-315P)
Fourth Year (590-415P)

Courses comprise lectures, technique exercises, treatment of selected cases and seminars.

The purpose of the course is to present as much theoretical background as possible and to make the student familiar with diagnostic procedures and with the preventive, interceptive and limited corrective procedures that can be undertaken in a general dental practice. (Texts — Graber, *Orthodontics*, 3rd ed.: W.B. Saunders Co., 1972; Moyers, *Handbook of Orthodontics:* The Year Book Publishers Inc., 3rd. Ed., 1973; Salzmann, *Practice of Orthodontics:* J.B. Lippincott 1966; Sassouni, *Orthodontics in Dental Practice:* Mosby, 1971)

4.14 PAEDODONTICS

Associate Professor — G.H.G. Weinlander (Chairman)
Professor — E. R. Ambrose
Assistant Professors — Roberta Dundass; W.R. Robinson
Lecturer — P.R. Weinstein
Demonstrator — A. Felgar

Third Year (590-316P)

Lecture course on child management, treatment planning, operative procedures, management of injuries to teeth and preventive dentistry for children.

A concentrated laboratory course covers routine cavity preparations, amalgam restorations and stainless steel crown adaptation on deciduous manikin teeth, and endodontic procedures on extracted deciduous teeth.

Clinical dentistry for children commences following the laboratory course.

Fourth Year (590-416P)

Clinical dentistry for children in the University Dental Clinic. (Texts — Finn, *Clinical Pedodontics:* Saunders; Ellis, *The Classification and Treatment of Injuries to the Teeth of Children:* Year Book Publishers; Law, Lewis, Davis, *An Atlas of Pedodontics:* Saunders; McDonald, *Dentistry for the Child and Adolescent:* Mosby)

4.15 PERIODONTOLOGY

Associate Professors — R.F. Harvey (Chairman); P.J. Gitnick
Assistant Professors — S. Galperin; E.M. Hershenfield; F.I. Muroff
Lecturers — E. Shore; M. Stutman; A.S. Wainberg
Demonstrators — F. Fagen; M. Werbitt

First Year (590-118P)

Twelve hours introductory lectures and clinic re: oral hygiene procedures, role of basic sciences. Five hours lectures related to Anatomy and Biochemistry.

Second Year (590-218P)

Fifty hours of introductory lectures, laboratory courses and demonstrations and introduction to clinical experiences.

Third Year (590-318P)

Forty-five hours of lectures and seminars and sixty hours of clinical demonstration and participation and assisting seniors.

Fourth Year (590-418P)

Thirty hours of lectures and seminars and two hours per week in clinical Periodontics.

In addition, demonstrators in the department are available or in attendance in Operative, Crown and Bridge, Prosthetic, Endodontic and multidiscipline clinics. (Texts — Goldman & Cohen, *Periodontal Therapy*, 4th. ed.: Glickman, *Clinical Periodontology*, 4th ed; Grant, Stern & Everett, *Orban's Periodontics*, 4th ed.; *Occlusion*, 2nd ed.; Ramfjord & Ash: Reference — *Physiological Role of Dental Occlusion in the Masticatory System*, Vol. 1 & 2: R.G. Jones)

4.16 FIXED PROSTHODONTICS

Assistant Professor — J.D. Townsend (Chairman)
Associate Professors — R.G. Jones; W.H. Boyles; G. Harasymowycz
Assistant Professors — R.T. Lamb; H. Ptack
Lecturers — J.D. Fenwick; J.R. Fong Chong; S.M. Kennedy; H. Skurnik
Demonstrators — J.M. Little; E. Ostro; M. Pinchuk; D. Taylor
Visiting Lecturer — J.P. Lemay
Demonstrator in Ceramics — A. Wilson
Demonstrators in Dental Technology — R. Baillie; I. Blumberger; H. Heuvelink; N. Jones; A. Pickard; A. Woo

First Year (590-121P)
Second Year (590-221P)
Third Year (590-321P)
Fourth Year (590-421P)

A detailed course in the theory and clinical practice of Fixed Prosthodontics. In the pre-clinical years, the student is introduced to the basics of Fixed Prosthodontics by lecture series, reading assignments and laboratory participation.

In the clinical years (3rd and 4th) the students fabricate fixed bridges for clinical patients. Lectures, seminars and reading assignments are used to increase the students' knowledge and understanding of Fixed Prosthodontics. (Texts — Johnston, Phillips and Dykema, *Modern Practice in Crown and Bridge Prosthodontics:* Saunders; Skinner and Phillips, *The Science of Dental Materials:* Saunders; Wilson and Lang, *Practical Crown and Bridge Prosthodontics:* McGraw; Bassett, Ingraham and Koser, *An Atlas of Cast Gold Crowns:* West Orange County, California; Stanly D. Tylman, *Crown and Bridge Prosthesis:* Mosby; Victor O. Lucia, *Modern Gnathological Concepts:* Mosby; Kornfeld, Max, *Mouth Rehabilitation*, Vol. I and II: Mosby; Johnston, Mumford and Dykema, *Modern Practice in Dental Ceramics:* Saunders)

4.17 REMOVABLE PROSTHODONTICS

Associate Professor — D.W. Henry — (Acting Chairman)
Assistant Professors — J.F. Giacomelli; M. Shevell
Lecturers — A.F. Cameron; J.T. Elo; W. Kowal; L. Puchinger
Demonstrators — J.D. Badger; L.C. Barnes, R.G. Fletcher; S. Homayun; G. Konanec; L. Lazare; G. Poznak; P.C. Staples; F. Vosburg

Second Year (590-220P)
Third Year (590-320P)
Fourth Year (590-420P)

Instruction in the examination, diagnosis, treatment planning, construction and maintenance phases related to removable partial dentures and the abutment teeth complete dentures. (Texts — O.C. Applegate, *Essentials of Removable Partial Denture Prosthesis:* W.B. Saunders; W.L. McCracken, *Partial Denture Construction:* Mosby; Swenson, *Complete Dentures:* Mosby; E.L. Miller, *Removable Partial Prosthodontics;* Sharry, *Complete Denture Prosthodontics:* McGraw-Hill; H.W. Preiskel, *Precision Attachments in Dentistry:* Mosby; Charles M. Heartwell, Jr., *Syllabus of Complete Dentures;* Lea & Febiger)

Division of Surgery and Oral Medicine

4.18 ANAESTHESIOLOGY, LOCAL AND GENERAL

Offered under the direction of the Department of Oral Surgery.

Asociate Professor — K.C. Bentley (Chairman)
Assistant Professor — D.S. Shapiro
Guest Lecturers — M. Dunkley; T. McCaughey

4.18.1 LOCAL

Second and Third Years (590-324P)

Anaesthetic drugs and solutions, the evaluation of new drugs and techniques, with a review of related anatomy are discussed. Demonstrations and clinical experience are provided.

4.18.2 GENERAL

Third Year

General principles and the physiology of anaesthesia with emphasis on factors of safety and the suitability of the agent used are discussed. Co-operation with the anaesthetist under hospital or office conditions and emergency resuscitative measures are stressed. (Texts — Niven and Bourgoyne, *Conduction, Infiltration and General Anaesthesia in Dentistry;* Archer, *Dental Anaesthesia;* Monheim, *Local Anaesthesia and Pain Control in Dental Practice;* Howe, Whitehead, *Local Anaesthesia in Dentistry)*

4.19 ANATOMY

Professors — C.P. Leblond (Chairman); Y. Clermont; D.G. Osmond
Associate Professors — B. Kopriwa; P.K. Lala; D. Lawrence; N.J. Nadler; H. Warshawsky
Assistant Professors — G. Bennett. H. Calab; E. Daniels; U.F. Lalli; E. Schultz; M. Weinstock; W.E. Wilson
Lecturers — F. Brahim; L.D. Russell; C.E. Smith

4.19.1 GROSS ANATOMY

First Year (3 terms) (504-111P)

A general survey of the body by means of lectures and demonstrations; dissection of head and neck with special lectures and demonstrations emphasizing points of dental interest. (Texts – J. V. Basmajian, ed., *Grant's Method of Anatomy*, 8th ed.: Williams and Wilkins, 1971; J.C.B. Grant, *An Atlas of Anatomy*, 6th ed.: Williams and Wilkins, 1972; S.M. Friedman, *Visual Anatomy*, Vol. 1, Head and Neck, 1st. ed.: Harper and Row, 1970; C.R. Leeson and T.S. Leeson, *Human Structure; A Companion to Anatomical Studies*, 1st ed.: W.B. Saunders, 1972; W.H. Hollinshead, *Functional Anatomy of the Limbs and Back*, 3rd ed.: W.B. Saunders, 1969; J.T. Aitken, G. Causey, J. Joseph and J. Z. Young, *A Manual of Human Anatomy*, Vol. 2. Head and Neck, 2nd ed.: Livingstone, 1964)

4.19.2 HISTOLOGY

First year (504-112P)

The study of the cytology and structure of human tissues and organs. (Texts – A.W. Ham, Histology, 5th ed.: Lippincott, 1965; W. Bloom and D.W. Fawcett, *A Textbook of Histology*, 9th ed.: Saunders, 1968)

4.19.3 ORAL HISTOLOGY AND EMBRYOLOGY

First Year (504-117P)

A microscopic study of the development of the teeth and their supporting structures, and of the adult oral tissues through their life cycle. (Text – D.V. Provenza, *Fundamentals of Oral Histology and Embryology;* Lippincott, 1972)

4.20 BIOCHEMISTRY

Professors – A.F. Graham (Chairman); M.J. Fraser; E.A. Hosein; D. Rubinstein; S. Solomon; T.L. Sourkes; J.H. Spencer; L.S. Wolfe

Associate Professors – R. Blostein; P. Braun D.T. Denhardt; Rose M. Johnstone; A.R. Wasserman

Assistant Professors – E. Harpur; R.E. MacKenzie; E.A. Meighen; S. Millward; W. Mushynski

Lecturer – M.R. Reesal

Associate Members – M.K. Birmingham (Psychiatry); J. Dupre (Exp. Medicine); D. Edward (Exp. Surgery); W.C. Galley (Chemistry); L. Goodfriend (Exp. Medicine); L.M. Jerry (Exp. Medicine); H. Pappius (Exp. Neurochemistry); C. Scriver (Paediatrics); J. Shuster (Exp. Medicine)

First Year (507-113P)

An outline of the general subject of biochemistry with a more special knowledge of such aspects as bear particularly on the science and practice of dentistry. Two to four lectures and one laboratory per week from September to May. (Texts – Joseph C. Muhler, *Textbook of Biochemistry for Students of Dentistry:* Mosby; E.P. Lazzari, *Dental Chemistry:* Lea and Febiger)

4.21 DIAGNOSIS, ORAL

Professors – A.G. Racey (Acting Chairman); L.E. Francis
Assistant Professor – T.P. McCrory
Lecturers – Z.B. Nyeste; A.F. Sonin

Third Year (590-328P)

A continuation of the second year course in Oral Pathology in which the clinical and radiographic aspects of the various conditions are discussed with emphasis on differential diagnosis. The student internship program provides invaluable practical support for this course. (Text – Stafne, *Oral Roentgenographic Diagnosis;* Michell, Standish and Fast, *Oral Diagnosis/Oral Medicine)*

4.22 MEDICINE

Associate Professors – J.L. McCallum (Chairman); S.O. Freedman; D. Hillman
Assistant Professors – J.L. Hutchison; G. Joron; M.F. Mizgala
Lecturers – K. Cantor; R. LaFleur; O. Schlapner
Demonstrator – F. Aoki

Third Year (526-313P)

A review of the principles of medicine with particular attention to the relationship of good prenatal care and proper nutrition during infancy and childhood to dentition and the subsequent health of teeth and gums; oral manifestations of systemic disease and the importance of oral health in the successful treatment of certain medical conditions; and medical complications of dental surgery and their prophylaxis.

4.23 MICROBIOLOGY AND IMMUNOLOGY

Professors – S.I. Vas (Chairman); B.H. Matheson; J.S. Stevenson; W. Yaphe
Associate Professors – Z. Ali-Khan; C.A. Butas; E.C.S. Chan; P.M. Cooke; J. de Vries; P. Gill; L. Kapica; G.K. Richards; H.G. Robson; R. Siboo
Assistant Professors – H. Abramovitch; K. Brown; K. Elie; J. Gordon; V. Groh; R. Hand; E. Mankiewicz; J. Mendelson
Lecturers –S. Nommik; E. Wood
Demonstrator – C. Shaw
Teaching Assistants – D. Cristeanu; L. Therrien

Second Year (529-213P)

Elementary dental bacteriology and immunology. (42 hours of lectures.) (Text – *Oral Microbiology;* W.A. Nolte 2nd. ed.: Mosby)

4.24 PATHOLOGY, GENERAL

Professors – R.H. More (Chairman)
Assistant Professor – G. Berry

Second Year (546-216P)

A course in the general principles of pathological reactions and their application to disease states and correlation to oral pathology.

4.25 PATHOLOGY, ORAL

Professor — A.G. Racey (Acting Chairman)
Assistant Professors — T.P. McCrory; D.S. Shapiro

Second Year (590-217P)

A consideration of all conditions, both local and systemic, that affect the oral cavity, including dental caries and diseases of the pulp, developmental disturbances, tumours and cysts, infections and injuries, and the oral manifestations of metabolic disease. Laboratory periods supplement the lectures. (Texts — Shafer, Hine and Levy, *Oral Pathology; Color Atlas of Oral Pathology:* Lippincott; Scopp, *Oral Medicine)*

4.26 PHARMACOLOGY AND THERAPEUTICS

Professors — M. Nickerson (Chairman); J. Lowenthal
Associate Professors — B.G. Benfey; N.R. Eade; L.E. Francis; J.R. Ruedy; D.R. Varma
Assistant Professors — R. Capek; B. Collier; E.M. Kovacs; R.I. Ogilvie; R.E. Rangno; J.B. Richardson; M.C. Robertson; B.I. Sasyniuk; A. Tenenhouse; J.M. Trifaro; B. Zablocka-Esplin

Second Year (549-219P)

A course of 41 lectures, given twice weekly, concerned with the basic principles of the actions of drugs and applied therapeutics where indicated. (Texts — Sutherland, *A Synopsis of Pharmacology;* Andres Goth, *Medical Pharmacology;* Goodman and Gilman, *The Pharmachological Basis of Therapeutics,* 4th ed.)

4.27 PHARMACOLOGY AND THERAPEUTICS, DENTAL

Professor — L.E. Francis (Chairman)
Associate Professor — J.A. de Vries
Assistant Professor — J.W. Stamm

Third Year (590-319P)

A study of those drugs that have special application to dental practice. Lectures and seminars reviewing various pathological conditions and possible therapy. (Texts — A.D.A. *Accepted Dental Remedies 1968;* Sutherland, *A Synopsis of Pharmacology; Compendium of Pharmaceauticals and Specialties,* 7th ed. 1972)

4.28 PHYSIOLOGY

Professors — J. Milic-Emili (Chairman); R.I. Birks; T.M.S. Chang; K. Krnjević; F.C. MacIntosh; G. Melvill Jones
Associate Professors — J.R. Dirks; D.R. Firth; P. Gold; C. Polosa; P. Sekelj
Assistant Professors — M.W. Cohen; M.M. Frojmovic; V. Klissouras; W.S. Lapp; M. Levy; M. Mackey; G. Mandl; J.S. Outerbridge; A. Wechsler; R.L. Williams
Lecturers — M. Hazucha; P. Weldon

Associate Members — N.R. Anthonisen (Assoc. Prof., Exp. Med.); M.E. Avery (Prof., Paediatrics); B.A. Cooper (Prof. Exp. Med.); R.F.P. Cronin (Prof., Med.); B.O. Dubrovsky (Assist. Prof., Psychiatry); E. Fallen (Assist. Prof., Med.); H.L. Goldsmith (Prof., Exp. Med.); C.A. Goresky (Prof., Med.); C.A. Laszlo (Assist. Prof., Biomed. Eng.); P.T. Macklem (Prof., Med.); J.M. McKenzie (Prof., Exp. Med.); M.M. Morris (Assist. Prof., Anesthesia); D.H. Moscovitch (Assist. Prof., Otolaryngology); J.F. Seely (Assist. Prof., Exp. Med.)

First Year (522-116P)

Selected topics in areas of human physiology of particular significance for dental practice. These will include the more detailed study of aspects of blood, the cardiovascular, respiratory, digestive, endocrinological and central nervous systems (3 hours of lectures and/or laboratory periods per week, for 1 term only). Textbook — No text specified. Recommended reading lists will be provided for each of the subjects studied.

It is strongly recommended that students take a general course in physiology (e.g. Physiology 211D at McGill, or a similar "college course" in Physiology) during their pre-dental studies. Those dental students lacking this background will be asked to participate concurrently in a program of basic physiology lectures (Physiology 201A, 202B).

4.29 RADIOLOGY

Professor — A.G. Racey (Acting Chairman)
Associate Professor — K.C. Bentley
Lecturers — Z.B. Nyeste, A.F. Sonin

Third Year (590-322P)

During a three-week period in the Summer Clinic, a course of lectures and demonstrations is presented. These include Radiation Physics, Clinical Techniques, Interpretation and Film Processing. This course is presented to the incoming Third year.

During the year, two Third-year students are on duty each day to take and process all emergency radiographs as well as each taking two full mouth surveys of teaching cases.

Both bisecting-angle and long cone paralleling techniques are used in these demonstrations and exercises. (Texts — Stafne, *Oral Roentgenographic Diagnosis;* Weurhmann and Manson-Hing, *Dental Radiology)*

4.30 SURGERY, ORAL

Associate Professors — K.C. Bentley (Chairman); J.J. McCarthy; E.P. Millar
Assistant Professors — H.G. Pham; D.S. Shapiro; R.M. Wiener
Lecturers — G.L. Freedman; E. Slapcoff
Demonstrator — M. Gornitsky

Third Year (590-323P)
Fourth Year (590-423P)

Courses are designed to develop with the student a foundation of professional knowledge coupled with surgical skills to enable him to diagnose and manage competently the oral surgery problems related to the practice of general dentistry. The student is also expected to acquire an academic appreciation of the advanced field of oral surgery, which involves the diagnosis, treatment, prescribing for and operating upon any disease, injury, malformation or deficiency of the human jaws or associated structures.

The course in Anaesthesiology is offered under the direction of the Department of Oral Surgery. (Texts and Reference Books — Thoma, *Oral Surgery;* Archer, *Oral Surgery;* Nevin and Bourgoyne, *Conduction, Infiltration and General Anaesthesia in Dentistry,* Rowe and Killey, *Fractures of the Facial Skeleton;* Kazanjian and Converse, *The Surgical Treatment of Facial Injuries;* Schwartz, *Disorders of the Temporomandibular Joint;* H.G. Clark, *Practical Oral Surgery;* G. L. Howe, *The Extraction of Teeth;* G.O. Kruger, *Text-book of Oral Surgery;* Killey and Kay, *Benign Cystic Lesions of the Jaws)*

5 COURSES OFFERED IN THE FACULTY OF GRADUATE STUDIES AND RESEARCH

5.1 DIPLOMA IN RESTORATIVE DENTISTRY AND PROSTHODONTICS

Associate Professor — H. Rosen (Director)
Professor — E.R. Ambrose
Associate Professors — R.F. Harvey; D.W. Henry; R.G. Jones; J.W. Stamm
Assistant Professors — D. Kepron; B. Sedlezky; J.D. Townsend
Members of the Departments of — Endodontics, Operative Dentistry, Oral Surgery, Orthodontics, Pathology & Diagnosis, Periodontics, Pharmacology & Therapeutics, Fixed and Removable Prosthodontics

This course is tailored to the needs and interests of the candidate seeking training which is beyond the scope of a four-year undergraduate program.

Clinical cases requiring occlusal therapy will be treated by the participant under supervision.

A total patient, multi-disciplined approach will be emphasized for cases presenting with periodontal disease, wear, congenital defects and/or temporomandibular joint problems. The program includes experience in removable and maxillofacial prosthesis.

This supervised clinical experience will be enhanced by didactic lectures, seminars, practice teaching and office visits. Participation in a clinical research project is expected.

Duration — One academic year beginning in September, leading to a Diploma.

Further information may be obtained from the Director, Dr. Harry Rosen, c/o Faculty of Dentistry, McGill University, P.O. Box 6070, Station A, Montreal, Que. H3C 3G1.

Tuition: $25

5.2 MASTER OF SCIENCE (RESTORATIVE DENTISTRY AND PROSTHODONTICS)

Associate Professor — H. Rosen (Director)
Professor — E.R. Ambrose

Associate Professors — R.F. Harvey; D.W. Henry; R.G. Jones
Assistant Professors — D. Kepron; B. Sedlezky; J.D. Townsend
Guest Lecturer — J. Valiquette
Members of the Departments of — Endodontics, Operative Dentistry, Oral Surgery, Orthodontics, Pathology and Diagnosis, Periodontics, Pharmacology and Therapeutics, Fixed and Removable Prosthodontics.

Admission is restricted to candidates who hold a D.D.S. or equivalent degree with good standing from an approved institution. Preference will be given to those applicants who have been in general practice or rotating internships for at least one year. The Master's course requires two academic years (20 months). Disciplines involved are: Advanced Operative Dentistry, Fixed Prosthodontics, Maxillofacial Prosthesis, Removable Prosthodontics as well as supportive and allied clinical sciences. The course will consist of didactic lectures, case presentation seminars, treatment of clinical cases under supervision, reports on clinical cases, teaching assistantship, selected office visits. Candidates will be required to attend pertinent basic science lectures. A research project must begin by the end of the first year and continue through the second year resulting in a Master's thesis.

Duration — Two academic years beginning in September.

Two candidates are accepted each year.

Tuition: $570.00 for the first year
$285.00 for the second year

5.3 MASTER OF SCIENCE (ORAL SURGERY)

Associate Professor — K.C. Bentley (Director)
Professor — L.E. Francis
Associate Professors — J.J. McCarthy; E.P. Miller
Assistant Professors — H.G. Pham; D.S. Shapiro
Lecturer — G.L. Freedman

A residency training program in Oral Surgery has been developed to provide students with a comprehensive background for the practice of Oral Surgery as a specialty.

During the three years of the program the candidate will serve as a first year resident, second year resident and third year resident. During this time he will be given increasing responsibility for the care of in-patients and out-patients, as well as being required to fulfill certain basic science courses and other assignments. Candidates for this program must possess a D.D.S. or D.M.D. degree or its equivalent, and be acceptable to the Order of Dentists of Quebec as a training candidate in a hospital. A research project must be commenced in the second year of the program and continued throughout the third year, followed by a Master's thesis.

Duration — Three academic years commencing July 1.

Further information may be obtained by writing to Dr. K.C. Bentley, Dental Surgeon-in-Chief, Montreal General Hospital, Montreal, Que. H3G 1A4.

The program is open to one candidate per year. Books and instruments are supplied.

Tuition: $570.00 for each of the first two years
$285.00 for each additional year

Information for financial support for these courses may be obtained by writing to the Director of the course.

6 CONTINUING DENTAL EDUCATION

Associate Professor – J.W. Stamm (Co-ordinator)

CREDIT COURSES

At periodic intervals, the Faculty, along with other established bodies in the health field, sponsors courses in Continuing Dental Education which are recognized for Continuing Dental Education credits by dental licensing bodies.

Generally the Faculty offers a series of limited enrolment courses in various clinical and basic sciences related to dentistry. In most cases, the courses are designed to meet the needs of the general practitioner, to keep him abreast of current concepts and practices and to make him aware of recent advances in dental science.

Enquiries should be directed to:

CALENDAR FOR SESSION 1974-1975

1974

July 2, Tuesday to August 9, Friday	Summer Session
August 13, Tuesday to August 23, Friday	Supplemental Examinations
September 2, Monday	Labour Day
September 4, Wednesday	Registration in Diploma programs in Education
September 5, Thursday	Course Counselling all new B.Ed. students (A-K)
September 6, Friday	Course Counselling all new B.Ed. students (L-Z)
September 9, Monday	Diploma programs begin Registration all new B.Ed. students and Course Counselling returning U2 students
September 10, Tuesday	Registration returning U2 students and Course Counselling returning U3 students
September 11, Wednesday	Registration returning U3 students (morning only)
September 16, Monday	Lectures begin in Degree programs in Education
October 4, Friday	Last day for course changes
October 14, Monday	Thanksgiving
October 25, Friday	Deadline for withdrawing from 'A' courses
November 29, Friday	Deadline for withdrawing from 'D' courses
November 6, Wednesday	Fall Convocation
December 18, Wednesday	Last day of lectures in Diploma programs in Education
December 19, Thursday to December 20, Friday	Examinations and mid-year evaluations in Diploma programs in Education
December 20, Friday	Last day of lectures in Degree programs in Education

1975

January 3, Friday to January 17, Friday	Examinations in Degree programs in Education
January 6, Monday	Diploma programs resume
January 20, Monday	Degree programs resume
January 31, Friday	Last day for course changes
February 21, Friday	Deadline for withdrawing from 'B' courses
February 21, Friday to February 22, Saturday	Mid-term weekend holiday. Lectures cancelled
March 28, Friday to March 31, Monday [incl.]	Easter. Lectures cancelled
April 18, Friday	Last day of lectures: Degree programs only
April 21, Monday to May 7, Wednesday	Examinations in Degree programs
April 25, Friday	Last day of lectures: Diploma programs
April 28, Monday to May 2, Friday	Examinations in Diploma programs in Education
May 19, Monday	Victoria Day. Administrative offices closed
June 4, Wednesday to June 7, Saturday	Convocations

1 STAFF

ADMINISTRATIVE OFFICERS

Robert E. Bell, C.C., B.A., M.A.(U.B.C.), Ph.D., D.Sc.(U.N.B.), LL.D.(Tor.), F.R.S., F.R.S.C. *Principal and Vice-Chancellor*

Eigil Pedersen, B.A. (Sir G. Wms.), Ed. D. (Harv.), M.A. *Vice Principal (Academic)*

Leo Yaffe, B.Sc., M.Sc. (Man.), Ph.D., F.C.I.C., F.A.P.S., F.R.S.C. *Vice-Principal (Administration)*

Dale C. Thomson, D.F.C., B.A. (Alta.) D.U. (Paris) *Vice-Principal (Planning)*

Allan C. McColl, D.F.C., B. Com., C.A. *Director of Finance*

Colin M. McDougall, D.S.O., B.A. *Secretary General to the Board of Governors*

J.P. Schuller, B.A. (Ott.) *Registrar*

Peggy Sheppard, B.A. (Sir G. Wms.), B.Ed. *Director, Admissions Office*

C. Wayne Hall, B.A., M.A., (Bishop's), F.C.C.T. *Dean*

Donald A. Burgess, B.Sc., M.A. (Durham), F.R.G.S. *Associate Dean (Students Affairs)*

The Rev. John P. Hilton, S.T.L. (Mtl.), M.A. (C.U.A.) *Associate Dean (Academic)*

INSTRUCTIONAL STAFF

Dennis Adams, B.A. (Calif.), M.S. (S. Cal.), Ph.D. (Wis.) *Associate Professor of Education*

Morton J. Bain, B.A. (Mt. Allison), M.Ed. (Vermont *Associate Professor of Education, Chairman, Department of Education in Social Sciences*

Carolyn Barnes, M.A. (P.E.) *Lecturer in Education*

Gordon J. Bennett, Dip. Ed. (Southampton), Dip. R. Ed. (Reading U.), B.A. (Sir G. Wms), M.Ed. (Boston) *Associate Professor of Education, Director of Student Teaching*

Faith H. Berthault, B.A. (London), M.A. (on leave) *Assistant Professor of Education*

Mary E. Bews, B.A. (Queen's) *Assistant Professor of Education*

Lewis B. Birch, B.Sc., M.A. (Birm.) F.B.Ps.S. *Professor of Education, Director, Graduate Programs, Macdonald Professor of Education*

Elton Crandall Bockus, B.A. (Bishop's), M.A. *Associate Professor of Education, Coordinator, One-Year Secondary Program*

Real Boulianne, B.A. (Sir G. Wms.), M.A. (Ottawa), Ph.D. *Associate Professor of Education, Director, College Level Programs*

Jon G. Bradley, M.A. (Sir G. Wms.), B.A. *Lecturer in Education*

Donald A. Burgess, B.Sc., M.A. (Durham), F.R.G.S. *Associate Professor of Education, Associate Dean*

Mildred L. Burns, B.Sc. (Nebraska), Ph.D. (Stanford) *Associate Professor of Education*

Peter G. Burpee, B.Sc., M.Ed. *Assistant Professor of Education*

Magdelhayne Buteau, B.A., B.Ed., M.A., Lic. Sc. Soc. (Mtl.), Lic. Ped. (Mtl.), Ph.D. *Associate Professor of Education, Chairman, Department of Education in Second Languages*

Lynn Butler-Kisber, B.Ed., M.Ed. *Assistant Professor of Education*

Richard L. Butt, Cert. in Ed. (Bristol), B.Ed., M. Ed., (Sask.), *Assistant Professor of Education*

Nancy Carlman, B.A. (Rochester), M.A. (Wesleyan) *Assistant Professor of Education*

Glenn F. Cartwright, B.A. (Sir G. Wms.), Ph.D. (Alta.), M.A. *Assistant Professor of Education*

D. Wade Chambers, B.A. (Oklahoma), M.A., Ph.D. (Harv.) *Honorary Assistant Professor of Education*

John Chomay, M.A. (Minn.), B.Sc. (P.E.) *Associate Professor of Education*

Nicholas G. Coccalis, M.A. (Aberdeen), B.Ed., M.Ed., Ph.D. (Alberta) *Assistant Professor of Education*

Donna L. Cook, B.S. (Frostburg), M.A. (W. Virginia), *Assistant Professor of Education*

Roger B. Cook, B.S. (Frostburg), M.M., Ph.D. (W. Virginia) *Assistant Professor of Education*

John M. Cram, B.A., B.Ed. (Alta.), M.Ed. (U.N.B.), Ed.D. (U.B.C.) *Associate Professor of Education*

Ann Creaghan, B.A. (Marymount Coll.), B.Ed. (Mtl.), M.A. (Columbia) *Associate Professor of Education*

Heather Davis, Cert. in Ed. (Bristol), Adv. Dip. Prim. Ed. (Cambridge) *Assistant Professor of Education*

J. Ivan deBagheera, B.A. (Laurentian), M.A. (U. of Montreal) *Assistant Professor of Education*

Patrick Dias, B.A., M.A. (Karachi), B.Ed. (Mtl.) *Associate Professor of Education*

Sarah Dobbie, B.A. *Lecturer in Education*

Janet Donald, B.A., M.A. (W. Ont.), Ph.D. (Toronto) *Assistant Professor of Education, Assistant Professor Centre for Learning and Development*

J. Leo Dowd, B.A. (Thomas More), B.Ed., M.A. (Mtl.), M.Ed. *Associate Professor of Education*

Florent Dumont, A.B. (Columbia College, N.Y.), M.S. (Southern Conn. College) Ed.D. (U. of Mass.) *Assistant Professor*

Ruth M. Duncan, B.A. (Man.), Associate of University of London, M.A. (Minnesota), B.Sc. (P.E.) *Associate Professor of Education, Chairman, Department of Elementary Education*

Reginald Edwards, B.Sc. (London), M.Ed. (Manchester) *Professor of Education*

Winston G. Emery, B.Ed., M.A. (Ed.) *Assistant Professor of Education*

Seymour Epstein, B.S. (Columbia), B.H.L. (Jewish Theol. Sem.), M.A. (Brandeis) *Assistant Professor of Education, Assistant Professor, Jewish Studies Program*

Wolfgang J. Floch, B.A. (U.B.C.), M.Ed., Ed. D. (Tor.) *Associate Professor of Education*

Pearl Francoeur, B.Sc. (Sir G. Wms.), M.Sc., M.Ed. *Associate Professor of Education*

FACULTY OF EDUCATION

Thomas A. Francoeur, B.A. (Mtl.), M.A. (Ottawa), D. Ed. (Mtl.), Dipl. Past. Theol. (Lumen Vitae, Brussels)
Professor of Education, Chairman, Department of Catholic Studies

May B. Frith, B.A. (London), M.A. (Columbia) *Associate Professor of Education*

J. Robert Gardner, M.Ed. (Boston), B.Ed. *Assistant Professor of Education*

George L. Geis, B.A., M.A., Ph.D. (Columbia) *Associate Professor of Education, Associate Professor, Centre for Learning and Development*

Margaret Gillett, B.A., Dip. Ed. (Sydney), M.A. (Russel Sage), Ed. D. (Columbia)
Professor of Education

Helen Vasos-Gougeon, B.A. (Marianapolis Col.), B.Ed. (Mtl.), M.A. (Ottawa)
Assistant Professor of Education

John B. Gradwell, B.A., M.A. (San Francisco State), Ph.D. (Iowa)
Associate Professor of Education

Janice Gray

Frank P. Greene, B.A., M.A., Ph.D. (Mich.) *Associate Professor of Education, Director, Reading Centre*

Michael C. Greenisen, B.S. (Ed.) (Northern Illinois), M.A. (Michigan State)
Assistant Professor of Education

C. Wayne Hall, M.A. (Bishop's), F.C.C.T. *Professor of Education, Dean*

John Hamwood, QLD. (Australia), Ph.D. (Toronto) *Assistant Professor of Education*

James Hanrahan, B.A., B.Ed. (St. F.X.), Ph.D. (London), M.A. *Assistant Professor of Education*

John K. Harley, M.A. (St. Andrews), Ed.M., Ed. D. (Harvard) *Associate Professor of Education*

Justine Harris, B.A. (Swarthmore Col.), M.Ed., Ed.D. (U.B.C.)
Associate Professor of Education, Chairman, Department of Counsellor Education

Lorna H. Haworth, B.A. (Sir G. Wms.), M.A. *Assistant Professor of Education*

E. Paddy Hearsey, Dip. in Ed. (Southampton), M.A. (Sir G. Wms.)
Assistant Professor of Education

Norman Henchey, B.A. (Loyola), B.Ed. (Mtl.), Lic. Ped. (Mtl.), Ph.D.
Associate Professor of Education

The Rev. John P. Hilton, S.T.L.(Mtl.), M.A.(C.A.U.)
Associate Professor of Education, Associate Dean

Andrew Hum, B.A. (Sir G. Wms.), Ph.D. (Alberta), M.Ed. *Assistant Professor of Education*

Geoffrey Brian Isherwood, B.S. (Tufts), M.Ed. (U. of Del.), Ed. D. (Rutgers)
Associate Professor of Education

Annie Elizabeth Jacques, Associate of the University of London,
Associate Professor of Education, Chairman, Department of Education in Art

J. Keith Jobling, B.A. (Leeds), Ph.D. (Ottawa), M.A. *Associate Professor of Education, Chairman, Department of Social Foundations of Education*

Robert Jones, B.A., M.A. (Sir G. Wms.), Bac. Ped. (Mtl.) *Assistant Professor of Education*

Y. Gregory Kelebay, B.A. (Loyola), B.Ed. (U. of M.) *Lecturer in Education*

Vassilis Klissouras, Dip. (Athens), B. Sc., M.Sc., D.P.E. (Springfield)
Associate Professor of Education, Assistant Professor of Physiology (Faculty of Medicine)

Peter C. Landry, M.A. (Columbia), B. Eng., M.Sc. *Associate Professor of Education, Honorary Lecturer, Department of Physics*

Robert Lavers, B.A. (Bishop's), M.Sc., Ph.D. *Assistant Professor of Education*

William Lawlor, B.Comm. (Loyola), B.Ed. (Mtl.), M.A., Ph.D. (Ottawa) *Associate Professor of Education*

Hugh M. Leard, B.A., B.Ed. (Sask.), M.A. (Minn.), Ed.D. (Arizona State) *Associate Professor of Education*

John P. Lipkin, B.A. (Gettysburg), M.A.T. (Brown), Ph.D. (Mich.) *Associate Professor of Education*

Jan Lobelle, Lic.Sc.Ec. (Ghent), M.A. (Middlebury) *Associate Professor of Education*

Enid Lofthouse, B.A. (Sask.), B.Ed. (Alta.), M.T.M. (Sir G. Wms.) *Associate Professor of Education*

Barry Lucas, B.A. (U.B.C.), M.Ed. (W. Washington), Ph.D. (Mich.) *Assistant Professor of Education*

Christine Lucas, B.A. (Ithica), M.A. (Buffalo) *Assistant Professor of Education*

A. Daisy MacNeil, B.A. (U.B.C.), M.A. (Columbia), B.D. *Associate Professor of Education*

A. Kennedy Maconochie, M.A. (Edin.), F.R.S.G.S. (sabbatical second semester) *Associate Professor of Education*

Maisie MacRae, B.A. (Sir G. Wms.), M.A. *Assistant Professor of Education*

George Mager, A.B. (Franklin & Marshall), Ed.M., Ed.D. (Harvard) *Assistant Professor of Education*

Roger P. Magnuson, B.A., M.A., Ph.D. (Mich.) *Professor of Education*

Daniel Marisi, B.Ed., B.A., M.Sc. (Sask.), Ph.D. (Calif.) *Assistant Professor of Education*

Theodore J. Maroun, B.S. (S.U.N.Y. Potsdam), M.S. (Canisius), M.Ed. (S.U.N.Y. Buffalo), Ed.D. (Indiana U.) *Associate Professor of Education*

Nora McCardell, B.A. (Sir G. Wms), M.A. (Waterloo), M.Sc. *Assistant Professor of Education*

L. Elaine McDonald, B. Mus. (Sam Houston State), M.A. (Columbia) *Associate Professor of Education, Chairman, Department of Education in Music*

Gordon W.E. McElroy, B.A. (Queen's), M.A. *Associate Professor of Education, Associate Director, McGill Centre for Continuing Education*

Gerald H. McKay, B.A., M.A. (Dalhousie), M.A. (Yale), Ed. D. (Harv.) *Professor of Education*

Shirley W.C. McNicol, M.A. (Columbia), B.A., Associate of the University of London *Associate Professor of Education*

David D. McWethy, B.A., M.A. (Michigan), Ph.D. (Iowa) *Assistant Professor of Education*

Dominic Modafferi, B.A. (Mtl.), M.A. (Wesleyan) *Associate Professor of Education*

Harry D. Morrison, B.A., M.Ed. (Bishop's) *Professor of Education, Coordinator Undergraduate Degree Programs*

Graham Neil, Ph.D. (Oregon), B.Ed. (P.E.), M.A. *Assistant Professor of Education*

Stanley Nemiroff, B.Sc., M.A. *Assistant Professor of Education*

FACULTY OF EDUCATION

Dorothy A. Nichol, M.Sc. (P.E.), (Syracuse), B.Sc. (P.E.) *Associate Professor of Education*

Martin O'Hara, B.A. (Thomas More), B.Ed. (Marianapolis), M.A. (Mtl.) *Associate Professor of Education, Chairman, Department of Education in English*

Suzanne Palumbo *Lecturer in Education*

Clifford Papke, B.A. (Mtl.), A.O.C.A. *Assistant Professor of Education*

Donald Paré, B.A. (Gonzaga), B.Th. (Regis Col.), M.A. (Gonzaga), M.Sc. (Fordham), Ph.D. (Florida) *Associate Professor of Education*

James Park, B.Ed., M.Ed., Ph.D. (Alberta) *Assistant Professor of Education*

Charles E. Pascal, B.A., M.A., Ph.D. (Mich.) *Associate Professor of Education, Associate Professor, Centre for Learning & Development*

Eigil Pedersen, B.A. (Sir G. Wms.), Ed. D. (Harv.), M.A. *Professor of Education, Vice-Principal (Academic)*

Francis Pinto, B.A.(Madras), LL.B., M.A.(Bombay), L.Ph.(Gregorian Univ.) *Associate Professor of Education*

Alwynn Pollard, B.Ed., M.A. (U.B.C.) *Assistant Professor of Education*

Robert N. Pollard, B.A., M.Ed., (U.B.C.) *Associate Professor of Education, Director of Educational Media Centre*

André Provencher, Bacc. es A. (Mtl.), Lic. es Lett. (Lille) *Associate Professor of Education*

Salvatore Pupo, B.Ed. (Duquesne), M.Sc. (Notre Dame) *Associate Professor of Education*

H. Oscar Purdy, B.A., M.A. (Acadia), M.A. (Bowdoin) *Associate Professor of Education, Chairman, Dept. of Education in Mathematics & Science*

Socrates Rapagna, B.A. (Don Bosco), B.Ph. (Turin), Lic. Ped., M.A. (Mtl) *Associate Professor of Education*

Gregory D. Reid, M.S. (U.C.L.A.), B.Ed. (P.E.) *Lecturer in Education*

Gillian Rejskind, B.A., M.A. (Sask.) *Assistant Professor of Education*

Howard Riggs, B.Ed. (Alta.), M.A. (Minn.) *Assistant Professor of Education*

Douglas Riley, B.Sc., M.Sc. (Springfield) *Associate Professor of Education*

Isobel R. Russell, B.Ed., M.Ed. (Sask.) *Assistant Professor of Education*

William Ryan, B.A. (St. Marys), B.Ed., M.A. (Mtl.), M.A., (on leave) *Associate Professor of Education*

V. Ann Scott, B.S. (Purdue), M.S., Ed. S. (Indiana) *Assistant Professor of Education*

Gertrude Scott, B.A. (Marianapolis), B.Ed., Lic Ped. (Mtl.) *Assistant Professor of Education*

William Edward Searles, B.Sc. (Sir G. Wms.), M.Sc. (New Hampshire) *Associate Professor of Education*

Hermione Shantz, B.A., M.A., Ph.D. (Michigan State) *Assistant Professor of Education*

Nancy Sheeran

Bruce M. Shore, Ph.D.(Calgary), B.Sc., M.A. *Associate Professor, Centre for Learning and Development, Associate Professor of Education*

David C. Smith, Ph.D., (London), B.Ed., M.A. *Professor of Education*

Dorothy Sokolyk, B.A. (Sir G. Wms.), M.A. (Columbia) *Associate Professor of Education*

Franga Stinson, B.A. (Sir G. Wms.), Ed. D. (Syracuse), M.A., Associate of the University of London *Professor of Education, Coordinator of One-Year Elementary Program*

R. Lynn Studham, N.D.D., C.S.G.A., C.S.A. *Assistant Professor of Education*

Howard A. Stutt, B.A. (Queen's), B.Ed., M.Ed. (Mtl.), F.C.C.T. *Associate Professor of Education, Chairman, Department of Educational Psychology and Sociology*

Ronald H. Tali, A.B., M.A., Ph.D. (Mich.) *Associate Professor of Education, Chairman, Department of Educational Administration*

William Martin Talley, A.B. (Kentucky Christian Coll.), A.B. (Morehead State), M.A., Ph.D. (Ohio State) *Associate Professor of Education*

Georges Terroux, B.A. (Loyola), M.A. (Essex), Ph.D. (Mtl.) *Associate Professor of Education*

Lorraine Thibeault, B.A., M.A. (Washington) *Assistant Professor of Education*

Catherine Waddell, B.A. (Sir G. Wms.), Dip. Ed. (Glasgow) *Assistant Professor of Education*

Margaret C. Walker, B.P.H.E. (Tor.), M.A. (Iowa) *Assistant Professor of Education*

Albert E. Wall, B.Ed. (P.E.), M.A. *Assistant Professor of Education (Sabbatical)*

Jennifer A.T. Wall, London Univ. Inst. of Ed. Cert. (Chelsea Coll. of P.E.), Art of Movement Studio Cert., M.A. *Assistant Professor of Education*

James Watling, A.T.C. (Leeds) *Associate Professor of Education*

Elisabeth L. Watters, M.Ed. (Boston), B.A. *Assistant Professor of Education*

Boyd E. White, B.A., B.F.A. (Sir G. Wms.), M.F.A. (Inst. Allence of U. of Guanajuato) *Assistant Professor of Education*

Joan White, B.A. (Hons.) Dublin, C.E.S. (Aix-en-Provence), M.A. *Assistant Professor of Education*

James G. Whitton, B.A. (Loyola), M.Sc. (Hofstra) *Assistant Professor of Education, Assistant Director, Student Teaching*

Richard Whitwell, B.Sc. (London), M.A., F.C.C.T. *Associate Professor of Education*

Robert E. Wilkinson, B. Sc. (P.E.), M.A. (Columbia), D.P.E. (Springfield) *Professor of Education, Chairman, Department of Physical Education*

Lila F. Wolfe, B.Sc. *Lecturer in Education*

John Wolforth, B.Sc. (Hons.) (Sheffield), M.A., Ph.D. (U.B.C.) *Associate Professor of Education*

F. Jack Young, Dip. Ed. (London), B.Ed. (U.B.C.), M.A. (Kent State, Ohio) *Associate Professor of Education*

John E.M. Young, B.A. (McMaster), B.Ed., M.Ed. (Sask.), Ph.D. (Tor.) *Professor of Education*

2 PROGRAMS OFFERED

FULL-TIME STUDENTS

The Faculty of Education offers a wide variety of programs which are designed to prepare students for professional careers in the fields of elementary and secondary education. These include three-year programs for CEGEP graduates which lead to an undergraduate degree (Bachelor of Education), one-year programs for university graduates leading to the McGill Diploma in Education, and, on a limited basis, one-year certificate programs for CEGEP graduates.

DEGREE PROGRAMS OFFERED

MAJOR PROGRAMS leading to teacher certification at both the elementary and secondary school levels:

ART EDUCATION (see page 19)
PHYSICAL EDUCATION (see page 20)
RELIGIOUS STUDIES (Catholic, Protestant, or Jewish) (see page 20, 21, 22)

MAJOR PROGRAMS leading to teacher certification at the secondary school level (one subject):

BIOLOGY, CHEMISTRY, ENGLISH, ENGLISH OR FRENCH (Second Language), GEOGRAPHY, HISTORY, HOME ECONOMICS, LATIN, MATHEMATICS, MODERN LANGUAGES (German, Italian or Spanish), AND PHYSICS. (see page 22)

MAJOR PROGRAM leading to certification at the elementary school level:

FRENCH-SECOND LANGUAGE (see page 23)

GENERAL PROGRAMS leading to teacher certification at the secondary school level (two subjects):

BIOLOGY, CHEMISTRY, ENGLISH, ENGLISH OR FRENCH (Second Languages), GEOGRAPHY, HISTORY, LATIN, MATHEMATICS, MODERN LANGUAGES (German, Italian or Spanish), PHYSICAL EDUCATION, PHYSICS AND RELIGIOUS STUDIES (Catholic or Protestant).

GENERAL PROGRAMS leading to teacher certification at pre-school and elementary school levels:

PRE-SCHOOL (children of ages 3-5) (see page 24)
EARLY CHILDHOOD (children of ages 5-8) (see page 25)
LATER CHILDHOOD (children of ages 8-11) (see page 26)

DIPLOMA PROGRAMS OFFERED

DIPLOMA PROGRAMS leading to teacher certification at the elementary, secondary, or combined elementary-secondary school levels:

Elementary Level

EARLY CHILDHOOD (ages 5-8) (see page 30)
LATER CHILDHOOD (ages 8-11) (see page 30)
FRENCH—SECOND LANGUAGE (ages 5-11) (see page 31)

Secondary Level (one or two teaching areas)

Preparation in one or two of the following teaching areas:
BIOLOGY*, CHEMISTRY*, ENGLISH, GENERAL SCIENCE*, GEOGRAPHY, HISTORY, MATHEMATICS, PHYSICS*, RELIGION (Catholic or Protestant), SECOND LANGUAGES (English, French, German, Italian, Latin or Spanish), SOCIAL STUDIES. (see page 28)

*Cannot be taken as a single teaching option.

Secondary Level (one teaching area only)
ART, HOME ECONOMICS, TECHNICAL-VOCATIONAL or BUSINESS EDUCATION (see page 28, 29)

Combined Elementary-Secondary Levels
MUSIC
RELIGIOUS STUDIES (Jewish) (see page 29)

NOTE: In conjunction with the School of Physical and Occupational Therapy, a one-year program leading to the McGill Diploma in Education is offered to qualified Physical Therapists who aspire to a teaching career in a recognized school of Physical Therapy. For further information on admissions, program and course requirements, write to the School of Physical and Occupational Therapy, 3654 Drummond Street, Montreal H3G 1Y5.

CERTIFICATE PROGRAMS OFFERED

Programs leading to certification at the secondary school level:
TECHNICAL-VOCATIONAL SUBJECTS (see page 29)
BUSINESS EDUCATION SUBJECTS (see page 29)

PART-TIME STUDENTS

During the summer months as well as in the evenings of the fall and spring terms the Faculty of Education offers a selected number of programs designed for certified teachers who are interested in pursuing further studies in elementary education or who wish to prepare for a career in the areas of Technical-Vocational* and Business Education*.

Candidates admitted to studies in elementary education may elect to enrol in either a 90 credit program leading to a Bachelor of Education degree or a 30 credit program leading to a Teaching Diploma issued by the Province of Quebec. All of these programs meet provincial standards in regard to the up-grading of teacher classification (Regulation #5).

For general information on courses, admission procedures, fees, etc. write to:

Centre for Continuing Education
772 Sherbrooke Street West
Montreal, Quebec

—OR—

McGill Summer Session
P. O. Box 6070,
Montreal, Quebec H3C 3G1

DEGREE PROGRAMS (see page 31)

Bachelor of Education degree program with concentration in:
EARLY CHILDHOOD EDUCATION
READING
SPECIAL EDUCATION
EDUCATIONAL MEDIA

DIPLOMA PROGRAMS

Diploma programs, derived from the concentrations offered in the degree programs (above):

KINDERGARTEN (see page 31)
—includes courses in CHILD DEVELOPMENT, ART, MUSIC, CREATIVE MOVEMENT AND DRAMATICS, TEACHING METHODS AND MATERIALS for children of the 5-8 age groups.

READING (see page 32)
—designed to train practicing teachers in more effective developmental and corrective teaching of reading.

*Certification not a pre-requisite for these programs.

NOTE: for detailed information, write to Prof. Frank Greene, Faculty of Education, 3700 McTavish Street, Montreal, Quebec, H3A 1Y2.

SPECIAL EDUCATION (see page 33)

—designed for teachers wishing to qualify for work with children who have learning and/or behavioural problems. Useful for any teacher interested in problems of learning, their diagnosis and assessment.

NOTE: For detailed information, write to Prof. H. Stutt, Faculty of Education, 3700 McTavish Street, Montreal, H3A 1Y2, Quebec.

EDUCATIONAL MEDIA (see page 33)

—intended to train teachers in more effective classroom communication and to prepare school or district media specialists.

NOTE: For detailed information, write to Director, Educational Media Centre, Faculty of Education, 3700 McTavish Street, Montreal H3A 1Y2, Quebec.

IN-SERVICE PROGRAMS

COLLEGIAL CERTIFICATION PROGRAM

This program is being developed currently as a pilot project in close consultation with the Anglophone CEGEP's of Quebec in an attempt to meet the general staff development needs of the Colleges and the particular needs of individual teachers. At the same time, this program has been designed to meet requirements for provincial certification as established by the Ministry of Education under the terms of Regulation No. 4. Thus, successful candidates will be eligible for official Ministry of Education certification to teach at the College level.

To date, two courses have beeen approved and offered:

Education 449-500: COLLEGE EDUCATION IN QUEBEC (see page 85) 6 credits

Education 449-581: APPROACHES TO COLLEGIAL LEARNING AND TEACHING (see page 85) 3 credits

Other courses are being developed and will be offered during this academic year. Inquiries may be addressed to the Director of College Level Programs, Faculty of Education, 3700 McTavish Street, Montreal, Quebec, H3A 1Y2.

CERTIFICATE IN SECOND LANGUAGE TEACHING (see page 33)

This program is open to certified teachers who wish to specialize in the teaching of second languages. At the present time the program offering is limited to the teaching of French as a Second Language in the elementary school.

GENERAL OBJECTIVE: To enhance professional competence of certified teachers who are interested in teaching second languages and who are sufficiently bilingual to do so.

SPECIFIC OBJECTIVES:

a) To consolidate proficiency in the language to be taught as a second language;
b) To impart information, skills and techniques related to second language teaching and testing;
c) To acquaint teachers with modern theories of psycholinguistics and sociolinguistics for a better understanding of their application to procedures and materials used in language learning.

For further information contact the Chairman of the Department of Education in Second Languages at 392-8863 or 392-8861.

CERTIFICATE IN VOCATIONAL EDUCATION

The Faculty of Education has been experimenting with different approaches to the training of Technical-Vocational/Business Education teachers in both full-time and part-time programs. While the full-time one-year program has been very successful, there remains the ongoing problem of meeting the needs of the school commissions in remote geographic locations and of predicting the types of Technical-Vocational teachers that the school commissions are going to require, especially in the lower frequency subjects.

Since it has been impossible to forecast the **total** need, candidates who have been teaching Technical-Vocational/Business Education subjects for at least one year, and who have no teacher training, are being admitted to a new experimental program which was initiated in 1973.

This program follows a philosophy of "on-the-job-training", based on the premise that student and instructor will jointly solve the problems that arise in the teaching situation while making maximum use of the milieu. For this reason, supervised field experience, seminars, and workshops play a major role in the development of this program.

The complete program includes 30 credits of course work offered over a period of three summers and two winters leading to a Certificate awarded by the University and to a Teaching Permit from the Ministry of Education.

For further information, contact Prof. F. Jack Young, Faculty of Education, 3700 McTavish Street, Montreal, Quebec, H3A 1Y2.

TEACHER CERTIFICATION PROGRAM (see page 34)

This program was inaugurated at the request of the Ministry of Education to serve the needs of the many uncertified teachers now holding a Provisional Teaching Authorization and who are presently engaged in teaching posts in high schools or elementary schools in the Province.

The courses in this 30 credit program are made available during the summer and in evenings during the fall and winter sessions.

For more detailed information, contact Prof. Gordon McElroy, Faculty of Education, 3700 McTavish Street, Montreal, Quebec, H3A 1Y2.

GRADUATE PROGRAMS

Through the Faculty of Graduate Studies and Research, the University offers graduate degrees in Education — the Master of Arts, the Master of Education, and the Doctor of Education. Many of these programs may be taken through full-time study or through part-time study in the evenings and Saturday mornings, and/or during the six week Summer Session.

The following Masters' degrees are at present offered in the Faculty of Education:

M.A. degrees in:

- Comparative Education
- Counsellor Education
- Educational Administration
- Educational Psychology
- History of Education
- Philosophy of Education
- Physical Education

M.Ed. degrees in:

- Counsellor Education
- Educational Administration
- Special Education
- Teaching of Reading
- Teaching Subjects

FACULTY OF EDUCATION

Only one doctoral program is at present available, the Doctor of Education in Counsellor Education. It is, however, possible for well qualified candidates to enter special doctoral programs in education under the sponsorship of the Faculty of Graduate Studies and Research.

For complete details on programs, admission requirements, fees, etc. consult the calendar of the Faculty of Graduate Studies and Research which may be obtained by a written request to Prof. L.B. Birch, Faculty of Education, 3700 McTavish Street, Montreal H3A 1Y2, Quebec.

3 PROGRAM PROFILES

DEGREE PROGRAMS

All the programs leading to the Bachelor of Education degree are of recent origin (introduced in 1971) and are designed primarily to accommodate the graduates of Quebec's new and still developing Colleges (CEGEP's) who aspire to a career in the teaching profession.

While requiring an academic and professional concentration which is essential for the candidate's basic preparation as a teacher in a given subject area and/or level of education, these programs also provide for the selection of a broad range of optional courses. This flexibility is intended to satisfy the diverse needs and interests of each student as these are perceived by the Faculty (staff adviser) or by the students themselves.

Each program, therefore, requires the completion of at least ninety (90) course credits in academic and professional studies chosen in consultation with a staff adviser (see 1 below) according to the following general pattern.

a) A minimum of thirty (30) course credits in an **ACADEMIC CONCENTRATION** (see 2 below);

b) A minimum of thirty (30) course credits in two semesters of **PROFESSIONAL CONCENTRATION** (see 3 below);

c) A maximum of fifteen (15) course credits which are determined by **DEPARTMENTAL SELECTION** (see 4 below);

d) A maximum of fifteen (15) course credits which each candidate may choose as **FREE ELECTIVES** (see 5 below).

GUIDELINES FOR COURSE SELECTIONS

1) Advisers

Before registration, each first year student will be introduced to a staff adviser with whom he will consult concerning program and course selection. Second and third year students will have an opportunity to make their selections in the month of April preceding registration in September. All new students (whatever year) will have the opportunity for pre-registration counselling (see Calendar dates). At registration, each student must present a copy of the Study Plan Form which was completed and signed by the staff adviser at the pre-registration meeting.

2) Academic Concentration

Academic concentration refers to those courses which provide content material related to the school subject(s) for which the teacher candidate is preparing, for example, English Literature, Canadian History, Chemistry, etc...

For those who select a **MAJOR PROGRAM**, all courses of the **ACADEMIC CONCENTRATION** must be in a single subject area (for example, Geography) or directly related to the subject (for example, Mathematics for Physics).

For candidates who select a **GENERAL PROGRAM (SECONDARY EDUCATION)** all courses of the **ACADEMIC CONCENTRATION** (36 credits in this program) must be equally divided between **OPTION I** (first subject) and **OPTION II** (second subject).

For candidates who select a program in **ELEMENTARY EDUCATION**, the courses of the **ACADEMIC CONCENTRATION** must be selected from the following subject areas taught in the elementary school: Art, English, French Mathematics, Music, Physical Education, Science, Social Studies, and Religion. These five subject areas are selected as **OPTIONS** in the following pattern:

OPTION I which requires a total of twelve (12) course credits continued throughout the program;

OPTION II which requires a total of nine (9) course credits continued throughout the program;

OPTION III — three (3) course credits;

OPTION IV — three (3) course credits;

OPTION V — three (3) course credits.

NOTE: For the selection of available courses in the **ACADEMIC CONCENTRATION**, students are referred to the Announcements and time tables of the Faculties of Arts, Science, Music and Religious Studies. For academic courses offered by the Faculty of Education see Section 7 of this booklet.

3) Professional Concentration

Professional concentration refers to those courses which deal with educational theory and practice. These course are grouped together in two semesters which are known as the **BASIC EDUCATION SEMESTER (BES)** and the **FIELD EXPERIENCE SEMESTER(FES)**. During these semesters a student may not enrol in an academic course without the approval of the Associate Dean (Academic).*

The courses offered during the **BES** or **FES** fall into three separate categories:

a) a general theory course which is required of all students (448-305 — INTEGRATED STUDY OF TEACHING & LEARNING):

b) field experience and curriculum courses which are specific to the teaching area and/or level of each candidate;

c) courses known as **EDUCATION ELECTIVES.** These are courses which offer the opportunity for study in greater depth of one or another aspect of the educational theory touched upon in the general course. For available selection, see **EDUCATION ELECTIVES** below.

4) Departmental Course Selection

Departmental course selection refers to those courses which are determined for each student or group of students by the Department responsible for the teaching area and/or level for which each student is preparing (example: for English, Secondary level, Department of Education in English; for elementary schools, early childhood, Department of Elementary Education, etc.). Although the courses chosen may be either academic or professional in content, they are not included among the requirements of the education semesters or the academic concentration. Thereby, the Department is able to supplement basic program requirements with others judged most likely to lead to a well-balanced profile relative to both the individual needs of each student and the teaching competencies demanded by the profession. Included under this title is the course 448-204A — INTRODUCTION TO EDUCATION which is generally required of all students.

5) Free Elective

Free elective refers to those courses, either academic or professional, which may be chosen by the student in order to fulfill perceived needs or to pursue areas of scholarly interest. Thus, the student is free to enrol in any course offered by the University within the limits established by timetables, pre-requisites, faculty jurisdictions, etc.

Before making selections, students are urged to discuss the matter with Departmental advisers or other competent counsellors. Although not required, it is recommended that the student use the opportunity provided by these electives to plan a coherent package of course selections which complement the basic program according to individual needs.

*Students who already possess a Quebec Teaching Permit (or equivalent qualification) are exempt from this requirement.

SUGGESTIONS

a) to prepare for graduate study in a subject discipline, additional courses in the **ACADEMIC CONCENTRATION**:

b) to prepare for graduate study in Education, a group of courses from a selected area (for example, Educational Psychology, Foundations of Education);

c) to support the minimum requirements of a General Secondary program, a choice of additional academic and curriculum courses in the areas of concentration;

d) to supplement preparation in elementary education, appropriate courses offered in Psychology, curriculum, or related academics;

e) to provide background for those who intend to teach in Catholic schools, selected courses in Catholic studies;

f) to enhance the basic teaching techniques, courses available in Educational Media.

For a full range of course offerings which might serve this purpose, consult the announcements of other faculties, especially those of Arts and Science. Courses available as **FREE ELECTIVES** in the Faculty of Education may be selected from the List of Course Offerings (section 7) in consultation with a Faculty adviser.

EDUCATION ELECTIVES

The courses listed below are those education courses which a student may select during the **Basic Education** or **Field Experience Semesters**. If scheduling permits, they are otherwise available as courses which the student may choose as **FREE ELECTIVES**.

Before making a selection, the student is urged to consult a staff adviser. This consultation should not take place until the student has decided on an area and/or level of teaching concentration (program profile).

Although the electives are specified for first, second and third years, crossover selections are permitted if approved by the Associate Dean (Academic).

Because of enrolment limits, first selections are not guaranteed. When registering, the student should be prepared to make a second or third choice.

FIRST YEAR ELECTIVES*

413-404	THE RISE OF PUBLIC EDUCATION IN THE 19TH CENTURY
413-408	HUMAN VALUES AND EDUCATION
414-201	NATURE AND CONDITIONS OF SCHOOL LEARNING
414-203	EDUCATION AND SOCIETY
414-208	THE DEVELOPMENT OF PERSONALITY AND SOCIAL BEHAVIOUR IN THE SCHOOL-AGE CHILD
414-249	CREATIVITY AND ITS CULTIVATION
415-398	PHILOSOPHY OF CATHOLIC EDUCATION
432-204	INTRODUCTION TO EDUCATIONAL MEDIA

SECOND YEAR ELECTIVES*

411-394	ADMINISTRATION OF EDUCATION IN QUEBEC
412-304	GROUP PROCESSES
413-404	THE RISE OF PUBLIC EDUCATION IN THE 19TH CENTURY
413-408	HUMAN VALUES AND EDUCATION
414-201	NATURE AND CONDITIONS OF SCHOOL LEARNING
414-203	EDUCATION AND SOCIETY pre-requisite: 414-205
414-205	SOCIOLOGY OF EDUCATION
414-304	MEASUREMENT AND EVALUATION IN EDUCATION
414-308	SOCIOLOGY OF THE CLASSROOM
414-340	EDUCATION OF EXCEPTIONAL CHILDREN
414-343	INTRODUCTION TO DIAGNOSIS AND ASSESSMENT

414-377 ADOLESCENCE AND THE PROCESS OF EDUCATION
414-394 COGNITIVE DEVELOPMENT IN THE SCHOOL-AGE CHILD AND ADOLESCENT (not open to those who have taken 414-396)
414-396 THE NATURE OF INTELLIGENCE (not open to those who have taken 414-394)
414-441 BEHAVIOR PROBLEMS OF EXCEPTIONAL CHILDREN
415-398 THE PHILOSOPHY OF CATHOLIC EDUCATION
415-399 CATHOLIC SCHOOL OF THE FUTURE
431-301 LINGUISTICS APPLIED TO SECOND LANGUAGE TEACHING
pre-requisite: permission of instructor
431-302 MEASUREMENT AND EVALUATION IN SECOND LANGUAGE TEACHING
431-340 ANIMATION TECHNIQUES IN SECOND LANGUAGE TEACHING
432-204 INTRODUCTION TO EDUCATIONAL MEDIA
432-205 PROJECTED MEDIA
432-306 EDUCATIONAL TELEVISION

THIRD YEAR ELECTIVES*

411-394 ADMINISTRATION OF EDUCATION IN QUEBEC
412-304 GROUP PROCESSES
413-404 THE RISE OF PUBLIC EDUCATION IN THE 19TH CENTURY
413-405 THE CRITICAL SPIRIT AND EDUCATION
413-406 INTRODUCTION TO COMPARATIVE EDUCATION
413-408 HUMAN VALUES AND EDUCATION
414-304 MEASUREMENT AND EVALUATION IN EDUCATION
414-308 SOCIOLOGY OF THE CLASSROOM
414-340 EDUCATION OF EXCEPTIONAL CHILDREN
414-341 GENERAL METHODS IN SPECIAL EDUCATION
415-398 PHILOSOPHY OF CATHOLIC EDUCATION
415-399 CATHOLIC SCHOOL OF THE FUTURE
427-343 ADVANCED READING INSTRUCTION - ELEMENTARY SCHOOL
pre-requisite: 427-228 or 427-238
430-333 COMPARATIVE SOCIAL STUDIES
pre-requisite: 430-332
430-403 SIMULATION IN SOCIAL SCIENCES
pre-requisite: 430-322 or 430-332, or 430-372 or 430-375.
430-404 VALUE ANALYSIS IN THE SOCIAL SCIENCES
pre-requisite: 430-322 or 430-332, or 430-372 or 430-375.
430-453 FIELDWORK IN SCHOOL GEOGRAPHY
pre-requisite: 430-372.
432-204 INTRODUCTION TO EDUCATIONAL MEDIA
432-205 PROJECTED MEDIA
432-306 EDUCATIONAL TELEVISION
432-404 CONTEMPORARY DEVELOPMENTS IN EDUCATIONAL MEDIA
pre-requisite:432-204

MAJOR PROGRAMS

Candidates admitted to Major programs must meet the following course requirements:

30 credits in a single academic concentration from courses chosen in consultation with a Departmental adviser;
33 credits in a professional concentration in which are included:
9 credits in Basic Education (448-204 and 448-305)
15 credits in Field Experience and Curriculum courses specific to the area of

* For detailed course descriptions see Course Offerings, (section 7.)

academic concentration;
9 credits chosen from list of Education Electives.
12 credits determined by the Departmental adviser (to complement the academic or professional concentration);
15 credits chosen as FREE ELECTIVES.

Art Education (Elementary — Secondary)
(For course selections, see Guidelines)

FIRST YEAR

ACADEMIC CONCENTRATION — 18 credits
Student must take 426-204A DRAWING, 426-296A BASIC DESIGN. Other courses (12 credits) may be selected from the following 3 credit courses:

205B	PAINTING II (See Note 2 below)
206A or B	INTRODUCTION TO GRAPHICS
207B	STUDY IN FURTHER GRAPHIC MEDIA
208A or B	INTRODUCTION TO CERAMICS
209B	CERAMIC II
297B	DESIGN II
398A	EARLY CANADIAN ART HISTORY
399B	CANADIAN ART

DEPARTMENTAL COURSE SELECTIONS — 6 credits
In the first semester student must take 448-204; in the second semester, 427-305 or 432-204 or another course approved by the Department.

FREE ELECTIVES — 6 credits

SECOND YEAR — FIRST SEMESTER

ACADEMIC CONCENTRATION — 12 credits
Student may choose to pursue two areas of concentration

PAINTING (426-304A and 305A)
or
GRAPHICS (426-394A and 395A)
or
DESIGN (426-396A and 397A)
or
CERAMICS (426-300A and 309A)

FREE ELECTIVE — 3 credits

SECOND YEAR — SECOND SEMESTER (BES)

448-305B	INTEGRATED STUDY OF TEACHING & LEARNING	6 credits
435-295B	DIRECTED OBSERVATION— ELEM. & SEC.	3 credits
CURRICULUM COURSE (426-342)		3 credits
EDUCATION ELECTIVE		3 credits

THIRD YEAR — FIRST SEMESTER(FES)

435-496	FIELD EXPERIENCE — ELEMENTARY & SECONDARY	9 credits
EDUCATION ELECTIVES		6 credits

THIRD YEAR — SECOND SEMESTER

DEPARTMENTAL COURSE SELECTIONS — 9 credits
Student must take two courses (6 credits) in one of the two areas of academic concentration selected in second year (See Note 1 below)

FREE ELECTIVES — 6 credits

NOTE 1 —Students are required to present an exhibition of their work at the end of the third year.

NOTE 2 — Sketching School —A ten day resident sketching school (Labour Day week-end through early September) is offered to students who have completed Painting II (426-205). This will be considered an optional part of Painting V (426-404) but may be taken in the first summer. Students will be expected to pay transportation, room and board (cost will be kept to a minimum).

Physical Education (Elementary—Secondary)
(For course selections, see Guidelines)

FIRST YEAR—FIRST SEMESTER

ACADEMIC CONCENTRATION (See note 2 below) — 12 credits
Students must take 434-205, 207, 241, and either 434-204 or 291 (for details, see page 80)

DEPARTMENTAL COURSE SELECTION — 3 credits
Students must take 448-204A INTRODUCTION TO EDUCATION.

FIRST YEAR—SECOND SEMESTER (BES)

448-305 INTEGRATED STUDY OF TEACHING & LEARNING — 6 credits
435-245 DIRECTED OBSERVATION—ELEMENTARY — 3 credits
434-242 ELEMENTARY P.E. METHODS — 3 credits

EDUCATION ELECTIVE — 3 credits

SECOND YEAR—FIRST SEMESTER

ACADEMIC CONCENTRATION — 6 credits
Students must take 434-331 and 434-301.

FREE ELECTIVES — 9 credits

SECOND YEAR—SECOND SEMESTER

ACADEMIC CONCENTRATION — 6 credits
Students must take 434-391B and 434-302.

DEPARTMENTAL COURSE SELECTION — 3 credits

FREE ELECTIVES — 6 credits

THIRD YEAR—FIRST SEMESTER (FES)

435-496A FIELD EXPERIENCE ELEM. & SEC. — 9 credits

EDUCATION ELECTIVES — 6 credits

THIRD YEAR—SECOND SEMESTER

ACADEMIC CONCENTRATION — 6 credits
Students must take 434-402 and 434-492.

DEPARTMENTAL COURSE SELECTIONS — 9 credits
Students must take three of 434-493, 494, 495, 496 and 497.

NOTE 1. Costume & Equipment: All students pursuing a major program in Physical Education are required to wear a costume appropriate to the activity as approved by the instructor. Students are also responsible for providing some items of personal sports equipment such as skis, skates, tennis racquets, etc.

NOTE 2. All students in the physical education major program must complete a minimum of 18 semester credits in activity courses before graduation. Nine of these credits are required, the remaining nine credits are to be chosen from the optional list. Registration in an advanced activity course requires at least a "C" grade in the introductory course and permission of the instructor. Not all elective activity courses will be offered each year. It should be possible, however, for a candidate to elect for any of these options sometime during the three year program. (see page 82).

Religious Education—Catholic (Elementary—Secondary)
(For course selections, see Guidelines)

FIRST YEAR

ACADEMIC CONCENTRATION — 18 credits
Recommended courses are 415-200, 204, 290, 206, 207 and 208 (for details, see Course Offerings, section 7).

DEPARTMENTAL COURSE SELECTIONS 6 credits
Students must take 448-204 in the first semester. In the second semester, 427-305 or 432-204 unless another course is approved by the Department.

FREE ELECTIVES 3 credits

SECOND YEAR—FIRST SEMESTER

ACADEMIC CONCENTRATION 12 credits
Recommended courses are 415-391, 394, 395 and 396 (See course offerings for details.)

FREE ELECTIVE 3 credits

SECOND YEAR—SECOND SEMESTER (BES)

448-305 INTEGRATED STUDY OF TEACHING & LEARNING 6 credits
435-295 DIRECTED OBSERVATION—ELEM. & SEC. 3 credits
CURRICULUM COURSE (415-341 or 392) 3 credits
EDUCATION ELECTIVE 3 credits

THIRD YEAR—FIRST SEMESTER (FES)

435-496 FIELD EXPERIENCE—ELEM. & SEC. 9 credits
EDUCATION ELECTIVES 6 credits

THIRD YEAR—SECOND SEMESTER

DEPARTMENTAL COURSE SELECTIONS 9 credits

FREE ELECTIVES 6 credits

NOTE: Students who prefer to combine a Religious Studies option (Secondary level only) with another subject are referred to p. 24.

Religious Education—Protestant (Elementary—Secondary)
(For course selections, see Guidelines)

FIRST YEAR

ACADEMIC CONCENTRATION (See Note 1 below) 18 credits
Recommended courses are 260-E140, 200, 300, 310 and 340 (for details on these and other available courses, see Announcement of the Faculty of Religious Studies).

DEPARTMENTAL COURSE SELECTIONS 6 credits
Students must take 448-204 in the first semester; in the second semester, 427-305 or 432-204 unless another course is approved by Departmental adviser.

FREE ELECTIVES 6 credits

SECOND YEAR — FIRST SEMESTER

ACADEMIC CONCENTRATION 12 credits
Recommended courses are 421-301, 260-345, 370 and 440 or other offerings listed among "Related Courses" in the Announcement of the Faculty of Religious Studies.

FREE ELECTIVE 3 credits

SECOND YEAR — SECOND SEMESTER (BES)

448-305 INTEGRATED STUDY OF TEACHING & LEARNING 6 credits
435-295 DIRECTED OBSERVATION—ELEM. & SEC. 3 credits
CURRICULUM COURSE (421-542 or 572) 3 credits
EDUCATION ELECTIVE 3 credits

THIRD YEAR—FIRST SEMESTER (FES)

435-496 FIELD EXPERIENCE—ELEMENTARY & SECONDARY 9 credits
EDUCATION ELECTIVES 6 credits

THIRD YEAR—SECOND SEMESTER

DEPARTMENTAL COURSE SELECTIONS — 9 credits
Students will take 412-304 and any other courses approved by Departmental adviser.

FREE ELECTIVES — 6 credits

NOTE 1. Students who choose this option are referred to Prof. D. MacNeill (Room 365) for advice and consultation.
NOTE 2. Those who prefer to combine a Religious Studies option (Secondary level only) with another subject are referred to p. 24.

Religious Education—Jewish (Elementary—Secondary)
(For course selections, see Guidelines)

FIRST YEAR

ACADEMIC CONCENTRATION (See Note 1 below) — 18 credits

DEPARTMENTAL COURSE SELECTIONS — 6 credits
Students must take 448-204 in the first semester; in the second semester, 427-305 or 432-204 unless another course is approved by program adviser.

FREE ELECTIVES — 6 credits

SECOND YEAR

ACADEMIC CONCENTRATION — 12 credits

DEPARTMENTAL COURSE SELECTIONS — 9 credits

FREE ELECTIVES — 9 credits

THIRD YEAR—FIRST SEMESTER (BES)

448-305	INTEGRATED STUDY OF TEACHING & LEARNING	6 credits
435-295	DIRECTED OBSERVATION—ELEMENTARY & SEC.	3 credits
422-401	TEACHING BIBLICAL LITERATURE I	3 credits
422-404	TEACHING HEBREW/YIDDISH—SECOND LANGUAGE	3 credits

THIRD YEAR—SECOND SEMESTER (FES)

435-496	FIELD EXPERIENCE—ELEMENTARY & SECONDARY	9 credits
422-402	TEACHING BIBLICAL LITERATURE II	3 credits
422-400	TEACHING CUSTOMS & CEREMONIES	3 credits

NOTE 1. Students who choose this option are referred to Prof. S. Epstein (3511 Peel Street, Tel.: 392-8257) for advice and consultation.

Secondary Education— Major Programs*
(For course selections, see Guidelines)

FIRST YEAR

ACADEMIC CONCENTRATION — 18 credits
Courses in the Academic Concentration should be selected from the offerings available in the Faculty of Arts or the Faculty of Science in consultation with a departmental adviser.

DEPARTMENTAL COURSE SELECTIONS — 6 credits
Students must take 448-204 in the first semester. In the second, they may take 427-305 or 432-204 or another course approved by the Department.

FREE ELECTIVES — 6 credits

SECOND YEAR—FIRST SEMESTER (BES)

448-305	INTEGRATED STUDY OF TEACHING & LEARNING	6 credits
435-375	DIRECTED OBSERVATION—SECONDARY	3 credits
	Curriculum Course (Major Subject)	3 credits
	EDUCATION ELECTIVE	3 credits

SECOND YEAR—SECOND SEMESTER (FES)

435-376	FIELD EXPERIENCE—SECONDARY SCHOOL	9 credits
EDUCATION ELECTIVES		6 credits

THIRD YEAR

ACADEMIC CONCENTRATION See Announcement, Faculty of Arts, Faculty of Science.	18 credits
DEPARTMENTAL COURSE SELECTIONS	3 credits
FREE ELECTIVES	9 credits

*For available options, see p. 10

Home Economics

Students who elect to follow a Major program in Home Economics are required to enrol in the courses offered in the School of Food Science for the first four semesters. During that period they are required to complete 60 course credits of which at least 30 must be in the Academic Concentration. Students then enrol for 30 course credits in professional subjects at the Faculty of Education.

THIRD YEAR—FIRST SEMESTER (BES)

448-305	INTEGRATED STUDY OF TEACHING & LEARNING	6 credits
435-375	DIRECTED OBSERVATION SECONDARY	3 credits
CURRICULUM COURSE (Major Subject		3 credits
EDUCATION ELECTIVE		3 credits

THIRD YEAR—SECOND SEMESTER (FES)

435-376	FIELD EXPERIENCE—SECONDARY SCHOOL	9 credits
EDUCATION ELECTIVES		6 credits

French Second Language (Elementary)

FIRST YEAR

ACADEMIC CONCENTRATION — 18 credits

To be selected from the following:

126-225D	104-200A	157-200A
126-229D	104-200B	157-203D
126-245D	104-201D	157-226A
126-247D	104-230A	
126-264D	104-241B	
126-275D		

(for details see the Announcement of the Faculty of Arts)

DEPARTMENTAL COURSE SELECTIONS — 6 credits

Students must take 448-204 in the first semester. In the second, either 427-305 or 432-204 or another course approved by the Department.

FREE ELECTIVES — 6 credits

SECOND YEAR—FIRST SEMESTER (BES)

448-305	INTEGRATED STUDY OF TEACHING & LEARNING	6 credits
435-245	DIRECTED OBSERVATION—ELEMENTARY SCHOOL	3 credits
CURRICULUM COURSE (431-342)		3 credits
EDUCATION ELECTIVE		3 credits

SECOND YEAR — SECOND SEMESTER (FES)

435-346	FIELD EXPERIENCE—ELEMENTARY SCHOOL	9 credits
EDUCATION ELECTIVES		6 credits

THIRD YEAR 12 credits

ACADEMIC CONCENTRATION

To be selected from the following:

126-317A	104-321B	157-316A
126-329D	104-410B	157-336B
126-333A	104-425A	157-370D
126-334B		157-406B
126-342D		157-480B
126-345D		
126-442D		

DEPARTMENTAL COURSE SELECTIONS 9 credits

Students will take 431-304B, 431-345A and 431-373A.

FREE ELECTIVES 9 credits

Secondary Education — General Programs*
(For course selections, see Guidelines)

FIRST YEAR

ACADEMIC CONCENTRATION 18 credits

— Option I (9 credits)

— Option II (9 credits)

DEPARTMENTAL COURSE SELECTIONS 6 credits

Students must take 448-204 in the first semester. In the second, they may take 427-305 or 432-204 or another course approved by the Department Chairman.

FREE ELECTIVES 6 credits

SECOND YEAR — FIRST SEMESTER (BES)

448-305	INTEGRATED STUDY OF TEACHING & LEARNING	6 credits
435-375	DIRECTED OBSERVATION — SECONDARY	3 credits
	CURRICULUM COURSE (Option I)	3 credits
	CURRICULUM COURSE (Option II)	3 credits

SECOND YEAR — SECOND SEMESTER (FES)

435-377 FIELD EXPERIENCE — SECONDARY SCHOOL (2 subjects) 9 credits

EDUCATION ELECTIVES 6 credits

THIRD YEAR

ACADEMIC CONCENTRATION* 18 credits

— Option I (9 credits)

— Option II (9 credits)

DEPARTMENTAL COURSE SELECTIONS 3 credits

FREE ELECTIVES 9 credits

Elementary Education — Nursery & Kindergarten
(For course selections, see Guidelines)

FIRST YEAR — FIRST SEMESTER

ACADEMIC CONCENTRATION 12 credits

Students will select 4 academic courses in at least 3 of the following subject areas (options I, II, III) one of which must be Art, Music, or Physical Education. **NOTE:** Two of the subject areas selected must be continued in second and third years (options I and II).

DEPARTMENTAL COURSE SELECTION 3 credits

Students must take 448-204. INTRODUCTION TO EDUCATION

*For available options, see p. 10

FIRST YEAR — SECOND SEMESTER (BES)

448-305	INTEGRATED STUDY OF TEACHING & LEARNING	6 credits
435-215	DIRECTED OBSERVATION — PRE-SCHOOL	3 credits
417-312	PRIMARY SCIENCE	3 credits
	EDUCATION ELECTIVE	3 credits

SECOND YEAR

DEPARTMENTAL COURSE SELECTIONS — 12 credits
Students must take 427-305, 433-322, and other courses as approved by the Department.

ACADEMIC CONCENTRATION — 12 credits
Students must continue Option I (six credits) and Option II (3 credits) and select Options IV & V (3 credits each).

FREE ELECTIVES — 6 credits

THIRD YEAR — FIRST SEMESTER (FES)

435-411	FIELD EXPERIENCE — NURSERY & KINDERGARTEN	9 credits
433-411	PRE-SCHOOL CURRICULUM	3 credits
	EDUCATION ELECTIVE	3 credits

THIRD YEAR — SECOND SEMESTER — 6 credits

- Option I (3 credits)
- Option II (3 credits)

FREE ELECTIVES — 9 credits

Elementary Education — Early Childhood

(For course selections, see Guidelines)

FIRST YEAR — FIRST SEMESTER

ACADEMIC CONCENTRATION — 12 credits
Students will select 4 academic courses in at least 3 of the following subject areas (options I, II, III): Art, English, French, Mathematics, Music, Physical Education, Science, Social Studies, and Religion.
NOTE: Two of the subject areas selected must be continued in second and third years (Options I & II.)

DEPARTMENTAL COURSE SELECTION — 3 credits
Students must take 448-204.

FIRST YEAR — SECOND SEMESTER (BES)

448-305	INTEGRATED STUDY OF TEACHING & LEARNING	6 credits
435-245	DIRECTED OBSERVATION — ELEMENTARY	3 credits
	CURRICULUM COURSE (427-228 or 428-322)	3 credits
	EDUCATION ELECTIVE	3 credits

SECOND YEAR

DEPARTMENTAL COURSE SELECTIONS — 12 credits
Students must take 427-228 or 428-322 (whichever was not taken in first year) and three courses (9 credits) among the following:

415-341	RELIGIOUS RESPONSE (CATHOLIC SCHOOLS)
417-442	CURRICULUM & INSTRUCTION IN ELEMENTARY SCIENCE
421-342	HUMAN AND RELIGIOUS VALUES (PROTESTANT SCHOOLS)
426-322	ART CURRICULUM & INSTRUCTION
427-305	EXPERIENCES IN COMMUNICATION

429-322 MUSIC CURRICULUM & INSTRUCTION
430-322 SOCIAL STUDIES CURRICULUM & INSTRUCTION
431-322 FRENCH — SECOND LANGUAGE
431-347 ENGLISH — SECOND LANGUAGE
434-421 MOVEMENT EDUCATION

NOTE: Students who have chosen subjects other than English or Mathematics as Academic Option I or II must elect curriculum courses which relate to those options (for example, if Option I is French then 431-322 Teaching French as a Second Language must be chosen).

ACADEMIC CONCENTRATION — 12 credits
Students must continue Option I (6 credits), Option II (3 credits), and select two new subject areas (Options IV & V — 3 credits each).

FREE ELECTIVES — 6 credits

THIRD YEAR — FIRST SEMESTER (FES)

435-421 FIELD EXPERIENCE — EARLY CHILDHOOD — 9 credits
433-421 ELEMENTARY CURRICULUM — EARLY CHILDHOOD — 3 credits

EDUCATION ELECTIVE — 3 credits
NOTE: For students who have not completed 427-343 or 427-499, the course 427-343 replaces the Education Elective.

THIRD YEAR — SECOND SEMESTER

ACADEMIC CONCENTRATION — 6 credits
— Option I (3 credits)
— Option II (3 credits)

FREE ELECTIVES — 9 credits

Elementary Education — Later Childhood
(For course selections, see Guidelines)

FIRST YEAR — FIRST SEMESTER

ACADEMIC CONCENTRATION — 12 credits
Students will select four academic courses in at least 3 of the following subject areas (Options I, II, III.): Art, English, French, Mathematics, Music, Physical Education, Science, Social Studies and Religion.
NOTE: Two of the subject areas selected must be continued in second and third years (Options I & II.)

DEPARTMENTAL COURSE SELECTION — 3 credits
Students must take 448-204.

FIRST YEAR — SECOND SEMESTER (BES)

448-305 INTEGRATED STUDY OF TEACHING & LEARNING — 6 credits
435-245 DIRECTED OBSERVATION — ELEMENTARY — 3 credits
CURRICULUM COURSE (427-238 or 428-332) — 3 credits
EDUCATION ELECTIVE — 3 credits

SECOND YEAR

DEPARTMENTAL COURSE SELECTIONS — 12 credits
Students must take 427-238 or 428-332 (whichever was not taken in first year) and three courses (9 credits) among the following:
415-341 RELIGIOUS RESPONSE (CATHOLIC STUDIES)
417-442 ELEMENTARY SCIENCE
421-342 HUMAN & RELIGIOUS VALUES
426-332 ART CURRICULUM & INSTRUCTION — LATER CHILDHOOD
427-305 EXPERIENCES IN COMMUNICATIONS

427-343 ADVANCED READING INSTRUCTION — ELEMENTARY SCHOOL
429-332 MUSIC CURRICULUM & INSTRUCTION
430-332 LOCAL & COMMUNITY STUDIES
431-332 FRENCH AS SECOND LANGUAGE
431-347 ENGLISH AS SECOND LANGUAGE
434-421 MOVEMENT EDUCATION

NOTE: Students who have chosen subjects other than English or Mathematics as Academic Option I or II must elect curriculum courses which relate to those options (for example, Option I is French then 431-332 Teaching French as a Second Language must be chosen).

ACADEMIC CONCENTRATION 12 credits
Students must continue Option I (6 credits), Option II (3 credits), and select two new subject areas (Options IV & V—3 credits each).
— Option I (3 credits) to be continued in 3rd Year
— Option II (3 credits) to be continued in 3rd Year
— Option IV (3 credits)
— Option V (3 credits)

FREE ELECTIVES 6 credits

THIRD YEAR — FIRST SEMESTER (FES)
435-431 FIELD EXPERIENCE — LATER CHILDHOOD 9 credits
433-431 ELEMENTARY CURRICULUM — LATER CHILDHOOD 3 credits
EDUCATION ELECTIVE 3 credits
NOTE: For students who have not completed 427-343 or 427-499, the course 427-343 replaces the Education Elective.

THIRD YEAR — SECOND SEMESTER
ACADEMIC CONCENTRATION 6 credits
— Option I (3 credits)
— Option II (3 credits)

FREE ELECTIVES 9 credits

DIPLOMA PROGRAMS

The Faculty of Education offers a variety of one-year professional programs in preparation for a teaching career in elementary or secondary education. These programs are open to candidates who hold a university degree. For details, see Section 4.

At the beginning of the fall session each student will be assigned a Faculty adviser who will assist the student in selecting courses and arranging a suitable timetable. In particular he will offer counselling in connection with the academic and student teaching programs.

In association with Education 446-504D, Orientation to Teaching, the Advisory Program also provides students with the opportunity to meet periodically with practising teachers and administrators and with representatives of teachers' associations and school boards.

SECONDARY EDUCATION

Candidates will be admitted to prepare in either one or two teaching areas.

Required Courses

(ALL CANDIDATES)

411-592 SCHOOL LAW
413-500 FOUNDATION STUDIES IN EDUCATION
or
415-594/595 PHILOSOPHY OF CATHOLIC EDUCATION
414-500 EDUCATIONAL PSYCHOLOGY
427-505 EXPERIENCES IN COMMUNICATION
435-574† CLASSROOM TEACHING
446-504 ORIENTATION TO TEACHING

†Students in the Secondary Diploma Program are required to complete two periods of student teaching comprising three weeks in the first semester and five weeks in the second, in selected high schools. During these periods, students are expected to commit themselves exclusively to the teaching programs arranged by the Faculty in cooperation with the schools.

From the following list, the candidate preparing in a single teaching subject **CHOOSES ONE**, the candidate preparing in two teaching subjects **CHOOSES TWO:**

ART	426-572D	PHYSICS*	417-578D
BIOLOGY*	417-576D	RELIGION (Catholic)	415-571D
CHEMISTRY*	417-577D	RELIGION* (Protestant)	421-301A & 572B
ENGLISH	427-572D	FRENCH	431-572D
ENGLISH (Second Language)	431-558D	LATIN	431-578D
GENERAL SCIENCE*	417-575D	GERMAN	431-579D
GEOGRAPHY	430-572D	ITALIAN	431-579D
HOME ECONOMICS**	418-572A & 573B	SPANISH	431-579D
HISTORY	430-575D	SOCIAL STUDIES	430-579D
MATHEMATICS	428-572D		

*Not available as a single subject.
**Available as a single subject only.

Elective Courses

The candidate preparing in a single teaching subject must take an additional advanced course in the teaching subject (List A) and one other course (List B).

LIST A

415-503	RELIGIOUS RESPONSE, SECONDARY ADVANCED, CATHOLIC STUDIES
418-574	HOME ECONOMICS, CURRICULUM & INSTRUCTION, ADVANCED
426-573A	ART, SECONDARY ADVANCED, CURRICULUM & INSTRUCTION
427-573B	ENGLISH, SECONDARY ADVANCED, CURRICULUM & INSTRUCTION
428-573B	MATHEMATICS, ADVANCED, CURRICULUM & INSTRUCTION
430-573B	GEOGRAPHY, SECONDARY ADVANCED, CURRICULUM & INSTRUCTION
430-576B	HISTORY, SECONDARY ADVANCED, CURRICULUM & INSTRUCTION
431-573A	SECOND LANGUAGE, SECONDARY ADVANCED, CURRICULUM & INSTRUCTION

LIST B

411-575	SECONDARY SCHOOL CURRICULUM
415-573A	LIVING WITH INSIGHT (Dept. of Catholic Studies)

421-301A LIVING WITH QUESTIONS (RELIGIOUS EDUCATION, Protestant)
421-572B HUMAN AND RELIGIOUS VALUES IN THE SECONDARY SCHOOL (Protestant)
426-532A or B ART CURRICULUM & INSTRUCTION — LATER CHILDHOOD
427-576A or B READING IN THE HIGH SCHOOL
431, 501A, D LINGUISTICS APPLIED TO SECOND LANGUAGE TEACHING
431-504D QUEBEC CULTURAL CONTENT OF SECOND LANGUAGE PROGRAMS
432-204 A or B INTRODUCTION TO EDUCATIONAL MEDIA

NOTE: Additional courses normally available in the B.Ed. Program may be open to 1G students who are following a single teaching elective. Admission to these courses is subject to the recommendation of the student's department and the permission of the instructor. Information as to available courses may be obtained from the student's department or the office of the Coordinator of the Secondary Diploma Program.

TECHNICAL/VOCATIONAL AND BUSINESS EDUCATION CONCENTRATIONS (Diploma or Certificate)

Required Courses

ALL CANDIDATES

411-592 SCHOOL LAW
413-500 FOUNDATION STUDIES IN EDUCATION
Or
415-594/595 PHILOSOPHY OF CATHOLIC EDUCATION
414-500 EDUCATIONAL PSYCHOLOGY
427-505 EXPERIENCES IN COMMUNICATION
435-574 CLASSROOM STUDENT TEACHING

Technical/Vocational Concentration only:

436-572 METHODS IN TEACHING TECHNICAL/VOCATIONAL SUBJECTS
436-574 ORGANIZATION AND ADMINISTRATION IN TECHNICAL/VOCATIONAL SUBJECTS

Business Education Concentration only:

436-562 TEACHING METHODS IN BUSINESS EDUCATION
436-564 ORGANIZATION AND ADMINISTRATION IN BUSINESS EDUCATION

Optional Course(s)

Students in the Technical/Vocational and Business Education concentrations will take the following courses:

436-575 CURRICULUM DEVELOPMENT IN TECHNICAL/VOCATIONAL EDUCATION
436-576 EDUCATIONAL EVALUATION IN TECHNICAL/VOCATIONAL EDUCATION

OR

the equivalent of one full course from options available in the Faculty of Education or in other faculties.

ELEMENTARY AND SECONDARY EDUCATION

MUSIC

Candidates with an acceptable degree in school music (or equivalent) will be admitted to a program which provides preparation for the teaching of music at both the elementary and secondary school levels. Students will take all of the REQUIRED COURSES listed in the previous section together with the following:

429-542A ELEMENTARY MUSIC CURRICULUM AND INSTRUCTION
429-572B SECONDARY MUSIC CURRICULUM AND INSTRUCTION

RELIGIOUS STUDIES (JEWISH)
A program offered for candidates with an acceptable undergraduate degree and with appropriate background in Jewish Studies as a preparation for the teaching of Jewish subject matter at the elementary and secondary levels. For the program profile, see third year, B.Ed. program in Jewish Studies, (p. 22).

ELEMENTARY EDUCATION — EARLY OR LATER CHILDHOOD

Candidates will be admitted to prepare for teaching at the Early or Later Childhood levels.

Required Courses

ALL CANDIDATES

411-592A or B SCHOOL LAW
413-502A or B SOCIAL FOUNDATIONS OF EDUCATION
or
415-594A or 595B PHILOSOPHY OF CATHOLIC EDUCATION
414-500D EDUCATIONAL PSYCHOLOGY
435-544D CLASSROOM STUDENT TEACHING
446-504D ORIENTATION TO TEACHING

The integration of theoretical and practical dimensions of the various courses is provided through an internship. This requires, in addition to a program of study at the Faculty, that students teach in classrooms for part of each week throughout the year. A Faculty member will serve as adviser to a group of students. The adviser will work cooperatively with students and school personnel in the preparation and evaluation of teaching assignments.

EARLY CHILDHOOD

ONE of the following required courses:
426-522A, B ART
427-522D READING AND LANGUAGE ARTS
428-522A or B MATHEMATICS
429-522A, B MUSIC
434-521A, B MOVEMENT EDUCATION
TWO of the following:
415-547A or B RELIGIOUS RESPONSE
417-522A or B SCIENCE
421-542A or B HUMAN & RELIGIOUS VALUES
426-522A, B ART
429-522A, B MUSIC
430-522A or B SOCIAL STUDIES
431-522A FRENCH CURRICULUM & INSTRUCTION
431-547A TEACHING ENGLISH AS A SECOND LANGUAGE
434-521A or B MOVEMENT EDUCATION

LATER CHILDHOOD

427-532D READING & LANGUAGE ARTS
428-532A or B MATHEMATICS
430-532A LOCAL & COMMUNITY STUDIES
Two of the following:
415-547A or B RELIGIOUS RESPONSE
417-532A or B SCIENCE
421-542A or B HUMAN & RELIGIOUS VALUES
426-532A or B ART

427-594B	CREATIVE DRAMA FOR THE CLASSROOM
429-532A or B	MUSIC
430-533B	COMPARATIVE SOCIAL STUDIES
431-532A or B	FRENCH
431-547A or B	TEACHING ENGLISH AS A SECOND LANGUAGE
432-204A or B	EDUCATIONAL MEDIA
434-531A or B	PHYSICAL EDUCATION

ELEMENTARY EDUCATION — FRENCH (SECOND LANGUAGE)

411-592A	SCHOOL LAW
413-502A or B	SOCIAL FOUNDATIONS OF EDUCATION, or
415-594A or 595B	PHILOSOPHY OF CATHOLIC EDUCATION
414-500D	EDUCATIONAL PSYCHOLOGY
431-501A	LINGUISTICS APPLIED TO SECOND LANGUAGE TEACHING
431-544D	TEACHING FRENCH AS A SECOND LANGUAGE
431-545B	THE BILINGUAL CLASS
431-540B	ANIMATION TECHNIQUES
435-544D	CLASSROOM STUDENT TEACHING
446-504D	ORIENTATION TO TEACHING

Any one Early or Later Childhood elective except French and Reading and Language Arts (see above).

PART-TIME PROGRAMS

DEGREE PROGRAM—ELEMENTARY EDUCATION

Candidates enrolled in this 90-credit program must complete course work within the following general pattern:

1) Thirty (30) academic credits in five (5) subject areas relevant to elementary education in a 12-9-3-3-3 pattern (i.e. 12 credits in one subject, 9 credits in a second subject, and 3 credits in each of three other subject areas.)

NOTE: Subject areas, relevant to elementary education, in broad terms, are English, French, History, Geography, Mathematics, General Science, Religion, Art, Music, Physical Education, etc...

2) Fifteen academic credits chosen in consultation with departmental adviser.

3) Fifteen (15) credits as **FREE ELECTIVES** (courses selected by candidate after consultation with departmental adviser). See Guidelines, p. 15.

4) Thirty (30) credits in a prescribed "education package" as prepared by the Faculty of Education. At the present time, these "packages" are available in Reading, Kindergarten, Special Education and Ed. Media as described below.

OR

Fifteen (15) credits as selected by the candidate and fifteen (15) education credits as determined by the Department of Elementary Education.

DIPLOMA IN KINDERGARTEN

Required Courses (24 credits)

414-214	CHILD DEVELOPMENT	6 credits
414-314	DEVELOPMENTAL TESTING OF YOUNG CHILDREN	3 credits
427-328	CREATIVE MOVEMENT AND DRAMATICS	3 credits
427-327	CREATIVE DRAMATICS AND CHILDREN'S LITERATURE	3 credits
433-312	METHODS AND MATERIALS FOR THE KINDERGARTEN	3 credits
429-212	MUSIC FOR NURSERY—KINDERGARTEN TEACHERS	3 credits
426-212	ART FOR NURSERY—KINDERGARTEN TEACHERS	3 credits

Electives (6 credits from the following list in consultation with Departmental Adviser.)

414-340	EDUCATION OF EXCEPTIONAL CHILDREN	3 credits
414-341	GENERAL METHODS IN SPECIAL EDUCATION	3 credits
414-342	ORGANIZATION OF SPECIAL EDUCATION PROGRAMS	3 credits
414-440	COGNITIVE AND PSYCHOMOTOR PROBLEMS OF EXCEPTIONAL CHILDREN	3 credits
414-441	BEHAVIOURAL PROBLEMS OF EXCEPTIONAL CHILDREN	3 credits
414-442	PSYCHOLOGY OF LEARNING PROBLEMS	3 credits
414-443	SCHOOL—HOME—COMMUNITY RELATIONS IN SPECIAL EDUCATION	3 credits
427-223	READING INSTRUCTION—EARLY CHILDHOOD	3 credits
427-224	CORRECTIVE READING INSTRUCTION—EARLY CHILDHOOD	3 credits

DIPLOMA IN READING

Required Courses (18 credits)

1) Candidates must take at least two of the following three Reading Instruction courses. These two must be either 223 **and** 233 or 233 **and** 523.

427-223	READING INSTRUCTION: EARLY CHILDHOOD	3 credits
427-233	READING INSTRUCTION: LATER CHILDHOOD	3 credits
427-523	READING INSTRUCTION: HIGH SCHOOL	3 credits

2) Candidates must take at least two of the following three Corrective Reading courses. These two courses must be either 224 **and** 234 or 234 **and 577.** In addition, the Reading Instruction course at the same level is a prerequisite for a Corrective Reading course. Both Corrective Reading courses are normally done in the same summer, making a full six week program. No other courses can be done while enrolled in the corrective courses due to time conflicts.

427-224	CORRECTIVE READING INSTRUCTION: EARLY CHILDHOOD	3 credits
427-234	CORRECTIVE READING INSTRUCTION: LATER CHILDHOOD	3 credits
427-577	CORRECTIVE READING INSTRUCTION: HIGH SCHOOL	3 credits

3) At least one of the following two courses:

427-344	CHILDREN'S LITERATURE	3 credits
427-345	LITERATURE FOR YOUNG ADULTS	3 credits

4) 427-533 INTEGRATED LANGUAGE ARTS 3 credits

Electives

Candidates may select 12 credits from the following list or any other course for which approval has been given:

414-340	EDUCATION OF EXCEPTIONAL CHILDREN
414-341	GENERAL METHODS IN SPECIAL EDUCATION
414-343	INTRODUCTION TO DIAGNOSIS AND ASSESSMENT
414-344	PRACTICUM IN DIAGNOSIS AND ASSESSMENT OF LEARNING PROBLEMS
414-440	COGNITIVE AND PSYCHOMOTOR PROBLEMS OF EXCEPTIONAL CHILDREN
414-441	BEHAVIOURAL PROBLEMS OF EXCEPTIONAL CHILDREN
414-442	PSYCHOLOGY OF LEARNING PROBLEMS
432-308	LIBRARY REFERENCE MATERIALS AND TECHNIQUES
432-309	THE LIBRARY—RESOURCE CENTRE
432-204	EDUCATIONAL MEDIA I

DIPLOMA IN SPECIAL EDUCATION

Required Pre-requisite Courses (12 credits)

These courses must be completed before proceeding to further course work.

414-340	EDUCATION OF EXCEPTIONAL CHILDREN	3 credits
414-341	GENERAL METHODS IN SPECIAL EDUCATION	3 credits
414-342	ORGANIZATION OF SPECIAL EDUCATION PROGRAMS	3 credits
414-343	INTRODUCTION TO DIAGNOSIS AND ASSESSMENT	3 credits

Required Courses (12 credits)

414-344	PRACTICUM IN DIAGNOSIS AND ASSESSMENT OF LEARNING PROBLEMS	3 credits
414-440	COGNITIVE AND PSYCHOMOTOR PROBLEMS OF EXCEPTIONAL CHILDREN	3 credits
414-441	BEHAVIOURAL PROBLEMS OF EXCEP. CHILDREN	3 credits
414-442	PSYCHOLOGY OF LEARNING PROBLEMS	3 credits

Electives (6 credits)

414-443	SCHOOL—HOME—COMMUNITY RELATIONS IN SPECIAL EDUCATION	3 credits
414-444	MATERIALS IN SPECIAL EDUCATION	3 credits
414-445	VOCATIONAL HABILITATION OF EXCEPTIONAL CHILDREN	3 credits
414-446	SPECIAL TOPICS IN THE EDUCATION OF EXCEPTIONAL CHILDREN	3 credits
414-240	CRAFT COURSE	0 credit

DIPLOMA IN EDUCATIONAL MEDIA

Required Courses (15 credits)

432-204	EDUCATIONAL MEDIA I	3 credits
432-205	PROJECTED MEDIA	3 credits
432-309	THE LIBRARY RESOURCE CENTRE	3 credits
432-405	INDEPENDENT PROJECT	6 credits

Electives (15 credits)

432-206	CHILDREN'S LITERATURE	3 credits
432-307	CATALOGUING AND CLASSIFICATION OF LIBRARY MATERIALS	3 credits
432-308	LIBRARY REFERENCE MATERIALS AND TECHNIQUES	3 credits
432-304	EDUCATIONAL MEDIA II	3 credits
432-306	EDUCATIONAL TELEVISION	3 credits
432-404	CONTEMPORARY DEVELOPMENTS IN EDUCATIONAL MEDIA	3 credits

IN-SERVICE PROGRAMS

CERTIFICATE IN SECOND LANGUAGE TEACHING

Candidates enrolled in this program will complete the course requirements in three stages.

STAGE I—Five months of full-time course work (enrolment in September or January)

a) Required Courses (12 credits) (12 credits)

431-544	TEACHING FRENCH AS A SECOND LANGUAGE	6 credits
431-301	APPLIED LINGUISTICS	3 credits
	SELECTED LANGUAGE COURSE (academic)	3 credits

b) Elective Courses*		6 credits
431-345	BILINGUAL CLASS	3 credits
431-304	CULTURAL CONTENT	3 credits
431-303	MEDIA & SECOND LANGUAGE TEACHING (DIDACTIQUE INSTRUMENTALE)	3 credits
431-306	PHONOLOGY AND SECOND LANGUAGE TEACHING	3 credits
431-307	ANTICIPATION OF DIFFICULTIES IN SECOND LANGUAGE TEACHING	3 credits
431-373	IN-DEPTH STUDY OF CURRICULUM DEVELOPMENT IN SECOND LANGUAGE	3 credits
431-302	MEASUREMENT AND EVALUATION IN SECOND LANGUAGE EDUCATION	3 credits
431-305	PSYCHOLINGUISTIC IMPLICATIONS IN SECOND LANGUAGE TEACHING	3 credits
431-340	ANIMATION TECHNIQUE	3 credits

*With Departmental authorization, up to 6 credits of the elective component may be academic course selections.

STAGE II—Guided and supervised practicum in a real classroom situation for one semester (6 credits).

STAGE III—Summer course work (six weeks) during which candidates will complete six credits in elective courses (selected from list provided in STAGE I above).

NOTE 1. Offering of elective courses will depend upon number of applicants and availability of instructors.

NOTE 2. Candidates who wish to benefit from the financial advantages provided through the Ministry of Education for this program are advised to contact their local school authorities for information on procedures to be followed.

TEACHER CERTIFICATION PROGRAM

Candidates must complete 30 credits of course work selected in consultation with a program adviser according to the following pattern:

SECONDARY LEVEL	
a) An Appropriate Psychology	3 credits
b) Quebec Education (including School Law)	3 credits
c) A Subject Methodology	3 credits
d) Supportive Teaching Strategies (or 2nd Subject Methodology)	3 credits
e) Field Experience	6 credits
f) Education Theory or Teaching Strategy Electives	12 credits
ELEMENTARY LEVEL	
a) An Appropriate Psychology	3 credits
b) Qubec Education (including School Law)	3 credits
c) Methods (Language Arts & Maths)	6 credits
d) Field Experience	6 credits
e) Educational Theory or Teaching Strategy electives	12 credits

4 ADMISSIONS

GENERAL REQUIREMENTS

(These regulations are correct at the time of going to press but are subject to change either by the University or by the Quebec Department of Education).

NOTE: It should be emphasized that meeting minimum academic admission requirements does not automatically guarantee admission. Letters of reference are required of all candidates and interviews may also be required.

Fluency in one of the two official languages (English or French) is a requirement for all candidates seeking Quebec Teacher Certification (See Section 5 Quebec Teacher Certification). In addition, all applicants are reminded that the normal language of instruction at McGill is English. Candidates must therefore possess a good functional knowledge of English before commencing their studies.

Applicants whose mother tongue is a language other than English or French are strongly advised to have their oral and written ability evaluated before submitting an application. (Tests may be arranged by contacting the Dept. of English or the Dept. of Second Languages at the Faculty of Education, 3700 McTavish Street, Montreal, H3A 1Y2, Quebec, Canada).

BACHELOR OF EDUCATION

(three-year, 90 credits, University-level program)

Quebec applicants must possess a Diploma of Collegial Studies as awarded by a CEGEP, or its equivalent. There are no specified pre-requisite courses required for admission but candidates are advised to include Introductory Psychology & Sociology and other courses relevant to their teaching areas. For example, a prospective teacher of Mathematics would be advised to have a concentration in Mathematics courses; courses in Biology and Chemistry are strongly advised for Physical Education applicants; courses in Art and Music would be appropriate for Early Childhood applicants. Generally speaking, CEGEP candidates are strongly advised to concentrate on those subjects which are taught in the Elementary and Secondary Schools of the Province of Quebec. (English, French, Mathematics, Science, History, Geography, Social Studies, Arts, Languages, Music, etc.)

Ontario Grade XIII candidates may apply for the 90 credit program if they have an average of 70% in five appropriate Grade XIII subjects. Candidates from Commonwealth countries with three G.C.E. 'A' Level subjects are also eligible to apply.

Other overseas students are eligible to apply if they possess certificates equivalent to those outlined above. Such applicants should refer to the "General Announcement" and are advised to write the Admissions Office for an evaluation of their qualifications.

Candidates with grade XII or similar standing should apply to the Faculty of Arts and Sciences in the first instance. After one year of successful study, they may then apply for transfer into the 90 credit B.Ed. program.

Note: 1. Candidates applying for B.Ed. programs in Physical Education, French, and Foreign Languages will be required to arrange interviews with the department concerned prior to admission.

Note: 2. Applicants who possess a first Bachelor's degree and who wish to study, for example, in the field of Physical Education or Art, should apply for admission to the B.Ed. degree with advanced standing.

Note: 3. Any candidate enrolled in the McGill B.Ed. as a second degree, will be required to take a minimum of 60 McGill credits in order to graduate.

McGILL DIPLOMA IN EDUCATION

(one-year program for University graduates)

All candidates for this Diploma must possess a university degree, or its equivalent, prior to admission. Candidates must normally have at least a 2nd class average in their degree and either a major (six full university-level courses) in one subject taught in the elementary or secondary schools of the Province of Quebec or two minors (three full university-level courses) in two such subjects.

In addition to these minimum requirements, certain subject areas have further requirements as outlined below:

Secondary Art

Candidates must possess a degree of Bachelor of Fine Arts, an Art School equivalent plus a university degree, or a Degree with Art Major in which studio work formed the major part of the program. Candidates are required to present a portfolio of their work and to arrange for an interview with a member of the Department usually during the month of April prior to admission.

Secondary English

Candidates should normally have taken six full university-level courses in the range offered in Departments of English, or three courses in English and three courses in another teaching subject; courses in linguistics, drama, and film are also recognized. For candidates who have graduated from a four-year B.A. degree program, a required first-year course in English may not be included in order to achieve the requisite number of courses. Candidates with special experience in English outside academic course work should apply to the Department of Education in English of the Faculty of Education if they are otherwise short of requirements.

Candidates should note that "English" and "English as a Second Language" are two different options. Those interested in the latter option should refer to the section below headed "Secondary Second Languages."

Secondary Social Sciences

a) Geography: The normal requirement of six full university-level courses in geography, or three courses in geography and three courses in another teaching subject is applicable. Candidates should have courses in both physical and human geography and, preferably, one course in Cartography.
b) History: The normal requirement applies as for geography above, but candidates should have at least one course in Canadian history and one course in European history.
c) Social Studies: Candidates may elect Social Studies as one of their teaching options but, in addition, they must have the qualifications to be admitted into a second teaching area. Their Degree must show an acceptable sequence of courses in at least one social science discipline, e.g., political science, economics, anthropology, or sociology.

Candidates who do not have the required number of courses to apply for the above programs may be counselled to undertake qualifying summer courses prior to admission.

Secondary Mathematics

Candidates seeking to teach only mathematics at secondary level must possess the normal requirement of six full courses in university-level mathematics provided that there has been no undue emphasis in one particular area, e.g. four courses in statistics.

Secondary Science
(Biology, Chemistry, Physics, General Science)

Candidates for the Secondary Biology, Chemistry and Physics options must possess appropriate pre-requisites at the college-level (or equivalent) as well as a minimum of **three** full university-level courses in the discipline concerned. Candidates for the General Science option must have some college-level (or equivalent) background in science as well as **three** full university-level courses in science. Preference will be given to candidates who have taken courses over and above these minimum requirements. All candidates must have the qualifications to be admitted to two subjects: either two science subjects or one science subject and one other secondary level subject.

Secondary Theology

Applicants who wish to teach Religious and Moral Formation must have a minimum of six full university-level courses in Theology. Those planning to teach another subject as well as religion, require a minimum of three such courses in Theology.

Jewish Studies

Candidates must possess an appropriate university degree and adequate background in Hebrew and/or Yiddish, Biblical literature, customs, etc.

Music

Candidates must possess a Bachelor of Music Degree in School Music or its equivalent. Students in this program are required to do student teaching and course work at both elementary and secondary levels.

Secondary Second Languages

In addition to meeting the minimum course requirements for admission, all candidates for the various options listed below should normally have taken at least one university-level course in linguistics, psycholinguistics or socio-linguistics. All candidates will be assessed on their oral and written competence in the language(s) they wish to teach. Assessment sessions will be held in the spring prior to admission. The options available are:—

a) French as a Second Language: candidates are reminded that in addition to oral and written competence in French they will also be required to take some courses given in the English language.

b) English as a Second Language: candidates should note that this is not the same option as "Secondary English". Those who plan to teach E.S.L. in French écoles secondaires are advised to have a good functional knowledge of French in order to work harmoniously in these schools.

c) Modern Languages (German, Italian, Spanish): candidates are reminded that in addition to oral and written competence in the language(s) they wish to teach they will also be required to possess a good functional knowledge of English. Qualified candidates in the Modern Languages option may choose to prepare in a single language only but are strongly advised to seek admission to one other teaching option for which they have the necessary qualifications.

d) Latin: candidates interested in this option should contact the Chairman of the Department of Education in Second Languages of the Faculty of Education **before** submitting an application.

Secondary Home Economics

Candidates must possess a University degree in Home Economics or an acceptable equivalent.

The candidate's transcript should show a sufficient number of courses in at least three of the areas of the secondary school curriculum in Home Economics and a minimum of courses in the remaining areas. The Quebec Secondary School Curriculum in Home Economics has the following areas — Foods and Nutrition,

Family Living, Housing and Design, Consumer Education and Clothing and Textiles.

Secondary Technical-Vocational or Business Education

The candidate must possess a university degree, or its equivalent, in appropriate subjects. Each candidate's credentials will be individually evaluated to ensure they meet the requirements with respect to academic background and work experience. This will be followed by an interview to further determine the candidate's suitability for admission to this program. All interested applicants should contact Professor F. Jack Young, Faculty of Education, 3700 McTavish Street, Montreal H3A 1Y2, Quebec.

Elementary Program

Candidates should possess the normal requirements of a 2nd class average in their degree and either a major (six full university-level courses) in one subject taught in the schools or two minors (three full university-level courses) in two such subjects. Candidates whose degrees do not contain the exact concentration of courses as outlined above may be considered for admission on the basis of the appropriateness for elementary school teaching of the courses taken in their degree, the standing achieved, letters of reference, etc.

Elementary French

In addition to the requirements for all Elementary candidates as outlined above, all applicants will be assessed on their oral and written competence in the French language.

Physical Therapy

In Conjunction with the School of Physical and Occupational Therapy, a one-year program leading to the McGill Diploma in Education is offered to qualified Physical Therapists who aspire to a teaching career in a recognized school of Physical Therapy. For further information write to The School of Physical and Occupational Therapy, 3654 Drummond Street, Montreal H3G 1Y5, Quebec, Canada.

CERTIFICATE PROGRAMS

(One-year programs leading to a Quebec Teaching Authorization)

Quebec applicants must possess a Diploma of Collegial Studies as awarded by a CEGEP or its equivalent. Non-Quebec applicants with equivalent qualifications are also eligible to apply. The admission requirements are similar to those for admission to the 90 credit B.Ed. Degree program and are outlined on page 26.

The specific program requirements are as follows:—

Technical-Vocational or Business Education

Candidates for these programs are drawn from a wide cross section of the technologies and trades in industry and business. Successful applicants participate in a one-year program leading to a teaching authorization.

For admission to Technical-Vocational or Business Education Programs a candidate must have thirteen (13) years of scholarity. This would normally mean Quebec Grade XI High School Leaving Certificate, (or equivalent) and, in addition, a candidate should:

a) be a graduate of a recognized professional training institution (university CEGEP, Business College, Technical or Professional Institute, Trade School) in appropriate subjects, and

b) have acceptable related work experience.

Each candidate's credentials will be individually evaluated to ensure they meet the above requirements with respect to academic and technical scholarity. This will be followed by an interview to further determine the candidate's suitability for admission to these programs. All interested applicants should contact Pro-

fessor F. Jack Young, Faculty of Education, 3700 McTavish Street, Montreal H3A 1Y2, Quebec.

Bachelor of Education (Elementary Education) (Part-time)

Candidates should hold Quebec Teacher Certification, or its equivalent, and have at least thirteen (13) years of schooling.

Quebec Diplomas in Reading Instruction/Special Education/Kindergarten/Educational Media [Part-Time]

Each of these 30 credit Diploma programs has its own specific admission requirements but, as a prerequisite for all, candidates must possess a teaching authorization valid in the Province of Quebec. Candidates who lack this basic qualification may be considered for admission to the courses but cannot be recommended for the Quebec Diploma. For further information contact the Student Affairs Office, Faculty of Education.

Collegial Certificate Program (In-Service)

Candidates must currently be under contract to teach full-time in a recognized CEGEP or equivalent institution.

Certificate in Second Language Teaching (In-Service)

A thirty-credit program for certified teachers. Applicants will be assessed on their oral and written competence in the language they wish to teach as a second language in the elementary school.

Normally candidates must be recommended by the school boards for which they work. Other candidates should first contact the Chairman of the Department of Education in Second Languages, Faculty of Education.

Certificate in Vocational Education (In-Service)
(Technical-Vocational, Business Education & related subjects)

Candidates must possess a currently valid Quebec Provisional Teaching Authorization and a contract to teach full-time with a recognized School Board.

Teacher Certification Program (In-Service)

Candidates must possess a currently valid Quebec Provisional Teaching Authorization and a contract to teach full-time with a recognized School Board.

GRADUATE PROGRAMS (M.A., M.Ed., D.Ed., Ph.D.)

M.A., and M.Ed. Degrees

Candidates must normally possess an undergraduate degree from a recognized university, with second class standing in at least one continuation subject, and also a Permanent Teaching Diploma valid in the Province of Quebec, or its equivalent. Candidates for the degree of M.Ed. in Counsellor Education are required to take, in adddition, a battery of standardized tests, while those considering the M.Ed. degree in a Teaching subject must furnish evidence of competence in practical teaching.

D.Ed. [Counsellor Education]

Candidates must hold the degree of M.Ed. in Counsellor Education of McGill University, or its equivalent, and have maintained a good second class standing in the degree. In addition, applicants must supply certain personal and educational data, take certain tests and submit to an interview procedure. For candidates who do not meet all of the above requirements, courses of qualifying study may be prescribed.

Ph.D.

At present the Faculty of Education does not offer a formal program leading to a Ph.D. However, under the Regulation set out in the Calendar of the Faculty of Graduate Studies and Research, it is possible for exceptionally well-qualified candidates to proceed to the degree of Ph.D. by making direct application to the Dean of the Faculty of Graduate Study and Research. Such candidates should have a very clear idea at the outset of the area of their prospective research.

Further specific requirements for particular degrees, and other information, should be sought from the Director of Graduate Studies, Faculty of Education 3700 McTavish Street, Montreal H3A 1Y2, before application to enter a program is made.

ADMISSION PROCEDURES

B.Ed. DEGREE PROGRAMS/McGILL DIPLOMA IN EDUCATION PROGRAMS

Apply before 1st March to:
Admissions Office,
McGill University,
P.O. Box 6070,
Montreal H3A 1Y2, Quebec, Canada.

NOTE 1. In certain circumstances, it may be possible for B.Ed. applicants to be admitted in January or July. Applicants interested in these possibilities should contact the Director of Admissions in the first instance.

NOTE 2. Students already attending McGill University and wishing to transfer from another Faculty into the B.Ed. Program, and candidates who have previously been admitted to the Faculty of Education and are now wishing to return as full-time students, should apply before 1st July, but preferably earlier, to the Associate Dean's Office, Faculty of Education, 3700 McTavish Street, Montreal H3A 1Y2, Quebec, Canada.

PHYSICAL THERAPY (McGILL DIPLOMA IN EDUCATION)

Apply before 1st March to:
The School of Physical & Occupational Therapy,
3654 Drummond Street,
Montreal H3G 1Y5, Quebec, Canada.

HOME ECONOMICS (B.Ed. DEGREE)

Apply before 1st March to:
School of Food Science,
Macdonald College H9X 3M1, Quebec, Canada.

B.Ed. (ELEMENTARY EDUCATION) FOR PART-TIME STUDENTS

Admission is possible in September, January and July. Apply to:
Student Affairs Office,
Faculty of Education,
3700 McTavish Street,
Montreal H3A 1Y2, Quebec, Canada

DIPLOMA IN SPECIAL EDUCATION/READING INSTRUCTION/KINDERGARTEN/EDUCATIONAL MEDIA

In first instance, apply to:
Student Affairs Office,
Faculty of Education,
3700 McTavish Street,
Montreal H3A 1Y2, Quebec, Canada.

NOTE 1: Candidates for Summer Session must apply before 15th May.
NOTE 2: For off-campus courses in Special Education, apply to office responsible for coordinating Continuing Education at the Regional School Board Offices.

COLLEGIAL CERTIFICATE PROGRAM / TEACHER CERTIFICATION PROGRAM (in-service)

Apply in first instance to:
Student Affairs Office,
Faculty of Education,
3700 McTavish Street,
Montreal H3A 1Y2, Quebec, Canada.

CERTIFICATE IN SECOND LANGUAGES (in-service)

Before submitting an application candidates must contact:
The Chairman,
Department of Education in Second Languages,
Faculty of Education,
3700 McTavish Street,
Montreal H3A 1Y2, Quebec, Canada.

VOCATIONAL EDUCATION CERTIFICATE (full-time and in-service)

Apply before 1st May (preferably earlier) to:
Prof. F.J. Young,
Faculty of Education,
3700 McTavish Street,
Montreal H3A 1Y2, Quebec, Canada

GRADUATE DEGREE PROGRAMS

Apply to:
Director of Graduate Studies,
Faculty of Education,
3700 McTavish Street,
Montreal H3A 1Y2, Quebec, Canada.

NOTE 1. Summer Session and Winter Session candidates in Counsellor Education and Educational Administration are required to apply by March 1. Other candidates applying for admission for the first time and wishing to start in the Summer Session must apply before April 1, and those wishing to commence their studies in the Fall must apply by July 3.
NOTE 2. Admission to the Faculty of Graduate Studies and Research for graduate programs in Education is made by the Dean of the Graduate Faculty on the basis of undergraduate record and satisfactory professional training. Admission to the appropriate courses is made by the individual departments of the Faculty of Education, and, where appropriate, by the departments concerned in other Faculties in consultation with the Faculty of Education.

5 ACADEMIC REGULATIONS

ATTENDANCE

The pattern of attendance necessary to satisfy the requirements of course work will vary according to the nature of different subjects and the professors' approaches to them. A course constitutes a contractual and social obligation between the professor and the student. It is, therefore, the responsibility of the professor to make students aware of the unique requirements of a course and the manner in which they may be fulfilled, and the responsibility of the student to meet these requirements.

(The intention of the foregoing is to avoid the imposition of arbitrary and artificial attendance regulations. The removal of restrictions implies confidence in the maintenance of a state of good will, mutual trust and common sense among the parties concerned.)

a) Students in programs involving Student Teaching, Internship or Field Experiences must inform the Student Teaching Office immediately if, for any reason, they are unable to attend their school.

b) Students wishing to withdraw or transfer from the Faculty must complete the official Withdrawal or Transfer Forms available from their Coordinator or the Associate Dean's Office.

STANDING AND PROMOTIONS

BACHELOR OF EDUCATION PROGRAMS

Each course is assigned a credit rating based on the number of hours per week the student has contact with the course.

Grade Point Average

Courses are graded either by letter grades or in percent, with the following correspondences: A (80-100%), B (65-79%), C (55-64%), D (45-54%), F (0-44%) Grades A, B, and C are termed satisfactory passes, D is a conditional pass, and F is a failure.

Ratings of 4, 3, 2, 1, and 0 are attached to the grades of A, B, C, D, & F respectively and the earned grade point for each course is the product of the credit rating of the course and the grade rating attained. Standing will be determined on the basis of a grade point average (GPA) computed by dividing the sum of the grade points earned by the total course credits attempted in the previous session.

The cumulative grade point average (CGPA) will be the grade point average calculated using the student's entire McGill record in the program. The original mark of a failed course will continue to be used in the calculation of the CGPA even after the course is repeated and passed, or if a supplemental examination is taken and passed. Under certain conditions (See 'Course Load' below) a student may be permitted to take more courses than would normally be carried. All such courses will be included in the CGPA calculation provided that they have been taken at McGill.

Standing

There are three categories of standing: Satisfactory, Probationary, and Unsatisfactory.

A student normally enters the Faculty in Satisfactory standing and remains in this standing until his GPA drops below 2.0

A student whose GPA drops to between 1.5 and 1.99 (1.2 and 1.99 for his entering year) goes into Probationary standing.

A GPA of less than 1.5 (less than 1.2 in the entering year) places a student in Unsatisfactory standing.

A student in Probationary standing must return to Satisfactory standing within one year by obtaining a GPA of 2.5 or attaining a CGPA of 2.0; otherwise he will be placed in Unsatisfactory standing.

A full-time student must remain in a position to complete his degree requirements within five years of admission to a 90-credit program, otherwise he reverts to Unsatisfactory standing.

Course Failure

If a student is judged a failure in the field experiences of his program, he will be required to withdraw from the Faculty. A request for subsequent re-admission may be made to the Committee on Admission, Standing and Promotion. If a student fails a course other than in field experiences, he may be permitted to sit a supplemental, repeat the course, or substitute another course at the discretion of the Committee on Admission, Standing, and Promotion.

Students in Unsatisfactory standing must withdraw from the Faculty. They may be re-admitted after appeal to the Committee on Admission, Standing and Promotion and subsequently considered to be on Probationary standing. A student in Unsatisfactory standing for the second time will be required to withdraw permanently.

Course Load

Full-time students in Satisfactory standing take between 13 and 17 credits per term. A higher load may be permitted students whose GPA is above 3.0. Full-time students on Probationary standing take between 10 and 12 credits per term, and may add to this load a repeated course in which a grade of D was originally obtained.

Degree Requirements

To be eligible for a degree, a student must have accumulated 90 course credits (i.e. passed courses whose credit total is 90), obtained a C grade or better in his teaching option(s) and related method(s) courses, and have a CGPA of at least 2.0.

Credit for CEGEP or College-Equivalent Courses

A student may include up to 18 credits of CEGEP or college-equivalent courses (provided these have not been used as part of the requirements for the Diploma of Collegial Studies) towards the 90 credits required for the B.Ed. degree.

McGILL DIPLOMA IN EDUCATION AND CERTIFICATE PROGRAMS

To Obtain a Clear Pass

(i) Students must have a satisfactory standing in student teaching.
(ii) Students in the secondary school option are permitted one D grade (exclusive of student teaching).
(iii) Students in the elementary option are permitted two D grades (exclusive of student teaching).
(iv) Students are not permitted any F grades.

Failed Standing

A student who fails more than two courses (either full or half course), fails the year. When a student's record includes one or more failures and one or more D's, so that the total number of failures and D's is more than two, the Committee on Admission, Standing and Promotion may recommend that such a student fails the year.

Supplemental Privileges

A student may be permitted to write a maximum of two supplemental examinations (either full or half course) in order to meet the criteria for a clear pass. In courses not evaluated by examination, a supplemental examination is not usually available. In such cases, it may be necessary for the student to repeat the course or to meet such other requirements as the Committee on Admission, Standing and Promotion may propose.

SUPPLEMENTAL EXAMINATIONS

If a student fails a course or obtains a conditional pass (45-54%), he may be permitted to sit a supplemental, repeat the course or substitute another course. It should be emphasized that these privileges are within the discretion of the Committee on Admission, Standing and Promotion. If permission is granted, the student must normally clear the failure or conditional pass within 16 months of terminating the original course.

(It should be noted that supplemental examinations are not necessarily available in all courses and that in fact no supplemental examinations are offered in Art, Music, Second Languages and Student Teaching. It is therefore the students' responsibility to check with individual instructors to ascertain whether or not supplementals will be available.)

Supplemental examinations, if available, are normally offered during the month of August. Students with permission to write such examinations must apply on the prescribed Form (before July 2) and pay the prescribed Supplemental Examination Fee.

A student's result in the supplemental will be recorded as an additional entry on the cumulative record and will be included in CGPA calculations. A student who does not intend to write the supplemental for which he is registered should officially withdraw, otherwise a grade of 'J' (Absent) will be recorded and included in CGPA calculations.

DEFERRED EXAMINATIONS

A student who, for reasons such as illness or family affliction, has been unable to write one or more final examinations, may receive permission to write supplemental examinations in their stead. An 'L' will appear on the Report of Standing in place of a grade in such courses, and will be replaced by the grade obtained in the deferred examination after it has been written.

INCOMPLETE COURSES

If, in the instructor's opinion, there is sufficient and valid reason to permit a delay in the submission of required course work, an extension of deadline of up

to four months after the end of the course may be granted the student. In this case, The Report of Standing will show a 'K' (incomplete) until either the final grade has been submitted by the instructor or the deadline has passed. In this latter case, 'K' will be replaced by 'F' (Fail).

CHANGE OF COURSE AND WITHDRAWAL FROM COURSE

Permission to change courses or withdraw with approval from courses must be obtained from the student's Adviser and/or Coordinator. The deadline dates for these changes are shown in the Calendar of Dates on page 2. A student who does not officially withdraw from a course that he is no longer attending is assumed to be still registered in the course. Fees will be charged accordingly and at the end of the session a mark of 'F' (fail) of 'J' (absent) will be recorded and included in the GPA and CGPA calculations.

TRANSFER CREDITS

N.B. Credit in courses for which the lowest passing grade was received is not transferable.

BACHELOR OF EDUCATION PROGRAMS

Credit may be granted by the Faculty of Education for courses taken at recognized universities other than McGill but not more than 30 credits of this type will be allowed towards the B.Ed. degree. Students seeking advanced standing upon admission should clearly indicate on their Application Forms which courses they wish to have considered for this purpose. Students already enrolled in the program must obtain approval from the Associate Dean (Student Affairs) before embarking on such courses. Normally, such transfer credits should be taken in the early part of the degree program. Students should note that the actual marks or grades achieved in transfer-credit courses are not included in CGPA calculations.

McGILL DIPLOMA IN EDUCATION AND CERTIFICATE PROGRAMS

Transfer credit in these programs is not normally possible because of the Provincial requirement to complete a full-year of studies for scholarity purposes. However, students who can show proof of having taken equivalent courses over and above the requirements for their Degree or Diploma of Collegial Studies, should apply for credit transfer in the first instance to the Associate Dean (Student Affairs).

B.Ed. (ELEMENTARY EDUCATION) FOR PART-TIME STUDENTS

Teachers enrolled in this program may transfer up to 30 credits from a recognized university other than McGill. In general, the same regulations apply as for the full-time B.Ed. degree program. A maximum of 45 Education course credits may be applied to the Degree from the Diploma programs in Kindergarten, Reading, Special Education, and Educational Media. A maximum of 30 credits may be applied to the Degree from the McGill post-CEGEP Certificate in Education Elementary programs.

NOTE: Faculty Regulations lie within the jurisdiction of the Faculty Committee on Admission, Standing and Promotion. Inquiries concerning their meaning or application should be addressed to the Chairman of that Committee.

"ACADEMIC CREDIT TRANSFER AGREEMENT"

Under the terms of an agreement between McGill University, Sir George Williams University, the Université de Montréal and the Université du Québec, it is possible for students at any one of these universities to take courses for transfer credit at any other of the participating universities provided that appropriate arrangements are made in advance through the office of the Associate Dean (Student Affairs). Further details of this arrangement may be found in the "General Announcement".

QUEBEC TEACHER CERTIFICATION

(The following is provided for general information purposes only. To the best of our knowledge the information was correct as at press time but is subject to change. For comprehensive and further information please refer to the relevant Statutes and Orders-in-Council of the Province of Quebec).

Teacher Certification in Canada is a Provincial responsibility. McGill University offers approved programs which the Government of Quebec accepts for initial Teacher Certification.

These programs are:

McGill Diploma in Education
Certificate in Education
Bachelor of Education

Upon satisfactory completion of one of the approved programs, the Government issues a "Permit to Teach" showing the level and area of concentration. This "Permit to Teach" is normally valid for five years. If the holder of such a Permit requires a permanent Quebec Teaching Diploma he must complete two years of satisfactory teaching in Quebec during the validity of the Permit. If the holder of such a Permit or of a permanent Diploma wishes to teach in another Province or in another country he must apply directly to the competent Teacher Certification Agency in the relevant Province or Country. Similarly, teachers from other Provinces or Countries who wish to teach in Quebec must apply to the competent authorities in Quebec:

Teacher Certification & Probation Service,
Complex 'G', 20th Floor
Parliament Buildings,
Quebec City, Canada.

In order to be eligible for a "Permit to Teach" candidates must be either Canadian Citizens, or Landed Immigrants, or must possess a Work Permit. To be eligible for a permanent Quebec Diploma it is necessary to be a Canadian Citizen.

In addition to meeting these requirements, candidates for Teacher Certification must be recommended by McGill University in each of the following areas:-

1. Adjustment of the personality for teaching
2. Command of the language of instruction
3. Theoretical knowledge in the field of psycho-pedagogy
4. Aptitude as a classroom practitioner
5. Academic competency in the area of concentration
6. Understanding of the Quebec educational system

Regulation No. 4 of the Quebec Department of Education "Respecting the Permit and the Licence to Teach" was approved by an Order-in-Council Number 592, March 30, 1966, and is reproduced below:

1. Authorization to teach at the levels of study governed by the regulations of the Minister of Education shall be awarded by the Minister and shall first be in the form of a permit to teach and later in the form of a licence to teach.

2. The permit to teach shall be awarded to every candidate who, after the thirteenth year of study or its equivalent, has successfully completed an approved training program at a recognized institution.

The duration and the nature of this program shall vary according to the level and the area of teaching selected by the candidate.

However, this program shall include, at the minimum, one year or the equivalent of psychology, teaching methods and classroom practice.

3. The permit shall be valid for a period of five years. It shall confer the right to teach during any two of these five years in an institution recognized for the purposes of the present regulation. Under exceptional circumstances, this right may be extended for one year.

4. The licence to teach shall be awarded to the holder of a permit who, having taught for two years in accordance with section 3, is deemed competent.

5. For the application of the present regulation, the Minister of Education shall appoint a Teacher Education Committee which he shall consult regarding the matters enumerated in section 6.

The members of the committee shall be appointed for a definite period. One-third of the members shall be appointed after consultation with the most representative of teachers' associations or organizations; one-third shall be appointed after consultation with institutions at which approved teacher-education programs are provided.

6. Subject to the provisions of section 28 of the Superior Council of Education Act, the Teacher Education Committee shall be responsible for recommending to the Minister criteria relative to the following matters:

a) The recognition of institutions at which the holder of a permit may teach;

b) The supervision of the teaching performance of the holder of a permit to teach;

c) The competence which the holder of a permit must demonstrate in order to obtain a licence to teach and the manner of evaluation of this competence;

d) The suspension or revalidation of a licence to teach;

e) The approval of teacher-education programs;

f) The recognition of institutions at which teacher-education programs are provided;

g) Refresher courses for teachers and the upgrading of their qualifications.

The committee shall also be responsible for making recommendations concerning the nomenclature and terminology of permits and licences to teach.

7. The holder of a teaching diploma granted under former regulations shall retain the rights conferred by such diploma.

8. The present regulation shall come into force, in whole or in part, on the dates to be determined by the Minister.

6 GENERAL INFORMATION

FEES AND OTHER EXPENSES

The University reserves the right to make changes without notice in the published scale of fees.

Fees are not refundable, except under special conditions. See "Regulations Concerning Withdrawal" below.

Commencing with the 1974-75 academic session, the University will introduce a new system of tuition fee assessment based on a per credit charge where applicable and on the basis of equivalences where the credit system does not apply. The basic charge for tuition fees will be $19.00 per credit and this fee will include all the regular charges of the University for registration, tuition, laboratories and libraries. In addition, fees for Student Services and for Student Societies are separately assessed and are added to the total fees payable.

Students enrolled in the 1-year Diploma or Certificate programs are not assessed on a credit system but will be charged a total fee of $654.00 for the year ($570.00 for tuition plus $56.00 for Student Services plus $28.00 for Student Societies).

Students enrolled in the Bachelor of Education degree program and all other students (except graduate students and students in Dentistry and Medicine) will be assessed according to the credit system. With a fee of $19.00 per credit, a student taking a normal academic load of 30 credits will pay $570.00 for tuition (30 X $19.00) for tuition plus fees for Student Services and Student Societies. Students taking more or less than the normal 30 credit load will be assessed fees on a pro rata basis. Thus, a B.Ed. student enrolled in only 24 credits will pay $456.00 (24 X $19.00) for tuition plus the normal fees for Student Services and Student Societies. A B.Ed. student with permission to accelerate and enrolled in 36 credits will pay $684.00 (36 X $19.00) for tuition plus normal fees for Student Services and Student Societies.

SCHEDULE OF FEES

** Application Fee (all students)	$15.00
***Supplementary Examination Fee	$10.00
Graduation Fee (Degree students only)	$10.00
Special Fees and Penalties: See "General Announcement"	
Per Credit Tuition Fee	$19.00
Student Services Fee (all full-time students)	$60.00
Student Societies Fee	$28.00
(Home Ec. Students Years 1 and 2	$43.00)

	TUITION	STUDENT SERVICES	STUDENT SOCIETIES	TOTAL
McGill Diploma in Education	$570.00	$60.00	$28.00	$658.00
Certificate in Education	570.00	60.00	28.00	658.00
B.Ed. (30 credits p.a.)	570.00	60.00	28.00	658.00
B.Ed. (P.E. Major) 30 credits p.a.	570.00	60.00	28.00	658.00
B.Ed. (Home Ec. Major) 1st and 2nd Years (Macdonald College)	495.00†	60.00	43.00	598.00
3rd Year (McGill)	570.00	60.00	28.00	658.00

†In 1976-77 this fee ($16.50 per credit) will be set at $19.00 per credit.

PART—TIME, SPECIAL AND VISITING STUDENTS

Where the credit system is applicable $19.00 per credit for tuition will be assessed. Otherwise the tuition fee will be $114.00 per full course and $57.00 per half course.

In addition, the following charges will apply for Student Services and Student Societies:

	STUDENT SERVICES	STUDENT SOCIETIES
18-23 credits:	$60.00	$28.00
10-17 credits:	$30.00	$10.00
less than 10 credits:	$15.00*	$10.00

*Excludes Athletics: At the discretion of the Director of Athletics, a student may participate in the Athletics program upon payment of an additional $30.00.

**Students already at McGill who are making application to a professional faculty or to the Faculty of Graduate Studies and Research are not required to pay this fee.

***Graduation Fee: Applications by students who expect to graduate at the Spring Convocation must be filed by March 1st of each year and by those who expect to graduate at the Fall Convocation by August 1st of each year. An application form will be mailed to each eligible student and must be returned to the Registrar's Office together with the graduation fee of $10.00 by the appropriate date listed above. This fee will cover all expenses in connection with graduation including academic dress. It is the student's responsibility to ensure that his or her name is included in the graduation list.

REGULATIONS FOR PAYMENT OF FEES

1. Students entering the University for the first time and those returning in Graduate Studies are required to pay their fees either by mail or in person at the Accounting Office within 10 days after registration. For students registering in September the second instalment is due before January 15, 1975.
2. Returning students from the previous year (except in Graduate Studies) must pay one half of the total required fee by mail or in person to the Accounting Office before August 23, 1974, otherwise they will not be permitted to register. Instructions for paying fees in advance will be mailed to all returning students, either with their Sessional Reports of Standing or a short time later. Students who have been notified by the University of the award of a scholarship, bursary or student loan, and who require this award for payment of the first instalment of fees, must obtain permission to delay payment of fees from the Student Aid Office.

The second instalment is due by January 15, 1975. A late payment fee as stated above is charged for payment after the specified dates.

3. Students registering late must pay their fees at the time of registration, failing which they become subject to the late payment fee and the provisions of the following paragraph.

As soon as possible after the prescribed dates for the payment of fees the Chief Accountant will send to the Dean of each Faculty a list of the registered students who have not paid their fees. The Deans will thereupon suspend them from attendance until such time as the fees are paid or a satisfactory arrangement is made with the Chief Accountant.

REGULATIONS CONCERNING WITHDRAWAL

A student who wishes to withdraw from the University or from certain courses, whether or not he wishes to apply for remission of fees, must secure the permission of the Dean or Associate Dean of his Faculty. The Office of the Associate

Dean will supply the necessary form which must be completed and submitted. Students withdrawing from all their courses must attach their Student Identity Card to the withdrawal form. A student considering withdrawal is strongly advised to consult his Dean or Associate Dean before making a final decision . Fees for the term in which the student withdraws are not refundable, except under special conditons. A student wishing to apply for remission of fees must consult the Chief Accountant.

PHYSICAL EDUCATION STUDENTS

An additional fee is charged to cover part of the costs of the Outdoor Education Course. Those students who elect curling or skiing are also required to pay additional fees.

BOOKS

Students should expect to spend about $75.00 a session for prescribed textbooks and for classroom and laboratory supplies, all of which may be purchased from the Book Store.

TRAVELLING EXPENSES

Students enrolled in programs leading to Quebec Teacher Certification are required to participate in student-teaching and/or internship in the schools. Although every effort will be made to place a student within reasonable travelling distance, this cannot be guaranteed in every case. Students are responsible for any travelling expenses which may be incurred.

BOARD AND RESIDENCE

See "General Announcement".

SCHOLARSHIPS

ENTRANCE SCHOLARSHIPS

In general, the University's sytem of entrance scholarships is designed to enable good students from all parts of Canada to attend McGill. The policy of the University is to recognize and honour scholarship, and the University Scholarships Committee selects scholarship winners from among those students who have obtained or who expect to obtain *a first class academic standing*. See General Announcement for further details.

AWARDS TO STUDENTS IN COURSE

See Scholarships, Bursaries, Prizes, Medals and Loan Funds Announcement.

FINANCIAL AID

Information concerning all matters relating to financial assistance, whether University, Provincial or Federal, may be obtained from the Student Aid and Foreign Student Advisor Office. This office also deals with all matters which may affect non-Canadian students

Location: 3465 Peel Street
General Information: 392-5256

Education students entering Technical-Vocational programs should apply directly to Professor F.J. Young when they lodge their applications.

HEALTH AND COUNSELLING SERVICES

UNIVERSITY HEALTH SERVICES

Location: 517 Pine Avenue West
Appointment and General Office: 392-5441
Mental Health Service: 392-5449

When students enroll at McGill University they have available to them a full range of medical service provided by the McGill University Health Service. Medical clinics operate daily, five days of the week from 9:00 a.m. — 5:00 p.m. A physician is always on call at night and on weekends and he can be contacted by dialing the Health Service number. There are both male and female physicians on staff as well as a competent staff of college health nurses.

The service is available to all full-time students, undergraduate and postgraduate. Students are asked to bring their Medicare cards or equivalent. *All information is completely confidential and forms no part of any "University record".*

Many students are seen for discussion about sexual life, contraception, drug problems and venereal disease. We urge students who suspect that they have V.D. to consult us. We invite students who are concerned about a drug problem to contact the Health Service and most particularly the Mental Health Section.

Part of the Health Service consists of a Mental Health Service which makes available to students psychiatric and psychological help. Students who wish to come are advised to make an appointment. If a psychological emergency arises the student should come directly to the Mental Health Service or phone immediately. All contacts by students with their service are kept completely confidential.

Participation in Athletics

A student in any academic year wishing to participate in heavy contact athletics, e.g. football, will be required by the Athletics Department to undergo a physical examination at the University Health Service. A student who has received medical attention for an illness or accident must be declared fit by the Health Service before he may again participate in athletics.

Non-Quebec Students

In order to ensure medical coverage while a student at McGill, Canadian students from provinces other than Quebec are advised to consult with the medicare and hospital insurance offices of their own province before coming to McGill. This is particularly important since residents of other provinces are not covered by Quebec Medicare and Hospitalization while studying at McGill.

Foreign Students

Non-Canadian students, whether undergraduate or postgraduate, are obliged to enrol in a medical and hospital insurance program. Consequently, the student and his dependents are covered to a large extent for medical and hospital expenses during the academic year. Information concerning this program can be obtained at the general office of the Health Service.

New Students

All students after having been accepted by the University will receive a Medical Questionnaire complete with a return envelope addressed to the Health Service.

The student is requested to complete this questionnaire and to return it in the envelope at the earliest possible date.

An appointment will be made for all new students to be seen by a physician at the University Health Service as early as possible during their first academic year. At this interview the health of the student will be reviewed and if it is thought necessary, the student will be medically examined. The examination may include X-ray and other appropriate laboratory or diagnostic tests. Re-examination may also be required in the interest of the student or of others attending the university.

OFFICE OF THE DEAN OF STUDENTS

The Dean of Students has the responsibility for the provision of and the coordination of all student services and works closely with the Students' Society in the interests of all students. The Dean, Associate Dean and Executive Assistant to the Dean are available for consultation with individual students who may wish to discuss problems not already provided for by one or other of the existing services. Legal problems which cannot be dealt with by the Legal Aid Service may be referred to the Executive Assistant. The Office of the Dean of Students maintains an "open-door" policy and students are invited to make use of these services at any time.
Location: 3465 Peel St.
General Information: 392-4551

STUDENT COUNSELLING SERVICE

This office provides a place where students of all faculties may discuss any problem confidentially. Among the services offered are individual counselling, human awareness groups, psychological assessment, vocational testing, effective reading courses, career planning and the Career Information Library. The service is free to all McGill students.
Location: 522 Pine Ave. W.
General Information: 392-5119

EDUCATION COUNSELLING CENTRE

Location: Room B-133
Faculty of Education
3700 McTavish Street
Telephone: 392-8889 or 392-8882
Open between the hours of 9:00 a.m. — 5:00 p.m. or in the evenings by special appointment.

The Department of Counsellor Education at McGill University provides free counselling services at their Counselling Centre for students. These services include educational and vocational counselling, counselling for social adjustment and emotional problems, group counselling, testing, and referral to other agencies.

The policy of the Counselling Centre is directed toward providing a place for individuals to discuss their vocational, personal, and educational problems in a confidential, understanding atmosphere. The director and his staff have the belief that any concern that one may have is worth listening to and discussing.

MISCELLANEOUS

DRESS REGULATIONS

There are no specific dress regulations in force in the Faculty of Education but all students enrolled in Teacher Certification programs are advised that Regional School Boards and individual schools may have regulations concerning acceptable attire. Students are advised to adhere to any such regulations.

LANGUAGE REQUIREMENT

One of the Government requirements for teacher certification in the Province of Quebec is a fluent command of the language of instruction. Education students who cannot demonstrate this fluency cannot be recommended for certification and will be required to withdraw from the Faculty. It is therefore very important that students whose mother tongue is not English or French should, if they have not already done so, obtain the approval of the Chairman of either

the Department of Education in English (392-8844)

or

the Department of Second Languages (392-8861)

as soon as possible and before registration. In addition, all applicants are reminded that the normal language of instruction at McGill is English. Candidates must therefore possess a good functional knowledge of English before commencing their studies.

CERTIFIED TRANSCRIPTS OF STUDENT'S RECORD

Transcripts of academic results may be procured from the Registrar's Office on application. The charge for this service, which is payable in advance, is $1.00 each for the first two, and twenty-five cents for each additional copy made at the same time.

EDUCATIONAL MEDIA CENTRE

The Educational Media Centre exists to serve both students and staff in their requirements for media service or instruction within the Faculty of Education. Service functions include: equipment distribution; preparation of instructional materials; television recording and playback; consultation. Teaching functions include: small group media workshops; equipment operation instruction; micro-teaching; and consultation. The Centre also offers credit courses which include: Introduction to Educational Media; Projected Media; Educational Television. The Centre is located on the first floor of the Faculty of Education building.

STUDENT PLACEMENT—CANADA MANPOWER CENTRE

Location: 762 Sherbrooke St. W.
Telephone: 283-4411

The Student Placement Office, in cooperation with the School Boards wishing to participate, arranges for the distribution of application forms for teaching posts and also schedules an Interview Day, usually in April, when School Boards may interview prospective Education graduates. The office also distributes Registration Forms for the Quebec Teacher Placement Bureau. A number of School Boards regularly inform the Placement Office of teaching vacancies. All potential and recent graduates are encouraged to make full use of the Centre's services.

THE McGILL JOURNAL OF EDUCATION

The Journal of Education is published twice a year, in the Spring and Fall. Subscription rates for students: 3 years — $2.50; 2 years — $2.00; 1 year — $1.50

Single copies — $1.00. Subscriptions, payable to the McGill journal of Education, should be addressed to the Circulation Department, McGill Journal of Education, 3700 McTavish Sreet, Montreal H3A 1Y2, Quebec, Canada.

LIBRARY (LIBRARIES) AND CURRICULUM LAB

The Education Library, located on the first floor of the Faculty of Education Building, has a collection of approximately 50,000 books, journals, microfilm and microfiche on Education and related subjects, as well as books on subjects taught in schools. The Curriculum Laboratory, adjoining the Library, has about 30,000 items including school text books, a collection of children's literature and audio-visual materials such as film strips, overhead transparencies, records, cassette tapes, kits, and pictures. A mini drop-in centre consisting of 24 carrels with a variety of audio visual equipment provide viewing, recording and listening facilities for modular courses. Previewing of teaching aids is also done in this section of the Lab.

There is a Physical Education library in the Currie Gym stocking books and journals on games, calisthenics, health and other related topics.

Education Library Hours

Monday to Friday	8:30 a.m. — 10:00 p.m.
Saturday	8:30 a.m. — 1:00 p.m.

Curriculum Lab.

Monday and Friday	8:30 a.m. — 5:00 p.m.
Tuesday and Thursday	8:30 a.m. — 9:00 p.m.
Saturday	9:00 a.m. — 1:00 p.m.

Physical Education Library

Monday, Wednesday, Thursday	9:00 a.m. — 8:00 p.m.
Tuesday and Friday	9:00 a.m. — 4:30 p.m.

Education students may use the main Library, McLennan, the Redpath Undergraduate Library as well as other McGill branch libraries. Hours may differ, however, in different libraries.

READING CENTRE

The McGill Reading Centre is a training facility for the Faculty of Education Graduate Program in Reading Education. It is located on the B1 level of the Faculty of Education building. From October to March and during the summer session, the Centre serves the general community as a referral diagnostic and remedial education facility. The Centre also provides college-level speed and study skills courses for McGill students (and others at fee). School personnel are welcomed as visitors. Visitation to schools for consulting on programs or specific problems may also be available.

During the summer, the Reading Centre operates a reading instruction program in a local elementary school. Information may be obtained by calling 392-8888.

EDUCATION UNDERGRADUATE SOCIETY

The Education Undergraduate Society, located beside the cafeteria, in room B185, is the students' voice within faculty. The Society's primary purpose is to serve and to inform the students. It also attempts unification of students through sponsorship of activities, such as:

the tutoring program (students teaching in underprivileged areas)
Teachers' Convention
Conference participation
Intramural athletics

and many more.

We encourage you to get involved. Make your opinions known. Drop by B185 or call 842-5541.

7 COURSE OFFERINGS

EXPLANATORY NOTES

This section of the Calendar lists all courses presently approved for inclusion in the degree, diploma or certificate programs offered by the Faculty of Education during full-time or part-time sessions. The Faculty reserves the right, however, to introduce such changes as may be deemed necessary or desirable.

The information provided for each course includes the title, description of content, the number, the credit rating or course weight and, where possible, the name of the responsible staff member.

COURSE NUMBER

The first three digits of the course number are used to designate the department or teaching unit from which the course originates. The code used is as follows:

411 — Educational Administration
412 — Counsellor Education
413 — Social Foundations of Education
414 — Educational Psychology & Sociology
415 — Catholic Studies
416 — Educational Research
417 — Education in Science
418 — Education in Home Economics
421 — Protestant Studies
422 — Jewish Studies
426 — Education in Art
427 — Education in English
428 — Education in Mathematics
429 — Education in Music
430 — Education in Social Sciences
431 — Education in Second Languages
432 — Educational Media
433 — Elementary Education
434 — Physical Education
435 — Student Teaching
436 — Technical-Vocational and Business Education
446 — Orientation
448 — Integrated Studies
449 — College-Level Programs

The last three digits of the number are generally used to indicate the year during which the course is normally taken, the teaching area or level for which it is intended, and the nature of the course.

The terminal letters indicate the semester(s) in which the courses are given, i.e., A-Fall; B-Spring; C-Summer; D-Fall & Spring; X-Fall (evenings); Y-Spring (evenings); Z-Fall & Spring (evenings).

CREDIT RATING

In the degree programs the credits given for any course are a measure of the effort expected of the student during each week of a fifteen week period. The number of hours per week, inclusive of lectures, labs, personal study, etc., devoted to a course should normally be three times the number of credits specified.

COURSE WEIGHT

In the diploma and certificate programs a weight in hours is given to each course relative to the lectures each week during one or two terms.

EDUCATIONAL ELECTIVES

Courses which are generally available as **ELECTIVES** during the Basic Education Semester or the Field Experience Semester are designated in the course list by a (†) placed beside the course number. For recommendations according to program, see p. 17.

ACADEMIC COURSES

Courses offered by the Faculty of Education which, if appropriate to the student's program, may be included in the ACADEMIC CONCENTRATION are designated in the course list by a (*) placed beside the course number.

411 — EDUCATIONAL ADMINISTRATION

†411-394B **ADMINISTRATION OF EDUCATION IN QUEBEC.** An introduction to the system of administration and decision-making in the public schools of the province as these relate to teachers. Consideration will be given to staff relationships, the politics of education, finance and administrative roles at all levels of the system. 3 credits.

411-575B **SECONDARY SCHOOL CURRICULUM.** This course focuses on the development of high school curricula in specific fields and their relationship to the total school program. It attempts to bring into perspective the total school program and the individual learning experience. It considers problems arising in the administration of curriculum development and curriculum implementation. 3 hours, 1 term.

411-592A, B **SCHOOL LAW.** Compulsory certification course to give prospective teachers an understanding of the framework of education in the Province of Quebec. 1 hr. 1 term.

412—COUNSELLOR EDUCATION

†412-304A,B **GROUP PROCESSES:** This course is intended to make the student familiar with group organization and operation as it relates to the schools. Interpretation of group inter-action and typical roles played by members in groups. 3 credits. (Limited Enrolment). **Dr. Maroun**

413 — SOCIAL FOUNDATIONS OF EDUCATION

†413-404A or B **THE RISE OF PUBLIC EDUCATION IN THE 19TH CENTURY.** The impact of industrialism, nationalism and colonialism on the development of public education in Western society (Not offered 1974-75). 3 credits. **Dr. Jobling**

†413-405A **THE CRITICAL SPIRIT AND EDUCATION.** A study of contemporary social and educational criticism, and its impact on the teacher and the school. Readings may be drawn from among the works of Marcuse, Roszak, Toffler, Camus, Buber, Hutchins, Neatby et al. 3 credits.

†413-406 B **INTRODUCTION TO COMPARATIVE EDUCATION.** Study of the dynamics of education in various societies throughout the world. The ideas and approaches of several disciplines are utilized in order to gain an understanding of educational systems and problems in comparative perspective. 3 credits.

413-407 B **EDUCATION AND SOCIETY IN QUEBEC.** A study of the relationship between education and society in Quebec from the 17th century to the present. Such topics as cultural dualism and education, church and education, modernization, are examined. 3 credits. **Dr. Magnuson**

†413-408 B **HUMAN VALUES AND EDUCATION.** A study of selected works dealing with moral, religious, social, and political values with a view to determining their relevance to basic educational issues. 3 credits. **Prof. Nemiroff**

413-500D **FOUNDATION STUDIES IN EDUCATION.** An examination of selected developments in the social foundations of modern education. 3 hours, 2 terms. **Staff**

413-502A, B **SOCIAL FOUNDATIONS OF EDUCATION** (See 413-500D.) 3 hours, 1 term. **Staff**

414 — EDUCATION PSYCHOLOGY AND SOCIOLOGY

†414-201A **THE NATURE AND CONDITIONS OF SCHOOL LEARNING.** Learning and behaviour. Maturation and Learning. Classical conditioning and its adequacy as a model for classroom teaching. Operant conditioning and basic learning processes. Verbal learning and concept formation. Remembering and forgetting. Transfer of learning and problem solving. 3 credits. **Professor Birch**

†414-203B **EDUCATION AND SOCIETY.** This course focuses broadly on education, dealing with the functions of different levels of education in societies at various stages of development, and emphasizing present-day Quebec and Canadian society. The sources of support for public education, the controls imposed upon educators, and the relationship of education to the occupational structure are analysed. Educational opportunity and social mobility in an industrial society, and the impact of social stratification on educational policies are discussed. 3 credits. *Prerequisite: 414-205A.* **Prof. Pinto**

414-204A **A GENERAL INTRODUCTION TO PSYCHOLOGY FOR TEACHERS.** This course is designed for students who have had little or no previous psychology. Topics dealt with are those considered most likely to be useful for an understanding of other courses in Educational Psychology offered by the Department. The course will deal with Learning, Intelligence, Motivation, and Personality. 3 credits.
Prof. Gougeon

†414-205A **SOCIOLOGY OF EDUCATION—AN OVERVIEW.** An introductory course, designed to present students with a broad sociological perspective from which to view education and to provide background for subsequent courses in the sociology of education. Topics will include the role of education as an institution in society, the school as a social system, the role of educational personnel and the influence of social variables such as race, sex, ethnicity, and socio-economic status on teaching and learning. 3 credits. **Prof. Pinto**

†414-208A, B **THE DEVELOPMENT OF PERSONALITY AND SOCIAL BEHAVIOUR IN THE SCHOOL-AGE CHILD.** This course will deal with personality, social behaviour, and moral development from nursery school up to adolescence. The emphasis will be on aspects of personal and social development that are related to the process of schooling with attention to teacher attitudes and practices in dealing with the problems of children. 3 credits. **Profs. McKay, McCardell, Cartwright**

414-214C **CHILD DEVELOPMENT.** The social, emotional, psychological and intellectual growth and development of the young child; guided observation of children; seminars; reports; individual readings. (Not offered 1974.) 6 credits.

414-240C **CRAFT COURSE.** A workshop approach intended to show how learning and behaviour may be helped by skills developed through craft work; includes use of wood, leather, metals and ceramics as well as demonstrating how to improvise with commonplace materials. This course is usually taken in Phase 1. Valid for Diploma in Special Education only. (Not offered 1974.) (No credit.)

†414-249B **CREATIVITY AND ITS CULTIVATION.** Survey of recent research and theory concerning creativity, with special attention to creativity in school-age children; treats problems of defining and assessing creativity, the relationship between creativity and intelligence, the nature of the creative process and personality and creative behaviour. Methods of enhancing creativity will be examined, emphasizing ways of facilitating creativity in a school setting. 3 credits. **Prof. Rejskind**

414-300A **THE SCHOOL AS AN ORGANIZATION.** Structures and functions of schools at various levels. Pre-school to university, and in various segments of society; relationships of schools as organizations to other organizations; school size, complexity of organizational structure; authority patterns, and modes of compliance related to teaching and learning; career patterns in education and patterns of interactions among school personnel. 3 credits. *Prerequisite: 414-203 or 414-205.* (not offered 1974-75)

†414-304B **MEASUREMENT AND EVALUATION IN EDUCATION.** The purposes of examinations. Causes of complaints about examinations. Equalizing means and dispersions in distribution of marks. Standardized scores. The percentile system. Essay and objective-type examinations. Taxonomies of educational objectives. Validity and reliability: item analysis. 3 credits. **Prof. Gougeon**

414-305B **NON-VERBAL COMMUNICATION.** An introductory course dealing with non-verbal aspects of behaviour and its interpretation. It will deal also with non-verbal communication in young children and children without speech. Some consideration will be given to the cognition of behaviour acts from drawings, cartoons, and illustrative gestures. 3 credits.
Prof. Edwards

†414-308B **SOCIOLOGY OF THE CLASSROOM.** The classroom as a social system; school or class climate as it influences the learner. The socialization process; social class, racial and ethnic variations in socialization styles. Influences on learning of teacher on child's self-concept and subsequent results in terms of achievement, level of aspiration, and social mobility. 3 credits
Prof. Pinto

414-314C **DEVELOPMENTAL TESTING OF YOUNG CHILDREN.** Guided observation of children with emphasis on developmental testing. Lectures, demonstrations and testing practicum. (Not offered 1974). 3 credits. *Prerequisite: 414-214.*

†414-340A, B **EDUCATION OF EXCEPTIONAL CHILDREN.** Introduction to the education of exceptional children; characteristics, classification, needs of exceptional children; developmental and corrective programs; areas of current research. 3 credits
Prof. Wilkinson, Mr. Morton

414-341B **GENERAL METHODS IN SPECIAL EDUCATION.** Class organization, teaching methods, assessments of educational level, setting objectives, grouping, individual programming, and reporting. 3 credits
Prof. Butler

414-342X or Y **ORGANIZATION OF SPECIAL EDUCATION PROGRAMS.** Needs of EMR, slow-learning and emotionally disturbed children: characteristics, school programs, evaluation of progress; integration into the community. 3 credits. **Prof. Stutt**

†414-343A **INTRODUCTION TO DIAGNOSIS AND ASSESSMENT.** Principles and procedures in the evaluation of pupil growth and achievement. Emphasis on the use and interpretation of tests to be given by the class teacher. 3 credits **Prof. Pupo**

414-344X or Y **PRACTICUM IN DIAGNOSIS AND ASSESSMENT OF LEARNING PROBLEMS.** A supervised practicum in the use of various tests and measures in learning problems of children; developing prescriptive teaching programs. 3 credits. *Prerequisite: 414-343.*
Prof. Sokolyk

†414-377A, B **ADOLESCENCE AND THE PROCESS OF EDUCATION.** Development of personality and social behaviour in adolescence. Problems relating to self-concept, academic achievement, relationships with others, and development of values in a changing culture. Some attention to current criticisms of the school as an agency involved in adolescent development. 3 credits
Profs. Mager, Pupo

†414-394A **COGNITIVE DEVELOPMENT IN THE SCHOOL-AGE CHILD AND ADOLESCENT.** The major orientation of the course will be around Piaget's theory of intellectual development and its relevance for the school, although the work of others in the field will also be considered. (This course should be seen as a complement to either 414-208B, The Development of Personality and Social Behaviour in the School-age Child, or 414-377A, Adolescence and the Process of Education).(Not to be taken by students who have taken 414-396). 3 credits.
Prof. Hanrahan

†414-396B **THE NATURE OF INTELLIGENCE.** The nature, development and measurement of intelligence in a school setting. Intelligence and learning; creativity and intelligence; intelligence and cultural deprivation. The role of the school in developing intelligence. (Not open to students who have taken 414-394). 3 credits (Not offered 1974-75.)

414-440X or Y **COGNITIVE AND PSYCHOMOTOR PROBLEMS OF EXCEPTIONAL CHILDREN.** Teaching methods appropriate to individual and small group instruction to overcome a variety of learning problems. Emphasis on perceptual difficulties. Concurrent with 414-442. 3 credits.

†414-441B **BEHAVIOURAL PROBLEMS OF EXCEPTIONAL CHILDREN.** Teaching methods appropriate to the needs of pupils with emotional and behaviour problems. Methods presented will include behaviour modification techniques. 3 credits
Prof. Mager

414-442X or Y **PSYCHOLOGY OF LEARNING PROBLEMS.** The Learning Process; personality development, perceptual dysfunction, behaviour disorders and other handicapping conditions related to learning. 3 credits.

414-443X or Y **SCHOOL-HOME-COMMUNITY RELATIONS IN SPECIAL EDUCATION.** Influence of home and community on the child, teacher-parent interviews, reporting, co-operation with hospital clinics, other professionals, etc. 3 credits.

414-444X or Y **MATERIALS IN SPECIAL EDUCATION.** A critical examination of materials available for special educational programs, commercial and teacher-made materials; the application of A-V techniques to Special Education. 3 credits.

414-445X or Y **VOCATIONAL HABILITATION OF EXCEPTIONAL CHILDREN.** Vocational requirements of non-academic children, vocational preparation as a responsibility of the special class teacher, placement services, follow-up. 3 credits. *Prerequisites: 414-340, 414-341.*

414-446X or Y **SPECIAL TOPICS IN THE EDUCATION OF EXCEPTIONAL CHILDREN.** A seminar or workshop approach to selected topics in the field of Special Education. Examples of possible topics include Language Development, Educable Retarded Adolescents, and Behaviour Modification. 3 credits. *Prerequisite: 414-340, 414-341.*

414-492A **PSYCHOLOGY AND INSTRUCTIONAL DESIGN.** This course draws on the fields of learning theory, developmental psychology, and measurement to focus on the tasks of constructing instructional materials. Areas to be considered include behaviour analysis, concept formation, and test construction. 3 credits
Prof. Geis

414-500D **EDUCATIONAL PSYCHOLOGY.** This course is offered in separate sections for future elementary and secondary teachers in the 1G programs. **Staff**

415— CATHOLIC STUDIES

*415-200A **GOD AND MAN IN DIALOGUE.** An exploration of "Revelation" (especially as conceived by the Second Vatican Council) with particular concern for man's responsibility within the revelational process today. 3 credits. **Prof. Lawlor**

*415-204A **MAN BEFORE REALITY.** An exploration of the real in its being and its becoming, in its principles and its causes, in its unity and its diversity, in its truth and its goodness. 3 credits. **Staff**

*415-205B **PHILOSOPHY OF RELIGION.** An investigation of the meaning of Religion and its relevance to our age. A study of major world religions to determine the basic truths which enable men and women of every age to relate themselves to the Supreme Being and thus achieve complete self-realization. 3 credits. **Staff**

*415-206B **THE CHURCH AND THE FUTURE.** A reading discussion course which explores, in future perspective, the significance of the Church. What does it mean "to be Church" at a time when new styles of consciousness and new world views are advocated? 3 credits **Prof. Lawlor**

*415-207B **WHO IS CHRIST?** An open search for the authentic person of Christ — from Scriptures and present day manifestations. 3 credits. **Prof. Francoeur**

*415-208B **IN SEARCH OF MAN.** An exploration of man's place in the world; his role as a knower; his dynamic responses to his environment; his ultimate nature as a human person. 3 credits **Staff**

*415-209A **THE SEARCH FOR AUTHENTICITY.** An exploration of contemporary man's search for himself and his God as reflected in the lives and writings of such persons as: Daniel Berrigan, Mohandas Gandhi, Hermann Hesse, and Elie Wiesel. 3 credits. **Prof. Lawlor**

*415-290A **GUIDE TO READING THE BIBLE.** A basic introduction to the Judaeo-Christian Scriptures with the emphasis upon reading and existential interpretation. 3 credits. **Prof. Hilton**

415-341A, B **RELIGIOUS RESPONSE IN THE ELEMENTARY SCHOOL.** In harmony with the discoveries of developmental religious and moral phases in the life of the elementary child, this course explores developing programs and procedures in the elementary school. 3 credits. **Prof. Francoeur**

*415-391A **A THEOLOGY OF PROCLAMATION.** Man's responsibility and involvement in realizing the Divine Plan; how God chooses to depend upon man for the growth of His People towards Him. 3 credits. **Prof. Francoeur**

415-392A **GUIDING THE RELIGIOUS RESPONSE—SECONDARY.** An introduction to the science of the guidance of young people through the slow developmental patterns of grasping life's meaning and of directing their lives in consequence. Attention is given to the importance of the teacher's own self-image. 3 credits. **Prof. Lawlor**

*415-394B **PHILOSOPHY OF GOD.** Starting with man's experience of being, an exploration of fundamental truths concerning the existence and the nature of God. The study draws extensively upon the thought of Thomas Aquinas and considers such basic issues as freedom and evil in relation to the knowledge and goodness of God. 3 credits **Staff**

*415-395A **CHRISTIAN VALUES AND HUMAN ACTION.** A philosophical critical inquiry into the relationship between belief and conduct oriented towards the teacher and his role in moral education. Investigation of the ethical nature of the human act and the natural laws as the basis for morality. 3 credits **Staff**

*415-396A **SEMINAR IN CONTEMPORARY THEOLOGY I.** A reading seminar course in which current theological problems are discussed. Specific topics may differ from year to year. 3 credits. **Prof. Scott**

*415-397A **VARIETIES OF CHRISTIAN WITNESS.** An exploration of divergent paths of Christian Witness as exemplified in the lives and writings of Thomas Merton, contemplative-mystic, and Teilhard de Chardin, philosopher-scientist. 3 credits **Prof. Lawlor**

†415-398A, B **PHILOSOPHY OF CATHOLIC EDUCATION.** An exploration of the philosophy of Catholic education, its relation to other philosophical systems, and its relevance in the world today. 3 credits. **Prof. Scott**

†415-399B **THE CATHOLIC SCHOOL OF THE FUTURE.** A projection into the future — new models for Catholic schools in the Province of Quebec; a consideration of the identity of the Catholic school, the Protestant school, and the Neutral school of the future, in relation to the expectations of parents, students, teachers, and the larger community. 3 credits. **Prof. Scott**

*415-491B **CATECHETICAL THEMES.** Following upon exploration of the basics of guiding the Religious Response, the student is afforded the opportunity of enriching his background by exploring great catechetical themes in the light of the newest theological insights. 3 credits. *Prerequisite: 415-341 or 415-392.* **Prof. Lawlor**

*415-494B **ETHICS IN PRACTICE.** Fundamental priniciples of ethics are applied to specific moral issues. The questions investigated are topics which form a part of or are related to the high school religion curriculum, or which are of particular concern to the high school student today: abortion; drugs; protests; education; nuclear war; disarmament and the like. 3 credits. *Prequisite: 415-395.* **Staff**

*415-495B **THE EUCHARIST.** Biblical concepts of covenant and covenant rites, especially of shared blood and shared food, studies in relation to significance of the Last Supper; Christ as covenant; Eucharist as covenant meal and its meaning in the modern context. 3 credits. **Prof. Scott**

415-503B **RELIGIOUS RESPONSE IN THE SECONDARY SCHOOL — AN ADVANCED STUDY.** This course aims to examine in depth those programs currently under experimentation in our high schools. Serious study is to be made of adolescent religious response and those techniques, attitudes and personal approaches that may best enable the teacher to guide this response. 3 hours.
Prof. Francoeur

415-547A, B **RELIGIOUS RESPONSE IN THE ELEMENTARY SCHOOL.** Exploration of the content and direction of moral and religious guidance in the elementary school. Emphasis is placed on the development needs of the child. 3 hours.
Prof. Francoeur

415-571D **RELIGIOUS RESPONSE IN THE SECONDARY SCHOOL.** A study of the scope and procedures of the psycho-pedagogy of religious response for secondary school students intended for those planning to specialize in Catholic moral and religious education at the secondary school level. 3 hours.
Prof. Francoeur

415-573A **LIVING WITH INSIGHT.** Examination of the shaping of contemporary living in the light of the guiding principle of agape in Scripture. The starting point will be man's experience in today's realities. 3 hours, 1 term.
Staff

415-594A **PHILOSOPHY OF CATHOLIC EDUCATION.** An exploration of the philosophy of Catholic education, its relation to other philosophical systems, and its relevance in the world today. 3 hours, 1 term.
Profs. Scott & Lawlor

415-595B **PHILOSOPHY OF CATHOLIC EDUCATION.** A study of the evolution of Christian thought and its effect on Christian education. Some questions to be considered are: modern trends in theology, the "new" morality, values in education, religious and moral education in the 1970's. 3 hours, 1 term.
Profs. Scott & Lawlor

417—EDUCATION IN SCIENCE

*417-241A **BACKGROUND SCIENCE FOR ELEMENTARY SCHOOL TEACHERS.** This course presents science as a means of exploring and explaining our environment. A study of some of the fundamental concepts common to most elementary programs — an elective. 3 credits.
Prof. Francoeur

417-312B **PRIMARY SCIENCE.** Methods of providing children at the nursery school and kindergarten levels with useful learning experiences related to their natural environment. 3 credits.
Mrs. Wolfe

417-372A **SECONDARY SCIENCE CURRICULUM AND INSTRUCTION.** This course relates to directed observations in secondary schools and includes the study of general objectives, curriculum trends, and the planning of teaching strategies and pupil experiences needed to promote the learning of the skills, concepts and processes of science. Prerequisite: A minimum of 18 credits in post-secondary science. 3 credits.
Prof. Francoeur

417-405A **ECOLOGICAL FEATURES OF OUR NATURAL ENVIRONMENT.** A lecture, laboratory and field course to train teachers in the principles and practices of field biology and nature tours. The observation and identification of various organisms and a study of their ecological relationships in the web of life (Not offered 1974-75). Field trips: 3 credits. **Staff**

417-406B **ECOLOGICAL PROBLEMS IN OUR ENVIRONMENT.** A modern study of environmental problems for all teachers. The role of man in the web of life in relation to conservation, the population explosion, waste disposal, sewage treatment, air and water pollution, chemical and radiation pollution. (Not offered 1974-75). 3 credits. **Staff**

417-442A, B **CURRICULUM AND INSTRUCTION IN ELEMENTARY SCIENCE.** A survey of modern curricula and teaching strategies in use at the elementary school levels and the design of suitable exploratory activities using simple equipment to give children some appreciation of the nature of science.3 credits. **Mrs. Wolfe**

417-443A or B **PERSPECTIVES ON ELEMENTARY SCIENCE EDUCATION.** A course to provide a deeper perspective of modern elementary science education through a study of the active learning approach, modern elementary science projects and research—an elective. 3 credits. *Prerequisite: 417-442 or equivalent* (not offered 1974-75) **Profs. Francoeur and Searles**

417-522A **SCIENCE CURRICULUM AND INSTRUCTION — EARLY CHILDHOOD.** 2 hours, 1 term. **Prof. Francoeur and Mrs. Wolfe**

417-532A **SCIENCE CURRICULUM AND INSTRUCTION — LATER CHILDHOOD.** 2 hours, 1 term. **Mrs. Wolfe**

417-575D **GENERAL SCIENCE CURRICULUM AND INSTRUCTION — SECONDARY SCHOOL.** 3 hours, 2 terms. **Profs. Landry and Francoeur**

417-576D **BIOLOGY CURRICULUM AND INSTRUCTION — SECONDARY SCHOOL.** 3 hours, 2 terms. **Prof. Searles**

417-577D **CHEMISTRY CURRICULUM AND INSTRUCTION — SECONDARY SCHOOL.** 3 hours, 2 terms. **Prof. Francoeur**

417-578D **PHYSICS CURRICULUM AND INSTRUCTION — SECONDARY SCHOOL.** 3 hours, 2 terms. **Prof. Landry**

418—EDUCATION IN HOME ECONOMICS

418-572A **CURRICULUM AND INSTRUCTION IN HOME ECONOMICS.** The nature and purpose of the high school curriculum in Home Economics; knowledge and practical experience of the various techniques of teaching in all areas of that curriculum. 3 hours, 1 term.

418-573B **CURRICULUM AND INSTRUCTION IN HOME ECONOMICS.** A study of various types of instructional areas for Home Economics; necessary equipment; planning of budgets and keeping of records; examination of and practice in preparing evaluation and measurement devices. 3 hours, 1 term. *Prerequisite: 418-572A.*

418-574B **ADVANCED STUDY IN HOME ECONOMICS C & 1.** A seminar course to provide in-depth study in areas of the Home Economics Curriculum and Instruction selected to suit interests of the students. 3 hours, 1 term. *Prerequisite[s]: 418-572A and approval of the instructor.*

421—PROTESTANT STUDIES

*421-301A, B **LIVING WITH QUESTIONS.** A survey of Old and New Testament literature together with current ethical and philosophical questions which arise out of such study and which confront teachers in modern society. 3 credits. **Prof. MacNeill**

421-342A, B
421-542A, B **HUMAN AND RELIGIOUS VALUES IN THE ELEMENTARY SCHOOL.** Living together in the modern world raises problems of behaviour and belief. This course explores ways in which teachers may help children in elementary school to appreciate each other's traditions and values and to realize their own identity within their own life circumstances. 3 hours, 1 term. **Prof. MacNeill**

421-372
421-572B **HUMAN AND RELIGIOUS VALUES IN THE SECONDARY SCHOOL.** How can children discern value within the flux of experience? By what means can they develop value systems that are increasingly their own and increasingly mature? Through discussion and through examination of materials, students will attempt to increase their understanding of moral and spiritual development. 3 hours, 1 term. **Prof. MacNeill**

422—JEWISH STUDIES

422-400B **TEACHING CUSTOMS AND CEREMONIES.** An exposure to all facets of Jewish practices, life cycle, calendar cycle, prayer, etc. Methods of applying this material to the Jewish Classroom. 3 credits.

422-401A **TEACHING BIBLICAL LITERATURE I.** A survey of the narrative portion of the Pentateuch with a view to teaching this material in Jewish schools. An examination of some of the techniques presently being developed in Bible teaching. 3 credits.

422-402B **TEACHING BIBLICAL LITERATURE II.** A survey of selected material in Prophets and Writings with a view to teaching this material in Jewish schools. An examination of some of the techniques presently being developed as they relate to Prophets and Writings. 3 credits.

422-404A **TEACHING HEBREW/YIDDISH — SECOND LANGUAGE.** A study of most up-to-date methods and theories related to the teaching of Hebrew and Yiddish as a second language in both day schools and supplementary settings. 3 credits.

426—EDUCATION IN ART

*426-204A, B **DRAWING.** Development of sound draughtmanship; through the study of organic forms and the human figure in various media. 3 credits. **Staff**

*426-205A, B **PAINTING II.** Investigation of media tools, techniques primarily through studies of natural forms, the human figure. 3 credits. *Prerequisite: 204A, B.* **Staff**

*426-304A, B **PAINTING III.** Continuation of prerequisite 205B. **Prof. Tondino**

*426-305A, B **PAINTING IV.** Continuation of prerequisite 304A. **Prof. Tondino**

*426-404A, B **PAINTING V.** Major problems in graphic expression — the human figure, landscape, natural or manufactured objects. 3 credits. *Prerequisite: 305B.* **Staff**

*426-405B **PAINTING VI.** The student will be required to work in a variety of sizes and materials. Continued exploration of the elements of visual art. 3 credits. *Prerequisite: 404.*

*426-296A, B **BASIC DESIGN.** Exploration of the basic elements of visual art through two dimensional composition and three dimensional constructions. Investigation of materials and tools and the processes of manipulating and relating materials. 3 credits. **Staff**

*426-297B **DESIGN II.** Further rendering of two and three dimensional compositions (296A) investigating the potential of basic geometric and organic forms, spatial relationships and environment. 3 credits. *Continuation of prerequisite 296A.* **Staff**

*426-396A **DESIGN III.** Application of learning and skills to more sophisticated problems of design. Consideration of design in relation to practical aspects of visual comunication. 3 credits. *Prerequisite: 426-297.* **Staff**

*426-397B **DESIGN IV.** Advanced work in the development of perception and aesthetic presentation. Through projects and assignments students will be encouraged to pursue problems of design pertinent to their own interests. 3 hours, 3 credits. *Prerequisite: 426-396A.* **Prof. Watling**

*426-298B **APPLIED DESIGN.** A study of historical stages of furniture and interior design through lectures, museum studies, field trips, assignments both written and practical. 3 credits. *Prerequisite: 426-296A.* **Prof. Jaques**

*426-496A, B **SCULPTURE I.** Designed for students individually to encourage and develop personal aptitudes; major problems of 3 dimensional design in new and/or traditional materials. 3 credits. *Prerequisite: 426-297.* **Prof. Jones**

*426-497A, B **SCULPTURE II.** Continuation of Sculpture I. 3 credits. **Prof. Jones**

*426-206A, B **GRAPHICS I.** An introduction to some graphic media, monoprints, collagraphy, linocuts, woodcuts, etc. A practical study of the various elementary processes. Exhibition of student work required at end of term. 3 credits. **Prof. White**

*426-207A, B **GRAPHICS II.** Study in further graphic media techniques. These may include line engraving, dry point, relief etching, intaglio and related processes. 3 credits. *Prerequisite: 426-206.* **Prof. White**

*426-394A, B **GRAPHICS III.** Continuation of studies of graphic techniques. These may include variations of previously learned techniques, silk screen, viscosity printing, multiple plate work, etc. 3 credits. *Prerequisite: 426-207.* **Prof. White**

*426-395A, B **GRAPHICS IV.** Advanced studies in various graphic media. The student will be expected to be familiar with standard processes studied in the preceding courses. At this stage the student should begin to concentrate on developing a personal style, incorporating the necessary techniques to make his personal statement. 3 credits. *Prerequisite: 426-394.*
Prof. White

*426-494A, B **GRAPHICS V.** An extension of skills learned in Graphics I-IV. Techniques explored may include engraving, silk screen, relief etching, intaglio, collography, dry point, combinations of printing techniques. The student will be expected to explore those areas which most closely correspond to his particular graphics style. 3 credits. *Prerequisite: 426-394.*
Prof. White

*426-495A, B **GRAPHICS VI.** A further extension of skills learned in Graphics V. The student is expected to have mastered basic graphic skills and be able to work independently. A competent development of personal style, experimentation with, and control over the chosen medium is expected. 3 credits.
Prof. White

*426-208A, B **CERAMICS I.** A consciousness of the medium is developed through basic ceramic processes: hand building experiences and introduction to wheel thrown construction. 3 credits.
Prof. Studham

*426-209A, B **CERAMICS II.** A continuation and concentration of wheel projects. Elementary clay and glaze preparations. 3 credits. *Prerequisite: 208A or B.* **Prof. Studham**

*426-300A, B **CERAMICS III: GLAZES.** Chemistry of glazes, formation of slips, engobes and glaze. Firing and maintenance of kiln and equipment. 3 credits. *Prerequisite:209A or B.* **Prof. Studham**

*426-309A, B **CERAMICS IV.** Chemistry of glazes. Emphasis placed on lab work. Firing and maintenance of kiln and equipment. 3 credits. *Prerequisite: 426-300.* **Prof. Studham**

*426-408A, B **CERAMICS V.** Advanced work in ceramics exploration of individual problems in given medium on glaze enamelling and lustreware. 3 credits. *Prerequisite: 426-309.* **Prof. Studham**

*426-409A, B **CERAMICS VI.** Continuation of exploration of individual problems working all known media. 3 credits. *Prerequisite: 426-408.* **Prof. Studham**

*426-398A **EARLY CANADIAN ART.** The visual environment, European sources and influences as revealed through a comprehensive survey of architecture, painting and applied arts from 1600 to 1867. 3 credits. **Prof. Papke**

*426-399B **CANADIAN ART II.** The growth of Canadian art as evidenced through the changing visual environment from 1867 to the present. 3 credits. *Prerequisite: 398A.* May not be used as a prerequisite for Methods. **Prof. Papke**

*426-241A **BASIC ART MEDIA.** A course to acquaint the student with basic art media in two and three dimensions and to provide for involvement and in-depth experience in the creative process. This course is a Prerequisite for Art Methods in elementary schools. 3 credits. **Staff**

426-212A, B **ART FOR NURSERY-KINDERGARTEN TEACHERS.** Exploration of a variety of art media suitable for the kindergarten child; relationships of line, colour and texture; development of manipulative skills and the child's perceptual awareness of his environment. 3 credits. *Prerequisite: 426-241.*

426-322A, B **ART CURRICULUM AND INSTRUCTION—EARLY CHILDHOOD.** The philosophy and psychology of child art. The teacher's role in the development of the child's visual awareness and creativity. 3 credits. *Prerequisite: 426-241A or equivalent.* **Staff**

426-332A, B **ART CURRICULUM AND INSTRUCTION—LATER CHILDHOOD.** To prepare teachers to understand and guide the visual art of children from nine to twelve years of age. 3 credits. *Prerequisite: 426-241A or equivalent.*

426-342A, B **ART CURRICULUM AND INSTRUCTION FOR ELEMENTARY SCHOOL ART MAJORS.** Psychology and philosophy of child art; reading and written assignments, techniques of teaching and programme planning. 3 credits. **Prof. Jaques**

426-522A, B **ART CURRICULUM AND INSTRUCTION—EARLY CHILDHOOD.** A study of child art and the teacher's role in the art program of the primary grades — written and practical assignments related to classroom activities. 3 hours, 1 term. **Prof. Jaques**

426-532A, B **ART CURRICULUM AND INSTRUCTION — LATER CHILDHOOD.** A study of child art closely related to the work in the classroom. Activities in two and three dimensions acquaint the student with media and techniques suitable for children in the senior grades of elementary school. 3 hours, 1 term. **Profs. Watling and Papke**

426-572D **ART CURRICULUM AND INSTRUCTION — SECONDARY SCHOOL.** Program development, techniques and problems of teaching art in the secondary school. Work closely related to field experience and to the problems of the developing young pupil. 3 hours, 2 terms. *Prerequisites: B.F.A. or equivalent. Interview and presentation of work.* **Prof. Studham**

426-573A **ART CURRICULUM AND INSTRUCTION — ADVANCED — SECONDARY SCHOOL.** An examination of the relationship of the visual arts to the secondary school curriculum and the development of the adolescent personality. 3 hours, 1 term. *Prerequisite: Must be registered in 572D.* **Prof. Jaques**

427—EDUCATION IN ENGLISH

427-223C, X **READING INSTRUCTION — EARLY CHILDHOOD.** Methods and materials for the teaching of reading in the primary grades. 3 credits.

427-224C **CORRECTIVE READING INSTRUCTION — EARLY CHILDHOOD.** Reading problems at a readiness and basic decoding level presented in a practicum format covering classroom diagnosis and remediation. 3 credits.

427-228A, B **READING AND LANGUAGE ARTS — CURRICULUM AND INSTRUCTION — EARLY CHILDHOOD.** Reading and language arts curriculum related to current theories and strategies of learning: Examination of resource materials and aids to teaching and evaluation at the primary level. 3 credits.

427-233C, Y **READING INSTRUCTION — LATER CHILDHOOD.** Methods and materials for the teaching of reading in the upper elementary grades. 3 credits.

427-234C **CORRECTIVE READING INSTRUCTION — LATER CHILDHOOD.** Reading problems beyond the readiness and basic decoding level presented in a practicum format covering classroom diagnosis and remediation. 3 credits.

427-238A, B **READING AND LANGUAGE ARTS — CURRICULUM AND INSTRUCTION — LATER CHILDHOOD.** Reading and language arts curriculum studied in relation to current theories and strategies of learning for the later years of the elementary school. Resource materials and aids to teaching and evaluation examined. 3 credits.

427-305A, B **EXPERIENCES IN COMMUNICATIONS.** Personal development of students as communicators; involvement of the imagination in individual and group projects in language and in another chosen medium of communication; analysis of experiences in projects in relation to general problems of communication. Courses given in French or English. 3 credits.
Staff

427-327C **CREATIVE DRAMATICS AND CHILDREN'S LITERATURE.** Experiences in characterization, story making, story dramatization; an exploration of the elements of drama and dramatic literature at the kindergarten level. 3 credits. *Prerequisite: 427-328.*

427-328C **CREATIVE MOVEMENT AND DRAMATICS.** Experiences in creative drama and the dynamics of space; body movement, improvisation, creative problem solving, control and release of emotional energy. 3 credits.

†427-343A, B **ADVANCED READING INSTRUCTION — ELEMENTARY SCHOOL.** A critical study of materials in reading instruction with adaptations to particular needs of children. Classroom diagnosis of reading problems in the context of the total curriculum. 3 credits. *Prerequisite: 427-228B or 427-238B.*

427-344A, B or Y **CHILDREN'S LITERATURE.** Selection and use of literature suitable for children in the elementary school. 3 credits.

427-345X **LITERATURE FOR YOUNG ADULTS.** Selection and use of literature for the differing abilities and interests of high school students. 3 credits.

427-371A **SECONDARY ENGLISH CURRICULUM & INSTRUCTION.** Examination of appropriate materials related to the high school English programs; exploration of various techniques of teaching Literature, Drama, Film, and Language Arts. 3 credits.

427-374A **LANGUAGE IN THE SECONDARY SCHOOL.** A study of language activity (English) among secondary school students: their growth in language competence; oral and written modes in relation to learning and to personal development. 3 credits. *Pre-requisite(s): An approved language or linguistics course. (Students are guided in their choice of these in U1 counselling at registration time.)* **Professor Dias**

427-474B **PERSPECTIVES ON SECONDARY ENGLISH EDUCATION.** Seminar on special interest areas in the Teaching of English in the light of contemporary theories and experiments for students who have completed a basic Curriculum & Instruction course and have had some classroom experience. 3 credits. *Prerequisite: 427-371A.* **Staff**

427-499A or C **PROCESSES IN READING.** Theories and research findings of the several disciplines which intersect in the process called reading; basic concepts from psychology (learning, perception, cognition, personality, attitude change) and in language (development and linguistics) examined in relation to instructional procedures of reading programs. *Prerequisites: 200 level courses in reading methods and educational psychology.* 3 credits.

427-505D **EXPERIENCES IN COMMUNICATION.** Writing, speaking and non-linguistic forms of communication are practised and analysed with a view to each student developing, through personal experience and study, a theory of communication applicable in teaching. Course given in English or French. 2 hours, 2 terms. **Staff**

427-522D **CURRICULUM AND INSTRUCTION IN READING AND LANGUAGE ARTS — EARLY CHILDHOOD.** Reading and language arts curriculum studied in relation to current theories and strategies of learning. Resource materials and aids to teaching and evaluation at the primary level examined. 3 hours, 2 terms. **Staff**

427-532D **CURRICULUM AND INSTRUCTION IN READING AND LANGUAGE ARTS — LATER CHILDHOOD.** Reading and language arts curriculum studied in relation to current theories and strategies of learning for the later years of the elementary school. Resource materials and aids to teaching and evaluation examined. 3 hours, 2 terms.

427-533C **INTEGRATED LANGUAGE ARTS PROGRAMS.** Methods and materials for integrating reading, listening, writing, speaking aspects of communications instruction. 3 credits.

427-572D **ENGLISH CURRICULUM AND INSTRUCTION — SECONDARY SCHOOL.** An exploration of approaches to the teaching of language, literature, creative writing, and dramatics in the secondary school. 3 hours, 2 terms. **Staff**

427-573B **ENGLISH CURRICULUM DEVELOPMENT — ADVANCED.** An investigation into the theoretical bases of English teaching and a study of recent research into high school English curriculum and instruction. 1 hour.

427-576A, B or C **READING IN THE HIGH SCHOOL.** An exploration of reading instruction in secondary programs in the content fields; survey of remedial and developmental reading instruction throughout the elementary and secondary schools, together with review of research in secondary reading. 3 hours, 1 term. **Professor Gardner**

427-577C **CORRECTIVE READING INSTRUCTION AT THE HIGH SCHOOL LEVEL.** Reading problems found in remedial classes at the high school level presented in a practicum format covering diagnosis and remediation appropriate for remedial classrooms. 3 credits.

427-594A, B or C or X **CREATIVE DRAMATICS FOR THE CLASSROOM.** A participatory course in creative drama and the use of improvisational techniques in the pursuit of child development. 3 hours, 1 term. **Prof. Hearsey**

427-595B, Y or C **IMPROVISATION & THEATRE ARTS FOR THE CLASSROOM.** A course beyond the introductory level to provide further perspectives on the teaching of drama and the teaching of improvisation. Instruction and practice in Play production will be included. 3 credits, 1 term. *Prerequisite: 427-594A or B.*

428—EDUCATION IN MATHEMATICS

*428-241A, B **BACKGROUND MATHEMATICS FOR ELEMENTARY SCHOOL TEACHERS.** A course specially designed for elementary school teachers to provide the basic foundations, insight and understanding of the Quebec modern elementary mathematics program. Recommended for all elementary school teachers — an elective. 3 credits. **Profs. Modafferi, Lofthouse**

428-322A, B **CURRICULUM AND INSTRUCTION IN MATHEMATICS — EARLY CHILDHOOD.** 3 credits. **Prof. McNicol**

428-332A, B **CURRICULUM AND INSTRUCTION IN MATHEMATICS — LATER CHILDHOOD.** 3 credits. **Prof. Scott**

428-372A **SECONDARY MATHEMATICS CURRICULUM AND INSTRUCTION.** This course relates to directed observations in secondary schools and includes the study of the general objectives and curriculum trends, as well as the learning problems, teaching strategies and mathematical concepts encountered in the High School curriculum. 3 credits. **Prerequisites: A minimum of 18 credits in Post Secondary Mathematics.** **Prof. Modafferi**

428-443A, B **PERSPECTIVES ON ELEMENTARY MATHEMATICS EDUCATION.** A course to provide a deeper perspective of modern elementary mathematics education through a study of the active learning approach, use of structured materials, modern mathematics projects and research. Separate sections for early and later childhood if enrolment permits — an elective. 3 credits. **Prerequisite: 428-322 or 428-332 or equivalent.** **Profs. Scott, McNicol**

*428-471B **BACKGROUND MATHEMATICS FOR SECONDARY TEACHERS.** A course on the nature of mathematics stressing the relationships in its basic structure and providing some of the historical, philosophical and logical bases of the mathematics of the secondary school. (Recommended to all students expecting to teach secondary mathematics.) 3 credits. **Prof. Purdy**

428-474D **COMPUTING AND PROBLEM SOLVING FOR HIGH SCHOOL TEACHERS.** The history and basic principles of digital computing for teachers, including computer systems, data storage, the use of various computer languages specially FORTRAN, methods for solving problems, computer assisted instruction, data processing, statistics and their uses for the teacher, practical experience with a time sharing system for a remote terminal. 6 credits. (not offered 1974-75) **Prof. Whitwell**

428-522A, B **MATHEMATICS CURRICULUM AND INSTRUCTION — EARLY CHILDHOOD.** 2 hours, 1 term. **Profs. McNicol and Scott**

428-532A, B **MATHEMATICS CURRICULUM AND INSTRUCTION — LATER CHILDHOOD.** 2 hours, 1 term. **Profs. Lofthouse and Modafferi**

428-572D **MATHEMATICS CURRICULUM AND INSTRUCTION — SECONDARY SCHOOL.** 3 hours, 2 terms. **Profs. Purdy, Whitwell and Modafferi**

428-573B **MATHEMATICS CURRICULUM AND INSTRUCTION [ADVANCED] — SECONDARY SCHOOL.** 3 hours, 2 terms. **Prof. Whitwell**

429—EDUCATION IN MUSIC

429-200B **CLASS PIANO FOR CLASSROOM TEACHER.** Keyboard experiences through group piano lessons utilizing the multiple key approach: transposition by ear; improvising simple chordal accompaniments for classroom singing, and sight reading. Non credit.

*429-201A, B **BASIC MUSICIANSHIP.** Introduction to the elements of music theory through techniques of aural training, sight singing, keyboard, and written applications to be presented as the classroom teacher should teach such elements of music to elementary school students. "Lab work at the keyboard." 3 credits.

429-212A, C **MUSIC FOR NURSERY-KINDERGARTEN TEACHERS.** Contemporary methods in music education at the nursery school and kindergarten level; development of musical skills through groups and individual practice sessions. 3 credits.

429-322A, B **MUSIC CURRICULUM AND INSTRUCTION — EARLY CHILDHOOD.** Understanding of the musical development of children at this level by class participation in listening, singing, playing instruments, creating and moving to music. Materials and methods of planning the above experiences. 3 credits.

429-332A **MUSIC CURRICULUM AND INSTRUCTION — LATER CHILDHOOD.** Materials, methods, planning and organizing of musical experiences for later childhood classes through class participation in singing, playing, moving, creating, reading music and listening activities. 3 credits.

429-522A, B **MUSIC CURRICULUM AND INSTRUCTION — EARLY CHILDHOOD.** Understanding the musical development of children at this level by class participation in listening, singing, playing instruments, creating and moving to music. Materials and methods of planning the above experiences. 2 hours, 1 term.

429-532A **MUSIC CURRICULUM AND INSTRUCTION — LATER CHILDHOOD.** Materials, methods, planning, and organizing of musical experiences for later childhood classes through class participation in singing, playing, moving, creating, reading music, and listening activities. 2 hours, 1 term.

429-542A **MUSIC CURRICULUM AND INSTRUCTION — ELEMENTARY.** Materials and methods of teaching elementary music. Includes directed observation and videotaped class participation and teaching in an elementary school. 6 hours, 1 term.

429-572B **MUSIC CURRICULUM AND INSTRUCTION — SECONDARY.** Materials and methods of teaching music in the high school. Includes directed observation and micro-teaching in a high school situation. 6 hours, 1 term.

430—EDUCATION IN SOCIAL SCIENCES

430-322A, B **SOCIAL STUDIES CURRICULUM AND INSTRUCTION — EARLY CHILDHOOD.** Theories and strategies of learning. Data and resource materials. Evaluation procedures as applied to the primary level. 3 credits. **Ms. Nixon**

430-332A, B **LOCAL AND COMMUNITY STUDIES.** The place and purpose of community studies in the Quebec elementary social science curriculum. Practical experiences in designing teaching strategies which use the social and economic environment as a medium for learning. Pupil evaluation procedures. 3 credits. **Mr. Bradley**

430-333B **COMPARATIVE SOCIAL STUDIES.** Methods of teaching geographical and historical case studies as a means of deepening the elementary school child's understanding of the major human activities in his own social and economic environment. 3 credits. *Prerequisite: 430-332A.* **Mr. Bradley**

430-372A **GEOGRAPHY CURRICULUM AND INSTRUCTION — HIGH SCHOOL.** The Quebec high school geography curriculum. Syllabus structure. The development and practice of methods in geography teaching. 3 credits. **Professor Burpee**

430-375A **HISTORY CURRICULUM AND INSTRUCTION — HIGH SCHOOL.** The Quebec high school history curriculum. Theories of course structure. Development and practice of teaching strategies in history. 3 credits. **Professor Bain**

430-379A **SOCIAL STUDIES CURRICULUM — HIGH SCHOOL.** A seminar and lecture course which will attempt to introduce students to the New Social Studies, its origins, objectives, and teaching-learning activities. Both the substantive structure and modes of inquiry of the social sciences will be explored as the foundation for curricular and teaching decisions. An investigation of national, provincial and local curricula. (pending approval.) 3 credits. **Prof. Bain**

†430-403B **SIMULATION IN THE SOCIAL SCIENCES.** A critical analysis of available simulations as strategies in the social sciences. Emphasis on the elements of simulation, the processes of decision-making, and affective learnings. The development of skills in creating, with students, simulations for use in elementary and high school classes. *Prerequisites : 430-322A, or 332A or 372A or 375A.* 3 credits. **Mr. Bradley**

†430-404A **VALUE ANALYSIS IN THE SOCIAL SCIENCES.** An examination of the objectives of value analysis. Teaching strategies for valuing in the social sciences with particular reference to social issues and environmental problems. An education elective open to students in elementary and secondary options. 3 credits. *Prerequisites: 430-322A or 430-332A or 430-372A or 430-375A.* **Prof. Riggs**

†430-453A, or C **FIELDWORK IN SCHOOL GEOGRAPHY.** Practical experience in developing and evaluating fieldwork assignments for use with high school geography classes in both rural and urban settings. 3 weeks summer field study; 3 credits. *Prerequisite: 430-372A or permission of the department.* **Professor Burpee**

430-476B **IN-DEPTH STUDY OF CURRICULUM DEVELOPMENT IN HISTORY.** An exploration of the theoretical bases of history teaching. Study and analysis of recent research in high school history curriculum and instruction. 3 credits. *Prerequisite: 430-375A.* **Mr. Kelebay**

430-522A, B **SOCIAL STUDIES CURRICULUM AND INSTRUCTION — EARLY CHILDHOOD.** The nature and structure of social studies. Learning processes and teaching strategies. Data collection, resource materials and evaluation procedures. Throughout the course students will be encouraged to observe their own environment and to relate their findings to the social studies course, 2 hours, 1 term. **Ms. Nixon**

430-532A **LOCAL AND COMMUNITY STUDIES — LATER CHILDHOOD.** Objectives and structure of the Quebec elementary social science curriculum. Development of instructional skills and learning strategies in environmental studies: systematic observation, interviewing, opinion polling, sample surveying and simple data analysis. Pupil evaluation procedures. 2 hours, 1 term. **Profs. Maconochie, Burpee and Mr. Bradley**

430-533B **COMPARATIVE SOCIAL STUDIES—LATER CHILDHOOD.** The creative development of instructional skills and learning strategies in using historical and geographical comparative case studies as means of deepening the elementary school child's understanding of the major human activities in his own social and economic environment. 2 hours, 1 term. *Prerequisite: 430-532.* **Staff**

430-539B **NEW PERSPECTIVES IN SOCIAL STUDIES CURRICULUM — ELEMENTARY.** An advanced course in elementary school social studies curriculum and instruction to include philosophical and psychological foundations of "the new social studies"; content, process and values as instructional objectives. Creative development of methods and teaching materials. (Not offered 1974-75.) 3 hours, 1 term. *Prerequisite: 430-533B or permission of the department.*

430-569B **ADVANCED SOCIAL STUDIES CURRICULUM AND INSTRUCTION.** An in-depth study of aims and processes in social science education. Curriculum design and the development of teaching materials and strategies in the area of the student's specialization. Co-requisite: 430-579D. 3 credits. (pending approval.)

430-572D **GEOGRAPHY CURRICULUM AND INSTRUCTION — HIGH SCHOOL.** An examination of geography as a vehicle for education. Analysis of the Quebec and other geography curricula. Methods and teaching strategies. The geography laboratory. Field studies. Evaluation. 3 hours, 2 terms.
Prof. Burpee

430-573B **IN-DEPTH STUDY OF CURRICULUM DEVELOPMENT IN GEOGRAPHY.** An investigation into the theoretical bases of geography teaching and an exploration of recent research into high school geography curriculum and instruction. 3 hours, 1 term. *Co-requisite 430-572D.* **Prof. Burpee**

430-575D **HISTORY CURRICULUM AND INSTRUCTION — HIGH SCHOOL.** An analysis of the content of Quebec and other high school history curricula. Development of skills and abilities in the teaching of history through class exercises and micro-teaching techniques. Practice in devising such teaching and learning strategies as expositon, discussion, group studies, independent studies, role playing, simulations and field work. 3 hours, 2 terms.
Profs. Bain, Boulianne, & Mr. Kelebay

430-576B **IN-DEPTH STUDY OF CURRICULUM DEVELOPMENT IN HISTORY.** An investigation into the theoretical bases of history teaching and a study of recent research into high school history curriculum and instruction. 3 hours, 1 term. *Co-requisite: 430-575D.* **Prof. Smith**

430-579D **NEW PERSPECTIVES IN SOCIAL STUDIES CURRICULUM — HIGH SCHOOL.** Foundations of "the new social studies". Theoretical course structures. Content and process in political, sociological and economics education. Modes of inquiry in the disciplines and the learner as researcher. The local community as a source of social science data and as a field of study. 3 hours, 2 terms. *Prerequisite: Permission of the department.* **Prof. Bain**

431—EDUCATION IN SECOND LANGUAGES

431-301A, C, X **LINGUISTICS APPLIED TO SECOND LANGUAGE TEACHING.** Introduction to general linguistics; the nature and function of language; the relations of current linguistic theories to the selection, progression, presentation and fixation of program content; examination and preparation of teaching, remedial and testing materials. 3 credits.

†431-302B, C **MEASUREMENT AND EVALUATION IN SECOND LANGUAGE EDUCATION.** Importance and role of evaluation in second language teaching; principles of educational measurement applied to second language skills; types of language tests and examinations; analysis of commercially prepared tests; practice in preparing, administering and scoring periodical examinations; test items: formulation and relevance to short term and long term objectives. 3 credits.

431-303C **MEDIA AND SECOND LANGUAGE TEACHING.** Language Laboratory and Audio-Visual Media: psychological and pedagogical rationale, assessment of potentialities and limitations in the process of second language teaching; manipulation of equipment, selection, adaptation and creation of materials; preparation of group and independent learning units, practice sessions. 3 credits.

431-304A, C **QUEBEC CULTURAL CONTENT OF SECOND LANGUAGE PROGRAMS.** A study of the Quebec socio-cultural scene; contacts with francophone cultural and educational institutions; preparation of class material related to Quebec. 3 credits.

431-305B, C **PSYCHOLINGUISTICS AND SECOND LANGUAGE TEACHING.** Exploration of areas in psycholinguistics relevant to second language teaching: theories of language acquistion, relationship between first and second language learning, student motivation and individual differences in second language learning, problems of meaning; various aspects of bilingualism. 3 credits.

431-306C **PHONOLOGY AND THE SECOND LANGUAGE TEACHER.** Intensive study of phonological and phonetic features relevant to audio-lingual approaches in second language teaching: training in identifying and analyzing phonological difficulties, initiation to phonetic correction techniques. 3 credits.

431-307A, B, C **ANTICIPATION OF DIFFICULTIES IN SECOND LANGUAGE TEACHING.** Study of findings of error-analysis; nature and sources of linguistic interference in second language learning; introduction to contrastive linguistics with special application to the lexical and grammatical areas that are within objectives of the various school programs. 3 credits.

431-322A, B **TEACHING FRENCH AS A SECOND LANGUAGE — EARLY CHILDHOOD.** For description see 431-522.

431-332A, B **TEACHING FRENCH AS A SECOND LANGUAGE — LATER CHILDHOOD.** For description see 431-532.

†431-340B, C **ANIMATION TECHNIQUES FOR SECOND LANGUAGE TEACHING.** Exploration, demonstration of animating procedures and techniques for enlivening second language learning and for integrating it into the child's general development. Workshops conducted in cooperation with other departments: music, media, art, etc. Practical sessions in communication experience. 3 credits.

431-344A **TEACHING FRENCH AS A SECOND LANGUAGE — ELEMENTARY SCHOOL.** For description see 431-544.

431-345A C, X, Y **THE BILINGUAL CLASS.** For description see 431-545. 3 credits.

431-347A, B, C, X **TEACHING ENGLISH AS A SECOND LANGUAGE — ELEMENTARY SCHOOL.** For description see 431-547B. 3 credits.

431-358A **TEACHING ENGLISH AS A SECOND LANGUAGE — SECONDARY SCHOOL.** For description see 431-558. 3 credits.

431-360A, B **SECOND LANGUAGE INSTRUCTION PRACTICUM.** Supervised teaching over a five-month period of classroom teachers of second languages (English or French). Through visits, conferences and other appropriate forms of guidance, counsellors assist teachers to integrate acquired knowledge with classroom performance. 6 credits.

431-372A **TEACHING FRENCH AS A SECOND LANGUAGE — SECONDARY SCHOOL.** For description see 431-572D. 3 credits.

431-373B, C **IN-DEPTH STUDY OF CURRICULUM DEVELOPMENT IN SECOND LANGUAGES.** Guiding principles and current practices of individualized, programmed instruction, team-teaching, continuous progress, modular approach, independent study as applied to second language teaching; observation and critical study of new experimental approaches. 3 credits.

431-378A **LATIN CURRICULUM AND INSTRUCTION — SECONDARY SCHOOL.** For description see 431-578. 3 credits.

431-379A **MODERN LANGUAGE CURRICULUM AND INSTRUCTION [GERMAN, ITALIAN, SPANISH] — SECONDARY SCHOOL.** For description see 431-579. 3 credits.

431-501A, D **LINGUISTICS APPLIED TO SECOND LANGUAGE TEACHING.** Can be taken for 431-573A. An introduction to general and contrastive linguistics: a study of the areas of interference in the learning of a second language; phonology, lexis and grammar. Examination and preparation of teaching, remedial and testing materials. 3 hours, 1 term or 1½ hours, 2 terms.

431-504A, B, D **QUEBEC CULTURAL CONTENT OF SECOND LANGUAGE PROGRAMS.** Can be taken for 431-573A. Study of the Quebec socio-cultural scene; contacts with francophone cultural and educational institutions; preparation of class material related to Quebec. 3 hours, 1 term or 1½ hours, 2 terms.

431-522A, B **TEACHING FRENCH AS A SECOND LANGUAGE — EARLY CHILDHOOD.** Principles of second language teaching. Objectives and Curriculum, teaching techniques and materials. Lesson planning and practice. 2 hours, 1 term.

431-532A, B **TEACHING FRENCH AS A SECOND LANGUAGE — LATER CHILDHOOD.** 2 hours, 1 term.

431-540B **ANIMATION TECHNIQUES.** Exploration and demonstration of animating procedures; techniques to enliven second language learning and to integrate it into the child's general development. Workshops conducted in cooperation with other departments: music, media, art, etc. 1 hour, 1 term.

431-544A, B, D **TEACHING FRENCH AS A SECOND LANGUAGE — ELEMENTARY SCHOOL.** Principles of second language teaching. An intensive study of the curriculum: objectives and development; lesson planning, micro-teaching; second language teaching strategies and techniques. 2 hours, 2 terms.

431-545B **THE BILINGUAL CLASS.** A study of Bilingual Education Programs, their rationale and format; observation of bilingual classes; training in teaching other subjects in French. 2 hours, 1 term.

431-547A, B **TEACHING ENGLISH AS A SECOND LANGUAGE — ELEMENTARY SCHOOL.** Objectives and Curriculum; study of modern English in a second language perspective; teaching techniques and materials; tutoring in ESL situations. 2 hours, 1 term.

431-548A, B, C, Z — **TEACHING ENGLISH AS A SECOND LANGUAGE — ELEMENTARY SCHOOL.** Principles of second language teaching and their application to TESL in Quebec elementary schools; survey of various approaches and techniques used in developing relevant second language skills; utilization of related teaching and testing materials; micro-teaching exercises. 6 credits.

431-558C, D, Z — **TEACHING ENGLISH AS A SECOND LANGUAGE — SECONDARY SCHOOL.** Descriptive view of ESL situations in Quebec; objectives and curriculum; study of modern English phonology and structure in a second language perspective. 3 hours, 2 terms.

431-572D, Z — **TEACHING FRENCH AS A SECOND LANGUAGE — SECONDARY SCHOOL.** Principles of second language teaching. Objectives and Curriculum. Language skills at secondary level: teaching and evaluation. Examination and preparation of class materials. Lesson planning. Training in micro-teaching situations. 3 hours, 2 terms.

431-573B — **IN-DEPTH STUDY OF CURRICULUM DEVELOPMENT IN SECOND LANGUAGES.** Examination of new experimental approaches to second-language teaching: immersion, individualized instruction, modular scheduling, team-teaching, programmed instruction, language laboratory, etc. Individual and group research projects. 3 hours, 1 term.

431-578D — **LATIN CURRICULUM AND INSTRUCTION — SECONDARY SCHOOL.** Objectives and Curriculum. Examination of textbooks and materials. Study of Roman Civilization. Latin poetry and Latin works in translation. 3 hours, 2 terms.

431-579D — **MODERN LANGUAGE CURRICULUM AND INSTRUCTION (GERMAN, ITALIAN, SPANISH) — SECONDARY SCHOOL.** Principles of second language teaching. Teaching techniques and materials. Training in micro-teaching situations. Lesson planning and testing. 3 hours, 2 terms.

432—EDUCATIONAL MEDIA

†432-204A, B — **EDUCATIONAL MEDIA I.** Application of educational media to the elementary and secondary school teaching and learning situation; rationale and underlying principles, the sources, selection, production, effective utilization and evaluation of the media. (lab fee.) 3 credits.

†432-205A — **PROJECTED MEDIA II.** Educational significance of various projected media; 16mm films, 8 mm films, 35 mm slides, multi-media presentations, the utilization of such media, teacher or student production. (lab fee.) 3 credits.

432-206C — **CHILDREN'S LITERATURE.** The development of media designed for children from the first books written for children to contemporary materials including books, magazines, films and recordings. (Not offered 1974). 3 credits.

432-304C — **EDUCATIONAL MEDIA II.** This course is intended for the individual with some experience in educational media. Topics include communication theory, implications of learning theory for the media specialist, advanced production techniques and the administration of the media centre. 3 credits. *Prerequisite: 432-204.*

†432-306B **EDUCATIONAL TELEVISION.** This course will survey the development of ETV with particular reference to current topics including children's TV programs, cable and closed circuit ETV. Short TV productions will take place in class to encourage a critical analysis of the potential of portable TV equipment for local teacher and student production. 3 credits.

432-307C **CATALOGUING AND CLASSIFICATION OF LIBRARY MATERIALS.** An introduction to the use of subject headings, the Dewey Decimal Classification and other classification systems for print and non-print materials. 3 credits.

432-308C **LIBRARY REFERENCE MATERIALS AND TECHNIQUES.** An introduction to basic library reference tools and their use; means of developing effective student utilization of library resources. (Not offered 1974). 3 credits.

432-309C **THE LIBRARY-RESOURCE CENTRE.** The developing of a library-resource centre including such topics as administration, acquisitions, processing, circulation routines, budgeting, and methods of integrating the library-resource centre into the school curriculum. 3 credits.

†432-404B **CONTEMPORARY DEVELOPMENTS IN EDUCATIONAL MEDIA.** An examination of current trends in educational media including a critical analysis of educational television, computer assisted instruction, systems analysis, programmed instruction, gaming and stimulation, etc. Limited enrollment. 3 credits.

432-405A, B **INDEPENDENT PROJECT.** An extensive media production undertaken by the student after consultation with and the approval of the director of the library-media program. 6 credits. *Prerequisites: 432-204.*

433—ELEMENTARY EDUCATION

433-312C **METHODS AND MATERIALS FOR THE KINDERGARTEN.** Analysis of the kindergarten environment with emphasis on equipment, materials, and suggestions for their use. 3 credits.

433-322A **CREATIVE PROGRAM SKILLS.** An exploration of procedures to encourage imagination, invention and expression through movement, language, literature, art, science, music, drama. 3 credits. *Prerequisite: Background in Art, Music, or Movement recommended.*

433-411A, B **PRE-SCHOOL CURRICULUM.** A practicum related to field experience, designed to assist the student in planning and maintaining a learning environment for the pre-school child; emphasis on innovation in pre-school education, cooperation between home and school, selection and use of media and materials, and the individual needs of the child. 3 credits. (Not offered in 1974-75.)

433-421A, B **ELEMENTARY CURRICULUM—EARLY CHILDHOOD.** A practicum related to field experience, designed to assist the student in planning an integrated program; stress on activity centered instruction, provision for individual differences, use of media and materials, relationships between home and school, evaluation and professional development. 3 credits.

Prof. Davis

433-431A, B **ELEMENTARY CURRICULUM—LATER CHILDHOOD.** A practicum related to field experience that will focus on the tactics involved in implementing continuous progress, individualizing instruction, developing heuristic projects for an integrated curriculum; use of media and materials, diagnostic-prescriptive teaching and evaluation. 3 credits.

434—PHYSICAL EDUCATION

*434-204A **HEALTH EDUCATION.** This course is designed to help the prospective physical education teacher understand his/her role in the total school health program in the elementary and high school. A study of current issues pertaining to health and health education is made, including the problems facing the individual in today's complex and changing society. 3 credits. **Prof. Nichol**

*434-205A **BIOLOGICAL FOUNDATIONS FOR PHYSICAL EDUCATION.** An introductory course in human anatomy and physiology with some basic principles of chemistry and physics essential for the comprehension of physiological and kinesiological mechanisms. 3 credits. **Prof. Greenisen**

*434-206B **KINESIOLOGY.** A study of the basic principles of human movement with emphasis on their practical application to physical skills. The course is concerned with the functional anatomy and neuromuscular basis of human movement. 3 credits. *Pre-requisite 434-205A* **Prof. Greenisen**

*434-207A **TESTS AND MEASUREMENT IN PHYSICAL EDUCATION.** The function of this course is to acquaint students with the selection, construction and use of tests designed to measure sports skills, motor abilities, physical fitness and related knowledge. It includes an introduction to elementary statistics as related to their use in the physical education teaching situation. 3 credits. **Prof. Marisi**

*434-224A **FOUNDATIONS OF MOVEMENT EDUCATION.** Personal and creative activity in manipulative, non-manipulative and expressive motor activity; the study of basic movement education concepts, principle of movement and the role of movement education in the life of the developing child. 3 credits. **Prof. J. Wall**

*434-291A **COMMUNITY RECREATION.** The main focus of the course centres on the relationship of the school to youth recreation agencies. Guidelines for planning effective recreation programs, techniques for the coordination of youth recreation services and basic recreation leadership principles are studied. 3 credits. **Mr. Reid**

*434-331A **INTRODUCTORY HOMEOSTATIC PHYSIOLOGY.** Introduction to the basic principles of physiological mechanisms which maintain homeostasis of the mammalian organism during non-stress conditions: cell function, neural systems and conduction; kidney, blood, cardiovascular system; respiration and metabolism. 3 credits. **Profs. Greenisen and Klissouras**

*434-391B **ERGO-PHYSIOLOGY.** Emphasis is on human organic adaptability; acute and chronic adaptive mechanisms to exercise and other environmental stresses are analysed. A laboratory program included to evaluate (measure and predict) adaptive capacity and assess factors affecting it. 3 credits. *Pre-requisite: Physiology 201A.* **Prof. Klissouras**

*434-492B **PSYCHOLOGY OF MOTOR PERFORMANCE.** This course is concerned with selected psychological factors in terms of their relationship to the acquisition of motor skills, that is, how they affect the skill acquisition of the individual and how the activity patterns of the individual affect the psychological factors. 3 credits. **Profs. Marisi and Neil**

*434-493A, B **ADMINISTRATION OF PHYSICAL EDUCATION.** Organization and administration of programs in Physical Education; emphasis on common problems encountered by physical educators in the instructional, intramural and interscholastic areas. 3 credits **Prof. Chomay**

434-494B **PRINCIPLES & CURRICULUM DEVELOPMENT IN P.E.** Directed towards an understanding of the important principles which should be the foundation of a modern program in Physical Education; student's role in the development, implementation and evaluation of the Physical Education Curriculum. 3 credits. **Prof. Riley**

*434-495B **SCIENTIFIC PRINCIPLES OF ATHLETIC TRAINING.** Application of physiological and kinesiological principles in the selection, administration and evaluation of athletic conditioning program; specific topics studied will include circulorespiratory training, intermittent training, isometric training, weight training, calisthenic principles and circuit training methods. 3 credits. *Pre-requisite: Physiology 201A and Ergo-Physiology 391B.* **Prof. Greenisen**

*434-496B **PHYSICAL EDUCATION FOR EXCEPTIONAL CHILDREN.** Identification, evaluation, and remediation techniques basic to the development of effective physical education programs for educable mentally retarded children and children with specific learning disabilities; Progressive motor learning experiences related to body image, spatial relations, eye-hand coordination, and balance will be developed, applied and evaluated. 3 credits. *Pre-requisites: 434-242B or consent of instructor.* **Mr. Reid**

*434-497B **HISTORICAL AND COMPARATIVE ASPECTS OF PHYSICAL EDUCATION AND SPORT.** An historical study of the origins and development of physical education and sport, and a comparative study of physical education and sport practices of many nations. 3 credits **Prof. Riley**

434-521A, B **MOVEMENT EDUCATION—CURRICULUM AND INSTRUCTION—EARLY CHILDHOOD.** (3hours). **Mrs. Barnes and Prof. J. Wall**

434-531A **PHYSICAL EDUCATION—CURRICULUM AND INSTRUCTION—LATER CHILDHOOD.** 3 credits. **Mr. Reid**

P.E. SKILLS AND TECHNIQUES

Physical education majors must complete a minimum of 18 semester credits in P.E. Skills and Techniques courses before graduation. A three credit course comprises three activities chosen from the list below. Nine of these activities are required the remaining nine credits to be chosen from the optional list. One P.E. Skills and Techniques course is normally taken in each of six semesters.

434-242B **ELEMENTARY PHYSICAL EDUCATION METHODS.** An introduction to methodology and field experience in elementary school physical education, educational gymnastics directed towards the teaching and learning in manipulative, non-manipulative and expressive uses of movement. 3 credits.
Prof. Wilkinson, Mr. Reid

The following courses include personal skill development, teaching sequences and strategies specific to the three activities selected.

***434-241A** **PE SKILLS AND TECHNIQUES I.** (3 credits).
***434-301A** **PE SKILLS AND TECHNIQUES II.** (3 credits).
***434-302B** **PE SKILLS AND TECHNIQUES III.** (3 credits).
***434-401A** **PE SKILLS AND TECHNIQUES IV.** (3 credits).
***434-402B** **PE SKILLS AND TECHNIQUES V.** (3 credits).
***434-405A, B** **PE SKILLS AND TECHNIQUES VI.** (3 credits).

Physical Education Staff

Required Activity Courses (9 credits)

Men	Women
Educational Gymnastics	Educational Gymnastics
Elementary P.E. I	Elementary P.E. I
Folk Dance	Folk Dance
Intro. Acquatics	Intro. Aquatics
Intro. Basketball	Intro. Basketball or Volleyball
Intro. Gymnastics	Intro. Creative Dance
Intro. or Advanced Track & Field	Intro. Gymnastics
Intro. Volleyball	Intro. or Advanced Track & Field
Outdoor Education	Outdoor Education

Optional Activity Courses (Minimum of 9 Credits)

Men	Women
Advanced Aquatics	Advanced Aquatics
Advanced Basketball	Advanced Basketball
Advanced Football	Advanced Creative Dance
Advanced Gymnastics	Advanced Educational Gymnastics
Advanced Ice Hockey	Advanced Field Hockey
Advanced Martial Arts	Advanced Gymnastics
Advanced Wrestling	Advanced Martial Arts
Advanced Volleyball	Archery/Golf
Archery/Golf	Badminton/Squash/Handball
Badminton/Handball/Squash	Elementary School P.E. II
Elementary School P.E. II	Field Games I
Field Games	Field Games II
Introductory Ice Hockey	Ice Activities
Introductory Martial Arts	Intro. Creative Dance
Introductory Wrestling	Intro. Field Hockey
Lacrosse	Intro. Martial Arts
Skiing	Intro. Volleyball or Basketball
Soccer	Rhythmic Gymnastics
Team Handball	Skiing
Tennis/Curling	Tennis/Curling

435—STUDENT TEACHING

DIRECTED OBSERVATION

Supervised field courses which provide an opportunity for the student to observe pupils in the school environment, the role and responsibilities of the teacher, the processes of teaching and learning, etc. Includes introductory conferences, seminars and some teaching experience. *Co-requisite: 448-305 An Integrated Study of Teaching and Learning.*

435-215B **DIRECTED OBSERVATION — PRE-SCHOOL.** 3 credits.

435-245A, B **DIRECTED OBSERVATION — ELEMENTARY SCHOOL.** 3 credits.

435-375A **DIRECTED OBSERVATION — SECONDARY SCHOOL.** 3 credits.

435-295A, B **DIRECTED OBSERVATION — ELEMENTARY AND SECONDARY SCHOOLS.** 3 credits.

FIELD EXPERIENCE

Supervised field courses arranged by the Student Teaching Office with the cooperation of regional schools. Under the guidance of an assisting teacher, students work in a classroom over an extended period of time, teaching at the level and in the subject areas appropriate to their individual programs. In conjunction with this practical experience the faculty provides conferences and seminars in related methodologies as well as individual counselling and post-practicum evaluation.

435-235D **FIELD EXPERIENCE—SECONDARY (TECHNICAL-VOCATIONAL).** (Plan Directeur). 4 credits

435-346B **FIELD EXPERIENCE — ELEMENTARY SCHOOL.** 9 credits.

435-376B **FIELD EXPERIENCE — SECONDARY SCHOOL** (1 subject) 9 credits.

435-377B **FIELD EXPERIENCE — SECONDARY SCHOOL** (2 subjects) 9 credits.

435-411A, B **FIELD EXPERIENCE — NURSERY SCHOOL AND KINDERGARTEN.** 9 credits. (co-requisite: 433-411)

435-421A, B **FIELD EXPERIENCE—EARLY CHILDHOOD LEVEL.** 9 credits. (Co-requisite: 433-421)

435-431A, B **FIELD EXPERIENCE — LATER CHILDHOOD LEVEL** 9 credits (Co-requisite: 433-431)

435-474A **FIELD EXPERIENCE — PHYSICAL EDUCATION — SECONDARY** 3 credits

435-475A **FIELD EXPERIENCE — PHYSICAL EDUCATION — SECONDARY** 6 credits.

435-478B, Z **FIELD EXPERIENCE — SECONDARY** (one subject) 6 credits.

435-496A, B **FIELD EXPERIENCE—ELEMENTARY AND SECONDARY SCHOOLS** 9 credits

435-347Y **FIELD EXPERIENCE — ELEMENTARY SCHOOLS** 6 credits

435-544D **CLASSROOM INTERNSHIP IN ELEMENTARY SCHOOLS** Semester A: 2 days a week. Semester B: 3 days a week.

435-574D **CLASSROOM STUDENT TEACHING — HIGH SCHOOL:** Semester A: 2 days orientation, 3 weeks in classroom. Semester B: 2 days orientation, 5 weeks in classroom.

436—TECHNICAL-VOCATION AND BUSINESS EDUCATION

436-266C **BASIC INTEGRATED COURSE IN TECHNICAL VOCATIONAL EDUCATION (PLAN DIRECTEUR).** An interdisciplinary approach to the theories and practices of teaching and learning in the area of Technical Vocational Education. 8 credits.

436-277C **ORIENTATION TO INDUSTRY.** This course is a pre-requisite for 436-278C. It provides a perspective of the participants role as an observer through seminars and field trips. Management of human resources, the internal structure and operation of industry, the rate of technological change, and demands upon personnel will be studied. 2 credits.

436-278C **INDUSTRIAL FIELD EXPERIENCE.** Three weeks full-time observation on location in an industry or business followed by an extensive technical report. The work situation chosen by an individual should relate to his/her technical, trade or business specialization as currently taught by that person at the secondary school level. 6 credits.

436-562D **TEACHING METHODS IN BUSINESS EDUCATION.** A course in general teaching principles which will include the teaching and learning process, lesson planning, unit planning, and techniques of instruction specific to:
a) Accounting and Business Machines.
b) Typewriting and Shorthand. 3 hours, 2 terms **Prof. Waddell**

436-564D **ORGANIZATION AND ADMINISTRATION OF BUSINESS EDUCATION.** A course designed to investigate the place of Business Education in the secondary school curriculum and to indicate to the beginning teacher the need for good planning and administration in the classroom routine and to develop an ability to evaluate various aids to the learning process. 3 hours, 2 terms. **Prof. Waddell.**

436-572D **METHODS IN TEACHING TECHNICAL AND VOCATIONAL SUBJECTS.** Methods and techniques of instruction in industrial and commercial education subjects. Classroom management and administration. Lesson planning and use of instructional materials. Individual assignments, demonstrations and reports. Special problems of the teacher. Testing and evaluation. 3 hours, 2 terms.

436-574D **ORGANIZATION AND ADMINISTRATION IN TECHNICAL-VOCATIONAL EDUCATION.** This course deals with the principles of effective management, safe planning, architectural considerations, material and tool control, purchasing and maintenance of equipment, student personnel, and teacher responsibilities. The student will plan an instructional area in order to develop an understanding of the principles for producing the necessary two and three dimensional visual materials required for more effective lesson presentation and curriculum development. 3 hours, 2 terms.

436-575A, B **CURRICULUM DEVELOPMENT IN TECHNICAL-VOCATIONAL EDUCATION.** Curriculum organization of technical vocational education in harmony with the needs of contemporary society; readings, discussions, terminology, aims and objectives, analysis, instructional units, principles of course organization and planning of curricula for specific situations. 3 hours, 1 term.

436-576A, B **EDUCATION EVALUATION IN TECHNICAL-VOCATIONAL EDUCATION.** Emphasis on student growth and progress in public education; appraisal of specialized techniques of evaluation, teacher made tests, and data analysis as specifically related to Technical-Vocational Education. 3 hours, 1 term.

CORE PROGRAMS

446-504D **ORIENTATION TO TEACHING.** 1 hour, 2 terms. **Staff**

448-204A **INTRODUCTION TO EDUCATION.** An overview of present day educational practices and policies with particular reference to the schools of Quebec; designed to provide the student with a personal frame of reference within which subsequent academic and professional studies preparatory to a teaching career may be effectively evaluated and pursued. 3 credits.

448-305A, B **AN INTEGRATED STUDY OF TEACHING AND LEARNING.** An inter-disciplinary course which introduces students to the theories and practices of teaching and learning, touching upon philosphy, psychology, sociology, history, research in education, the adoption of educational innovation and the discipline which form part of the school curriculum. 6 credits.

449—COLLEGIAL PROGRAM

449-500X **COLLEGE EDUCATION IN QUEBEC.** Identification and analysis of major issues in college education; specific reference to the CEGEP within the framework of Quebec education; consideration of curriculum issues and problems of learning and teaching in colleges. From such identifiable problems the needs of the candidates can be translated into specific projects designed to fulfill these. 6 credits.

449-581X, Y **APPROACHES TO COLLEGIAL LEARNING AND TEACHING** Exploration of alternative modes of college-level learning arising from philosophy, psychology, sociology and research in education; critical appraisal of traditional and innovative approaches to learning; application to and implementation of course design with specific reference to the needs of the participants. 3 credits.

CENTRE FOR LEARNING AND DEVELOPMENT

204-456D **APPLICATION OF PSYCHOLOGICAL PRINCIPLES TO EDUCATIONAL PROBLEMS.** The course will focus on the major problems in education and instruction and review psychological research findings which bear on these issues. Students will investigate literature and design and conduct an experiment related to one of the following areas: (1) Individual Student Differences; (2) Social Aspects of Education; (3) Programmed Learning; (4) Design and Evaluation of Learning Environments and (5) Classroom Management (e.g. applications of behaviour modification). 3 credits. *Pre-requisites: This course has a restricted enrolment and permission of the instructor is required. Students should have had Pyschology 204A and 205B; NOTE: This course is not intended as a professional teacher preparation course.* **Prof. Charles Pascal**

FACULTY OF EDUCATION

The following courses are offered to Faculty of Education students ONLY by the Department of Biology. Details may be obtained from the Faculty of Education Office or from the Core Curriculum Director, Room W4/8, Stewart Biology Building.

177-208A **BIOLOGY OF ORGANISMS I.** (3 credits).

177-209B **BIOLOGY OF ORGANISMS II.** (3 credits).

177-210A **LABORATORY IN BIOLOGY OF ORGANISMS I.** (2 credits).

177-211B **LABORATORY IN BIOLOGY OF ORGANISMS II.** (2 credits).

177-203A **CELL AND MOLECULAR BIOLOGY I.** (3 credits).
177-204B **CELL AND MOLECULAR BIOLOGY II.** (3 credits).

The following courses are offered to Faculty of Education students ONLY by the Department of Geography.

183-E13A **INTRODUCTION TO GEOGRAPHY I.**
183-E14B **INTRODUCTION TO GEOGRAPHY II.** *Pre-requisite: 183-E13A.*

The following courses are offered to Faculty of Education students by the Faculty of Music ONLY if there are eight B.Ed. students eligible for entrance into such courses.

221-235D **VOCAL TECHNIQUES**
222-354D **KEYBOARD SKILLS**
221-150D **GUITAR TECHNIQUES**
221-151D **RECORDER TECHNIQUES**
(See Faculty of Music Announcement for entrance requirements.)

CALENDAR FOR SESSION 1974-1975

1974

September 3, Tuesday & September 4, Wed.	Pre-registration student counselling.
September 5, Thursday	Registration in the Faculty of Engineering. 9 a.m. - 12 a.m. (A to K), 1 p.m. - 4 p.m. (L to Z)
September 9, Monday	Lectures begin in the Faculty of Engineering.
September 27, Friday	Last day for first term course changes.
September 30, Monday	Late registration in all Faculties.
October 14, Monday	Thanksgiving. Lectures cancelled.
November 6, Wed.	Fall Convocation.
November 15, Friday	Last day for withdrawal from A courses.
December 6, Friday	Last day of first term lectures in the Faculty of Engineering.
December 11, Wed. to December 20, Friday	Examinations in first term courses in the Faculty of Engineering.

1975

January 3, Friday to January 17, Friday	Examinations in first term courses in all programs in Arts, Science, Education and Management.
January 15, Wednesday	Second term lectures begin in the Faculty of Engineering.
January 16, Thursday	Second term registration for new students in Arts, Science, Education, Engineering and Management.
February 5, Wednesday	Last day for second term course changes.
February 21, Friday	Mid-term weekend holiday (Montreal campus). Lectures cancelled.
March 21, Friday	Last day for submitting Doctoral theses for Spring Convocation.
March 26, Wednesday	Last day for withdrawal from B courses.
March 28, Friday	Last day for submitting Master's thesis for Spring Convocation.
March 28, Friday to March 31, Monday	Easter. Administrative offices will be closed from 5:00 p.m. on Thursday, March 27 until 9:00 a.m., Tuesday, April 1. No lectures.
April 15, Tuesday	Last day of lectures in the Faculty of Engineering.
April 21, Monday to May 7, Wednesday	Examinations in all programs in the Faculties of Arts, Science, Education, Engineering and Management.
April 28, Monday	Last day for submitting reports on Doctoral and Master's theses for Spring Convocation.
May 12, Monday	Last day for Doctoral oral examinations.
May 19, Monday	Victoria Day. Administrative Offices will be closed.
June 4, Wednesday to June 7, Saturday	Convocations.

1 ADMINISTRATIVE OFFICERS AND FACULTY COMMITTEES

1.1 ADMINISTRATIVE OFFICERS

Robert E. Bell, C.C., B.A., M.A.(U.B.C.), D.Sc.(U.N.B. Laval), LL.D.(Tor.), Ph.D. F.R.S., F.R.S.C.
Principal and Vice-Chancellor

Eigil Pedersen, B.A.(SGWU), Ed.D.(Harv.), M.A.
Vice-Principal (Administration)

Leo Yaffe, B.Sc., M.Sc.(Man.), Ph.D., F.C.I.C., F.A.P.S., F.R.S.C.
Vice-Principal (Academic)

Dale C. Thomson, D.F.C., B.A.(Alta.), D.U.(Paris)
Vice-Principal (Planning)

Allan C. McColl, D.F.C., B.Com., C.A.
Director of Finance

Colin M. McDougall, DSO., B.A.
Secretary-General

Jean-Paul Schuller, B.A.(Ottawa)
Registrar

Peggy Sheppard, B.A(SGWU), B.Ed.
Director, Admissions Office

Thomas H. Barton, B.Eng., Ph.D., D.Eng.(Sheff.), F.I.E.E., S.M.I.E.E.E.
Acting Dean

William Bruce, M.A.Sc.(Tor.), Eng., M.E.I.C., M.A.S.M.E.
Associate Dean, Student Affairs

Tomas J.F. Pavlasek, M.Eng., Ph.D., Eng., M.E.I.C., S.M.I.E.E.E.
Associate Dean, Planning and Development

Norbert Schoenauer, M.Arch., M.I.T.I.C., M.T.T.I.C., C.U.Q.
Director, School of Architecture

George Marsaglia, B.Sc.(Colorado), Ph.D.(Ohio)
Director, School of Computer Science

Gerald A. Ratcliff, B.A., M.A. (Cantab), Ph.D.(Cornell) F.C.I.C., M.C.S.Ch.E., F.I.Ch.E.
Chairman, Department of Chemical Engineering

Richard G. Redwood, B.Sc.(Bristol), M.A.Sc.(Tor.), Ph.D.(Bristol), Eng., M.I.C.E., F.I.Struct.E., M.C.S.C.E.
Chairman, Department of Civil Engineering and Applied Mechanics

Gerald W. Farnell, B.A.Sc.(Tor.), S.M.(M.I.T.), Ph.D., Eng., F.I.E.E.E.
Chairman, Department of Electrical Engineering

Jules W. Stachiewicz, B.Eng., M.Eng., Eng., M.A.S.M.E., M.C.S.M.E.
Chairman, Department of Mechanical Engineering

William M. Williams, B.Sc., M.Sc.(Bristol), Ph.D.(Tor.), Eng., M.C.I.M., M.I.M.
Chairman, Department of Mining and Metallurgical Engineering

P.J. Harris, B.Eng., M.Eng., Ph.D.Eng.
Secretary of Faculty

Ms. Ida Godefroy
Administrative Assistant to the Faculty

1.2 STANDING COMMITTEES OF THE FACULTY

ACADEMIC COMMITTEE

Acting Dean Barton *(Chairman)*, Professors Davenport, Ferguson, Grace, Merrett, Paidoussis, Turkstra, Zuk.

Student Members: Three undergraduates.

ADMISSIONS TO UNDERGRADUATE PROGRAMS

Professors Woolsey *(Chairman)*, Bruce, Drummond.

ADVANCED STUDIES

Professors Kamal *(Chairman)*, Farley, Harris, Guthrie, Paige, Silvester, Zwarts.

Student Members: Two graduates.

AGRICULTURAL ENGINEERING

Professors Ogilvie *(Chairman)*, Schuepp and Broughton of the Faculty of Agriculture and Professors Forde, Japp and Weber of the Faculty of Engineering.

DEVELOPMENT

Associate Dean Pavlasek *(Chairman)*, Acting Dean Barton, Professors Farnell, Schoenauer, Marsaglia, Ratcliff, Redwood, Stachiewicz, Williams.

Student Members: Two undergraduates.

LIBRARY

Professors Newman *(Chairman)*, Farkas, Howarth, Merrett, Savage, Thompson, Mrs. J. Wygnanski.

Student Members: Two undergraduates and one graduate.

NOMINATING

Acting Dean Barton *(Chairman)*, Professors Davenport, Dealy, Drummond, Harris, Howarth, Marsaglia, Newman.

SCHOLARSHIPS, BURSARIES AND LOANS

Professors Adler *(Chairman)*, Bruce, Redwood.

STANDINGS

Associate Dean Bruce *(Chairman)*, Acting Dean Barton, Professors Farnell, Ratcliff, Redwood, Schoenauer, Stachiewicz, Williams, Ms. I. Godefroy *(ex officio)*.

2 THE FACULTY

2.1 HISTORICAL NOTE

The Faculty of Engineering celebrated its centenary during the 1971-72 session. It began operations as the Department of Practical and Applied Science in the Faculty of Arts offering degree programs in Civil Engineering and Surveying, Mining

Engineering and Assaying, and Practical Chemistry and Assaying. Diploma courses had been offered from 1859 and by 1871, the staff and enrolments had increased sufficiently to justify the creation of the Department. Continued growth led to the formation of the Faculty of Applied Science in 1878 and by 1910 there were ten degree programs offered, including Architecture and Railroad Engineering. Subsequent changes in the overall pattern of the University led to the creation in 1931 of the Faculty of Engineering with a departmental structure very similar in name to that which exists at the present time.

2.2 THE FACULTY TODAY

The current structure of the Faculty includes five engineering departments and two schools:

The Departments

- Chemical Engineering
- Civil Engineering and Applied Mechanics
- Electrical Engineering
- Mechanical Engineering
- Mining and Metallurgical Engineering and Applied Geophysics

The Schools

- Architecture
- Computer Science

Undergraduate programs leading to professional bachelor degrees are offered in all segments except the recently created School of Computer Science. These programs are designed to qualify the graduates for immediate employment in a wide range of industries and for membership in the appropriate professional bodies. Additionally, a non-professional degree is offered in the School of Architecture for those who plan to work in related fields not requiring professional qualification. The curricula are also structured to provide suitable preparation for those who plan to continue their education in post-graduate studies either at McGill or elsewhere.

The academic programs, which are described in detail in Section 5, are divided into a core and an elective section. The core programs emphasize those unchanging basic principles which permit our graduates to keep abreast of progress in technology throughout their careers. Exposure to current technology is provided by the wide variety of technical elective courses which allow our students to pursue in depth a particular field of interest. Free electives provide the opportunity for study in non-technical fields. We recognize the managerial functions of a large proportion of engineers and maintain a close liaison with the Faculty of Management. A variety of sub-programs in management have been established and are described in Section 5.

Post-graduate programs leading to master's and doctoral degrees are offered in all sectors of the Faculty. Numerous areas of specialization are available in each of the departments and schools. All post-graduate programs are described in the *Announcement of the Faculty of Graduate Studies and Research.*

The recently created School of Computer Science concerns itself with a broad range of activities associated with the design, operation and application of computer facilities. A variety of courses appropriate to these areas is available to our undergraduates. Specialized degree programs are offered only at the post-graduate level following undergraduate studies in engineering, mathematics or certain branches of science.

2.3 SPECIAL FACILITIES AND RELATED PROGRAMS

2.3.1 McGILL COMPUTING CENTRE

The Computing Centre, located in Burnside Hall, is organized to provide digital computer service for research and instructional purposes within the University. The equipment installed comprises an IBM System 360 Model 75 and an IBM System 370 Model 158 computer. The 360/75 provides batch processing from both local and remote locations, including a card reader and line printer in the McConnell Engineering Building. The 370/158 is operated as a remote access system, providing interactive computing from typewriter terminals installed at many locations on campus.

All engineering undergraduate students receive an introductory course in computing in the early stages of their studies and subsequently use the computer for the solution of engineering problems in other courses. Post-graduate students and staff use the facility extensively for research purposes.

2.3.2 BRACE RESEARCH INSTITUTE

The Brace Research Institute was founded in 1959 to develop equipment and techniques for making arid lands available and economically useful for agricultural purposes. The Institute has concentrated on the problems affecting individuals or small communities in rural areas and is one of the few organizations with this basic objective.

In general, equipment developed by this Institute utilizes as many local resources as possible, whether human, energy or material, so that the technology can be easily adapted to the local environment. As a result the Institute has concentrated on utilizing solar and wind energy as well as simple desalination systems, specifically concentrating on the problems that face isolated rural populations in developing arid areas.

The adaptation of simple greenhouses combined with solar desalination systems for the production of food and water in arid areas is being developed. Also simple windmills for the production of electricity and the pumping of water have been developed. Basically the approach adopted is that of appropriate technology.

The Institute has its headquarters in the Agricultural Engineering Building on the Macdonald College campus at Ste-Anne de Bellevue about 20 miles to the west of the main campus.

2.3.3 INSTITUTE FOR MINERAL INDUSTRY RESEARCH

This facility has been established at Mont St-Hilaire by the Department of Mining Engineering and Applied Geophysics to conduct research and development relating to problems confronting the mineral industry of Canada. The program covers a wide range of activities and much of the work of the Institute is of an interdisciplinary nature.

2.3.4 AGRICULTURAL ENGINEERING

The Faculty of Engineering cooperates with the Faculty of Agriculture in providing courses of instruction for a curriculum in Agricultural Engineering *to meet requirements for a degree awarded in the Faculty of Agriculture.* The penultimate year of the program is given by the Faculty of Engineering on the Montreal campus. Details of the curriculum are given in the *Announcement of the Faculty of Agriculture.*

2.3.5 BIOMEDICAL ENGINEERING UNIT

The Biomedical Engineering Unit was formed in 1966 jointly by the Faculties of Engineering and Medicine to increase cooperative research work in this new but important area. It provides post-graduate programs at the M.Eng. and Ph.D. levels for engineering graduates from any specialty who are appropriately motivated.

The research interests of the Unit can be classified into two main categories: (i) experimental and theoretical studies of a basic scientific nature, and (ii) application and development of technology for health care delivery. The basic research work encompasses neuromuscular control system studies, in particular locomotion and posture, vestibular and visual control; optimization studies of eye movements and of the cardiovascular system; sensory and neural communication theory; modelling of the auditory system; and amino acid transport across cell membrane. Research is done within the Unit and in the Otolaryngological Research Laboratories, Royal Victoria Hospital, Department of Biophysics, Montreal Children's Hospital, or in any other laboratories primarily concerned with the particular projects.

In the area of research and development for health and medical services, the activities are: computer applications and instrumentation for audiology, cardiology, electronystagmography, visual testing and the processing of biological signals; sensory aids; analysis of the system aspects of hospitals, health care centres and their sub-units; investigation and design of information systems for pathology, clinical laboratories and other hospital functions.

2.4 LIBRARY FACILITIES

The University has numerous libraries serving a wide variety of needs. Those specifically serving Engineering and Architecture are the Engineering Library, the Physical Sciences Library and the Blackader Library of Architecture. The general needs of undergraduates are served by the Redpath Library which, in addition to a collection of 100,000 volumes, has extensive audio-visual facilities permitting self-study of modularized courses.

The Engineering Library is located on the Main Floor of the Macdonald Engineering Building in Room 283. It contains nearly 30,000 volumes. The contents cover Civil, Electrical and Mechanical Engineering with additional information on the following subjects: aeronautics, computer science, management, mathematics and soil mechanics.

Material on Chemical, Metallurgical and Mining Engineering is available at the Physical Sciences Library which also houses literature on chemistry, geography, geology, mathematics and physics and is located in the Physical Sciences Centre.

The Blackader Library of Architecture, on the third floor of the Redpath Library, houses approximately 30,000 volumes. The subjects of this collection cover landscape architecture, town planning and urban design, history of architecture, architectural planning, building construction, housing, fine arts and applied arts. The library subscribes to 210 periodicals in various languages. The Blackader Library has its own Rare Books Department with valuable first editions in the fields of architecture and the fine arts. On the fourth floor of the building is a unique collection of original drawings and photographs of old Canadian architecture. The Blackader Library serves undergraduate as well as graduate students.

More details on library services are given in the Engineering Library Handbook available at the Engineering Library circulation desk and the Redpath Library Handbook available at the reference desk on the main floor of the Redpath Library.

3 GENERAL INFORMATION

3.1 ADMISSION REQUIREMENTS

Admission to the Faculty's undergraduate programs occurs twice per year, at the start of the Fall semester and the start of the Spring semester. It is based on one of the following qualifications:

Satisfactory completion of the College Equivalent program in Engineering or Physical Sciences at McGill or equivalent preparation at another college or university in the Province of Quebec.

OR

The diploma of Collegial Studies (DCS or DEC) in the Physical Sciences program at a CEGEP in the Province of Quebec. A candidate will have a greater choice of electives in his engineering program if he can take the collegial elective Calculus III. An equivalent mathematics course is provided for those who were unable to do this.

OR

Academic qualifications achieved elsewhere and equivalent to the above.

Enrolment in the School of Architecture is limited and the selection of applicants is based on academic standing. Applicants who are not accepted for Architecture and are qualified for Engineering will be offered admission to a Department of Engineering.

3.2 APPLICATION

Application should be made to the Director, Admissions Office, McGill University, P.O. Box 6070, Station "A", Montreal, Que. H3C 3G1.

Applications for admission to the Fall semester should be received before March 1. Applications after this date will be considered only from Canadian residents and then only if places are available.

Applications for admission to the Spring semester must be received before December 1.

3.3 REGISTRATION

Registration and late registration dates will be announced separately.

An additional fee of $25 is required for late registration. Applications for remission of the late registration fee will be considered only in cases of illness or other family emergency.

All students wishing to enrol in courses outside the Faculty, e.g. Languages, Fine Arts, Music, must consult the Department offering the courses prior to registration.

3.3.1 COURSE CHANGES

A student may change a course for which he has registered provided this is done before the end of the third week of the semester.

3.3.2 COURSE WITHDRAWAL

A student may withdraw from a course without academic penalty provided he accomplishes this before the end of the tenth week of the semester. Beyond this time his name will appear on the examination lists and, in the event of his not taking the examination, he will be allocated a KF grade (see Section 4.3.1).

3.4 COUNSELLING

New students are required to seek academic counselling about their programs prior to the registration date from the Department in which they plan to study. Additional information may be obtained by calling:

General	392-5860, -5878 or -5880
Architecture	392-5409
Chemical Engineering	392-5432
Civil Engineering	392-5963
Computer Science	392-8274
Electrical Engineering	392-5416
Mechanical Engineering	392-5473
Metallurgical Engineering	392-5706
Mining Engineering	392-5430
Non-Quebec Admissions	392-5867
Student Aid	392-5258

3.5 FEES

The University's fee structure has been changed to reflect the credit system. Basically, students will pay $19.00 per credit plus the appropriate Student Services and Student Society's fees. You should either consult the *General Announcement* or enquire of the Registrar's Office for details.

3.6 STUDENT ACTIVITIES

The campus offers a wide variety of extracurricular activities for students. All are urged to participate in those of their choice and within the limits of their interests and abilities. Many of these are organized within the Faculty under the auspices of the Engineering Undergraduate Society and/or the Architectural Undergraduate Society. Both of these organizations publish handbooks describing their operations and the activities of various clubs and societies within the Faculty. All undergraduate students automatically become members of the EUS or the AUS, as appropriate.

3.7 ACADEMIC CREDIT TRANSFER AGREEMENT

Regular full-time undergraduate students and regular graduate students registered at McGill may, with the written permission of the Dean of their Faculty, register for up to 40% of a full load in each academic year at any Quebec University. These courses, weighted, graded, and successfully completed according to the standards of the university giving the courses, will be fully recognized by McGill for the purpose of the degree for which the student is registered. Students wishing to take advantage of this agreement should consult their Dean for details, and are informed that this agreement is subject to the following conditions:

(i) that courses in the core program must be taken at McGill;

(ii) that the other universities concerned may, at their discretion, refuse the registration of a student for any of their courses or programs;

(iii) that the obligation of the student to follow the curriculum laid down by McGill is not affected;

(iv) that the student is responsible for ensuring that his timetable at McGill permits him to take courses at any of the other universities concerned;

(v) that the universities concerned are not responsible for special arrangements in cases of examination timetable conflict.

Students may take advantage of this agreement by completing the TRANSFER CREDIT form available from the Registrar's Office. This form permits the student to collect the required academic authorizations and that of the Director of Finance; ensures automatic fee transferral from the home university to the host university; and ensures the automatic reporting of marks and credits to the home university.
NOTE: Transfer credits are not calculated in the GPA or CGPA and the grades are not entered on the student's McGill transcript.

4 ACADEMIC REQUIREMENTS

4.1 THE QUEBEC SYSTEM OF EDUCATION

Post-secondary education for students proceeding to university degrees in the Province of Quebec is divided into two distinct levels:

(1) a collegial program normally of two years' duration following junior matriculation, and

(2) a university program normally of three years' duration following completion of the collegial program.

The programs of the Faculty for the 1974-75 session are presented in the following pages.

4.2 DEGREES AND REQUIREMENTS

Professional:
Bachelor of Architecture
Bachelor of Engineering
Bachelor of Engineering (Honours)

Non-Professional:
Bachelor of Science (Architecture)

The basic requirement for the B.Eng. degree is completion, with a cumulative grade point average of 2.00 or better, of a departmental program while registered as a degree candidate. The normal work-load is 15 to 18 credits per semester. A minimum of six semesters is required for completion of any program.

The non-professional B.Sc.(Arch.) degree is similarly structured with similar requirements. The professional B.Arch. degree requires a minimum of two additional semesters to complete the program.

4.3 STUDENT PROGRESS

The session is divided into two semesters with examinations and the evaluation of student progress at the end of each. The course promotion system is employed. Students are allocated a letter grade for each course taken. Their grade point average is computed as described below from a combination of the grade and the credit assigned to a course.

4.3.1 LETTER GRADES

A	Very Good
B	Good
C	Satisfactory
D	Conditional Pass
F	Failed
KF	Incomplete (failing)
L	Deferred

Grades A, B and C are permanent grades clearly indicating satisfactory results. Grade D is a permanent grade indicating marginal results which may be acceptable for peripheral courses but not for core courses required by the program. The classification of a course as core or peripheral depends on the individual student's program and will be decided by his department. Grade F is a permanent grade indicating unsatisfactory results. In addition, a student may be assigned categories KF and L. Category KF indicates a temporary deficiency which the student must clear in order to receive credit. Category L, which does not influence grade point average, indicates a deferred grade because of medical or other valid reasons.

4.3.2 COURSE CREDIT

The credit assigned to a particular course reflects the amount of effort it demands of the student. One credit normally represents three hours total work per week. This is in general a combination of lecture hours, other contact hours such as laboratory periods, tutorials and problem periods and personal study. As a guide the average division of time for a course is indicated in hours in the course listing after the course credit. For example 3(3-0-6) indicates a credit of three units consisting of three lecture hours per week, no other contact hours and six hours of personal study per week.

4.3.3 GRADE POINT AVERAGES

Letter grades are assigned *grade points* according to the scheme A=4, B=3, C=2, D=1, F=0, KF=0. Category L is excluded from the calculation of the grade point average which is defined by the ratio

$$\frac{\Sigma \text{ (course credit x grade points)}}{\Sigma \text{ course credits}}$$

Summation over all courses taken in one semester gives the semestrial grade point average (SGPA) while summation over all courses taken since entry into the program gives the cumulative grade point average (CGPA). All results are included when courses are taken more than once.

4.3.4 STANDINGS

A student's standing is based on his CGPA according to the following criteria.

Satisfactory standing:
2.00 or better

Probationary standing:
1.20 - 1.99 first semester
1.50 - 1.99 subsequent semesters

Unsatisfactory standing:
less than 1.2 first semester
less than 1.5 subsequent semesters

A student must successfully complete the B.Eng. or B.Sc.(Arch.) programs within five years of entry. Candidates admitted to advanced standing will have a correspondingly reduced period in which to complete. Candidates entering the B.Arch. program must complete the degree requirements within two years. Extensions may be granted by the Committee on Standings in cases of serious medical problems or where other similarly uncontrollable factors have affected a student's progress.

Candidates in satisfactory standing may proceed with the following conditions:

(1) All core courses in which D or F grades were obtained must either be repeated successfully (grades A, B or C) or be replaced by an alternative approved course which is completed successfully.

(2) All other courses in which F grades were obtained must either be repeated (grades A, B, C or D) at some point before graduation or be replaced by some alternative approved course which is completed successfully before graduation.

Candidates in probationary standing may proceed for one semester under the same conditions noted above but, in addition, must reduce their load to a maximum of 13 credits per semester and must achieve at the end of the semester either a CGPA of 2.00 or better or an SGPA of 2.5 or better.

Candidates with unsatisfactory standing must withdraw for at least one semester, after which they may be considered for readmission by the Committee on Standings.

4.3.5 REPEATED COURSES

A student who fails to achieve the required results in a course must successfully repeat either it or a substitute course approved by his department. For students who fail prerequisite courses which are offered formally in only one semester, the departments responsible may, in appropriate cases, arrange 'reading courses' during the other semester or during the summer months. Such courses taken during a regular semester constitute a normal part of the candidate's work load which must be reduced correspondingly in the rest of its content.

4.3.6 REREADS OF EXAMINATIONS

A student may request the reread of an examination by applying in writing to the Associate Dean for Student Affairs within three months of the date of the examination. Payment of the $10 reread fee must be enclosed with the application. If the grade is improved as a result of the reread the fee is refunded.

4.4 COURSE NUMBERING SYSTEM

Detailed curricula are listed in the next section under the appropriate school or department. In each case, the courses are grouped under four categories which are common to all programs:

(1) required courses in subjects taught outside the department
(2) required courses in subjects taught inside the department
(3) elective courses in technical subjects to be selected according to rules which vary somewhat from department to department, and
(4) elective courses of a general nature which permit the student to extend his education in areas of relevant personal interest.

A core program comprises all required courses. The course numbers indicate the department of origin by the first three digits as follows:

Science Departments

180 - Chemistry
186 - Geology
189 - Mathematics
198 - Physics

Engineering Departments

300 - Faculty (non-departmental)
301 - Architecture
302 - Chemical Engineering
303 - Civil Engineering and Applied Mechanics
304 - Electrical Engineering
305 - Mechanical Engineering
306 - Mining and Metallurgical Engineering and Applied Geophysics
308 - Computer Science

The fourth digit indicates the level of the course as follows:

(1) science courses numbered -2xx, -3xx, -4xx are normally taken in the first, second and third years, respectively;
(2) engineering courses are in general numbered according to the levels of prerequisites, i.e. -0xx has no prerequisites, -1xx has one level of prerequisite, etc.

The terminal letters indicate the semester(s) in which the courses are given, i.e. A - Fall, B - Spring, C - Summer, D - Fall and Spring, F - An assignment or project accomplished in the summer but reported in the Fall.

Where asterisks appear with a prerequisite, they have the following significance:

* a D grade is acceptable for prerequisite purposes

** under special circumstances, the Department may permit this course to be taken as a co-requisite.

The curricula and courses described in the following pages have been approved for the 1974/75 session but the Faculty reserves the right to introduce changes as may be deemed necessary or desirable.

5 ACADEMIC PROGRAMS

5.1 THE FACULTY OF ENGINEERING

Acting Dean	Thomas H. Barton
Associate Deans	
Student Affairs	William Bruce
Planning and Development	Thomas J.F. Pavlasek
Associate Professor of Engineering Practice	John T. Woolsey
Special Lecturer in Engineering Law	Nat Salomon

A number of faculty courses are offered. These courses are elective and are of a more general nature than the departmental courses.

300-010A,B **ENGINEERING ECONOMY 3(3-0-6).** Basic concepts of accounting. Interpretation of financial statements. Mathematics of finance. Techniques for decision making on the acquisition and disposal of capital assets. (Rates of return, uncertainties, risk, retirement and replacement, valuations, leasing, benefit/cost, optimum levels of investment.)
Textbook: Grant and Ireson, Engineering Economy, Fifth Edition, 1970(Ronald).
Professor Woolsey

300-011A **ECONOMIC ENVIRONMENT 3(3-0-6).** Theory of prices. Theory of the firm. Public finance. The banking system. National income. Employment. Labour relations. Inflation. Poverty. Economic growth. Regional economic problems. Engineering applications of micro-economics. Influence of micro-economics on engineering decisions.
Students who have taken a course in general economics at college level cannot take 300-011A for credit. Textbook: To be announced.
Professor Woolsey

300-112B **MANAGEMENT 3(3-0-6).** *Prerequisites: 300-010A,B**, 300-011A or equivalent.* The application of science to management. Coordination of the operations of the business enterprise through planning, organizing, staffing, directing and controlling. Management systems.
Textbook: Koontz & O'Donnell. Principles of Management (McGraw-Hill)
Professor Woolsey

300-020A **ENGINEERING LAW 2(2-0-4).** Definition of law; different branches of law; distinction between civil and criminal law and between civil and common law; statutes, orders in council, and by-laws; Canadian constitutional law and organization of courts; civil law including marriage, tutorship, minority, and interdiction, types of property, rights of ownership, successions, wills and succession duties, expropriation, servitudes, obligations, responsibility for negligence, Workmen's Compensation Act, privileges, hypothecs, registration, prescription, marriage contracts and rights of women, sale, lease and hire, mandate, engineering and architectural contracts. Responsibility of architect and builder; organization of engineering and architectural professions; patents, trademarks, industrial design and copyright; partnership and companies; mining; railways; expert evidence and evidence generally.
Mr. N. Salomon

300-030A **ENVIRONMENTAL ASPECTS OF TECHNOLOGY 3(3-0-6).** Modern society depends for its effective functioning on technology, much of which has far-reaching implications for our environment. The course gives a general view of our technological requirements, discusses potential problem areas and reviews measures for their alleviation. It commences with a general discussion of the urban environment indicating our needs for space, energy and communications. The factors governing energy production are then considered followed by a discussion of transportation systems, vehicles and noise. A survey of our needs for pure water and potential supplies leads to consideration of waste disposal. The public health aspects of water and air pollution are discussed. Finally the application of systems engineering to the whole problem is reviewed.
The course is suitable for U1 level engineering and science students but consideration will be given to admitting any student with a collegial level science background.
The course is taught by a team of professors expert in the particular fields. Grading is on the basis of two short papers and one medium length paper.

5.1.1 CHOICE OF ELECTIVES

Students of the Faculty have a considerable choice of electives divided into the categories of free and technical. The choice of electives while wide is limited by timetable considerations and by departmental regulations. The Faculty tries to arrange its timetable to provide maximum choice. The departments publish, in this *Announcement* and in separate documents, information regarding the choice of courses. Students should also consult their course advisers. Some general information applicable to all students of the Faculty is given below. This mainly covers the area of management, a topic of considerable importance to engineers, but also gives information on environmentally oriented courses and materials science.

COURSES IN MANAGEMENT FOR ENGINEERING STUDENTS

Engineering students wishing to take courses in management as part of their electives should note the following.

Courses Available

In addition to the Faculty courses, 300-010, Engineering Economy, 300-011, Economic Environment and 300-112, Management, the following Faculty of Management core courses are available, subject to timetable requirements, to Engineering students. Core courses not listed are not available since they include a significant proportion of material covered in the Engineering programs.

Accounting I	280-211A,B
Behavioural Science I	280-221A
Behavioural Science II	280-222B
Behavioural Science III	280-323A,B
Finance I	280-341A,B
Managerial Economics	280-393A,B
Marketing Management	275-352B

1. Students interested in an overall view of management should take one or more of the following

Engineering Economy	300-010A,B
Economic Environment	300-011A
Management	300-112B

2. Students wanting a more detailed treatment should choose

	Economic Environment	300-011A
or	Principles of Economics	154-200 (at the CEGEP level)

followed by

Managerial Economics	280-393A

and one or more of the following

Accounting I	280-211A,B
Finance	280-341B
Marketing Management	275-352B

3. Students interested in behavioural and social sciences should note that

Behavioural Science I	280-221A	
Behavioural Science II	280-222B	(prerequisite: 280-221)
Behavioural Science III	280-323A,B	(prerequisite: 280-222)

are well adapted to engineering needs.

4. The following comments are provided to assist students in the selection of the three courses offered within the Faculty.

300-010A,B ENGINEERING ECONOMY

This course is unique on the campus. There is little duplication of subject matter with other undergraduate courses in the University. It is designed for students in the penultimate and final years of Architecture and Engineering. While there are no prerequisites, *it is not recommended for students in U1.*

300-011A ECONOMIC ENVIRONMENT

This is offered for students who are interested in socio-economic environment and who did not take a course in general economics, such as 154-200D, Principles of Economics, at the CEGEP level. Students who have a course in general economics at the college level may not take it for credit. If they are interested in further work in economics, they should take Managerial Economics, 280-393A, in the Faculty of Management.

300-112B MANAGEMENT

This is an introduction to management for students in the penultimate and final years who do not intend to go on to an M.B.A. program. The prerequisites are 300-010A,B, Engineering Economy, and 300-011A, Economic Environment (a course in general economics at the college level is acceptable in place of 300-011A). Students who took Management, 278-E82B, at the college level or courses in Behavioural Science in the Faculty of Management may not take this course for credit. If these students wish to take further courses in management subjects, they are advised to take university-level courses in the Faculty of Management.

MINOR IN MANAGEMENT

The attention of students interested in pursuing an integrated program in management is drawn to the Minor in Management which comprises the following six courses:

Accounting I	280-211A,B
Behavioural Science II	280-222B
Behavioural Science III	280-323A,B
Finance I	280-341A,B
Managerial Economics	280-393A,B
Marketing Management	275-352B

Prerequisite to entry to this program is satisfactory performance in a collegial course in general economics e.g. 385-915-71 or 383-920-71, or the McGill collegial equivalent course 154-200, or the Faculty course 300-011.

Since the program contains 18 credits it cannot be completed within the departmental free elective allowances. A student taking it must therefore either accept additional load, take additional time, or have his department's permission to count some Management courses as technical electives.

ENVIRONMENTAL STUDIES

Environmental Studies at McGill consists of a group of interdisciplinary undergraduate courses that examine selected aspects of the interrelationship of man with the natural and the built environment. These courses have few prerequisites, and are available as electives to students in any major program. Any or all of the courses can be chosen, depending upon the student's interest and the free electives available in his or her major program. The courses are given by different Departments as listed below.

This is not a degree program or a major program. It is a group of elective courses designed to meet the needs of students interested in relating their major study area to environmental studies. The courses stress the comprehensive nature of environmental problems, and hence the need to synthesize humanistic, institutional and scientific knowledge in order to understand these problems. Thus, they provide a perspective that emphasizes the unity of knowledge and the interconnection of human and natural processes. The focus of these courses is on man in the environment rather than on aspects of environmental science such as pollution or ecology.

The courses attempt to provide the broad framework of the environmental concern, so that the student can see where his or her major field of study fits in and is related to other disciplines. These are courses in synthesis of information about various aspects of the environment, rather than analytical courses within a discipline.

Students wishing to major in some discipline related to environmental concerns should consider the appropriate major, honours or faculty programs available within the University. Many Departments offer courses which deal with environmental aspects for a particular discipline, and which are available to students from other majors. Students should consult course descriptions in appropriate Departments for details on such courses.

Many other courses offered by the Faculty, especially in the School of Architecture and in the Departments of Chemical and of Civil Engineering, have a strong environmental orientation. Courses involving urban systems, traffic flow, water purification and waste disposal are available as are more general courses on combustion, energy conversion and the chemical processing of gases and fluids. The student interested in these topics should consult with his departmental adviser in order to plan a coherent set of studies.

COURSES OFFERED:

300-030 **ENGINEERING.** Environmental Aspects of Technology 3(3-026). A general view of our technological requirements, potential problem areas and measures for their alleviation. Topics covered are space, energy and communications needs in the urban environment; factors governing energy production; transportation systems, vehicles and noise; water supply; waste disposal; public health aspects of water and air pollution; applications of systems engineering.
Coordinated by **Professor A. Pakalnins**

183-302D **GEOGRAPHY.** Environment: Ecosystems and Man (6 credits; 3 hrs) *Prerequisite: Geography 203D or Biology E10D or permission of instructor.* Field work is emphasized. An ecological analysis of the physical and biotic components of the environment, with emphasis on the scientific, technological, institutional and other aspects of environmental degration and restoration. Practical resource management in collaboration with local government and industry.
Professor R. Zimmerman

280- **MANAGEMENT**. World Economy in the 1980's. Is being prepared to be given in the Faculty of Management. **Professor K. Valaskakis**

198-200A **PHYSICS.** Physical Science I. (3 credits; 3 hrs) **Professor G. Austin**

260-370B **RELIGIOUS STUDIES.** The Human Condition. (3 credits)
Professor A. Boorman

166-226A **SOCIOLOGY.** Ecology and Society. (3 credits) The social origins of the ecological crisis in industrial societies. Comparison of attempts to protect and regulate the environment in industrialized nations. Sociological basis of ecology-oriented social movements and pressure groups. Intensive studies of selected industries and their effects upon the environment. **Professor P. Ehrensaft**

Three further courses are being prepared, and are expected to be available for 1974-75.

1. A course on Environmental Law to be given in Continuing Education.
2. A course entitled "Models of Environmental Systems" to be given by the Faculty of Engineering, available to University undergraduates. Introduction to the use of computer simulation for the study of social system behavior. Emphasis on expressing theories in computer simulation form and the interpretation of simulation results. Comparison between simulation models and "mental models." Simulation exercises based on the world models developed at MIT.
3. A course on food and resources, to be given by the Faculty of Agriculture, and available to University undergraduates.

Further information on these courses can be obtained from the instructors, from the Departments, or from the Director of Environmental Studies, Stewart Biology Building, McGill University.

MATERIALS SCIENCE

Materials such as structural steel and reinforced concrete, high-alloy heat-resistant steels, composites such as fibreglass, polymers such as polyethylene and highly refined exotic materials such as germanium and silicon are of vital importance to engineers. A survey of the properties and characteristics of a wide range of such materials is provided by the elective, Materials Science, 306-015B, offered by the Department of Mining and Metallurgical Engineering. The course 303-001A, Structural Materials, offered by the Department of Civil Engineering, treats similar material from a somewhat different viewpoint. Both courses are especially suitable for students in their first year. More advanced and specialized courses are provided by the departments and students should consult their departmental advisers regarding their choice.

5.2 SCHOOL OF ARCHITECTURE

Director

Norbert Schoenauer

Associate Director

Derek Drummond

Professors

John Bland
Peter Collins
Norbert Schoenauer
Stuart Wilson

Visiting Professors

Raymond Affleck
Thomas Blood

Associate Professors

Bruce Anderson
Joseph Baker
Derek Drummond
David Farley
John Schreiber
Radoslav Zuk

Assistant Professors

Brian McCloskey

Research Associate

Witold Rybczynski

Sessional Lectures

David Bourke
Leslie Doelle
Roy LeMoyne
Seymour Levine
Harry Mayerovitch
Arthur Mendel
Gentile Tondino
Orson Wheeler

The McGill architectural program is divided into two parts. The first leads to a non-professional degree Bachelor of Science (Architecture), as a preparation for activities related to architecture or a first and basic stage in professional architectural education. The second, consisting of a minimum of two semesters for those with the McGill B.Sc. (Arch.), leads to the professional degree Bachelor of Architecture which has long been recognized by the Province of Quebec Association of Architects and the Royal Institute of British Architects as representing completion of their educational requirements for membership. The Bachelor of Architecture degree is also recognized by the Commonwealth Association of Architects. Candidates in the first part of the program who plan to go on to the professional degree must follow the series of required and elective courses stipulated for professional studies. Others who intend to enter activities related to architecture may make appropriate substitutions for certain of the required courses in order to improve their preparation for studies in related areas.

5.2.1. ANCILLARY ACADEMIC FACILITIES

5.2.1.1 Laboratories

The Architectural Workshop - see course 301-320A, Design and Construction I and course 301-421B, Design and Construction II.

The Communications Laboratory - see course 301-010A, Communication, Behaviour and Architecture and course 301-424B Design and Construction V.

5.2.1.2. Collections

The Blackader Library, housing the architecture collection, is under the supervision of Mrs. Eva Doelle. The slide collection is maintained by Mme Johanne Bellefleur-Arsenault under the direction of Professor Peter Collins.

Curriculum for the B.Sc.(Arch.) Degree

Required Courses

			Course Credit	
NON-DEPARTMENTAL SUBJECTS				
303-005A,B	Mechanics I		4	
*303-089A	Building Materials		2	
303-109B	Surveying		3	
303-183B	Strength of Materials		4	
*303-284A	Soil Mechanics and Foundations		2	
*303-285A	Structural Steel Design		2	
*303-288B	Reinforced Concrete Design		2	
*303-392A	Structures		2	
308-070A,B	Computers And Architecture		2	23
ARCHITECTURAL SUBJECTS				
301-001A	History of Architectural Theory I		3	
301-010A	Communication, Behaviour and Architecture		6	
301-012A	Freehand Drawing I		1	
301-102B	History of Architectural Theory II		3	
301-111B	Architectural Graphics and Design Elements		6	
301-113B	Freehand Drawing II		1	
301-214A	Freehand Drawing III		1	
301-216F	Sketching School I		1	
301-250F	Summer Project I		1	
301-315B	Freehand Drawing IV		1	
301-320A	Design and Construction I		6	
301-421B	Design and Construction II		6	
301-422A	Design and Construction III		6	
*301-441B	Mechanical Services		2	
*301-442A	Electrical Services		2	
*301-443B	Environmental Acoustics		2	
301-451F	Summer Project II		1	
One of				
301-423B	Design and Construction IV	6		
301-424B	Design and Construction V	6	6	55

*Candidates intending not to proceed to the B.Arch. degree may substitute other courses of equal total weight for any of these.

Elective Courses

To be selected from those offered by the School (listed below) and/or a sequence of approved courses from other departments. 20

Architectural Electives

301-203A	The Evolution of Standardization in Urban Spaces	2
301-204B	History of Architecture in Canada	2
301-205A	History of Housing	2
301-230B	Landscape	2
301-232A	Structure of Cities	2
301-235A	Site Usage	2
301-407A	Seminar on Architectural Judgement	2
301-408A	Seminar on Architectural Theory in the 20th Century	2
301-409B	Seminar on Legal Aspects of Environmental Control	2
301-420B	Geometry, Architecture and Environment	2
301-431A	Civic Design	2
Total		98

COURSES OFFERED BY THE SCHOOL

Elective courses are indicated by the symbol •

301-001A **HISTORY OF ARCHITECTURAL THEORY I 3(3-0-6).** An introduction to the study of architectural ideas.
Professor Collins

301-010A **COMMUNICATION, BEHAVIOUR AND ARCHITECTURE 6(2-10-6).** Design in relation to human communication and behaviour. Visual perception and architectural expression. Techniques of visual communication and graphic design. Modelling with wet materials. Shaping and forming dry materials. Models. Photographic methods of designing and recording. Basic printing methods including silkscreen. Orthographic projection, sketching and architectural drawing.
The Communications Laboratory, including the Photo Lab, is under the direction of Professor Bruce Anderson assisted by Barry Murphy, Technician.
Professor Anderson

301-012A **FREEHAND DRAWING I 1(0-3-0).** Drawing in penci l and charcoal.
Mr. Tondino

301-102B **HISTORY OF ARCHITECTURAL THEORY II 3(3-0-6).** *Prerequisite: 301-001A*.* A study of architectural ideals of the present century and of the technological and sociological developments which affected them.
Professor Collins

301-111B **ARCHITECTURAL GRAPHICS AND ELEMENTS OF DESIGN 6(2-10-6).** *Prerequisite: 301-010A.* Orthographic projections, measured drawings, perspective and other conventional representations of architectural elements with reference to their spatial qualities, effects of light, colour and texture. Diagrams and lettering.
Professor Drummond

301-113B **FREEHAND DRAWING II 1(0-3-0).** *Prerequisite: 301-012A*.* A continuation of course 301-012A.
Mr. Tondino

•301-203A **THE EVOLUTION OF STANDARDIZATION IN URBAN SPACES 2(2-0-4).** *Prerequisite: 301-102B.* A historical survey of tectonic theories related to the creation of orderly urban environments in the 16th, 17th and 18th centuries; the theories of standardization as applied to the classical "Orders" and their relevance to standardized building components today.
Professor Collins

•301-204B **HISTORY OF ARCHITECTURE IN CANADA 2(2-0-4).** *Prerequisite: 301-102B.* French, British and American influences in the Maritime Provinces, Quebec and Ontario.
Professor Bland

•301-205A **HISTORY OF HOUSING 2(2-2-2).** *Prerequisite: 301-102B.* Indigenous housing both transient and permanent, from the standpoint of individual structure and pattern of settlements. The principal historic examples of houses including housing in the age of the industrial revolution and contemporary housing.
Professor Schoenauer

301-206B **PHILOSOPHY OF STRUCTURE 2(2-0-4).** *Prerequisite: Satisfactory completion of courses in the Civil Engineering program totalling 45 credits.* An inquiry into the principles and factors underlying the development and forms of structures, natural and man-made, and the application of these principles to current design problems.
Mr. Mayerovitch

301-214A **FREEHAND DRAWING III 1(0-3-0).** *Prerequisite: 301-113B*.* A continuation of course 301-113B.
Mr. Tondino

301-216F **SKETCHING SCHOOL I 1.** *Prerequisite: 301-113B.* A ten day supervised field trip in the late summer to sketch places or things having specific visual characteristics. Students are required to include Sketching School in the B.Sc.(Arch.) program. **Professor Wilson & Mr. Tondino**

•301-230B **LANDSCAPE 2(2-2-2).** *Prerequisite: 301-102B.* Land form, plant life, microclimate; land use and land preservation; elements and methods of landscape design. **Professor Schreiber**

•301-232A **STRUCTURE OF CITIES 2(2-2-2).** *Prerequisite: 301-102B.* Historical and analytical review of cities and the social, economic, physical and political factors that have determined their location, form, growth or decline. **Professor Bland**

•301-235A **SITE USAGE 2(2-2-2).** *Prerequisite: 301-111B.* Arrangement of building developments on the land. Composite patterns resulting from site planning decisions. Scale and distribution of open space. Utilization of space; relationship of private to public domain; spatial determinism and its effect on interaction and development; qualities of interaction and development; qualities of street-scale open space. Site conditions and restrictions. Site engineering, building layout, drainage and services. Regulatory mechanism; incentive and mandatory controls. **Professor Drummond**

301-250F **SUMMER PROJECT I 1.** *Prerequisite: 301-111B.* These projects are assigned by staff members before the end of the session after discussion with the students in terms of objectives, techniques, etc. **Professor Wilson**

301-315B **FREEHAND DRAWING IV 1(0-3-0).** *Prerequisite: 301-214A*.* A continuation of course 301-214A. **Mr. Tondino**

301-317F **SKETCHING SCHOOL II 1.** *Prerequisite: 301-216F.* Students are required to include Sketching School II in the B.Arch. program. **Professor Wilson & Mr. Tondino**

•301-318B **FREEHAND DRAWING AND SKETCHING 1(0-3-0)9** *Prerequisite: 301-216F.* Drawing and sketching in pencil, charcoal and other media both in the studio and out of doors. **Mr. Tondino**

301-320A **DESIGN AND CONSTRUCTION I 6(2-10-6).** *Prerequisite: 301-111B.* A study of man's need for shelter and for humane environmental amenities. The characteristics of modern building materials and techniques of construction on open sites. Methods of building durable, agreeable and purposeful structures. Design methodology. Aspects of ecology related to architectural design.
The Architectural Workshop is under the direction of Professor Stuart Wilson assisted by Gabriel Deveault and Raymond Rondeau, Technicians. **Professors Wilson & McCloskey**

•301-407A **SEMINAR ON ARCHITECTURAL JUDGEMENT 2(2-0-4).** *Prerequisite: 301-421B*.* The investigation, by means of analogies with the judicial process in Law, of the criteria of architectural judgement. **Professor Collins**

•301-408A **SEMINAR ON ARCHITECTURAL THEORY IN THE 20TH CENTURY 2(2-0-4).** *Prerequisite: 301-423B or 301-424B.* Seminar to allow specific modern architectural problems of design to be studied in detail. **Professors Bland & Zuk**

•301-409B **SEMINAR ON LEGAL ASPECTS OF ENVIRONMENTAL CONTROL 2(2-0-4).** *Prerequisite: 301-407A.* A survey of those aspects of Canadian law which can protect or beneficially modify the environment in the interests of the community.
Professor Collins

301-420B **GEOMETRY, ARCHITECTURE AND THE ENVIRONMENT 2(2-2-2).** Geometry in the formal structure of design. Regular, semi-regular and partly irregular nets or grids, lattices, polygons and polyhedra. Evidence of the presence of these figures and structures in natural objects and natural phenomena. Graphical and physical models. Application to architecture and the human environment.
Professor Wilson

301-421B **DESIGN AND CONSTRUCTION II 6(2-10-6).** *Prerequisite: 301-320A.* Instruction in the design of buildings with particular emphasis on considerations of construction, structural adequacy, weather and fire resistance, building codes and industrialized building systems. Working drawings and models.
The Architectural Workshop is under the direction of Professor Stuart Wilson assisted by Gabriel Deveault and Raymond Rondeau, Technicians.
Professors Wilson & McCloskey

301-422A **DESIGN AND CONSTRUCTION III 6(2-10-6).** *Prerequisite: 301-421B.* A more developed study of the process of forming an architectural concept involving considerations of purpose, site, desirable spatial relationships, efficient lines of movement, appropriate choice of material, structure and methods of construction, all related to judgements concerning appearance, economy and human relevance. Diagrammatic plans, sections and rough models.
Staff

301-423B **DESIGN AND CONSTRUCTION IV 6(2-10-6).** *Prerequisite: 301-422A.* A detailed study of the development of an architectural proposal for a comprehensive building involving a coherent initial concept and subsequent decisions as to the means of fulfilling the requirements skillfully and economically. Preliminary working drawings.
Staff

301-424B **DESIGN AND CONSTRUCTION V 6(2-10-6).** *Prerequisite: 301-422A.* A detailed study of the function and structure of the urban environment, including surveys of selected urban areas by recording and analysing specific environmental factors. Architectural and urban design with specific reference to their social implications. Urban renewal and rehabilitation by means of systematic design methods. Techniques of instructional publicity including documentary film-making.
The Communications Laboratory, including the Photo Lab, is under the direction of Professor Bruce Anderson assisted by Barry Murphy, Technician.
Professor Anderson

301-425A,B **DESIGN AND CONSTRUCTION VI 7(2-12-7).** *Prerequisite: 301-423B or 301-424B.* A detailed study of the organization of multiple units in a problem involving the repetition of elements with appropriately integrated functional, structural and mechanical systems. Principles of problem analysis, programming, site planning, legal considerations, structural possibilities, feasibility and cost studies.
Professor Schoenauer & Visitors

301-426A,B **DESIGN AND CONSTRUCTION VII 7(2-12-7).** *Prerequisite: 301-423B or 301-424B.* A study of exceptional problems of architectural design in terms of community needs but always involving specific environmental modfications of an actual place to achieve some physical or social betterment.
Professor Baker

301-427A,B DESIGN AND CONSTRUCTION VIII 7(2-12-7). *Prerequisite: 201-423B or 301-424B.* A study of complex environmental problems involving conflicting requirements, severe restraints, optimization, adaptability to growth and change, and the integration of building systems. Development of systematic design methods leading to a comprehensive environmental form **Professor Zuk & Visitors**

•301-431A CIVIC DESIGN 2(2-2-2). *Prerequisite: 301-421B.* The elements of form in buildings and their siting: design in the urban setting. **Professor Drummond**

301-433A URBAN PLANNING I 2(2-2-2). *Prerequisite: 301-423B or 301-424B.* Theory and practice. An examination of different basic approaches to urban planning with examples. **Professor Farley**

301-434B URBAN PLANNING II 2(2-2-2). *Prerequisite: 301-433A.* Theory and practice seminar. Detailed analysis of selected examples of the urban planning process, recent and from the past. Each student will be expected to prepare and present a case study. **Professor Farley**

301-441B MECHANICAL SERVICES IN BUILDING 2(2-2-2). *Prerequisite: 301-421B.* Problems encountered in providing mechanical services in buildings. Physiological and environmental aspects of heat, ventilation and air conditions, estimation of heating and cooling loads and selection and specification of equipment. Sprinkler systems and plumbing. Construction problems produced by installation of this equipment. **Mr. Levine**

301-442A ELECTRICAL SERVICES 2(2-2-2). *Prerequisite: 301-421B.* Production, measurement and control of light; design of lighting systems; electrical distribution in residential and commercial buildings; Canadian Electrical Code. **Mr. Mendel**

301-443B ENVIRONMENTAL ACOUSTICS 2(2-2-2). 301-421B. Significance of acoustics in architectural design, and in environmental control of buildings. Acoustical requirements in the design of auditoria such as theatres, lecture halls, opera houses, concert halls, churches, motion picture theatres, studios, etc. Principles of noise and vibration control, sound insulating in building construction. Control of mechanical noises and vibrations. Practical noise control in various types of buildings. **Mr. Doelle**

301-444A PROFESSIONAL PRACTICE 2(2-2-2). *Prerequisite: 301-423B or 301-424B.* The architect's relationship to his client; responsibility; business conduct; supervision; arbitration; issuing of certificates; competitions; standard forms of contracts; payment; liens; servitudes; public health; building regulations; fees. **Mr. LeMoyne**

301-445B SPECIFICATIONS 2(2-2-2). *Prerequisite: 301-423B or 301-424B.* Principles of writing architectural specifications; discussion of actual specifications; essays on common building materials and construction practices; practice in specifying for common trades. **Mr. LeMoyne**

301-451F SUMMER PROJECT II 1. *Prerequisite: 301-421B.* See course 301-250F. **Professor Bland**

301-452F SUMMER PROJECT III. *Prerequisites: 301-423B or 301-424B.* See course 301-250F. **Professors Baker, Schoenauer & Zuk**

H.L. Goldsmith (Experimental Medicine)
J.L. Neal (Paediatrics)

Chemical Engineering is concerned with processes in which matter undergoes chemical and physical changes in order to create useful products. Fields in which chemical engineers work include synthetic fibres, space, nuclear energy, antibiotics, plastics, oil and petro-chemicals, fertilizers, pollution control and a host of others. Among specific examples of chemical engineering work are the development of the artificial kidney, the production of epoxy resins, and the removal of sulphur dioxide from stack gases to eliminate an atmospheric pollutant and recover a useful material.

Since the techniques employed and the materials available in the process industries are continually changing, the chemical engineer is constantly faced with new challenges. New ideas are first followed up by research on a small scale in a laboratory. If this preliminary work looks economically attractive, the chemical engineer is faced with the development of the new process from the laboratory scale (grams) to the commercial unit (tons). Experimental information on intermediate size equipment (a pilot plant) is likely to be necessary to design the full-scale plant. After construction of the plant, chemical engineers are responsible for its operation and management. Other chemical engineers are involved with technical sales and

service, with economic and technical planning and with all aspects of company management. A substantial number of our graduates also find that our curriculum provides an excellent preparation for courses and careers in law, medicine, and teaching.

The Chemical Engineering curriculum is based on fundamentals in order to provide understanding of physical and chemical principles and their application. Some courses are given by Special Lecturers, engineers from local industry who bring practical relevance to undergraduate teaching.

A modular format is used in a number of courses in the department to allow students to advance at their own pace while gaining more complete mastery of course material. Members of the department have also introduced other teaching innovations especially in the laboratory, in technical paper writing and in the Projects in Chemical Engineering courses. Classes tend to be relatively small and this promotes good student/faculty relationships.

Restricted electives are available in a variety of subjects in the department. Students are advised to take a sequence of courses in one of three areas, ie Pollution Control, Polymeric Materials, or Food and Fermentation Processes. Electives are also offered in digital computer applications and in particle technology. Students may also take more advanced courses at the graduate level as restricted electives. Since technical expertise alone is insufficient for an engineer to function effectively in modern society, free electives are made available. The student is encouraged to enrich his training by taking courses which will improve his ability to communicate in French or English or by broadening himself socially, culturally or technically. Free electives may be chosen from any department in the university, subject only to timetable constraints and approval from the instructor and faculty advisor. Students who have successfully completed Chemistry 202, Chemistry 301 and Mathematics 303 at the CEGEP level are exempted from taking courses 180-212, 180-213 and 189-284 respectively.

Curriculum for the B.Eng. Degree in Chemical Engineering

Required Courses		Course Credit	
NON-DEPARTMENTAL SUBJECTS			
180-212A,B	Introductory Organic Chemistry I	4	
180-213A,B	Introductory Physical Chemistry I	3	
180-250B	Selected Topics in Organic and Physical Chemistry	3	
189-382A	Introduction to Statistics	3	
189-285A,B	Introduction to Ordinary Differential Equations	4	
189-286A,B	Introduction to Boundary Value Problems	4	
308-080A	Computers in Engineering	2	23
CHEMICAL ENGINEERING SUBJECTS			
302-001A	Chemical Process Principles I	4	
302-021A	Chemical Engineering Thermodynamics I	3	
302-097A	Technical Paper I	1	
302-122B	Chemical Engineering Thermodynamics II	3	
302-131B	Fluid Mechanics	4	
302-191B	Instrumental Measurements Laboratory	2	
302-198A	Technical Paper II	1	
302-202B	Chemical Process Principles II	3	
302-211A	Heat Transfer	4	
302-212B	Mass Transfer	3	
302-241A	Chemical Reaction Engineering	3	
302-251A	Separation Processes	3	
302-292A	Chemical Engineering Laboratory I	2	
302-293B	Chemical Engineering Laboratory II	2	
302-303B	Chemical Process Economics	3	
302-371B	Process Control	3	44
And either			
302-353A	Process Design	3	
302-454B	Design Project	4	
or			
302-394A	Research Project and Seminar	3	
302-495B	Research Project and Seminar	4	7

Elective Courses

RESTRICTED ELECTIVES

Courses to be selected from those approved by the Department. Students are encouraged to take a sequence of courses in a selected area (Pollution Control, Polymeric Materials, or Food and Fermentation Processes). 7

FREE ELECTIVES

Approximately five courses. 13

Total **94**

COURSES OFFERED BY THE DEPARTMENT

Elective courses are indicated by the symbol •

302-001A **CHEMICAL PROCESS PRINCIPLES I 4(3-0-9).** *Co-requisite: 189-285A.* Solution of chemical engineering problems by the application of the laws of conservation of mass and energy. Applications in steady and transient processes. **Professor Weber**

302-021A **CHEMICAL ENGINEERING THERMODYNAMICS I 3(3-0-6).** *Co-requisite: 189-284A.* Classical versus microscopic point-of view; work and energy concepts; First law; heat and internal energy; thermochemistry; flow processes; use of property tabulations; Second law; reversible processes and entropy; heat engine and refrigeration cycles; relationships between thermodynamic properties; equations of state; estimation of fluid properties; mechanical energy balance; phase equilibrium in single component systems. **Professor Dealy**

302-097A **TECHNICAL PAPER I 1(0-0-3).** A technical paper prepared according to instructions issued by the Department. **Professor Boyle**

302-122B **CHEMICAL ENGINEERING THERMODYNAMICS II 3(3-0-6).** *Prerequisite: 302-021A.* Thermodynamics of mixtures, equilibrium between single and multi-component phases, thermochemistry, chemical reaction equilibrium, surface energy. **Professor Charrier**

302-131B **FLUID MECHANICS 4(3-1-8).** *Co-requisite: 189-286B.* Fluid properties; fluid statics; basic concepts and equations of fluid dynamics including the continuity and Navier-Stokes equations, Bernoulli's equation and application to flow measuring devices; dimensionless groups and similitude; momentum theorems, pumps; two dimensional potential flow; drag and boundary layers; pipe flow; losses in valves and fittings. **Professor Grace**

302-191B **INSTRUMENTAL MEASUREMENTS LABORATORY 2(0-3-3).** *Prerequisite: 302-021A*. Co-requisite: 302-131B.* Techniques for measurement of properties of solids, liquids, and gases; application of these techniques in practice; selection of measurement techniques for engineering applications. **Professor Charrier**

302-198A **TECHNICAL PAPER II 1(0-0-3).** *Prerequisite: 302-097A.* A technical paper prepared according to instructions issued by the Department. **Professor Douglas**

302-202B **CHEMICAL PROCESS PRINCIPLES II 3(3-0-6).** *Prerequisites: 302-001A, 180-250B*.* Applications of physical, organic and inorganic chemistry to case studies in chemical process contexts. The cases chosen emphasize process and product development in the Canadian chemical industry. - **Professor Fuller**

302-211A **HEAT TRANSFER 4(3-0-9).** *Prerequisites: 302-021A*, 302-131B*, 189-286A,B*.* Transport of heat by conduction; transport by convection in free and forced flows; transport by radiation. Mathematical formulation and solution of heat transfer problems. Design of heat transfer equipment. **Professors Ratcliff & Weber**

302-212B **MASS TRANSFER 3(3-0-6).** *Prerequisites: 302-001A, 302-131B*.* Transport of matter by diffusion. Transport by convection in free and forced flows. Design of mass transfer equipment: distillation columns, packed bed contactors, etc. **Professor Douglas**

302-241A **CHEMICAL REACTION ENGINEERING 3(3-0-6).** *Prerequisites: 302-001A, 180-250B*.* Application of kinetics of homogeneous chemical reactions in calculating reactor size, production rate, selectivity and yield; interaction between chemical reaction and heat transport; kinetics of heterogeneous catalysis; catalyst properties; mass and heat transfer in heterogeneous reactions; reactor size and production rate for heterogeneous reactions. **Professor Fuller**

302-251A **SEPARATION PROCESSES 3(3-0-6).** *Prerequisites: 308-080A, 302-001A*, 302-122B*.* Analysis of separation processes using macroscopic material and energy balances; applications to distillation and extraction; design of staged cascades; performance of real systems; selection of operating conditions and contacting equipment. **Dr. Avedesian**

•**302-252A** **PARTICULATE SYSTEMS 3(3-0-6).** *Prerequisites: 302-001A, 302-131B*.* Study of operations involving multiphase systems with one of the phases finely sub-divided as bubbles, drops or particles. Applications in evaporation, crystallization, fluidization, etc. **Professor Clift**

•**302-262A** **INTRODUCTION TO INDUSTRIAL MICROBIAL PROCESSES 3(3-1-5).** *Prerequisite: 180-212A,B.* Introduction to the fundamental principles of the microbial world, cell structure and growth. Comparative study of the morphology, biology and relationships of algae, fungi, bacteria and viruses. Energy transformations. Survey of selected industrial microbial processes of importance in producing food, antibiotics, organic acids, polymers, etc. Microbial leaching. Ecological aspects and waste-water treatment. Single-cell protein synthesis. **Professor Volesky**

•**302-283A** **INDUSTRIAL RHEOLOGY 2(1-1-4).** *Prerequisites: 302-131B or equivalent.* An introduction to the basis of mechanical testing of viscous liquids and pastes in the process industries.Topics include: fundamentals of rheology; classification of material responses; instrumentation for rheological measurements; applications to the petroleum, plastics, food processing and pharmaceuticals industries. **Professor Dealy**

302-292A **CHEMICAL ENGINEERING LABORATORY I 2(0-3-3).** *Prerequisite: 302-191B; Co-requisite: 189-382A.* Instruction on planning and execution of experimental projects; effective work in groups; selected laboratory exercises on chemical engineering topics. **Staff**

302-293B **CHEMICAL ENGINEERING LABORATORY II 2(0-3-3).** *Prerequisite: 302-292A*.* Guided practice in planning and executing experimental projects on chemical engineering topics. **Staff**

•**302-299A,B** **PROJECTS IN CHEMICAL ENGINEERING I 2(1-0-5).** *Prerequisite: 302-001A*.* Projects on social or technical aspects of chemical engineering practice. Students must suggest their own projects to be approved and supervised by a member of the staff. **Staff**

302-303B **CHEMICAL PROCESS ECONOMICS 3(3-0-6)** *Prerequisites: 302-211A*, 302-251A*.* Quantitative analysis of economic problems relating to chemical processes. Evaluation of economic optima for operating plants. Methods of cost estimation for new plants. Interest and investment costs; depreciation; alternative investments.
Professor Boyle & Dr. Ogilvie

•302-304A **POLLUTION CONTROL IN THE CHEMICAL INDUSTRY 2(2-0-4).** *Prerequisite: 302-131B.* Basic considerations of air and water pollution control measures. Ambient air quality criteria, dispersion formula, stack design area surveys and methods of treatment. Water quality criteria, water surveys, and methods of treatment. **Dr. Cooke**

302-353A **PROCESS DESIGN 3(3-0-6).** *Prerequisites: 302-211A*, 302-212B*, 302-251A***. Integration of unit operations and chemical engineering science in the design of chemical plants. The evaluation of the optimum combination of the purchase price and operating costs is emphasized. **Mr. Rudzinski**

•302-361A **COMPUTER METHODS IN CHEMICAL ENGINEERING 3(2-0-7).** Application of scientific computers in process design, chemical engineering analysis and research. Process simulation; structure and design of general purpose programmes; linear programming; numerical analysis. Batch and conversational computer modes are used. **Professor Boyle**
